PILULÆ COCCII, P. aloes et colocynthidis—p. Coccinæ minores, P. aloes et colocynthidis—p. Coccinæ, P. aloes et colocynthidis—p. Colchici et digitalis, P. Lartigues'—p. Colocynthidis compositis, P. aloes et colocynthidis—p. ex Colocynthide cum aloes, P. aloes et colocynthidis—p. Communes, P. aloes et myrrhæ—p. Cupri, P. ammoniuretî cupri.

PILULÆ COPAIBÆ, Pills of copaiba. (Copaib. ℥ij; magnesie, recentis præpar. ℥j. Mix, and set aside till it concretes into a pilular mass, to be divided into 200 pills. — Ph. U. S.) Each pill contains nearly five grains of copaiba. Two to six for a dose.

PILULÆ DE CYNOSLOS'SO, P. de extracto o'pii. (Pulv. rad. cynoglossæ, semina hyoscyam. alb., extract. opii vinos. ℞ ℥iv; pulv. myrrh. ℥vj; oliban. ℥v; croci, castor, ℞ ℥lss; syrup opii, q. s. — Ph. P.) Anodyne. In cough, &c. Dose, gr. iv to gr. viij.

PILULÆ DEPURANTES, P. hydrargyri submuriatis compos. — p. Ephrasticæ, P. de aloes et fœtidis.

PILULÆ FERRI CARBONATIS, Pills of carbonate of iron, Vallet's pills, Vallet's ferruginous pills. (Ferri sulph. ℥viij; sodæ carbonat. ℥x; Mel. despumat. ℥ij; sacchar. ℥ij; aquæ bullientis, Oij; syrup. q. s. Dissolve the sulphate of iron and carbonate of soda, each in a pint of the water, and to each solution add a fluidounce of syrup; then mix the two solutions in a bottle just large enough to contain them; close it accurately with a stopper, and set it by, that the carbonate of iron may subside. Pour off the liquid, and having washed the precipitate with warm water, sweetened with syrup in the proportion of f℥j of the latter to Oj of the former, until the washings no longer have a saline taste, place it upon a flannel cloth, and express as much water as possible; then mix it with the honey and sugar. Lastly, heat the mixture in a water-bath, until it attains a pilular consistence. — Ph. U. S.)

PILULÆ FERRI COMPOSITÆ, Compound pills of iron, Pilulæ ferri cum myrrhâ, (F.) Pilules de fer composées. (Myrrh. in pulv. ℥ij; sodæ subcarb., ferri sulph. ℞ ℥j; syrup. q. s. Mix, to form 80 pills. — Ph. U. S.) Tonic. Dose, gr. x to xx.

PILULÆ FERRI IODIDI, Pills of iodide of iron. (Ferri sulphat. ℥j; Potass. iodid. ℥iv; tragacanth. pulv. gr. x; sacchar. pulv. ℥ss. Beat with syrup into a mass, to form 40 pills. — Ph. U. S.) Dose, one to three, where a tonic and eutrophic is indicated.

PILULÆ FERRI CUM MYRRHÂ, P. Ferri compositis—p. Fœtidæ, P. galbani compositis.

PILULÆ GAL'BANI COMPOSITÆ, P. asafoetida compositis, P. fœtidæ, P. gummo'sæ, P. e gummi, Compound gal'banum pill, Pilulæ antispa'stica, P. antihyster'ica, P. myrrhæ compositis, Gum

pill. (Galban., myrrhæ, ℞ ℥vj; asafoetida, ℥ij; syrup. q. s. to form 240 pills. — Ph. U. S.) Antispasmodic and emmenagogue. Dose, gr. x to xx.

PILULÆ GUMMI, P. galbani compositis—p. Gummi guttæ aloet'icæ, P. cambogis compositis—p. Gummosæ, P. galbani compositis—p. de Gutta gamandrâ, P. cambogis compositis.

PILULÆ EX HELLEB'ORO ET MYRRHÂ, P. ton'ica, Bacher's pills, Tonic pills of Bacher, Pills of hellebore and myrrh. (Ext. helleb. nig. myrrh. ℞ ℥j; fol. cardui benedict. in pulv. ℥ij. M. — Ph. P.) Tonic and emmenagogue. In dropsical, cutaneous, and verminous affections. Dose, gr. iv to gr. viij.

Matthew's pills, — Starkey's pills, are formed of rad. helleb. nigr., rad. glycyrrh., sapon. Castill., rad. curcumæ, opii purif., syrup. croci, ℞ ℥iv; ol. tereb. q. s. ut fiat massa. — Gray.

PILULÆ HYDRAGOGÆ, P. cambogis compositis—p. Hydragogæ Bontii, Pilulæ aloes et cambogis.

PILULÆ HYDRAR'GYRI, P. mercurial'es, Mercurial pill, Blue pill, (F.) Pilules de Mercure. (Hydrarg. purif. ℥j; conf. rosæ, ℥lss; glycyrrh. pulv. ℥ss. Rub the quicksilver with the confection, until the globules disappear; then add the liquorice powder, and beat the whole into a uniform mass, to be divided into 480 pills. — Ph. U. S.) Antisyphilitic; mercurial; — in large doses, purgative.

A purgative pill, much prescribed by Mr. Abernethy, and called Abernethy's pill, consisted of pil. hydrarg. gr. x; jalap. pulv. gr. xx; syrup rhamni, q. s. ut fiat pil. vj. Two were given at night, and the next morning a wineglassful of infusum sennæ.

PILULÆ HYDRAR'GYRI CHLO'RIDI MITIS, Pills of mild chloride of mercury, Calomel pill. (Hydrarg. chlorid. mit. ℥ss; acacia, in pulv. ℥j; syrup. q. s. ut fiat pil. 240. — Ph. U. S.) Each pill contains one grain.

PILULÆ DE HYDRARGYRO, SCAMMO'NIO ET ALOE, vulgo MERCURIAL'ES, (F.) Pilules Mercurielles ou de Mercure, Scammonie et Aloe. (Hydrarg. purif. ℥j; mellis, ℥xj. Rub until the globules disappear; then add aloes Socot., scammon. ℞ ℥ij; mastic, cinnam. ℞ ℥ij. Make into a mass. — Ph. P.) Uses, same as the last, but they are more purgative. Dose, gr. viij to lxx. These pills are nearly the same as the Pastilles de Renaudot.

PILULÆ EX HYDRARGYRO MURIATICO MITI CUM SULPHURE STIBIATO AURANTIACO, Pilulæ hydrargyri submuriatis compositis.

PILULÆ HYDRARGYRI SUBMURIATIS COMPOSITÆ, Pilulæ ex stib'io et hydrar'gyro, P. antihyster'ica, P. ex hydrargyro muriat'ico miti cum sulphure stib'io aurantiaco, P. resolventes cum mercurio, P. depurantes, P. hydrargyri submuriatis, Compound pills of submuriate of mercury, Calomel pills, Plummer's pills, Red pill. (Hydrarg. submur., antimon. sulphur. precipitat. sing. ℥ij; guaiac. gum resin. contrit. ℥iv; spirit. rect. ℥ss. Beat together. — Ph. L.) Mercurial, and reputed to be diaphoretic and alterative. Dose, gr. v to x.

Leake's pilula saluta'ria resembles these. It is used in syphilis.

PILULÆ MERCURIALES, P. hydrargyri, P. de hydrargyro, scammonio et aloë—p. Doctoris Morton, P. balsamicæ—p. Myrrhæ compositis, P. Galbani compositis.

PILULÆ OPIA'TÆ, P. Theba'ica, Opiate pills, Common night pills, Anodyne pills, Nepen'thes opiatum, (F.) Pilules opiacées. (Opii, p. 1; ext. glycyrrh. p. 1; fruct. myrt. piment. p. 2. Mix. — Ph. E.) Five grains contain gr. ss of opium.

PILULÆ OPII, P. saponis cum opio—p. de Extracto opii, P. de cynoglossa—p. ex Oxido stibii et hydrargyri sulphureto nigro compositæ, Pilulæ antiscrophulosæ—p. Resolventes cum mercurio, P. hydrargyri submuriatis compos. — p. de Rhabbaro, Pilulæ rhei compositæ.

The stomachic nostrum, sold under the name of *Moseley's pills*, consists merely of *rhubarb* and *ginger*.

PILULÆ QUINÆ SULPHATIS, *Pills of sulphate of quinia*. (Quin. sulph. ℥j; acacia, in pulv. ℥ij; mel. q. s. ut fiat pilulæ 480.—Ph. U. S. Each pill contains a grain of the sulphate of quinia.

PILULÆ RHEI, *Pills of rhubarb*. (Rhej, pulv. ℥vj; saponis, ℥ij. M. et fiat pil. 120.—Ph. U. S.) Each pill contains three grains of rhubarb.

PILULÆ RHEI COMPOSITÆ, *P. de Rhabar'baro, Compound rhubarb pills*. (Rhei, pulv. ℥j; aloes, pulv. ℥vj; myrræ, pulv. ℥iv; ol. mentha pip. f℥ss. Beat into a mass, with *syrup of orange-peel*, to form 240 pills.—Ph. U. S.) Laxative and stomachic. Dose, gr. x to xx.

Griffitt's pills, so called after Dr. S. P. Griffitts, of Philadelphia, who prescribed them as a tonic aperient, were formed as follows:—Rhej, pulv. ℥ias; ferri sulph. ℥ss; saponis, ℥ij; aquæ, q. s. ut fiat massa in pil. xl dividenda. Dose, three or four at bedtime.

PILULÆ RUFÆ, P. aloes et myrrhæ—p. Salutaris, Leake's, see Pilulæ hydrargyri submuriatis compositæ—p. Saponaceæ, P. saponis cum opio—p. Saponis compositæ, P. saponis cum opio.

PILULÆ SAPONIS CUM OPIO, *P. saponis cum opio, Pills of soap and opium, P. saponis compositæ, (F.) Pilules de savon et d'opium*. (Opii, ℥ss; sapon. ℥ij. M.—Ph. U. S.) Five grains contain one of opium.

The Pharmacopœia of the United States has a form for the *Pilulæ opii*, *Opium pills*, as well as for the *Pilulæ saponis compositæ*; the only difference between them being in the proportion of the ingredients. The following is the formula for the *Pilulæ opii*:—Opii, pulv. ℥j; saponis, gr. xij. Beat with water into a mass to form 60 pills.

PILULÆ S SCILLÆ, P. scillæ compositæ.

PILULÆ SCILLÆ COMPOSITÆ, *P. scillit'icæ, P. scillæ cum sinid'ere, P. e scillâ, Compound squill pill*. (Scillæ, pulv. ℥j; zingib. pulv., ammoniac. pulv. ʒā ℥j; saponis, ℥ij; syrup. q. s. ut fiat pil. 120.—Ph. U. S.) Dose, two pills. Expectorant and diuretic. Dose, gr. x to xx.

PILULÆ SCILLÆ CUM ZINGIBERE, P. scillæ compositæ—p. Scilliticæ, P. scillæ compositæ—p. ex Stibio et hydrargyro, P. hydrargyri submur. compos.—p. Stomachicæ, P. aloes et kinæ kinæ.

PILULÆ STRYCHNINÆ, *Pills of Strychnia*. (Very pure strychnine, 2 gr.; conserve of roses, ℥ss. Make into 24 pills.) One or two for a dose.

PILULÆ S STYRACIS, *Storax Pills*. (Styracis pur. ℥ij; opii purif., mellis, croci, sing. ℥j. Ph. D.) Six grains contain one of opium.

PILULÆ SUBLINGUALES, Hypoglotides.

PILULÆ DE TEREBINTHINÆ, *Turpentine Pills*. Made of turpentine boiled in 3 times its weight of water, until, when thrown into cold water, it forms a soft paste, which has the properties of turpentine, and has been administered in gleet, &c.

PILULÆ THEBAICÆ, P. opiatæ—p. Tonicæ, P. ex Helleboro et myrrhâ.

PIL'ULAR, *Pilularia*; from *pilula*, 'a pill.' Relating to pills,—as 'a *pilular mass*,' 'pilular form,' &c.

PILULES, Pilulæ—p. *Agrégatives*, see *Aggregate*—p. *d'Aloes ou aloétiques*, Pilulæ aloeticæ—p. *d'Ammoniaque de cuivre*, Pilulæ ammoniuretii cupri—p. *Bénites de Fuller*, Pilulæ de aloes et fatidias—p. *de Fer composées*, Pilulæ ferri compo-

sitæ—p. *Ferrugineuses de Vallet*, see *Ferri proto-carbonas*—p. *Gourmandes*, Pilulæ aloes et kinæ kinæ—p. *de Mercure*, Pilulæ hydrargyri—p. *de Mercure, &c.*, Pilulæ de hydrargyro, et scammonio et aloes—p. *Mercurielles*, Pilulæ de hydrargyro, scammonio et aloes—p. *Opiacées*, Pilulæ opiatæ—p. *de Savon et d'Opium*, Pilulæ saponis cum opio.

PILULIER (F.) *Pill Machine*. An instrument invented by the Germans for rolling and dividing pills. Also, the earthen pot in which pills are preserved.

PILUM, *Pistillum, Pistillum, Hyperos, Cer'cis*, (F.) *Pilon*. A pestle. A wooden, iron, bell-metal, marble, agate, porcelain, or glass instrument for beating or dividing substances in a mortar.

A *spring pestle* is one attached above to a spring, so as to take off the weight, and thus lessen the labour of pounding.

PILUS, Capillus, Caul, Hair.

PIMELE, Fat.

PIMELECCHYSIS, *Pimelorrhœa*.

PIMELICIOUS, Fatty.

PIMELITIS, from *πικελη*, 'fat,' and *itis*, denoting inflammation. Inflammation of the adipous tissue.

PIMELODES, Fatty.

PIMELO'MA, from *πικελη*, 'fat.' A fatty swelling.

PIMELORRHŒA, *Pimelec'chysis*, from *πικελη*, 'fat,' and *ρρω*, 'I flow.' A morbid discharge or disappearance of fat.

PIMELORTHOPNŒA, *Piorthopnœa*; from *πικελη*, 'fat,' *ορθος*, 'upright,' and *πνευν*, 'to breathe.' Dyspnœa, practicable only in the erect attitude, owing to fat.

PIMELO'SIS, *Obes'itas nim'ia*, from *πικελη*, 'fat.' Conversion into, or formation of, fat,—as *Pimelo'sis hepatic'a*, 'fatty degeneration of the liver.'

PIMELOBIS HEPATICA, *Adiposis hepatica*—p. *Nimia*, see *Polysarcia*.

PIMENT, Capsicum annum—p. *Royal*, *Myrica gale*.

PIMENTA, see *Myrtus pimenta*.

PIMENTÆ BACCÆ, see *Myrtus pimenta*.

PIMENTO, see *Myrtus pimenta*.

PIMIACULA, *Labia pudendi*.

PIMPERNEL, BLUE, *Scutellaria lateriflora*—p. Red, *Anagallis*—p. Scarlet, *Anagallis arvensis*—p. Water, *Veronica beccabunga*.

PIMPILIM, *Piper longum*.

PIMPINEL, see *Pimpinella*—p. Italian, *Sanguisorba officinalis*.

PIMPINELLA ALBA, P. saxifraga—p. *Angelicefolia*, *Ligusticum podagraria*.

PIMPINEL'LA ANI'SUM, *Anise plant, Anisum, A. officinal'is seu vulgare, Sion ani'sum, A'pium ani'sum, Sola'men intestino'rum, An'esum*, (F.) *Anis. Family, Umbelliferae. Ser. Syst. Pentandria Digynia*. A native of Egypt. The seeds, *Ani'sum*, (Ph. U. S.) *Sem'ina Ani'si, An'iseed*, have an aromatic odour; and a sweetish, warm, grateful taste. They are carminative, and used in dyspepsia and in tormina of infants. Dose, gr. xv to ℥j, bruised. The oil,—*OLEUM ANI'SI*, (F.) *Huile d'anis*—is officinal. Dose, gtt. v to xv. Most of the oil used in this country under the name of *Oil of Anise* is said to be obtained from *Illicium Anisatum*.

PIMPINELLA, GREATER, P. magna—p. *Hircina*, P. Saxifraga—p. *Laterifolia*, *Sion anni*.

PIMPINEL'LA MAGNA seu *nigra seu major seu rubra*; *Greater Pimpinella*; *Tragoselinum magnum seu majus, Daucus, Cyan'opus*, (F.) *Boucage majeur*. The root has been extolled as diuretic

and resolvent, as well as in erysipelatous ulcerations, tinea capitis, rheumatism, &c.

PIMPINELLA MAJOR, *P. magna*—*p. Nigra*, *P. magna*—*p. Nostras*, *P. saxifraga*—*p. Officinalis*, *Sanguisorba officinalis*—*p. Rubra*, *P. magna*.

PIMPINELLA SAXIFRAGA, *Saxifraga*, *Burnet saxifraga*, *Poterium sanguisorba*, *Sorbastrel'la*, *Tragoselinum*, *T. saxifraga*, *Pimpinella hirci'na* seu *umbellifera* seu *alba* seu *nostras*, (*F.*) *Boucage mineur*, *Petit B.*, *Pimprenelle*. The root has an unpleasant smell, and hot, pungent, bitterish taste. It has been recommended as a stomachic; and as a stimulating gargle in paralysis of the tongue.

PIMPINELLA UMBELLIFERA, *P. saxifraga*.

PIMPLE, Papula.

PIMPLED, Papulose.

PIMPRENELLE, *Pimpinella saxifraga*—*p. Noire*, *Sanguisorba officinalis*.

PIN. Perhaps from *pennum*, low Latin; or from *spina*; *Spina ferrea*, *Acus capita'ta*, (*F.*) *Épingle*. An iron or brass instrument, generally of a small size, pointed at one extremity, and having a head at the other. It is used, in Surgery, to fix rollers and dressings; and occasionally in sutures.

PIN À PIGNON, see *Pinus picea*.

PINASTELLUM, *Peucedanum*.

PINASTER, *Pinus sylvestris*.

PINCÉ, Pinched.

PINCE LITHODRASSIQUE, see *Lithodrassee*.

PINCÉE, Pugillus.

PINCERS, Forceps.

PINCETTES, Forceps.

PINCHED, *Contractus*, (*F.*) *Pinct*, *Grippé*.

An epithet applied to the face, when the features are contracted or shrunken; as in violent abdominal affections, or during intense pain.

PINCKNEYA PUBENS, *P. Pubescens*, *Georgia Bark*, *Bitter Bark*, *Florida Bark*, *Feever tree*. This bark has been used in Georgia in the cure of intermittents, and successfully. It is a powerful bitter. Dose of the powder, ℥i.

PINDARS, *Arachis Hypogea*.

PINE APPLE, *Bromelia ananas*—*p. Apherousii*, *Pinus cembra*—*p. Ground*, *Lycopodium complanatum*—*p. Ground*, stinking, *Camphorosma Monspeliaca*—*p. Mountain*, see *Pinus mughos*—*p. Mugho*, see *Pinus mughos*—*p. Sap. American*, *Hypopitys lanuginosa*—*p. Stone*, *Pinus pinea*—*p. Sugar*, see *Arrow Root*.

PINEA, *Pinus pinea*.

PINE'AL, *Pinea'tis*, from *pinus*, 'a pine.' That which resembles a pine-apple.

PINEAL GLAND, *Glandula pinea'tis*, *Cerebral epiph'ysis*, *Cona'rium*, *Cono'des corpus*, *Penis cerebri*, *Corpus turbina'tum*, *Virga seu Turbo cerebri*, is a small body, of a conical shape; pale red or grayish colour; and soft consistence; situate between the fornix and the tubercula quadrigemina. It almost always contains sabulous particles, *Sab'ulum cona'rii*: when these are grouped together over the base of the gland, they form the *Acer'vulus Cerebri* of Sömmerring, *A. seu Lapi'di glan'dula pinea'tis*. From its anterior part arise two medullary strim, which proceed over the posterior commissure; coast along the optic thalami, and unite at the anterior pillar of the fornix,—the *habe'nae* or *reins of the pineal gland*.

The uses of the pineal gland are unknown. Descartes supposed it to be the seat of the soul!

PINEL, see *Pinus pinea*.

PINEOLI, see *Pinus pinea*.

PINEUS PURGANS, *Jatropha curcas*.

PINGUIC'ULA, *Pterygium pinguis* seu *lar-*

da'cesum, from *pinguis*, 'fat,' 'fatty.' A small, whitish-yellow tumour in the sclerotic conjunctiva and subjacent areolar tissue, close to the margin of the cornea on its nasal or temporal side; so called from its being supposed, but erroneously, to be of a fatty nature.

PINGUE'DO, Fat—*p. Renalis*, *Nephridion*.

PINGUIC'ULA VULGARIS, *P. alpi'na*, *Sanic'ula monta'na*, *S. Eboracensis*, *Vi'ola palu'tris*, *Dodecath'eon Plin'ii*, *Butter-wort*, *Yorkshire San'icle*. Family, Personneæ. *Sex. Syst.* *Dianthria Monogynia*. The unctuousity of this plant has caused it to be applied to chaps, and as a pomatum to the hair. Decoctions of the leaves, in broths, are used by the common people in Wales as a cathartic.

PINGUID, Fatty.

PINGUIDINOSUS, Fatty.

PINGUIN, *Bromelia pinguin*.

PINGUITUDO, *Polysarcia adiposa*.

PINHOLE PUPIL, see *Pupil*, pinhole.

PINHONES INDICI, *Jatropha curcas*.

PINK, CAROLINA, *Spigelia Marilandica*.

PINK DYE. *Stripped safflower*, ℥i, *subcarb. of potass.* gr. xvij, *spirit of wine* ℥vij; digest for two hours; add *distilled water* ℥ij; digest for two hours more, and add *distilled vinegar* or *lemon juice* q. s., to reduce it to a fine rose-colour. Used as a cosmetic.

PINK, GROUND, *Silene Virginica*—*p. Indiana*, *Spigelia Marilandica*—*p. Wild*, *Silene Virginica*.

PINNA, Ala, Pavilion of the ear—*p. Marina*, see *Bissus*.

PINNACULUM FORNICIS GUTTURALIS, Uvula.

PINNÆ HEPATIS, Lobes of the liver—*p. Naris*, see *Nasus*.

PINNULA, *Aileron*.

PINNULÆ HEPATIS, Lobes of the liver.

PINO'LI. (*S.*) A preparation used for subsistence on long journeys in the West. It is parched corn, beaten or ground very fine, and sweetened with sugar, to be used with water, and drunk on the march. It is the cold flour of the Indiana, and early Western pioneers.

PINONCILLO TREE, *Castillognia lobata*.

PINUS ABIES, *P. excelsa* seu *picea*, *Abies*, *Abies rubra* seu *excelsa* seu *picea*, *El'at' thele'ia*, *Pice'a*, *Norway Spruce Fir*, *Yew-leaved Fir*. *Nat. Ord.* *Conifere*. *Sex. Syst.* *Monococia Monadelphica*. The tops are used in making *Spruce Beer*.

Essence of Spruce, *Essentia Abie'tis*, is a fluid extract, prepared by decoction from the twigs of this species of fir. From this is made *Spruce Beer*.

This fir affords the Burgundy pitch and common frankincense. 1. *Burgundy Pitch*, *White pitch*, *Pix Burgundica*, *Pix alba*, *Res'na abie'tis humida*, *Res'na alba humida*, *Pini abie'tis resina spontè concre'ta*, *Pix ar'ida*, *Pix abie'tis*, *P. abietis* (*Ph. U. S.*) (*F.*) *Poiz blanche*, *Poiz grasse*, *P. jaune*, *P. de Bourgogne*. This prepared concrete juice is of a close consistence, rather soft, of a reddish-brown colour, and not unpleasant smell. It is very adhesive to the skin; and, consequently, forms excellent plasters for remaining upon the part for some time;—as in cases of affections of the chest. 2. *Abie'tis Res'na*, (*Ph. L.* since 1809.) *Thus*, *Common Frankincense*, *Perrosin*, *Thus femininum*, *T. vulg'nt*, *Olib'anum vulgare* seu *cylo'stra*, *Resina abietis sicca*, *Resin of the Spruce Fir*. It is solid, dry, brittle; externally, brownish-yellow; internally, whitish. Used in plasters like the last.

PINUS ABIES, see *P. picea*—*p. Alba*, *P. picea*.

PINUS BALSAMÆ, *Abies balsamæ* seu *bal-*

samifera, *Peucea balsamea*. The tree which affords the *Canada Balsam*, *Balsamum Canadense* seu *de Can'ada*, *Resina strobil'ina*, *Terebinth'ina Canadensis*, *Pini balsamea*, *Canada Turpentine* or *Balsam*, *Balsam of Fir*, (F.) *Baume de Canada*, is one of the purest turpentine. It has the common properties of those substances.

PINUS CANADENSIS, *Abies Canadensis*, *Hemlock Spruce*. A tree, which is abundant in Canada, Nova Scotia, and the more northern parts of New England, and is found in the elevated and mountainous regions of the Middle States. The pitch—*Pix Canadensis*, *Canada Pitch*, *Hemlock Pitch*—obtained from it is commonly known under the name *Hemlock Gum*.

PINUS CANDICANS, *P. Picea*.

PINUS CEMERA, *P. Montana*, *Aphernous'li Pine*. It yields an agreeably scented turpentine:—the *Carpathian Balsam*, *Balsamum Carpathicum*, *B. Libani*, *Carpathicum*, *Briançon Turpentine*. The nuts, *Cembro nuts*, *Nu'dei Cembra*, have an eatable kernel, and yield oil. The shoots yield *Riga Balsam* by distillation.

PINUS DAMARRA, *Ag'athis Damarra*, grows in the East India Islands. The juice speedily concretes into a very hard resin,—the *Damarra turpentine*.

PINUS EXCELSA, *P. abies*—*p. Gallica*, *P. picea*.

PINUS LARIX *Abies larix*, *Larix*, *L. communis* seu *decidua* seu *Europæa* seu *pyramidalis*. The Larch, (F.) *Mélèze*. From this tree exudes *Or'emberg gum*, *Briançon manna*, *Gummi laricis* seu *Oremburgen'se* seu *Uralen'se*, *Manna Briançon'ina* seu *laricea*. It also yields, by boring, *Common Venice Turpentine*, *Resina Laricis*, *Terebinthina Veneta* seu *laric'ina*, *Pini Laricis resina liquida*, (F.) *Térébenthine de Venise*, *M. de Mélèze*. It is usually thinner than the other sorts of turpentine.

PINUS MUGHOS. The *Mountain* or *Mugho Pine*, *Pinus Pumilio*. From the extremities of the branches exudes the *Resina Strobil'ina*, of the Germans, or *Hungarian Balsam*. It is also obtained, by expression, from the cones. By distillation, the Hungarian balsam affords the *Krumholz oil*, *Oleum Templinum*.

PINUS PALUSTRIS, see *Pinus sylvestris*.

PINUS PICEA, *P. Abies*, *Abies*, *A. picea* seu *pectinata* seu *Gallica* seu *alba* seu *can'dicane* seu *vulgaris* seu *taxifolia*, *European Silver Fir Tree*, *Év'ate*, (F.) *Sapin communis*. By piercing the tubercles of the bark of this fir, the *Strasburg Turpentine* is obtained:—the *Resina Abietis*, (Ph. L. before 1809), *Oleum Abietis*, *Terebinth'ina Argentoratensis*.

PINUS PINASTER, see *P. sylvestris*.

PINUS PINEA, *Stone Pine*, *Pinea*, *Pinus*, *P. uberima* seu *sativa*. The nuts, *Zirbel nuts*, *Pine nuts*, *Nu'clei Pineæ*, *Pinei*, *Pine'oli*, (F.) *Pin à pignons*, are eaten raw, or preserved like almonds. They are, also, used in emulsions.

PINUS PUMILIO, see *Pinus mughos*—*p. Sativa*, *P. pinea*.

PINUS SYLVESTRIS, *Pinaster*, *Peuce*, *Scotch Fir*. This pine, as well as *P. maritima*, (*P. Pinaster*) and other species of *Pinus*, affords common turpentine and its oil, resin, tar, and pitch. 1. *Common Turpentine of Europe*, *Terebinth'ina*, *T. vulgaris*, *T. communis*, *Resina pini*, *Bijon*. *Horse Turpentine*, *Bordeaux Turpentine*, (F.) *Térébenthine de Bordeaux*, *Térébenthine commune*, is obtained by wounding the tree in hot weather. It is used, chiefly, as a dressing for wounds, &c., in horses, and for the distillation of the oil, (see *Oleum Terebinthine*.) The *White Turpentine*, or *Common Turpentine of America*—*Terebinth'ina*, Ph. U. S.—is produced chiefly from *Pinus palustris* and *P. taeda*, and perhaps

from other species inhabiting the Southern States. When the oil is distilled with water, yellow resin, or *Rosin*, (*Resina*, Ph. U. S.)—*Resina flava*—is left, which is only used in the formation of ointments and plasters: if without the addition of water, the residuum is common resin or *Colophony*. 2. When the cold begins to check the exudation of the common turpentine, part of it concretes in the wounds. This is called, in France, *Gallipot*, *Barras*; and *White Rosin*, *Resina alba*, when hardened after long exposure to the air. 3. When the old trees are subjected to distillation, in a coarse manner, Tar is obtained—*Hygropisios*, *Pisæ*, *Pix cedria*, *Resina pini empyreumatica liquida*, *Terebinth'ina empyreumatica*, *Alchitram*, *Alchit'ura*, *Cedria*, *Pix liquida*, (F.) *Goudron*, *Brai liquide*. Tar water, *Aqua Picea*, *A. Piceis*, *Infusum Piceis liquida* seu *Piceis empyreumatica liquida*, *Po'tio picea*, (F.) *Eau de Goudron*, was, at one time, a fashionable remedy in numerous complaints, and its use has been revived, since its virtues have been presumed to be owing to creosote. It is employed chiefly in pulmonary affections, and the vapour has been recommended in phthisis and other diseases of the lungs. It is used externally as a detergent. 4. *Common Pitch*, *Pix nigra*, *Black Pitch*, *Burnea*, *Burnia*, *Stone Pitch*, *Pix sicca*, *P. atra*, *P. navelis*, *Topissa*, *Palimpis'ea*, *P. arida* (Ph. L. before 1809), (F.) *Pois navale*, *P. noire*, is obtained by inspissating tar. It is used only as a resolvent in plasters.

PINUS TAEDA, see *P. sylvestris*—*p. Taxifolia*, *P. picea*—*p. Uberrima*, *Pinus pinea*—*p. Vulgaris*, *P. picea*.

PIONE, *Pæonia*.

PIONY, *Pæonia*.

PIORTHOPNŒA, *Pimelorthopnæa*.

PIOULQUES, (F.) A kind of sucking-pump, invented by Louis, for extracting water that had entered internal cavities, in cases of drowning. A useless instrument.

PIPE-PLANT, *Monotropa uniflora*.

PIPER, see *Piper nigrum*.

PIPER ALBUM *Leucopiper*, *White Pepper*, is black pepper freed from its cuticle.

PIPER AUGUSTIFOLIUM, *Matico*—*p. Aromaticum*, *P. nigrum*—*p. Betel*, *Betel*—*p. Brazilianum*, *Capsicum annuum*—*p. Calecuticum*, *Capsicum annuum*.

PIPER CAPENSE, a South African species, has all the properties of the peppers, and, in appearance and taste, greatly resembles cubeba. It possesses, too, similar virtues.

PIPER CARYOPHYLLATUM, see *Myrtus pimenta*—*p. Caudatum*, *P. cubeba*—*p. Chiapæ*, see *Myrtus pimenta*.

PIPER CUBEBA, *Per'sea cubeba*, *Laurus cubeba*, *Litæa cubeba* seu *piper'ita*. A native of Java and Guinea. The odour of these berries—*Cubeba*, *Com'peper*, *Compeba*, *Cubal sini*, *Piper caudatum*, *Bacca Piperis glabri*, *Cubeb Pepper*, *Tailed Pepper*, *Cuma'mus*, (F.) *Poivre-à-gueue*, *Quabebe*—is aromatic; taste at first cooling, afterwards pungent. The active principle is an essential oil—*Oleum Cubebæ*, oil of cubebs—which is officinal in the Pharm. U. S. The properties of the cubeb are stimulant and purgative. It is used only in gonorrhœa. Dose, from ℥j to ℥j, in powder, three or four times a day; of the volatile oil, 10 or 12 drops.

'Turkey yellow berries,'—the dried fruit of the *Rhamnus Catharticus*—are often substituted for cubebs.

PIPER GUINEENSE, *Capsicum annuum*—*p. Hispanicum*, *Capsicum*—*p. Indicum*, *Capsicum annuum*—*p. Jamaicense*, see *Myrtus pimenta*.

PIPER LONGUM, *Macropiper*, *Acapat'li*, *Caturip'ali*, *Pim'pilim*, *Long Pepper*, (F.) *Poivre*

long. As we receive the berries, they consist of the unripe fruit dried in the sun; and are small, round grains, disposed spirally on a cylindrical receptacle. They are stimulant, carminative, and tonic, like the other peppers. Dose, gr. v to ℥j.

PIPER LUSITANICUM, Capsicum annuum—p. Murale, Sedum.

PIPER METHISTICUM, see Ava.

PIPER NIGRUM, *Melanopiper*, *Molagoco'di*, *Lada*, *Piper aromaticum*, *Piper* (Ph. U. S.), *Black Pepper*, (F.) *Poivre noir*. Black pepper is the unripe fruit dried in the sun. Virtues, same as those of the other peppers.

PIPER ODORATUM JAMAICENSE, see Myrtus pimenta—p. Tabascum, see Myrtus pimenta—p. Turcicum, Capsicum annuum.

PIPERINA, *Piperinum*, *Pip'erine*, *Piperin*. A resinoid substance, obtained from the piper nigrum by M. Gerstadt, in which a part of the virtues of the pepper resides. It has been employed, like the quinia, in intermittents, and successfully.

PIPEROID, *Piperoidum*, *Zingiberin*. A yellow syrupy mass obtained by exhausting ginger root by ether. It is soluble in ether, alcohol, and oils, and may be given in tincture, sugar, lozenge, or syrup, in cases where ginger is indicated.

PIPEROPASTUS; from *πικρῶν*, 'pepper,' and *πασσῶν*, 'to strew.' Strewed with pepper,—socks, for example, where it is desirable to excite the surface of the feet.

PIPETTE. 'A small pipe.' In Pharmacy, a small tube terminating in a perforated point, which is passed into a liquid to be removed, from the surface of a precipitate, for example. The liquid is drawn into the tube by applying the mouth to the free extremity.

PIPINA, *Men'tula parva*. A small penis.

PIPPERIDGE BUSH, see *Oxycantha Galeni*.

PISSISEWA, *Pyrola umbellata*—p. Spotted, *Pyrola maculata*—p. White, *Pyrola maculata*.

PIPTONYCHIA, Onychoptosis.

PIQUETE, see *Sablé*.

PIQUIRE, Puncture, Wound, punctured.

PISA, (CLIMATE OF.) Pisa has long been celebrated as one of the most favourable climates in Italy for the consumptive. It is genial, but somewhat oppressive and damp. It is softer than that of Nice, but not so warm; less soft, but less oppressive than that of Rome.

PISCIARELLI, MINERAL WATERS OF. A spring at Monte Secco, in Italy, between Lake Agnano and Solfatara. It is thermal (100° Fahr.), sulphureous, and carbonated, and is chiefly used in old ulcers, leucorrhœa, chronic diarrhœa, and in cutaneous affections.

PISCID'IA ERYTHRI'NA, *Jamaica Dog-wood*. A small branching tree, common in most of the West India Islands;—*Diadelphia Decandria* of Linnæus. It is used in the West Indies to poison fish. It appears to be an acro-narcotic, and has been used in the form of a tincture of the bark of the root in toothach.

PISCINA, *Baignoire*.

PISCIV'OROUS, *Pisciv'orus*, *Ichthyoph'agous*, *Ichthyoph'agus*, from *piscis*, 'a fish,' and *voro*, 'I eat.' Feeding or subsisting on fish.

PISIFORM, *Pisiformis*, from *pisum*, 'a pea,' and *forma*, 'shape.'

PISIFORM'E, OS, *Os lenticularè*, *Os orbicularè*, *Os extra ordinem carpi*, (F.) *Os hors du rang*, is the fourth bone of the first row of the carpus. It is round, and gives attachment to the tendon of the cubitalis anterior, and to the anterior transverse ligament of the carpus. It is articulated, behind, with the os cuneiforme.

PISO, Mortar.

PISSA, see *Pinus sylvestris*.

PISSASPHAL'TUS, *Pissasphaltum*, *Mineral Pitch*, from *πίσσα*, 'pitch,' and *ασφαλτος*, 'bitumen.' (F.) *Pois minérale*. A thicker kind of *Petroleum* or *Rock oil*; formerly employed as a vulnerary. It is synonymous with *Glaucious bitumen*, *Malta bitumen*, and *Mineral tar*.

PISSELE'UM, *Oleum Pici'num*, from *πίσσα*, 'pitch,' and *ελαίον*, 'oil.' An oily matter obtained from boiling pitch, and used for the same purposes as tar.

PISSELEUM INDICUM, *Petroleum*.

PISSEMENT DE SANG, *Hæmaturia*.

PISSENLIT, *Leontodon taraxacum*.

PISSE'ROS, from *πίσσα*, 'pitch.' Ancient name of a cerate, prepared of olive oil, oil of roses, and dried pitch. It was, also, called *Cera'tum pica'tum*, and *C. tetraphar'macum*.—*Hippocrates*.

PISSE'TES, *Vinum pica'tum*. Same etymon. A wine prepared from tar and the must of the grape. It was regarded to be stomachic.

PISSE'OSIS, *Malacia*.

PISSEWEED, *Anthemis cotula*.

PISTACHIO NUTS, see *Arachis hypogæa*, *Pistacia vera*.

PISTACIA CHIA, *P. lentiscus*.

PISTACIA LENTIS'CUS, *P. Chia*, *Terebin'thus lentiscus*, *Lentiscus vulgaris*; the *Mastic Tree*. Family, *Terebinthaceæ*. The wood of this tree abounds with the resinous principles of mastic; and a tincture made from it has been used in the cure of dyspeptic affections, gout, and dysentery. It yields, by incision, the resin *Mastic*, *Res'na Lentisci'na*, *Men'frige*, *Mastic'hè*, *Mastix*, *Pistacia Lentis'ci Resi'na*. This resin has an agreeable smell when heated: is almost insipid: in globular, irregular, yellowish, semi-transparent masses; soluble in ether; partially so in alcohol. It is stimulant, and has been used in old coughs, and gleet, and is chewed to sweeten the breath. It is sometimes, also, employed, to stop holes in carious teeth.

PISTACIA NARBONENSIS, *P. lentiscus*—p. *Reticulata*, *P. lentiscus*.

PISTACIA TEREBIN'THUS, *P. Narbonensis* seu *reticulata* seu *vera*, *Turpentine Tree*, *Hab-el-Kalimat*, *Terebinthus vulgaris*, *Terminthos*. The tree which affords the *Cyprus Turpentine*, *Res'na Terebin'thi*, *Terebinth'ina vera*, *T. Chia*, *T. Cyp'ria*, (F.) *Térébinthine de Chio*. This substance is classed amongst the resins. It is procured by wounding the bark of the trunk. The best Chio turpentine is of about the consistence of honey; very tenacious, clear, and almost transparent; of a white colour inclining to yellow, and of a fragrant smell; moderately warm to the taste, but free from acrimony and bitterness. It resembles in virtues the other turpen-tines.

PISTACIA VERA. Name of the tree which affords the *Nux Pistacia*. *Pista'chio nuts* have a sweetish, unctuous taste, resembling that of sweet almonds. Like these, they afford an oil, and may be formed into an emulsion.

PISTILLUM, *Pilum*.

PISTOLOCHIA, *Aristolochia pistolochia*.

PISTORIENSIS GLADIUS, *Bistouri*.

PISUM, *Pisum sativum*, *Pea*, *Garden pea*, (F.) *Pois*, *P. cultivè*. The seeds of the pea, *Fam. Leguminosæ*, *Sex. Syst. Diadelphia decandria*, are much employed as an aliment, both in the fresh and dried state. They are farinaceous, and, when dried, not easy of digestion.

PIT, Pock mark—p. of the Stomach, *Fæcette de cowæ*.

PITAY'A BARK. This bark is preferred in Colombia to any other. It contains a new vegetable alkali, to which the name *Pitayine* has been given.

PITAYINE, see *Pitaya* bark.

PITCAITHLEY, MINERAL WATERS OF. These saline springs, at Pitcaithley, about four miles from Perth, Scotland, contain chlorides of sodium and calcium.

PITCH, Colophonia—p. Black, see *Pinus sylvestris*—p. Burgundy, see *Pinus abies*—p. Canada, see *Pinus Canadensis*.

PITCH CAP, see *Depilatory*.

PITCH, COMMON, *Pinus sylvestris*—p. Hemlock, see *Pinus Canadensis*—p. Jew's, Asphaltum—p. Mineral, Pissasphaltum.

PITCH PASTER, see *Depilatory*, *Emplastrum picis*.

PITCH, STONE, see *Pinus sylvestris*—p. White, see *Pinus abies*.

PITHYRIASIS, *Pityriasis*.

PITHYRINUS, *Acerosus*, *Furfuraceus*.

PITTA'CIUM. A pitch plaster, from *terres*, 'pitch.'

PITTING, Pock mark.

PITTOSIS, *Malacia*.

PITTO'TA. Medicines in which pitch is the chief ingredient.

PITTSBURG, MINERAL WATERS OF. A chalybeate mineral spring, situate about four miles south-west of Pittsburg, in Pennsylvania. It contains chloride of sodium, chloride of magnesium, oxide of iron, sulphate of lime, and carbonic acid.

PITUITA, Mucus, Phlegm—p. Narium, *Nasal mucus*.

PITU'ITARY, *Pituitarius*, from *pituita*, 'phlegm.' Concerned in the secretion of mucus or phlegm. A name given to several parts.

PITUITARY BODY, P. Gland.

PITUITARY FOSSA, *Fossa Pituitaria*. A depression on the cerebral surface of the sphenoid bone, which lodges the pituitary gland. It is called, on account of its shape, *Sella Turcica*, *Epithypium*. Chausnier calls it *Fossa supra-sphenoidalis*, from its situation.

PITU'ITARY GLAND, *Glandula Pituitosa* vel *pituitaria*, *Glandula basilaris*, *Lacuna* vel *Appendicula cerebri*, *Hypophysis* seu *Appendix cerebri*, *Pituitary body*, *Corpus pituitaria*;—*Appendix sub-sphenoidale du cerveau*, (Ch.) A small, round body; the anterior portion of which is of a cineritious yellow hue, and the posterior, which is smaller, is whitish and pulpy. Its functions are unknown.

PITUITARY MEMBRANE, *Schneiderian Membrane*, *Membrana pituitaria*, *M. olfactoria*. The mucous membrane which lines the nasal bone, and extends to the different cavities communicating with the nose. In the nasal fossae, the membrane appears formed of two layers, intimately united;—the one in contact with the bone is fibrous;—the other is free at one surface. The latter is a mucous membrane, on which papillae are not easily distinguishable, but which contains them, as well as a number of very small mucous follicles, that open into the cavity of the nares. On penetrating the maxillary, frontal, sphenoidal, and ethmoidal sinuses, the membrane becomes very thin, transparent, less vascular, and seems reduced to its mucous layer. The pituitary membrane receives the impression of odours, by means of the expansion of the olfactory nerves upon it. It is the seat of smell.

PITU'ITOUS, *Pituitosus*; from *pituita*, mucus or phlegm. Consisting of, or resembling, or full of mucus or phlegm.

PITYRI'ASIS, from *πυρρος*, 'bran'; *Lepidosis Pityriasis*, *Pityriasis*, *Pityriasis*, *Herpes*

furfuraceus, *H. farinosus*, *Porri'go* (of some), *Tinea furfuracea*, *T. porriginosa*, *Furfuratio*, *Furfuris*, *ca*, *Dandriff*, *Dandruff*, (F.) *Teigne*, *Dartre*, *Dartre furfuracee volante*;—a very superficial affection; characterized by irregular patches of thin scales, which repeatedly exfoliate and recur; but which never form crusts, or are accompanied with excoriations. It is not contagious. It occurs under three or four varieties of form.

PITYRIASIS, *Porri'go*—p. *Nigra*, *Melasma*—p. *Versicolor*, *Chloasma*.

PITYRISMA, *Pityriasis*.

PITYROIDES, *Furfuraceus*.

PITYRON, *Furfur*.

PIVOINE, *Paeonia*.

PIV'OTING. In dentistry, an operation, which consists in fastening in a new crown upon the root of a tooth by means of a piece of gold wire, called 'a pivot.'

PIX, Sperm—p. *Abietina*, see *Pinus abies*—p. *Abietis*, see *Pinus abies*—p. *Alba*, see *Pinus abies*—p. *Anda*, see *Pinus abies*, and *Pinus sylvestris*—p. *Atra*, see *Pinus sylvestris*—p. *Brutia*, *Brutia*—p. *Burgundica*, see *Pinus abies*—p. *Canadensis*, see *Pinus Canadensis*—p. *Cedria*, see *Pinus sylvestris*—p. *Græca*, *Colophonia*—p. *Liquida*, see *Pinus sylvestris*—p. *Navalis*, see *Pinus sylvestris*—p. *Nigra*, see *Pinus sylvestris*—p. *Sicca*, see *Pinus sylvestris*.

PLACE'BO, 'I will please.' A medicine, prescribed rather to satisfy the patient than with any expectation of its effecting a cure.

PLACEN'TA. A Latin word, signifying a *Cake*. *P. uteri* seu *uterina* seu *uteri carnea*, *Hepar* seu *Jecur uterinum*, *Caro* seu *Affusio orbicularis*, *Maza*. A soft, spongy, vascular body, adherent to the uterus, and connected with the fetus by the umbilical cord. It is not in existence during the first period of the embryo state, but its formation commences perhaps with the arrival of the embryo in the uterus. It is generally considered to have two portions, one *fœtal*, and the other *maternal*. The *fœtal* consists of highly vascular villi and tufts, which contain the insulating loops of the umbilical arteries and umbilical vein of the fetus. The maternal portion is considered by Dr. Reid to consist, essentially, of a large sac formed by the inner coat of the vascular system of the mother, into which the maternal blood is poured by the curling arteries of the uterus, and from which it is returned by the utero-placental veins. The tufts and villi of the fetal placenta are ensheathed by this inner coat of the maternal vascular system; and, according to Prof. Goodair, two distinct sets of nucleated cells—one maternal and the other fetal—separate the maternal and fetal portions where they come in contact, one set of which are probably, he thinks, concerned in the separation of nutritive matter from the maternal blood, and the other destined to convey it into the vessels of the fetus. The placenta is formed of several *lobes* or *cotyledons*, which can be readily distinguished from each other on the uterine surface; but towards the fetal surface are confounded into one mass. It is composed of the umbilical vessels, areolar tissue, and whitish, resisting filaments, which are vascular ramifications obliterated. Lymphatic vessels have also been presumed to exist in it; and nerves have been traced, proceeding from the great sympathetic of the fetus.

The main function of the placenta appears to be like that of the lungs in the adult. It admits of the blood of the fetus being shown to that of the mother, and undergoing requisite changes. It may, also, be an organ for nutritive absorption, as observed above.

PLACEN'TA CRUORIS, see *Blood*—p. *Fœbrilla*,

Ague cake — p. Oblata, P. prævia — p. Obvia, P. prævia.

PLACEN'TA PRÆ'VIA, (from præ, 'before,' and via, 'way,') P. ob'via, P. obla'ta. Presentation of the placenta; a condition which gives rise to unavoidable hemorrhage from the uterus. The safety of the female depends upon speedy delivery.

PLACENTA SANGUINIS, see Blood — p. Uteri Succenturiata, Decidua.

PLACEN'TAL, *Placenta'lis*. Relating, or appertaining to, the placenta.

PLACENTI'TIS, *Placunti'tis*, *Placoi'tis*, *Inflamma'tio placen'tæ*. A hybrid word — from *placenta*, and *itis*, a suffix denoting inflammation. Inflammation of the placenta.

PLACEN'TULA, 'a little cake.' A rudimental placenta. The placenta of an abortion.

PLACOITIS, Placentitis.

PLACUNTITIS, Placentitis.

PLADAROMA, Pladarosis.

PLADARO'SIS, *Pladaro'ma*, *Pladar'otes*, from *πλαδαρος*, 'soft.' A soft tumour on the eyelid, unaccompanied with redness or pain.

PLADARÔTES, Pladarosis.

PLAFOND DES VENTRICULES DU CERVEAU, Corpus callosum.

PLAGA, Ictus, Wound.

PLAGIOL'IA, *Planobol'ia*, from *πλαγιος*, 'to one side,' and *βαλλειν*, 'to throw.' Imperfect emission of sperm into the vagina. Emission to one side; sometimes practised to render impregnation less probable.

PLAGUE, from *πληγη*, *plaga*, 'a stroke.' *Pestis*, P. orientalis, P. bubona'ria orientalis seu inguina'ria, P. contagio'sa, P. acutiss'ima, P. septic'a, P. Glandulo'sa, P. Ade'no-septic'a, P. inguina'ria, *Pestil'itas*, *Ephem'era pestilentia'lis*, *E. mortif'era*, *Lues inguina'ria*, *Clades glandula'ria*, *Phthora*, *Pestilen'tia*, *Lues*, *Loimos*, *Febris ade'no-nervo'sa*, *Læmos*, *Læmè*, *Læ'mia*, *Læmop'gra*, *Chaoada*, *Anthra'cia Pestis*, *Anthraco'typhus*, *Febris pestilens*, *Syn'ochus pestilentia'lis*, *Typhus pestis*, *T. pestilentia'lis*, *T. gravis'simus*, *T. anthra'cticus*, *T. Bubon'icus*, *Eranthe'ma pestis*, the *Pest*, *Levant plague*, *Septic* or *glandular pestilence*, (F.) *Peste*, *Typhus d'Orient*, *Fiebre du Levant*. An eminently malignant disease; endemic in the Levant; frequently epidemic, and destroying at least two-thirds of those it attacks. It is a fever of the most aggravated kind, with affection of the lymphatic glands of the groin or axilla, and carbuncles. Its miasmata — it has been conceived — adhere to different organic textures, to woollen goods, clothing and furniture; and may thus be transported to a considerable distance; but this is not certain. The mean duration of the disease is six or seven days; some die in twenty-four hours, others not till ten or twelve days. Pathological anatomy has afforded little light with respect to it. Various means have been used for arresting it, but none have seemed to be pre-eminently distinguished. The great point is, to watch the indications as they develop themselves; and to treat the case, in general, like one of typhus gravior. It is universally agreed that the suppuration of the buboes should be aided as far as practicable. For preventing the importation and spread of the plague, the *Quarantine Laws* have been instituted; and when the disease has actually appeared, a *cordon sanitaire* has been drawn round the infected district, so as to prevent all communication.

PLAGUE, COLD. A severe form of congestive fever, seen in the Southern States. Biliary pneumonia, in which there is no reaction, has been, also, so called.

PLAGUE MARK, Plague token.

PLAGUE, PALL. A malignant fever, greatly resembling Plague, which prevailed in Rajpootana after July, 1836.

PLAGUE SPOT, Plague token.

PLAGUE TOKEN, *Plague mark*, *Plague spot*. A mark by which one struck with the plague was known. Perhaps the early stage of carbuncle in unfavourable cases. It is described as a small tubercle — *Bossa* — somewhat resembling a wart, callous and more or less deficient in sensibility, varying in size from that of a millet-seed to that of a bean.

PLAGULA, Compress, Pledget, Splint.

PLAIE, Wound — p. d'Arme & feu, Wound, gunshot — p. d'Arquebuaude, Wound, gunshot — p. Contuse, Wound, contused — p. Envenimè, Wound, poisoned — p. par Arrachement, Wound, lacerated — p. d' Lambeaux, see Flap.

PLANANTHUS FASTIGATUS, Lycopodium selago — p. Selago, Lycopodium selago.

PLANARIA LATIUSCULA, Distoma hepaticum.

PLANCHER (F.), 'floor.' In anatomy, the inferior wall or boundary of a cavity.

PLANCHER DU CERVEAU, Tentorium.

PLANCUS, Leiopus.

PLANE, Plexus — p. Mesial, see Mesial.

PLANET-STRUCK, see Sideratio.

PLANETES, *Planè'tis*, *Plan'icus*, *Errun'dus*, *Errat'ic*. An epithet given to diseases, whose returns are irregular — especially to intermittent fever; *Planetes Febris*, F. *Errat'ica*, F. *Erronea*, F. *Vaga*.

PLANETICA ARTHRITIS, Gout, wandering.

PLANICUS, Planetes.

PLANIPEDES, Steganopodes.

PLANITIES PEDIS, Sole.

PLANOBOLIA, Plagiobolia.

PLANTA NOCTIS, Hydros, Sudamina — p. Pedis, Sole — p. Prima pedis, Tarsus.

PLANTA'GO, P. Major, *Centine'cia*, *Arnglos'sum*, *Septiner'cia*, *Polymer'on*, *Heptapedron*, *Planta'go latifolia* seu *major* seu *rupe'ris*, (F.) *Plantain commun*. Family, Plantaginæ. *Sc. Syst.* Tetrandria Monogynia. The leaves have been said to be refrigerant, attenuant, substyptic, and diuretic.

PLANTAGO AQUATICA, Alisma plantago.

PLANTAGO CORONOPES, *Coronopo'dium*, *Corsu cervi'num*, *Stella terra*, *Plantago*, *Buckshorn Plantain*. Properties like the last.

PLANTAGO NITIDA, P. psyllium.

PLANTAGO PSYLLIUM, P. nit'ida, *Psyllium*, P. *erectum*, *Pulica'ris herba*, *Crystal'lion*, *Cynmoi'a*, *Branching Plantain*, *Fleawort*, (F.) *Herba que puces commune*. The seeds have a nauseous, mucilaginous taste, and no remarkable smell. The decoction of the seeds is recommended in hoarseness and roughness of the fauces.

PLANTAGO VULGARIS, Plantago.

PLANTAIN, BRANCHING, *Plantago psyllium* — p. Buckshorn, *Plantago coronopus* — p. *Commun*, *Plantago* — p. d'Eau, *Alisma plantago* — p. Rattlesnake, *Goodyera pubæscens* — p. Robin's, *Erigeron bellidifolium* — p. Tree, *Musa paradisiaca* — p. Water, *Alisma plantago*, *Unisema deltifolia*.

PLANTAIRE, *Plantar muscle* — p. *Grilis*, *Plantar muscle*.

PLANTAR, *Planta'ris*, from *planta*, 'the sole of the foot.' That which relates or belongs to the sole of the foot. This name has been given to several parts.

PLANTAR APONEURO'SIS, P. *fas'cia*. A thick, dense, resisting aponeurosis; of a triangular shape, and superficially situate, which occupies

the middle and sides of the sole of the foot, and furnishes insertions to several of the muscles of the region, either directly or through the medium of septa, which it sends between them.

PLANTAR ARCH, see **Plantar arteries**.

PLANTAR ARTERIES. These are two in number, and arise from the extremity of the posterior tibial artery. They are distinguished into:—The *internal plantar artery*, situate above the abductor pollicis pedis. It extends from the termination of the posterior tibial to the trunk of one of the collaterals of that toe. The *external plantar artery* is larger than the preceding, and ought to be considered as the termination of the posterior or tibial. Situate above the flexor communis digitorum pedis, it extends from beneath the calcaneum to the posterior extremity of the last metatarsal space. When it has reached this part, it turns from without inwards; advances towards the posterior extremity of the first metatarsal bone, and anastomoses with the perforating branch of the *dorsalis tarsi*. In the first part of its course, it furnishes calcaneal, articular, muscular, and adipous branches. The second portion of the artery is called the *Plantar Arch* or *Cross*. It gives branches in all directions. The inferior and posterior have received no name. The superior—three in number—are the *posterior perforating arteries*. The anterior branches are larger, and there are commonly four. They furnish the *anterior perforating*, and the *collateral* of the last four toes.

PLANTAR CROSS, see **Plantar arteries**—p. **Fascia**, **P. aponeurosis**.

PLANTAR LIGAMENTS. A name given to the inferior ligaments, which unite the bones of the tarsus and metatarsus, to distinguish them from the superior, called *dorsal*.

PLANTAR MUSCLE, *Plantaris*, *P. gracilis*, *Tibiae gracilis*, *Extensor tarsi minor*, (F.) *Plantaire*, *P. Grêle*, *Jambier grêle*, *Petit fémoro-calcanien*, (Ch.) A muscle, situate at the posterior part of the leg. It is long, thin, and narrow. Above, it is attached to the posterior part of the external condyle of the os femoris: below, it terminates by a long tendon, which is attached to the posterior and inner part of the calcaneum. This muscle extends the leg on the foot, and conversely. It can, also, assist in the flexion of the leg on the thigh.

PLANTAR NERVES. These are two in number, and are furnished by the termination of the posterior tibial nerve. They are distinguished into—1. The *internal plantar nerve*, which extends from the inferior part of the tibial nerve to both sides of the first three toes, and the inner side of the fourth. It furnishes, also, branches to the abductor of the great toe; to the short flexor of the toes; to the accessory; to the short flexor of the great toe, the lumbricales, &c. 2. The *external plantar nerve* proceeds from the termination of the posterior tibial to the posterior extremity of the 5th metatarsal bone, and gives branches to the flexor brevis digitorum pedis, the accessory and the abductor of the little toe. This trunk subsequently divides into two branches;—the one—*profunda*—is distributed to the short flexor of the great toe: the interosseus and abductor pollicis pedis: the other—*superficialis*—sends filaments to the short flexor of the little toe, the two sides of that toe, the outer side of the 4th, and the last lumbricales.

PLANTAR REGIONS OR SURFACES are different regions or surfaces of the sole of the foot. Three are generally reckoned,—the *internal*, *middle*, and *external*.

PLANTAR VEINS follow a similar arrangement. **PLANTARIA**, Dengue.

PLANTARIS, **Plantar**, **P. muscle**—p. **Superficies pedis**, **Sole**—p. **Verus**, see **Flexor longus digitorum pedis profundus perforans** (accessorius.)

PLANTARIUM, **Pubes**.

PLANTE DU PIED, **Sole**.

PLANTI-SOUS-PHALANGIENS, **Lumbricales pedis**—p. *Tendino-phalangiens*, **Lumbricales pedis**.

PLANUM AFONEUROTICUM DIAPHRAGMATIS. The tendinous expansion of the diaphragm.

PLANUM OS, from *planus*, 'soft, smooth.' The papyraceous or orbital plate of the ethmoid bone was formerly so called.

PLANUM PDIS, **Sole**.

PLANUM SUPERIORIS LINGUÆ. The upper surface of the tongue.

PLANURIA, from *πλανος*, 'wandering, false,' and *ουρον*, 'urine.' Discharge of urine through unwonted ways.

PLAQUEMINIER D'EUROPE, **Diospyros lotus**.

PLAQUES GAUFREES, **Peyeri glandulae**—p. *Laitueuse*, see *Taches laitueuse*.

PLASMA, **Liquor sanguinis**.

PLASMEXHIDROSIS, from *plasma*, the *liquor sanguinis*; *εξ*, 'out of,' and *ιδρωσις*, 'perspiration.' Exudation of the plasma of the blood from the vessels.

PLASTER, **Emplastrum**—p. **Adhesive**, **Emplastrum resinæ**, **Sparadrapum adhesivum**—p. **Adhesive**, **Baynton's**, see **Emplastrum resinæ**—p. **Adhesive**, of pitch and resins, **Emplastrum de pice et resinis glutinans**—p. **Ammoniacum**, **Emplastrum ammoniaci**—p. **Ammoniacum with mercury**, **Emplastrum ammoniaci cum hydrargyro**—p. **Argmatic**, **Emplastrum aromaticum**—p. **Asafoetida**, **Emplastrum asafoetidæ**—p. of **Belladonna**, **Emplastrum belladonnæ**—p. **Bliaster**, **Bliaster**—p. **Bliastering**, **Emplastrum lyttæ**—p. of **Bliastering fly**, **Emplastrum lyttæ**—p. **Calefacient**, **Emplastrum calefaciens**—p. of **Cantharides**, compound, **Emplastrum lyttæ compositum**—p. **Cephalic**, **Emplastrum picis comp.**—p. **Corn**, **Sparadrapum viride**—p. **Corn**, **Kennedy's**, **Sparadrapum viride**—p. **Court**, **English**, see **Ichthyocolla**, **Sparadrapum adhesivum**—p. **Cummin**, **Emplastrum cumini**—p. **Defensive**, **Sparadrapum Galteri**—p. **Diachylon**, **Emplastrum plumbi**—p. **Fly**, **Emplastrum lyttæ**—p. **Frankincense**, **Emplastrum thuris**—p. **Galbanum**, **Emplastrum galbani**—p. **Galbanum**, compound, **Emplastrum galbani compositum**—p. **Gum**, **Emplastrum gummosum**—p. of **Gum-resins**, **Emplastrum cum gummi-resinis**—p. **Hemlock**, **Emplastrum cicutæ**—p. **Iron**, **Emplastrum ferri**—p. **Isinglass**, see **Sparadrapum adhesivum**—p. **Issue**, **Sparadrapum pro fonticulis**—p. **Lead**, **Emplastrum plumbi**—p. **Machine**, **Sparadrapier**—p. **Mercurial**, **Emplastrum hydrargyri**—p. of **Mercury**, compound, **Emplastrum hydrargyri compositum**—p. **Nuremberg**, **Emplastrum Norimbergense**—p. **Opium**, **Emplastrum opii**—p. **Pitch**, see **Depilatory**—p. **Pitch**, comp., **Emplastrum picis compositum**—p. **Resin**, **Emplastrum resinæ**—p. of **Red oxide of iron**, **Emplastrum oxidi ferri rubri**—p. **Soap**, **Emplastrum saponis**—p. of **Spanish flies**, compound, **Emplastrum lyttæ compositum**—p. **Stickling**, **Emplastrum resinæ**—p. **Strengthening**, **Emplastrum ferri**, **Emplastrum oxidi ferri rubri**—p. **Warm**, **Emplastrum calefaciens**—p. **Wax**, **Emplastrum cereæ**.

PLASTIC, *Plasticus*, *Formativus*, *Formative*, from *πλασσω*, 'I form.' That which forms, or serves to form.

PLASTIC ELEMENT. One which bears within it the germs of a higher form.—Gerber.

PLASTIC FORCE. The generative or formative power in organized bodies. It is also called *Nivus formativus*, *Vis seu Virtus plastica seu formativa*, *Vis essentialis seu reproductiva*, *Facultas formatrix seu nutritrix seu auctrix seu vegetativa*; *Bias alterativum*, *Motus assimilationis*, *Anima vegetativa*, *Plasticismus*, *Virtus formatrix*, *Plasticitas*, *Plasticity*, *Force of Nutrition*, *F. of assimilation*, *Force of Formation*, *Force of vegetation*, *Puissance du moule intérieur* (Buffon), *Bildungstrieb*, *Germ-force* of the Germans.

PLASTIC LYMPH, *Liquor Sanguinis*—p. Surgery, *Morioplastics*.

PLASTICIMUS, *Plastic Force*.

PLASTICITAS, *Plastic Force*.

PLASTICITY, *Plastic Force*.

PLASTILYTIC, *Antiplastic*.

PLASTILYTICUM (HÆMATOLYTICUM), *Spanemic*.

PLATA, *Scapula*.

PLATANO, *Musa Sapientum*.

PLATANTHE'RA ORBICULA'TA, *Large round-leaved Orchis*; indigenous. *Order Orchidaceæ*; flowering in July. The leaves are large, soft and fleshy, and are used, in certain places, for dressing blisters.

PLATANUS, *Musa paradisiaca*.

PLATEA, *Bothriocephalus latus*.

PLATES, MANSFORD'S, see *Galvanism*.

PLATIAS'MUS, from *πλατος*, 'broad.' Excessive development of the lips, causing the articulation to be imperfect.

PLATINA, *Platinum*.

PLAT'INUM, *Plat'ina*, from (S.) *plata*, 'silver.' The preparations of platinum resemble in their therapeutical properties those of gold. The *BICHLORIDE*, *Plat'ini Bichlor'idum*, made by dissolving platinum in *agua regia*, and the *DOUBLE CHLORIDE* of PLATINUM and SODIUM, *Sodii chloroplat'inas*, *Chloroplat'inat' of Sodium*, prepared by dissolving bichloride of platinum and pure chloride of sodium, in proper proportions, in water, evaporating and crystallizing, — are the preparations used. They are not much prescribed.

PLATULA, see *Pediculus*.

PLATYBREGMATE, see *Cranium*.

PLATYCORIA, *Mydriasis*.

PLATYCORIASIS, *Platycoria*.

PLATYNO'SIS, from *πλατος*, 'broad.' *Amplifcat'io*. Morbid extension of parts.

PLATYOPHTHALMON, *Antimonium*.

PLATYPOLIA, see *Kyllosis*.

PLATYPUS, see *Kyllosis*.

PLATYS'MA, from *πλατος*, 'broad.' Any thing broadly extended. A spread plaster.

PLATYS'MA MYOIDES, *P. Myo'des*, *Musculus cutaneus*, *M. subcutaneus* (Winslow), *Quadratus genæ vel latissimus colli*, *Expansio musculo'sa*, *Tetragnus*, *Stomoman'icon*, (F.) *Thoraco-maxillofacial*, *Thoraco-facial* (Ch.), *Peaucier*. A muscle situate superficially on the lateral parts of the neck. It is flat, broad, and quadrilateral. Its fibres, which are all parallel to each other, pass obliquely downwards, and from without inwards. They arise from the areolar tissue, which covers the anterior and superior part of the chest; pass before the clavicle, and proceed to attach themselves at the interior part of the symphysis menti, at the external oblique line of the jaw, and at the commissure of the lips. The fibres of this last insertion form a distinct fasciculus, called by some anatomists *Musculus Risorius Santorini*. The platysma myoides depresses the commissure of the lips, and carries it outwards. It contributes, also, to the depression of the lower jaw. When it contracts, it wrinkles the skin of the neck transversely.

PLATYSTER'NOS, from *πλατος*, 'broad,' and *στερον*, 'the sternum.' One who has a broad well developed chest.—D. Pechlin.

PLATYS'TOMUS; from *πλατος*, 'broad,' and *στομα*, 'mouth.' One who has a broad mouth.

PLAUTUS, *Leipus*.

PLECHAS, *Perinæum*.

PLECTANÆ, *Cornua uteri*.

PLECTANE, *Plica*, *Plegma*, *Plexus*. A fold; a plexus. Also, a cornu of the uterus.

PLECTRUM. The styloid process of the temporal bone. Also, the uvula, and the tongue.—Castelli.

PLEDGET, (D.) *Plagghe*, *Plumace'olis*, *Lintea'men*, *Plag'ula*, (F.) *Plumace'olis*, *Plumaseau*. A small compress or *gâteau* of lint—(the filaments arranged parallel to each other)—fastened between the hands after the extremities have been cut off or folded down. It is applied over wounds, ulcers, &c., to preserve them from the contact of the air, to retain dressings in situ, and to absorb the discharges.

PLEGE, *Blow*, *Ictus*.

PLEGMA, *Plectane*, *Plexus*.

PLEGOMETER, *Pleximeter*.

PLEIN, (F.) 'Full.' The middle part of a roller.

PLEIOMASTHUS, *Polymasthus*.

PLEIOMAZIA, see *Polymasthus*.

PLENA MULIER, *Pregnant*.

PLENITUDE, *Fulness*.

PLENITUDE, *Plethora*.

PLENCK'S DEPLILATORY, see *Depilatory*, *Colley's*.

PLEONEC'TICA ATHYM'IA *SEU MELANCHOLIA*. A form of insanity characterized by a desire for gain or by covetousness.

PLEONEC'TICUS, from *πλεον*, 'more,' and *εχειν*, 'to have.' Covetous. Desirous to acquire: hence *mania pleonectica*.

PLERO'SIS, from *πληρης*, 'full'; also *Repletio*, *Refectio*, *Repletio*. Restoration of flesh after sickness. *Plethora*.

PLEROTICUS, *Incarname*.

PLES'MONE, *Plenitudo*, *Sati'etas*, *Sati'ety*. Intemperance. A condition the opposite to that of hunger.

PLESSER, *Plexor*.

PLESSIMETER, *Pleximeter*.

PLETHOMER'IA, from *πληθος*, 'many,' and *μερος*, 'a part.' Superabundance of parts, as in the case of six fingers to one hand.

PLETHO'RA, from *πληθω*, 'I fill.' *Poly'mia*, *Polyhyperhæ'mia*, *Panhyperhæ'mia*, *Polyhæ'mia sanguinea*, *Angiopleuro'sis*, *Angiopleuro'sis*, *Erythro'mia*, *Erythro'sis*, *Hæmatopletho'ra*, *Hæmopletho'ra*, *Plenitudo*, *Multitudo*, *Redundantia*, *Repletio*, *En'chyma*, *Comple'tio*, *Pletho'ry*, *Repletio*, *Sanguineness*, *Fulness*, (F.) *Abundantia*, *Rédondance*. The word *plethora*, which means repletion, *Pleto'sis*, expresses a superabundance of blood in the system, or in some part of it:—hence the division of plethora into *general* and *local*; the latter being called, according to its seat, *cerebral*, *pulmonary*, *uterine*, &c. The principal symptoms of plethora exist in the circulatory system; such as redness of the surface, swelling of the veins, increase in the fulness of the pulse, in the strength of the heart's pulsations, &c., with spontaneous hemorrhages occasionally. With these are usually united general heaviness, torpor, lassitude, vertigo, tinnitus aurium, flushes of heat, &c. The blood of plethoric persons differs from healthy blood in the ratio of water which it contains, and especially in the augmentation of the red corpuscles.

The tendency to plethora, or its actual existence, must be obviated by purgatives, prope-

exercise, &c.; and, if the danger from it be pressing, by blood-letting. This is, however, a doubtful remedy for general plethora, as it increases hæmatisis.

PLETHORA, LOCAL, Hyperæmia.

PLETHORIC, *Plethoricus*, *Polyæmic*, *Polyæmicus*, *Sanguine*, *Sanguineous*, (F.) *Pléthorique*. Same etymon. Full of blood. Relating to or affected with plethora.

PLETHORICUS, Plethoric.

PLETHORY, Plethora.

PLETHOS, Satiety.

PLEUMON, Pulmo.

PLEUMONIA, Pneumonia.

PLEURA, *Pleurum*, *Pleuro'ma*, 'the side, a rib.' *Membra'na pleurit'ica succin'gens seu costæ succin'gens*, *Membra'na seu Tu'nica costalis seu subcosta'lis*, *Hypopleu'rios*, (F.) *Plèvre* ou *Pleure*. The pleuræ are two thin, diaphanous, perspirable membranes, which line each side of the chest, and are reflected thence upon each lung. Like all serous membranes—to which class they belong—each represents a sac without aperture. From the junction of the pleura of each side the mediastina are formed. That portion of the pleura which lines the parietes of the chest is called *Pleura Costa'lis*; the portion that covers the lungs, *Pleura Pulmona'lis*. The arteries of the pleuræ are from the the intercostals, internal mammaries, phrenic, inferior thyroid, &c. The veins correspond with the arteries. They are, also, supplied with lymphatics, but nerves are not traceable in them.

Pleura is also used for *Cavity of the Pleura*, *Saccus Pleuræ*.

PLEURÆ, The sides of the chest.

PLEURAL, *Pleura'lis*, *Pleu'ricus*, *Pleu'rites*. That which concerns the pleura;—as a *pleural fistula*;—*pleural cavity*, *pleural hemorrhage*, &c.

PLEURALGIA, Pleurodyne.

PLEURAPOPHYSES, *Costæ versæ*, see *Costa*.

PLEURAPOSTEMA, Empyema.

PLEURARTHRO'ACE, from *ἄρσπα*, 'a rib,' *ἄρθρον*, 'a joint,' and *κακός*, 'bad.' Caries of the ribs.

PLEURE, Pleura.

PLEURESIA, Pleuritis.

PLEURÉSIE, Pleurisy.

PLEURESIS, Pleuritis.

PLEURÉTIQUE, Pleuritic.

PLEURICUS, Pleural.

PLEURIS, Pleuritis.

PLEURISY, Pleuritis.

PLEURISY, BILIOUS, *Pleuri'tis bilio'sa*. Pleurisy accompanied with bilious symptoms;—the effect of duodenitis or duodeno-hepatitis.

PLEURISY, FALSE, Pleurodynia.

PLEURISY, HEAD. A ridiculous term, occasionally used by the vulgar, in the Southern States especially, for bilious pneumonia before the pneumonic phenomena are developed, and whilst the head is prominently affected.

PLEURISY, HEMORRHAGIC, Hæmatothorax—p. Rheumatic, Pleurodynia—p. Root, *Asclepias tuberosa*.

PLEURISY, TYPHOID, *Pleuri'tis typho'ides seu typho'ides seu typho'sa*. Pleurisy accompanied by adynamic symptoms.

PLEURITES, Pleural.

PLEURIT'IC, *Pleurit'icus*, *Pleurit'ical*, (F.) *Pleurétique*; same etymon as *pleuritis*. Relating or appertaining to pleuritis—as '*pleuritic pain*.'

PLEURIT'IS, from *ἄρσπα*, 'the pleura;' *Morb'us latera'lis*, *M. pleurit'icus*, *M. Costa'lis*, *Empres'ma pleuritis*, *Pleuris*, *Pleur'e'sis*, *Pleur'e'sia*, *Pleuritis costa'lis seu vera*, *Pleurit'ica Feb'ris*, *Caussa Pleuri'tis*, *Passio pleurit'ica*, *Inflamma'tio Pleuræ*, *Pleurisy*, *Inflamma'tion of the Pleura*,

(F.) *Pleuréna*, *Fidere pleurétique*, *Inflammati'o de la Plèvre*, may be acute or chronic. Perhaps the most violent of all internal inflammations is the active form; known by acute, lancinating pain in one side of the chest, increased by inspiration, by coughing, and often by pressure; dyspnoea, the inspirations short and frequent; cough dry, or with little expectoration; and difficulty of lying on the affected side. Symptoms, attending the phlegmasis in general, strongly marked.

Physical Signs. There is seldom any perceptible alteration in the exterior of the chest. When effusion has taken place to a great extent, the signs will be similar to those of chronic pleurisy. The motion of the affected side is diminished, and the vibrations of the voice cannot be detected by the hand. There is more or less dullness of sound on percussion, the dullness diminishing or disappearing by change of position. On auscultation, the inspiration is feeble, distant, or inaudible; but change of position modifies it. Egophony is usually present, when the effusion is in moderate quantity, and is best heard over a portion of the thoracic parietes, represented by a band of three inches, running from below the inferior margins of the scapula in the direction of the ribs to the sternum. Simple pleurisy rarely attacks both sides at once: when such is the case, the presence of tubercles may be suspected.

Formerly, a *true pleurisy* meant one seated in the pleura: a *mediastinal pleurisy*, one situated in the anterior mediastinum; and *false pleurisy* or *rheumatismal pleurisy*, that which occupies the intercostal muscles. The last has received the name *Pleurodyn'ia*; that of *pleurisy* being exclusively appropriated to inflammation of the pleura. Pleurisy has also been distinguished into *dry* and *humid*, according as it is or is not accompanied by expectoration. *Humid* or *moist pleurisy* is now properly regarded as a complication of pleurisy with pulmonary catarrh. It is the *catarrhal pleurisy* of some. The majority of the species of pleurisy, admitted by Sauvages, consist of complications.

The causes of pleurisy are like those of other internal inflammations. It may terminate by resolution, effusion, or suppuration.

CHRONIC PLEURISY, which has been particularly described by Bayle, Broussais, and Laënnec, most commonly terminates by a serous or purulent effusion, which sometimes simulates hydrothorax; at others, phthisis pulmonalis. It may form slowly, without evident symptoms; or it may succeed acute pleurisy. In the former case, vague pains are felt in the chest, with small, dry cough, oppression at intervals, shivering, irregular febrile symptoms, and hardness of pulse.

Physical Signs. The affected side is smoother, more rounded and motionless; the intercostal spaces are dilated and filled up, or may even protrude slightly. In very chronic cases, however, the affected side may be smaller. The triangular space above the clavicle and the depression immediately above the sternum are often drawn downwards on the diseased side. No vibration is experienced by the hand when the patient speaks. The parietes of the thorax are sometimes œdematous, and fluctuation may be occasionally felt between the ribs. On percussion the sound is dull, or if clear, only so in the upper portions of the chest. On auscultation, there is an absence of the usual sounds over the affected parts, excepting occasionally transmitted sounds. There are no physical signs that can enable us to know whether pus or serum is effused into the chest. The introduction of a grooved needle through the intercostal space, a recom-

mended by Dr. Thomas Davies, would of course settle the question.

On dissection of those who have died of pleurisy, the pleura is found thickened, red, inflamed, and covered with membranous exudations or false membranes. Sometimes it seems cartilaginous and ossified. Its cavity frequently contains serous or sero-purulent effusions.

The acute form of the disease requires the most active treatment. General blood-letting, to such an extent as to make a very decided impression on the system, and repeated if necessary. This is the most important agent. After the violence of the disease has been got over, counter-irritants will be found highly beneficial; as well as when it has passed into the chronic state. The cough may be relieved by demulcents.

Sauvages has given the name ΠΛΕΥΡΙΤΙΣ ΒΕΝΤΟΨΑ, and Pringle that of ΠΛΕΥΡΟΔΥΝΙΑ ΒΕΝΤΟΨΑ, to a pain behind the false ribs, attributed to the presence of air in the intestines.

ΠΛΕΥΡΙΤΙΣ ΒΡΟΧΙΑΛΙΣ, Bronchitis—p. Costalis, Pleuritis—p. Diaphragmatica, Diaphragmitis—p. Humida, Bronchitis—p. Muscularis, Pleurodynia—p. Notha, Pleurodynia—p. Pericardii, Pericarditis—p. Pulmonis, Pleuropneumonia—p. Rheumatica, Pleurodynia—p. Spuria, Pleurodynia—p. Spuria simulata, Pleurodynia—p. Typhoides, see Pleuritis, (biliosa)—p. Vera, Pleuritis.

PLEUROCELE, from πλευρα, 'the pleura,' and κηλη, 'a tumour.' *Hernia of the pleura, Hernia pleurica et pulmonalis.* This name, employed by Sagar, is inaccurate, as the pleura never protrudes alone. It only forms a hernia, when it serves as an envelope to the lung, to tumours, or to purulent collections, which have protruded from the thoracic parietes.

PLEUROCOLLE'SIS, from πλευρα, 'the pleura,' and κολληω, 'I glue.' An adhesion between the pleura costalis and pleura pulmonalis.

PLEURODYNE, Pleurodynia.

PLEURODYNIA, Pleural'gia, Pseudo-pleuritis, Pseudo-pleurisy, Pleurodyne, Aural'gia dolorosa, A stitch, Pain in the side, Stitch in the side, Parapleuritis; Stethorrhœma, Rheumatismus pectoris, Pleuritis rheumatica, P. muscularis, P. spuria, False Pleurisy, Rheumatic or rheumatismal pleurisy, Pleuritis notha seu spuria seu spuria simulata, Pneumonia externa, Lagonoponos, Thoracoodynê, Dolor Pectoris externus, (F.) Point de côté, Douleur de côté; from πλευρα, 'the side or pleura,' and οδυνη, 'pain.' A spasmodic or rheumatic affection, generally seated in the muscles of the chest, and, ordinarily, in the intercostals. It is usually augmented by outward pressure, inspiration, coughing, exertion, moving the thorax, and sometimes even the corresponding arm. It is unaccompanied by fever, cough, or dyspnoea, excepting under the form of a stitch, when dyspnoea exists. It is, generally, by no means obstinate, and yields promptly to warm applications and to cupping or leeches. If it still resist, a blister will, almost always, remove it.

PLEURODYNIA VENTOSA, Pleuritis ventosa.

PLEUROMA, Costa, Pleura.

PLEUROPATHIA, from πλευρα, 'the pleura,' and παθος, 'a disease.' A disease of the pleura.

PLEUROPERIPNEUMONY, Pleuropneumonia, Pleuropneumonia, Pneumonopleuritis, Pneumonopleuritis, Pleuritis pulmonis, Pneumonia pleuritis. Inflammation occupying the pleura and the lung at the same time. Pleurisy and peripneumony existing simultaneously. *Physical signs.* A dull sound is yielded by percussion for a variable extent over the more depen-

dent portions of the affected side. The loss of sound is partially modified by change of position. The respiratory murmur on auscultation is very feeble or absent inferiorly; higher up, the crepitation or bronchial respiration of pneumonia may be detected; round the root of the lung, and near the inferior angle of the scapula, egophony is generally present. There is seldom much enlargement of the affected side, or displacement of the adjacent organs, as in the case of simple chronic pleurisy.

PLEUROPNUEMA, Pneumothorax.

PLEUROPNUEMONIA, Pleuropneumonia.

PLEUROPNUEMONITIS, Pleuropneumonia.

PLEUROPYESES, Empyema.

PLEURORRHŒA, from πλευρα, 'the side,' and ρευω, 'I flow.' Accumulation of fluid in the pleura.

PLEURORRHŒA CHYLOSA, Chylothorax—p. Lymphatica, Hydrothorax—p. Purulenta, Empyema—p. Sanguinea, Hæmatothorax—p. Scrota, Hydrothorax.

PLEURORTHOPNŒA, from πλευρα, 'the side,' ορθος, 'erect,' and πνεω, 'I respire.' Pain of the side, which does not permit the patient to breathe, except when in the vertical position.

PLEUROSO'MUS, from πλευρα, 'side,' and σωμα, 'body.' A malformation in which the fissure is somewhat lateral, with evagination extending chiefly upon the upper part of the abdomen and upon the chest; the upper extremity of the fissured side being more or less atrophied.—Vogel.

PLEUROSTO'SIS, from πλευρα, 'the pleura,' and οσσειω, 'a bone.' Ossification of the pleura, or in the cavity of the pleura. *Osteopleuria.*

PLEUROTETANUS, Pleurothotonos.

PLEUROTHOTONOS, Pleurothotonos, Pleurotetanus, Tetanus lateralis, from πλευρα, 'laterally,' and τονος, 'tension.' A variety of tetanus, in which the body is curved laterally by the stronger contraction of the muscles of one side of the body.

PLEUROTONOS, Pleurothotonos.

PLEURUM, Costa, Pleura.

PLÈVRE, Pleura.

PLEXIM'ETER, Plexom'eter, Plegom'eter, Plexim'eter, from πλησσω, 'I strike,' and μετροω, 'measure,' 'a measure of percussion.' An ivory plate of a circular or ovoid shape, from an inch and a half to two inches in diameter, and about one-sixth of an inch in thickness. It has either a raised rim or edge, or projecting handles on its upper side, to permit its being held between the finger and thumb of the left hand, whilst it is struck with the right. It is used in percussion of the chest. A piece of metal, a coin, or the finger of the left hand may be used with equal advantage.—See Percussion, mediate.

PLEXOMETER, Pleximeter.

PLEXOR, from πλησσω, 'I strike.' *Plexor.* Any instrument employed in percussion. The ends of the fingers of the right hand brought together are the best *plexor*; as the finger of the left is, perhaps, the best *pleximeter*.

PLEXUS, Plegma, Plectanê, Planê, Retê, from plecto, 'I interlace,' 'I entwine,' (F.) *Lacia.* A network of blood vessels or of nerves. The nervous plexuses, *Implicatio nes reticular es seu Textus nervorum* belong—some to the system of cephalic nerves—others to that of the great sympathetic; whilst some, as the pharyngeal, seem to be formed of the two sets. The plexuses represent complex networks, with more or less

loose meshes, formed by the numerous and diversified anastomoses of the nervous filaments; from which proceed other branches, that are distributed to organs, or to other plexuses.

PLEXUS, CARDIAC, Cardiac plexus—p. Carotid, see Carotid nerve—p. Choroides, see Choroid—p. Ciliaris, Ciliary ligament—p. *Cœliacque*, Cœliac plexus—p. Coronarius ventriculi, Gastric plexus—p. Coronary, see Cardiac plexus, and Coronary plexus—p. Gangliiformis semilunaris, Cœliac plexus—p. Gangliiformes, Ganglions, nervous—p. Glandiformes, Ganglions, nervous—p. Glandulosi Peyerii, Peyerii glandulæ—p. Hederaceus, Corpus pampiniforme—p. Hepaticus, Hepatic plexus—p. Infra-thyroïdeale, see Thyroïdeale veina—p. *Lombo-abdominal*, Lumbar plexus—p. Median, Cœlic plexus—p. Mesenterii proprius et maximus, Cœliac plexus—p. Nervorum anserinus, Facial nerve—p. *Opistogastricque*, Cœliac plexus—p. Pampiniformis, Corpus pampiniforme—p. Pharyngeal, see Pharyngeal nerve—p. Pneumogastrius, see Pneumogastic nerves—p. Reticularis, Corpus cavernosum vaginæ—p. Reticularis, Bulbus vestibuli, Choroides plexus—p. Solar, Cœliac plexus—p. *Sous-mésentérique*, Hypogastriac plexus—p. Testicularis, Spermatic plexus—p. *Trachélo-sous-cutané*, Cervical plexus—p. Vasculosus funiculi spermatici pampiniformis, Corpus pampiniforme.

PLICA, from *plicari*, 'to be knit together.' *Tricho'sis plica*, *Tricho'ma*, *Trica*, *T. Incuborum*, *T. Scrofo'rum*, *Plica Polonica*, *P. Polonica Judaica*, *P. Cachectica*, *P. Saxonica*, *Affectio Sarmatica*, *Matted hair*, *Plaited hair*, *Trichomatose hair*, *Lues Sarmatica*, *L. Polonica*, *L. Trichomat'ica*, *Helo'sis*, *Helo'tis*, *Cir'ragra*, *Cir'rha-gra*, *C. Polono'rum*, *Ecephy'ma tricho'ma*, *Morbus Cirrho'rum*, *Plica caput Medusæ*, *Plica longicauda lateralis*, *Coma Cæsa'rea*, *Kolto*, *Rhopato'sis*, *Plicatio*, *Plicatura*, (F.) *Plique*, *P. Polonaise*. A disease endemic in Poland, Lithuania, and other parts of Northern Europe; so called on account of its being characterized by interlacing, twisting, and agglutination or matting of the hair. By some it has been regarded as a disease; by others, as the want of attention to cleanliness. However this may be, it generally appears upon the hair of the head, but sometimes in that of other parts, as the beard, the hair on the axilla, pubes, &c. Alibert admits three species of plica. 1. *Plica multiformis* or *Plica caput Medusæ*, in which the hairs are mixed and agglutinated in greater or less masses; and this has been again subdivided into two varieties, according as the meshes are almost straight (*P. C. M. lacinia'ta*, (F.) *Plique en lanières*) or much twisted (F.) *P. en vrilles*.) 2. *Plica longicauda*, (F.) *Plique solitaire ou à queue*; when the hair is united into a single long mass, and 3. *Plica cespitosa*, (F.) *Plique en masse*, in which the hairs are matted into one large, shapeless mass. Pinel places this disease amongst the *Outaneous phlegmasiæ*; but it is far from demonstrated, that it is the result of inflammation of the skin. Certain it is, however, that the tangling of the hair is symptomatic of an affection—*enl' generis*—of the dermoid system. The idea that it is entirely owing to want of cleanliness, as has been conceived by some, is not tenable.

PLICA, *Plectane*—p. *Cachectica*, *Plica*—p. *Caput Medusæ*, *Plica*—p. *Longicauda lateralis*, *Plica*—p. *Lunata*, *Valvula semilunaris*—p. *Polonica Judaica*, *Plica*—p. *Saxonica*, *Plica*—p. *Semilunaris*, *Valvula semilunaris*.

PLICATIO, *Plica*.

PLICATURA, *Plica*.

PLICATURÆ CEREBRI, *Gyri cerebri*.

PLICIOSUS, *Perineum*.

PLIN'THIUM, *πλινθιον*. A machine invented by one Nileus, which was formerly employed in the reduction of fractures and luxations. Scultetus describes it in his *Armamentarium Chirurgicum*.

PLIQUE, *Plica*—p. *Polonaise*, *Plica*.

PLOCARIA CANDIDA, *Fucus amyloaceus*.

PLOMB, *Plumbum*.

PLOMB, (F.) The sulphuretted gas disengaged from privies, which proves fatal at times to the nightmen, (F.) *Vidungens*, engaged in emptying them.

PLOMB, ACÉTATE ACIDE DE, *Plumbi superacetat*—p. *Blanc*, *Plumbi subcarbonas*—p. *Blanc de*, *Plumbi subcarbonas*—p. *Carbonate de*, *Plumbi subcarbonas*—p. *Chlorure de*, *Plumbi chloridum*—p. *Iodure de*, *Plumbi iodidum*—p. *Nitrate de*, *Plumbi nitras*—p. *Oxide de*, *foudu*, *Plumbi oxydum semivitreum*—p. *Oxide rouge de*, *Plumbi oxydum rubrum*—p. *Oxide semi-vitreux de*, *Plumbi oxydum semivitreum*.

PLOMBAGINE, *Graphites*.

PLOMBIÈRES, *MINERAL WATERS OF*, *Fontes medica'ti Plumba'rii*, *Therma Plumbaria*. *Plombières* is a town in the department of the Vosges, 17 leagues from Nancy, and two from Remiremont. Here are several sources of thermal water. That which is called *Saponaceus* (F.) *Savonnause*, is formed of the subcarbonate and sulphate of soda, chloride of sodium, silica, carbonate of lime, and much vegeto-animal matter. This last component, when held in solution by means of the subcarbonate of soda, gives to the water an unctuous character. This is the origin of its name. The waters of *Plombières* are employed as solvents in engorgements of the abdominal viscera, and as alteratives in chronic diseases of the skin.

PLORATIO, *Lachrymatio*.

PLORATUS, *Lachrymatio*.

PLOTUS, *Leiopus*.

PLUGGING (Sw.) *Plugg*, (F.) *Tamponnement*. The act of stopping a hole. The introduction of a plug of lint or rag into a wound or natural cavity—as the uterus or vagina—to arrest hemorrhage; or of some substance into a carious tooth to prevent toothache.

PLUM, *Prunum*, *Prunus domestica*—p. *Assyrian*, *Sebestina*.

PLUMA, *Lanugo*.

PLUMACEAU, *Pledget*.

PLUMACEOLUS, *Pad*, *Pledget*.

PLUMASSEAU, *Pledget*.

PLUMBAGO, *Graphites*, *Persicaria*.

PLUMBA'GO EUROPE'Æ, *P. lapathifolia* seu *undulata*, *Denta'ria*, *Crepanel'la*, *Squama'ria*, *Dentela'ria*, *Leadwort*, (F.) *Dentelaire*, *Herbe au Cancer*. *Family*, *Plumbaginæ*. *Sex. Syst.* *Pentandria Monogynia*. The root was formerly much esteemed as a cure for the toothache, like the *Pellitory of Spain*, which is also called *Dentaria*.

PLUMBI ACETAS, *P. superacetat*—p. *Acetas dilutum alcoholicum*, *Liquor plumbi subacetatis dilutus*—p. *Acidulus siccus*, *Plumbi superacetat*—p. *Carbonas*, *P. Subcarbonas*.

PLUMBI CHLO'RIDUM, *Chloride of Lead*, (F.) *Chlorure de Plomb*. This salt of lead has been used in the form of lotion and ointment in cancerous ulcerations.

PLUMBI DEUTOXYDUM RUBRUM, *P. oxydum rubrum*—p. *Hydriodas*, *P. Iodidum*—p. *Iodhydrias*, *P. Iodidum*.

PLUMBI IOD'IDUM, *Plumbi Iodure'tum* seu *Hydriodas* seu *Hydroi'odas* seu *Iodhydrias*, *Plumbum ioda'tum* seu *Hydroiod'icum*, *Iodide* or *Iod'uret of Lead*, (F.) *Iodure de Plomb*, *Iodure plombique*. This salt is formed by the double decomposition of *iodide of potassium* and *nitrate*

of lead. It is used in scrofulous affections internally and externally. Dose, three or four or more grains. It is official in the Pharmacopœia U. S. for 1851.

PLUMBI IODURETUM, P. Iodidum.

PLUMBI NITRAS, *Plumbum nitricum, Nitras plumbicus, Nitrum saturninum, Nitrate of lead, (F.) Nitrate de Plomb.* A salt formed by the action of diluted nitric acid on litharge. Nitrate of lead has the same medical action as the other soluble salts of lead, and is a valuable antibrucic. It has been used, also, as an excitant antiseptic to wounds, ulcers, &c., and is the basis of Ledyoy's disinfecting liquid.

PLUMBI NITROSACCHARAS, *Nitrosaccharate of lead.* (*Sacchar.* p. j; *Acid. nitric.* p. ij; *Aque* p. x.) Beat together in a porcelain dish as long as chemical action continues: dilute the liquor with water, neutralize with chalk, and to the filtered solution add acetate of lead so long as a precipitate is formed. Collect, wash, and dry the precipitate, which is saccharate of lead. Dissolve in dilute nitric acid, (one part acid to nineteen of water), filter and evaporate to form crystals, which are transparent, of an amber colour, and in regular hexagonal plates or prisms. Advised as a solvent of phosphatic calculi.

PLUMBI OXYDUM ALBUM, *Plumbi subcarbonas*—p. Oxydum carbonatum per acidum acetosum, *Plumbi subcarbonas*—p. Oxydum fusum, *Pl. oxydum semivitreum.*

PLUMBI OXYDUM RUBRUM, *Min'ium, Miltus, Deutoxydum plumbi rubrum, Superoxydum Plumbosum, Plumbum oxydatum rubrum, Sandix, Sandyx, Red lead, (F.) Oxide de plomb rouge.* It is sometimes used to kill vermin.

PLUMBI OXYDUM SEMIVITREUM, *Lithargyrus, Lithargyrum, Lithargyrum, Oxydum plumbi fuscum, Spuma argenti, Semi-vitrified oxyd of lead or litharge, Calciteo'sa, Cath'mia, (F.) Oxide de plomb fondu, Oxide de plomb semivitreux,* (a yellow protoxyd of lead, prepared by heat, combined with carbonic acid.) It occurs in scales of a whitish-red colour, and semi-vitrified. It is employed for pharmaceutical purposes, as in the *Liquor plumbi acetatis, Emplastrum plumbi, &c.* Formerly, the *Litharge of gold, Chrysi'tis, Mart'sicor,* and *Litharge of silver, Almariah,* were distinguished in commerce. These were merely ordinary litharge, resembling gold or silver in colour.

PLUMBI SUBCARBONAS, *Car'bonas plumbi, Plumbi Carbonas* (Ph. U. S.), *Plumbum carbonicum, Magisterium plumbi, Oxydum plumbi album, Cerussa, Eru'go plumbi, Peimyth'ion, Peym'mythion, Simmitium, Flake white, Blanca, Geras, If'ides, Subcarbonate of lead, Cerusse, White lead, (F.) Carbonate de plomb, Blanc de plomb, Plomb blanc,* (prepared by exposing spiral rolls of lead to the fumes of vinegar, in vessels placed in dung.) It is inodorous; has a sweet taste; is brittle; friable; snow white, and of a minute, scaly texture. It is astringent and sedative, and is sprinkled on parts affected with local inflammation, or to prevent chafing in children. It is also used in the formation of ointments and plasters.

PLUMBI SUPERACETAS, *Cerussa acetata, Plumbi acetalis siccus, Plumbi acetatis* (Ph. U. S.), *Sal vel saccharum Saturni, Superacetate of lead, Plumbum aceticum, Dulce de Saturni, Acetas plumbicum crystallisatum, Sal plumbi, Sugar of lead, Protoacetate of lead, (F.) Acetate acide de plomb, Sel ou sucre de Saturne.* (*Plumb. carb. B.*) *Acid acetic.* cong. 1½. Boil the lead with the acid till it is saturated; then strain through paper, and evaporate to a pellicle, that crystals may be formed. Wash the crystals and dry on

blotting-paper. *PA. L.*) The acetate of lead has a sweet, styptic taste; a very white colour, and silky lustre. It is astringent; and, in weak solution, cooling and sedative; in strong, stimulant. It is given internally, in visceral and other hemorrhages, combined with opium, and is used externally, in solution, in inflammation, burns, bruises, gonorrhœa, &c. Dose, gr. ss to iss.

PLUMBI TANNAS, see Tannin.

PLUMBICUM ACETAS CRYSTALLISATUM, *Plumbi superacetatis.*

PLUMBOSUM SUPEROXYDUM, *Plumbi oxydum rubrum.*

PLUMBUM, *Molyb'dos, Molib'dus, Saturn'us, Capricor'nus, (F.) Plomb.* Lead. A solid metal of a bluish white colour; more malleable than ductile; soft enough to be scratched by the nail; very fusible and oxydizable, when heated in the air, and existing, in nature, under a number of different shapes; the principal of which are those of sulphuret and oxyd. *S. g.* 11.352.

Its use is to form oxides and salts. In its metallic state, it has no action upon the body; but when oxydised or united with an acid, it acts, in large doses, as a powerfully astringent poison.

PLUMBUM ACETICUM, *Plumbi superacetatis*—p. Album, Tin—p. Candidum, Tin—p. Carbonicum, *Plumbi subcarbonas*—p. Cinereum, Bismuth, subnitrate of—p. Hydroiodicum, *Plumbi Iodidum*—p. Iodatium, *Plumbi Iodidum*—p. Nitricum, *Plumbi nitras*—p. Oxydatum rubrum, *Plumbi oxydum rubrum.*

PLUMS, SEEDED, see *Diospyros Virginiana*—p. Winter, see *Diospyros Virginiana*—p. Yellow, see *Diospyros Virginiana.*

PLUNGE BATH, see Bath.

PLUNGING SIPHON, see Siphon.

PLUNKETT'S CAUSTIC FOR CANCERS, *Plunkett's Ointment.*

PLUNKETT'S OINTMENT, *Plunkett's Caustic for Cancers.* This empirical cancer remedy consists of *Arsenious acid, Sulphur,* and the powdered flowers of the *Ranunculus flammula* and *Coriaria fetida*;—levigated and made into a paste with the white of egg, and applied, on a piece of pig's bladder, to the surface of the cancer.

PLURAL BIRTH, see Multiparous.

PLUTEA. Avicenna gives this name to duplicatures of the dura mater, such as the *Fals cerebri.*

PLUTONIUM, Barium.

PNEOBOMANTIA, *Docimasia pulmonum.*

PNEOBOMANTICA, *Docimasia pulmonum.*

PNEUMA, Air, Life. See *Pneumatic Physicians.*

PNEUMAPOSTEMA, *Pneumapostema, Abscessus pulmonum;* from *πνευμα,* 'the lung;' and *αποστημα,* 'abscess.' Abscess of the lung.

PNEUMATELECTASIS, *Atelectasis pulmonum.*

PNEUMATHORAX, *Pneumothorax.*

PNEUMATIC, *Pneumaticus, Pneumatical,* from *πνευμα,* 'life, air.' Relating to pneuma, air or health.

PNEUMATIC PHYSICIANS, *Pneumatici.* Name given to a sect of physicians, at the head of whom was Athenæus, who made health and disease consist in the different proportions of an element—which they called *Pneuma, πνευμα*—to those of the other elementary principles. This *πνευμα* was a fancied spiritual principle, which the Stoics regarded as an element, different from water, air, earth and fire;—the sole elementary principles previously admitted.

PNEUMATICA, from *πνευμα,* 'air.' Appertaining to the breathing. Diseases of the respiratory function;—the second class in Good's

system of nosology. Agents that act on the respiratory organs.—Pereira.

PNEUMATICAL, Pneumatic.
PNEUMATOCELE, Physocoele.
PNEUMATO'DES, from *πνευμα*, 'wind,' and *αδωσ*, 'resemblance.' One distended with air, or who breathes with difficulty, owing to an accumulation of flatus in the digestive tube; or, according to others, owing to emphysema.
PNEUMATOMETER, Spirometer.
PNEUMATOMPHALOCÉLE, Pneumatomphalus.

PNEUMATOM'PHALUS, *Pneumatomphalocèle*, from *πνευμα*, 'flatus,' and *ομφαλος*, 'the umbilicus.' Umbilical intestinal hernia, containing a considerable quantity of flatus.

PNEUMATOSE, Pneumatosis—*p. Péritonéale*, Tympanites.

PNEUMATO'SIS, *Aérose*, from *πνευμα*, 'air.' *Flatus*, (F.) *Maladie ventreuse*, *Pneumatose*. Flatulence. Flatulent distention of the stomach or bowels, or both. Sauvages uses the word synonymously with emphysema. It is now generally employed for every abnormal collection of gaseous matters in any part of the body.

PNEUMATOSIS, Emphysema—*p. Abdominis*, Tympanites—*p. Enterica*, Colica flatulenta—*p. Pulmonum*, Emphysema of the lungs—*p. Ventriculi*, et *Pneumatosis enterica*, Flatulence.

PNEUMATOTHORAX, Pneumothorax.

PNEUMECTASIS, Emphysema of the Lungs.

PNEUMOCACE, Necropneumonia.

PNEUMOCHOLYSIS, Pneumonia (bilious).

PNEUMOCHYSIS, Œdema of the lungs.

PNEUMOECTASIS, Emphysema of the lungs.

PNEUMOGAS'TRIC, *Pneumogastrius*, from *πνευμων*, 'the lung,' and *γαστρον*, 'the stomach.' Belonging to the lungs and stomach.

PNEUMOGASTRIC NERVES, *Eighth pair of nerves* (Tenth pair of some), *Par vagum*, *Para vaga*, *Nervus vagus seu ambulato'rius seu pneumogastrius seu dec'imus seu sympathicus med'ius*, *Middle sympathic*; because it is distributed especially to the organs contained in the chest and abdomen. This nerve arises from behind the eminentia olivaris and near the corpora testiformia by one or two rows of filaments, regularly arranged. These filaments unite to form a flat cord, which issues from the cranium by the foramen lacerum posterius; behind the glossopharyngeal nerve. At its exit from the cranium, the pneumogastric nerve has the appearance of a very compact plexus—*Plexus gangliiformis*, *Ganglion of the superior laryngeal branch*, of Sir Astley Cooper. It then descends along the neck, deeply seated on the outside of the carotid artery and the internal jugular vein. When it has attained the lower part of the neck, it enters the chest, gliding behind the subclavian vein, and passing on the right side, in front of the subclavian artery, and, on the left, before the arch of the aorta. It proceeds, at first, backwards, increasing in size. Afterwards, it passes from behind the bronchia to the œsophagus, which it accompanies through the diaphragm, and terminates on the stomach. In the neck, the pneumogastric nerve anastomoses with the spinal, glosso-pharyngeal, great hypo-glossal, and great sympathetic nerves; and furnishes, 1, a *pharyngeal branch*, 2, a *superior laryngeal*, 3, *cardiac branches*. In the chest, it gives off, 1, the *inferior laryngeal or recurrent*, 2, the *pulmonary plexus*, and, 3, the *œsophageal branches*. On entering the abdomen, the œsophageal branches, which terminate the pneumogastric, are distributed upon the stomach, and give numerous filaments to that viscus, to the hepatic, coeliac, gastro-epiploic, and solar plexuses.

Some go, also, to the pancreas, liver, gall-bladder, duodenum, &c.

PNEUMOG'RAPHY, *Pneumographia*, from *πνευμων*, 'the lung,' and *γραφη*, 'a description,' The part of anatomy that describes the lungs.

PNEUMOL'OGY, *Pneumologia*, from *πνευμων*, 'the lung,' and *λογος*, 'a discourse.' An anatomical treatise on the lungs. An anatomical description of the lungs.

PNEUMOMETER, Spirometer.

PNEUMOM'ETRY, *Pneumometria*, from *πνευμων*, 'the lung,' and *μετρον*, 'measure.' Measurement of the capacity of the lungs for air. See Spirometer.

PNEUMON, Pulmo.

PNEUMONALGIA, Angina pectoris.

PNEUMONATELECTASIS, Atelectasis pulmonum.

PNEUMONECTASIS, Emphysemapulmonum.

PNEUMONEMPHRAX'IS, from *πνευμων*, 'the lung,' and *εμφραξις*, 'obstruction.' Congestion and infarction of the lungs.

PNEUMO'NIA, *Empres'ma pneumon'itis*, *Pleumo'nia*, *Peripneumo'nia*, *Pneumo'nia peripneumo'nia*, *Pneumon'itis*, *Pulmo'nia*, *Pulmona'ria*, *Inflammat'io pneumon'ica*, *I. pectoris acuta*, *I. pulmo'num*, *Pneumos'tasis*, *Pneumony*, *Peripneumony*, *Inflammation of the lungs*, *Lung-fever* (vulgarly), *Feb'ris pneumon'ica*, (F.) *Inflammation des poumons*, *Fiebre pneumonique*, *F. peripneumonique*, *Fluxion de poitrine*, *Inflammation du parenchyme pulmonaire*. The chief symptoms of pneumonia are:—pyrexia, accompanied by pain, sometimes obtuse, at others pungent,—in some part of the thorax; pulse more or less quick and hard, according to the violence and extent of the local disorder; pain, aggravated by the cough, which, with dyspncea, exists throughout the disease. At first, the expectoration is difficult and painful; but, in the course of a few days, it becomes free, and the oppression of breathing is mitigated. When the inflammation, instead of going off by resolution, passes on to suppuration, rigors are experienced; the respiration becomes more oppressed, but less painful, and a sense of weight is felt on one of the pleuræ. Pneumonia may, also, terminate by gangrene—but this rarely happens,—by induration and by hepatization.

Physical Signs. **FIRST STAGE**, (F.) *Engouement*. Diminution of the sound is generally observed over the affected part on percussion; auscultation exhibits an equal, dry, crepitating *râle*, which is best heard at the close of a deep inspiration, and on coughing. The respiratory murmur is intermingled with the crepitant *râle*, or it may be absent. In the neighbourhood of the affected parts it is natural or puerile. The voice and cough are rather more resonant than usual. **SECOND STAGE**, (F.) *Hépatisation rouge*. When *hepatization* has occurred, the motion of the affected side is impeded, and immediately above the sternum and in the corresponding triangular space on either side, there is often an evident depression. Percussion is dull over the affected part in every position of the patient. On auscultation, the crepitation is found to be replaced by bronchial respiration. The respiratory murmur is louder in the other portions of the lung, the voice and cough are more resonant, and the heart's action is more distinct. **THIRD STAGE**, (F.) *Hépatisation grise*. When suppuration supervenes, the same signs persist; but usually the voice and cough are less resonant, and a coarse, mucous *râle* is heard. When gangrenous or suppurative cavities are formed, they present the ordinary signs.

The prognosis must be guarded. It is not a

disease which we can always subdue. Great extent of inflammation; very considerable oppression; orthopnea, and difficult expectoration are unfavourable symptoms. The most active treatment is of course necessary. General bleeding forms the sheet-anchor,—employed so as to make a decided impression on the system, and repeated, if necessary; local blood-letting; nauseating doses of antimonials; purgatives; and when the violence of the inflammation has been got under,—counter-irritants, &c. Chronic pneumonia sometimes succeeds the acute, and, at others, occurs accidentally. It must be managed on general principles. Small bleedings, especially locally; and counter-irritants of all kinds are indicated.

PNEUMONIA BILIOSA, *P. biliosa*.

PNEUMONIA BILIOUS, *Pneumonia biliosa*, *Pneumocholosis*. Inflammation of the lungs, accompanied by gastric fever, and not uncommonly by typhoid symptoms:—*Pneumotyphus*, *Pneumonia typhoides* seu *typhoides* seu *typhosa*, *Putrid*, *typhoid*, *adynamic*, or *erysipellatous pneumonia*.

PNEUMONIA ERSIPELATOUS, *P. biliosa*—*p. Gangrenosa*, *Necropneumonia*—*p. Hypostatica*, *Pneumonypostasis*—*p. Intermittens*, *Pneumotyphosis*—*p. Lobular*, see *Lobular*—*p. Notha*, *Peripneumonia notha*—*p. Pleuritis*, *Pleuripneumonia*—*p. Putrid*, *P. biliosa*—*p. Typhodes*, *P. biliosa*—*p. Typhoid*, *P. biliosa*—*p. Typhosa*, *P. biliosa*, *Necropneumonia*—*p. Vesicular*, *Bronchitis*, *vesicular*.

PNEUMONIC, *Pulmonic*.

PNEUMONICA. Diseases affecting the lungs, their membranes or motive power; characterized by irregular, impeded, or painful respiration. The second order of the class *Pneumatica* of Good.

PNEUMONIC'ULA, diminutive of *pneumonia*. A slight inflammation of the lung.

PNEUMONICUS, *Pulmonic*.

PNEUMONIE, *Pneumonia*—*p. Disséminée*, see *Lobular*—*p. Lobulaire*, see *Lobular*—*p. Mamelonnée*, see *Lobular*.

PNEUMONIE DES AGONISANTS, *Pneumonie hypostatique*. The hyperæmic engorgement, which takes place in the lungs during the last moments of life, has been so termed. It would seem to be hyperæmia rather than inflammation.

PNEUMONIT'IC, *Pneumoniticus*. Of, or belonging to pneumonitis, or inflammation of the lungs.

PNEUMONITIS, *Pneumonia*.

PNEUMONOCARCINO'MA, from *πνευμων*, 'the lung,' and *καρκινωμα*, 'cancer.' Cancer of the lungs.

PNEUMONOCE'LE, from *πνευμων*, 'the lung,' and *κηλη*, 'rupture.' Hernia of the lung.

PNEUMONOCE'LE DIAPHRAGMAT'ICA INTER'NA. Hernia of the lung through the diaphragm.

PNEUMONOCELE EXTER'NA seu **THORAC'ICA**, Hernia through the parietes of the chest.

PNEUMONOCELE THORACICA, *Pn. externa*.

PNEUMONCEDEMA. Oedema of the lungs.

PNEUMONOMELANOSIS, see *Melanosis*.

PNEUMONOPHTHISIS, *Phthisis pulmonalis*.

PNEUMONOPHTHOE, *Phthisis pulmonalis*.

PNEUMONOPLEURESIS, *Pleuriperipneumony*.

PNEUMONOPLEURITIS, *Pleuriperipneumony*.

PNEUMONORRHAGIA, *Hæmoptysis*.

PNEUMONORRHGEA, *Hæmoptysis*.

PNEUMONOSCIR'RHUS, from *πνευμων*, 'the lung,' and *σκιρρος*, 'induration.' Induration of the lungs.

PNEUMONOSES, *Pneumoses*.

PNEUMONY, *Pneumonia*.

PNEUMONYPOS'TASIS, *Pneumonia hypostatica*. Pneumonia in a depending portion of the lung, caused by lying on the back.

PNEUMOPÉRICARDE, *Pneumo-pericardium*.

PNEUMO-PERICARD'IUM, *Pneumo-pericarditis*, (*F.*) *Pneumo-pericarde*, from *πνευμα*, 'air,' and *περικαρδιον*, 'pericardium.' *Laënnec* designates, under this name, the effusion of air into the cavity of the pericardium.

PNEUMOPHTHISIS, *Phthisis pulmonalis*.

PNEUMOPHYMATA, *Tubercles of the lungs*.

PNEUMOPLEURESIS, *Pleuriperipneumony*.

PNEUMOPHTHOE, *Phthisis pulmonalis*.

PNEUMORRHAGIA, *Hæmoptysis*—*p. Interna*, *Hæmatothorax*.

PNEUMOSEPSIS, *Necropneumonia*.

PNEUMOSES, from *πνευμων*, 'the lung.' A term under which *Alibert* comprises every morbid affection of the lungs.

PNEUMOTHORAX, *Pneumathorax*, *Pneumatohorax*, *Emphysema pectoris*, *Asthma ærium*, *A. emphysematicum*, *Dyspnœa pneumatica*, *D. physothorac'ica*, *Physothorax*, *Ærothorax*, *Æropleurie* (*Piorry*), from *πνευμα*, 'air,' and *θωραξ*, 'the thorax.' An accumulation of air in the cavity of the pleura. A complaint generally sudden in its invasion and fatal in its character. In many instances, along with the air, a liquid is effused,—*Hydropneumothorax*. The disease may be spontaneous and simple, but in a large proportion of cases it is complicated with pleurisy and pulmonary tubercles. The signs vary according as there is, or is not, a communication between the pleura and the bronchia. The affected side gives a hollow, tympanitic sound, even where the thickness of the parietes of the thorax is great. When the effusion is considerable, the affected side is dilated, but there is no rale of any kind. When a gaseous and a liquid effusion are present at the same time, the sound on percussion is found to be clear at the superior part of the thorax, but dull inferiorly; hence, by varying the position of the patient, and by consequence that of the contained fluids, the seats of the clear and the dull sound will be varied. When the gaseous effusion is owing to a fistulous communication between the pleura and bronchia, the metallic respiration and resonance are heard; and if there be both gaseous and liquid effusion, with a fistulous communication, in addition to these signs there is the *tintement métallique*. The presence of liquid can always be ascertained by succussion. See *Emphysema* of the lungs.

PNEUMOT'OMY, *Pneumotomia*, from *πνευμων*, 'the lung,' and *τομη*, 'I cut.' Dissection of the lungs.

PNEOMOTYPHUS, *Pneumonia typhoid*.

PNEUMOTYPO'SIS, *Pneumonia intermittens*, from *πνευμων*, 'the lung,' and *τυπος*, 'a stamp, a type.' Pneumonia characterized by periodicity.

PNEUBIOMANTIA, *Docimasia pulmonum*.

PNEUSIOBIOGNOSIS, *Docimasia pulmonum*.

PNEUSIOBIOSCOPE, *Docimasia pulmonum*.

PNEUSIS, *Respiration*—*p. Pertussis*, *Pertussis*—*p. Singultus*, *Singultus*—*p. Tussis*, *Tussis*.

PNEUSOMETER, *Spirometer*.

PNIGALION, *Incubus*.

PNIGMOS, *Orthopnea*, *Strangulation*.

PNIGOPHOBIA, *Angina pectoris*, *Suffocation*.

PNI'X, *Orthopnea*, *Strangulation*.

PNOE, *Aura*.

PNEUM. A nostrum of *Dr. Samuel Hahnemann*, the founder of the 'Homœopathic System,' which consisted—it is said—of borax only!

PNOCCOLYTICUS, Asthmatic.

POCHE DES EAUX, see Liquor Amnii, and Parturition.

POCK, from Teut. *pocca*, 'pock or little pouch.' A pustule of smallpox.

POCK, KINE, Vaccina.

POCKFRETTE, see Pockmark.

POCKHOLE, Pockmark.

POCKMARK, *Pockhole*, *Scrobiculus Variolæ*, *Cicatriz Variolæ*. The mark or pit or pitting left from a smallpox pustule. One pitted with smallpox is said to be *pockfretten*.

POCKY. Infected with, or appertaining to, or resembling, smallpox or syphilis.

POC'ULUM, ABSINTHIA'TUM. This was regarded, in remote ages, as a wholesome beverage; the *absinthium*, or 'wormwood,' being supposed to act as an antidote to drunkenness.

POCULUM AMATORIUM, Philter — p. Diogenis, Palm — p. Emeticum, Goblet, emetic.

POD'AGRA, *Podarthrit'is*, *Podorrh'euma*, *Podalg'ia*, from *πους*, 'the foot,' and *αγρα*, 'seizure.' Pain which attacks the feet. Gout, situates in the articulations of the foot. It has, also, been used in a more extensive signification synonymously with *gout*.

PODAGRA ABERRANS, Gout, (wandering) — p. Arthritis, Gout — p. Retrograda, Gout, (retrograde.)

PODAGRARIA, Ligusticum podagraria — p. Ægopodium, Ligusticum podagraria.

PODAGRIC, *Podagric'al*, *Podagricus*, *Arthriticus*, *Arthrit'ic*, *Gouty*, (F.) *Goutteux*. Relating or belonging to gout. Affected with gout.

PODALGIA, Gout, Podagra.

PODALYRIA TINCTORIA, Sophora tinctoria.

PODANENCEPHALIA, see Podencephalus.

PODARTHITIS, Podagra.

PODARTHRO'ACE, from *πους*, 'the foot,' *αρθρον*, 'an articulation,' and *κακος*, 'bad.' Caries of the articulation of the foot.

PODENCEPHALIA, see Podencephalus.

PODENCEPH'ALUS, *Podanenceph'alus*, from *πους*, 'the foot,' and *κεφαλη*, 'the head.' A monster whose brain is placed outside the skull, and seems to be supported on a pedicle, which traverses the summit of the skull. This state of monstrosity is termed *Podanencephalia*, or more properly, *Podencephalia*. — G. St. Hilaire.

PODEX, Anus.

POD'E'MA; from *πους*, 'foot,' and *οιδημα*, 'a swelling.' Œdema of the foot.

PODOL'OGY, *Podolog'ia*, from *πους*, 'the foot,' and *λογος*, 'a discourse.' A description of the foot. A treatise on the foot.

PODOPHYLLUM PELTA'TUM, *Podophyll'ium*, *Anapodophyll'ium Canadense*, *May-apple*, *Mandrake*. Family, Podophylleæ. Scz. Syst. Polyandria Monogynia. A common plant throughout North America. The fruit is eatable, and esteemed by many. The leaves are said to be poisonous. The root or rhizoma, *Podophyllum* (Ph. U. S.), is purgative in the dose of 20 grains. It has also been used as an anthelmintic.

PODOPHYLLUM MONTANUM, *Mountain May-apple*, *Mandrake*, *Wild Lemon*, *Ducksfoot*, *Raccoon Berry*, *Yellow Berry*, *Ground Lemon*, has the same properties.

PODORRHEUMA, Podagra.

PODOTHE'CA, from *πους*, 'a foot,' and *θηκη*, 'a receptacle, a sheath.' The cuticle of the foot. An anatomical preparation. *Chirotheca*, has been used for the cuticle of the hand.

POËLETTE, Cup.

POËPHAGUS; from *πους*, or *παις*, 'a plant, an herb,' and *φαγω*, 'I eat.' One who subsists on herbs or vegetables. The act of subsisting or

feeding on herbs or vegetables is called *Poëphag'ia*. Hence Strabo calls the Irish *πoëφαγοι*.

POGON, Beard.

POGONIASIS, *Pogo'nia*, from *πogov*, 'the beard.' A female beard. Also, great strength or quantity of beard. A female having a beard — *Vira'go*.

POGO'NIUM, diminutive of *πogov*, 'beard.' A weak or small beard.

POHON ANTIAR, Upas.

POI. A favourite aliment in the Sandwich Islands. It is a sort of paste made from the root of the Kalo — *Arum esculentum*.

POIDS ET MÉSURES, Weights and measures.

POIGNÉE, Manipulus.

POIGNET, Carpus.

POIL, Hair.

POILETTE, Cup.

POILS, see Typha latifolia.

POING, Fist.

POINT, Stitch.

POINT, BLISTERING. A name given by Dr. Rush to an indeterminate period in the course of a continued fever, intermediate between the stages of high excitement and collapse, in which blisters will — he thought — usually produce unequivocally good effects.

POINT DE COTÉ, Pleurodynia.

POINTS LACRYMAUX, Lachrymalia puncta.

POIRE, see Pyrus communis.

POIREAU, Allium porrum.

POIRIER, Pyrus communis.

POIS, Pisum — p. à Cautère, see Fonticulus — p. Chicche, Cicor arietinum — p. Cultivé, Pisum — p. à Gratter, Dolichos pruriens — p. Patate, Dolichos tuberosus.

POISON, *Phar'macon*, *Phar'macum*, *Toxicum*, *Vene'num*, *Virus*, *Delete'rium*, *Venena'tion*, (F.)

Poison. A generic name for all substances which, when introduced into the animal economy, either by cutaneous absorption, respiration, or the digestive canal, act in a noxious manner on the vital properties or the texture of organs. Hence we speak of *fever poison*, *cholera poison*, &c. Poisons exist in the three kingdoms of nature; but those which proceed from animals are often called *venoms*, as the venom of the viper, scorpion, tarantula, &c.; whilst those that are the products of disease have the name *virus*. In common parlance, therefore, *poison* is restricted to deleterious articles, furnished by the mineral and vegetable kingdoms. Orfila has divided poisons into four classes. 1. ACRID, IR'RITATING, CORRO'SIVE, or ESCHAROTIC, such as the concentrated acids and alkalies; mercurial, arseniacal, cupreous, and antimonial compounds, cantharides, &c. 2. NARCOTIC; those that act particularly upon the brain; as hyoscyanus, opium, &c., but without inflaming the organ with which they come in contact. 3. NARCOTICO-ACRID or ACRO-NARCOTIC; — those that act on the brain, but, at the same time, irritate the parts to which they are applied; as aconite, belladonna, &c. 4. SERTIC or PUTRES'CENT; — those furnished by the animal kingdom. See Venom and Virus. Various classifications, of a similar character, have been recommended by different toxicologists; but they are liable to the objection, that they throw substances together whose physiological action on the system is very different. It is, indeed, difficult to avoid unnatural compression of matters into places not properly belonging to them, in all such arrangements.

The following table, which exhibits a *coup d'œil* of the chief poisons, with most of the circumstances of importance connected with them, is not free from these objections.

TABLE, EXHIBITING THE SYMPTOMS, TREATMENT, AND MODE OF DETECTING THE VARIOUS POISONS, MINERAL, VEGETABLE AND ANIMAL.

N. B. In all cases the Stomach-Pump should be used as soon as possible.

I. INORGANIC POISONS.

POISONS.	SYMPTOMS.	TREATMENT.	TESTS.
ACIDS. — <i>Acetic Acid.</i> — <i>Citric Acid.</i> — <i>Muriatic Acid.</i> — <i>Nitric Acid.</i> — <i>Sulphuric Acid.</i> — <i>Tartaric Acid.</i> — <i>Oxalic Acid.</i>	The acids, generally, are strong corrosive poisons. Sour, acrid taste, burning in the throat, which is increased by pressure, swallowing, or coughing; eructation, and excruciating pain in the stomach; more or less corrugation of the lining membranes of the mouth and primæ viæ; excoriation about the mouth or such other parts of the skin as the acid may have touched. The matter vomited effervesces with carbonate of lime. The countenance becomes glazed, extremities cold and clammy; convulsions and death. Nitric acid occasions yellow stains, and sulphuric acid, black.	The carbonates of soda, potassa, lime and magnesia, are all antidotes to the acids; calcined magnesia also. They are to be used with the following restrictions: for the acetic, citric, muriatic, sulphuric, and tartaric acids, they may be used indiscriminately. For the nitric and oxalic, carbonates of magnesia and lime can alone be employed with safety. In the case of sulphuric acid, water should not be drunk, on account of the great heat which is produced by their mixture. Subsequent inflammation to be treated by ordinary means. The carbonates of the alkalis and of magnesia and lime have the inconvenience, that a large quantity of gas is extricated in the stomach. Ammonia is an antidote; but it should not be employed in a very concentrated form. Liquid chlorine has also been found efficacious. The cold <i>douches</i> to the head has been recommended.	<i>Sulphuric acid</i> is known by a white precipitate with any salt of baryta, insoluble in nitric acid. <i>Muriatic acid</i> is known by a white precipitate with nitrate of silver, insoluble in nitric acid, which turns black by the action of light. <i>Nitric acid</i> gives rise to orange-coloured fumes, when copper is placed in it, and an ability to dissolve gold when mixed with muriatic acid. <i>Acetic acid</i> exhales the odour of vinegar. <i>Citric acid</i> blackens when heated. <i>Tartaric acid</i> precipitates crystals, with a solution of potassa; and a white precipitate is thrown down by lime-water. <i>Oxalic acid</i> gives a white precipitate with lime-water, which, when heated, is converted into carbonate of lime.
<i>Prussic Acid.</i> — <i>Oil of Bitter Almonds.</i> — <i>Laurel Water.</i>	Is a sedative poison; nausea, giddiness, debility, hurried pulse, weight and pain in the head; eructations having the flavour of the acid; spasms, tetanus, contractile pupil; convulsions, death.		<i>Prussic acid</i> exhales the odour of peach-kernels; forms a white precipitate with nitrate of silver, neutralized with an alkali, gives a blue precipitate with the persalts of iron.
ALKALIES and their SALTS. — AMMONIA, <i>Strong Liquor or Water of.</i> — <i>Muriate of Ammonia or Sal Ammoniac.</i> — POTASSA. — <i>Caustic Potassa, and Liquor Potasse.</i> — <i>Carbonate of Potassa, or Pearli Ash, and Salt of Tartar.</i> — <i>Nitrate of Potassa or Saltpetre.</i> — <i>Sulphuret of Potassium or Liver of Sulphur.</i> — SODA.	Violent, caustic, acrid taste; great heat in the throat, with destruction of its lining membrane; difficult and painful deglutition; vomiting of bloody matter, which turns the yellow of turmeric brown; acute pain in the stomach; cold sweats, weakness, hiccup; violent colic pains, with purging of bloody stools and membranous flakes; death.	The vegetable acids, such as vinegar, lemon juice, citric and tartaric acid in solution are antidotes to the alkalis and their carbonates. The fixed oils, such as castor, linseed, almond and olive, form soaps with the free alkalis, and therefore destroy their caustic effects. Poisoning by nitrate of potassa to be treated on general antiphlogistic principles; mucilaginous drinks. Liver of sulphur is said to be decomposed and neutralized by common salt. The liquid chloride of soda will also decompose it.	The alkalis are known by their action on turmeric paper; restoring the colour of litmus, which has been reddened by an acid. Carbonates are known by their effervescence with an acid; some of them affect the turmeric paper. Sal ammoniac gives out the pungent odour of ammonia, when mixed with quicklime. Nitrate of potassa decrepitates and deflagrates when thrown on hot coals. Liver of sulphur emits the odour of sulphuretted hydrogen when dissolved, or when treated with an acid.
EARTHS and COMPOUNDS. — BARYTA. <i>Carbonate of Baryta.</i> — <i>Chloride of Baryum.</i> — <i>Nitrate of Baryta.</i> — LIME.	Analogous to those of the corrosive metals. Violent burning in the stomach, vomiting, gripes, diarrhoea; excessive muscular debility, headache, convulsions, death. Lime differs from baryta in being a pure irritant.	The sulphates of soda and magnesia are prompt and effective antidotes to all the poisonous salts of baryta. Phosphate of soda will also counteract their effects. Lime may be neutralized by dilute acids. Carbonic acid, in soda-water, effervescing draught or yeast, it is supposed, would answer a good purpose. The fixed oils may be employed either for baryta or lime, when not in a compound state.	Baryta and its salts invariably give a white precipitate, insoluble in acid, with a soluble sulphate. Lime, when dissolved, gives a white precipitate with oxalic acid. Also with carbonic acid, or a soluble carbonate. The same of baryta.

POISONS.	SYMPTOMS.	TREATMENT.	TESTS.
<p>ALCOHOL. — <i>Brandy, Wines, and all Spirituous Liqueurs.</i></p>	<p>Intoxication, and when taken very freely, complete insensibility, with apoplexy or paralysis of one side; the countenance swollen; and of a dark-red colour; the breathing difficult, and often stertorous, with a peculiar puffing out of the lips; the breath smells of liquor, which will distinguish the symptoms from those of spontaneous apoplexy.</p>	<p>A powerful emetic of white vitriol, or tartar emetic, should be got into the stomach as soon as possible; and if the person has lost the power of swallowing, a flexible catheter or tube should be the means of conveying it thither. The vomiting should be encouraged as much as possible with warm water; and large and active gylsters of salt and water should be thrown up. The patient should be placed erect, and if the countenance and other appearances be not improved after these means have been used, the jugular vein may be opened, and cold wet cloths applied to the head, particularly if the body be hotter than natural. If the extremities become cold, warmth and friction should be perseveringly used.</p>	
<p>VOLATILE OILS. — <i>Creasote.</i> — <i>Dippel's Animal Oil.</i> — <i>Oil of Tar.</i> — <i>Oil of Tobacco.</i> — <i>Oil of Turpentine.</i> — <i>Fusel Oil.</i></p>	<p>General action, that of irritant poisons. Burning pain, vomiting, pungent taste, purging, &c. The oils of turpentine and tobacco affect the nervous system; the peculiar odour of each oil will be manifested in the matter vomited.</p>	<p>Creasote is immediately coagulated by albumen Dippel's animal oil may be counteracted with dilute acids and the fixed oils. The other oils have no particular antidotes, and their effects must, therefore, be counteracted upon general principles.</p>	<p>No better mode of recognizing these substances exists, than that derived from their peculiar odour. Dippel's oil has the pungent odour of ammonia; creasote and oil of tar, a peculiar smell of smoke; the odour of tobacco and turpentine are well known; and fusel oil has a peculiar, offensive, suffocating odour.</p>
<p>GASES. <i>Carbonic Acid, or Fixed Air.</i> — <i>Carbonic Oxide.</i> <i>Fumes of Burning Charcoal.</i> — <i>Chlorine.</i> — <i>Sulphuretted Hydrogen.</i></p>	<p>Chlorine produces, when inhaled, violent irritation of the organs of respiration; cough, bloody expectoration, inflammation of the lungs, and permanent pulmonary disease. The other gases, although producing some effect on the respiratory organs, act as poisons, in consequence of their sedative agency. The symptoms, therefore, are those of apoplexy, or narcotic poisoning.</p>	<p>The antidotes to chlorine are the cautious inhalation of ammonia, or sulphuretted hydrogen. The inflammatory symptoms from chlorine to be treated on general principles. For the other gases, cold affusions to the head, blood-letting, artificial respiration.</p>	<p>Chlorine is recognized by its peculiar odour and bleaching properties. Sulphuretted hydrogen, by its fetid smell, and the rapid blackening of lead. Carbonic acid, by its occasioning turbidness in lime-water placed in its atmosphere. Carbonic oxide, by the blue colour of its flame.</p>
<p>IODINE. <i>Iodide of Potassium.</i></p>	<p>Irritant symptoms; burning pain in the throat, lacerating pain in the stomach, and fruitless efforts to vomit; suffusion of the eyes; excessive pain and tenderness of the epigastrium.</p>	<p>Iodine combines with starch, and forms an insoluble compound. The prompt administration of starch, wheat flour, or other vegetable matter containing fecula, beat up in water, is recommended. Iodide of potassium has no antidote. Vomiting should be promoted by draughts of warm water, and inflammation be subdued by general treatment.</p>	<p>Iodine is known by its odour, and the formation of a blue precipitate, when brought in contact with a cold solution of starch. Iodide of potassium gives a crystalline precipitate, with tartaric acid in excess. The supernatant fluid will give the blue colour to starch.</p>
<p>METALS. — ANTIMONY. — <i>Tartar Emetic.</i> — <i>Chloride, or But-ter of Antimony.</i> — <i>Oxide of Antimony.</i></p>	<p>Vomiting. If vomiting do not occur promptly, violent irritant effects are produced. Burning pain in the pit of the stomach; Purging; colicky pains, sense of tightness in the throat, violent cramps; repeated recurrence of vomiting.</p>	<p>If vomiting have not been produced, it should be brought about by tickling the fauces, and administering copious draughts of warm water. Astringent infusions, such as of galls, oak bark, Peruvian bark, act as antidotes, and should be given promptly; powdered yellow bark may be used, until the infusion is prepared.</p>	<p>Antimony in solution is best distinguished by the peculiar orange-red precipitate, which it forms with sulphuretted hydrogen or solutions of the hydrosulphates. Free alkalies produce white precipitates. The muriate is known by a white precipitate, when it is poured into water. In its solid forms, it may be known by the formation of white fumes, when heated, which reddens litmus. It may also be converted into chloride, and then precipitated by adding water.</p>

POISONS.	SYMPTOMS.	TREATMENT.	TESTS.
<p>ARSENIC. <i>Arsenious Acid, or White Arsenic.</i> <i>Orpiment, or Yellow Sulphuret of Arsenic.</i> <i>King's Yellow.</i> <i>Realgar, or Red Sulphuret of Arsenic.</i> <i>Fly Powder.</i> <i>Fowler's Solution.</i> <i>Arsenical Pasta.</i> <i>Arsenical Soap.</i> <i>Arsenite of Copper, Scheele's Green.</i></p>	<p>Violent burning pain in the region of the stomach and bowels; tenderness on pressure; retching; vomiting; sense of dryness and tightness in the throat; thirst; hoarseness and difficulty of speech; the matter vomited, greenish or yellowish, sometimes streaked with blood; diarrhoea; tenesmus; sometimes excoriation of the anus; urinary organs occasionally affected with violent burning pains and suppression; convulsions and cramps; clammy sweats; lividity of the extremities; countenance collapsed; eyes red and sparkling; delirium; death.</p>	<p>The hydrated peroxide of iron diffused through water; or the precipitated carbonate; or the rubigo ferri, in very fine powder, to be administered every five or ten minutes, until relief is obtained. This is particularly efficacious when the <i>white arsenic</i> has been swallowed. If the arsenic have been taken in the form of Fowler's Solution, lime-water, in copious draughts, may be given. For either of the other forms, emetics of sulphate of zinc; diluents; demulcents, such as flaxseed tea, infusion of slippery elm, &c. Counter-irritants may be used to relieve the spasm, and violent pain in the stomach. Bleeding, as promoting absorption, should not be employed until the stomach is completely evacuated.</p>	<p>If the suspected substance can be obtained free from organic matter, the presence of arsenic may readily be shown by boiling it in distilled water, filtering and testing with, 1st. Ammoniacal sulphate of copper. 2d. Ammoniacal-nitrate of silver. <i>Haus's Test</i> 3d. Sulphuretted hydrogen gas. The first will produce a <i>green</i> precipitate; second, a <i>pale yellow</i> precipitate; third, a <i>bright green</i> precipitate, if arsenic be present. A portion of the powder, or one of these precipitates, carefully and thoroughly filtered, is then to be mixed with charcoal and calcined carbonate of soda, to be placed in a small glass tube, closed at one end, and then to be heated to a red heat in the flame of a lamp. The arsenic will be reduced, and sublime in the upper part of the tube, forming a dark crust, having considerable lustre on its exterior surface, resembling polished steel. By gently heating this crust in a very small flame, crystals of white arsenic will be formed, having a high adamantine lustre.</p> <p>If organic matter be present, it must be entirely destroyed, by heating the substance with nitromuriatic acid. After this has been done, and a clear, transparent solution in distilled water has been obtained, the subsequent process is as above indicated. If arsenious acid be submitted to the action of nascent hydrogen, it is decomposed, and the metallic arsenic thereby obtained, combining with hydrogen, forms arsenuretted hydrogen gas. (<i>Marsh's Test</i>.)</p> <p>Add to a suspected solution a few drops of pure chlorohydric acid, and place in it a slip of bright copper; no change occurs until the liquid is brought to the boiling point, when, if arsenic be present, even in small quantity, the copper acquires an iron-gray coating from the deposit of that metal. Remove the slip of copper; wash it in water, dry it and gradually heat it in a reduction tube when arsenious acid will be sublimed in minute octohedral crystals. The test succeeds with powdered arsenic, the arsenites, arsenic acid, the arseniates, and orpiment. It will even separate the arsenic from arsenite of copper, and from common lead-shot. <i>Reuss's Test.</i></p>
<p>BISMUTH. <i>Nitrate of Bismuth.</i> <i>Pearl Powder.</i> <i>Oxide of Bismuth.</i> COPPER. <i>Sulphate of Copper</i> <i>Blue Vitriol.</i> <i>Acetate of Copper, Verdigris.</i> <i>Carbonate of Copper,</i> <i>Blue Verditer.</i> <i>Arsenite of Copper</i> <i>Scheele's Green.</i> <i>Food cooked in dirty copper vessels, or pickles made green by copper.</i></p>	<p>Similar to those produced from other irritant poisons. General inflammation of the whole alimentary canal; suppression of urine; hicough, disagreeable metallic taste; vomiting; cramps; delirium; death.</p> <p>Very similar to those produced by arsenic. Coppery eructations and taste. Fatal cases are generally terminated by convulsions, palsy, insensibility.</p>	<p>Milk, and sweet mucilaginous drinks are recommended. Leeches, general bleeding; glysters; fomentations to be employed on the general principles of treatment for inflammatory symptoms.</p> <p>Albumen to be administered in either of its forms which can be most readily obtained, as milk or whites of eggs. Vinegar should not be given. The inflammatory symptoms are to be treated on general principles, and so of the nervous.</p>	<p>Bismuth is known by the formation of a white precipitate when its solution in nitric acid is poured into water; and by the formation of a black precipitate with sulphuretted hydrogen gas, and hydrosulphates in solution.</p> <p>The presence of copper is readily shown in solutions. By ammonia a beautiful bluish precipitate is thrown down, which dissolves in an excess of the precipitant, and the solution has a rich blue colour. A bright iron bar, introduced into solutions of copper, occasions the separation of the copper, in a metallic form which deposits itself upon the iron.</p>

POISONS.	SYMPTOMS.	TREATMENT.	TESTS.
GOLD. — <i>Chloride of Gold.</i> — <i>Fulminating Gold.</i>	Very analogous to those of other irritant poisons. This substance communicates a pink stain to the flesh, and patches of that colour may be found about the lips, and inside the mouth.	The salts of gold are decomposed by sulphate of iron; and this has, therefore, been recommended as an antidote. Inflammatory symptoms to be treated on general principles.	Chloride of gold is very readily decomposed, and the gold separated in a metallic state. Proto-sulphate of iron, nitrate of silver and protochloride of tin, all answer this purpose. The precipitated powder will be found insoluble, except in nitro-muriatic acid.
IRON. — <i>Sulphate of Iron.</i> <i>Copperas.</i> <i>Green Vitriol.</i> — <i>Chloride of Iron.</i>	Symptoms of irritant poisoning; colic pains, constant vomiting and purging. Violent pain in the throat, tension of the epigastrium, coldness of the skin, and feebleness of the pulse.	Carbonate of soda would be a most excellent antidote to either of these substances. Mucilaginous drinks might also be employed; and particular symptoms relieved by general treatment.	Iron is recognised by a bluish-black precipitate, with tincture of galls; rich blue, with prussiate of potassa; and a greenish or reddish precipitate, with the free alkalis or their carbonates.
LEAD. <i>Acetate of Lead.</i> <i>Sugar of Lead.</i> <i>Carbonate of Lead.</i> <i>White Lead.</i> <i>Red Oxide, or Red Lead.</i> <i>Litharge.</i> — <i>Wines sweetened by Lead.</i> <i>Water which has been kept in Leaden vessels.</i> <i>Acid food, cooked, or left standing in vessels glazed with Lead.</i>	Irritation of the alimentary canal; spasm; nervous symptoms; paralysis, either partial or complete. When taken for some time, in small quantity, violent and obstinate colic; rigidity of abdominal muscles, cramps; remission of pain; obstinate constipation, urine diminished, saliva increased; countenance anxious and gloomy. If relief be not promptly obtained, giddiness, debility, torpor, coma, convulsions and death. The paralysis affects generally the upper extremities.	Sulphate of magnesia and phosphate of soda are both good antidotes for the soluble salts of lead. For the solid forms, dilute sulphuric acid may be drunk. These are applicable to the irritant forms of poisoning by lead. In the chronic form, or colica pictonum, purgatives and anodynes are resorted to; venesection; and external applications to relieve the cramps. The use of strychnia is recommended for the paralysis.	Soluble salts of lead yield a white precipitate with sulphates and carbonates in solution. Salts of chromic acid and iodide of potassium occasion a yellow precipitate. Sulphuretted hydrogen, a black precipitate. If solid, the lead may be converted into a state of solution by nitric acid, and the dilute solution be tested as above.
MERCURY. <i>Corrosive Sublimata.</i> — <i>Cyanide of Mercury.</i> — <i>Nitrate of Mercury.</i> — <i>White Precipitate.</i> — <i>Red Oxide, or Red Precipitate.</i> — <i>Sulphate, or Turbith Mineral.</i> — <i>Vermillion, or Red Sulphuret.</i>	Violent symptoms of irritant poisoning; harsh metallic astringent taste; burning pain in the stomach; vomiting and purging frequently of bloody matter; often irritation of the urinary organs, and sometimes suppression; tightness and burning in the throat, occasionally so great as to prevent speech; countenance not always pale, but sometimes flushed; tendency to doze; stupor, convulsions and death.	Albumen, in some form, must be promptly administered; either white of eggs beaten up with water, milk, or wheat flour beaten up. The inflammatory symptoms to be counteracted by the usual means. Gold, finely mixed in dust, with fine iron filings. (?)	The free alkalis differ in their precipitates from solutions of mercury. Potassa gives, with corrosive sublimata, a yellowish one; ammonia, a white; lime-water, an orange; and sulphuretted hydrogen, a black. If a drop of the solution be placed on a piece of gold, and touched with a knife or key, the mercury will be reduced, which amalgamates with the gold, producing a white spot. The nitrate of mercury gives a black precipitate with the free alkalis. All the solid forms of mercury are volatile, and may be reduced by heating them in a glass tube with charcoal and carbonate of soda, when the metallic mercury will sublime, and may be collected in a globe.
SILVER. <i>Nitrate of Silver, or Lunar Caustic.</i>	Those of other irritant poisons.	Chloride of sodium, or common salt, immediately decomposes this substance, and destroys its activity. Antiphlogistic treatment is to be employed for the inflammatory symptoms.	Nitrate of silver is distinguished by the formation of a white precipitate, insoluble in nitric acid, with chloride of sodium; a gray precipitate with ammonia, which is redissolved in an excess of ammonia; yellow precipitate with phosphate of soda. The precipitate of chloride of silver, obtained by adding muriate of soda to the nitrate of silver, is readily reduced, and the metallic silver obtained, by mixing it with dilute sulphuric acid and granulated zinc.
TIN. <i>Chloride of Tin.</i> <i>Solution of Tin, used by Dyers.</i> <i>Oxide of Tin, or Putty Powder.</i>	The same as those from other irritant poisons, and a peculiar tanned appearance of the villous coat of the stomach.	Milk to be given copiously, and the subsequent treatment to be regulated by the symptoms.	The chloride precipitates vegetable colouring matter; also albumen and gelatin. The white oxide is precipitated from its solution by free alkalis; with sulphuretted hydrogen gas, a brown precipitate.
ZINC. — <i>Oxide of Zinc.</i> — <i>Sulphate of Zinc.</i> <i>White Vitriol.</i> — <i>Acetate of Zinc.</i>	Violent vomiting; astringent taste, burning pain in the stomach; pale countenance; cold extremities; dull eyes; fluttering pulse. Death seldom ensues, in consequence of the emetic effects.	The vomiting may be relieved by copious draughts of warm water. Carbonate of soda, administered in solution, will decompose the sulphate of zinc. Milk and albumen also act as antidotes. General principles to be observed in the subsequent treatment.	A white precipitate is thrown down by the free alkalis from the soluble salts of zinc, which becomes yellow when strongly heated—recovering its white colour on cooling. Sulphuretted hydrogen occasions a white precipitate.

POISONS.	SYMPTOMS.	TREATMENT.	TESTS.
PHOSPHORUS.	Symptoms of irritant poisoning; pain in the stomach and bowels; vomiting, diarrhoea, tenderness and tension of the abdomen.	An emetic to be promptly administered; copious draughts containing nagnesia in suspension; mucilaginous drinks; general treatment for inflammatory symptoms.	Phosphorus is known by its ready inflammability, luminousness at ordinary temperatures, and alliaceous odour.
GLASS or ENAMEL.	If taken in very coarse powder, it produces irritation and inflammation of the bowels.	Large quantities of crumb of bread should be eaten, to envelop the particles. (?) An emetic of sulphate of zinc should then be given, and vomiting be promoted by demulcent drinks.	

II. ORGANIC POISONS.
I. VEGETABLE POISONS.

IRRITANT POISONS.	SYMPTOMS.	TREATMENT.
<p><i>Anemone pulsatilla</i>. Wind Flower. <i>Arum maculatum</i>. Wake Robin. <i>Bryonia dioica</i>. Bryony. <i>Caladium sagittatum</i>. Dumbcane. <i>Calla palustris</i>. Water Arum. <i>Caltha palustris</i>. Marsh Marigold. <i>Chelidonium majus</i>. Celandine. <i>Clematis vitalba</i>. Virgin Bower. <i>Convolvulus jalapa</i>. Jalap. <i>Convolvulus scammonia</i>. Scammony. <i>Croton tiglium</i>. Purging Croton. <i>Cucumis colocynthis</i>. Colocynth. <i>Cyclamen europaeum</i>. Sow Bread. <i>Daphne genkium</i>. Spurge Flax. <i>Daphne mezereum</i>. Mezereon. <i>Delphinium staphisagria</i>. Stavesacre. <i>Dioica palustris</i>. Swamp leather-wood. <i>Equisetum hyemale</i>. Scourgrass. <i>Euphorbia officinarum</i>. Euphorbium. Spurge. <i>Gratiola officinalis</i>. Hedge Hyssop. <i>Hippomane mancinella</i>. Manchineel. <i>Hura crepitans</i>. Sand Box. <i>Hydrocotyle vulgaris</i>. Marsh Pennywort. <i>Jatropha curcas</i>. Indian Nut. <i>Jatropha manihot</i>. Cassada. <i>Juniperus sabina</i>. Savin (oil of). <i>Juniperus Virginiana</i>. Bed Cedar (oil of). <i>Momordica elaterium</i>. Squirting Cucumber. <i>Narcissus pseudo-narcissus</i>. Daffodil. <i>Pastinax sativa</i>. Common Parsnep. <i>Pedicularis palustris</i>. Marsh Lousewort. <i>Phytolacca decandra</i>. Poke. <i>Piper cubeba</i>. Cubeba. <i>Plumbago europaea</i>. Toothwort. <i>Ranunculus acris</i>, and other species. Crowfoot. <i>Rhododendron chrysanthemum</i>. Oleander. <i>Ricinus communis</i>. Castor Oil Plant. <i>Sambucus ebulus</i>. Elder. <i>Sedum acre</i>. Stone Crop. <i>Stalagmitis cambogioides</i>. Gamboge. <i>Tanacetum vulgare</i>. Tansy (oil of).</p> <p>ACRO-NARCOTIC.</p> <p><i>Aethusa cynapium</i>. Common Fool's Parsley. <i>Aconitum napellus</i>. Monkshood. Agaricus, five species. Mushrooms (poisonous). <i>Amanita muscaria</i>. Truffles (poisonous). <i>Anagallis arvensis</i>. Meadow Pimpernel. <i>Anda Gomasii</i>. <i>Apocynum androsaemifolium</i>. Dogbane. <i>Aristolochia clematitis</i>. Birthwort. <i>Arnica montana</i>. Leopard's bane. <i>Asclepias Syriaca</i>. Swallowwort. <i>Atropa belladonna</i>. Deadly Night Shade. <i>Esculus Ohioensis</i>. Buckeye. <i>Brucea antidysenterica</i>. False Angustura Bark. Cerbera, three species. Cerbera. <i>Cherophyllum sylvestris</i>. Bastard Hemlock.</p>	<p>The general effects of this class of vegetable poisons are;—an acrid pungent taste, with more or less of bitterness, excessive heat, great dryness of the mouth and throat, with sense of tightness there; violent vomiting, the efforts being continued even after the stomach is emptied; purging, with great pain in the stomach and bowels; pulse strong, frequent, and regular; breathing often quick and difficult; appearances of intoxication; the pupil of the eye frequently dilated, insensibility resembling death; the pulse becomes slow and loses its force, and death closes the scene.</p> <p>If applied externally, many of them produce violent inflammation of the skin, with vesications or eruptions of pustules.</p>	<p>If vomiting have been occasioned by the poison, and the efforts are still continued, they may be rendered easier by large draughts of warm water, or thin gruel; but if symptoms of insensibility have come on without vomiting, it ought to be immediately excited by the sulphate of zinc, or some other active emetic substance, and after its operation a sharp purgative should be given. After as much as possible of the poison is got rid of, a very strong infusion of coffee, or vinegar diluted with water, may be given with advantage. Camphor mixture with ether may be taken frequently, and if insensibility be considerable, warmth, frictions, and blisters, may be employed. If inflammation or other dangerous consequences have been induced, they are to be treated upon general principles.</p> <p>The fruit of <i>Fenillea Cordifolia</i> has been recommended as a powerful antidote against vegetable poisons; it is to be used in as recent a state as possible. (?)</p> <p>N. B. Bromine, chlorine, and iodine are said to be antidotes to the alkaloids generally.</p>

Skunk Cabbage. <i>Tiounas</i>. Extract of various plants—South America. <i>Tieuté</i>. <i>Upas Tieuté</i>. Tree of Java. <i>Triticum Hybernium</i>. Wheat (diseased). <i>Upas antiar</i>. Tree in Java. <i>Veratrum album</i>. White Hellebore. <i>Veratrum viride</i>. American Hellebore. <i>Woorara</i>. War Poison of Guiana. <i>Zea mays</i>. Maize (diseased).</p>	<p>The narcotic vegetable poisons, if taken into the stomach or applied to a wound, occasion the following effects:—stupor; numbness; heaviness in the head; desire to vomit, slight at first, but afterwards insupportable; a sort of intoxication, stupid air, pupil of the eye dilated; furious or lively delirium, sometimes pain; convulsions of different parts of the body, or palsy of the limbs. The pulse is variable, but at first generally strong and full; the breathing is quick, and there is great anxiety and dejection, which, if not speedily relieved, soon ends in death.</p>	<p>The stomach to be effectually evacuated, by giving four or five grains of tartar emetic, or from ten to twenty of the sulphate of zinc, repeated every quarter of an hour, till the full effect is produced. These means may be assisted by tickling the throat with a feather or the finger. Large and strong glysters of soap dissolved in water, or of salt and gruel, should be speedily administered, to clear the bowels, and assist in getting rid of the poison; and active purgatives may be given after the vomiting has ceased. When as much as possible of the poison has been expelled, the patient may drink, alternately, a tea-cupful of strong hot infusion of coffee, and vinegar diluted with water. If the drowsiness, which is sometimes extreme, and the insensibility bordering on apoplexy, be not remedied by these means, blood may be taken from the jugular vein, blisters may be applied to the neck and legs, and the attention be roused by every means possible. If the heat declines, warmth and frictions must be perseveringly used. Vegetable acids are on no account to be given <i>before</i> the poison is expelled, and it is desirable that but little fluid of any kind should be administered.</p> <p>N. B. Bromine, chlorine, and iodine are said to be antidotes to the alkaloids generally</p>
<p>NARCOTIC. <i>Actæa spicata</i>. Baneberry. <i>Amygdalus communis</i>. Bitter Almond. <i>Amygdalus Persica</i>. Peach. <i>Gelseminum nitidum</i>. Yellow Jessamine. <i>Helonias erythroperma</i>. Fly Poison. <i>Hyocyamus albus</i>. White Henbane. <i>Hyocyamus niger</i>. Black Henbane. <i>Kalmia latifolia</i>. Mountain Ivy. <i>Lactuca virosa</i>. Strong-scented Lettuce. <i>Opium</i>, and its proximate principles. <i>Papaver somniferum</i>. Poppy. <i>Paris quadrifolia</i>. Herb Paris. <i>Prunus Caroliniana</i>. Wild Orange. <i>Prunus lauro-cerasus</i>. Cherry Laurel. <i>Prunus nigra</i>. Black Cherry. <i>Prunus padus</i>. Cluster Cherry. <i>Prunus Virginiana</i>. Wild Cherry. <i>Solanum dulcamara</i>. Bitter-sweet. <i>Sorbus acuparia</i>. Mountain Ash. <i>Taxus baccata</i>. Yew.</p> <p>POISONOUS MUSHROOMS. <i>Agaricus muscarius</i>. Fly Agaric. <i>Agaricus pipervatus</i>. Pepper Agaric. <i>Agaricus necator</i>. Deadly Agaric. <i>Agaricus bulbosus</i>. Bulbous Agaric. <i>Agaricus chanterellus</i>. Champignon.</p>	<p>Nausea, heat, and pain in the stomach and bowels, with vomiting and purging; thirst; convulsions, and faintings; pulse small and frequent; delirium; dilated</p>	<p>The stomach and bowels to be cleared by an emetic of tartarized antimony, followed by frequent doses of Glauber's or Epsom salt, and large stimulating glysters. After the poison is evacuated, either may be administered, with small</p>

POISONS.	SYMPTOMS.	TREATMENT.
	pupil, and stupor; cold sweats, and death. Poisonous mushrooms may be distinguished from the edible by their botanical characters, and by the following criteria. The former grow in wet, shady places, have a nauseous odour; are softer, more open, and porous; have a dirty-looking surface, sometimes a gaudy colour, or many very distinct hues, particularly if they have been covered with an envelope; they have soft, bulbous stalks, grow rapidly, and corrupt very quickly.	quantities of brandy and water; but if inflammatory symptoms manifest themselves, such stimuli should be omitted, and other appropriate means be had recourse to.

2. ANIMAL POISONS.

POISONS.	SYMPTOMS.	TREATMENT.
<p>POISONOUS FISH. <i>Balistes monoceros.</i> Old wife. <i>Cancer astacus.</i> Crawfish. <i>Cancer virgatus.</i> Land Crab. <i>Clupea thraxusa.</i> Yellow-billed Sprat. <i>Coracinus fuscus major.</i> Gray Snapper. <i>Coracinus minor.</i> Hyne. <i>Coryphæna splendens.</i> Dolphin. <i>Morinyra.</i> Blue Parrot Fish. <i>Murena major.</i> Conger Eel. <i>Mytilus edulis.</i> Mussel. <i>Ostracion globellum.</i> Smooth Bottle Fish. <i>Perca major.</i> Barracuda. <i>Perca ocellata.</i> Grooper. <i>Perca venenata.</i> Rock Fish. <i>Physalia.</i> Portuguese Man of War. <i>Scomber caruleus.</i> Spanish Mackerel. <i>Scomber maximus.</i> King Fish. <i>Scomber thynnus.</i> Bonetta. <i>Sparus chrysops.</i> Porgee. <i>Tetrodon accleratus.</i> Tunny. <i>Tetrodon ocellatus.</i> Blower.</p>	<p>In an hour or two, or often in a much shorter time, after the fish has been eaten, a weight at the stomach comes on, with slight vertigo and headache, sense of heat about the head and eyes, considerable thirst, and often an eruption of the skin (urticaria), and in many cases death.</p>	<p>An emetic should be speedily administered, or, in the absence of it, vomiting may be excited, by tickling the throat with the finger, and taking large draughts of warm water. After full vomiting, an active purgative should be given, to remove any of the noxious matter that may have found its way into the intestines. Vinegar and water may be drunk after the above remedies have operated, and the body may be sponged with the same. Water, made very sweet with sugar, to which ether may be added, may be drunk freely as a corrective, and a very weak solution of alkali has been recommended to obviate the effects of the poison. If spasms ensue; after evacuations, laudanum, in considerable doses, is necessary. If inflammation should occur, the usual means of removing it must be employed.</p>
<p>POISONOUS SERPENTS. <i>Boa crotalides.</i> Copperhead. <i>Cenchrus mockeson.</i> Mockeson. <i>Cerastes nasicornis.</i> Horned Viper of Western Africa. <i>Coluber berus.</i> Viper. <i>Coluber prætor.</i> Black Viper. <i>Crotalus, (3 species.)</i> Rattle Snake. <i>Scytale piscivorus.</i> Water Viper.</p>	<p>A sharp pain in the wounded part, which soon extends over the limb or body; great swelling, at first hard and pale, then reddish, livid, and gangrenous in appearance; faintings, vomitings, convulsions, and sometimes jaundice; pulse small, frequent, and irregular; breathing difficult, cold sweats, the sight fails, and the intellectual faculties are deranged. Inflammation, and often extensive suppuration and gangrene, followed by death.</p>	<p>A cupping-glass to be applied over the wound, or a moderately tight ligature above the bite, and the wound left to bleed after being well washed with warm water; the actual cautery, lunar caustic, or butter of antimony, to be then applied freely to it, and afterwards covered with lint, dipped in equal parts of olive oil and spirit of hartshorn. The ligature to be removed if the inflammation be considerable. Warm, diluting drinks, and small doses of ammonia or hartshorn, to cause perspiration; the patient to be well covered in bed, and a little warm wine given occasionally. If gangrene be threatened, wine may be given more freely, and the bark should be had recourse to. Arsenic, the principal ingredient in the Tanjore Pill, has been strongly recommended.</p>
<p>CANTHARIS VESICATORIA. Spanish, or Blistering Fly. <i>Lytta vittata.</i> Potato Fly.</p>	<p>Nauseous odour of the breath; acrid taste; burning heat in the throat, stomach, and abdomen; frequent vomitings, often bloody, with copious bloody stools; excruciating pain in the stomach; painful and obstinate priapism, with heat in the bladder, and strangury or retention of urine; frightful convulsions, delirium and death.</p>	<p>Vomiting to be excited by drinking sweet oil, sugar and water, milk, or linseed tea, very freely. Emollient glysters should be administered, and if symptoms of inflammation of the stomach, kidney, or bladder supervene, they must be subdued by appropriate treatment. Camphor dissolved in oil may be rubbed over the belly and the thighs.</p>
<p>VENOMOUS INSECTS. Tarantula. Scorpio. Scorpion. <i>Vespa crabro.</i> Hornet. <i>Vespa vulgaris.</i> Wasp. <i>Apis mellifica.</i> Bee. <i>Culex pipiens.</i> Gnat. <i>Cætrus bovis.</i> Gad-fly.</p>	<p>In general, the sting of these insects occasions only a slight degree of pain and swelling; but occasionally the symptoms are more violent, and sickness and fever are produced by the intensity of the pain.</p>	<p>Hartshorn and oil may be rubbed on the affected part, and a piece of rag, moistened in the same, or in salt and water, may be kept upon it till the pain is removed. A few drops of hartshorn may be given frequently in a little water, and a glass or two of wine may be taken. The sting may, in general, be removed by making strong pressure around it with the barrel of a small watch-key.</p>

	SYMPTOMS.	TREATMENT.
SALIVA OF THE RABID DOG.	At an uncertain interval after the bite, generally, however, between the twentieth day and three or four months, pain or uneasiness occurs in the bitten part, though the wound may have been long healed. Anxiety, uneasiness, languor, spasms, horror, disturbed sleep, difficult respiration succeed, and are soon very much increased; violent convulsions affect the whole body, hideously distorting the muscles of the face; the eyes are red and protruded, the tongue swells and often hangs out, and viscid saliva flows from the mouth; there is pain in the stomach, with bilious vomitings, a horror of fluids, and impossibility of drinking them. All these symptoms are aggravated till the sufferer is relieved by death.	Hydrophobia is more easily prevented than cured; indeed, it is doubted whether it ever has been cured. Mercury, arsenic, opium, musk, camphor, acids, wine, vegetable and mineral alkali, oil, various herbs, and many other remedies whose effects are quite opposite, have been employed, but none can be relied on. Large blood-lettings, the warm and cold bath, and almost every other remedial agent, have been tried without success. The bitten part should be completely cut out, even after it has healed, if the symptoms have not yet come on; the part should then be immersed in warm water, or be washed with it as long as it will bleed, and, after the most persevering ablution, caustic should be applied to every part of the surface, and then the wound covered with a poultice, and suffered to heal by granulation. No milder discipline can ensure safety.

The most energetic poisons are used therapeutically, and often with considerable advantage. They have, of course, to be administered in extremely small doses; to avoid producing poisoning.

POISON, ARROW, see Arrow poison—p. Sausage, Allantotoxium.

POISON-BERRY TREE, Melia azedarach—p. Italian, Liquor arsenicalis—p. Morbid, Virus—p. Oak, Rhus toxicodendron—p. Root, Cicuta maculata—p. Vegetable, Upas—p. Vine, Rhus radicans.

POISONING, Venefic'ium, Tozica'tio, Intoxica'tio, Entoxis'mus, Entoxicis'mus, Pharmacei'a, Malefic'ium, Venena'tion, (F.) Empoisonnement, Intoxicacion. The art of applying a poisonous substance to any of the textures in a dose capable of occasioning more or less serious symptoms. Rigorously speaking, therefore, if a physician, in treating any case, employs a deleterious medicine in a small dose, which, owing to particular circumstances, produces unpleasant symptoms, he may be said to have poisoned. The term is, however, generally restricted to poisoning by design.

Poisoning has also been used, by a few, to denote the series of symptoms resembling those produced by certain poisons, which occasionally follow the use of substances that are generally innocuous. Overloading the stomach with indigestible food, has, for example, given occasion to symptoms resembling those produced by a narcotic poison, and the effect has been termed poisoning.

Secret poisoning was, at one time, practised as an art. It consisted in administering medicines, which should act as slow poisons, and gradually undermine the strength and life. Its agency was far from being so extensive as was imagined.

POISONOUS, Tox'ical, Nox'ius; having the qualities of a poison.

POISONS, ACRO-NARCOTIC, P. narcotico-acrid—p. Corrosive, P. acrid—p. Escharotic, P. acrid—p. Irritating, P. acrid—p. Putrescent, P. septic.

POITRINAIRR, Phthisicus.

POITRINE, Thorax.

POIVRE D'EAU, Polygonum hydropiper—p. de Guinée, Capsicum annuum—p. d'Inde, Capsicum annuum—p. de Jamaïque, see Myrtus pi-

menta—p. Long, Piper longum—p. Noir, Piper nigrum—p. Petit, Vitex—p. à Queue, Piper cubeba—p. Sauvage, Vitex.

POIX BLANCHE, see Pinus abies—p. de Bourgogne, see Pinus abies—p. Grasse, see Pinus abies—p. Jaune, see Pinus abies—p. Minérale, Pissasphaltum—p. Narale, see Pinus sylvestris—p. Noire, see Pinus sylvestris.

POKE, Phytolacca decandra—p. Indian, Veratrum viride—p. Stink, Dracontium foetidum—p. Weed, Phytolacca decandra, Veratrum viride.

POLANIS'IA GRA'VEOLENS, Clammy weed, Stinkweed, Wormweed, Clammy Mustard, False mustard. An indigenous plant, *Nat. Ord.* Capriferae; *Sex. Syst.* Dodecandria Monogynia— which blossoms in summer, and is found in every part of North America. To the whole plant have been ascribed anthelmintic properties.

POLECAT WEED, Dracontium foetidum.

POLEMONIUM REPTANS, False Jacob's Ladder, Greek Valerian, Sweet-root. Order, Polemoniaceæ; indigenous, flowering in May; has been used as a diaphoretic and expectorant.

POLENTA, Alphinon.

POLES, Chalazæ.

POLEY MOUNTAIN, OF CANDY, Teucrium Creticum—p. Mountain of Montpellier, Teucrium capitatum.

POLIATER, from πολις, 'a town,' and ιατρος, 'a physician.' A physician exercising his profession in a town, by the appointment of the government.—Castelli.

POLICE', MEDICAL, Polit'ia med'ica, Politothierapi'a, Medici'na polit'ica, State medicine, Polit'ical medicine. Hygienic rules established, or to be established, for the prevention of disease, and to contribute to the progress of medicine. The salubrity of districts, especially during the existence of spreading disease, is greatly ensured by an efficient medical police.

POLICLIN'ICA, from πολις, 'a town,' and κλινη, 'a bed.' Treatment of diseases in a town.

POLIO'SIS, Tricho'sis polio'sis, Spilo'sis polio'sis, Canit'ies. Hair prematurely gray or hoary.

The state of becoming gray.

POLITIA MEDICA, Police, medical.

POLITOBIOThERAPIA, Police, medical.

POLIUM CAPITATUM, Teucrium capitatum.

POLIUM CRETICUM, Teucrium Creticum—*p.* Montanum, Teucrium capitatum.

POLLEN, (L.) *Pollen*, *Pollis*, *πᾶλη*, 'dust.' The fecundating dust contained in the anthers of flowers, which is dispersed on the stigma.

POLLEX, *Ἀντίχειρ*, *Prom'anus*, *Dig'itus pri-mus seu magnus*, from *pollere*, 'to have much strength.' (F.) *Pouce*. The first of the fingers in size and strength. It is asserted that the term *polltroon* is derived from *Pol'licē trunca'to*;—the Romans who were desirous of being exempted from military service being accustomed to cut off the thumb, and thus render themselves unfit to handle arms.

POLLEX, see *Digitus*.

POLLEX PEDIS, *Hallus*, *Hallux*. The great toe.

POLLINCTOR, *Pollin'cter*, (L.) In antiquity, an anointer, dresser, or embalmer of the dead.

POLLINCTURA, Embalming.

POLLIS, *Pollen*.

POLLODIC, *Pollo'dicus*; from *πολύς*, 'many,' and *ὄδος*, 'a way.' An epithet proposed by Dr. Marshall Hall for a course of nervous action proceeding from one point in many directions to every other.

POLLOM, *LITTLE*, *Polygala paucifolia*.

POLLUTION, *Pollu'tio*, from *polluo*, 'I profane.' The excretion of the seminal liquor or sperm at other times than during coition. When occasioned by a voluntary act, it is called simply *Pollution* or *Masturbation*; when excited during sleep, by lascivious dreams, it takes the name *Nocturnal pollution*, *Exoneiro'sis*, *Oneirog'mos*, *Oneirog'onos*, *Oneirogonorrhœ'a*, *Exoneirog'mus*, *Spermatoclem'ma*, *Spermatoclep'sis*, *Spermatoclep'sis*, *Spermatolip'sis*, *Gonorrhœa dormientium*, *G. oneirog'onos*, *G. vera*, *G. libidin'osa*, *Proflu'vium sem'inis*, *Spermatorrhœ'a*, *Paronir'ia salax*, *Night pollution*, (F.) *Pollution involontaire*.

POLLUTION INVOLONTAIRE, *Pollution*

—*p.* Nocturnal, *Pollution*—*p.* Self, *Masturbation*

—*p.* Voluntary, *Masturbation*.

POLY, *Πολύς*, *πολύς*, 'many, full.' Hence:

POLYACTIUM TRISTE, *Pelargonium triste*.

POLYÆMIA, *Plethora*.

POLYÆMIC, *Plethoric*.

POLYÆMICUS, *Plethoric*.

POLYANHÆMIA, *Anæmia*.

POLYANHÆMIE, *Anæmia*.

POLYANTHES TUBEROSA, *Amaruacahu*. The root is cut into slips and laid upon the bites of serpents by the Peruvian Indians.

POLYBLÉN'NIA, from *πολύς*, 'much,' and *βλῆννα*, 'mucus.' Excessive secretion of mucus.

POLYBREP'HA, *Pregnancy*, complex.

POLYCARP'Æ, from *πολύς*, 'many,' and *καρπός*, 'fruit.' A division of cutaneous diseases of the family *Eozematosen*, of Fuchs, including *Psoriasis*, *Lichen*, *Herpes*, and *Impetigo*.

POLY'CERAS, from *πολύς*, 'many,' and *κερας*, 'horn.' A monstrous animal having many horns.—*Gurli*.

POLYCHO'LIA, *Pericho'lia*, *Hypercho'lia*, from *πολύς*, 'much,' and *χολή*, 'bile.' Superabundance of bile; such as is supposed to exist in bilious fevers.

POLYCHREST'US, from *πολύς*, 'much,' and *χρηστος*, 'useful.' Having many virtues. An ancient name for certain medicines considered to be useful in many diseases.

POLYCHRONIUS, *Chronic*.

POLYCHY'LIA, from *πολύς*, 'much,' and *χυλός*, 'juice.' *Polychy'mia*. Fulness of juices.

POLYCHYMIA, *Polychylia*—*p.* *Sanguinea*, *Plethora*.

POLYCLIN'ICA, from *πολύς*, 'much,' and

κλινῶν, 'bed.' Provided with many beds;—as an hospital.

POLYCOR'IA, from *πολύς*, and *κορη*, 'the pupil.' The state in which there is more than one pupil.—*Von Ammon*.

POLYCYE'SIA, *Polycy'e'sis*, from *πολύς*, 'many,' and *κύσις*, 'pregnancy.' Frequent or quickly recurring pregnancies: also, compound pregnancy.

POLYDAC'TYLUS, *Perissodac'tylus*, from *πολύς*, 'many,' and *δακτύλος*, 'a finger.' One who has a supernumerary finger or fingers, or *toea*.

POLYDIP'SIA, from *πολύς*, 'much,' and *δίψη*, 'thirst,' *Sitis morbo'sa seu inten'sa*, *Polyg'o'sia*, *Dipsœ'sis avens*, *Excessive thirst*, (F.) *Soif' excessive*. A constant desire for drinking, with a sense of dryness in the mouth and throat. It is mostly symptomatic of fever, inflammation, dropsy, excessive discharges, &c., and is so much a part of diabetes, that it has been called *Polydipsia*.

POLYG'ALA, from *πολύς*, 'much,' and *γάλα*, 'milk,' *P. vulg'aris*, *Common Milkwort*. Family, *Rhinanthoides*. *Sex. Syst.* *Diadelphia Octandria*. The leaves are bitter, and are used in the same cases as the *polygala amara*.

POLYGALA AMA'RA, *P. amare'lla seu vulg'aris*, *Bitter Milkwort*. A powerful bitter; and, consequently, tonic. Its reputed virtues are balsamic, demulcent, and corroborant. The *Polygala rubel'la*, or *Bitter Polygala* of the United States, has the same virtues.

POLYGALA AMARELLA, *P. amara*—*p.* *Bitter*, see *P. amara*—*p.* *Grandiflora*, *P. senega*.

POLYG'ALA PAUCIFOLIA, *Triclipe'r'ma grandifl'ora*, *Dwarf Milkwort*, *Little Pollom*, *Evergreen Snakeroot*, (F.) *Polygale naine*, possesses the same properties as *P. Senega*.

POLYG'ALA SEN'EGA, *P. Virginia'na seu grandifl'ora*, *Sen'eka*, *Rattlesnake Milkwort*, *Senega* or *Rattlesnake root*, (F.) *Polygale de Virginie* ou *de Seneka*. The bark is the active part of the root. Its taste is at first acrid, and afterwards very hot and pungent. It was once esteemed to be specific against the poison of the rattlesnake and in pleurisy, pneumonia, &c., after the inflammatory action had been got under. It has been given also in humoral asthma, chronic rheumatism, dropsy, croup, amenorrhœa, &c. According to Poeschier, it contains three particular principles, *Polyg'atine* or *Sen'egine*, *Isol'uine*, and *Polyg'alic Acid*. Dose, gr. 30 to 40 of the powder.

POLYGALA SERPENT'ARIA. A shrub of Caffria, the root of which is considered by the natives as a sure antidote against the bites of venomous serpents.

POLYGALA VIRGINIANA, *P. senega*—*p.* *Vulgaris*, *P. amara*.

POLYGALAC'TIA, *Polyg'alia*, from *πολύς*, 'much,' and *γάλα*, 'milk.' Superabundant secretion of milk; galactia.

POLYG'ALE NAIN'E, *Polygala paucifolia*—*p. de Virginie*, *Polygala Virginiana*.

POLYG'ALIA, *Polygalactia*.

POLYGALINE, see *Polygala senega*.

POLYGONATUM, *Convallaria polygonatum*—*p.* *Anceps*, *Convallaria polygonatum*—*p.* *Multiflorum*, *Convallaria multiflora*—*p.* *Uniflorum*, *Convallaria polygonatum*—*p.* *Vulgare*, *Convallaria polygonatum*.

POLYG'ONUM, *P. aricula'rē*, from *πολύς*, 'much,' and *γόνυ*, 'seed.' *P. centino'dium seu erectum*, *Centino'dia*, *Centunno'dia*, *Bindweed*, *Sanguinalis Corrig'iola*, *Sanguina'ria*, *Knotgrass*, *Knotweed*, (F.) *Renouëte*, *Trainasse*, *Centinode*. Family, *Polygonum*. *Sex. Syst.* *Octandria Trigynia*. This grass is said to be a feeble astringent.

POLYGONUM AC'RU, *P. hydropiper*.

POLYGONUM BISTORTA, *P. bistorta* L'Her., *Bistorta*, *Colubrina*, *Official Bistort*, *Great Bistort* or *Buckweed*. The root is a powerful astringent and tonic; and, as such, has been used in internal hemorrhage, atonic diarrhoea, ague, &c. Dose, gr. xv to ʒj.

POLYGONUM BISTORTOIDES, *P. bistorta*—p. Centaodium, *P. aviculare*.

POLYGONUM DIVARICATUM; *Eastern Buck-wheat plant*. The roots, reduced to a coarse meal, are said to be much used as an article of diet by the Siberians.

POLYGONUM ERECTUM, *P. aviculare*.

POLYGONUM FAGOPYRUM, *Fagopyrum*, *F. esculentum*, *Triticum Fagi-num*, *Buckwheat*, (*F.*) *Sarrasin*, *Blé noir*. The grain of this plant constitutes a principal article of food with the inhabitants of Russia, Germany, and Switzerland. It is much used in the United States.

POLYGONUM HYDROPIPER, *P. acridum*, *Hydropiper*, *Periscaria urens*, *Mercenarius terrestris*, *Poor Men's Pepper*, *Biting Arse-smart*, *Lukeweed*, *Water-pepper*, (*F.*) *Poivre d'eau*. The leaves of this plant have an acrid, burning taste, and resemble those of the arum. They have been recommended as possessing antiseptic, aperient, and diuretic virtues. The fresh leaves have been applied externally as a stimulating cataplasm.

POLYGONUM HYDROPIPEROIDES, *P. punctatum*.

POLYGONUM PERSICARIA, *Persicaria*, *P. minor* seu *mitis*, *Plumbago*, *Arse-smart*, (*F.*) *Persicaire douce*. This plant is said to possess vulnerary and antiseptic qualities. It has been given in wine to arrest gangrene.

POLYGONUM PUNCTATUM, *P. hydro Piperoides*, *Water pepper* of America, *Smartweed*, possesses similar properties to Polygonum hydro Piper, and is occasionally used internally in gravel, and externally in chronic ulcers. A fluidrachm of the saturated tincture has been extolled in amenorrhoea.

POLYGONUM VIRGINIANUM, *Wand-spiked Persicaria*, *Virginia Bistort*; indigenous; is astringent, diuretic, and tonic.

POLYGROMA Staphyloma.

POLYHIDRIA, *Polyhidria*, *Polyhidrosia*, from *πολύς*, 'much,' and *ἵδρω*, 'sweat.' Excessive sweating.

POLYHYDRIA, Hydrops.

POLYHYPERHÆMIA, Plethora.

POLYIDRIA, Polyhidria.

POLYIDROSIS, Polyhidria.

POLYLYMPHIA, Anasarca.

POLYMASTHUS, *Pleiomasthus*, from *πολύς*, 'many,' and *μαστός*, 'breast.' A monster having several breasts.—Gurlt. The condition has been called *Poly-mastia*, and *Pleiomastia*.

POLYMAZIA, see Polymasthus.

POLYMERIA, Polymerismus—p. Promiscua translativa. Transposition of the viscera.

POLYMERISMUS, *Polymeria*, from *πολύς*, 'much,' and *μερῶς*, 'a part.' A monstrosity, which consists in the existence of supernumerary organs; as a sixth finger of the hand.

POLYNEURON, Plantago.

POLYOP'SIA, *Polyopy*, from *πολύς*, 'much,' and *ὄψις*, 'sight.' Vision is so called, when multiple.

POLYOPY, Polyopsia.

POLYOREX'IA, from *πολύς*, 'much,' and *ὄρεξις*, 'appetite.' Excessive appetite or hunger. A genus in the gastrones of M. Alibert.

POLYPE'RIA, from *πολύς*, 'much,' and *πρῶτος*, 'mutilated.' Congenital misconstruction of various parts or organs.—Good.

POLYPHAG'IA, *Multivoran'tia*, from *πολύς*, 'much,' and *φαγῶ*, 'I eat.' Voracity. Faculty

of eating or subsisting on many kinds of food. See Boulimia.

POLYPH'AGOUS. Relating or appertaining to polyphagia.

POLYPHARMACI'IA, *Polypharm'acy*; from *πολύς*, 'much,' and *φάρμακον*, 'a medicine.' The prescribing of too many medicines. A prescription, consisting of a number of medicines; hence the name *Polypharmacus*, given to one who is in the habit of prescribing a number of medicines, and whose prescriptions are loaded with ingredients. The term is taken in bad part.

POLYPHY'SIA, Flatulence.

POLYPIFORM CONCRETIONS, see Polypus.

POLYPIONIA, see Polysarcia—p. Infantum, see Polysarcia.

POLYPLAS'TIC, *Polyplast'icus*, from *πολύς*, 'much,' and *πλασσω*, 'I form.' That which has many shapes.

POLYPLASTIC ELEMENT, in histology, is one which does not retain its primary shape; but undergoes transformation into others.—Gerber.

POLYPODITES. Wine impregnated with polypody.

POLYPO'DIUM, *P. Vulgar'e*, *P. Virginia'num* seu *pinnatif'idum*, *Filic'ula dulcis*, *Common Polypody*, *Fern root*, *Rock Brake*, *Brake root*. This fern grows in the clefts of rocks, walls, &c., in both hemispheres. It was formerly regarded as a cholagogue, and was given in head diseases. It is not used now.

POLYPODIUM ADIANTIFORME, see Calagualæ radix—p. Annifolium, see Calagualæ radix—p. Argenteum, see Calagualæ radix—p. Calaguala, Calagualæ radix—p. Coriaceum, see Calagualæ radix—p. Dentatum, Asplenium filix fœmina—p. Filix fœmina, Asplenium filix fœmina.

POLYPO'DIUM FILIX MAS, *Aspid'ium Filix Mas*, *A. depa'tum* seu *ero'eum*, *Filix pinnat'a*, *Pteris*, *Athy'r'ium Filix Mas*, *Blechnon*, *Polyrrh'izon*, *Blancnon* *Oriban'sii*, *Lonchi'tis*, *Filic'ula*, *Male Polypody* or *Fern*, *Filix mas*, *F. non romo'sa dentat'a*, *Nephro'dium crenat'um*, *N. Filix mas*, *Poly'ticum callipt'eria*, *P. filix mas*, (*F.*) *Fougère mâle*. *Nat. Ord.* Filices. *Sex. Syst.* Cryptogamia Filices. The rhizoma of this plant has been much extolled as an anthelmintic, and in cases of tœnia. It was the basis of a once celebrated remedy—*Madame Nouffer's*, but, perhaps, more of the efficacy was to be attributed to the active purgatives by which it was followed than to the fern. Dose, ʒij to ʒiij of the powdered solid part of the root; followed in the morning by a strong cathartic of camboge or jalap. An ethereal extract has been proposed by Dr. Peschier of Geneva.

POLYPO'DIUM INCANUM, *Pol'ypody*, *Rock Brake*; indigenous; has been considered demulcent, cathartic and anthelmintic.

POLYPO'DIUM INCANUM, Asplenium filix fœmina—p. Molle, Asplenium filix fœmina—p. Pennatifidum, *P. vulgare*—p. Politum, see Calagualæ radix—p. Trifidum, Asplenium filix fœmina—p. Virginianum, *P. vulgare*—p. Vulgare, Polypodium.

POLYPODY, Polypodium incanum—p. Common, Polypodium vulgare—p. Male, Polypodium filix mas.

POLYPOID, *Polypoi'des*; from polypus, and *ειδός*, 'form.' Having the shape of, or resembling, a polypus.

POLYPORUS IGNIARIUS, Boletus igniarius—p. Officialis, Boletus laticis.

POLYPOSIA, *πολυποσία*, from *πολύς*, 'much,' and *ποσις*, 'drink.' Great thirst—desire for drink. Polydipsia.

POLYPOUS, *Polypos'us*: same etymon as the next. Relating, or belonging to, or resembling polypus.

POLYPUS, *Pseudometamorphosis polypo'sa*, from $\pi\omicron\lambda\upsilon\varsigma$, 'many,' and $\pi\omicron\upsilon\varsigma$, 'a foot.' A name given to tumours, which occur in mucous membranes especially; and which have been compared to certain zoophytes. Polypi may form on every mucous membrane. They are most commonly observed in the nasal fossæ, pharynx, and uterus; more rarely in the stomach, intestines, bronchial tubes, bladder, and meatus auditorius externus. They vary much in size, number, mode of adhesion, and intimate nature. Accordingly, they have received various appellations; *mucous, soft, vesicular*, when their substance has been soft, spongy, vesicular, and, as it were, gorged with fluid. Others have been called *hard*; and these have been distinguished into *fibrous or fleshy*, and into *scirrhous or cancerous*. *Fibrous* polypi, *Pol'ypi fibro'si, Inopol'ypi*, are of a dense, compact texture, and whitish colour. They contain few vessels, and do not degenerate into cancer. The *scirrhous or carcinomatous* are true cancerous tumours, painful and bleeding. They present all the pathological changes which belong to cancerous affections, and the prognosis is of course unfavourable.

The mode of treating polypi must differ according to their character. The means used to destroy them have been, 1. To subject them to the action of certain astringent powders or solutions, to obtain their resolution. 2. *Cauterization* or the application of the actual cautery or caustics. 3. *Excision* or ablation with a cutting instrument. 4. *Extirpation* with the fingers or with the polypus forceps. 5. A *ligature*, put round them so as to prevent their nutrition. A seton has, also, been sometimes used to gradually destroy the pedicle.

The term **POLYPI**, *Pseudopol'ypi, Cardit'is polypo'sa, Pol'ypiform Concretions*, (F.) *Concrétions polypeuses ou polypiformes ou sanguines du Cœur, Hémocardioplasties*, (Piorry) has likewise been applied to collections of blood—fibrinous concretions—found in the heart or great vessels after dissolution. These were once, erroneously, regarded as morbid. The presence of these concretions may be suspected, when in the course of an acute or chronic affection of the heart, or at the close of chronic diseases in general—especially those of the lungs—the heart's action becomes suddenly tumultuous, obscure, and accompanied with a soft bellows' murmur, whilst the general symptoms indicate the effects of obstructed circulation. The right cavities are most frequently affected.

POLYPUS BRONCHIALIS, *Bronchemmitis, Bronchitis membrana'cea, B. plastic, Bronchial Croup, Chronic Croup* (?) *Pseudo-membranous Bronchitis*. A membraniform secretion in the bronchial tubes of a diphtheritic character, having the shape, when unexpectorated, of the bronchia. It is the result of inflammation of the lining membrane of those tubes.

POLYPUS CARNOSUS, *Sarcoma*—p. *Fibrosus*, see *Polypus*—p. *Uteri, Metropolypus*.

POLYRRHIZON, *Polypodium filix mas*.

POLYRRHŒA, *Profuvium*.

POLYSAR'GIA, *Polysarco'sis*, from $\pi\omicron\lambda\upsilon\varsigma$, 'much,' and $\sigma\alpha\rho\acute{\iota}$, 'flesh.' *Carnositas, Polysomatia, Adiparia, Corpulentia, Steatites*. Excessive corpulency. Authors have distinguished two varieties of this:—**POLYSARCIA CARNO'SA**, *Corpulency*, and **P. ADIPO'SA**, *Polypio'nia, Pimelo'sis nim'ia, Pachymus, Pachyn'sis, Obesitas, Hyperpim'ele, Liparia, Adipo'sis, Polysar'gia fagino'sa, Empymellium polysar'gia, Barys'omia, Barysomatica, Lipo'sis, Lipar'otes, Lipar'ma, Pinguitudo, Pin'guitude, Obes'ity*, (F.) *Obésité, Embonpoint excessif*. A severe regimen and ex-

ercise are the best preventives. Children are occasionally met with of unusual fatness, in spite of every care. This morbid deposition has been termed *Polypio'nia infantum*, and *Chlorosis gigante'a*.

POLYSARCIA VISCERUM, *Physconia adiposa*.

POLYSARCOSIS, *Polysarcia*.

POLYSIA'LIA; from $\pi\omicron\lambda\upsilon\varsigma$, 'much,' and $\sigma\alpha\lambda\iota\nu$, 'saliva.' Excessive discharge of saliva.

POLYSOMATIA, *Polysarcia*.

POLYSPAS'TON, from $\pi\omicron\lambda\upsilon\varsigma$, 'much,' and $\sigma\tau\alpha\omega$, 'I draw.' A powerful instrument for reducing luxations.—Gorræus.

POLYSPER'MIA; from $\pi\omicron\lambda\upsilon\varsigma$, 'much,' and $\sigma\pi\epsilon\rho\mu\alpha$, 'sperm.' Richness or fullness of sperm.

POLYSTICUM CALLIPTERIS, *Polypodium filix mas*—p. *Filix Mas, Polypodium filix mas*.

POLYSTOMA PINGUICOLA, see *Worms*—p. *Venarum*, see *Worms*.

POLYTRIC, *Asplenium trichomanoides*.

POLYTRICHUM, from $\pi\omicron\lambda\upsilon\varsigma$, 'much,' and $\sigma\pi\iota\acute{\iota}$, 'hair.' *Polytrichon, Polytrichum vulgari, Adiantum aureum, Golden Maiden-hair*, (F.) *Perce-mousse*. It is possessed of astringent properties, and was formerly given in diseases of the lungs, and in calculous affections.

POLYTRICHUM COMMUNE, *Asplenium trichomanoides*.

POLYTROPH'IA, from $\pi\omicron\lambda\upsilon\varsigma$, 'much,' and $\tau\rho\epsilon\phi\omega$, 'I nourish.' Abundant or excessive nutrition.

POLYURESIS, *Diabetes*.

POLYURIA, *Diabetes*.

POLYU'RICUS, from $\pi\omicron\lambda\upsilon\varsigma$, 'much,' and $\sigma\upsilon\rho\eta$, 'urine.' Sauvages calls—*Ischuria polyurica*—a kind of ischuria, caused by accumulation of urine in the bladder.

POMA, *Drink*—p. *Chinensis*, see *Citrus aurantium*.

POMACEUM, *Cider*.

POMA'TUM, *Pommatum*, (F.) *Pommade, Liparole*. A pharmaceutical preparation, employed only externally: which differs but little from an ointment, except in having generally less consistence. It is usually made aromatic, and coloured to render it more agreeable.

Common Pomatum is made of *lard*, 12lbs; *oil*, 4lbs; *essence*, ʒviii.

POMATUM AD LABIA DEMULCENDA, *Cerate for the lips*—p. *Epispasticum flavum, Unguentum lyttæ medicatum aliud*—p. *Epispasticum viride, &c.*, *Unguentum lyttæ medicatum*—p. for the *Lips, Cerate for the lips*—p. *Nitricum vel oxynatum, Unguentum acidi nitrosi*—p. *Saturi, Unguentum plumbi superacetatis*.

POMBALEA IPECACUANHA, see *Ipecacuanha*.

POMEGRANATE, *Punica granatum*.

POMILIUS, see *Nanus*.

POMMADE, *Pomatum*—p. *d'Alton, Unguentum acidi nitrosi*—p. *Antipsorique de Jassier, Unguentum sulphuris compositum*—p. *d'Autenrieth, Unguentum antimonii tartarizati*—p. *de Cyrillo, Unguentum muriatis hydrargyri oxygenato medicatum*—p. *Épispastique jaune, Unguentum lyttæ medicatum aliud*—p. *Épispastique verte, Unguentum lyttæ medicatum*—p. *de Garou, Unguentum epispasticum de daphne gnidio*.

POMMADE DE GONDRET, *P. ammoniacale de Gondret* (F.), *Gondret's Counterirritant, Gondret's ammoniacal Caustic. Liq. ammon.* p. ij; *Sevi*, p. j; *Ol. amygdal.* p. j; *M.* Used to excite a speedy revulsion in cases of chronic affections of the brain, incipient cataract, amaurosis, &c., as well as to cauterize the integuments deeply.

The above formula, is that of the French Codex, but, according to M. Trousseau, it is much too hard for use, unless the weather is warm.

He proposes two formulas, one for summer, the other for winter. In the former he directs three parts of lard, one of suet, and four of liquor ammoniac; in the latter, equal parts of lard and liquor ammoniac.

POMMADE POUR LES LÈVRES, Cerate for the lips—*p. Ophthalmique* (Regent's,) Unguentum ophthalmicum—*p. Oxygénée*, Unguentum acidi nitrosi—*p. Stibiée*, Unguentum antimonii tartarizati.

POMME, see *Pyrus malus*—*p. d'Adam*, *Pomum Adami*—*p. d'Amour*, *Solanum lycopersicum*—*p. Épineuse*, *Datura stramonium*—*p. de Merveille*, *Momordica balsamica*—*p. Mousseuse*, *Be-degar*—*p. de Terre*, *Solanum tuberosum*.

POMMES HÉMORRHOÏDALES, see *Viscum album*.

POMMETTE, see *Malus os*.

POMMIER, *Pyrus malus*.

POMPH'OLYX, from *πομφος*, 'a bladder.' A small vesicle on the skin. An eruption of *bullæ* or *blebs*, appearing without any inflammation around them, and without fever. It is the *Eczymosis Pompholyx* of Good. See *Pemphigus*.

POMPHOLYX, Tutia, Zinci oxydum.

POMPION, *Cucurbita pepo*.

POMUM ADA'MI, (F.) *Pomme d'Adam*, *Adam's Apple*. The projection formed by the thyroid cartilage in the neck—of males particularly. It is so called from a notion that it was caused by the apple sticking in the throat of our first parent.

POMUM AMORIS, Testicle—*p. Hierosolymitanum*, *Momordica balsamina*—*p. Melongenzæ*, see *Solanum melongena*—*p. Mirabile*, *Momordica Balsamina*—*p. Spinosum*, *Datura stramonium*.

PONCTION, Puncturing.

POND SHOVEL, *Unisema deltofolia*.

PONDERA ET MENSURÆ, Weights and measures.

PONDUS, Pudibilia—*p. Pharmaceuticum*, see *Weights and Measures*.

PONGITIF, Pungent.

PONS CEREBELLI, *Pons Varolii*—*p. Hepatis*, see *Lobulus anonymus*—*p. Sylvii*, *Quadrigenina Tubercula*—*p. Tarini*, *Tarini pons*.

PONS VANO'LII, *Pons Cerebelli*, *Corpus annulære*, *Processus annularis*, *Prominencia annularis cer'ebrî*, *Eminencia annularis*, *Varolii's bridge*, *Nodus encephali vel Cer'ebrî*, *Cerebral protuberance*, *Protuberantia annularis Willisii*, (F.) *Protuberance cérébrale*, *P. annulaire*, *Mésocéphale*, *Mésocéphale*, *Pont de Varole*, *Annular protuberance*. An eminence at the upper part of the medulla oblongata, first described by *Varolius*. It is formed by the union of the crura cerebri and crura cerebelli.

PONS ZYGOMATICUS, Zygomatic arch.

PONTE, see *Parturition*—*p. Périodique*, see *Parturition*.

PONTEDERIA CORDATA, *Unisema deltofolia*.

PONTICUM ABSINTHIUM, *Artemisia Pontica*.

POPLAR, AMERICAN, *Liriodendron*—*p. Balm of Gilead*, *Populus Candicans*—*p. Black*, *Populus*—*p. Tree*, *Liriodendron*—*p. Tulip-bearing*, *Liriodendron*.

POPLES, *Gare'tum*, *Garretum*, *Ignys*, *Ig'nyè*, *Suffrago*, *Fossa genu*, *Fossa poplitæa*, the *Ham*, the *Hough*, *Hock*, (F.) *Jarret*, from *post*, and *plico*, 'I fold.' The posterior part of the knee joint. The ham forms what is called the *popliteal region* or *space*.

POPLITÆUS, *Popliteal muscle*.

POPLITÉ, *Popliteus muscle*.

POPLITEAD, see *Popliteal aspect*.

POPLITE'AL, *Poplitæus*, *Poplitic*, from *poples*,

'the ham.' That which relates to the ham. A name given to various parts.

POPLITEAL ARTERY—*Popliteal portion of the crural*,—(Ch.) is really a continuation of the femoral, which changes its name on passing through the adductor magnus muscle. It descends a little obliquely outwards into the hollow of the ham, and extends from the commencement of the lower third of the thigh to the end of the upper quarter of the leg, where it terminates by dividing into the *posterior tibial* and *peroneal* arteries. In the ham, it gives off the three *superior articular arteries*; and, at the top of the leg, the arteries of the gemini muscles or *gemini branches*, (F.) *branches jumelles*, the *two inferior articular arteries*, and the *tibialis antia*.

POPLITEAL ASPECT. An aspect towards the side on which the poples or ham is situated. *Barclay*. *Poplite'ad* is used by the same writer adverbially, and signifies 'towards the popliteal aspect.'

POPLITEAL FOSSA, *Poples*.

POPLITE'AL GLANDS, *Glan'dule poplitææ*. Lymphatic glands, four in number, seated in the popliteal region or space.

POPLITEAL MUSCLE, *Poplitæus Muscle*, *Muscle Jarretier*, *Fémoro-poplitæo-tibial*, (Ch.) *Subpoplitæus*, (F.) *Muscle poplité*, is seated in the popliteal region. It is triangular, long, flat; and is inserted, on the one hand, by means of a strong tendon, into the tuberosity at the outer condyle of the femur, terminating below at the upper part of the posterior surface of the tibia. This muscle bends the leg on the thigh, and, reciprocally, the thigh on the leg. When the leg is bent, it causes it to turn, in rotation, inwards.

POPLITEAL NERVES. They result from the bifurcation of the sciatic, and are two in number, viz. 1. The *external popliteal*, *Peroneal nerve*, *Branche péronière*, (Ch.) It is smaller than the internal; turns to the outside of the fibula at the upper part of the leg, and divides into the *musculo-cutaneous branch*, *nerf pré-tibio-digital*, (Ch.) and the *anterior tibial*, *nerf pré-tibio-musphalange-taire*, (Ch.) 2. The *internal popliteal nerve*, *Branche tibiale*, (Ch.) which is larger than the other, and seems to be the real continuation of the sciatic nerve. It descends vertically into the hollow of the ham; and passes beneath the aponeurotic arch of the solaris muscle, beyond which it takes the name *tibial nerve*. It furnishes the *external saphena nerve*, and a number of branches, that are distributed to the posterior muscles of the leg. It then passes to the sole of the foot to be divided into two branches, called *Plantar nerves*.

POPLITEAL REGION, *Poples*—*p. Space*, *Poples*. **POPLITEAL VEIN** has the same arrangement as the artery behind which it is situate.

POPLITIC, *Popliteal*.

POPONAX, see *Pastinaca opoponax*.

POPPY, CELANDINE, *Stylophorum diphyllum*—*p. Corn*, red, *Papaver rhœas*—*p. Heads*, see *Papaver*—*p. Horn*, *Stylophorum diphyllum*—*p. Juice*, *Meconium*—*p. Prickly*, *Argemone Mexicana*—*p. Spotting*, *Cucurbalus Beben*—*p. Thorn*, *Argemone Mexicana*—*p. White*, *Papaver*—*p. White*, capsule, see *Papaver*.

POP'ULUS, *Populus nigra*, *Ægei'ros*, *Ache-rois*, *Black poplar*, (F.) *Peuplier noir*. The young buds, *oculi* or rudiments of the leaves, which appear in the beginning of spring, were formerly used in an official ointment—the *unguentum populæum*. It was, also, recommended in chronic affections of the lungs.

The bark of *Populus Tremuloïdes*, *American aspen*, of *P. TREM'ULA seu pen'dula*, *European aspen*, and of *POPULUS CAN'DIGANS*, *Balm of Gilead*

Poplar, is antiperiodic, and furnishes *salicin* and *populin*, in which the properties probably reside.

POPULUS BALSAMIFERA, see *Fagara octandra*—*p. Candicans*, see *Populus*—*p. Pendula*, *P. tremula*—*p. Tacamahaca*, see *Fagara octandra*—*p. Tremula*, see *Populus*—*p. Tremuloides*, see *Populus*.

PORCELAINÉ, *Essera*, *Urticaria*.

PORCELLIO, *Oniscus*.

PORCELLUS, *Oniscus*.

PORCULUS, *Oniscus*.

PORCUPINE DISEASE, *Ichthyosis*.

PORCUPINE MEN, *Echinodermi*. Persons have been so called in whom the cuticle is produced in the form of pointed prolongations, as if it had been moulded on the papillæ, like the shorter and blunter quills of the porcupine.

PORCUS, *Vulva*.

PORDE, *Crepitation*.

PORE, *Porus*, *In'ertitice*, *ropes*, 'a passage.' Anatomists have given this name to the openings at the extremities of vessels at the surface of different membranes. **EXHALANT PORES** have been supposed to exist in the exhalants, to transmit the fluids exhaled.—**ABSORBENT PORES** are employed in taking up parts that have to enter the circulation. Pores exist in the cuticle; yet Humboldt, with a powerful magnifying-glass, was unable to observe them. The pores of the skin have also been called *spira'cula*.

POREBLIND, *Myopia*.

PORI BILLA'RII, *Ductus biliar'ii*, *Sur'culi fell'ei*. Ducts which receive the bile from the penicilli of the liver, and convey it to the hepatic duct.

PORI CUTA'NEL, *P. Exhalan'tes* seu *Sudorifer'i* seu *Resorben'tes*. The pores of the skin.

PORI EXHALANTES, *P. cutanei*—*p. Pulmonum*, *Cellules*, *bronchicæ*—*p. Resorbentes*, *P. cutanei*—*p. Sudoriferi*, *P. cutanei*.

POROCE'LE, from *ropes*, *callus*, and *επλη*, 'a tumour.' A hard tumour of the testicle or its envelopes.

POROMA, *Induration*.

POROMPHALOCÉLE, *Poromphalon*.

POROM'PHALON, *Poromph'alus*, *Poromphaloc'ele*, from *ropes*, 'hard,' and *οφθαλος*, 'the navel.' Umbilical hernia with hard and thickened parietes.

POROS, *Canal*.

POROSIS, *Chalassa*, *Induration*.

POROTIC, *Porot'icus*, from *ropes*, 'callus.' A remedy believed to be capable of assisting the formation of callus.

PORPHYRA, *Purpura*—*p. Græcorum*, *Pecthis*—*p. Hæmorrhagica*, *Purpura hæmorrhagica*.

PORPHYRISMA, *Scarlatina*.

PORPHYRISMUS, *Scarlatina*.

PORPHYRIZATION, *Levigation*.

PORPHYRO-TYPHUS, see *Typhus*.

PORPHYRU'RIA, *Porphyu'ria*; from *porphura*, 'purple,' and *ουρον*, 'urine.' A state of the urine—*pur'puric urine*—in which it deposits the remarkable colouring matter—*pur'purine*—in association with urate of ammonia.

POR'PHYRY, *Porphyri'tes*, from *porphura*, 'purple.' A species of very hard, compound rock, susceptible of considerable polish, and used in the fabrication of mortars and slabs for the apothecary.

PORPHYRY, *BLACK*, *Ophites*.

PORPHYURIA, *Porphyuria*.

PORRACÉ, *Porraceus*.

PORRA'CEOUS, *Porra'ceus*, *Fra'sinus*, from *porrum*, 'a leek.' (F.) *Porracé*. Having the green colour of the leek. An epithet given to

certain excreted matters,—the sputa, bile and fæces particularly.

PORREAU, *Allium porrum*.

PORRECTUM, *Lever*.

PORRET, *Allium porrum*.

PORRIGINE, *Porrigio favosa*.

PORRIGINEUX, *Porriginous*.

PORRIGINOSUS, *Porriginous*.

PORRIG'INOUS, *Porrigino'us*, (F.) *Porrigineux*. Appertaining to porrigio.

PORRIGO (L.), 'scurf or scall in the head.' *Tin'ea*, *Favus*, *Furfura'tio*, *Furfures*, *Egypt'is porrigio*, *Phlysis porrigio*, from *porrigere*, 'to spread.' (F.) *Teigne*, *Rache*. Some of the varieties are contagious. It is principally characterized by an eruption of the pustules, called *favi* and *achores*, unaccompanied by fever.

PORRIGO DECAL'VANS, *Tricho'sis a'rea*, *Area*, *Alope'cia are'a'ta*, *A. partial'is*, *A. circumscripta*, *Phytoalope'cia*, *Tyr'ia*, *Tyro'ma*, *Ophi'asia*, *Tin'ea tonsdens*, *Herpens tonse'rans*, *Limited or partial Baldness*, consists of patches of baldness without decay or change of colour in the surrounding hair, the exposed parts of the scalp being glabrous, white, and shining. The morbid condition sometimes spreads, so that the patches coalesce, rendering the baldness extensive. To a vegetable growth found at the roots of the hair in *Tinea tonsdens*, Malmstèn of Stockholm has given the name *Trichophyton tonse'rans*. The treatment consists in keeping the scalp cleared by constant shaving, and in the steady application of some stimulating liniment or ointment.

PORRIGO FAVO'SA, *Ce'rion*, *Favus*, *Egypt'is porrigio favosa*, *Tinea favosa*, *Scu'bies cap'itis favosa*, *Melice'ra*, *Melice'rum*, *Melice'ria*, *Mel'ifa'vium*, *Porrigophyte*, *Honey-comb Scall* or *Tetter*, (F.) *Teigne farusee*, *Porrigine*. This consists in an eruption of pustules common to the head, trunk, and extremities, pea-sized, flattened at the top, in clusters, often uniting; discharge, fetid; scabs, honey-combed; the cells filled with fluid. It occurs both in early and adult life. Modern researches have satisfied some observers, that the crusts of favus are of vegetable nature, and formed of a parasitic plant, belonging to the genus *mycodermia*, for which Remak has proposed the name *Achorion Schönleini*. The point is not, however, settled. The treatment of this variety must consist in the exhibition of laxatives and the mildest stimulating ointments, such as the *Ung. zinci*, *Ung. hydrargyri præcipitat. alb.*, &c. Eczema of the hairy scalp is often confounded with Porrigio.

PORRIGO FUR'FURANS, *Egypt'is porrigio furfura'cea*, *Tinea furfuracea*, *Tinea porrigino'ea*, *Pityri'asia Tricho'sis furfura'cea*, *Teigne furfura'ce* (Alibert), commences with an eruption of small *achores*, the fluid of which soon concretes and separates in innumerable, thin, laminated scabs, or scale-like exfoliations. It is attended with a good deal of itching and some soreness of the scalp, to which the disease is confined. It occurs chiefly in adults. In the treatment, the scalp must be kept shaved. The part must be washed repeatedly with soap and water, and an oiled silk cap worn. The nature of the ointments used must vary according to the period of disease and the irritability of the part affected. *Zinc ointment*;—one made with the *Cocculus indicus*;—the *Sulphur ointment*;—*Citrine ointment* and *Ung. hydrargyri nitrico-oxidi*; *Tar ointment* and *Nitric acid ointment* have all been found useful. Should inflammation or discharge arise, these applications must of course be intermitted.

PORRIGO LARVALIS, *P. lupinus*.

PORRIGO LARVA'LIS, *Crusta lac'tea*, *Egypt'is*

Porrigo crustacea, *Mentigo*, *Achor*, *Tinea lactea*, *T. Fa'cici*, *Milky scall* or *Tetter*, *Lactw'men*, *Lactigo*, (F.) *Croûte de lait*, *Croûte laiteuse*, *Feux volages*, *La Graine*. This is, almost exclusively, a disease of infancy. It commonly appears first on the forehead and cheeks, in an eruption of numerous, minute, whitish aches on a red surface. These break and discharge a viscid fluid, which becomes incrustated in thin, yellowish, or greenish scabs. The patches spread, until the whole face becomes, as it were, enveloped in a mask; hence the epithet *larvalis*. The disease is rather a variety of *Eczema*. Sometimes the eruption appears on the neck and breast; and, occasionally, on the extremities. In general, the health of the child does not suffer, but the eruption is always attended with much itching and irritation. The treatment consists in mild, tepid ablution, and the application of gently stimulating ointments, as of the oxydum zinci. The bowels must be kept in a soluble state by small doses of calomel, or by rhubarb and magnesia.

PORRIGO LUPINO'SA, *Tinea lupina*, *Scabies capitis*, *Ecpye'sis porrigo lupino'sa*, *Porri'go larva'lis*, *Impeti'go figura'ta*, *Tinea granula'ta*, *T. mucosa*, *Crueta lactea* (of some), *Ment'agra infans'tum*, (F.) *Teigne*, *Dartre crustacee flavescence*, consists of minute pustules in small patches, mostly commencing on the scalp; the patches terminate in dry, delving scabs, resembling lupine seeds; the interstices often covered with a thin, whitish, and exfoliating incrustation. It occurs chiefly in early life, and requires the same treatment as the last.

PORRIGO SCUTULA'TA, *Tinea granula'ta*, *Ecpye'sis porrigo galea'ta*, *Tinea fico'sa*, *Acho'ree seu Scabies capitis*, *Ringworm of the Scalp*, *Scalled head*, (F.) *Teigne annulaire*, *T. en anneau*, *T. nummulaire*. It commences with clusters of small, light, yellow pustules, which soon scab off; and, if neglected, become hard by accumulation. If the scabs be removed, the surface is left red and shining, but studded with slightly elevated points. If not attended to, it involves the whole head. It occurs in children three or four years of age, and is very unmanageable. The rules laid down under *Porrigo furfurans* must be here still more perseveringly enforced. The whole tribe of stimulating ointments may be used in succession. No one will always succeed, and hence the necessity of change, provided advantage should not seem to follow any particular application. The *Unguentum ad Scabiem*, of Bannier, sometimes cures, when others fail.

PORRIGOPHYTE, *Porrigo favosa*.

PORRUM, *Allium porrum*, *Thymion*.

PORRUS, *Sarcoma*, *Thymion*.

PORTA, *πύλη*, *Pylé*, 'a gate.' The part of the liver where its vessels enter as by a gate. Also, the Vulva.

PORTA JECORIS, *Porta vena*.

PORTA VENA, *Vena porta*, *V. porta'rum seu porta'lis*, *Rama'lis vena*, *Jan'itrix*, *Vena magna seu quæ ad portas est seu stelechia'sa seu lactea seu ostia'ria*, *Porta Jec'oris*, *Porta*, *Vena arterio'sa seu arteria'lis*, *Manus Jec'oris seu he'patis*, *Vena ad portas*. The *System of the vena porta* or the *Abdom'inal venous system*, (F.) *Veine porte*, *Porte veine*, is a vascular apparatus of black blood, situate in the abdomen, and resulting from two distinct orders of vessels, united into one common trunk. 1. One of these trunks, much more extensive than the other, has received the name *Vena porta abdomina'lis*, because it arises from all the organs enclosed in the cavity of the abdomen, except the kidneys and bladder; and in the female, the uterus. The *Abdominal vena porta* has two principal roots, the *splenic vein*

and the *superior mesenteric*, which have their ramifications in all the digestive organs. 2. The other trunk, destined solely to the liver, has been called the *Hepatic vena porta*. It appears to be a continuation of the abdominal vena porta, and proceeds towards the inferior surface of the liver. Opposite to the transverse fissure of that organ, it divides, like an artery, into two branches, which, by their union, seem to form a canal or duct, called by some the *Sinus of the vena porta*. These branches are distributed in the substance of the liver, whither they are accompanied by a prolongation of the fibrous capsule of that organ, — the capsule of Glisson. The different branches of the vena porta are devoid of valves. See Liver.

PORTAL, from *porta*, 'a gate.' Relating to the porta of the liver, — as the *portal system*, or *system of the vena porta*. By extension, the term has been applied to an analogous system of vessels in the kidney. See Kidney.

PORTAL FISSURE, see Liver — p. System of the Kidney, see Kidney — p. Veins of the Kidney, see Kidney.

PORTE-AIGUILLE, *Acutenaculum*, *Needle-carrier*, *Needle-bearer*, from (F.) *porter*, 'to carry,' and *aiguille*, 'a needle.' An instrument for accurately laying hold of a needle, and giving it greater length, when it is so fine and small that it cannot be held by the fingers. It is of steel or silver, about two inches long, and throughout the whole, almost, of its length, divided into two branches, so as to form a kind of forceps, capable of being closed by means of a sliding ring. A modification of this instrument was devised by Dr. Physick for taking up deep-seated arteries beyond the reach of a tenaculum or common needle. It consists of a forceps so constructed as to hold in its extremity a needle armed with a ligature. The handles of the forceps are fastened together, temporarily, by a spring or catch; and, when the needle is fairly deposited beneath the vessel, it is disengaged from the forceps and drawn out, leaving the ligature behind, which can be tied without difficulty.

PORTE-BOUGIE, (F.) A silver canula similar to that of a trochar, except that it is longer. It is used for conducting bougies into the urethra.

PORTE-CAUSTIQUE, *Porte-pierre* — p. *Feuille*, *Subscapularis*.

PORTE-LIGATURE, from *porter*, 'to carry,' and *ligature*. An instrument for conveying a ligature to deep-seated parts.

PORTE-MÈCHE (F.), from *porter*, 'to carry,' and *mèche*, 'a tent.' An instrument for carrying tents or *mèches* deeply into fistulous openings, or sinuses, to the bottom of ulcers, &c. It is a wire of silver or steel, four or five inches long, having a notch at one extremity, and a button at the other.

PORTE-MOXA, (F.) A small instrument for keeping the moxa applied to a part to be cauterized. It consists of a metallic ring — separated from the skin by three supports of ebony — to which a handle is adapted.

PORTE-ŒU'D (F.), from *porter*, 'to carry,' and *œud*, 'a knot.' An instrument for carrying a ligature round the base or pedicle of a tumour.

PORTE-PIERRE (F.), *Porte-caustique*, *Cautic bearer*. An instrument similar to a *porte-crayon* for carrying lunar caustic.

PORTE-SONDE, (F.) An instrument resembling a *porte-crayon*, employed for holding the style or *sonde*, and inserting it more readily into the nasal duct, during the operation for fistula lachrymalis.

PORTE-VEINE, *Porta Vena*.

PORTER, Cerevisia.

PORTIO DURA, Facial nerve—p. Inter duram et mollem, Portio Wrisbergii—p. Intermedia Wrisbergii, Portio Wrisbergii—p. Media inter portionem duram et portionem mollem, Portio Wrisbergii.

PORTIO MOLLIS, Auditory nerve.

PORTIO WRISBERGII, Portio intermedia Wrisbergii, Portio media inter portionem duram et portionem mollem, Portio inter duram et mollem, (F.) Faisceau intermédiaire de Wrisberg, Intermédiaire de Wrisberg. A small, white fasciculus, intermediate between the portio mollis and portio dura of the seventh pair of nerves, which was first described by Wrisberg. The Chorda Tympani is supposed by some to emanate from this nerve.

PORTION COSTO-TRACHÉLIENNE, DU SACRO-SPINAL, Longissimus dorsi—p. Écailloux ou squameux du temporal, Squamous portion of the temporal—p. Lombaire du plexus crural, Lumbar plexus.

PORTION GODRONNÉE DE LA CORNE D'AMMON. A name given by Vicq d'Azyr to a small, denticulated cord, of a compact tissue and granular appearance, which unites the cornu ammonis to the paries of the lateral ventricle.

PORTONARIUM, Pylorus, Duodenum.

PORTULA'CA, *Andrach'nē*, *Allium Gallicum*, *Portula'ca olera'cea*, *Purlane*, (F.) *Pourpier cultivé*. This plant abounds with a watery and somewhat acid juice; and is often put into soups or pickled with spices. It is regarded as antiseptic and aperient.

POROUS, Callus, Meatus—p. Acusticus, Auditory canal, internal.

PORUS OPTICUS. An opening in the centre of the cribriform lamella of the sclerotic, through which the central artery of the retina enters the eyeball.

POSCA, Oxycrata.

POSE, Coryza.

POSIMOS, Potable.

POSITION, FALSE, False position.

POSOL'OGY, *Posolog'ia*, *Dosilog'ia*, from *ποσος*, 'quantity,' and *λογος*, 'a discourse.' Indication of the doses in which the different articles of the materia medica ought to be exhibited.

POSSET, *Possetum*, from (L.) *posca*, 'sour wine and water.' Milk curdled with wine, or any acid, or treacle. A preparation of beer and milk; *Zythog'ala*.

POSSET, SACK, see Sack—p. Sago, see Sago.

POSSETING, Regurgitation (of Infants).

POSTBRACHIALE, Metacarpus.

POSTCARPIUM, Metacarpus.

POSTERIOR ANNULA'RIS. An external, interosseous muscle, which arises from the corresponding sides of the metacarpal bones of the ring-finger and little finger, and is inserted into the inside of the tendon on the back of the ring-finger. Its use is to draw the ring-finger inwards.

POSTERIOR AURIS, Retrahens auris.

POSTERIOR IN'DICIS MANŪS. An internal, interosseous muscle, which arises from the inner or ulnar side of the metacarpal bone of the fore-finger, and is inserted into the inside of the tendon on the back of the fore-finger. Its use is to draw the fore-finger inwards.

POSTERIOR INDICIS PEDIS, *Abductor Indicis Pedis*. An external, interosseous muscle, which arises from the contiguous sides of the metatarsal bones of the fore-toe, and second of the small toes, and is inserted into the outside of the root

of the first bone of the fore-toe. Its use is to pull the fore-toe outwards.

POSTERIOR MEDII DIG'ITI MANŪS. An external, interosseous muscle, which arises from the corresponding sides of the metacarpal bones of the middle and ring-fingers; and is inserted into the inside of the tendon on the back of the middle finger. Its use is to draw the middle finger inwards.

POSTERIOR MEDII DIG'ITI PEDIS, *Abductor medii digiti pedis*. An external, interosseous muscle, which originates from the contiguous sides of the metatarsal bones of the second and third of the small toes, and is inserted into the outside of the root of the first bone of the second of the small toes. Its use is to pull the toe outwards.

POSTERIOR TER'TII DIG'ITI, *Adductor tertii digiti*. An external, interosseous muscle, which arises from the contiguous sides of the metatarsal bones of the third and fourth of the small toes, and is inserted into the outside of the root of the first bone of the third of the small toes. Its use is to pull the toe outwards.

POSTHE, Penis, Prepuce.

POSTHET'OMIST, *Posthet'omus*, from *πρεθη*, 'prepuce,' and *τομη*, 'incision.' One who performs the operation of circumcision.

POSTHETOMY, Circumcision.

POSTHIA, Hordeolum.

POSTHIOPLAS'TIC, *Posthioplas'ticus*, from *πρεθηον*, 'the prepuce,' and *πλασσω*, 'I form.' An epithet applied to the operation for restoring the prepuce.

POSTHIT'IS, from *πρεθη*, 'the prepuce, the penis,' and *itis*, the termination in inflammation. Inflammation of the prepuce or penis.

POSTHIUM, Prepuce.

POSTHON'CUS, from *πρεθη*, 'the prepuce or penis,' and *ογκος*, 'a tumour.' Swelling of the prepuce or penis.

POSTHOPLAS'TICA, from *πρεθη*, 'prepuce,' and *πλαστικός*, 'formative.' The art of making a new prepuce.

POSTHUMOUS, from *post*, 'after,' and *humus*, 'the ground.' Occurring after death.

POSTHUMOUS CHILD. One born after the death of its father, or taken from the dead body of its mother, as by the Cæsarean section.

POST-MORTEM. 'After death;' as 'a post mortem or necroscopic examination.'

POST-NATUS. In the old law writers, the second son.

POST-PARTUM. 'After delivery.' As 'post partum hemorrhage.'

POSTPOSIT'IO. Delay in the return of a paroxysm. It is opposed to *anticipatio*, which means the return of a paroxysm earlier than its accustomed hour.

In this sense, we speak of an *anticipating*, and a *postponing* (*Febris hysteret'ica*) intermittent.

POSTREMA, Uterus.

POTABLE, *Potabilis*, from *potare*, 'to drink.' *Pot'imos*, *Potos*, *Pos'imos*, 'drinkable.' Water is said to be potable, when it contains atmospheric air; is not brackish; and has no mineral impregnation of consequence.

POTASH. So called from the pots or vessels in which it was made;—*Vegetabile alkali*, *Gastrinum*. Also, Potass.

POTASH OF COMMERCE, *Potassa imp'ura*, *Impure potassa*, *Alu'men cast'num*, *Cin'eres Rus'ici*, *Subcar'bonas potas'ea imp'urus*, *Potas'ea carbonas imp'urus*,—the *Pearlash* of commerce, is prepared from the ashes of land-plants by calcination, solution in water, filtration, and evaporation. It usually consists of subcarbonate of potassa,

sulphate of potassa, chloride of potassium, silic, oxide of iron, &c.

From the ashes of lees of wine, and from vine-twig, a much purer alkali is obtained. It is called *Cinis infecto'rius*, *C. fæcum*, *Cin'eres clavella'ti*, *Alu'men fæcum*, *Cin'eres gravella'ti*, (F.) *Cendres gravêlles*, *Cendres de sarment*.

Another variety of the alkali is afforded by burning argol in a crucible; afterwards powdering and calcining it, till it is nearly white; then dissolving in water, filtering, and evaporating. It is called *Salt of Tartar*, *Sal Tartari*, *Kali præparatum e tartaro*, *Kali e tartaro*, *Subcar'bonas potassæ puris'simus*, *Potassæ subcar'bonas e tartaro*. Lastly, when wormwood is burnt to ashes, dissolved in water, filtered, and evaporated to dryness, it affords another variety of vegetable alkali, the *Sal absin'thii* or *Salt of wormwood*.

Impure potash is used for preparing the subcarbonate for medical use.

POTASS, Potassa, Potassa fusa, Potash. The protoxide of potassium.

POTASSA, ACETATE OF, Potassæ acetas — p. Bichromate of, Potassæ bichromas — p. Bisulphate of, Potassæ supersulphas — p. Bitartrate of, Potassæ supertartras — p. Carbonate of, Potassæ carbonas — p. Carbonate of, pure, see Potassæ subcarbonas — p. Chlorate of, Potassæ murias hyperoxygenatus — p. Chromate of, Potassæ chromas — p. Chromate of, neutral, Potassæ chromas — p. Chromate of, yellow, Potassæ chromas.

POTASSA CUM CALCIS, Potass with lime, *Calx cum calis puro*, *Caus'ticum commu'nè fort'ius*, *Lapis infernalis sive sep'ticus*, *Kali caus'ticum cum calcè*, *Potassæ opè calcis parata et ignè fusa*, *Lapis caus'ticus*, (F.) *Potassæ préparée avec la chaux*, *P. à la Chaux*, *Pierre à cautère*. (Potassæ, Calcis ʒʒ.) Rub together, and keep in a well-stopped bottle. Ph. U. S.) Used for the same purposes as the next, but more manageable; being less deliquescent.

POTASSA, EUCHLORATE OF, Potassæ murias hyperoxygenatus — p. Ferrocyanate of, Potassii ferrocyanuretum — p. Ferropussiate of, Potassæ cyanuretum.

POTASSA FUSA, Potassa, *Kali caus'ticum*, *Fused potass*, *Caus'ticum commu'nè acer'rinum*, *Kali purum*, *Alkali vegetabilè fixum caus'ticum*, *Caus'ticum alkali'num*, *C. commu'nè*, *C. Potentia'le*, *C. Sali'num*, *Hydras ka'licum*, *Hydras potassæ puræ fusa*, *Potassæ hydras*, *Lapis caus'ticus*, *Lapis caus'ticus chirurgor'um*, *Lapis infernalis alcali'nis*, *L. sep'ticus*, *Rupto'rium commu'nè*, *Fixed vegetable alkali*, *Hydrate of Potassa*, (F.) *Potassæ caustique*. (Prepared by evaporating solution of potass to dryness in an iron vessel.) This preparation is generally run into cylindrical moulds, covered with paper, and kept in well-corked vessels. It is powerfully escharotic, and is used for forming issues, curing strictures, &c.

POTASSA, FUSED, Potassa fusa — p. Hydriodate of, Potassæ hydriodas — p. Hydrobromate of, see Bromine — p. Hydrocyanate of, Potassii cyanuretum — p. Hyperoxalate, Potassæ oxalate of — p. Hypertartras, P. supertartras — p. Impura, Potash of commerce — p. and Iron, tartrate of, Ferrum tartarisatum — p. with Lime, Potassa cum calcè — p. Liquida, Liqueur potassæ — p. Mephite of, Potassæ subcarbonas — p. Monochromate of, Potassæ chromas — p. Muriate of, Potassæ murias — p. Nitrate of, Potassæ nitras — p. Ope calcis parata et igne fusa, Potassa cum calcè — p. Oxymuriate of, Potassæ murias hyperoxygenatus — p. Prussiate of, Potassii ferrocyanuretum — p. and Soda, Tartrate of, Soda, tartrate of — p. Subcarbonate of, Potassæ subcarbonas — p. Sulphate of, Potassæ sulphas — p. Sulphate of, acid, Potassæ supersulphas — p. Sulphuret of, Potassæ sulphuretum — p.

46

Supercarbonate of, Potassæ carbonas — p. Super-sulphate of, Potassæ supersulphas — p. Supertartrate of, Potassæ supertartras — p. Tartrate of, Potassæ tartras.

POTASSÆ ACETAS, *Acetas kali*, *Oxytar'tarus*, *Acetas liziv'ias seu ka'licum*, *Alkali tartari acet'o saturatum*, *Alkali vegetabilè cum aceto*, *Magiste'rium tartari purgans*, *Terra foliata Tartari*, *Kali acetatum*, *Sal diuret'icis*, *Sal Senner'ti*, *Ac'etate of potass*, *Arca'num tartari*, (F.) *Acétate de potasse*. (Acid. acetic. Oj, Potassæ carbon, q. s. Mix and add, by degrees, enough acetic acid to saturate the alkali. Then filter and evaporate till a pellicle is formed, which is to be dried upon bibulous paper; evaporate again in a water-bath, and, removing the pellicles, dry. — Ph. U. S.)

It is cathartic and diuretic. Dose, ʒj to ʒij, or more.

POTASSÆ ET ALUMINÆ SULPHAS, Alumen — p. Biantimonias, Antimonium diaphoreticum — p. Bicarbonas, Potassæ carbonas.

POTASSÆ BICROMAS, *Kali chromicum rubrum seu ac'idum seu bichromicum*, *Bichromate of potassa*. Procured by adding sulphuric, nitric, or acetic acid to a solution of the neutral chromate, and setting it aside to crystallise. It is a violent irritant poison; and has been used as a caustic in cases of morbid growths, in the proportion of from half a drachm to a drachm of the salt to from an ounce to an ounce and a half of water.

POTASSÆ BISULPHAS, P. supersulphas — p. Bitartras, P. supertartras.

POTASSÆ CAR'BNAS, *Kali ætra'tum*, *Bicar'bonas potassæ*, *Potassæ bicar'bonas* (Ph. U. S.) *Deutocarbonas potassii*, *Carbonate, bicar'bonate, or supercar'bonate of potassa*. This is not caustic, like the subcarbonate of potass, and hence, has been preferred to relieve acidity. (Potassæ carbon. ðiv, *Aqua destillat. Ox.* Pass carbonic acid through the solution until it is saturated, and filter. Evaporate at a heat not exceeding 160°, and dry the crystals on bibulous paper. Carbonic acid is obtained from marble by the addition of dilute sulphuric acid. — Ph. U. S.) Dose, gr. x to ʒss. It is used in forming the soda powders, as well as for its antacid properties.

POTASSÆ CAR'BNAS, P. subcarbonas — p. Carbonas impurus, P. subcarbonas — p. Carbonas purus, see P. subcarbonas — p. Chloras, P. murias hyperoxygenatus — p. Chloruretum oxydatum, P. murias hyperoxygenatus.

POTASSÆ CHROMAS, *Kali chromicum flavum seu neutra'le*, *Neutral yellow Chromate, or Monochromate of potassa*. Prepared by igniting a mixture of four parts of native chromite of iron (chrome-iron ore) and one part of nitre; dissolving out the chromate of potassa by water, and crystallizing. It has been used as an emetic, expectorant and diaphoretic. Dose, as an emetic, from two to four grains; as an expectorant, from ʒth to ʒ grain. In the proportion of one drachm to ʒ2 ounces of water, it has been used as an antiseptic wash — called by Jacobson, *Liquor conservatrix*.

POTASSÆ CITRAS, *Citrate of potassa*. (Acid. citric. ʒx, Potassæ bicarb. ʒxlv, Aq. q. s. Dissolve the acid in the water; and after effervescence has ceased, strain and evaporate to dryness. The salt is deliquescent, and must be kept in well-stopped bottles. Ph. U. S.) It possesses the refrigerant properties of the neutral salts, and may be given in fever, when to do little or nothing is the most advisable course. Dose, gr. x to ʒss.

POTASSÆ ET FERRI TARTRAS, Ferri tartarisatum — p. Hydras, Potassa fusa.

POTASSÆ HYDR'ODAS, Potassæ Protohydr'o-

das, Potasii protoxidi hydriodas, Kali Hydriodidicum, K. Hydriodidicum, Hydriodas Kalicus, Hydriodate of potass, (F.) Hydriodate de potasse. If a solution of potass be poured on iodine, an iodate and hydriodate are formed. These may be separated by means of alcohol, which only dissolves the latter of these salts. The hydriodate, or rather the *Iodide of Potassium, Kalium Iodatum, Potassii Ioduretum seu Iodidum, (F.) Iodure de potassium,* may be obtained by evaporation. When the *Iodide of potassium* is dissolved in water, it becomes the *Hydriodate of Potassa.* The following is the formula in the Ph. U. S. *Potass. ℥vj; Iodin. in pulv. ℥xvj; Carbon. ligni in pulv. subtiliss. ℥ij; Ag. bullient. Oij.* Dissolve the potassa in the water; add the iodine gradually, stirring until the solution becomes colourless, and continue the additions until the liquid remains slightly coloured from excess of iodine. Evaporate to dryness, stirring in the charcoal towards the close. Rub to powder, and heat to dull redness in an iron crucible, keeping up the temperature for 15 minutes. When cool, dissolve out the saline matter with pure water, filter the solution, evaporate and set aside to crystallize. By evaporating and crystallizing as before, an additional quantity of crystals may be obtained. *Virtues,*—those of iodine.

POTASSÆ MURIAS, Sal Digestivus vel Sal febrifugus Sylvi, Muriate of Potass, Spiritus salis marini coagulatus. Bitter and refrigerant.

POTASSÆ MURIAS HYPEROXYGENATUS, Potassæ Chloras, P. oxymurias, Oxymuriate or Hyperoxymuriate of potass, Chlorate of potassæ, Euehlorate of potass, Alkali vegetabile salitodephlogisticatum, Oehloruretum potassæ oxydatum, Halo'dum oxygenatum, Oxyge'no-Chloruretum potassii, Protochlorate of potassium, Kalichloricum, Chloras Kalicus depuratus, (F.) Chlorate de potasse. It has been regarded as anti-neuropathic, and as an alterative purifier of the blood and humours. It is of doubtful efficacy. Dose, 3 to 6 grains or more.

POTASSÆ NITRAS, Nitrate of Potass, Nitrum, Sal nitrum, Nitre, Salpetre, Sal petra, Salsedo mucrum, Sanguinea, Berenicium, Halintrum, Protoxide of Potassium, Nitrate of protoxide of Potassium, Kali nitricum, Nitrus kallicum, Nitrus lixivius, (F.) Nitrate de potasse. Obtained from the putrefaction of animal matters, in contact with calcareous or alkaline earths, by elixivation; adding, if necessary, wood-ashes to supply the alkaline basis. It is formed, in an impure state, by nature, in warm climates.

It is diuretic and refrigerant, and, in large doses, purgative; externally, cooling and detergent. Dose, gr. x to ℥ss. In large doses it is an acrid poison.

POTASSÆ NITRAS FUSUS SULPHURIS PAUCILLO MIXTUS, Sal prunellæ, Crystal'us minera'lis, Nitrus potassæ cum sulphurè fusus, Nitrum tabulatum, Lapis Prunellæ, Sore-throat salt, Mineral crystal, Anodynum minera'le. Nitrate of potass, mixed with a little sulphate of potass and run into moulds. Its properties are those of nitre.

POTASSÆ OXALAS, Superoxalate of Protoxide of Potassium, Oxalac Acidulum Potassæ seu Potassæ acidulus seu ba'sicus, Superoxalac kallicum, S. Potassæ, Hyperoxalac Potassæ, Sal Acetosellæ, Oxalium, Kali oxalicum acidulum, Oxalac subpotassicus, Oxalate of Potass, Salt of Sorrel. Prepared from the juice of wood sorrel. It is refrigerant, and is used to make lemonade, &c.

POTASSÆ OXALAS ACIDULUM, Potassæ oxalate of—p. Oxymurias, P. murias hyperoxygenatus—p. Protohydriodas, P. hydriodas—p. Puras fuses

hydras, Potassa fusa—p. et Soda tartaras, Soda, tartrate of.

POTASSÆ SUBCARBONAS, P. Carbones (Ph. U. S.), Subcarbonas Kali, Carbonas Potassæ, Kali præparatum, Sal Herbarum, Calcareous Tartar, Sal Plantarum, Subcarbonate of Potass, Sal Tartari, Sal Absinthii, Mephite of Potass, &c. (See Potash.) A filtered solution of the impure subcarbonate, *Potassæ carbonas impurus (Ph. U. S.) Pearl-ash (see Potash),* evaporated to dryness. This deliquescent salt is given in the same cases as the potassæ carbonas, than which it is more caustic and disagreeable.

The Parisian codex has a *Subcarbonas Potassæ ex tartaro combusto, vulgo Sal Tartari or Salt of Tartar*—it is the *Potassæ carbonas purus, Puras Carbonate of Potassa, Ph. U. S.;* a *Subcarbonas Potassæ ex deflagrantibus simul tartaric acidulo et Nitrate Potassæ paratus, vulgo Nitrum ex tartaro fixum;* and a *Subcarbonas potassæ ex deflagrantibus cum Carbonibus Nitratè Potassæ paratus, vulgo Nitrum fixum.* They are all used like the preceding.

POTASSÆ SUBCARBONAS IMPURUS, Potash of commerce.

POTASSÆ SULPHAS, Kali vitriolatum, Sulphas Kali, Kali sulphuricum, Lixivia vitriolata, Nitrum vitriolatum Schroederi, Sal Sapientie, Sal Tartari Sulphuratum, Specificum Paracelsi, Spiritus vitrioli coagulatus Mynsichti, Proto-sulphate of Potassium, Alkali vegetabile vitriolatum, Sal de duobus, Arca'num duplicatum, Nitrum vitriolatum, Tartarum vitriolatum, Panacea Ducis Holstie, Panacea duplicata, Sal Polychrestus, Sulphate of Potass, (F.) Sulfate de potasse. (The salt, that remains after the distillation of nitric acid, dissolved; the excess of acid saturated with subcarbonate of potass and crystallised.) Purgative and diuretic. Dose, ℥ss to ℥j as a laxative. In a large dose it has proved an irritant poison.

POTASSÆ SULPHAS CUM SULPHURE; Sal Polychrestus Glaseri, Lixivia Vitriolata Sulphurata. (Formed by deflagrating nitrate of potass with sublimed sulphur.) Same virtues as the last. Dose, gr. xv to xxx.

POTASSÆ SULPHURETUM, Potassii Sulphuretum, P. tersulphuretum, Kali sulphuretum, Hepar Sulphuris salivum, H. sulphuris vulgare, Sulphuretum lixivie, S. kallicum, Hepar Sulphuris, Liver of Sulphur, Sulphuret of Potass, (F.) Sulfure de potasse, Sulfure de potassium sulfatè, Foie de Soufre. (Sulphur. ℥j, Potassæ carb. ℥ij.) Rub them together, and place the mixture in a covered crucible upon the fire until they unite.) It has been employed in affections of the chest, as an expectorant, in the dose of from ℥ss to ℥j, largely diluted; but it is chiefly used as a bath or wash in cases of itch, tinea capitis, and other cutaneous affections.

POTASSÆ SUPEROXALAS, Potassæ oxalate of.

POTASSÆ SUPERSULPHAS, P. Bisulphas, Sal enizum, Supersulphate of Potass, Sal febrifugus of Lemery, Acid Sulphate of Potass, Bisulphate of Potass, Superproto-sulphate of Potassium, (F.) Bisulfate, de Potassæ. (The salt remaining after the distillation of nitric acid, dissolved, strained, and crystallized.) It is refrigerant and purgative. Dose, ℥ss to ℥j.

POTASSÆ SUPERTARTRAS IMPURUS, Tartarus crudus, Tartarum, Lapis vini, Magnetiæ, Pedagra, Tartar, (F.) Tartre cru, T. brut. It is called, also, *Tartarum rubrum* and *Red Argol*, when obtained from red wines; *Tartarum album* or *White Argol*, when from white wines. Tartar is the saline deposit from wines as they become aged; which attaches itself to the sides of the casks and bottles in which they are kept. It

consists of a considerable quantity of acidulous tartrate of potass, tartrate of lime, silica, alumen, oxyd of iron, manganese, and a red colouring matter, if the wine be red. It is chiefly used for the preparation of cream of tartar.

POTASSÆ SUPERTARTRAS, *Crystal'li Tartari, Tartras Acidulus Potassæ purus, Supertartrate of Protoxide of Potassium, Potassæ Bitartras* (Ph. U. S.), *P. tartras ac'ida, Bitartrate or Supertartrate of Potass, Hypertartras Potassæ, Tartras superpotassicus, T. subpotassicus, Crystals of Tartar, Cremor Tartari, Cream of Tartar* (when in powder,) *Supertartrate of Potass, (F.) Tartrate acide de potasse, Crème de Tartre.* (The tartar of wine purified.) It requires 120 parts of water at 60° to dissolve it. It is mildly purgative, refrigerant and diuretic. Dissolved in water, with a small quantity of white wine, some sugar and lemon-peel, it forms an agreeable beverage in febrile diseases, under the name of *imperiul*. Dose, as a diuretic, ℥i to ℥ij; as a purgative, ℥ss to ℥i.

POTASSÆ TARTRAS, *Kali tartarizatum, Al'cali fixum tartarizatum, Tartarum solubile, Tartarus tartarizatus, Lixiv'ia Tartarizata, Sal Panckrestum, Tartras Kalinus, T. lixiv'ie, Sal vegetabilia, Alkali vegetabilè tartarizatum, Tartrate of Potass, Soluble Tartar. (F.) Tartrate de Potasse. (Potassæ carbon. ℥xvj; Potassæ Bitartrat. in pulv. subtilis. ℥iij, vel q. s., aquæ bullientis, cong.* Dissolve the carbonate of potassa in the water, add the bitartrate to saturation, and boil; filter, evaporate till a pellicle forms, and set aside to crystallize. Pour off the liquid; dry the crystals on bibulous paper, and keep in closely-stopped bottles.—Ph. U. S.) A saline cathartic in the dose of ℥j.

POTASSÆ TARTRAS ACIDA, *P. supertartras*—p. *Tartras acidulus purus, P. supertartras*—p. *Tartras stibialis seu stibiosus, Antimonium tartarizatum.*

POTASSE, ACETATE DE, *Potassæ acetas*—p. *Bisulphate de, Potassæ supersulphas*—p. *Cautique, Potassa fusa*—p. *à la Chaux, Potassa cum calce*—p. *Chlorate de, Potassæ murias hyperoxygenatus*—p. *Hydriodate de, Potassæ hydriodas*—p. *Liquide, Liquor potassæ*—p. *Nitrate de, Potassæ nitras*—p. *Préparé avec la chaux, Potassa cum calce*—p. *et de Soude, tartrate de, Soda, tartrate of*—p. *Sulfate de, Potassæ sulphas, p. Sulfure de, Potassæ sulphuretum*—p. *Tartrate de, Potassæ tartras*—p. *Turtrate, acide de, Potassæ supertartras.*

POTASSII BROMIDUM, *Potassæ hydrobromæ, (F.) Bromure de Potassium, Bromide of potassium. (Bromin, ℥ij; Ferri filii, ℥j; Potassæ carbon. ℥ij and ℥j, vel q. s.; Ag. destillat., Oiv.* Add the iron filings and bromine to a pint and a half of the water; stirring for half an hour. Apply a gentle heat, and when the liquor assumes a greenish colour, add gradually the carbonate of potassa, dissolved in Oiss of the water, until it ceases to cause a precipitate. Continue the heat for half an hour, and filter. Wash the precipitate with the remaining water, boiling hot, and filter. Mix the liquors and crystallize by evaporation. Ph. U. S.) Virtues:—those of iodide of iron.

POTASSII CYANIDUM, *P. Cyanuretum.*

POTASSII CYANURETUM, *P. Cyan'idum, Cyanuret of Potassium, Hydrocyanate of Potassa, (Potassii Ferrocyannur., in pulv. ℥viij; Potassæ Carbonat., ex siccata, ℥iij.* Mix intimately and throw into a deep iron crucible, heated to redness; keep up the heat till effervescence ceases, and the fused mass concretes, of a pure white colour, upon a warm glass rod dipped into it; then pour out the liquid carefully into a shallow

dish, to solidify, stopping before the salt becomes contaminated with the precipitated iron. Break up the mass whilst warm, and preserve in well-stopped bottles. Ph. U. S.) Used in the same cases as the hydrocyanic acid. Dose, a quarter of a grain.

POTASSII DEUTO-CARBONAS, *Potassæ carbonas.*

POTASSII FERROCYANURETUM, *P. Ferrocyan'idum, Ferrocyanide or Ferrocyanuret of Potassium, Ferrocyanate of Potassa, Ferroprussiate of Potassa, Prussiate of Potassa, (F.) Protocyanure jaune de fer et de potassium, Cyanure de fer et de potassium.* The yellow double cyanuret of potassium and iron, the salt from which the cyanuret of potassium is obtained by calcination. It is not much used in medicine. It has been advised as an astringent in the colliquative sweats of phthisis, in leucorrhœa, &c.; but it does not seem to be possessed of much activity. Dose, 10 or 15 grains every four or five hours.

POTASSII HYDRARGYRO-IODIDUM, *Potassæ Iodohydrargyras, Hydrargyrum biiodatum cum kalio iodato, Kalium iodatum hydrargyrum, Iodohydrargyrate of Potassium, Hydrargyro-iodide of Potassium.* This salt is made by the combination of iodide of potassium with red iodide of mercury. Its properties are similar to those of the iodides of mercury, but in a less degree.

POTASSII IODIDUM, *Potassæ hydriodas*—p. *Ioduretum, Potassæ hydriodas*—p. *Oxygeno-chloruretum, Potassæ murias hyperoxygenatus*—p. *Protoxidum hydriodas, Potassæ hydriodas*—p. *Sulphuretum, Potassæ sulphuretum*—p. *Tersulphuretum, Potassæ sulphuretum.*

POTASSIUM. Same etymon as potash. The metallic base of potassa.

POTASSIUM, BROMURE DE, see Bromine—p. *Cyanuret of, Potassii cyanuretum*—p. *Ferrocyanide of, Potassii ferrocyanuretum*—p. *Ferrocyanuret of, Potassii Ferrocyanuretum*—p. *Iodide of, Potassæ hydriodas*—p. *Iodohydrargyrate of, Potassii hydrargyro-iodidum*—p. *Iodure de, Potassæ hydriodas*—p. *Oxide of, Potass*—p. *Protoarsenite of, Arsenite of protoxide of potassium*—p. *Protochlorate of, Potassæ murias hyperoxygenatus*—p. *Protonitrate of, Potassæ nitras*—p. *Protoxide of, Potass*—p. *Protoxide of, nitrate of, Potassæ nitras*—p. *Protoxide of, superoxalate of, Potass, oxalate of*—p. *Protoxide of, supertartrate of, Potassæ supertartras*—p. *Protosulphate of, Potassæ sulphas*—p. *Sulfure de, sulfate, Potassæ sulphuretum*—p. *Sulphuret of, Potassæ sulphuretum*—p. *Superprotosulphate of, Potassæ supersulphas.*

POTATO, *Solanum tuberosum*—p. *Fly, Lytta vittata*—p. *Hog, Convolvulus panduratus*—p. *Spanish, Convolvulus batatas*—p. *Sweet, Convolvulus batatas*—p. *Vine, wild, Convolvulus panduratus*—p. *Wild, Convolvulus panduratus.*

POTBELLY, *Physconia.*

POTELÉE, *Hyoscyamus.*

POTENTIA, *Force.*

POTENTIA seu POTES'TAS COEUN'DI, *Capability of copulation.*

POTENTIA GENERAN'DI. *The power of procreation.*

POTENTIA IRRITANS, *Stimulus.*

POTENTIAL, *Potentia'lis*; from *potens*, 'able.' An epithet for remedies which, although energetic, do not act till some time after their application. The caustic alkalies, for instance, are called *Potential cauterics* in contradistinction to the hot iron, which is termed *actual*.

POTENTILLA, *P. reptans.*

POTENTILLA ANSERINA, *P. argenti'na seu impolita seu neglecta, Argenti'na vulgaris, Fragaria anserina, Argentine, Chenoboscon, Argenti'ria, Anseri'na, Silver Weed, Wild Taney,*

(F.) *Argentine, Potentilla*. The leaves are mildly astringent and tonic.

POTENTILLA ARGENTINA, P. anserina—p. Impolita, P. anserina—p. Neglecta, P. anserina.

POTENTILLA NORVEGICA, Norway Cinque-foil, an indigenous plant, is possessed of similar properties.

POTENTILLA PALUSTRIS, Comarum palustre.

POTENTILLA REPTANS, Pentaphyllum, Fragaria pentaphyllum, Potentilla, Quinquesfolium, Q. majus, Common cinquefoil, (F.) Quintefeuille. The roots are possessed of astringent properties.

POTENTILLA TORMENTILLA, Tormentilla.

POTERIUM SANGUISORBA, Pimpinella saxifraga.

POTESTAS COEUNDI, Potentia coeundi—p. Generandi, Potentia generandi.

POTEX, Anus.

POTHOS FETIDA, Dracontium festidum—p. Putorii, Dracontium festidum.

POTIMOS, Potable.

POTIO, Drink, Haustus, Potion—p. Calcis carbonatis, Mistura cretæ—p. Effervescons antiemetica, Potion of Riverius—p. Leniens, Looch ex ovo—p. Oleosa, Looch ex ovo—p. Picea, see Pinus sylvestris.

POTION (F.), Potio; from *poto*, 'I drink.' A liquid medicine, from 4 to 8 ounces or more in quantity, the composition of which varies, and which is administered in divided doses. It corresponds to the English mixture.

POTION PECTORALE, Looch ex ovo.

POTION OF RIVERIUS. A mixture of Lemon Juice and Subcarbonate of Potass, generally given in a state of effervescence. It is the *Potio effervescons antiemetica dicta Riverii*, of the Parisian codex. The name in the codex indicates its use.

POTIONIS DESIDERIUM, Thirst.

POTIRON, Cucurbita pepo.

POTIUNCULA, Haustus.

POTOPARANŒA, Delirium tremens.

POTOS, Potable.

POTOTROMOPARANŒA, Delirium tremens.

POTT'S DISEASE, Vertebral disease.

POTUS, Drink—p. Hippocraticus, Claret.

POU, Pediculus.

POUCE, Pollex, see Digitus.

POUCHED, Encysted.

POUDRE, Powder, Pulvis—p. Absorbante et anti-acide, p. Pulvis de magnesiâ compositus—p. d'Alun composée, Pulvis sulphatis aluminæ compositus—p. Antiarthritique amère, Pulvis de amaric compositus—p. POULTICE, see Cataplaam.

POUNCE, Sandarac.

POUND, Libra, Litra, ῥηρα, Lat. Pondo, Bge'dia (of twelve oz.), Bardadia, (F.) Livre, from *pondere*, 'to weigh.' A weight, consisting of twelve ounces Troy.—sixteen ounces avoirdupois. See Weights and Measures.

POURPIER CULTIVÉ, Portulaca.

POURPRE BLANC, Miliary fever.

POURRITURE, Putrefaction—*p. d'Hôpital*, Hospital gangrene.

POUS, Pes.

POUSSE, Pursiness.

POUSSÉE, Lichen.

POUSSIÈRE TUBERCULEUSE (F.), 'Tuberculous Dust.' A name given by MM. Rilliet and Barthes to fine white or yellow minute points of tuberculous matter occurring in myriads, so as to be likened to dust.

POWDER, Pulvis.

POWDER OF ÆTHIOPIA, GUY'S. A once celebrated anthelmintic, which consisted of pure rasped tin, mercury, and sulphur, triturated together.

POWDER OF ALOES, COMPOUND, Pulvis aloes compositus, Pulvis sulphatis aluminæ compositus—*p.* of Aloes with canella, Pulvis aloes cum canella—*p.* Antimonial, Chenevix's, Antimonial powder—*p.* Aromatic, Pulvis aromaticus.

POWDER, ARSENICAL, OF CÔME, CÔME'S POWDER—a caustic—is formed of arsenious acid, *gr. x*; red sulphuret of mercury, *gr. xl*; powdered animal charcoal, *gr. x*. It is made into a paste with mucilage.

POWDER OF ARUM, compound, Pulvis de arcompositus—*p.* of Asarabacca, compound, Pulvis asari compositus—*p.* of Bladder-wrack, yellow, Pulvis quercus marinis—*p.* Bleaching, Calcis chloridum—*p.* Camboge, Pulvis e gummi guttâ—*p.* Cardinal del Lugo's, Cinchona—*p.* of Chalk, compound, Pulvis cretæ compositus—*p.* of Chalk with opium, compound, Pulvis cretæ compositus cum opio—*p.* of Cinnamon, compound, Pulvis cinnamomi compositus—*p.* Côme's, Powder arsenical of Côme—*p.* of Contrayerva, compound, Pulvis contrayervæ compositus—*p.* Countess's, Cinchona—*p.* Countess of Kent's, Cantianus pulvis—*p.* Cypras, Hibiscus abelmoschus—*p.* Dover's, Pulvis ipecacuanhæ compositus.

POWDER OF DUPUYTREN (CAUSTIC;) (F.) *Poudre de Dupuytren*, formed of 1 part of arsenious acid and 200 parts of mild chloride of mercury. A mild and manageable caustic for causing an eschar on exposed surfaces, and in lupus, &c.

POWDER, EARL OF WARWICK'S, Pulvis cornachini—*p.* of Ethiopia, Powder of Æthiopia.

POWDER OF FAYNARD. A celebrated powder for arresting hemorrhage, said to be nothing more than the charcoal of beech wood finely pulverized.

POWDER, FEVER, SCHWANBERG'S, Antimonial powder.

POWDER-FOLDER. In Pharmacy, an apparatus by which papers containing powders are folded of the desired length.

POWDER, GINGER-BEER, see *Amomum zingiber*—*p.* Gout, Duke of Portland's, Pulvis Ducis Portlandiæ—*p.* of Burnt hartshorn with opium, Pulvis cornu cervi cum opio—*p.* Ipecacuanha compound, Pulvis ipecacuanhæ compositus—*p.* of Jalap, compound, Pulvis jalapæ compositus—*p.* James's, factitious, Antimonial powder—*p.* Jesuit's, Cinchona—*p.* of Kino, compound, Pulvis kino compositus—*p.* of Lemonade, see Lemonade—*p.* of Magnesia, compound, Pulvis de magnesiâ compositus—*p.* of the Marquis, Marchionis pulvis—*p.* Mead's, against the bite of a Mad dog, Pulvis antilyssus—*p.* Myrrh, compound, Pulvis myrrhæ compositus—*p.* Portland, Pulvis Ducis Portlandiæ—*p.* of the three Sanders, see Diatrium—*p.* Scammony and aloes, Pulvis scammonii cum aloë—*p.* Scammony compound, Pulvis scammonii compositus—*p.* of Senna, compound, Pulvis sennæ compositus—*p.* Sneezing, see *Verastrum album*—*p.* Spruce beer, see Spruce beer—

p. Tennant's, Calcis chloridum—*p.* Tooth, Dentifricium—*p.* Tragacanth, compound, Pulvis tragacanthæ compositus.

POWDER, VIENNA, is composed of equal parts of quicklime and potassa cum calce. In using it, it is made into a paste—*Vienna paste*, (F.) *Caustique de Vienne*—with spirits of wine, and is applied on the diseased part, previously circumscribed by a hole cut in a sticking plaster.

To be left on from 10 to 20 minutes, according to the depth of the eschar required. Used in cases of lupous ulceration.

By fusing the potass and lime, and raising the heat so as to cause ebullition, the caustic may be run into cylinders:—when it is called *Caustique-Filhos*, *Causticum Viennense suum Filhos*, from the name of the author of the process.

POWDERS, CASTILLON, so called from the name of the physician who first proposed them. They are formed of *sago*, in powder; *safep*, in powder; *tragacanth*, in powder, each, four parts; *prepared oyster-shells*, one part, *cochineal*, half a part, divided into powders of one drachm each; one of which is given three or four times a day as a demulcent in diarrhoea and dysentery.

POWDERS, SODA, *Pulveres effervescentes*, (F.) *Powders gasifères simples*. (*Sodæ carb. gas*, in each blue paper; *tartaric acid*, *gr. xxv* in each white paper; for half a pint of water.) A pleasant cooling drink; taken during the effervescence.

Seidlitz Powders, (F.) *Powders gasifères laxatives* on *Powders de Seidlitz*, contain one or two drachms of tartrate of potassa and soda, added to the alkali in the blue paper.

POWER, Faculty—*p.* Inherent, Irritability—*p.* Tonic, Irritability.

POX, Syphilis, Variola—*p.* Chicken, Varicella—*p.* Doctor, Syphilitic acid—*p.* French, Syphilis—*p.* Grease, see Grease—*p.* Noddy, Syphilomania—*p.* Small, Variola—*p.* Swine, see Varicella—*p.* Water, see Varicella.

POZZUOLI, MINERAL WATERS OF. Pozzuoli is in the neighbourhood of Naples. The springs are, 1. *Acqua della pietra*, Temp. 91° Fah. 2. *Acqua di Cavalcanti*, Temp. 100°. *A. di subveni homini*, Temp. 102°; *A. del cantarello*, Temp. 86 to 89°; and that of the Temple of Serapis in Pozzuoli, Temp. 102 to 107°. The last contains carbonic acid, carbonates of lime, magnesia, alumina, and iron, carbonate of soda, chloride of sodium, sulphate of lime, and silica.

PRACTICE OF PHYSIC, Therapeutics.

PRACTITIONER, GENERAL, Surgeon apothecary—*p.* Irregular, see Irregular—*p.* Regular, see Regular—*p.* Routine, Routineist.

PRÆBIUM, Dose.

PRÆCAUTIO, Prophylaxis.

PRÆCIPITANS MAGNUM, Septia.

PRÆCIPITATUM ALBUM, Hydrargyrum præcipitatum.

PRÆCIPITATUS RUBER, Hydrargyri nitrico-oxidum.

PRÆCISIO PRÆPUTII, Circumcision.

PRÆCOCIA, Prunus Armeniaca.

PRÆCOCITY, Præotia.

PRÆCOGNITIO, Prognosis.

PRÆCORDIA, from *præ*, 'before,' and *cor*, 'the heart.' The diaphragm; also, the thoracic viscera, and the epigastrium.

PRÆCORDIAL or **PRÆCORDIAL REGION**, *Re'gio præcordiaca* seu *præcordialis*, is the epigastric region. Also, and more properly, the region of the heart. A line drawn from the inferior margins of the third ribs across the sternum, passes over the valves of the pulmonary artery a little to the left of the mesial line, and those of the aorta are behind them, but about half an inch lower down. A vertical line, coinciding with the

left margin of the sternum, has about one-third of the heart, comprising the upper portion of the right ventricle, on the right, — and two-thirds, comprising the lower portion of the right ventricle and the whole of the left, on the left. This is the præcordial region.

PRÆCORDIUM, *Fossette du cœur*—p. *Pedis*, *Metatarsus*.

PRÆCOX MATURITAS, *Præotia*.

PRÆCUSTODIA, *Prophylaxis*.

PRÆDICTIO, *Prognosis*.

PRÆDISPOSITIO, *Predisposition*.

PRÆDIVINATIO, *Mantia*.

PRÆDOMINIUM; from *præ*, 'before,' and *dominus*, 'a lord.' Predominance of one thing over another.

PRÆDOMINIUM AQUÆ. A predominance of watery fluid,—*Tenuitas aquosa*.

PRÆDOMINIUM SAN'GUINIS ARTERIO'SI. A predominance of arterial blood, *Arterio'itas sanguinis*.

PRÆDOMINIUM SAN'GUINIS VENO'SI, *Veno'itas Sanguinis*. Predominance of venous blood.

PRÆFOCATIO, *Orthopnoea*, *Suffocatio*—p. *Faucium*, *Angone*—p. *Matricis*, *Angone*—p. *Uterina*, *Angone*.

PRÆFOCATION, *Strangulatio uterina*.

PRÆGNANS, *Pregnant*.

PRÆGNAS, *Pregnant*.

PRÆGNATIO, *Fecundation*, *Pregnancy*.

PRÆGNATUS, *Fecundation*, *Pregnancy*.

PRÆGNAX, *Pregnant*.

PRÆGUSTATIO, *Avant-gout*.

PRÆHENSIO, *Prehensio*.

PRÆLIN'GUA. The anterior part or tip of the tongue.

PRÆLIUM, *Coition*, *Press*, *Tourniquet*—p. *Arteriale*, *Tourniquet*.

PRÆLUMBARIS, *Prelumbar*.

PRÆNOTIO, *Prognosis*.

PRÆNUNTIATIO, *Prognosis*.

PRÆPARATIO, *Preparation*—p. *Chylli*, *Chyllification*.

PRÆPARATUM, *Preparation*.

PRÆPOTEN'TIA, from *præ*, 'before,' and *potens*, 'powerful.' Great power or strength.

PRÆPOTEN'TIA VIRI'LIS. Great, or too great procreative power on the part of the male.

PRÆPOTIO, *Propotismus*.

PRÆPUTIALIS, *Preputial*.

PRÆPUTIUM, *Prepuce*.

PRÆSAGIUM, *Mantia*.

PRÆSCIENTIA, *Prognosis*.

PRÆSCITIO, *Prognosis*.

PRÆSCRIPTIO, *Prescription*.

PRÆSEPIOLUM, *Alveolus*.

PRÆSEPIUM, *Alveolus*.

PRÆSERVATIO, *Prophylaxis*.

PRÆSERVATIVUM, *Amuletum*.

PRÆSERVATORIA INDICA'TIO. A preservative indication; one proper for preventing the development of disease.

PRÆSERVATORIUS, *Prophylactic*.

PRÆSPINALIS, *Prespinal*.

PRÆTIBIALIS, *Pretibial*.

PRAIRIE BUSH, STINKING, *Petala trifoliata*—p. *Pinea*, *Liatris*.

PRASINUM VIRIDE, *Cupri subacetata*.

PRASINUS, *Porraceous*.

PRASI'TES, from *prasium*, 'horehound.' Wine in which the leaves of horehound have been infused.

PRASIUM, *Marrubium*.

PRASUM, *Allium Prasum*.

PRAXIS, *Action*.

PRAXIS MED'ICA. The practical exercise of the healing art.

PRÆCIPITATE, RED, *Hydrargyri nitrico-*

oxydum—p. White, *Hydrargyrum præcipitatum*.

PRÆCIPITA'TION, *Præcipitatio*, (F.) *Præcipité*, from *præcipitare*, (*præ*, 'before,' and *caput*, 'the head,') 'to throw headlong.' The action by which a body abandons a liquid in which it is dissolved, and becomes deposited at the bottom of the vessel. The matter, so thrown down or precipitated, is called a *precipitate*.

PRÆCIPITATION DE LA MATRICE, *Procidencia uteri*.

PRÆCIPITÉ BLANC, *Hydrargyrum præcipitatum*.

PRÆCORDIAL, *Præcordial*.

PRÆCUR'SORY, *Præcurso'rius*; from *præ*, 'before,' and *curro*, *cursum*, 'I run.' That which precedes.

PRÆCUR'SORY OR PRÆMON'ITORY SIGNS OR SYMPTOMS, (F.) *Signes præcourseurs*, *S. avant courseurs*, are those which indicate an approaching disease.

PREDISPONENT CAUSES, see *Causes*, *predisponent*.

PREDISPOSIT'ION, *Prædisposit'io*, *Semin'ia morborum* (Gaubius); from *præ*, 'before,' and *disponere*, 'to dispose.' (F.) *Imminence morbide*. That constitution or condition of the body, which disposes it to the action of disease under the application of an exciting cause. Thus, in hereditary diseases, the conformation is such, that but a slight exciting cause may be required to produce them. When the disease arises solely from the predisposition, or under the additional influence of an extremely slight exciting cause, it is, by some, termed a *disposition*.

PREDOR'SAL, *Prædorsalis*, from *præ*, 'before,' and *dorsum*, 'the back.'

PRÆDORSAL REGION of the vertebral column is the anterior surface of the dorsal region.

PRÆ-DORSO-ATLOÏDIEN, *Longus colli*.

PRÆ-DORSO-CERVICAL, *Longus colli*.

PREG'NANCY, *Pregnatio*, *Pregna'tus*, *Impregna'tio*, *Ingravidatio*, *Ingravidatio*, from *præ*, 'before,' and *genere*, 'to beget.' *Hystero'cye'sis*, *Gravid'itas*, *G. uteri'na*, *En'cymon*, *Cye'sis*, *En'cye'sis*, *En'cyc'sis*, *Encymo'sis*, *Cyopho'ria*, *Gesta'tion*, *Fæta'tion*, *Utero-gesta'tion*; (F.) *Grossesse*. The state of a female who has within her a fecundated germ, which gradually becomes developed in or out of the uterus. When placed in the cavity of the uterus,—by virtue of the vital principle which animates it, it becomes attached to the inner surface of that viscus, and obtains from it indirectly the nutriment necessary for its gradual development, during the space of ten lunar months or two hundred and eighty days—the ordinary term or duration of *gestation*, although the period may be protracted to 300 days or upwards,—at the expiration of which parturition occurs. Pregnancy is commonly limited to a single fœtus: at times, the uterus contains two or three.—See *Reproduction*. Occasionally, one or two moles—the degenerated products of conception—alone occupy the uterus:—at other times, a fœtus likewise exists. In certain cases, and owing to accidental circumstances, the fecundated ovum remains in the ovarium, or is arrested in the Fallopian tube. Pregnancy has, accordingly, been distinguished into, 1. *Natural* or *uterine*, when the fœtus is carried in the cavity of the womb; and, 2. *Præternatural* or *extra-uterine*, *Erfæta'tion*, *Concep'tio vitio'sa*, *Paracye'sis* seu *Ecce'cye'sis*, *Ecthyaterocye'sis*, *Ecthyaterocye'sis*, *Dysto'cia*, *Dycyc'e'sis* seu *Gravid'itas extra-uteri'na*, (F.) *Grossesse-contre-nature*,—when it occurs in the ovarium, tube, or cavity of the abdomen.

During pregnancy, the female experiences remarkable changes in the condition of her organs

and functions. The genital apparatus is, of course, most affected. The uterus changes its shape, situation, size, and texture. The usual signs of pregnancy are,—suppression of the catamenia; the abdomen gradually enlarging and forming a hard tumour; the umbilicus prominent in the latter months; the breasts increasing in size; the areola round the nipple becoming darker and the follicles more developed; kyestein in the urine from an early period; a bluish tint of the vagina after the fourth week; about the fifth month, the evidence by *ballotement*, and the placental *souffle* and sound of the fetal heart heard on auscultation; the motion of the fetus perceptible, and the neck of the uterus diminishing in length at the advanced periods.

PREGNANCY, ABDOMINAL, *Eccy'sis abdominalis*, *Carliocy'sis*, *Gravid'itas abdominal'is*, (F.) *Grossesse abdominale*. That in which the ovum has escaped into the cavity of the abdomen.

PREGNANCY, AFETAL, *Pregnancy without a fetus*, (F.) *Grossesse afetale*, *G. sans fetus*. Pregnancy produced by a false or degenerate conception, or any other affection, which has given place to unusual development of the uterus. Madame Boivin includes in this class, *sarco-hysterie*, *hydro-hysterie*, *gazo-hysterie*, and *hemato-hysterie pregnancies*.

PREGNANCY, BIGEMINAL, (F.) *Grossesse bigeminale*, *Double pregnancy*. Pregnancy in which there are twins in utero.—Madame Boivin.

PREGNANCY, COMPLEX, (F.) *Grossesse complexe*, *G. inter-extra uterine*, is when the womb, besides a fetus, contains much water, hydatids, a mole, &c.

PREGNANCY, COMPOUND, *Polybreph'ia*, *Polycy'sia*, *Polycy'sis*, (F.) *Grossesse composée*, is when there are two or three fetuses in the cavity of the uterus.

PREGNANCY, DOUBLE, *Pregnancy, bigeminal*—p. Duration of, see *Pregnancy*—p. Extra-uterine, see *Pregnancy*.

PREGNANCY, FALSE, *Gravid'itas spuria*, (F.) *Grossesse fausse ou apparente*, *Pseudocy'sis*. Authors have called thus different affections of a more or less serious character, which resemble pregnancy; so as, at times, to impose upon the best-informed practitioners. These diseases may be seated in the uterus or its dependencies, in the intestines or some other part of the abdomen. They may be;—a mole, hydatids, water, blood, or polypus distending the parietes of the uterus;—chronic enlargement of the uterus; development of tumours, &c., in its substance;—scirrhus; dropsy of the ovaria; ascites; tympanites, &c.

PREGNANCY, FETAL, (F.) *Grossesse fœtale*. Pregnancy in which there is a fetus, or more than one, in the uterus or out of it. Madame Boivin puts in this class—the *solitary, bigeminal, trigeminal, and sarco-fœtal pregnancies*, which form the first order; and the *tubal, ovarial, and abdominal*, which constitute the second.

PREGNANCY, GAZO-HYSTERIC, (F.) *Grossesse Gazo-hystrique*. Afœtal pregnancy, caused by development of air or gas in the cavity of the womb.—Madame Boivin.

PREGNANCY, HEMATO-HYSTERIC, (F.) *Grossesse hémato-hystrique*. Afœtal pregnancy, caused by accumulation of blood in the uterus.—Madame Boivin.

PREGNANCY, HYDRO-HYSTERIC, (F.) *Grossesse hydro-hystrique*. Afœtal pregnancy, occasioned by the secretion and accumulation of serous fluid in the uterus.

PREGNANCY, INTERSTITIAL, *Gravid'itas in uteri substantiâ*, *Gravid'itas interstitia'lis*. The development of the embryo in the proper substance of the uterus. The case generally termi-

nates fatally at an early period of gestation; the thin external paries of the uterus being ruptured, and the ovum passing into the abdominal cavity.

PREGNANCY, MORBIN, *Paracy'sis*, *Dystoc'ia*, *Dycy'sis*. The progress of pregnancy disturbed or endangered by the supervention of general or local disorder.—(Good).

PREGNANCY, OVA'RIAN, (F.) *Grossesse ovarienne* ou *de l'ovaire*, *Eccy'sis ova'ria*, *Oâriocy'sis*, *Oâicy'sis*, *Gravid'itas extra-uteri'na in ova'rio*. Pregnancy in which the fetus is developed in the interior of the ovary.

PREGNANCY, PLEA OF. A plea, which a woman, capitally convicted, may set up in arrest of execution until she is delivered. See *Jury of Matrons*, and *De ventre inspicendo*.

PREGNANCY, PRETEND'ED. The criminal act of a female, who, not having been delivered, presents an infant as having been born of her. (F.) *Supposition de part*. (This term, in French, likewise includes the case of a female, who, having been delivered of a dead child, substitutes for it a living child which is not hers.)

PREGNANCY, SARCO-FETAL, (F.) *Grossesse sarco-fœtale*. Pregnancy in which there are one or more fetuses, and one or more moles.—Madame Boivin.

PREGNANCY, SARCO-HYSTERIC, (F.) *Grossesse sarco-hystrique*. Afœtal pregnancy formed by moles, hydatids, or a false conception.—Madame Boivin.

PREGNANCY, SOLITARY, (F.) *Grossesse solitaire* ou *simple*. Pregnancy in which there is a single fetus.—Madame Boivin.

PREGNANCY, TRIGEMINAL, (F.) *Grossesse trigémiale* ou *triple*. Pregnancy in which there are three fetuses in the cavity of the uterus.—Madame Boivin.

PREGNANCY, TUBAL, (F.) *Grossesse tubaire*, *Eccy'sis tuba'lis*. Pregnancy where the fetus remains and is developed in the Fallopian tube.

PREGNANCY, UTERINE, see *Pregnancy*.

PREGNANCY, UTERO-ABDOMINAL, (F.) *Grossesse utéro-abdominale*. Pregnancy consisting of two fetuses; one in the uterus—the other in the abdominal cavity.—Madame Boivin.

PREGNANCY, UTERO-OVA'RIAL, (F.) *Grossesse utéro-ovarienne*. Pregnancy with two fetuses, one in the womb, the other in the ovary.

PREGNANCY, UTERO-TUBAL, (F.) *Grossesse utéro-tubaire*. Pregnancy in which there is at the same time a fetus in the womb and another in the Fallopian tube.

PREGNANT, *Pragnas*, *Pragnas*, *Pragnaz*, *Enca'pon*, *Grac'ida*, *Plena mulier*, *Incincta*, *Gravid*, *Breeding*, (F.) *Enceinte*. One in a state of pregnancy:—one with child.

PREHENSIO, *Catalepsy*, *Epilepsy*.

PREHENSION, *Præhensio*, from *prehendere*, 'to lay hold of.'

PREHENSION OF FOOD is the act of carrying it to the mouth, and introducing it into that cavity. It is, also, called *Assumptio*, *Prosep'sis*, *Prosephora*.

PRÊLE, *Hippuris vulgaris*.

PRÉLOMBAIRE, *Prelumbar*.

PRÉLOMBO-PUBIEN, *Psos parvus*—p. *Trochantin*, *Psos magnus*.

PRELUM, *Press*—p. *Arteriale*, *Tourniquet*.

PRELUMBAR, *Prælumbaris*, (F.) *Prælombaire*, from *præ*, 'before,' and *lumbi*, 'the loins.' That which is placed before the loins. The lumbar surface of the spinal column is the anterior surface of the lumbar portion.

PREMONITORY, see *Precursory*.

PRENANTHES, *Gall of the Earth*, *Dewitt Snakeroot*, *Lion's Foot*. There are many species

of this indigenous plant, whose root and milky juice are very bitter. They are used in popular practice in dysentery; and in the form of cataplasms to bites of serpents.

PRELANTHES SERPENTARIA, *Nabalus albus*.

PRENDEE INSCRIPTURA, see *Matriculate*.

PREPARATION, *Preparatio*, from *præ*, 'before,' and *parare*, *paratum*, 'to get ready.' The act of making ready any substance whatever that has to be employed for any purpose.

Also, the product of any pharmaceutical operation:—*Preparatum*.

Any part of the human body, preserved for the uses of the anatomist, is so called.

PREPUCE, *Preputium*, perhaps from *opus*, and *præ*, 'the foreskin.' *Eppis'gium*, *Pothé*, *Péca*, *Puthium*, *Putium*, *Forcicia*. The prolongation of the integuments of the penis, which covers the glans. The prepuce is composed of two membranous layers: one external or cutaneous; the other internal or mucous, separated by areolar membrane. The mucous membrane lines the inner surface of the cutaneous layer till beyond the glans, when it is reflected over the latter; forming, behind the corona, a small *cul-de-sac* above the *corpora cavernosa*, which is interrupted by a triangular duplicature of the mucous membrane, called the *frenum*, fixed in the furrow at the inferior part of the glans, and terminating at a little distance from the orifice of the urethra. The clitoris is covered by a semilunar fold formed by a continuation of the skin of the labia. It is called *Preputium clitoridis*.

PREPUTIAL, *Preputialis*: same etymon. Belonging or relating to the prepuce:—as the 'preputial secretion,'—or that which takes place from the lining of the prepuce covering the glans.

PRESBYODOCHIUM, *Gerocomium*.

PRESBYONOSI; from *presbys*, 'old,' and *nos*, 'disease.' Diseases of old age.

PRESBYOPIA, *Presbytia*.

PRESBYSPHACELUS, *Gangrene* of old people.

PRESBYTIA, *Presbyopia*, *Amblyopia proximo'rum*, *Visus senilis*, *Pres'byopy*, (F.) *Vise languè*; from *presbys*, 'an old person.' A very high degree is termed *Hyperpresbytia*. A condition of vision, common in old persons, which consists in the circumstance of near objects being confusedly seen, whilst those at a greater distance are clearly distinguished. It is supposed to depend generally on diminution of the convexity of the cornea; whence results an alteration in the convergency of the rays, so that they form a focus behind the retina. This defect is remedied by the use of convex glasses, which augment the convergence of the luminous rays. It is, also, called *Long-sightedness*, *Parop'is longin'qua*, *Dysopia proximo'rum*.

PRESCRIPTION, *Præscriptio*, *Anagraphè*, from *præ*, 'before,' and *scribere*, 'to write.' *Formula medica*, *Præscriptio medica*, *Receptum*, (F.) *Formule*, *Ordonnance*. The formula which the physician writes for the composition of medicine adapted to any case of disease. A prescription should be as simple as possible, and should bear upon its face the evidence of the objects to be fulfilled by it. No article should form part of it, unless adapted for serving some useful purpose. A compound prescription has been divided into four parts:—the *basis* or principal ingredient of the prescription; the *adjuvans*, or that which is designed to promote the action of the former; the *corrigens*, or that intended to correct its operation, or obviate any unpleasant symptom which it may be apt to produce; and the *constituens*, *excipient*, or substance which gives to the other

ingredients consistence or form. All these are seen in the following formula for cathartic pills:

Aloes.....ʒj *Basis*.
Hyd. Chlorid. mit. gr. x..... *Adjuvans*.
Olei Caruigtt. v..... *Corrigens*.
Syrupi.....q. s..... *Constituens*.
M. et fiant. Pilulæ xx. See *Symbol*.

It is obvious, however, that most prescriptions are more simple than this. The basis, for example, may require neither adjuvant, corrigent, nor constituent.

Dr. Paris has given the following synopsis of the principles of medicinal combination, *Jamatoxiolog'ia*, *Jamatosyntaxiolog'ia*, which may serve as an instructive guide to the prescriber:—

OBJECT I.

TO PROMOTE THE ACTION OF THE BASIS.

A. By combining the several different forms or preparations of the *same substance*. B. By combining the basis with substances which are of the same nature; i. e., which are individually capable of producing the same effects, with less energy than when in combination with each other. C. By combining the basis with substances of a *different nature*, and which do not exert any chemical influence upon it, but are found by experience, or inferred by analogy, to be capable of rendering the stomach or system more susceptible of its action.

OBJECT II.

TO CORRECT THE OPERATION OF THE BASIS BY OBTAINING ANY UNPLEASANT EFFECTS IT MIGHT BE LIKELY TO OCCASION, AND WHICH WOULD PERVERT ITS INTENDED ACTION, AND DEFEAT THE OBJECT OF ITS EXHIBITION.

A. By *chymically* neutralizing or *mechanically* separating the offending ingredient. B. By adding some substance calculated to guard the stomach or system against its deleterious effects.

OBJECT III.

TO OBTAIN THE JOINT OPERATION OF TWO OR MORE MEDICINES.

A. By uniting those medicines which are calculated to produce the *same ultimate* results, but by modes of operation totally different. B. By combining medicines which have entirely different powers; and which are required to obviate different symptoms, or to answer different indications.

OBJECT IV.

TO OBTAIN A NEW AND ACTIVE REMEDY, NOT AFFORDED BY ANY SINGLE SUBSTANCE.

A. By combining medicines which excite different actions in the stomach and system, in consequence of which *new or modified results* are produced. B. By combining substances which have the property of acting *chymically* upon each other; the results of which are:—a. The formation of new compounds; b. The decomposition of the original ingredients, and the development of the more active elements. C. By combining substances, between which no other change is induced than a diminution or increase in the *solubility* of the principles in which their medicinal virtues reside. a. By the intervention of substances that act *chymically*. b. By the addition of ingredients whose operation is entirely *mechanical*.

OBJECT V.

TO AFFORD AN ELIGIBLE FORM.

a. By which the *efficacy* of the remedy is enhanced. b. By which its *aspect* or *favour* is

rendered more agreeable, or its mode of administration more convenient. *c.* By which it is preserved from the spontaneous decomposition to which it is liable.

[The vocabulary in the author's "Medical Student," Philad. 1844, will aid the student, not only in translating, but in writing his prescriptions *more solito*.]

PRESENTATION, from (Lat.) *præsens*, (*præ*, 'before,' and *ens*, 'being.') The part of a fœtus which is felt presenting, on examination *per vaginam*. When the head presents, and especially the vertex, or the feet, knees, or breech, the presentation is said to be *natural*: when any other part, *preternatural*, and the labour is styled *perverse* or *preternatural*, *Parodynia perversa*, *Dystocia perversa*, *Cross-birth*, (F.) *Accouchement contre nature*. When any part besides the head, feet, knees, or breech presents, the operation of turning becomes necessary. See Parturition.

PRESIS, Swelling.

PRÈSLE, *Hippuris vulgaris*.

PRESMA, Swelling.

PRESPI'NAL, *Præspinalis*, from *præ*, 'before,' and *spina*, 'the spine.' That which is situate before the spine. The prespinal surface of the vertebral column is the anterior surface.

PRESS, *Præ'lium*, *Præ'lium*, *Presso'rium*, *Pi-èster*, *Pièster'ion*, (F.) *Pressoir*, *Presse*. An instrument for subjecting matters to considerable pressure, for the purpose of separating the liquid from the solid portion.

PRESS OF HEROPHILUS, Torcular Herophilii.

PRESSE-ARTÈRE. An instrument invented by Deschamps for the immediate compression of arteries. It is composed of a plate six or seven lines long, and three broad, and of a rod or stem two inches long, placed perpendicularly above the plate and riveted. At each extremity of the plate is a hole, through which each of the ends of the ligature, to be placed upon the artery, is passed. The ligature is then to be tightened by drawing the ends, and fixing them to the perpendicular rod. This *presse-artère* or *serre-artère*, surrounded with charpie, remains in the wound, until there is no longer danger of hemorrhage. The ligature is then cut, and the instrument withdrawn. It is an unnecessary instrument.

PRESSE-URÈTHRE, *Jugum Penis*. A kind of forceps of elastic iron, the branches of which, padded, may be approximated or separated by means of a screw. The penis is introduced between the branches, one of them being applied to the urethra, and the screw is tightened so as to exercise a degree of pressure sufficient to bring the parietes of the canal in contact. This instrument is sometimes used in incontinence of urine, to prevent the constant discharge of that fluid.

PRESSIO, Pressure.

PRESSIO ABDOMINALE, Pressure, abdominal.

PRESSOIR, *Press*—*p. d'Hétrophile*, Torcular Herophilii.

PRESSORIUM, *Press*.

PRESSURE, *Pressio*, from *premo*, *pressum*, 'I press.' The action of pressing.

PRESSURE, ABDOM'INAL, (F.) *Pressio abdominalis*. A mode of examination by means of which the sensibility, size, suppleness, or hardness of any morbid abdominal viscus may be compared, in these respects, with its healthy condition. Bichat proposed, with the view of exploring the state of the thoracic organs, to exert a pressure from below upwards on the abdominal organs, so as to crowd them upon the diaphragm, and thus to diminish the dimensions of the cavity of the chest, noticing to what extent respiration was

affected by this action. No great information can of course be derived from it.

PRETENDED DISEASES, Feigned diseases.

PRETIB'IAL, *Prætibia'lis*, from *præ*, 'before,' and *tibia*, 'the tibia.' That which is situate before the tibia; as the *ilio-pretibial* and *ischio-pretibial* muscles.

PREVEN'TIVE, ROYAL, from *prævenire*, (*præ*, and *venire*,) 'to come before.' An empirical preparation, used as a prophylactic against the venereal virus. It is a solution of acetate of lead,—the *Liquor Plumbi Subacetatis dilutus*.

PREVER'TEBRAL APONEURO'SIS. The aponeurosis which covers the muscles of the prevertebral region.

PREVERTEBRAL ARTERY. A ramus of the meningeal branch, and sometimes even of the trunk, of the pharyngeal artery, which is distributed to the prevertebral region.

PREVERTEBRAL MUSCLES, see Cervical region, anterior—*p.* Region, Cervical region.

PRIAPEIA, *Nicotiana rustica*.

PRIAPIS'COS. Same etymon as the next. Name of a piece of wood which forms part of the *scamnum Hippocraticum*. Paulus of Ægina calls thus a tent of linen shaped like a penis.

PRIAPIS'MUS, *Tenti'go*, *T. Penis*, *Pri'apism*, *Horn-colic* (vulg.), *Enta'cia Priapismus*, *Rhopali'mus*, *Satyri'asis*, *Styma*, *Styxis*, from Πριαπός, Priapus, 'the male organ.' Constant and distressing erection, without any volutuous idea or desire for venery. It is often symptomatic; and sometimes the immediate result of morbid causes,—of the action of cantharides, for example. The application of cold liquids to the penis, and the internal use of opium and camphor, are the means usually had recourse to for its removal.

PRIAPITIS, Phallitis.

PRIA'PUS, *Mutun'nus*. In ancient mythology the deity who presided over gardens and the parts of generation, so called *propter deformitatem et membri virilis magnitudinem*.

PRIAPUS, Penis—*p.* Cervi, see Cervus—*p.* Ceti, Leviathanic penis.

PRICKING, Sax. *prickean*, (D.) *pricken*, (F.) *Picotement*. A variety of pain, compared to that which pointed bodies would occasion.

PRIDE OF CHINA, *Melia azedarach*—*p.* of India, *Melia azedarach*—*p.* Tree, *Melia azedarach*.

PRIEST-PHYSICIANS, see Asclepiads.

PRIEST'S PINTLE, *Arum maculatum*.

PRIMA CELLA COLI, Cæcum.

PRIMÆ VIÆ. The first passages. The stomach and intestinal canal:—the lacteals being the *secundæ viæ* or second passages. See Ways, digestive.

PRIMARY CELL, see Cell.

PRIMEVÈRE, *Primula veris*.

PRIMIP'ARA, *Primipartu'riens*, from *primus*, 'first,' and *parere*, 'to bring forth.' A name given to a female who brings forth for the first time.

PRIMIPARTURIENS, *Primipara*.

PRIMI-STERNAL, *Primi-sterna'lis*, from *primus*, 'the first,' and *sternum*, 'the sternum.' M. Béclard has called *os primi-sternal* or *clavi-sternal*, the bony portion of the sternum.

PRIMIT'LE. The first waters, or the waters discharged before the extrusion of the fœtus.

PRIMITIVE BAND, see Nerve fibres—*p.* Streak, Groove, primitive.

PRIMORDIAL CELL, see Cell.

PRIMORDIUM, *Arche*.

PRIMROSE, EVENING, *Oenothera biennis*—*p.* Tree, *Oenothera biennis*.

PRIMULA OFFICINALIS, *P. veris*—*p.* *Variabilis*, *P. veris*.

PRIM'ULA VERIS, *P. officinalis* seu *variabilis*, from *prim'ulus*, 'the beginning.' So called, because it flowers in the beginning of the spring. *Verba'culum*, *Paral'ysis*, *Herba paralys'eos* seu *paraly'tica*, the *Owslip*, *Paigil* or *Peagle*, (F.) *Primevère*. Family, Primulaceæ. *Sex. Syst.* Pentandria Monogynia. The flowers have been considered to be mildly tonic, antispasmodic, and anodyne.

PRIMULA VULGARIS. The leaves and roots of this plant have been used as sternutatorics.

PRINCEPS, Rectum.

PRINCEPS CERVICIS (*Artery*), *Cervical Artery*. A branch of the occipital artery, which descends between the splenius and complexus muscles, and may be followed down to the lower part of the neck.

PRINCEPS POL'LICIS (*Arteria*), *Arteria magna pol'licis*. When the two collateral arteries of the thumb take origin from a common trunk—the trunk is the *Princeps pollicis*.

PRINCIPE CRYSTALLIZABLE DE DÉROSNE, Narcotine.

PRINCIPES IMMEDIATS, Principles, immediate.

PRINCIPIUM, Arche, Element—p. Acidificans, Oxygen—p. Adstringens, Tannin—p. Bysodopsicum, Tannin—p. Coriaceum, Tannin—p. Hydrogeneticum, Hydrogen—p. Hydroticum, Hydrogen—p. Oxygenans, Oxygen—p. Salivale, see Saliva—p. Scytodopsicum, Tannin—p. Urinum, Urea.

PRIN'CIPIE, COL'OURING, OF THE BLOOD. A name, given to the immediate principle in animals, to which the blood owes its red colour. It is solid, inodorous, and insipid. When recently separated from blood, it has a purple-red colour. When distilled, it furnishes, amongst other products, a purple oil. It is insoluble in water; but, if diluted with that liquid, acquires a vinous-red hue. It communicates a red colour to the albumen of the blood, and affords, on analysis, iron, to which the colour has been ascribed. See *Hæmaphæin*, and *Hæmatin*.

PRINCIPLE, DIGESTIVE, Pepsin—p. Vital, see Vital principle.

PRINCIPLES, IMMEDIATE, (F.) *Principes immédiates*, *Matériaux immédiats*. A name given to a considerable number of substances, composed of at least three elements, and which are obtained from animals and vegetables without alteration, by simple processes, and, in some measure, immediately.

PRINCIPLES, IMMEDIATE, OF ANIMALS, *Proximate principles*, *Organic Elements*, *Compounds of Organization*. These are divided into acid principles, fatty principles, and principles which are neither fat nor acid. The first include the *uric*, *rosacic*, *purpuric*, *allantoic*, *caseic*, *butyric*, &c. The fatty principles are:—*stearin*, *elain*, *cholesterin*, &c.; and the last division includes the most important compounds of organization:—*fibrin*, *gelatin*, *albumen*, *casein*, *osmazome*, &c.

PRINCIPLES, PROXIMATE, P. immediate.

PRINOS, *P. verticillatus*, *Alcan'na major latifolia dentata*, *Aquifolium foliis deciduis*, *Prinos Gronovii*, *Prinos padifolius*, *Black Alder*, *Virginia Winterberry*, *Whorled Winterberry*, *Feverbush*, (F.) *Apalachine à feuilles de Prunier*. *Ord.* Aquifoliaceæ. *Sex. Syst.* Hexandria Monogynia. The bark of this common shrub of the United States is astringent, bitter, and pungent. The berries are, likewise, bitter. The bark has been used as a substitute for the cinchona, in intermittents, and as a tonic.

PRINOS GRONOVII, *Prinos*.

PRINOS LÆVIGATUS, *Smooth Winterberry*. Indigenous; has the same properties as

PRINOS PADIFOLIUS, *Prinos*.

PRION, Saw.

PRIONODES, from *πριον*, 'a saw,' and *ωδες*, 'shape.' *Serra'ted*. Applied to the sutures of the head.

PRIOR ANNULARIS, *Interos'eus quartus* of Winslow. An internal interosseous muscle, which arises from the outside of the metacarpal bone of the ring-finger, and is inserted into the outside of the tendon on the back of the ring-finger. Its use is to draw the ring-finger outwards.

PRIOR INDICIS, *Extensor tertii internodii indicis*, (F.) *Sous-métacarpo-lat'ri-phalangien*. It arises from the outer or radial side of the metacarpal bone of the fore-finger, and is inserted into the outside of the tendon on the back of the fore-finger. *Action*:—to draw the finger outwards, towards the thumb.

PRIOR INDICIS PEDIS, *Adductor Indicis pedis*. An external, interosseous muscle of the foot, which arises from the contiguous sides of the metatarsal bones of the great and fore toes, and is inserted into the inside of the root of the first bone of the fore-toe. *Action*:—to pull the fore-toe inwards.

PRIOR MEDII, *Prior medii digiti*.

PRIOR MEDII DIGITII, *Prior Medii*, *Second interos'eus* of Douglas. An external, interosseous muscle of the hand, which arises from the corresponding sides of the metacarpal bones of the fore and middle fingers, and is inserted into the outside of the tendon on the back of the middle finger. *Action*:—to draw the middle finger outwards.

PRIOR MEDII DIGITI PEDIS, *Adductor medii digiti pedis*. An internal, interosseous muscle of the foot, which arises from the inside of the metatarsal bone of the middle toe, and is inserted into the inside of the root of the first bone of the middle toe. *Use*:—to pull the middle toe inwards, or towards the inner side of the foot.

PRIOR MINIMI DIGITI, *Adductor minimi digiti*. An internal, interosseous muscle of the foot, which originates from the inside of the metatarsal bone of the little toe, and is inserted into the inside of the root of the first bone of the little toe. *Action*:—to pull the little toe inwards.

PRIOR TERTII DIGITI PEDIS, *Adductor tertii digiti pedis*. An internal, interosseous muscle of the foot, which arises from the inner and under part of the metatarsal bone of the third of the small toes, and is inserted into the inside of the root of the first bone of the third of the small toes. *Action*:—to pull the third of the small toes inwards.

PRISIS, *Brygmus*, *Trepanning*.

PRISMA, *Scobs*.

PRISMUS, *Brygmus*, *Trepanning*.

PRIVATE PARTS, *Genital organs*.

PRIVET, *Ligustrum vulgare*.

PRIVITIES, *Genital organs*.

PRIVY, *Ligustrum vulgare*—p. *Members*, *Genital organs*—p. *Parts*, *Genital organs*.

PRO, *πρo*, 'before.' A common prefix to words, as in *Procatartec*, *Prostate*, &c.

PROAGOREUSIS, *Prognosis*.

PROBANG, *Detrusorium ex bale'na*. A long slender rod of whalebone, with a piece of sponge at its extremity, intended to push down extraneous bodies, arrested in the œsophagus, into the stomach. A similar instrument is called by J. L. Petit, *Repossoir d'artef*.

PROBARBIUM, *Genesia*.

PROBASCANTIUM, *Amuletum*.

PROBASCANTIUM, *Amuletum*.

PROBE, Catheterize, Specillum—p. Eyed, see Specillum.

PROBING, see Melosis.

PROBOLE, Processus.

PROCARDIUM, Scrobiculus cordis.

PROCKÉ, Process.

PROCEDURE, *Proctédé*.

PROCEPHALI, Capitones.

PROCERUS NASI, Pyramidalis nasi.

PROCES CILIAIRES, Ciliary processes.

PROCESS, Apophysis, Processus.

Proc'ess, *Ratio*, (F.) *Proctédé*, from *procedere*, to march forwards. Procedure,—method of performing any operation, chemical, pharmaceutical, or surgical.

Process, **CUNEIFORM**, Basillary process—p. Modelling, see Modelling Process—p. of Rau, see Malleus—p. Vertical superior longitudinal, Falx cerebri.

PROCES'SUS. A process; same etymon; *Projectura*, *Prob'ole*. An apophysis or eminence of a bone; see Apophysis. Also, any part which seems prolonged beyond others with which it is in connexion; as the *Ciliary processes*.

Processus ANCONÆUS, Olecranon—p. Annularis, Pons Varolii—p. Belenoides, see Belenoid—p. Caudatus, Lobulus caudatus—p. à Cerebello ad medullam oblongatam, Corpora restiformia—p. Cerebelli ad pontem, Peduncles of the cerebellum—p. Cerebelli ad testes, Peduncles of the cerebellum—p. Cerebri lateralis, Cornu ammonis—p. Ciliares, Ciliary processes—p. Clavatus, see Funiculi graciles—p. Cochleariformis, see Tympanum—p. Cuneiformis ossis occipitis, Basillary process—p. Enteroides cerebri, Convolution (cerebral)—p. Falciformis cerebelli, Falx cerebelli—p. Falciformis duræ matris, Falx cerebri—p. Gracilis of Rau, see Malleus—p. Laterales uteri, Tubæ Fallopiæ—p. Mamillares, Papillæ of the kidney, Olfactory nerves—p. Mamillares cerebri, Mamillary tubercles—p. Olivaris, Olivary Process—p. Orbicularis cerebri, Infundibulum of the brain—p. Papillares, Olfactory nerves—p. Papillarum, Olfactory nerves—p. Rachidianus, Medulla spinalis—p. Sterni xiphoideus, Xiphoid.

Processus TER'ESTRES, *Eminentia seu Fasciculi ter'etes*. Two slightly convex bodies forming the anterior wall or floor of the fourth ventricle of the brain. They are separated by a longitudinal groove, which is continuous, inferiorly, with the sulcus longitudinalis posterior of the spinal cord. They are crossed transversely by several white and gray fasciculi—*lineæ transversæ, striæ medullares*—the origin of the auditory nerves.

Processus AD TESTES, see Valvula Vieussenii—p. Transversus duræ matris, Tentorium—p. Uvifer, Uvula—p. Ventriculi, Duodenum—p. Xiphoides, Xiphoid cartilage—p. Xipho-sternalis, Xiphoid cartilage—p. Zygomaticus, Zygomatic process.

PROCHEILA, Antelabia.

PROCHEILIDION, Procheilon.

PROCHEILON, *Procheilid'ion*, *Prola'bium*, *Antila'bium*. The extreme projecting part or margin of the lips.

PROCHEUMA, Parenchyma.

PROCIDENCE DE L'ŒIL, Exophthalmia.

PROCIDENTIA, Prolapsus—p. Ani, Proctocœle—p. Intestini recti, Proctocœle—p. Iridis, Staphyloma of the Iris—p. Oculi, Exophthalmia—p. Sedis, Proctocœle—p. Uteri, Prolapsus uteri.

PROCNEME, Tibia.

PROCNEMIUM, Tibia.

PROCELIUS, *Procel'us*, from *pro*, 'before,' and *celia*, 'belly.' One who has a large pendulous abdomen.

PROCELUS, Procelsius.

PROCON'DYLUS, *προκονδύλος*, from *προ*, 'before,' and *κονδύλος*, 'a knot.' The first joint of the fingers; the second being called *κονδύλος*; and the third *μετακονδύλος*.

PROCREATIO, Generation—p. Sanguinis, Hæmatosis.

PROCREATION, Fecundation, Generation.

PROCTAGRA, from *πρωκτος*, 'anus,' and *αγρα*, 'seizure.' Gout in the rectum. Proctalgia.

PROCTAL'GIA, *Proctica simplex*, *Proctagra*, *Dolor ani*, *Proctodynia*, from *πρωκτος*, 'the anus,' and *αλγος*, 'pain.' Pain in the anus: generally symptomatic of disease, as of hemorrhoids, scirrhus, &c.

PROCTAL'GIA, Clunensis—p. Hæmorrhoidalis, Hæmorrhoidis—p. Inflammatoria, Rectitis—p. Intertriginosa, Chafing—p. Rheumatica, Proctorrhœma.

PROCTATRE'SIA, *Imperforatio ani*, from *πρωκτος*, 'the anus,' and *απρησια*, 'imperforation.' Imperforate state of the anus.

PROCTICA. Pain or derangement about the anus, without primary inflammation. A genus in the class *Caliaca*, order *Enterica*, of Good.

Proctica EXANIA, Proctocœle—p. Marisca, Hæmorrhoidis—p. Simplex, Proctalgia—p. Tenesmus, Tenesmus.

PROCTISIS, Proctitis.

PROCTITIS, *Proctitis*, *Archi'tis*, *Clun'is*, *Cyseo'tis*, from *πρωκτος*, 'the anus.' Inflammation of the anus and rectum. Rectitis.

PROCTITIS GANGRÆNOSA, Proctocœce.

PROCTOC'ACE, *Proctitis gangræno'sa*, from *πρωκτος*, 'the anus,' and *κακος*, 'evil.' A disease of the rectum, so called by Fuchs, which, according to him, is common in Peru, in the neighbourhood of Quito and Lima, on the Honduras and Mosquito coasts, in Brazil, and on the Gold coast, &c. It is called by the Portuguese, *Bicho*, and *Bicho di Culo*; by the people of Quito, *Mal del Valle*, from its prevalence in the valleys; and in Africa, *Bitios de Kis*. It is an adynamic, inflammatory condition, frequently ending in gangrene. It has been attributed to bad food, and the use of spices.

PROCTOC'ELE, from *πρωκτος*, 'the anus,' and *ελη*, 'hernia.' *Prolap'tus Ani*, *Proctopto'ma*, *Proctopto'ria*, *Procto'ria*, *Hedroce'le*, *Archeopto'ma*, *Archeopto'ma*, *Archopto'ma*, *Archopto'ma*, *Archeoc'e'le*, *Archopto'ria*, *Exa'nia*, *Hæmor'rhois proce'dens*, *Hæmor'rhois ab exa'nia*, *Procid'entia Ani*, *P. intesti'ni recti*, *P. sedis*, *Ecto'pia Ani*, *Sedes proci'dua*, *Falling down of the Fundament*, *Coming down of the Body*, (F.) *Chute du rectum*, *C. du Fondement*, *Renversement du rectum*. Inversion and prolapse of the mucous coat of the rectum, from relaxation of the sphincter with more or less swelling. In the treatment, the application of cold water and astringent lotions must be recommended: and if other means fail, one of the radii of skin, which converge at the anus, may be snipped off. On cicatrizing, the verge of the anus will be contracted, and the cure probably complete. In the way of palliation, the parts may be retained by an appropriate bandage.

PROCTOCYSTOTOMIA, see Lithotomy.

PROCTODYNIA, Proctalgia.

PROCTON'CUS, from *πρωκτος*, 'anus,' and *ογκος*, 'swelling.' Swelling of the anus.

PROCTOPARAL'YSIS, *Proctople'gia*, *Paral'ysis Intesti'ni Recti*. Paralysis of the muscles of the rectum.

PROCTOPLEGIA, Proctoparalysis.

PROCTOPTOMA, Proctocœle.

PROCTOPTOSIS, Proctocœle.

PROCTORRHAGIA, Hæmorrhoidal flux.

PROCTORRHEUMA, from *πρωκτος*, 'anus,' and *ρροια*, 'defluxion.' Rheumatism of the anus.
PROCTORRHEA, from *πρωκτος*, 'the anus,' and *ρροια*, 'I flow.' A discharge of blood or slime from the anus. See *Hæmorrhœia*.

PROCTOS, Anus.

PROCTOSIS, Proctocœle.

PROCTOSPASMUS, Tenesmus.

PROCTOSTENOSIS ORGANICA, Stricture of the rectum.

PROCTOTOREU'SIS, from *πρωκτος*, 'anus,' and *τορευω*, 'to perforate.' Perforation of a closed anus.

PROCTUS, Anus.

PROCURATIO ABORTUS. The promotion of abortion.

PRODROMUS, from *προ*, 'before,' and *δρομος*, 'course.' *Stadium opportunitatis seu prodromorum*; in contagious diseases, *Stadium latentis contagii*. The period immediately preceding an attack of disease; in which the *precuratory signs* occur.

PRODUCT, from *produco*, 'I produce.' (F.) *Prodit*. The result sought to be attained by any pharmaceutical operation.

PRODUCTIO, Prolapsus—p. Uvulae à pituitâ, Staphylœdema.

PRODUCTION, *Productio*; same etymon. This word is used, especially by the French, synonymously with *prolongation*. The mesentery is, in this sense, a production of the peritoneum.

PRODUCTION ACCIDENTELLE. An accidental or adventitious structure.

PRODUCTIVITAS, Fecundity.

PRODUIT, Product.

PROEGUMENÆ CAUSÆ, Causes, predisponent.

PROELIUM, Press, Tourniquet.

PROËMINENT, *Proëminens*, from *pro*, 'forwards,' and *eminere*, 'to project.' Some anatomists call the 7th cervical vertebra the *proëminent vertebra*, on account of the length of its spinous process, which passes the level of that of the neighbouring vertebrae.

PRËOTIA, *Prôiotês*, *πρωϊότης*, or *πρωϊότης*, from *πρωι*, 'early.' 'Precocity.' *Præcox maturitas*, *Præcox maturitas*. Premature development of sexual organization or power.—Good.

PROFLUVII CORTEX, Nerium antidysentericum.

PROFLUVIUM, *Discharge*, *Fluxus*, *Polyrrhœa*, *Flux*; from *profluo*, 'I run down.' A term under which some nosologists have comprised all morbid discharges or fluxes:—others, increased excretions attended by fever.

PROFLUVIUM ALVI, Diarrhœa—p. Genitale muliebri, Menses—p. Mucosum urethræ, Gonorrhœa—p. Muliebri, Leucorrhœa, Menses—p. Sanguinis, Hæmorrhagia—p. Sanguinis è Renibus, Nephorrhagia—p. Sanguinis ex Ore, Stomatorrhagia—p. Sanguinis ex Utero, Metrorrhagia—p. Seminis, Pollution—p. Ventris, Diarrhœa.

PROFUN'DUS, (*pro*, and *fundus*, 'base.') *Altus*, 'having a deep base.' A name given to different parts, which are seated profoundly as regards others.

PROFUNDA ARTERIA FEMORIS, *A. vasta posterior seu muscularis femoris*, *Artère-grande musculaire de la cuisse*. (Ch.) This large branch arises commonly from the posterior part of the crural, between the pubis and lesser trochanter. It descends deeply, situate before the adductors; passes through the third adductor above the opening in it for the trunk of the femoral; and terminates in the short portion of the biceps. The *muscularis profunda* gives off, 1. The *external circumflex*: 2. The *internal circumflex*: and, 3. The three *perforantes*.

PROFUNDA ARTERIA HUMERI, *P. superior*, *Arteria spiralis*, (F.) *Artère humérale profonde*, *A. collatérale externe*, *Grand musculaire du bras*, (Ch.) Its origin is variable. When it arises from the brachial artery, it is given off opposite the groove of the humerus destined for the radial nerve, and descends backwards between the three portions of the triceps, accompanied by the nerve; giving branches to that muscle and to the humerus. When it reaches the posterior part of the bone, it divides into two branches, which are distributed to the triceps, supinator longus, &c.

PROFUNDA ARTERIA INFERIOR vel *MINOR* is often a branch of the last; but, commonly, is given off from the brachial, near the middle of the arm. It gives off branches to the muscles, &c., about the inner side of the os humeri. It is, also, called *large communicating ulnar* or *profundo-ulnar*.

PROFUNDA ARTERIA PENIS. Chaussier has given this name to the *caavernous artery*, which arises from the artery of the penis, furnished by the internal pudic.

PROFUNDA ARTERIA SUPERIOR, *Profunda humeri*.

Certain muscles are distinguished by the names *profound* or *deep-seated*, and *superficial*. Thus, we speak of the *superficial* and *deep-seated* muscles of the neck, &c.; the *Flexor profundus perforans*, &c.

PROFUSIO, Hæmorrhagia.

PROFUSIO AQUÆ. The discharge or breaking of the waters at birth.

PROFUSIO SANGUINIS, Hæmorrhagia—p. Seminis, Ejaculation—p. Subcutanea, Purpura simplex.

PROGAS'TOR, from *προ*, 'before,' and *γαστρον*, 'belly.' One who has a pendulous belly.

PROGENIES, Epigone.

PROGENY, Epigone.

PROGLOS'SIS, from *προ*, 'before,' and *γλωσσα*, 'the tongue;' *Apex linguae*. The extremity or tip of the tongue.

PROG'NATHOUS, from *προ*, 'before,' and *γναθος*, 'the jaw.' Having a projecting jaw. A term applied to the form of the head in which there is a prolongation or forward extension of the jaws, as in the negro.

PROGNO'SIS, *Prôgnôsis*, *Prorrhœia*, *Præcognitio*, *Prognostic*, *Præno'tio*, *Præsentia'tio*, *Præscientia*, *Præciti'o*, *Prona'ta*, *Proph'asia*, *Prædic'tio*, (F.) *Prognostic*, *Pronostic*, from *προ*, 'before,' and *γνωσις*, 'knowledge.' A judgment formed by the physician regarding the future progress and termination of any disease.

PROGNOSIS, GENERAL. The opinion formed of a disease in the abstract. Thus, we say, the *General prognosis of Cyanche tonsillaris* is favourable;—of *Phthisis pulmonalis*, unfavourable, &c.

PROGNOSIS, PARTICULAR. The opinion formed of any particular case of disease. The *particular prognosis* of one case of typhus, for example, may be favourable, whilst that of another may be unfavourable.

PROGNOSIS EX LINGUÆ, Glossoman'tia.

PROGNOSTIC, Prognosis.

PROGNOSTICE, Prognosis.

PROGRESSIO, Augmentation.

PROGRESSUS, Augmentation.

PROIOTES, Præotia.

PROJECTURA, Process.

PROLABIUM, Prochellon.

PROLAP'SUS, from *prolabor*, *prolapsus*, (*pro*, and *labor*, *lapens*, 'to slide,') 'I slip down.' *Præciden'tia*, *Delap'sio*, *Delap'sus*, *Hypor'hysis*, *Propto'ma*, *Propto'sis*, *Productio*, *Propendens'tia*,

Prominentia, Ptosis, Casus, (F.) Chute; a protrusion; a falling down. A genus of diseases in the class *Locales* and order *Ectopias* of Cullen, distinguished by the falling down of a part through the orifice with which it is naturally connected.

PROLAPSUS ANI, Proctocele—p. *Bulbi oculi, Exophthalmia*—p. *Corneæ, Staphyloina* of the *corneæ*—p. *Iridis, Ptosis iridis*—p. *Linguae, Glossocele, Paraglossa*—p. *Œsophagi, Pharyngocele*—p. *Palpebræ, Blepharoptosis*—p. *Pharyngis, Pharyngocele*—p. *Umbilici, Exomphalus*.

PROLAPSUS UTERI, Ecométra, Metropto'sis, Metropropto'sis, Orthysteropto'sis, Orthysteropto'me, Falling down of the womb, Edopto'sis uteri, Hysteropto'sis, Hysterocele nuda, Procidencia uteri, (F.) Abaissement de la matrice, Chute de la matrice, Descente de la matrice, Précipitation de la matrice. Some use the term, 'Procidencia Uteri' for a minor degree of the affection than prolapsus;—*Relaxatio uteri* expressing the slightest state of all. A falling down of the uterus, owing to relaxation of the parts about the uterovaginal region. In the treatment, the horizontal posture must be insisted upon; the injection of stringent substances *per vaginam* be advised; and if the affection be not remedied by these means, a pessary may be employed as a palliative, or the operation of *Episiography* be performed.

PROLAPSUS UVTLE, Staphylœdema.

PROLAPSUS VAGINÆ, Hysteropto'sis Vagi'næ, Prolapsus Edoptosis Vagina, Coleopto'sis, Colpopo'sis, Elythropto'sis—Protrusion of the upper part of the vagina into the lower. This, like the descent of the uterus, may be *relaxation, procidencia, prolapsus*, or complete *inversion*.

PROLAPSUS VESICÆ, Excystæ.

PROLECTATIO; from *pro*, and *legere, lectum*, 'to gather.' Action of separating the finer parts of a body from the grosser.

PROLEPTICS, Proleptici, from *προ*, 'before,' and *λαμβάνω*, 'I seize hold of.' A term proposed by Dr. Laycock to signify the art and science of predicting in medicine.

PROLEPTICUS, Anticipating.

PROLES, Epigone.

PROLICIDE, Prolicidium; from *proles*, 'offspring,' and *cadere*, 'to kill.' Destruction of offspring: a term, which includes fœticide as well as infanticide.

PROLIFIC, Prolif'icus; from *proles*, 'offspring,' and *facio*, 'I make.' That which has the faculty of engendering. Applied to man, and animals, and to their sperm or seed; as well as to remedies, which, by strengthening the genital organs, increase the secretion of sperm.

PROLIGEROUS, Proli'ger, Prolig'erus, from *proles*, 'offspring,' and *gero*, 'I carry.' That which is connected with carrying the offspring.

PROLIGEROUS DISC OR LAYER, Discus prolif'erus, Discus vitellinus, Stratum prolif'erum, Gromostroma, (F.) Digue prolifère. A granular layer, situate generally towards the most prominent part of the ovarian vesicle, in the centre of which the true ovum or ovule exists.—Von Baer.

PROLONGEMENT RACHIDIEN, Medulla spinalis—p. *Sous-occipital, Basilarly process*.

PROMALACTE'RIMUM, from προ, 'before,' and *μαλασσω*, 'I soften.' The room, in the ancient gymnasium, in which the body was softened and anointed. One of the operations in bathing.

PROMANUS, see Digitus, Pollex.

PROMETOPIDIA, Frontal bandages.

PROMETOPIS, Prometopid'ion, from προ, 'before,' and *μετωρον*, 'the forehead.' The skin of the forehead.

PROMINENTIA, Prolapsus, Protuberance—p. *Annularis Cerebri, Pons Varolii*—p. *Corneæ, Ceratocele*—p. *Ossis Continua, Apophysis*.

PROMINENTIÆ ALBICANTES, Mammillary tubercles—p. *Semivales Medullæ Oblongatæ, Corpora olivaria*.

PROMONTORIUM, Promontory—p. *Faciei, Nasus*—p. *Ossis Sacri, see Sacrum*.

PROMONTORY, Promont'arium, (from pro and mons, montis, 'a mountain,') seu Tuber seu Tuberositas Tym'pani. A small projection at the inner paries of the cavity of the tympanum, which corresponds to the external scala of the cochlea, and especially to the outer side of the vestibule.

PROMONTORY OF THE SACRUM, see Sacrum.

PRONATEUR CARRÉ, Pronator radii quadratus—p. *Grand ou rond, Pronator radii teres*—p. *Petit, Pronator radii quadratus*.

PRONATION, Pronatio, from pronus, 'inclined forwards.' Anatomists understand, by pronation, the motion by which the inferior extremity of the radius passes before the ulna, and thus causes the hand to execute a kind of rotation from without inwards.

PRONATOR. That which produces the motion of pronation. This name has been given to two of the muscles of the forearm.

PRONATOR OBLIQUUS, P. radii teres—p. *Quadratus, P. radii quadratus*.

PRONATOR RADII QUADRATUS, P. quadratus, Quadratus rad'ii, P. quadratus seu transversus (Winslow), Pronator radii brevis seu quadratus (Cowper.) (F.) Cubito-radial (Ch.), Petit ou carré pronateur. This muscle is situate at the anterior, inferior, and profound part of the forearm. It is flat and square, and is attached, within, to the inferior quarter of the anterior surface of the ulna: and, without, to the inferior quarter of the anterior surface of the radius. It produces the motion of pronation.

PRONATOR RADII TERES, P. teres sive obli'quus (Winslow), (F.) Épitrachlo-radial (Ch.), Grand ou rond pronateur. A muscle seated at the upper and anterior part of the forearm. It is long, flat, and larger above than below. It is attached, above, to the inner tuberosity of the humerus and to the coronoid process of the ulna. From thence it passes obliquely downwards and outwards, and terminates at the middle of the outer surface of the radius. It causes the radius to turn on the ulna, to produce the motion of pronation. It can, also, bend the forearm on the arm, and conversely.

PRONATOR TERES, P. radii teres.

PRONATUS, Vestibulum.

PRONERVATIO, Aponeurosis, Tendon.

PRONŒA, Prognosis.

PRONOSTIC, Prognosis.

PROPENDINGIA, Prolapsus.

PROPERTIES, PHYSICAL, OF THE TISSUES. These are *flexibility, extensibility and elasticity, racornissement and inhibition*.

PROPERTIES, VITAL. Those which depend upon organization, as *contractility*.

PROPHASIS, Prognosis.

PROPHYLACTIC, Prophylac'ticus, Diaphylac'tic, Diuors'tic, Synteret'icus, Præserva'torius, from προ, and *φύλασσω*, 'I defend.' A preservative.

PROPHYLAX'IS, Prophylac's, Prophylac'tic's, Synteret'ia. Same etymon. *Præserva'tio, Præcau'tio, Præcusto'dia.* Preservative or preventive treatment.

PROPOLIS, from προ, 'before,' and *πολις*, 'city:' literally, 'that which is before the city.' *Ceranth'mus, Commo'ia, Bee-bread.* A red, resinous matter, with which the bees cover the bot-

tom of the hive. Its fume has been esteemed antiasthmatic.

PROPOMA, from *προ*, 'before,' and *πομα*, 'a drink.' Ancient name of a medicine, composed of seven parts of honey and four of wine. It was drunk before a meal.—Paulus of Ægina.

PROPORTIO, Symmetry.

PROPOSITUM, Intention.

PROPOTIS'MOS. Same etymon. *Præpo'tio*. An ancient name for medicines which were given to the patients before purging them, and, in some sort, to prepare them.

PROPRIUS AURIS EXTERNÆ, Retrahens auris.

PROPTOMA, Prolapsus.

PROPTOMA AURICULÆ RUM, *Paræsthe'sis audi'tus facca*, Flap Ear. Lobe of the ear broad, loose, and pendent from birth.—Good.

PROPTOMA SCROTI, Rachosis.

PROPTOSIS, Prolapsus—p. Palpebræ, Blepharoptosis—p. Uvulæ, Staphylodæma.

PROPTYSIS, Expectoration.

PRORA, Occiput.

PRORRHESIS, Prognosis.

PRORUPPIO SANGUINIS, Hæmorrhagia.

PROS, *προς*. In composition, this prefix generally signifies 'in addition to,' 'over and above,' 'besides.'

PROSARTHROSIS, Diarthrosis.

PROSBOLE, Impression.

PROSCHYSIS, Affusion.

PROSCOLLESI, Adherence, Agglutination.

PROSECTEUR, Dissector.

PROSECTIO, Anatomy.

PROSECTOR, Dissector.

PROSLEPSIS, Prehension.

PROSODOS, Aditus.

PROSOPALGIA, Neuralgia, facial.

PROSOPANTRA, Frontal sinuses.

PROSOPANTRITIS, from *prosopantha*, the frontal sinuses, and *itis*, denoting inflammation. Inflammation of the frontal sinuses.

PROSOPARALYSIS, Palsy, Bell's.

PROSOPIS DULCIS. A tree of rather large size, native of Peru. The fruit—*Pacay*—is a pod, from 20 to 24 inches long, containing black seeds imbedded in a white, soft, flaky substance; which last is eaten by the Limeños with pleasure.—Tschudi.

PROSOPODYNIA, Neuralgia, facial.

PROSOPODYSMOR'PHIA, from *προσωπον*, 'the face,' *δυσ*, 'with difficulty,' and *μορφη*, 'shape.' Malformation or atrophy of the face,—as where the process of nutrition suffers from diminished nervous influence.

PROSOPOLOGIA, Physiognomy.

PROSOPOMANTIA, Physiognomy.

PROSOPON, Face.

PROSOPORRHEU'MA, *Rheumatismus faciei*, from *προσωπον*, 'face,' and *ρρυμα*, 'defluxion,' 'rheumatism.' Rheumatism affecting the face.

PROSOPOSIS, Physiognomy.

PROSOPOSPASMUS, Canine Laugh.

PROSOPOSTERNODYMIA, see Cephalosomatodymia.

PROSPERITAS VALETUDINIS, Sanitas.

PROSPHORA, Prehension.

PROSPHYSIS, *Adnascen'tia*, *Coalit'io*, 'adhesion, adherence, connexion,' from *προς*, and *φω*, 'I grow.' In a more limited sense, this word means morbid adhesion of the eyelids, either between themselves, or with the globe of the eye; *Ankylobleph'aron*.

PROS'TASIS, *προστασις*, (*προ*, and *στασις*, 'station,') 'superiority, preponderance;' same etymon as *Prostate*. A predominance or abundance of excrementitious humour.—Hippocr.

PROSTATA, Prostate—p. Bartholini, Cowper's glands in the female—p. Muliebris, Cowper's glands in the female.

PROSTATÆ, Prostate.

PROSTATAL, Prostatic.

PROSTATAL'GIA, from *προστατα*, 'the prostate,' and *αλγος*, 'pain.' Pain in the prostate.

PROSTATAUXÆ, Prostatoparectasis.

PROSTATE, *προστατα*, from *προ*, 'before,' and *στημι*, 'I stand.'—*Pros'tata*, *P. gland'ula*, *Pros'tata*, *P. glandulo'sa*, *Paras'tata adenoides seu glandulo'sa*, *Adstata*, *Paras'tata*, *P. gland'ula*, *Pros'tata adenoides*, *Testis minor*, *Corpus glandulosum seu glandosum*, *C. adenoiforme*, *C. glandiforme*, *C. glandulosum*, *C. adenoïdes*, *Assisten'tes glandulæ*, *Ad'tites glandulosi*; the Prostate gland. A glandular, cordiform body, of the size of a chestnut, situate before the neck of the bladder, behind the symphysis pubis, and surrounding the first portion of the urethra. Its excretory outlets, to the number of 10 or 12, open into the part of the urethra that traverses it, and pour into it a whitish viscid humour, intended to lubricate the interior of the urethra, and to serve as a vehicle for the sperm in its ejaculation.

PROSTATELCO'SIS, from *προστατα*, 'prostate,' and *ἔλκος*, 'an ulcer.' Ulceration of the prostate.

PROSTATES INFÉRIEURES, Cowper's glands—p. *Petites*, Cowper's glands.

PROSTAT'IC, *Prostat'icus*, *Prostat'al*. That which relates to the prostate. Winslow has named—*Superior Prostatic Muscles*—ligaments which pass from the pubis to the lateral parts of the prostate. He, also, calls—*Inferior prostatic muscles*—the fleshy fibres, which, from the lateral parts of the urethra, near its membranous portion, pass to be inserted into the pubis.

PROSTATIC BISEC'TOR. An instrument employed by Dr. Stevens, of New York, in the bilateral operation of lithotomy. In form it resembles a large olive, with a beak at the extremity, with cutting edges at the sides parallel to its longest axis, and with a straight handle.

PROSTATIC LIQUOR, *Liquor prostat'icus*. The fluid secreted by the prostate, which mixes with sperm during emission.

PROSTATIC PORTION OF THE URETHRA. The part of the canal of the urethra included by the prostate: it is about 15 lines long.

PROSTATIC SINUS, see Sinus, prostatic.

PROSTATICUS SUPERIOR, *Compressor prostate*.

PROSTATITIS, *Inflamma'tio Prostate*, from *προστατα*, 'the prostate,' and *itis*, denoting inflammation. Inflammation of the prostate.

PROSTATOCELE, *Prostatoncus*.

PROSTATON'CUS, *Prostatocel'e*, *Tumor prostat'ata*, from *προστατα*, 'the prostate,' and *ουσμη*, 'a tumour.' Swelling of the prostate.

PROSTATOPARECTASIS, from *προστατα*, 'prostate,' and *παρεκτεινω*, 'to extend.' Enlargement of the prostate; also, induration of the same, *Prostatonci'rhus*, *Prostatoux'e*.

PROSTATOSCIRRHUS, see Prostatoparectasis.

PROSTERNID'IUM, from *προ*, 'before,' and *στερνον*, 'the sternum.' Any agent applied to the anterior part of the chest; a plaster to the breast.

PROSTHESIS, Prothesis.

PROSTHETA, Subdita.

PROSTHIUM, Penis.

PROSTOM'IA, *Commissu'ra labiorum*; (F.) *προ*, 'before,' and *στομα*, 'mouth.' The commissure of the lips.

PROSTRATION, *Prostratio vi'rium*, (F.) *Prostration des forces*, *Abatement*. Great de-

pression of strength. Almost total loss of power over the muscles of locomotion.

PROTEA MELIFERA. A South African plant, *Nat. Ord.* Proteaceae, whose involucre and flowers, at the time of inflorescence, are filled with a sweet watery liquid, which contains a great deal of honey. By inspissation it forms a delicious syrup—*Syrupus Proteæ*, which is much used in pulmonary affections.

PROTEA LEPIDOCARPOX, and some other Proteæ, supply the same kind of juice.

PROTEAN, *Proteiform*, *Proteiformis*, from *Proteus*, who could assume various shapes. Assuming different shapes.

PROTEIFORMIS, *Protean*.

PROTEIFORMIS MORBUS. A disease which assumes various characters.

PROTEÏN, *Proteine*, *Proteïna*: from *πρωτος*, 'I take first rank.' A product of the decomposition of albumen, &c., by potassa. When animal albumen, fibrin or casein is dissolved in a moderately strong solution of caustic potassa, and the solution is exposed for some time to a high temperature, these substances are decomposed. The addition of acetic acid causes, in all three, the separation of a gelatinous translucent precipitate which has exactly the same characters and composition. This is proteïn. — Mulder.

Protein is the basis of animal and vegetable fibrin, albumen, and casein, and of gluten, which have been, consequently, classed under the "proteinaceous alimentary principle," by Dr. Pereira. **PROTEINACEOUS**, *Proteinous*.

PROTEINOUS, *Proteïna'ceous*, *Proteïno'sus*, (F.) *Protique*. Of, or belonging to protein; — as "a proteinous alimentary principle."

PROTÉIQUE, *Proteinous*.

PROTENSIONES GLANDULARES, Mamillary eminences.

PROTHESIS, *Prosthesis*, *Adjunctio*, *Adjectio*, *Appositio*, 'addition, application; from *προς*, 'in addition to,' and *τιθημι*, 'I put.' That part of surgery whose object is to add to the human body some artificial part, in place of one that may be wanting, as a wooden leg, an artificial eye, &c.

PROTMESIS, Umbilicus, Kidney.

PROTOGALA, Colostrum.

PROTOIATROS, Archiater.

PROTOMEDICUS, Archiater.

PROTOMUS, Dissector.

PROTOPATHIA, Idiopathia.

PROTOPHYTE, *Protophyton*, from *πρωτος*, 'first,' and *φυρον*, 'a plant.' A vegetable production at the foot of the scale; as a cryptogamous plant, — a fungus.

PROTOSPOROS, Os uteri.

PROTOZÖON, from *πρωτος*, 'first,' and *ζωον*, 'an animal.' An animal low in the scale; — as a monad.

PROTRUSION, Prolapsus.

PROTUBERANCE, *Protuberantia*, *Extuberantia*, *Prominentia*, *Excrescentia*, *Extuberantia*, from *pro*, 'before,' and *tuber*, 'a projection.' (F.) *Bosse*. A name given to rough, unequal protuberances, seen at the surface of certain organs; the *parietal protuberances*, *occipital protuberances*, *annular protuberances*, &c.

PROTUBERANCE, ANNULAR, Pons Varolii — p. Cerebral, Medulla oblongata, Pons Varolii — p. *Cylindricoides*. Cornu ammonis.

PROTUBERANTIA, Eminence — p. Annularis Willisii, Pons Varolii — p. Cylindrica, Cornu ammonis.

PROTRUSOR, Detrusor urins.

PROULMATE'SIS. A word employed by Forestus for hernia of the stomach.

PROUNE, *Prunus domestica*.

PROVENTRICULUS, *Bulbus glandulosus*, *Infundibulum*, *Secundæ stomachi*; from *pro*, 'before,' and *ventriculus*, 'the stomach.' A bulbous expansion at the termination of the œsophagus, immediately above the gizzard of birds, the walls of which are thickly studded with a layer of glands or follicles which secrete a digestive fluid.

PROVERBS, MEDICAL. A proverbial expression frequently contains sound sense in its directions. In medicine, the greatest collection is in the *Regimen of Health of the School of Salerno*, composed in the 11th century, by John of Milan. Yet, although good sense is often inculcated, we frequently meet with the reverse.

Most of the proverbs are hygienic. The following are a few.

1. *Qu' après la soupe un coupe d'excellent vin*
Tire un écu de la poche du médecin.
2. *Surge quintæ, prandæ nonæ, cæna quintæ, dormi nonæ, nec est mortis vita prona.*
3. *Nunquam rectè corpus exerceri sine animo, neque animum sine corpore posse.*
4. *Viande bien machée est à demi digérée.*
5. *Optimum condimentum fames.*
Appetite is the best sauce.
6. *Plures occidit gula quam gladius.*
7. Early to bed and early to rise,
Makes a man healthy, wealthy, and wise.
8. One man's meat's another man's poison.
9. An ounce of prevention is better than a pound of cure.

PROVERSIO, Anteversion.

PROVINS, MINERAL WATERS OF. Chalybeate springs in the department of Seine et Marne, France, which contain carbonic acid and iron.

PROVOCATORIUS, Intercalary.

PROXIMAD, see Proximal aspect.

PROXIMAL, from *proximus*, 'next.' Proximate; nearest; next.

PROXIMAL ASPECT. An aspect towards the trunk, in the course of an extremity. — Barclay. *Proximad* is used by the same writer adverbially to signify 'towards the trunk.'

PRUNA, Anthrax.

PRUNE, Prunum.

PRUNE JUICE EXPECTORATION OR SPUTA. The sputa resembling prune juice, which occur in the third or purulent stage of pneumonia.

PRUNELLA, Angina pectoris, Aphthæ, Cyananche, Pupil.

PRUNELLA, *P. vulgaris* seu *officina'lis*, *Brunella*, *Consolida minor*, *Symphytum minus*, *Self-heal*, *Heal-all*, *Bugle*, (F.) *Prunelle*, *Brunelle*; *Family*, Labiatæ. *Ser. Syst.* Didynamia Gymnospermia. This plant has been recommended as an astringent, in hemorrhages and fluxes; and, also, in gargles against aphthæ, and in inflammation of the fauces.

PRUNELLÆ SAL, Potassæ nitras fusus sulphatis paucillo mixtus.

PRUNELLE, Prunella, Pupil.

PRUNELLIER, Prunus spinosa.

PRUNELLOE, Prunum Brignolense.

PRUNEOLA SYLVESTRIS, Prunus spinosa.

PRUNES, see Prunum — p. Pulp of, Pruni Pulpa.

PRUNI PULPA, *Pulp of prunes*. Take of prunes a sufficient quantity, soften them in the vapour of boiling water, and having separated the stones, beat the remainder in a marble mortar and press through a hair-sieve. — Ph. U. S.

PRUNIER, Prunus domestica — p. *Sauvage*, Prunus spinosa.

PRUNUM. A Plum, a Prune. Three sorts

of plums have been usually ranked amongst the articles of the materia medica. 1. The *Prunum Brignolense*; the *Brignole plum* or *Prunelloe*; from Brignole in Provence. It is of a reddish-yellow colour; and has a very grateful, sweet, subacid taste. 2. The *Prunum Gallicum*, *Prunum* (Ph. U. S.), the *French Plum*; and 3. The *Prunum Damascenum* or *Damson*, *Brad'ylon*. All these possess the same general qualities as the other summer fruits. They are emollient and laxative.

PRUNUM STELLATUM, *Averrhoa carambola*.

PRUNUS ACACIA, *Prunus padus*.

PRUNUS ARMENIACA, *Armeniaca vulgaris* seu *epirotica*. The *A'pricot*, *Apricock*, *Bericoc'cè*, *Βερικοκκον*, *Præcoc'ia*, (F.) *Abricot*. Family, Rosaceæ. *Sex. Syst.* Icosandria Monogynia. The apricot, *Melum Armeniacum*, when ripe, is easily digested, and considered as a great delicacy.

PRUNUS AVIUM, *P. cerasus* seu *syloestris* seu *macrophylla*, *Black Cherry Tree*, *Cerasus Avium* seu *nigra* seu *dulcis*, (F.) *Mérisier*. The fruit is eaten; and a gum exudes from the tree, the properties of which are similar to those of gum Arabic.

PRUNUS CAPULIN, (S.) *Cupulies*, grows in the open fields of Peru; and is cultivated in gardens in the towns. The fruit is acid, and not often eaten; but on account of its agreeable odour it is used in making *Pucheros de flores*; or with odoriferous flowers to perfume linen.—Tschudi.

PRUNUS CERASUS, *Cerasus ac'ida* seu *hortensis* seu *vulgaris* seu *rubra*. The *Red Cherry Tree*; (F.) *Cristier*. The fruit *Cerasum*, *Cerasion*, has a pleasant, acidulous sweet flavour. It is wholesome. See *Prunus avium*.

PRUNUS DOMESTICA, The *Plum* or *Damson tree*, *Coccyne'lea*, *Proune*, (F.) *Prunier ordinaire*. The damson, when perfectly ripe, affords a wholesome fruit for pies, tarts, &c. It is gently laxative. See *Prunum*.

PRUNUS HORTENSIS, *P. cerasus*.

PRUNUS INSTITA, The *Bullace Plum Tree*. The fruit of this tree is used like the damson.

PRUNUS LAURO-CERASUS, *Cerasus lauro-cerasus*, *Padus lauro-cerasus*, *Poison Laurel*, *Cherry Laurel*, *Common Laurel*, *Lauro-cerasus*, (F.) *Laurier-crisse*, *L. amandier*. The leaves have a bitter, styptic taste, with the flavour of bitter almonds. The flowers have a similar flavour. The powdered leaves, applied to the nostrils, excite sneezing. The flavour of the leaves has given occasion to their being employed in tarts, custards, &c.; but in large quantities they are poisonous. The poisonous principle is the prussic acid. The distilled water, called *Laurel-water*, is poisonous. (See Poisons, Table of.)

PRUNUS MACROPHYLLA, *P. avium*.

PRUNUS PADUS, *Padus*, *P. avium*, *Cerasus Padus*, *Cerasus racemosus sylvestris*, *Wild cluster* or *Bird Cherry Tree*, (F.) *Cristier à grappes*, *Bois puant*. The bark of the tree has a fragrant smell, and a bitter sub-astringent taste, somewhat similar to that of bitter almonds. It has been recommended in intermittents, &c. in the form of decoction. The berries have been used in dysentery.

PRUNUS SEBASTINA, *Sebastina*.

PRUNUS SPINOSA, The *Sloe Tree*, *P. sylvestris* seu *Acacia*, *Agriococcime'lea*, *Agru'na*, *Agru'ne'la*, (F.) *Prunellier*, *Prunier sauvage*. The fruit—the *sloe*—is sometimes employed in gargles, and was formerly much used in hemorrhage, owing to its astringent properties. The *Acacia nostras* seu *Germanica* seu *vulgaris*, *Prunella sylvestris*, *Succus acaciæ nostræ*, *S. Acaciæ Germanicæ insipissatus* is obtained from this.

PRUNUS SYLVESTRIS, *P. Avium*, *P. Spinosa*.

PRUNUS VIRGINIANA, *Cerasus serotina*, *C.*

Virginia'na, *Wild Cherry Tree*, (F.) *Cristier de Virginie*. The bark of this tree has been found useful in intermittents. The leaves are poisonous to certain animals, and the berries intoxicate different kinds of birds. The Indians use the bark in the cure of syphilis. It is bitter and astringent, and possesses some aromatic warmth, and, likewise, a narcotic quality. It is stimulant and tonic. The leaves contain prussic acid. The distilled oil of the bark is very nearly identical with that of the bitter almond. A strong decoction of the bark is anthelmintic.

PRUNUS VULGARIS, *P. Padus*.

PRURIG'INOUS, *Pruriginosus*; same etymon as the next. Relating, or belonging to, or resembling prurigo.

PRURIGO, *Pruritus*, *Christ'ina*; from *prurio*, 'I itch.' The word is often used synonymously with *itching*. Willan and Bateman use the term for a genus of cutaneous diseases, the characteristic symptoms of which are a severe itching, accompanied by an eruption of papules of nearly the same colour as the adjoining cuticle; *Cænos*, *Scabies papuliformis*, *Ecor'mia prurigo*. It affects the whole surface of the skin, under three varieties of form;—the *P. mitis*, *P. formicosa*, *P. senilis*, &c. as well as some parts of the body, as the *P. pod'icis*, and *P. pudend'is mulie'bris* seu *Puden'dagra pruriens*.

PRURIGO, Heat—*p. Pedicularis*, *Phtheiriasis*.

PRURIT, Itching.

PRURITUS, Gargle, Itching, Prurigo.

PRUSSIAN BLUE, *Ferrum Zois'icum*, *F. Boruss'icum*, *F. Cyanogenatum*, *F. oxydulum hydrocyanicum*, *Ferri Ferrocy'anas*, *F. Ferrocyanure'tum*, *Borus'sias Ferri*, *Cæruleum Boruss'icum*, *C. Berolinens'is*, *Prussias Ferri*, *Hydrocy'anas Ferri*, *Ferri Cyanure'tum*, *Ferri percyan'idum*, *Trito-hydro-ferrocy'anate of iron*, *Ferrocyanuret of iron*, *Ferro-pru'siate of iron*, (F.) *Bleu de Prusse*. In the Pharmacopœia of the United States, the pure salt—*Ferri ferrocyanure'tum*—is directed to be made as follows: *Ferri Sulph. ʒiv*, *acid sulph. ʒiijss*, *acid nitric. fʒvj* or *q. s. potassii ferrocyanuret. ʒivss*, *aqvæ*, *Oij*. Dissolve the sulphate in a pint of water, and having added the sulphuric acid, boil the solution. Pour into it the nitric acid, in small portions, boiling the liquid for a minute or two after each addition, until it no longer produces a dark colour; then allow the liquid to cool. Dissolve the ferrocyanuret of potassium in the remainder of the water, and add this solution gradually to the first liquid, agitating the mixture after each addition; then pour it upon a filter. Wash the precipitate with boiling water until the washings pass tasteless. Lastly, dry and rub into powder. This salt is chiefly used in the preparation of the hydrocyanic acid and the cyanuret of mercury. It has been advised in the treatment of intermittents, and in epilepsy and scrophulosis. Externally, it has been applied to ill-conditioned ulcers. (ʒj to ʒj, of cerata.) Dose, four to six grains.

PSALIDIUM, Fornix.

PSALIS, Fornix, Scissors.

PSALTERIUM, Lyra.

PSAMMA, see Gravel.

PSAMMIS'MUS, *Ammis'mus*, *Gammis'mus*, from *ψαμμος*, 'sand.' *Arenatio*. The application of sand to any part of the body for the cure of disease.—Paulus.

PSAMMODES, Sabulous.

PSAMMUS, see Gravel.

PSELLIS'MUS, *ψελλισμος*, from *ψελλισ*, 'I stutter.' Imperfect or depraved state of the articulation. A genus in the class *Pneumaticæ*, order *Phonica*, of Good.

PSELLISMUS NASITAS, Rhinophonia—*p. Rhotacismus*, *Rotacismus*.

PSELOTES, Balbuties.
PSEUDACACIA ODORATA, Robinia pseudacacia.
PSEUDAC'OE, *Pseudacoi'a*, *Pseudecoi'a*, from $\psi\epsilon\upsilon\delta\eta\varsigma$, 'false,' and $\alpha\upsilon\sigma\eta$, 'audition.' *Pseudacu'ois*. False hearing.
PSEUDACORUS, Iris pseudacorus.
PSEUDÆSTHESIA, *Sensus perversus*, from $\psi\epsilon\upsilon\delta\eta\varsigma$, 'false,' and $\alpha\iota\sigma\theta\alpha\sigma\eta\varsigma$, 'I feel.' *Parapsis illusoria*, *Pseudo'phē*, *Pseudaph'ia*. Depraved feeling. Imaginary sense of touch or general feeling in organs that have no existence. Common to those who have suffered amputation; and in hypochondriacs and the insane.
PSEUDALEI MORBI, Feigned diseases.
PSEUDANGUSTURINUM, Brucine.
PSEUDAPHE, Pseudæsthesia.
PSEUDARTHRO'SIS, *Pseudarticulatio*, *Pseudarticulus*, *Articulatio notha seu artificialis*, from $\psi\epsilon\upsilon\delta\eta\varsigma$, 'false,' and $\alpha\rho\theta\rho\varsigma$, 'a joint.' A false joint or articulation.
PSEUDARTICULATIO, Pseudarthrosis.
PSEUDECOIA, Pseudæcoe.
PSEUDENCEPHALUS, *Paraceph'alus*, from $\psi\epsilon\upsilon\delta\eta\varsigma$, 'false,' and $\epsilon\kappa\epsilon\phi\alpha\lambda\omicron\varsigma$, 'the encephalon.' A monster, whose cranium is open in its whole extent, from before to behind, its base supporting a vascular tumour. — G. St. Hilaire.
PSEUDO, False — p. Asthma, Dyspnœa.
PSEUDOBLEP'SIA, *Pseudoblepsia*, *Pseudora'ia*, *Suffusio oculi*, from $\psi\epsilon\upsilon\delta\eta\varsigma$, 'false,' and $\beta\lambda\epsilon\psi\iota\varsigma$, 'sight.' *Pseudops'ia*, *Parops'is illusoria*, *Suffusio*, *Phantas'ma*, *False sight*. A generic name, used by Cullen for perversion of vision. See *Metamorphopsia*.
PSEUDOBLEP'SIS, Paropsis.
PSEUDOCARCINOMA LABII, Cancer aquaticus.
PSEUDOCROUP, Asthma thymicum.
PSEUDOCYESIS, Pregnancy, false — p. *Cyesis molaris*, Mole.
PSEUDOENCEPHALITIS, Hydrecephaloid disease.
PSEUDO-FEVER, Irritation, morbid.
PSEUDOGEU'SIA, *Pseudogeus'is*, *Pseudogeusia*, from $\psi\epsilon\upsilon\delta\eta\varsigma$, 'false,' and $\gamma\epsilon\upsilon\omega\varsigma$, 'taste.' *Hallucina'tio gustiva*. False taste.
PSEUDOGEUSTIA, Pseudogensia.
PSEUDOHELMINTHES, Ectozoa.
PSEUDOLI'EN, *Pseudosplen*. Glands situate in the neighbourhood of the spleen; probably, lymphatic glands.
PSEUDOMECHOACANA, *Convolvulus panduratus*.
PSEUDOMEDICUS, Charlatan.
PSEUDOMELANOTIC FORMATIONS, see *Anthracosis* — p. *Membrane*, Membrane, false.
PSEUDOMELANOTIC MEMBRANÆ, Membrane, false — p. *Metamorphosis polyposa*, Polypus.
PSEUDOMEMBRANA, Membrane, false.
PSEUDONARCIS'SUS, *Narcissus pseudonarcis'sus*.
PSEUDOPERIPNEUMONIA, Peripneumonia notha.
PSEUDOPHLOGOSIS VENTRICULI RESOLUTIVA ET COLLIQUATIVA, *Gastromalacia*.
PSEUDOPHTH'ISIS, False phthisis. Emaciation occasioned by other cause than organic lesion of the lungs.
PSEUDOPLAS'MATA, from $\psi\epsilon\upsilon\delta\eta\varsigma$, 'false,' and $\pi\lambda\alpha\sigma\sigma\eta$, 'I form.' A term applied to malignant heterologous tumours. — Vogel.
PSEUDOPLEURITIS, Pleurodynia — p. Po-

lypi, see *Polypi* — p. *Pyrethrum*, *Achillea ptarmica* — p. *Spleen*, *Pseudolien*.

PSEUDOPNEUMONIA, Peripneumonia notha.
PSEUDOPNEUMONITIS, Peripneumonia notha.

PSEUDOPSIA, Pseudoblepsia.
PSEUDORASIS, Pseudoblepsia.
PSEUDOREX'IA, *Pseudorex'is*, from $\psi\epsilon\upsilon\delta\eta\varsigma$, 'false,' and $\alpha\pi\epsilon\tau\iota\varsigma$, 'appetite.' False appetite.

PSEUDO-RHONCHUS, from $\psi\epsilon\upsilon\delta\eta\varsigma$, 'false,' and $\rho\omicron\chi\chi\omicron\varsigma$, 'rattle.' A sound heard during respiration, which appears to be produced, like the ordinary rhonchi, in the air-tubes, but is exterior to them — as in the case of *pleuræ pseudorhœchi*. See *Rattle*, and *Râle*.

PSEUDOS'MIA, *Pseudosphre'ia*, *Pseudosphre'is*, from $\psi\epsilon\upsilon\delta\eta\varsigma$, 'false,' and $\sigma\epsilon\mu\eta$, 'smell.' False sense of smell.

PSEUDOPHRESIA, Pseudosmia.
PSEUDOSYPHILIS, Syphilis pseudosyphilis.
PSEUDOTHANATOS, Asphyxia.
PSEUDOVARIOLÆ, Variella.
PSEUDYMEN, Membrane, false.

PSIDIUM POMIF'ERUM. The *Apple Guava*, *Guava*, *Guayava*. This plant and *P. Pycniferum* bear fruits; those of the former like apples, — of the latter like pears. The apple kind has an acid flavour, the other is sweet. Of the inner pulp of either, the natives of the Indies make jellies; and, of the outer rind, tarts, marmalades, &c. They are somewhat astringent; this quality, indeed, exists in every part of the tree, and abundantly in the leaf-buds, which are occasionally boiled with barley and liquorice as an excellent drink in diarrhœa. A simple decoction of the leaves is said to be useful in the itch, and most cutaneous eruptions.

PSILOLOSIS, Depilation.
PSILOTHRUM, *Bryonia alba*, Depilatory.
PSIMMYTHON, *Plumbi subcarbonas*.
PSOA, Dysodia.
PSOÆ, *Psoia*, *Psoæ*, *Lumbi*, 'the loins,' *Alopeces*, *Nephromes'tra*, *Neuromes'tres*. The *psoæ* muscles.

PSOAS MAGNUS, *Psoas seu lumbæ'ris inter-nus*, *Præ-lombo-trochantin*, *Præ-lombo-trochantinica* (Ch.), *Femur moen'tium scartus*. A muscle, seated on the lateral parts of the lumbar portion of the vertebral column; and passing down to the superior and anterior part of the thigh. It is long, fusiform, and attached, above, to the body and transverse processes of the first four lumbar vertebræ, and last dorsal. Below, it terminates, by a very thick tendon, common to it and the iliacus muscle, — which is inserted into the top of the lesser trochanter. This muscle bends the thigh upon the pelvis, and carries it in rotation outwards. It may, also, bend the pelvis on the thigh, and the loins on the pelvis. It acts considerably in station and progression.

PSOAS PARVUS, *Præ-lombo-pubien*, (Ch.) A muscle situate anteriorly to the last. It is long, thin, flat, and narrow; and is attached, above, to the body of the last dorsal vertebra, and below, to the linea ileo-pectinea, by means of a slender tendon, which furnishes two expansions — one to the *Iliac aponeurosis*, and the other to the *pelvis*. This muscle bends the vertebral column on the pelvis; and, reciprocally, the pelvis on the vertebral column.

PSODYMUS, *Gastrodidymus*.

PSOÏÆ, *Psoæ*.

PSOÏTE, *Psoitia*.

PSOÏ'TIS, *Inflamma'tio mus'culi Psoæ*, *Lumbæ'go inflammato'ria spasmod'ica*, (F.) *Psoite*, In-

flammation du muscle Psoas. From *ψοα*, 'the loins,' and *ίτις*, denoting inflammation. Inflammation of the psoas muscles and of the parts situate before the lumbar vertebræ: accompanied, from its commencement, by considerable fever, violent pains in the part affected and in the thigh of the same side, which remains commonly half bent. Psoriasis may terminate by suppuration, and form lumbar abscess.

PSOLE, *ψωλη*, 'the male organ.' Also, the glans when uncovered.

PSOLON, *Μεμβροσος*.

PSOLON'CUS, from *ψωλη*, and *ογκος*, 'a tumour.' Swelling of the glans, or of the penis generally.

PSOLUS, from *ψωλη*. One who has the glans uncovered. One who has been circumcised.

PSOPHOMETER, *Stethoscope*.

PSOPHOS, *ψοφος*, 'a noise.' A loud noise; a hollow sound.

PSORA, from *ψωω*, 'I touch, I feel.' *Scabies*, *Phlysis Scabies*, *Eccyema Scabies*, *Scabiola*, *Itch*, *Scratch*, *Scotch Riddle*, (F.) *Gale*, *Mal Saint-Main*, *Rogne*. A contagious eruption of very minute pimples—pustular, vesicular, papular, intermixed, and alternating, itching intolerably and terminating in scabs. It seems to be connected with an insect of the genus *Acarus*;—the *Acarus* seu *Sarcoptes* seu *Sarcoptus* seu *Phthirium* seu *Cheyletus Scabiei*, *Acarus Ciro*, *Itch-insect*, (F.) *Ciron*. The itch occupies, particularly, the spaces between the fingers, the back of the hands, wrists, elbows, axillæ, groins, hams, &c., and rarely affects the face. The best applications, for its cure, are,—the *Unguentum Sulphuris* or *Ung. Sulph. comp.* night and morning; but the unpleasant smell of the sulphur has given occasion to the use of other means;—as the *White Hellebore*, *Potass in deliquescente*, *Muriate of Ammonia*, *Sulphuric Acid*, &c. The repugnance to the smell of sulphur ought not, however, to be regarded; especially as, in the course of four or five days, it will, in almost all cases, produce a perfect cure.

PSORA AGRIA, *Psoriasis inveterata*—p. *Leprosæ*, *Psoriasis*—p. *Squamosa*, *Psoriasis*.

PSORA'LEA GLANDULO'SA, *Alcaquil'la*. *Family*, *Leguminosæ*. *Sex. Syst.* *Diadelphia Decandria*. A shrub, used in Chili as a vulnerary.

PSORA'LEA PENTAPHYL'LA, *Psora'lia*, *Contrayer'va nova*, *Mex'ican Contrayer'va*. The root is little, if at all, inferior to the *contrayer'va* in its medical properties; which, by the by, are unimportant.

PSORALIA, *Psoralea pentaphylla*.

PSORENTERIA, *Cholera*.

PSORIASIS, formerly, the state of being affected with *ψωρα*. *Lepidosis psoriasis*, *Serp'edo*, *Serp'igo*, *Impeti'go* (of some), *Scabica sic'ca*, *S. feri'na*, *Psora lepro'sa*, *P. squamo'sa*, *Scaly Tetter*, *Dry Scale*, *Dry Scall*, (F.) *Dartre squameuse lichenoidé*, *D. écailleuse*, *Gratelle*, *Gale miliare*, *G. canine* ou *sèche*. A cutaneous affection, consisting of patches of rough, armorphous scales; continuous, or of indeterminate outline; skin often chappy. Psoriasis occurs under a considerable variety of forms. The surface, under the scales, is more tender and irritable than in lepra, which psoriasis, in some respects, resembles. Dr. Willan has given names to eleven varieties of psoriasis: the chief of which are the *Psoriasis gutta'ta*, *P. diffu'sa* (one form of which is the *Baker's Itch* and *Grocer's Itch*, and another, the *Washerwoman's Scall*), the *P. gyra'ta*, and *P. invetera'ta* seu *Psora a'grica*. The treatment of psoriasis must be antiphlogistic, with the internal use of the fixed alkalies, sulphur, &c. The irri-

table kinds do better without any local application. The more local and less inflammatory are ameliorated by emollient and soothing applications; or by slightly stimulating means, sea-bathing, the *Ung. hydrarg. nitrico-oxyd.*, *Ung. oridi zinci*, &c.

PSORICUS. That which has the nature of itch. A medicine for curing the itch.

PSOROPHTHALMIA, *Ophthalmia tarsi*—p. *Neonatorum*, see *Ophthalmia (purulenta infantum)*.

PSYÆ, *Psomæ*.

PSYCHAGOGA, *Psychagogica*.

PSYCHAGO'GICA, *Psychago'ga*, from *ψυχη*, 'life,' 'soul,' and *αγω*, 'I lead.' Medicines which resuscitate, when life seems extinct; as in syncope and apoplexy.

PSYCHE, *Anima*.

PSYCHIATRI'A, from *ψυχη*, 'mind,' and *ιατρικη*, 'healing.' Treatment of diseases of the mind.

PSY'CHICAL, *Psy'chicus*, from *ψυχη*, 'mind.' That which relates to the mind or mental endowments. *Psychological* is not unfrequently used with the like signification.

PSYCHOLOGICAL, see *Psychical*.

PSYCHOL'OGY, *Psycholog'ia*, from *ψυχη*, 'mind,' and *λογος*, 'discourse.' A treatise on the intellectual and moral faculties. Also, the intellectual and moral faculties or sphere.

PSYCHONOSOL'OGY, *Psychonosolog'ia*, from *ψυχη*, 'mind,' *νοσος*, 'disease,' and *λογος*, 'a description.' The doctrine of, or a treatise on, diseases of the mind.

PSYCHOPATHIES, *Psychosæ*.

PSYCHOR'AGES, *Agoni'sans*, *Moribundus*, *Moribund*, from *ψυχη*, 'mind,' and *αγω*, 'rupture.' Dying. In *Articulo Mortis*. *Moribund* means, also, one who is dying.

PSYCHORAGIA, *Agony*, *Death*.

PSYCHORRHAGIA, *Agony*, *Death*.

PSYCHOS, *Cold*.

PSYCHO'SES, from *ψυχη*, 'mind.' *Neuroses* of the intellect. Diseases of the mind. *Psychopathica*.

PSYCHOTICA, *Analeptica*.

PSYCHOTRIA, *Analeptica*—p. *Emetica*, *Iscacuanha*.

PSYCHOTROPHUM, *Betonica officinalis*.

PSYCHROLU'SIA, *Psychrolu'tron*, from *ψυχρος*, 'cold,' and *λουω*, 'I wash.' A cold bath.

PSYCHROPHOB'IA, from *ψυχρος*, 'cold,' and *φοβος*, 'fear.' Dread of cold, especially of cold water. Impossibility to cold.

PSYCHTICA, *Refrigerants*.

PSYDRA'CIA, *quasi*, *ψυδρα* 'drops,' 'cold drops.' The ancients sometimes used this term for pimples; at others, for vesicles. Willan and Bateman define *Psychracium* to be, a small pustule, often irregularly circumscribed, producing but a slight elevation of the cuticle, and terminating in a laminated scab. Many of the psychracia usually appear together, and become confluent; and, after the discharge of pus, they pour out a thin, watery humour: which frequently forms an irregular incrustation. Frank limits the term to a psoriform eruption, which differs from itch in not originating from an insect, and is not contagious;—perhaps the lichen. Authors have differed regarding its acceptance.

PSYDRA'CIA ACNE, *Acne*.

PSYLLIUM, *Plantago psyllium*—p. *Erectum*, *Plantago psyllium*.

PTARMICA, *Achillea ptarmica*—p. Montana, *Arnica montana*.

PTARMICUM, Errhine, Sternutatory.

PTARMOS, Sneezing.

PTELEA, Ulmus.

PTERIS, *Polypodium filix mas*.

PTERIS AQUILINA, 'Eagle's Wings,' so called from its leaves. *Pteris*, *Thelypteris*, *Filix Nymphaea* seu *femina*, *Asplenium aquilinum*, Common Brake or Female Fern; Eagle Fern, Bracken, (F.) *Fougère femelle*, *La grande Fougère*. Nat. Ord. Filices. The root is considered to be anthelmintic; and as efficacious as that of the male fern in cases of tapeworm.

PTERIS PALUSTRIS, *Asplenium filix femina*.

PTERNA, Calcaneum.

PTERNIUM, Calcaneum.

PTERNOBATES, Calcigradus.

PTEROCARPUS ERINACEA, see Kino—p. Marsupium, see Kino—p. Sandalinus, P. Santalinus.

PTEROCARPUS SANTALINUS, *P. Santalinus*, *Santalum* seu *Santalum rubrum*, Red Sanders or Saunders Tree, (F.) *Santal rouge*. Family, Leguminosæ. *Sec. Syst.* Diadelphia Decandria. Red Saunders wood, *Santalum* (Ph. U. S.,) *Lignum sandalinum* is used only as a colouring matter: it gives to rectified spirit a fine deep red. The juice of this tree, like that of *P. Draco*, affords a species of Dragon's Blood.

PTEROPORA ANDROMEDEA, *Scaly Dragon claw*, *Dragon root*, *Fever root*, *Albany beech-drop*. An indigenous plant, Nat. Ord. Monotropeæ. *Sec. Syst.* Decandria Monogynia—found in the state of New York, which blossoms in July. The root has been regarded as an anthelmintic, diuretic, emmenagogue, &c.: but it is not used.

PTERYGION, *Pterygium*, *Ala*, from πτερόν, 'a wing.' A small wing. *Onyx*, *Pyosis*, *Unguis*, (F.) *Drapeau*, *Onglet*. A varicose excrescence of the conjunctiva, of a triangular shape, and commonly occurring at the inner angle of the eye; whence it extends over the cornea. Sometimes two or three pterygia occur on the same eye, and cover the whole cornea with a thick veil, which totally prevents vision. According to Scarpa, the ancients gave the name *Panniculus* to this last complication. If the pterygion cannot be dispelled by means of discutient collyria, it must be removed by the scissors.

PTERYGIUM, *Pterygion*, *Scapula*—p. *Digiti*, *Paronychia*—p. *Lardaceum*, *Pinguicula*—p. *Pinguicula*.

PTERYGO-ANGULI-MAXILLARE, *Pterygoideus internus*—p. *Colli-maxillare*, *Pterygoideus externus*—p. *Maxillare, grand*, *Pterygoideus internus*—p. *Maxillare, petit*, *Pterygoideus externus*—p. *Palatine canal*, *Pterygoid canal*—p. *Pharyngeus*, *Constrictor pharyngis*—p. *Staphylinus*, *Circumflexus*.

PTERYGO-PALATINE, *Pterygo-Palati'nis*. That which belongs to the pterygoid process and palate.

PTERYGO-PALATINE ARTERY or *Superior pharyngeal* is a very small artery, and is given off by the internal maxillary at the bottom of the zygomatic fossa: after having passed through the pterygo-palatine canal, it is distributed to the superior part of the pharynx, the sphenoid bone, and the Eustachian tube.

PTERYGO-PALATINE CANAL. A small canal, formed by the internal ala of the pterygoid process, and the palate bone. It gives passage to the vessels of the same name.

PTERYGO-STAPHYLINUS INTERNUS, *Levator palati*—p. *Syndesmo-staphyli-pharyngion*, *Constrictor pharyngis*.

PTERYGODES, *Alatus*.

PTERYGOID, *Pterygoi'des*, *Pterygoideus*, *Aliformis*; from πτερόν, 'a wing,' and εἶδος, 'form.' A name given to two processes at the inferior surface of the sphenoid bone; the two laminae which form them having been compared to wings. These *alæ* or *wings* or *processes*,—*Processus aliformes*,—have been distinguished, according to their position, into *internal* and *external*.

PTERYGOID ARTERY, *Vidian Artery*, *Ramulus Ductus Pterygoidei*, *Arteria pharyngea supræma*, arises from the internal maxillary artery, at the bottom of the zygomatic fossa, and enters the pterygoid canal with the nerve of the same name, to proceed to be distributed on the Eustachian tube and velum palati. The name, *pterygoid arteries*, is likewise given to the branches, which the internal maxillary and some of its divisions, as the meningeal media, and posterior temporals profunda, furnish to the pterygoid muscles, behind the neck of the lower jaw.

PTERYGOID BONE, Sphenoid.

PTERYGOID CANAL, *Vidian canal*, *Ductus pterygoideus*, *Canalis Vidianus*, (F.) *Onduit pterygoïdien* ou *Vidien*, *Pterygo-palatine canal*, is a narrow channel, which traverses, in a direction from before to behind, the base of the pterygoid process, and gives passage to the pterygoid nerve. The *foramina* of the sphenoid, which terminate the canals, have the same epithets applied to them.

PTERYGOID FOSSA, *Fossa Pterygoïdea*, (F.) *Fosse pterygoïdienne* ou *pterygoïde*, is the depression which separates the two laminae or *alæ* of the pterygoid process.

PTERYGOID MUSCLES, *Alares musculi*, *Aliformes musculi*, are two in number. 1. The *Pterygoideus externus*, *P. minor*, (F.) *Pterygocolli-maxillaire*, *Petit Pterygo-maxillaire* (Ch.) *Petit pterygoïdien*, *Pterygoïdien externe*, is a thick, short muscle, which arises, by short aponeuroses, from the outer surface of the external ala of the pterygoid process, and from the outer surface of the great ala of the sphenoid bone; and is inserted at the anterior part of the neck of the lower jaw-bone, and the corresponding part of the inter-articular fibro-cartilage. This muscle draws the condyle of the lower jaw and the inter-articular ligament forwards. It carries the chin forwards, and to the opposite side. If the two external pterygoids act together, the jaw is carried directly forwards. 2. The *Pterygoideus internus*, *P. major*, *Masseter internus*, *Latens in Oræ*, (F.) *Grand Pterygo-maxillaire*, *Pterygo-anguli-maxillaire*, *Grand Pterygoïdien* ou *Pterygoïdien interne*. A thick, quadrilateral muscle, which is attached by short and very strong aponeuroses; above, to the pterygoid fossa, whence it proceeds downwards, backwards, and outwards, to be inserted into the inner surface of the ramus of the lower jaw, near its angle. This muscle raises the lower jaw, and carries it a little forwards. It also performs the grinding motion.

PTERYGOID NERVE. These are two in number. 1. The *Pterygoid* or *Vidian Nerve*. It arises from the posterior part of the sphenopalatine ganglion; traverses the Vidian canal of the sphenoid; and, beyond, divides into two filaments. 1. A *superior* or *cranial*, *Nervus superficialis* sive *petrosus*, which ascends into the cranium, and enters the hiatus of Fallopius to unite with the facial nerve. 2. An *inferior* or *carotid*, *Nervus profundus* sive *major*, which traverses the carotid canal, and unites with the ascending branches of the superior cervical ganglion of the trisplanchnic. 2. The *Pterygoid Nerve*, properly so called, *Nervus musculi pterygoidei*, is given off by the inferior maxillary branch of the 5th pair.

PTERYGOIDIEN GRAND or **INTERNE**, *Pterygoideus internus*—p. *Externe*, *Pterygoideus externus*—p. *Petit*, *Pterygoideus externus*.

PTERYGO'MA. Same etymon. A wing: a projecting or pendulous body. A swelling of the valva, which prevents coition.—M. A. Severinus.

PTERYX, Ala.

PTILOSI, Deplumatio, Madarosis.

PTISANA, Tisane—p. *Communis*, Decoctum hordei compositum—p. *Hippocratica*, Decoctum hordei.

PTISSANA, Tisane.

PTOCHIA'TER, *Ptochia'trus*, same etymon as the next. A physician to the poor, or to an establishment for the poor.

PTOCHIATRIA, from *πτωχος*, 'poor,' and *ιατρεια*, 'healing.' Practice amongst the poor. Also, an institution for the treatment of the diseases of the poor.

PTOCHOCOMI'UM, from *πτωχος*, 'a poor person,' and *κομω*, 'I take care of;' *Ptochodochi'um*, *Ptochotrophe'um*. An almshouse.

PTOCHODOCHIUM, *Ptochococium*.

PTOCHOTROPHEUM, *Ptochococium*.

PTOMA, Cadaver.

PTOSIS, Prolapsus—p. *Bulbi oculi*, *Exophthalmia*.

PTOSIS IR'IDIS, *Iridoc'ele*, *Her'nia Ir'idis*, *Iridopto'is*, *Prolap'sus Ir'idis*, from *πτωσις*, 'a falling.' A prolapsus of the iris through a wound of the cornea. It is known by a blackish tubercle, which projects a little from the cornea in various forms.

PTOSIS PALPEBRÆ, *Blepharoptosis*.

PTYALAGOGUE, *Sialogogue*.

PTYALIN, see *Saliva*.

PTYALISM, *Salivation*.

PTYALISME MERCURIEL, *Salivation*, *mercurial*.

PTYALISMUS, *Salivation*—p. *Acutus mellitus*, see *Salivation*—p. *Acutus sympatheticus*, see *Salivation*—p. *Hydrargyratus*, *Salivation*, *mercurial*—p. *Inera*, *Slavering*—p. *Mercurialis*, *Salivation*, *mercurial*—p. *Pyrosicus*, *Pyrosis*.

PTYALOGOGUE, *Sialogogue*.

PTYALON, *Saliva*.

PTYASMAGOGUE, *Expectorant*, *Sialogogue*.

PTYELON, *Saliva*, *Sputum*.

PTYSIS, *Expectoration*.

PTYSMA, *Saliva*.

PTYSMAGOGUE, *Sialogogue*.

PTYSMATIS'CHESIS, *Ptysmatos'chesis*, from *πτυσμα*, 'sputum,' and *ιχειν*, 'to retain.' Suppression of pulmonary expectoration.

PTYSMATOSCHESIS, *Ptysmatichesis*.

PUANTEUR, *Dysodia*.

PUBENS, *Ephobus*.

PUBER, *Ephobus*.

PUBERAL; same etymon as *Puberty*. Relating or appertaining to the age of puberty—as 'a *puberal* disease.'

PUBÈRE, *Ephobus*.

PUBERTAS, *Ephobia*.

PUBERTY, *Pubertas*, *Hobis*, *Pubes*, *Aphrodia'ia*, *Ephobi'a*, *Eph'e'bia*, *Eph'e'botes*, *Eph'ebo'cynd*, *Pubescence*, from *pubescere*, 'to begin to have hair on the chin and sexual organs.' The period of life at which young people of both sexes are *pubescent* or *nubile*. According to the civil law, puberty occurs at 12 years in females, and 14 in males. The period varies somewhat in different climates, and in different individuals of the same climate.

PUBES, *Epis'chion*, *Epicten'ion*, *Cteis*, *Pecten*; the *Pubic region*. Same etymon. The middle part of the hypogastric region; so called, because it is covered with hair, in both sexes, at the

period of puberty. The hair is also called *Pubes*, *Lanugo* seu *Pili*, *Pudendo'rum Plana'rium*; and, of old, *pubertas* signified the same.

PUBES, *Puberty*.

PUBESCENCE, *Puberty*.

PUBESCENT, see *Puberty*.

PUBIÆUS, *Pubic*.

PUBIC, *Pu'bian*, *Pu'bianus*, *Pubia'us*, (F.) *Pubien*. That which belongs to or concerns the pubis.

PUBIC ARCH or *Arch of the Pubis*, (F.) *Arce pubienne*. The arch at the anterior part of the inferior circumference of the pelvis. It is more expanded in the female than in the male; to correspond with the additional functions which she has to execute.

PUBIC ARTICULA'TION, or *Symphysis Pubis*, results from the junction of the ossa pubis. The medium of union is cartilage.

PUBIC LIG'AMENTS are two very solid, fibrous fasciæ, situate before and beneath the symphysis pubis, which they strengthen. The one is called the *anterior pubic ligament*; the other the *inferior* or *subpubic*.

PUBIC REGION, *Re'gio Pubis*. The region of the pubes.

PUBIEN, *Pubic*.

PUBIO-COCCYGIEN-ANNULAIRE, *Pubio-coecyge'us annula'ris*. Dumas gave this name to the levator ani and ischio-coecygeus, which he considers a single muscle.

PUBIO-COCCYGIEN-ANNULAIRE, *Levator Ani*—p. *Femoral*, *Pectinalis*—p. *Femoralis*, *Adductor longus femoris*—p. *Ombilical*, *Pyramidalis abdominis*—p. *Prostaticus*, *Compressor prostaticæ*—p. *Sous-ombilical*, *Pyramidalis abdominis*—p. *Sternal*, *Rectus abdominis*—p. *Urethral*, see *Compressor Urethrae*.

PUBIS, *OS*, *Epis'chion*, *Epis'ion*, *Epis'chion*, *Share Bone*, *Bar-bone*, *Os Pec'tinis*. The anterior part of the os innominatum; so called because it corresponds to the genital organs and pubic region. The *angle of the pubis* is formed by the union of the body and rami of each side.

PUBLICÆ PARTES. Those organs are so called, the object of whose functions is the nutrition of all the others. Such are the digestive and respiratory organs.

PUCCOON, *Sanguinaria Canadensis*—p. *Red*, *Sanguinaria Canadensis*—p. *Yellow*, *Hydrastis Canadensis*.

PUCE, *Pulex irritans*—p. *Maligne*, see *Anthrax*—p. *Péntrante*, *Chique*.

PUCELAGE, *Virginity*.

PUCELLE, *Virgin*.

PUDDING-GRASS, *Mentha pulegium*.

PUDENDA, *Genital organs*.

PUDENDA VIRO'RUM, *Pudibilia*.

PUDEND'AGRA. A hybrid word; from *pudenda*, (*pudere*, 'to be ashamed,') 'the genital organs,' and the Greek *αγρα*, 'a seizure.' According to some, this term means pain in the genital parts: *Dolor pudendo'rum*, *Ment'ulagra*, *Edæodyn'ia*; according to others, it is synonymous with *syphilis*.

PUDENDAGRA PRURIENS, *Prurigo pudendi muliebris*.

PUDEND'DAL HER'NIA. *Hernia*, which descends between the vagina and ramus ischii, and forms an oblong tumour in the labium; traceable in the pelvis, as far as the os uteri.

PUDENDALIS LONGUS INFERIOR, see *Sciatic nerve*, lesser.

PUDENDUM, FEMALE, *Valva*—p. *Muliebre*, *Vulva*.

PUDENDUS, *Pubic*.

PUDIBIL'IA; from *pudere*, 'to be ashamed.'

The male genital organs; *Genitalia Viri, Virilia, Penis, Instrumenta, Pudenda virorum, Ponda.*

PUDIC. *Pudicus, Pudendus, (F.) Honteux.* Same etymon. That which causes shame. A name given to the genital organs as well as to different other parts.

PUDIC ARTERIES are distributed to the organs of generation. They are,—1. The *internal Pudic, Arteria Pudica, A. pudenda communis, (F.) Artere honteuse interne, A. Sous-pubienne (Ch.), Genital Artery.* It is furnished by the hypogastric, and divides into two branches; the one—the *inferior or perineal*—which gives off the inferior hemorrhoidal and the artery of the septum; and the other—the *superior, (F.) Ischiopelvicane*—which furnishes the transverse perineal artery, and divides into two branches; the *artery of the corpus cavernosum, and the dorsalis penis.* This latter, in the female, has the name *Dorsalis Clitoridis.* 2. The *external Pudic Arteries, (F.) Arteres scrotales ou vulvaires (Ch.), A. honteuses externes, which are two in number.* The one is *superficial or subcutaneous, and the other deep-seated or subaponeurotic.* They are given off from the femoral artery, or some one of its branches; and are distributed to the external parts of generation.

PUDIC NERVE, (F.) Nerf honteux, Nerf ischio-pelvicus ou Ischio-clitorien (Ch.), is a branch furnished by the sacral plexus, which is distributed to the genital organs; and especially, to the penis in man, and the clitoris in the female.

PUERILE, Puerilia, from puer, 'a child,' (F.) Respiration puérile, R. exagérée, R. supplémentaire, E. hyperostéculaire. A term applied to the respiration when it is heard loud through the stethoscope, as in healthy children.

PUERILITAS, Dementia of the aged.

PUERITIA, see Age.

PUERPERA, from puer, 'a child,' and parere, 'to bring forth.' Tokos, Lochos, Enix'a, Lecho, a lying-in woman, (F.) Femme en Couché, Accouchée. A female in child-bed. One recently delivered.

PUERPERAL, Puerperalis; from puerpera. Relating to parturition and its consequences.

PUERPERAL CONVULSIONS, Eclampsia gravidarum et parturientium.

PUERPERAL FEVER. Any fever occurring during the puerperal state—*Febris puerperarum, Lechopyra, Lochiocelii'tis, Lochiopyra, Child-bed fever.* Most commonly restricted to a malignant variety of peritonitis.

PUERPERIUM, Child-bed state.

PUERPEROUS, Parturient.

PUFF, VEILED, see Cavernous respiration.

PUFF-BALL, Lycoperdon, Leontodon taraxacum.

PUFFINESS, from (D.) poffen, 'to blow.' Inflatio, Sufflatio; Tumesfactio mollis, (F.) Bouffesure, Boursouffure. A soft intumescence, without redness, which may be partial or general, and be produced by accumulation of serous fluid, extravasation of blood, effusion of air into the subcutaneous areolar tissue, &c. Puffiness is most frequently seen in the face and legs; and sometimes appears around a wound.

PUGILLUS, Drax, Dra'chion, from pugnus, 'the fist.' Dragma, Dragmis, (F.) Pincée. The quantity of any substance, which may be taken with the end of two or three fingers. The eighth part of a handful.

PUISSANCE DU MOULE INTÉRIEUR, Plastic force.

PUKE, Emetic.

PUKEWEED, Lobelia inflata.

PUKING, Vomiting, Regurgitation.

PULEGIUM, Mentha pulegium—p. Cervinum, Mentha cervina.

PULEX IRRITANS, The common flea, (F.) Puce. A parasitic insect found on the bodies of man and animals.

PULEX PENETRANS, Chique.

PULICARIA DYSENTERICA, Inula dysenterica.

PULICARIS, Pulicul'aris, from pulex, 'a gnat.' An epithet given to cutaneous eruptions resembling gnat-bites;—and, also, to diseases in which such eruptions occur.

PULICARIS HERBA, Plantago psyllium.

PŪLLNA, MINERAL WATERS OF. These Bohemian springs contain sulphates of soda and magnesia, and chloride of magnesium.

PULMO, Pulmo'nes, by transposition of the letter l from pleumon, πνευμων; Pneumon, Pleumon, Spiramentum an'ima. Ergaste'rium spir'itis, Flabellum et ventila'brum cordis, the Lung. The essential organ of respiration, which is double, and occupies the two sides of the chest. The lungs, which are of a spongy, soft, flexible, compressible, and dilatible structure, fill exactly the two cavities of the thorax, and are separated from each other by the mediastinum and the heart. The right lung, which is shorter and broader than the left, is divided, by two oblique fissures, into three unequal lobes, *Lobi seu Ala pulmo'num.* The left has only two lobes, and consequently only one fissure. At the internal surface of these organs, which is slightly concave, there is, about the middle, a pedicle, formed by the bronchia and pulmonary vessels, and called, by anatomists, the *root of the lungs, (F.) Racine des Poumons.* Essentially, the lungs are composed of prolongations and ramifications of the bronchia, and of the pulmonary arteries and veins,—the divisions of which are supported by a fine, areolar tissue.

When the surface of the lungs is examined in a clear light, we may see, even through the pleura, that their parenchyma is formed by the aggregation of a multitude of small vesicles, of an irregularly spheroid or ovoid shape, full of air, and separated by white and opaque septa. These vesicles are called *Air-cells, Spiramenta seu Spiramina seu Cellulae Pulmo'num.* Along the partitions or septa is deposited, in greater or less quantity, *black pulmonary matter, (F.) Matière pulmonaire noire,* as it has been called, which seems to be natural. Sometimes it is seen in points; at others, in spots. The colour of the lungs varies according to age and other circumstances. In youth, it is more red; and afterwards, grayish or bluish; often, as if marbled. The pleura pulmonalis is their investing membrane. The air is carried to the lungs by means of the trachea and bronchia. The black venous blood, which requires oxygenation, is conveyed to them from the heart, by the pulmonary artery; and when it has undergone this change, it is returned to the heart by the pulmonary veins. The blood-vessels inservient to the nutrition of the lungs are the *bronchial arteries and veins.* The pulmonary lymphatics are very numerous. Some are superficial; others, deep-seated. They pass, for the most part, into the *bronchial ganglions or glands.* The nerves are furnished by the pulmonary plexus.

PULMONAIRE DES FRANÇAIS, Hieracium murorum.

PULMONARIA, P. officinalis, P. Maculata, P. Maculosa, Lungwort, Spotted Lungwort, Jerusalem Cowslip, Jerusalem Sage, Spotted Comfrey, (F.) Sauge de Jerusalem. Family, Boraginaceae. Sex. Syst. Pentandria Monogynia. The leaves of this plant have been used as demulcents and pectorals; partly from their resemblance to lungs,

and, partly, because they have a slightly mucilaginous taste. The plant is not worthy of notice.

PULMONARIA, *Pneumonia*—p. *Arborea*, *Lichen pulmonarius*—p. *Gallica*, *Hieracium murorum*—p. *Officinalis*, *Pulmonaria*.

PULMONARY, *Pulmonaria*, *Pulmonalis*. That which relates or belongs to the lungs. A name given to various parts.

PULMONARY ARTERY, *Arteria pulmonaria*, *Vena arteriosa*, arises from the upper and left part of the right ventricle of the heart; whence it passes obliquely upwards and to the left side; dividing into two trunks, opposite the second dorsal vertebra—one passing to each lung. At its origin, it is furnished with three sigmoid or semilunar valves. It carries the blood to the lungs for aeration.

PULMONARY MATTER, *Black*, see *Pulmo*.

PULMONARY PLEXUS, *Plexus pulmonaris*. A considerable nervous network, situate behind the bronchia, which is formed by the filaments of the pneumogastric nerve or *par vagum*, and by other filaments from the inferior cervical ganglion and the first thoracic ganglia. This plexus forms a kind of areolar web, with numerous meshes of different sizes, in which vessels are lodged, surrounded by much areolar tissue. This plexus sends filaments to the bronchia, which they accompany to their extremities.

PULMONARY VEINS, *Vena pulmonares*, *Arteriae venosae*. These arise in the lungs from the final terminations of the arteries of the same name; collect in ramusculi and rami of greater and greater size, and ultimately unite in four trunks; two of which issue from each lung to open into the left auricle of the heart. The pulmonary veins have the same structure as the other veins of the body; from which they differ, in containing arterial blood, as the pulmonary artery differs from the others in conveying venous blood. They carry the blood back to the heart after aeration.

PULMONES TARTARIZATI, *Lithiasis pulmonum*.

PULMONIA, *Phthisis pulmonalis*, *Pneumonia*.

PULMONIC, *Pulmonicus*, *Pneumonicus*, *Pulmonarius*, *Pneumoniac*. One affected with phthisis—one labouring under diseases of the lungs. Any thing relating or belonging to the lungs. A medicine for the lungs.

PULP, *Pulpa*, *Pulpa'men*, *Sarz*. The soft and parenchymatous parts of vegetables reduced to a paste by the operation of pulping.

PULP OF THE TOOTH, *Dental pulp*.

PULPA CASSIÆ, see *Cassia fistula*—p. *Dentis*, *Dental pulp*—p. *Pruni*, see *Pruni pulpa*—p. *Prunorum sylvestrium condita*, *Conserva pruni sylvestris*—p. *Tamarindi*, see *Tamarindi pulpa*.

PULPA TESTIS, *Parenchyma testis*. The parenchyma of the testis.

PULPAMEN, *Pulp*.

PULPE DENTAIRE, *Dental pulp*.

PULPEZIA, *Apoplexy*.

PULPING, *Pulpa'tion*, *Pulpa'tio*. An operation—the object of which is to reduce certain vegetable substances to a pulp. For this purpose, they are bruised in a mortar, and then passed through a hair sieve, by the aid of a wooden spatula, called a *Pulper*, (*F.*) *Pulpoire*.

PULPOIRE, see *Pulping*.

PULQUE, see *Agave Americana*.

PULS EX OVIS et *LACTE*, *Oogala*.

PULSATILLA NIGRICANS, *Anemone pratensis*—p. *Pratensis*, *Anemone pratensis*—p. *Vulgaris*, *Anemone pulsatilla*.

PULSATILLE NOIRE, *Anemone pratensis*—p. *des Prés*, *Anemone pratensis*.

PULSATIO, *Pulsation*—p. *Cordis*, *Palpitation*.

PULSATIÖN, *Pulsa'tio*, *Sphygmos*, *Sphyxis*, *Peda'sis*, *Pedeth'mos*, (*F.*) *Battement*. The beating of the heart and arteries. Also, the beating felt in an inflamed part.

PULSATIVUS, *Throbbing*.

PULSATORY, *Throbbing*.

PULSE, from *pulso*, 'I beat'; *Pulsus*, *Pulsa'tio*, *Pulsus cordis* et *arteriarum*, *Ictus cordis* et *arteriarum*, *Incur'sus arteriarum*, *Sphygmos*, *Sphygma*, *Diasphy'sis*, (*F.*) *Pouls*. Beating of the arteries, produced by the afflux of the blood propelled by the heart in its contractions. For the sake of convenience, we choose the radial artery at the wrist to detect the precise character of the pulse. These characters relate to the number of pulsations in a given time; to their degrees of quickness; hardness and strength; to the equality or inequality either of the pulsations themselves or of their intervals; to the development or fulness of the artery, and to the different impressions it may produce on the finger.

The following estimates have been made of the pulse at various ages:

Ages.	Number of Beats per minute, according to		
	HEBERDEN.	SÖMMERING.	MÜLLER.
In the embryo			150
At birth	130 to 140		Do.
One month	120		
One year	120 to 108	120	115 to 130
Two years	108 to 90	110	100 to 115
Three years	90 to 80	90	90 to 100
Seven years	72		85 to 90
Twelve years	70		
Puberty		80	80 to 85
Adult age		70	70 to 75
Old age		60	50 to 65

* It does not appear that the pulse of the aged is less frequent, but the contrary. In general it is more frequent in females and in irritable persons, than in males and those of an opposite temperament. In the healthy state, the pulse, besides having the proper number of pulsations, is neither hard nor unusually soft; it is moderately developed; of a medium strength; and perfectly equal, both as regards the pulsations and their intervals. In diseases it wanders, more or less,

from these physiological conditions. The different characters of the pulse that have been recorded, are remarkably numerous. In a dictionary, it is necessary to detail them, although many of them are not now regarded, and some are ridiculous.

PULSE, *ARDENT*, *Pulsus ardens*, (*F.*) *Pouls ardent*, *Pouls élevé*. One which seems to raise itself to a point in order to strike the finger.

PULSE, *CAPILLANT*, *Pulsus Capri'sana*, *P. der-*

caudicæans, *P. gazellæans*, *P. fuscælis*, *Goatleap pulse*, (F.) *Pouls caprisant*. One which seems to leap, as it were; an imperfect dilatation of the artery being succeeded by a fuller and a stronger one.

PULSE, COMPLEX, (F.) *Pouls combiné ou composé*, *P. compliqué*. A pulse which has the character of several critical pulses united.

PULSE, CONTRACTED, (F.) *Pouls serré*, *P. concentré*. One whose pulsations are narrow, deep, and slightly hard.

PULSE, CONVULSIVE, *Pulsus convulsivus*, (F.) *Pouls convulsif*. That which is unequally frequent or unequally hard; in short, which resembles the irregular pulsations of a muscular fibre in a state of convulsion.

PULSE, CRITICAL, *Pulsus criticus*. A pulse which, after having possessed the characters of irritation, becomes free, open, soft, &c.

PULSE, DECURVATE, *Pulsus myurus*: see, also, *Myurus*.

PULSE, DEEP, *Pulsus profundus*, (F.) *Pouls profond*. One which cannot be felt without difficulty, and without strong pressure by the finger.

PULSE, DEFICIENT, *Pulsus deficiens*, *P. Flickering*, *Pulsus anænuens et circumnuens*, (F.) *Pouls défaillant*, *P. insensible*. One which seems, every instant, about to cease.

PULSE, DEPRESSED, *Pulsus depressus*, (F.) *Pouls déprimé*. That which is deep and weak.

PULSE, DEVELOPED, (F.) *Pouls développé*. That which is broad, full, strong, and frequent.

PULSE, DICROTIC, *Pulsus Dicrotus*, *P. bicrotus*, *P. intestinalis*, *P. bifurcatus*, *P. mallearius*, *P. intercusis*, (F.) *P. dicrote*, *P. rebondissant*, *P. redoublé*. That in which the finger is struck twice at each pulsation; once lightly, the other time more strongly.

PULSE, EQUAL, *Pulsus æqualis*. That in which the pulsations resemble each other, and return at equal intervals.

PULSE, FEBRILE, *Pulsus febrilis*. One very frequent.

PULSE, FEEBLE, WEAK, *Pulsus debilis*, (F.) *Pouls faible*. One which strikes the finger feebly.

PULSE, FILIFORM, *P. thready*. One which resembles a thread slightly vibrating.

PULSE, FLICKERING, *Pulse*, deficient.

PULSE, FORMICANT, *Pulsus formicans*, (F.) *Pouls formicant*. One which resembles, by being small and scarcely perceptible, the motion of an ant.

PULSE, FREQUENT, (F.) *P. agité*, *P. précipité*. One which strikes more frequently than usual in a given time.

PULSE, FULL, *Pulsus plenus*, (F.) *Pouls plein*. One which gives the notion of great repletion in the vessel.

PULSE, GOAT-LEAP, *P. Caprisant*.

PULSE, GUTTURAL, *Pulsus gutturalis*, (F.) *Pouls guttural*. A pulse which has been supposed to indicate the termination of affections of the throat.

PULSE, HARD, *Pulsus durus*, (F.) *Pouls dur*. That in which the pulp of the finger seems to yield to the pulsation.

PULSE, HECTIC, *Pulsus heceticus*. The weak, frequent pulse observed in hectic fever.

PULSE, HEMORRHOIDAL, (F.) *Pouls des Hé-morrhoides*. A critical pulse, announcing the appearance of the hemorrhoidal flux. It is described as unequal;—the pulsations not being alike in force, and still less the intervals.

PULSE, HEPATIC, (F.) *Pouls du Foie*. A pulse imagined to indicate affections of the liver. It is not worthy of description.

PULSE, INFERIOR, (F.) *Pouls inférieur*, *P. abdominal*, *P. ventral*. One supposed to announce evacuations below the diaphragm.

PULSE, INTERCURENT, *Pulsus intercurrens* seu *intercidens*. One in which a superfluous pulsation seems to occur from time to time.

PULSE, INTERMITTENT, (F.) *Pouls intercadent*. One in which the pulsations fail from time to time.

PULSE, INTESTINAL, (F.) *Pouls des intestines*, *P. de la diarrhée*. A critical pulse, presumed to announce an evacuation by the intestines.

PULSE, INTRICATE, *Pulsus intricatus*, (F.) *Pouls embarrassé*. That which is but little developed and unequally slow.

PULSE, IRREGULAR, *Pulsus anormalis*. One whose pulsations are unequal, and return at unequal intervals.

PULSE OF IRRITATION, *Pulsus ab irritatio-næ seu nervinus seu acriticus*. One which is frequent, hard, and contracted.

PULSE, JARRING, *P. vibrating*—*p. Jerking*, *Pulse*, sharp.

PULSE, LANGUID, (F.) *Pouls languissant*. A slow and feeble pulse.

PULSE, LARGE, *Pulsus crassus*, *P. magnus*, (F.) *Pouls grand*, *P. large*. That which is large and full.

PULSE, LONG. One which strikes the finger to a great extent in length.

PULSE, LOW, *Pulsus humilis*, (F.) *Pouls bas*. One in which the pulsations are scarcely perceptible.

PULSE, NASAL, (F.) *Pouls nasal*, *P. capital*, *P. du Nez*. One supposed to announce the end of an irritation in the nasal fossæ.

PULSE, NATURAL, (F.) *Pouls naturel des adultes*, *P. parfait*, *P. des adultes*, *P. modéré*. One that is equal and regular in strength and frequency; compressible, and devoid of hardness.

PULSE, ORGANIC, (F.) *Pouls organique*. One which indicates the affected organ, or the organ by which an evacuation will take place.

PULSE, PECTORAL, (F.) *Pouls de l'expectoration*. A critical pulse, announcing the termination of some pulmonary irritation.

PULSE, QUICK. One which strikes sharply, but not forcibly, against the finger.

PULSE, REGULAR, *Pulsus normalis* aut *regularis*. One whose pulsations are equal, and succeed each other at equal intervals.

PULSE, RESISTING, (F.) *Pouls résistant*. One a little tense, a little hard.

PULSE, SHARP, (F.) *Pouls prompt*, *P. vite*, *P. vif*. One which strikes the finger sharply, rapidly. When to a greater extent, it is called a *jerking pulse*.

PULSE, SHARP-TAILED, *Pulsus myurus*: see *Myurus*.

PULSE, SIMPLE, *Pulsus simplex*. A critical pulse, indicating an evacuation by one organ only.

PULSE, SLOW, *Pulsus tardus*, *P. rarus*, (F.) *Pouls lent*, *P. tardif*, *P. rare*. One which strikes the finger slowly.

PULSE, SMALL, *Pulsus parvus*, (F.) *Pouls petit*. One whose pulsations are slender and weak.

PULSE, SOFT, *Pulsus mollis*, (F.) *Pouls mou*. One which yields under the finger.

PULSE, STOMACHAL, (F.) *Pouls stomacal*, *P. de l'estomac*. One supposed to announce an evacuation by the stomach.

PULSE, STRONG, *Pulsus fortis*, (F.) *Pouls fort*, *P. véhément*. One which strikes the finger strongly.

PULSE, SUPERIOR, *Pulsus Superior*, (F.) *Pouls supérieur*. A critical pulse, supervening on irritation of organs situate above the diaphragm.

PULSE, SUPPLE, *Pulsus elasticus*, (F.) *Pouls souple*. One in which the pulsations have strength without hardness.

PULSE OF SWEAT, *Pulsus Sudoralis*, (F.) *Pouls*

Sudoral, *P. de la sueur*. A critical pulse, indicating an approaching perspiration.

PULSE, TENSE, *P. Cordy*, *Pulsus tensus*, (F.) *Pouls tendu*, *P. roide*. One in which the artery resembles a cord fixed at its two extremities. When resembling a wire, it is called *wiry*.

PULSE, TREADY, *P. filiform*.

PULSE, TREMULOUS, *Pulsus tremulus*, (F.) *Pouls tremblant*, *P. palpitant*. One in which each pulsation oscillates.

PULSE, UN'DULATING, *Pulsus fluctuosus*, *P. fluens*, *P. incidens Solani*, (F.) *Pouls ondulant*, *P. ondoyant*. One which resembles, in its movements, those of the waves.

PULSE, UNE'QUAL, *Pulsus inæqualis*, (F.) *Pouls inégal*. One whose pulsations are not alike, or return at unequal intervals.

PULSE, U'RINAL, *Pulsus urinæ*, (F.) *Pouls de l'Urine*. A critical pulse, fancied to denote an approaching evacuation of urine.

PULSE, U'TERINE, *Pulsus uterinus*, (F.) *Pouls Uterine*, *P. de la Matrice*, *P. des Règles*. One which indicates the flow of the menses, or the occurrence of metrorrhagia.

PULSE, VENOUS, *Pulsus venarum*.

PULSE, VERMIC'ULAR. That which imitates the movement of a worm.

PULSE, VI'BRATING, *Jarring Pulse*. One in which the artery seems to vibrate like a musical string.

PULSE, WIRY, see *Pulse, tense*.

PULSELESS, *Asphyctos*, Devoid of pulsation.

PULSELESSNESS, *Asphyxia*.

PULSIFIC, *Pulsif'icus*; from *pulsus*, 'pulse.' That which causes or excites pulsation.

PULSILEGIUM, *Pulsilegium*, *Pulsimeter*, from *pulsus*, 'the pulse,' and *lego*, 'I tell.' *Sphygmometer*, *Sphygmoscopium*. Any instrument for measuring the quickness or force of the pulse.

PULSIMANTI'A; from *pulsus* and *mantia*, 'divination.' The art of predicting or prognosticating by the pulse.

PULSIMETER, *Pulsilegium*.

PULSUS, *Pulse*—*p. Acriticus*, Pulse of irritation—*p. Æqualis*, *Pulse, equal*—*p. Annuens* et *circumnuens*, *Pulse, deficient*—*p. Anormalis*, *Pulse, irregular*—*p. Bicrotus*, *Pulse, dicrotic*—*p. Biferiens*, *P. dicrotus*—*p. Caprizans*, *Pulse, caprizant*—*p. Crassus*, *Pulse, large*—*p. Debilis*, *Pulse, feeble*—*p. Deficiens*, *Pulse, deficient*—*p. Dicrotus*, *Pulse, dicrotic*—*p. Dorcadissans*, *Pulse, caprizant*—*p. Durus*, *Pulse, hard*—*p. Elasticus*, *Pulse, supplc*—*p. Fluctuosus*, *Pulse, undulating*—*p. Fluens*, *Pulse, undulating*—*p. Formicans*, *Formicant*, and *Fusile*, *formicant*—*p. Fortis*, *Pulse, strong*—*p. Fusalis*, *Pulse, caprizant*—*p. Gazellans*, *Pulse, caprizant*—*p. Heterochronicus*, see *Heterochronicus*—*p. Humilis*, *Pulse, Low*—*p. Incidens Solani*, *Pulse, undulating*—*p. Intercidens*, *Pulse, intercurrent*—*p. Mallearis*, *Pulse, dicrotic*—*p. Intercisus*, *Pulse, dicrotic*—*p. Intercurrens*, *Pulse, intercurrent*—*p. Intestinalis*, *Pulse, dicrotic*—*p. Intricatus*, *Pulse, intricate*—*p. Magnus*, *Pulse, large*—*p. Mollis*, *Pulse, soft*.

PULSUS MYR'US, *Pulse, decurtate*; *P. sharp-tailed*, (F.) *Pouls myre*. One which goes on diminishing. See *Myrus*.

PULSUS NERVINUS, *Pulse of irritation*—*p. Normalis*, *Pulse, regular*—*p. Parvus*, *Pulse, small*—*p. Plenus*, *Pulse, full*—*p. Rarus*, *Pulse, slow*.

PULSUS SERRINUS, (F.) *Pouls serrin*, *P. serratile*. One which strikes, sometimes strongly, at others feebly, and recalls the idea of a saw.

PULSUS STRIATUS, (F.) *Pouls étroit*. One that strikes the finger to a small extent in breadth.

PULSUS SUDORALIS, *Pulse of sweat*—*p. Tardus*,

Pulse, slow—*p. Urinalis*, *Pulse, urinal*—*p. Uterinus*, *Pulse, uterine*.

PULSUS VAC'UUS, (F.) *Pouls vide*. One which gives the idea of emptiness of the artery.

PULSUS VENA'RUM, *Venous Pulse*, *Phlebop'ia*. A pulsation occasionally noticed in the jugular veins. It is owing to some of the blood of the right ventricle reflowing into the right auricle, and communicating an impulse to the venous blood arriving in the auricle through the descending cava. It is often a sign of impediment to the flow of blood along the pulmonary artery.

PULTATIO, *Atheroma*.

PULTICE, *Cataplasm*.

PULTICULA, *Bouillie*.

PULVERES EFFERVESCENTES, *Powders, soda*.

PULVERIZABLE, *Pul'verable*. Capable of being reduced to powder.

PULVERIZA'TION, *Pulverisa'tio*, *Pulverisa'tio*, (F.) *Pulverisation*, from *pulsis*, 'dust;' *Coniosto'sis*. The operation of dividing substances, so as to reduce them to powder.

Most drugs are reduced to powder by persons who make it a special business, and who are called *drug-grinders*. This is done on a large scale in *drug mills*; and the implements used are the *grinding mill* and the *stamping mill*. In the shop of the apothecary, pulverization is effected by the *pestle and mortar*, and the *sieve*.

Where substances require the addition of other bodies to facilitate their reduction to powder,—as where camphor needs a few drops of alcohol—the process is called *pulverization by mediatio*.

PULVILLUS, *Pad*, *Bourdonnet*—*p. s. Linimentis confectus*, *Bourdonnet*—*p. Rotundus*, *Bourdonnet*.

PULVINAR, *Pulvina'rium*. A pillow.

PULVINAR HUMULI, see *Humulus lupulus*.

PULVINAR MEDICA'TUM seu *MEDICINA'LE*, *Seculus medicina'lis*. A medicated pillow; as of hops.

PULVINAR PARVUM, *Pad*—*p. Ventriculi*, *Pancreas*.

PULVINULUS, *Pad*.

PULVIS, *Conis*, (F.) *Poudre*. A substance, reduced into small particles by pulverization. *Simple powders* are those of a single substance; *compound*, those which result from a mixture of several different powders. An *impalpable powder* is one which is so fine that it can scarcely be felt under the finger. A compound powder was formerly called *Sp'cies*, (F.) *E'p'p'ce*.

PULVIS ABSORBENS, *P. de magnesiâ compos.*—*p. Adpersorius*, *Catapasma*—*p. Alexiterius*, *P. contrayervæ comp.*—*p. Alexiterius*, *P. ipecacanhæ compositus*—*p. Algarothi*, *Algaroth*.

PULVIS ALOES COMPOSITUS, *Compound powder of Aloes*, *Pulvis Aloës cum Guaiaco*, *P. aloëticum cum Guaiaco*. (*Aloës spicat. ext. ʒiiss, guaiac. gum. res. ʒj, pulv. cinnam. comp. ʒss*. Rub the aloes and guaiacum separately, then mix the whole. *Ph. L.*) Cathartic, stomachic, and sudorific. Dose, gr. x to ʒj.

PULVIS ALOES CUM CANELL'LA, *Pulvis aloës et canellæ*, (Ph. U. S.) *Powder of Aloes with Canella*, *Species Hiera picra, Hiera picra, Pulvis Aloëticus*. (*Aloës lbj, canell. ʒiij*. Rub separately into a powder, and mix. *Ph. U. S.*) A warm cathartic. Dose, gr. x. to ʒj.

PULVIS ALOES CUM GUAIACO, *P. A. compositus*—*p. Aloëticus*, *P. aloes cum canellâ*—*p. Aloëticus*, *Hiera picra*—*p. Aluminosus*, *P. sulphatis aluminæ compositus*—*p. Aluminis compositus*, *P. sulphatis aluminæ compositus*—*p. Aluminis kinosatus*, see *P. sulphatis aluminæ compositus*.

PULVIS DE AMA'RIS COMPOSITUS, *Pulvis antiarthriticus amarus*, (F.) *Poudre antiarthritique*

andre. (*Rad. gentian., aristoloch. rotund.*, ʒʒ p. ʒ, *flor. centaur. min.* p. 4, *fol. chamædr., chamæpitæ manipul.*—*f. pulvis, Ph. P.*) In gouty affections, dyspepsia, &c. Dose, gr. xx.

PULVIS ANGILOICUS, Algaroth—*p. Anodynus, P. ipecacuanhæ comp.*—*p. Antiacidus, P. cretæ compositus*—*p. Antiacidus, P. de magnesiâ compos.*—*p. Antiarthriticus amarus, P. de amarâ compositus*—*p. Antiarthriticus purgans, P. de sanâ, scammonæ et lignis*—*p. Antiasthmaticus, P. de sulphure et scillâ.*

PULVIS ANTYLVS'SUS, *Mead's Powder against the bite of a mad dog.* It consisted of ash-coloured hierwort in powder, with an equal quantity of black pepper; a drachm and a half of the two forming a dose for an adult.

PULVIS ANTIMONIALIS, Antimonial powder.

PULVIS DE ARO COMPOSITUS, Compound Powder of Aram, (*F.*) *Poudre de Birckmann*, (*Rad. ari. scorri veri, pimpinell. saxifrag.* ʒʒ 40 p. ocul. cæcor. ppt. 1ʒ p., *cinnam.* 7 p., *potassæ sulph.* 6 p., *ammonia muriat.* 2 p.—*f. pulv. Ph. P.*) Sternutatory.

PULVIS AROMATICUS, *P. cinnamomi compositus.*

PULVIS AS'ARI COMPOSITUS, *P. sternutato-rius, P. arrh'anus, P. opiat'is Sancti An'geli, P. cephal'icus, Cephalic snuff; Compound powder of Asarabac'ca*, (*F.*) *Poudre d'asarum composée dite sternutatoire, P. de Saint-Ange.* (*Folior. asar. Europ. p. tres., fol. origan. majoranæ, flor. lavand. epic.*, *sing. p. l.* Rub into powder. *Ph. L.*) Sternutatory.

PULVIS AURI, see Gold—*p. e. Bolo compositus cum opio, P. cretæ compositus cum opio*—*p. e. Bolo compositus sine opio*, see *P. cretæ compositus*—*p. Cambogis compositus, P. e. gummi guttâ*—*p. Capitalis Sancti Angeli, Pulvis asari compositus*—*p. Carbonatis calcis compositus, P. cretæ compositus*—*p. Cardiacus, P. contrayervæ comp.*—*p. Carthusianorum, Antimonii sulphureum rubrum*—*p. Catharticus, P. scammonæ comp.*—*p. Cephalicus, P. asari compositus.*

PULVIS CINNAMOMI COMPOSITUS, Compound Powder of Cin'namon, *Pulvis seu Species Imperato'ris, P. vitæ Imperato'ris, P. Diaro'maton, Species diacinnamo'mi, S. latifoliant'es Rhazia, Tr'aga aromati'ca, Species Diam'bræ sine odore'ris, Species aromati'ca, Pulvis aromaticus* (*Ph. U. S.*), *Aromatic powder*, (*F.*) *Poudre de canelle composée ou aromatique.* (*Cinnam.*, *singib.* ʒʒ ʒʒ, *cardam.*, *myrist.* ʒʒ ʒʒ. Rub to a fine powder. *Ph. U. S.*) Stimulant and carminative. Dose, gr. x to ʒj.

PULVIS COBBII seu TUNQUINENSIS. The famous Tonquin powder, introduced into England by a Mr. Cobb. It was composed of 16 grains of musk, and 48 grains of cinnabar; and was mixed in a gill of arrack. It was formerly regarded as a specific in hydrophobia.

PULVIS COMITIS WARWICENSIS, *P. Cornachini*—*p. Comitissæ, Cinchona.*

PULVIS CONTRAYERVÆ COMPOSITUS, *Lapis contrayervæ, Contrayeræ balls, Compound Powder of Contrayer'væ, Pulvis cardi'acus, P. alexite'rius, P. Mantua'nis.* (*Contrayerv. rad. contrit.* ʒv, *test. præp. diss.* *Mix. Ph. L.*) Stimulant and astringent. Dose, gr. xv to ʒss.

PULVIS CORNACHI'NI, *Diacetates'son Paracelsi, Earl of Warwick's Powder, Pulvis Ox'ydii Stib'ii compos'itus, Pulvis Comit'is Warwicensis, Pulvis de Tribus, Cer'berus Triceps, Pulvis Scammo'nii antimonia'lis*, (*F.*) *Poudre Cornachine.* (*Scammon. Alep.*, *potass. supertart.*, *antim. diaph.* ʒʒ p. æ. f. *pulvis. Ph. P.*) Cathartic. Used chiefly in cutaneous diseases. Dose, ʒss to ʒj.

PULVIS CORNU USTI CUM O'PIO, *Pulvis opiat'us, Powder of Burnt Hartshorn with opium*, (*F.*) *Poudre de corne brûlée avec l'opium.* (*Opii duri*

cont. ʒj, corn. ust. præp. ʒj, coccor. cont. ʒj. Mix. Ph. L.) Ten grains contain one of opium. Anodyne.

PULVIS CRETACEUS, *P. cretæ compositus.*

PULVIS CRETÆ COMPOSITUS, *P. Carbonat'is Calcis compositus, Compound Powder of chalk, P. cretæ'ceus, Species e Scorpio sine opio, Diacor'dium, Pulvis antac'idus, P. terres'tris, Species Diacre'tæ*, (with Bolo Armeniac in place of chalk—the *Pulvis e Bolo compositus sine opio*,) (*F.*) *Poudre de craie composée.* (*Cretæ ppt. diss, cinnam. cort. ʒiv, tormentill. rad., acaciæ gum.*, *sing ʒijj, pip. long. fruct. ʒiv.* Reduce separately to a fine powder, and mix. *Ph. L.*) Antacid, stomachic, absorbent. Dose, gr. xx to ʒij.

PULVIS CRETÆ COMPOSITUS CUM O'PIO, Compound Powder of Chalk with opium, *Pulvis e Cretâ compositus cum opio* (with Bolo Armeniac instead of chalk—*Pulvis e Bolo compositus cum opio*,) *Species e Scordio cum opio*, (*F.*) *Poudre de craie composée avec l'opium.* (*Pulv. cret. c. ʒvjss, opii duri cont. ʒiv. Mix. Ph. L.*) Contains one grain of opium in 40. Anodyne and absorbent. Dose, ʒj to ʒij.

PULVIS DIAPHORETICUS, *P. ipecacuanhæ comp.*—*p. Diapnoicus, P. ipecacuanhæ comp.*—*p. Diaromaton, P. cinnamomi compositus*—*p. Diasesnæ P. sennæ compos.*—*p. Diaturpethi compositus, P. jalapæ compositus.*

PULVIS DUCIS PORTLANDIÆ, *Duke of Portland's Gout Powder.* (*Rad. aristoloch., gentiannæ, summit. chamædr., centaur. min.* ʒʒ p. æ.) Dose, ʒss to ʒj.

PULVIS EMMENAGOGUS, *P. myrrhæ compositus*—*p. Epilepticus Marchionum, P. de magnesiâ compositus*—*p. Errrhinus, P. asari compositus*—*p. Galactopœus, P. de magnesiâ compos.*

PULVIS E GUMMI GUTTÂ, *P. Cambogis compos'itus, P. hydrago'gus, Camboge Powder*, (*F.*) *Poudre hydragogue ou de gomme gutte, P. de Querceta'nus.* (*Rad. jalap. 24 p., rad. mechoacan. 12 p., cinnam., rhei. ʒʒ 8 p., gum. cambog. 3. p., fol. soldanellæ sicc. 6 p., semin. anisi 12 p., fiat pulvis. Ph. P.*) A drastic cathartic. In anasarca and in worms. Dose, gr. xv to xxx.

PULVIS GUMMOSUS ALKALINUS, *Sapo vegetabilis*, (*F.*) *Poudre de savon végétal.* (*Guaiaic. pulv. 32 p., potass. carb. 4 p.* Make into a powder. *Ph. P.*) Antacid.

PULVIS EX HELMINTHOCORTO COMPOSITUS, *P. vermif'ugus absque mercurio*, (*F.*) *Poudre vermifuge sans mercure.* (*Fuc. helminthocort., sem. contra., summitat. absinth., tanacetii, fol. scordii, sennæ, rhei. ʒʒ p. æ, fiat pulvis. Ph. P.*) Dose, ʒj to ʒj.

PULVIS HYDRAGOGUS, *P. e gummi guttâ*—*p. Hydrargyri cinereus*, see *Hydrargyri oxydum cinereum*—*p. Hypnoticus, Hydrargyri sulphuretum nigrum*—*p. Imperatoris, P. cinnamomi compositus*—*p. Incisivus, P. de sulphure et scillâ*—*p. Pro infantibus, P. de magnesiâ compos.*—*p. Infantum, P. de magnesiâ compos.*—*p. Infantum antacidus, P. de magnesiâ compositus.*

PULVIS IPECACUANHÆ COMPOSITUS, *P. alexite'rius, P. anodynus, P. diaphoret'icus, P. diapno'icus, P. sudorif'icus Doveri, Compound powder of Ipecacuanha, P. Ipecacuanhæ et Opii* (*Ph. U. S.*), *Dover's Powder*, (*F.*) *Poudre de Dover ou d'ipécacuanha et d'opium, P. de Dover.* (*Ipecacuanh. pulv., opii pulv., sing ʒj, potassæ sulphat. ʒj. Mix.*) Diaphoretic. Dose, gr. v to gr. xij.

PULVIS IPECACUANHÆ ET OPII, *P. ipecacuanhæ compos.*

PULVIS JALAPÆ COMPOSITUS, *P. Diaturpethi compositus, Compound powder of Jalap, Pulvis laxans, P. Purgans, P. laxativus vegetabilis, P. laxans cum sal'e, P. Jalapæ sal'is, P. j. tartar'icus, Species Diapalapæ*, (*F.*) *Poudre de jalap*

composée. (*Puls. jalap.* ℥j, *potass. bitart.* ℥ij. Mix.) Cathartic. Dose, ℥j to ℥ij.

PULVIS JALAPÆ SALINUS, P. jalapæ compositus—p. Jalapæ tartaricus, P. jalapæ compositus—p. de Jalapæ et scammonio compositus, P. scammones comp.—p. Jamesii, Antimonial powder—p. Jesuiticus, Cinchona—p. Joannis de Vigo, Hydrargyri nitrico-oxydum.

PULVIS KINO COMPOSITUS, Compound Powder of kino, (F.) *Poudre de kino composée.* (*Kino* ℥xv, *cort. cinnam.* ℥iv, *opii duri* ℥j. Rub each to powder, and mix. *Ph. L.*) Astringent. Dose, gr. v to xx.

PULVIS LAXANS, P. jalapæ compositus—p. Laxans cum sale, P. jalapæ compositus—p. Laxativus vegetabilis, P. jalapæ compositus.

PULVIS DE MAGNĒSIÆ COMPOSITUS, P. *Galactopœus*, P. *Nutricum*, P. *Infantum*, P. *Infantum antac'idus*, P. *pro Infantibus*, P. *antiac'idus*, P. *absorbens*, P. *epilepticus Marchionum*, Compound powder of Magnesia, (F.) *Poudre absorbante et anti-acide.* (*Magnesia*, *sacchar.* æa p. æ. Mix. *Ph. P.*)

PULVIS MANTUANUS, P. *contrayervæ* comp.—p. *Marchionis*, *Marchionis Pulvis*—p. *Mercurialis cinereus*, *Hydrargyri oxidum cinereum*—p. ad *Mucum pulmonalem liberius ciendum*, P. de sulphure et scillâ.

PULVIS MYRRHÆ COMPOSITUS, P. e *Myrrhâ compositus*, Compound *Myrrh Powder*, *Pulvis ad ul'cera tend'inaum*, P. *Emmenagogus*, (F.) *Poudre Balsamique.* (*Myrrhâ*, *sabina*, *ruta*, *castor.* *Russ.* æa ℥j.) A stimulant, antispasmodic, and emmenagogue. Dose, gr. xv to xl.

PULVIS NUTRICUM, P. de magnesiâ compositus—p. *Opiatus*, P. *cornu uti cum opio*—p. *Oxydi stibii compositus*, P. *cornachini*—p. *Parturiens*, *Ergot*—p. de *Phosphate calcis et stibii compositus*, *Antimonial powder*—p. *Principis*, *Hydrargyri nitrico-oxydum*—p. *Purgans*, P. jalapæ compositus—p. *Quercetanus*, *Hydrargyri submurias*.

PULVIS QUERCUS MARINÆ, *Powder of Yellow Bladder-Wrack.* (The wrack in fruit, dried, cleaned, exposed to a red heat in a crucible, with a perforated lid, and then reduced to powder. *Ph. D.*) Virtues dependent on iodine: used, consequently, in bronchocele, &c. Dose, gr. x to xl. See *Fucus vesiculosus*.

PULVIS SCAMMONÆ COMPOSITUS, *Compound Powder of Scammony*, *Pulvis e Scammonio compositus*, *Pulvis Scammonii*, *Pulvis de Jalapæ et Scammonio compositus dictus Catharticus*, (F.) *Poudre cathartique ou Poudre de Scammonée composée.* (*Scammon.*, *ext. jalap. dur.*, *sing.* ℥ij, *singib. rad.* ℥ss. Rub separately to powder and mix. *Ph. L.*) Cathartic. Dose, gr. viij to gr. xv.

PULVIS SCAMMONII CUM ALOË, P. e *Scammonio cum Aloë*, *Scammony and Aloes Powder.* (*Scammon.* ℥vj, *ext. jalap. dur.*, *aloës Socotr.* æa ℥iiss, *sing.* ℥ss.) Cathartic. Dose, gr. x to xv.

PULVIS SCAMMONII ANTIMONIALIS, P. *cornachini*.

PULVIS SENNÆ COMPOSITUS, *Compound powder of Senna*, *Pulvis e Sennâ compositus*, P. e *Sennâ compositus*, *Pulvis Diacœnæ*, (F.) *Poudre de séné composée.* (*Sennæ folior.*, *potass. supertart.* *sing.* ℥ij, *scammon.* ℥ss, *rad. singib.* ℥ij. *Ph. L.*) Cathartic, *hydragogue.* Dose, ℥j to ℥j.

PULVIS DE SENNÂ, SCAMMONIO ET LIGNIS COMPOSITUS dictus ANTIARTHRITICUS PURGANS, (F.) *Poudre de Pérad.* (*Gum Arab.*, *potass. supertart.*, *fol. sennæ*, *china*, æa 4 p., *scammon.*, *rad. carapapar.*, *china*, *guaiac. lign.* æa 2 p., *fiat pulvis.* *Ph. P.*) Purgative. Used to obviate gout. Dose, ℥j.

PULVIS STANNI, see Tin—p. *Sternutatorius*, P. *aari compositus*—p. *Stibiatus*, *Antimonial pow-*

der—p. *Stypticus*, P. *Sulphatis aluminæ compositus*—p. *Sudorificus*, P. *ipecacuanhæ comp.*—p. *Sudorificus Doveri*, P. *Ipecacuanhæ compositus*.

PULVIS SULPHA'TIS ALU'MINÆ COMPOSITUS, P. *aluminosus*, P. *aluminis kinosatus*, *Pulvis stypticus*, *Pulvis aluminis compositus*, *Alumen kinosatum*, *Compound Alum Powder*, (F.) *Poudre styptique ou d'alum composée.* (*Sulphatis aluminæ*, p. iv, *kino*, p. i. *Ph. E.*) Astringent. In intestinal hemorrhage and diarrhœa. Dose, gr. x to xv.

PULVIS DE SULPHURĒ ET SCILLÂ, P. *Antiasthmaticus*, P. *Incis'rus*, P. *ad mucum pulmonalem liberius ciendum*, (F.) *Poudre incisive ou anti-asthmatique.* (*Sacchar. alb.* p. 3, *sulphur.* *lot. p. 2*, *scillæ. siccat.* p. j. *Ph. P.*) Dose, gr. v to ℥ss.

PULVIS DE SULPHA'TE POTAS'Æ COMPOSITUS, P. *temperans Stahl'ii*, (F.) *Poudre tempérante de Stahl.* (*Potass. sulph.*, P. *nitrat.* æa 9 p., *hydrarg. sulph. rubr.* 2 p. Mix. *Ph. P.*) As an antiphlogistic, and in acidity of the first passages. Dose, ℥j to ℥ij.

PULVIS E SULPHURE TO HYDRARGYRI NIGRO ET SCAMMONIO, dictus VERMIFUGUS MERCURIALIS, (F.) *Poudre vermifuge mercurielle.* (*Puls. cornachin.*, *hydrarg. sulphuret. nigr.* *recent. præp.*, æa p. æ. Mix. *Ph. P.*) Dose, ℥j to ℥ss.

PULVIS SYMPATHETICUS, Sympathetic powder—p. *Temperans Stahl'ii*, P. de sulphate potassæ compositus—p. *Terrestris*, P. *cretæ compositus*.

PULVIS TRAGACANTHÆ COMPOSITUS, *Species Diatrageacanthæ frigidæ*, *Pulvis e Tragacanthâ compositus*, *Compound Powder of Tragacanth*, (F.) *Poudre de gomme adragant composée.* (*Tragacanth. contus.*, *acacia gummi cont.*, *amyli.* *sing.* ℥iiss, *sacch. purif.* ℥iij. *Ph. L.*) Demulcent. In coughs, &c. Dose, ℥ss to ℥ij.

PULVIS DE TRIBUS, P. *cornachini*—p. *Tunquinenensis*, P. *Cobbii*—p. ad *Ulcera tendinum*, P. *myrrhæ compositus*—p. *Vermifugus absque mercurio*, *Pulvis ex helminthoorto comp.*—p. *Vermifugus mercurialis*, P. e sulphureto hydrargyri nigro et scammonio—p. *Vitæ Imperatoris*, P. *cinamomi compositus*.

PUMEX, *Lapis pumicis*, *Pumice*, (F.) *Pierre Ponce.* This was formerly employed as a desiccative and dentifrice.

PUMICE, *Pumex.*

PUMILIO, *Nanus.*

PUMILUS, see *Nanus.*

PUMP, BREAST, *Antlia lactes*—p. *Stomach*, *Antlia gastrica.*

PUNÂ, *Veta*, *Sorocco*, *Sorocôche*, *Marco*, (S.) A sickness common in the elevated districts of South America and elsewhere, which attacks those unaccustomed to breathe the rarefied atmosphere. It strongly resembles sea-sickness, with a most acute and depressing throbbing in the head. It does not often affect the respiration considerably.

PUNAINSE, *Cimex.*

PUNAINSIE, *Ozæna.*

PUNCH, *Rhi'sagra*, from *pungere*, 'to prick.' *Repulac'rium*, (F.) *Repousseoir.* A surgical instrument used for extracting the stumps of teeth. See *Lever*.

Also, an agreeable alcoholic drink, made of spirit, wine, sugar, lemon-juice, and water. Milk is sometimes substituted in part for the water: it then forms *Milk Punch*.

PUNCTA OSSIFICATIONIS, *Ossification*, *points of.*

PUNCTÆ MUCOSÆ, see *Acne.*

PUNCTICULA, *Petechia.*

PUNCTIO, *Paracentesis*, *Punctare*—p. *Nervi*, *Neuronygine.*

PUNCTUM, Stitob.

PUNCTUM AU'REUM, Punctura aurea. Formerly, when an intestinal hernia was reduced by an incision made through the integuments down to the upper part of the spermatic vessels, a golden wire was fixed and twisted, so as to prevent the descent of any thing down the tunica vaginalis. Hence the term.

PUNCTUM SA'LIIENS, P. sanguineum sa'liens, Globulus sanguineus, Punctus ruber sa'liens. The first moving point which makes its appearance after the fecundation of the germ. It has been generally, but erroneously, applied to the heart of the embryo.

PUNCTURA, Paracentesis — p. Aurea, Punctum aureum.

PUNCTURE, Punctu'ra, Punctio, Cente'ris, Paracente'ris, Nyxis, from pungere, 'to prick; Trevis Punctura, (F.) Piqure. A wound made by a pointed instrument, as a sword, bayonet, needle, thorn, &c. A puncture is, generally, of trifling consequence; but, sometimes, it becomes important from the parts implicated, and the after consequences.

PUNCT'URING. Same etymon. *Compunctio, Paracente'ris, (F.) Ponction.* The operation of opening, by means of a trocar, lancet, &c., any natural or accidental cavity, with the view of evacuating any fluid, effused or accumulated therein. *Paracente'ris* is a sort of puncturing.

PUNCTUS RUBER SALIENS, Punctum saliens.

PUNGENT, (F.) Pongitif. Pain is said to be pungent, when it seems as if a pointed instrument were forced into the suffering part.

PUNICA GRANATUM. The *Pomegranate, Rhoea, Rhoea, Granatum, Malograna'tum, (F.) Grenadier; Family, Myrtilidæ. Sex. Syst. Icosandria Monogynia.* The rind of the fruit, called *Malico'rium, Malacorium, or Malcorium;* and the flowers—called *Balaustine flowers*—are used in medicine. They have been employed both internally and externally as astringents. The seeds are called *Cocco'nes, coxvus.* The portion, however, of the plant, that has attained most celebrity, is the bark of the root, *Grana'ti Rad'cis Cortex,* which appears to be very efficacious in tænia. It is given in decoction, (*Grana't. rad. cort. ℥ij; Aquæ Oij, boiled to Oiss.*) Dose, f℥ij, every half hour. Three or four doses are usually sufficient to expel the worm.

The bark contains a peculiar matter called *Grenadin.*

PUNK, Boletus ignarius.

PUOGENIA, Pyogenia.

PUPIL, Pupilla, Pu'pula, Pupillio, Vis'io, Opis, Corè, Ora, Rhox, Fenes'tra seu Nigrum seu For'a'men Ocu'li, Prunel'la, Lumen; Glens, Sight of the eye, (F.) Pupille, Prunelle. The aperture of the iris, through which the rays of light pass that have to impress the image of an object on the retina. This aperture can be dilated or contracted so as to allow a greater or smaller quantity of luminous rays to penetrate. The pupil, in man, is round, and by it the anterior and posterior chambers of the eye communicate with each other. In the fœtus, during the first six months of gestation, it is closed by the pupillary membrane.

PUPIL, CLOSURE OF THE, Synezisis.

PUPIL, PINHOLE. A condition of the pupil in typhus, in which it is so contracted as to resemble a pinhole. It indicates a dangerous form of brain affection.

PUPILLÆ VELUM, Pupillary membrane.

PUPILLARIS HERBA, Lapsana.

PUP'ILLARY, Pupilla'ria. That which belongs to the pupil.

PUPILLARY MEMBRANE, Membrana Pupilla'ria, Pupillæ velum, Membrana Wachendorfs'iana. The central aperture of the iris is closed, in the fœtus, during a certain period of gestation, by a very thin membrane. It disappears in the seventh month.

PUPPET ROOT, Veratrum viride.

PUPPIS OS, Frontal bone.

PUPULA, Pupil.

PU'PULÆ, A'pices digito'rum. The pulps or extremities of the fingers.

PURBLIND, Myopia.

PURBLINDNESS, Myopia.

PURGAMENT, Purgative.

PURGAMENTA, Excrement — p. Alba, Leucorrhœa—p. Infantis, Meconium — p. Puerperii, Lochia—p. Uteri, Lochia.

PURGANS MEDICAMENTUM, Cathartic.

PURGATIO, Catharsis — p. Alvi, Catharsis—p. Muliebris alba, Leucorrhœa — p. Puerperii, Lochia.

PURGATION, Catharsis.

PURGATIONES, Menses — p. Menstrue, Menses.

PURGATIONS, Menes.

PUR'GATIVE, Purgati'vus, Purgans, Moch'licus, Catoret'icus, Catoret'icus, Cathar'tic, Purgament, Purge, (F.) Purgatif, from purgare, 'to cleanse. A medicine which operates more powerfully on the bowels than a laxative, stimulating the muscular coat, and exciting increased secretion from the mucous coat.

PURGE, Purgative—p. Root, Euphorbia corollata.

PURGING, Diarrhœa.

PURIF'ICANS, Purif'icus, from purificare, 'to make pure or clean.' Purifying: hence:—**PURIFICANTIA; Medicines that cleanse or purify the blood.**

PURIFICUS, Purificans.

PURIFORM, Puriform'us; from pus, and forma. Having the appearance of pus.

PURL. A medicated malt liquor, in which wormwood and aromatics are infused.

PURO-HEPATITIS, see Hepatitis.

PURO-MUCOUS, Puro-muco'sus, from pus, puris, and mucus. Having the character or appearance of pus and mucus.

PURPLES, Purpura hæmorrhagica.

PUR'PURA, Por'phyra, 'a purple colour.' This word has been employed in many senses. It generally means, livid spots on the skin from extravasated blood, with languor and loss of muscular strength, pains in the limbs.—(F.) *Pourpre.*

In **PURPURA SIMPLEX, Porphyra simplex, Petechia sinè febrè, Pelio'sis, Phænig'mus Petechia'lis, Profu'sio subcuta'nea, Pete'chial Scurvy,** the spots are numerous, but small and flea-bite-shaped; chiefly on the breast, arms, and legs; with paleness of countenance. At times, the affection is accompanied by severe pains in the extremities, constituting *Pelio'sis rheumat'ica.*

In **PURPURA HÆMORRHAG'ICA, Porphyra hæmorrhagica, Stomac'oce universalis, Hæmorrhagia universalis, Petechiano'sis, Morbus maculosus hæmorrhag'icus Werlhof'ii, Pelio'sis hæmorrhag'ica, Scorbu'tus, Scorbu'tus, Hæmorrhœ'a petechia'lis, Hamatospil'ia, Land Scurvy, Purple, (F.) Scorbut, S. de Terre, Maladie de Werlhof, Hémacélinose, Peliose hæmorrhagique**—the spots are circular, and of different sizes; often in stripes or patches, irregularly scattered over the thighs, arms, and trunk; with occasional hæmorrhage from the mouth, nostrils, or viscera, and great debility and depression of spirits.

In **PURPURA NAU'TICA, Porphyra nautica, Scorbu'tus, Pechy'tyrbè, Gingibra'cium, Gingipe-**

dium, Scelotyr'bz, Stomac'aet, Scorbutus nau'ticus or Sea scurvy, (F.) Scorbut, there are spots of different hues, intermixed with the livid, principally at the roots of the hair; the teeth are loose; the gums are spongy and bleeding; the breath is fetid, and the debility universal and extreme. This occurs chiefly at sea, after exposure to a moist, cold, foul atmosphere; with long use of one kind of food and of stagnant water.

All these varieties of purpura resemble each other considerably. In the first two, however, there seems, at times, to be some excitement, which has led to the employment of purgatives, and even of bleeding, with advantage. They are dependent upon a peculiar diathesis, which has been termed *Scorbu'tic Cachex'ia, Lues Scorbu'tica, and Cacoehym'ia Scorbu'tica*. Generally speaking, the use of the mineral acids will be indicated; and, in sea scurvy, vegetable acids must be regarded as the best antiscorbutics. Nitre is, also, a good antiscorbutic, and in cases of great prostration it may be united with Peruvian bark or turpentine. Tamarinds and cream of tartar, made into drink, are also serviceable. But the great remedy is change from low to cheerful spirits; from filth to cleanliness; and from a cold and damp, to a temperate and dry climate, with change of food, and especially the use of green vegetables.

The general principles of management are the same in sea, as in land scurvy.

PURPURA, Scarlatina—p. Alba benigna et maligna, Miliary fever—p. Maligna, Petechiæ—p. Miliaris, Miliary fever—p. Puerperarum, Miliary fever—p. Urticata, Urticaria.

PURPURIC URINE, see Porphyria.

PURPURINE, see Porphyria.

PURPURISSUM, Hydrargyri sulphuretum rubrum.

PURRING TREMOR, Frémissement cataire.

PURSE, Scrotum—p. Shepherd's, Thlaspi bursa.

PUR'SINESS, Dyspnœa pinguedinœsa, (F.) Pousee. Dyspnœa accompanied with oppressive fatness. The word is, also, applied to dyspnœa of every kind. One so affected is said to be *purey* or *short-winded*.

PURSLAIN, Portulaca—p. Milk, Euphorbia corollata—p. Speedwell, Veronica peregrina—p. Water, Veronica beccabunga.

PURSY, see Puriness.

PURULENCE, Pus, Suppuration.

PURULENCY, Pus, Suppuration.

PURULENT, Purulen'tus, Em'pyos, Pyo'des, Py'icus. That which has the character of pus or consists of pus; as *purulent matter, a purulent collection, &c.*

PURULENT DEPOSIT, Pus.

PURULENTIA, Suppuration.

PURVAIN, Verbena officinalis.

PUS, Humor purulen'tus, Pyon, Pyono'ma, Matter, Pu'rulent depo'sit, Pu'rulence, Pu'rulency. A secretion from inflamed textures, and especially from the areolar membrane. It is, almost always, of the same nature, whatever may be the part it proceeds from. Pus of a good quality, — *laudable pus, Pus bonum seu laudab'ile seu nutritivum seu verum, (F.) Pus laudable,* — is of a yellowish-white colour, opaque, inodorous, and of a creamy appearance. Heat, acids, and alcohol coagulate it. When analyzed by Schwilgué, it afforded albumen and water, a particular extractive substance, and a small quantity of soda, phosphate of lime, and other salts. Normal pus consists essentially of two distinct parts, *pus corpuscles* or *pus globules*, and a colourless, aqueous fluid, *liquor puris*, in which the corpuscles are suspended. A variety

of the pus corpuscles is described by M. Lebert under the name *pyoid*.

PUS BONUM, see Pus—p. Corpuscles, see Pus—p. Corrosivum, Sanies—p. Globules, see Pus—p. Laudabile, see Pus—p. *Louable*, see Pus—p. Malignum, Ichor—p. Malignum, Sanies—p. Nutritivum, see Pus—p. Verum, see Pus.

PUSILLA'TUM, Pusula'tum, from *pusillus*, 'small.' A coarse powder.

PUSILLUS, Nanus.

PUSTULA, Pustule—p. Ardens, Eczema—p. Oris, Aphthæ—p. Gangrenosa, see Anthrax—p. Livida Esthoniae, see Anthrax.

PUSTULÆ SICCÆ, Lichen.

PUSTULAR, Pustulous, Pustula'ris, Pustulo'sus. Of or belonging to pustules. Affected with pustules.

PUSTULA'TION, Pustula'tio, from *pustula*, 'a pustule.' The formation of pustules.

PUSTULE, Pus'tula, from *pus, Ecpyr'is, Ecthy'ma, Benath, Bubè, Epanas'tasia*. An elevation of the cuticle, with an inflamed base, containing pus. Willan and Bateman reckon four varieties of pustules: *Phlysa'cium, Podyra'cium, Achor*, and *Favus*. The variolous pustule is often called, by the French, *Grain*; by us, *Pock*.

PUSTULE MALIGNÆ, see Anthrax.

PUSTULOUS, Pustular.

PUSTULATUM, Pusillatum.

PUTIUM, Prepuce.

PUTREDO, Hospital Gangrene, Putrefaction.

PUTREFACT'ION, Putrefac'tio, Putrescen'tia, Sepsis, Sap'rotis, Putrid fermentation, Putrefac'tive fermentation, from *putris, putre*, 'rotten,' and *facere*, 'to make.' A decomposition, experienced by animal substances, when deprived of life, and placed under particular circumstances. The presence of water is indispensable. The temperature most favourable to it, is from 60° to 90° of Fahrenheit. The most common products of putrefaction are, water, carbonic acid, acetic acid, ammonia, carburetted hydrogen, and a semi-putrid substance, which is volatilized, and has an infected odour. It has been supposed that something like putrefaction may occur in the living body, as in case of putrid fever. To this condition, Piorry has given the name *Typhœmia*, conceiving it to be owing to alteration of the blood by putrid animal matters. *Putrefactio* signifies the state of becoming putrid: whilst *Putridity, Putre'do, Putrid'itas, Pu'tridness, (F.) Pourriture*, is the state of rottenness.

PUTRESCENT, Hyposaprus—p. *Poison, see Poison.*

PUTRESCENTIA, Putrefaction—p. Uteri gravidi, Hystero-malacia.

PUTRID, Pu'tridus, Sapro's, (F.) Putride, from *putrere*, 'to rot.' An epithet for some affections, in which the matters excreted and the transpiration itself exhale a smell of putridity. It is particularly applied to typhus.

PUTRIDITAS, see Putrefaction.

PUTRIDITY, see Putrefaction.

PUTRILA'GO, Puttor, (F.) Putrilage. Same etymon. The putrescent matter or *elough*, which forms in certain gangrenous and other ulcers, and is thrown off.

PUTROR, Putrilage.

PUTZCHILL, see Myroxylon Peruvianum.

PYÆ'MIA, Pyohæmia.

PYARTH'RUM, from *pus*, 'pus,' and *arthron*, 'joint.' A suppurated joint.

PYCNANTHEMUM INCA'NUM, Cosmo's Mountain Mint, Wild Basil. An indigenous plant of the mint family—*Labiata*—which flowers in August. It has the aromatic properties of the mints.

PYCNAN'THEMUM LINIPOLIUM, *Virginia Thyme*, has like virtues.

PYCNICMASTICA, *Incrassantia*.

PYCNOSIS, *Inspissatio*.

PYCNOTICA, *Incrassantia*.

PYEC'CHYSIS, from *πυον*, 'pus,' and *εχχυσις*, 'effusion.' An effusion of pus.

PYELI'TIS, from *πυελος*, 'pelvis,' and *ιτις*, denoting inflammation. Inflammation of the pelvis and calices of the kidney.

PYELOMETER, Pelvimeter.

PYELONEPHRI'TIS, from *πυελος*, 'pelvis,' *νεφρος*, 'kidney,' and *ιτις*, denoting inflammation. Inflammation of the kidney, and of the pelvis and calices.

PYELOS, Pelvis.

PYEMESIS, *Pyoemesis*.

PYESIS, Suppuration.

PYETIA, Colostrum.

PYGE, Nates.

PYGMÆUS, *Pygmy*.

PYGME, Fist, Forearm.

PYGMÆE, *Pygmy*.

PYGMY, *Pigmy*, *Pygmaeus*, (F.) *Pygmée*, from *πυγμα*, 'the fist; as big as the fist.' A dwarf. The Pygmæi were a fabulous nation of dwarfs in the extreme parts of India; or, according to others, in Ethiopia.

PYODID'YMUS, *Didymus symphyoperinaeus*, *Pygopages*, from *πυγι*, 'the nates,' and *διδυμος*, 'a twin.' A monstrosity, in which twins are united by the sacrum and coccyx.

PYGOPAGES, *Pygodidymus*.

PYICUS, Purulent.

PYLE, Porta.

PYLEMPHRAX'IS, from *πυλη*, 'porta,' 'a gate,' and *εμπραξις*, 'obstruction.' Obstruction of the vena portæ.

PYLOR'IC, *Pyloricus*. Same etymon as pylorus. That which relates to the pylorus. An epithet given to different parts.

PYLORIC ARTERY, *Arteria Coronaria dextra*, (F.) *Petite artère gastrique droite*, arises from the hepatic, and is distributed to the pylorus and to the lesser curvature of the stomach, anastomosing, particularly, with the A. coronaria ventriculi and A. gastro-epiploica dextra.

PYLORIC VEIN follows the same distribution as the artery.

PYLORUS, *Janitor*, *Portonarium*, from *πυλη*, 'a gate,' and *ουπος*, 'a guardian.' *Ortium ventriculi duodena'lis seu pyloricum seu dextrum seu inferius*, *Orifice'ium dextrum seu inferius seu Egrediens seu Os inferius seu Annulus seu Sphincter ventriculi*, *Ortia'rius*, *Hostia'rius*, (F.) *Pylor*. The lower or right orifice of the stomach—*Orifice intestinal* (Ch.)—is called *Pylorus*, because it closes the entrance into the intestinal canal, and is furnished with a circular, flattened, fibro-mucous ring, which occasions the total closure of the stomach during digestion in that organ. This ring has been called the *Valve of the Pylorus*, *Sphincter Pylo'ri*, *Pylo'rus propriè sic dictus*, (F.) *Valvula du pylor*. It is a fold of the mucous and muscular membranes of the stomach; and is the *Pyloric muscle* of some authors.

PYOBLENNICUS, Muopurulent.

PYOBLENNORRHŒ'A, from *πυον*, 'pus,' *βλεννα*, 'mucus,' and *ρευ*, 'I flow.' A discharge of puriform mucus.

PYOCENO'SIS, from *πυον*, 'pus,' and *κενωσις*, 'evacuation.' Evacuation of pus.

PYOCHEZ'IA, *Diarrhœa purulenta*, from *πυον*, 'pus,' and *χεω*, 'I go to stool.' Discharge of pus by stool. Purulent diarrhœa.

PYOCŒ'LLA, *Ascites purulenta*, from *πυον*,

'pus, and *κοιλια*, 'the belly.' Pus in the abdominal cavity.

PYOCYSTIS, *Vomica*.

PYODES, Purulent.

PYŒDE'MA, from *πυον*, 'pus,' and *οιδημα*, 'swelling.' Tumefaction of the surface owing to effusion of pus.

PYOËM'ESIS, *Pyemesis*, *Vomitus purulentus*, from *πυον*, 'pus,' and *εμεσις*, 'the act of vomiting.' Vomiting of pus.

PYOGENESIS, *Pyogenia*.

PYOGEN'IA, *Pyogenia*, *Pyogenesis*, *Pyopogesis*, from *πυον*, 'pus,' and *γενεσις*, 'generation.' Generation of pus. The theory or mechanism of the formation of pus. Some have believed that pus is formed by the arterial system, and is deposited, by way of excretion, in the inflamed parts; others, that it is formed by the destruction of solid parts. These opinions are, however, inadmissible; and pus is now regarded as mainly the product of a particular secretion in the diseased part.

PYOGENIA CORROSIVA, Ulceration—p. Simplex, Suppuration.

PYOGEN'IC, *Pyogenicus*. Same etymon. Having relation to the formation of pus.

PYOHÆ'MIA, *Pyæmia*, from *πυον*, 'pus,' and *αιμα*, 'blood.' Alteration of the blood by pus.

PYOID CORPUSCLES or GLOBULES, see Pus.

PYOME'TRA, *P. purulenta*, from *πυον*, 'pus,' and *μητρα*, 'womb.' A collection of pus in the uterus.

PYOMETRA PURULENTA, *Pyometra*.

PYON, Pus.

PYONÉPHRITE, see Nephritis.

PYONOMA, Pus.

PYOÔTORRHŒA, Otorrhœa.

PYOPERICAR'DIA, *Pyopericardium*, from *πυον*, 'pus,' *καρι*, 'about,' and *καρδια*, 'the heart.' A collection of pus in the pericardium.

PYOPHTHALMIA, Hypopyon—p. Neonatorum, see Ophthalmia (purulenta infantum).

PYOPLEURITE, Empyema.

PYOPOËSIS, *Pyogenia*.

PYOP'TYSIS, from *πυον*, 'pus,' and *πυω*, 'I spit.' Spitting of pus.

PYORRHAG'IA, from *πυον*, 'pus,' and *ρρηγις*, 'violent rupture.' A sudden discharge of a large collection of matter.

PYORRHŒA, from *πυον*, 'pus,' and *ρευ*, 'I flow.' A discharge of pus.

PYORRHŒA ALVINA, *Pyochezia*—p. Aurium, Otorrhœa—p. Nasalis, Ozena—p. Palpebræ, Blepharopyorrhœa—p. Urinalis, Pyuria—p. Vitarum lacrymalium, Dacryopyorrhœa.

PYOSIS, Hypopyon, Pterygion, Suppuration—p. Pectoris, Empyema.

PYOTHORAX VERUS, Empyema.

PYOTORRHŒE, Otorrhœa.

PYOTURIA, Pyuria.

PYR, Fever.

PYRA, Anthrax—p. Crustamina, Crustaminatum—p. Crustumerina, Crustaminatum.

PYR'AMID, *Pyramis*, *Eminentia pyramidalis tympani*, from *πυρ*, 'flame,' which has a conical appearance. (?) A small bony projection in the cavity of the tympanum, which is excavated, to lodge the muscle of the stapes. Also, the *Centre-pin* of the trephine. Also, a small, obtusely pointed eminence of the inferior vermiform process of the cerebellum.

PYRAMID, see Calumna—p. of Malacarne, Vermiform process, inferior.

PYRAMIDAL DE L'ABDOMEN, Pyramidalis abdominis—*p. de la Cuisse*, Pyramidalis—*p. du Nez*, Pyramidalis nasi—*p. Stapédien*, Stapedius.

PYRAMIDALE, (OS), Cuneiform, (bone.)

PYRAMIDA'LIS ABDOM'INIS, *Musculus Fallopii vel succenturiatus vel auxiliiarius*, (F.) *Pubio-ombilical*, *Pubio-sous-umbilical*, (Ch.) *Pyramidal de l'abdomen*. A small, fleshy, pyramidal fasciculus, whose existence is not constant; and which is inserted, by its base, into the upper part of the pubis, and terminates, by its summit, at the inferior part of the linea alba. When it contracts, it stretches the linea alba.

PYRAMIDA'LIS, P. Fem'oris, Ili'acus exter'nus, *Pyriiformis*, *Piriiformis*, *Primus et superior quadrigen'inus*, (F.) *Sacro-trochantérien* (Ch.), *Pyramidal de la cuisse*. A flat, triangular muscle, situate at the posterior part of the pelvis. By its base, it is attached to the anterior surface of the os ilium; to the corresponding surface of the great sacro-sciatic ligament and to the posterior part of the ilium. It terminates by a tendon, which is attached to the inner surface of the great trochanter. This muscle is a rotator of the thigh outwards, or of the pelvis in an opposite direction.

PYRAMIDALIS FEMORIS, Pyramidalis.

PYRAMIDA'LIS NASI, *Proc'erus nasi*, *Nasum dilatans*, (F.) *Fronto-nasal* (Ch.), *Pyramidal du nez*. A thin, triangular muscle, which has its summit upwards. Above, it is continuous with the occipito-frontalis. It descends vertically before the root of the nose, on which it terminates; becoming confounded with the transversalis. This muscle wrinkles the skin of the root of the nose transversely, and stretches that which covers the tip.

PYRAMIDES, Corpora pyramidalia.

PYRAMIDES ANTÉRIEURES, Corpora pyramidalia—*p. Ferreini*, Ferrein, pyramids of—*p. Malpighiana*, Papillæ of the kidney—*p. Postérieures du cerveau*, Corpora restiformia.

PYRAMIDS OF MALPIGHI, Papillæ of the kidney—*p. Posterior*, Corpora restiformia—*p. of Wistar*, Sphenoidal cornua.

PYRAMIS, Penis, Pyramid—*p. Cochleæ*, Modiolus—*p. Trigona*, see Temporal bone.

PYRCÆA, Incendium.

PYREC'TICA, 'febrile;' from *πυρετος*, 'fever.'

Fevers: the first order in the class *Hæmatica* of Good.

PYRENOIDES, Odontoid.

PYRËTHRE, Anthemis pyrethrum.

PYRETHRUM, Anthemis pyrethrum, Urtica—*p. Parthenium*, *Matricaria parthenium*—*p. Sylvestre*, *Achillea ptarmica*.

PYRETICO'SIS, from *πυρ*, 'fire,' *πυρετος*, 'fever;' *Morbis febrilis*. A febrile affection.

PYRETICUS, Febrifuge.

PYRETOGRAPH'IA, from *πυρετος*, 'fever,' and *γραφη*, 'a description.' A description of fever.

PYRETOL'OGY, *Pyretolog'ia*, from *πυρετος*, 'fever,' and *λογος*, 'a discourse.' *Pyretology*. A treatise on fevers. A title sometimes given to a monograph on fever.

PYRETOS, Fever.

PYRETOTYPOSIS, Intermittent.

PYREX'IA, *Pyrex'is*. Same etymon as the next. Fever. The febrile condition. Also, a paroxysm of fever—*Paroxyismus febrilis*.

PYREX'IÆ, from *πυρ*, 'fire.' *Febrile diseases*. The first class of Cullen's Nosology.

PYRI MARTIALES, Ferrum tartarizatum.

PYRIA, Fomentation, Vaporarium.

PYRIATERIUM, Vaporarium.

PYRICAUSTUM, Burn.

PYRIFORMIS, Pyramidalis.

PYRIPH'LEGES, *πυριφλεγης*, from *πυρ*, 'fire,' and *φλεγω*, 'I burn.' One who has a burning fever.

PYRITES, IRON, *Ferri sulphuretum*.

PYRMONT, MINERAL WATERS OF. A celebrated mineral spring, on the Weser, in Westphalia, four leagues from Hamlet. The waters are tonic, and contain chlorides of sodium and magnesium, sulphates of soda and magnesia, and carbonates of iron, lime, and magnesia dissolved in carbonic acid, with some resinous principles. It is a highly carbonated chalybeate.

ARTIFIC'IAL PYRMONT WATER may be formed of *Epsom salt*, gr. xv; *common salt*, gr. v; *magnesia*, gr. x; *iron filings*, gr. v; *water*, Oij. Impregnated with the gas from *marble-powder* and *sulphuric acid*, ℞ Zvij.

PYRGENUS, *Spiritus rectificatus*.

PYR'OLA, *P. rotundifolia*, *Round-leaved Wintergreen*. Order, *Pyrolaceæ*. This plant was once used as a gentle astringent and tonic.

PYR'OLA MACULA'TA, *Spotted Pipsissewa*, *Spotted Wintergreen*, *Whitelens*, *White Pipsissewa*, *King cure*, *Ground holly*, *Rheumatism weed*, &c., has similar properties.

PYROLA UMBELLA'TA, *Chimaph'ila* vel *Chimaph'ila umbella'ta*, *C. Corymb'osa*, *Ground-holly*, *Pipsissewa*, *Wintergreen*, *Rheumatism weed*, *Herb a piquer* (Canada). This common American plant is allied to the *uva ursi*, in botanical as well as medical qualities. It is tonic and diuretic. The bruised leaves irritate the skin. From the decoction or infusion an agreeable beverage may be formed by adding sugar, ginger to flavour it, and yeast to produce fermentation. Under the name *Pipsissewa Beer* it has been used in scurfy affections.

PYROLEUM OSSUM RECTIFICATUM, *Oleum animale Dippelii*.

PYROLIG'NEOUS ACID, *Ac'idum pyroaceticum*, *A. pyroligno'um* seu *pyroxylicum*, *A. ligni pyro-ole'um*, *A. acet'icum empyreumaticum*, *A. lign'neum*, *Pyrolig'nic acid*, (F.) *Acide pyroligneux*, *Vinaigre de bois*. An acid, obtained by distillation, from wood, coal, &c., which was once believed to be of a peculiar character. It is now known to be formed of acetic acid and an empyreumatic oil, from which it may be freed; and, in this state, is sold in commerce for *Acetum distillatum*. It is used for similar purposes as distilled vinegar, and for preserving animal substances. It has also been used as an antiseptic in gangrene and sphacelus, and to foul ulcers; wherever indeed creasote is indicated.—The dose of the impure pyroligneous acid internally is from five to thirty drops, three or four times a day.

PYROMA'NIA, *Incen'diary monoma'nia*, from *πυρ*, 'fire,' and *μανια*. Insanity, with an irresistible desire to destroy by fire.

PYROPH'AGUS, *Igniv'orus*, from *πυρ*, 'fire,' and *φαγω*, 'I eat.' One who eats fire. A juggler, who eats bodies in a state of ignition.

PYROS, Triticum.

PYROSIS, from *πυρ*, 'fire,' 'the act of burning.' *Pyralis'mus pyros'icus*, *Limo'sis cardi'gia sputato'ria*, *Ardor stom'achi*, *A. ventric'uli*, *Cardi'algia sputatoria*, *Pyrosis Succ'icu*, *Apocren'itis vomitus pyrosis*, *Dyspepsia pyrosis*, *Crismus'emia*, *Ebullit'io stom'achi*, *Orex'is* (of some), *Waterbrash*, *Waterqualm*, *Black-water*, (F.) *Ardor de l'estomac*, *Fer chaud*, *Crémason*, *Sodes*, *Gor-gonnet*. This affection consists of a hot acrid secretion in the stomach, with eructations of an acrid burning liquid, that causes a distressing sensation.

tion in the parts over which it passes. Attention to diet, and the use of bitter absorbents, will usually relieve, when the disease is functional. Occasionally, it is symptomatic of organic disease of the stomach.

Pyrosis also signified, of old, inflammation, gangrene, and a burn.

PYROSIS SUECICA, Pyrosis.

PYROSOPHIA, Chymistry.

PYROTECHNIA, Chymistry.

PYROTECHNY, *Pyrotech'nè*, from *pyr*, 'fire,' and *τεχνη*, 'art.' Art of making fire-works, &c. Also, chymistry. M. Percy has used the term *Pyrotechnie Chirurgicale* for the art of applying fire or the actual cautery in surgery.

PYROTHONIDE, from *pyr*, 'fire,' and *θωνη*, 'linen.' *Liquor pyro-oleo'sus e lin'teo para'tus*. A kind of pyrogenous or empyreumatic oil, produced by the combustion of textures of hemp, linen, or cotton in a copper vessel. The brown product is acid. Its medical properties probably resemble those of creasote. Diluted with three or four times its weight of water, it has been used as a gargle in cynanche tonsillaris, but is not now employed.

It is said, also, to be a popular remedy for toothach and skin diseases. When prepared from rags, it is called *Rag oil*; when from paper, *Paper oil*.

PYROTICUS, Caustic.

PYRUS CYDO'NIA, *Cydo'nia malifor'mis* seu *vulgar'ris*, *Sorbus Cydo'nia*, *Cydo'nia*, *Coto'nia*, *Quince Tree*, (F.) *Coignasier*. Family, Rosaceæ. *Sex. Syst.* Icosandria Pentagynia. The fruit is termed *Cydo'nium malum*, *Malum canum*, *Malum coto'neum*, *Melum cydo'nium*, *Quince*, (F.) *Coign*.

Quince-seeds—*Cydo'nium* (Ph. U. S. 1851)—are sometimes used in decoction as a demulcent. The fruit makes a pleasant preserve.

PYRUS DOMESTICA, *Sorbus domestica*.

PYRUS MALUS, *Malus*, *M. dasyphy'lla* seu *commu'nis* seu *sylves'tris*, *Sorbus malus*, *Melea*, the *Apple Tree*, (F.) *Pommier*. The apple—(F.) *Pomme*—is an agreeable fruit when ripe. When unripe, it disagrees, especially with those of weak digestive powers. The same may be said of the pear, (F.) *Poire*; the fruit of the *Pyrus commu'nis*, *Apios*, *P. Sorbus*, *P. Sati'va*, (F.) *Poirier*.

Apple Brandy is a spirituous liquor obtained from the juice of the apple, and much used in the United States.

PYTIA, Colostrum.

PYTISMA, Sputum, Sperm.

PYUL'CON, from *pyov*, 'pus,' and 'ελκω,' 'I extract.' (F.) *Tire-pus*. A surgical instrument for extracting pus from any cavity. Many pyulca have been employed, all of which act as exhausting syringes.

PYU'RIA, *Pyotu'ria*, *Pyorrhœ'aurinalis*, from *pyov*, 'pus,' and *ουρον*, 'urine.' Discharge of purulent urine: a symptom which occurs in many diseases; particularly in cases of renal calculi, and in organic affections of the bladder. It receives various epithets, according to the part whence the pus proceeds:—as *Pyuria urethra'lis*, *P. rena'lis*, and *P. vesica'lis*.

PYURIA CHYLOSA, Chyluria — p. Lactea, Chyluria — p. Mucosa, Cystirrhœa — p. Serosa, Cystirrhœa — p. Viacida, Cystirrhœa.

PYXIS, *πυξίς*. A box; a pill-box. Also, an emollient ointment.—Aëtius, and Paulus.

PYXIS, *Boîte*, see Cotyloid.

Q.

Q., see Abbreviation.

QUABEBE, Piper cubeba.

QUACK, Charlatan.

QUACK-MEDICINE, Arcanum.

QUACKSALVER, Charlatan.

QUADRANS, *Quarta pars libræ*. A quarter of a pound. Three ounces (Troy).

QUADRANTAL, Amphora.

QUADRATUS, *Depressor labii inferioris* — q. Dorsi, Q. lumborum.

QUADRATUS FEM'ORIS, *Quadratus*, from *quadra*, 'a square.' *Quartus quadrigem'inus quadratus*, (F.) *Tuber-ischio-trochanterien* (Ch.), *Ischio-sous-trochanterien*, *Carré de la Cuisse*. A muscle situate at the posterior and upper part of the thigh. It is thin, flat, and quadrilateral, and is attached to the outer part of the tuberosity of the ischium; whence it proceeds transversely to the inferior part of the posterior margin of the great trochanter. It rotates the limb, turning the toe outwards.

QUADRATUS GENÆ, *Platysma myoides*—q. Radii, *Pronator radii quadratus*.

QUADRATUS LUMBO'RUM, *Quadratus* seu *Lumbaris externus*, *Flectens par lumborum*, *Quadratus dorsi*, (F.) *Ilio-costal*, (Ch.) *Ilio-lombi-costal*, *Carré des lombes*. A flat, somewhat thick, irregularly quadrilateral muscle, situate in the loins, at the sides of the vertebral column. It is attached, below, to the crista ili and ilio-lumbar ligament; and above, to the inferior margin of the last rib; and besides, to the base of the trans-

verse processes of the last four lumbar vertebræ. This muscle inclines the loins to its side; depresses the last rib, and is thus a muscle of respiration. It can also raise the hip.

QUADRIGEM'INA TUBER'CVLA, *Eminencia' Quadrigem'inæ* seu *Bigem'inæ*, *Optic Lobes*, *Optic Ganglia*, *Pons Syl'vii*, *Cor'pora quadrigem'inæ*, *Nates et Testes*, *Cor'pora bigem'inæ*, (F.) *Tubercles quadrijumeaux*, *Eminences bigem'inites*. Four medullary tubercles, situate at the posterior surface of the tuber annulare. They are white, externally; gray, internally; oblong; rounded; connected by pairs, and separated by two grooves, which divide them crucially. Of these tubercles—the superior, called *nates*, *Tuber'cula anterio'ra*, *Glu'tia*, are larger and more prominent than the lower, called *testes*, *Tuber'cula posterio'ra*. The pineal gland corresponds exactly to the point of intersection of the two furrows that separate them.

QUADRIGEMINUS PRIMUS ET SUPERIOR, *Pyramidalis*—q. *Quadratus quartus*, *Quadratus femoris*—q. *Secundus* et *tertius*, *Ischio-trochanterianus*.

QUADROON, see Mulatto—q. Black, see Mulatto.

QUAFADIL, *Melanthium Virginicum*.

QUAHOIL, Cacao.

QUAIL, *Tetrao coturnix*.

QUAMASH, EASTERN, *Scilla esculenta*.

QUANDROS. Ancient name for a precious stone, believed to exist in the brain of the vul-

ture; and to which was attributed the property of augmenting the secretion of milk, and preserving from deadly accidents. No such stone exists.

QUARANTINE, *Quar'entine, Quarentaine*, from (I.) *Quaranti'na*, itself from *quaranta*, 'forty.' (F.) *Quarantaine*. The time during which travellers, returning from a country where the plague or any other pestilential disease exists, are compelled to remain on board ship or in a lazaretto. They, as well as the ship, are said 'to perform quarantine.' Quarantine is sometimes extended beyond forty days, whilst its duration is frequently much less. It is sometimes enforced by land; for example, when contagious diseases require the establishment of *cordons sanitaires*, and when persons are desirous of leaving infected districts. During quarantine, no communication is allowed between the travellers and the inhabitants of the country. Quarantine is a great impediment to commerce; and is, doubtless, very frequently enforced when there is but little danger of contagion. The evils, however, that might arise from the introduction of a widely-spreading contagious disease, are so disastrous, as to induce legislators to maintain these laws in perhaps an unnecessary degree of rigour.

QUARTAN, 'of or belonging to the fourth.' *Quarta'na Febris, An'tus Quarta'nus, Tetarta'us, Quartan Ague*, (F.) *Quarte*. An intermittent, the paroxysms of which recur every fourth day, leaving between them two days' interval. We speak also of the *Quartan Type*. A *Double Quartan* is one in which one paroxysm occurs on the third and another on the second day, so that there is only one day of apyrexia and two of paroxysms in succession;—the paroxysms of every fourth day resembling each other. A *Triple Quartan* is one in which there is a paroxysm every day; and on every three days the paroxysms correspond. A *redoub'ling or repeating quartan*, (F.) *Fievre quartie doublee*, is one in which there are two paroxysms every fourth day. See Intermittent.

QUARTANUS REMITTENS, Tetartophia.
QUARTA'RIOUS. An ancient measure, equal to one-fourth of the sextarius. See Weights and Measures.

QUARTE, Quartan.
QUARTERON, see Mulatto—q. Black, see Mulatto.

QUARTIO, Astragalus.
QUARTI-STERNAL, *Quadrister'nalis*. The fourth osseous portion of the sternum, corresponding to the fourth intercostal space.—Béclard.

QUASSATIO, Conquassation.
QUASSATURA, Conquassation.

QUAS'SIA, *Quassia ama'ra, Quassy, Quassia excel'sa, Picra'nu excel'sa, Febrif'ugum lignum, Lofty Bitterwood Tree, Bitter-ash*, (F.) *Quassie*. A West India tree, from which is obtained the *Lignum Quassie, Quassia*, (Ph. U. S.) It is an intensely durable bitter, without astringency; and has been employed as a tonic and stomachic. It is generally given in the form of infusion. The bitter principle is called *Quassin*.

QUANSIA SIMAROU'BA, *Simarouba, Simaruba, S. officina'lis, Evon'ymus, Bitter Simaruba, Mountain Damson*. The bark of the Simarouba is bitter, and not unpleasant. Both water and alcohol extract its virtues. It is not astringent. It is exhibited wherever a simple tonic is required.

QUASSIN, see Quassia.

QUATERNIO, Astragalus.

QUATRE ÉPICES, see Myrtus pimenta.

QUATRIO, Astragalus.

QUEASINESS, Nausea.

QUEEN'S DELIGHT, *Stillingia*—q. of the Meadows, *Spiræa ulmaria*—q. Root, *Stillingia*.
QUERCINI HERBA, *Lichen plicatus*.

QUERCULA MINOR, *Teucrium chamaedrya*.
QUERCUS ALBA, the *White Oak*; **QUERCUS ROBUR**, the *Common Oak*; **Q. TINCTORIA**, the *Black Oak*; **Q. RUBRA MONTANA**, the *Red Oak* or *Spanish Oak*; *Family*, Amentaceæ; *Str. Syst.* Monocia Polyandria; (F.) *Chêne*. The bark of all these varieties is, probably, alike in medicinal properties. It is powerfully astringent and tonic, and has been used internally in intermittents, and externally in decoction, as an astringent wash, where such is indicated.

Acorns, Ceces, Nuces Quercus, (F.) *Glands*, were at one time much used as food; and a decoction of them was once recommended in dysentery and diarrhoea, in glandular obstructions, &c. A pessary made of them has been advised in immoderate flow of the menses. They are not now used.

QUERCUS INFECTORIA. A tree of Asia Minor, which affords *Turkey Galls, Nut Galls, Galla Turcica, G. Quercina, G. Tinctoria, Nus Galle, Galla maxima orbiculata, Cicis, Cassenolea, Gal-la, Galls, Gall-nut*, (F.) *Noix de Galle*. The *nugall—Galla* (Ph. U. S.)—is a morbid protuberance or tubercle, produced by the puncture of the *Diplolepis Galla Tinctoria* or *Cynips Quercus folii*. It is powerfully astringent and tonic, and has been employed in diarrhoea, intestinal hemorrhage, and intermittents: but is chiefly used, externally, in gargles and injections. The powder, made into an ointment with lard, is used in piles.

QUERCUS COCCIFERA, see Kermes—q. Marina, *Fucus vesiculosus*—q. Suber, see Suber.

QUEUE DE CHEVAL, *Cauda equina*, see *Medulla spinalis*—q. de la *Moelle épinière, Cauda equina*—q. de *Pourceau, Peucedanum*.

QUICK-IN-THE-HAND, *Impatiens*.
QUICKEN TREE, *Sorbus acuparia*.

QUICKENING, from Sax. *epicern*, 'to make alive.' The period of gestation when the motion of the fetus first becomes perceptible. This usually occurs about the eighteenth week, and was at one time erroneously believed to mark the time at which the fetus becomes alive—*Anima'tio facta*. It need scarcely be said, that it possesses the principle of life from the moment of the union of the materials furnished by the sexes at a fecundating copulation. When the motion is felt, the female is said to be 'quick with child.'

QUICKENS, *Triticum repens*.
QUICKLIME, *Calx viva*.

QUICKSILVER, *Hydrargyrum*.
QUIES, *Acinesia*.

QUINA, *Quinine*—q. *Quina, Cinchona*.

QUINÆ ACETAS, SULPHAS, &c., see *Quinine Acetas, &c.*

QUINCE, see *Pyrus cydonia*—q. *Tree, Pyrus cydonia*.

QUINIA, *Quinine*—q. *Acetate of, Quinine acetas*—q. *Amorphous, see Quinia, extract of*—q. *Arseniate of, Quinine arsenias*—q. and *Cinchonia, tannate of, Quinine et Cinchonina tannas*—q. *Arsenite of, Quinine arsenis*—q. *Citrate of, Quinine citras*.

QUINIA, EXTRACT OF, Quinine sulphas impurum. A preparation which consists in evaporating the liquor poured off the crystals of sulphate of quinia, to the consistence of a pilular mass.

It has the properties of sulphate of quinia, and its active principle appears to be *amorphous quinia*. Twenty-four grains will generally arrest ague.

QUINIA, FERROCYANATE OF, Quinine ferrocyanas—q. *Hydriodate of, Quinine hydriodas*—q. *Impure sulphate of, Quinia, extract of*—q. *Lothy-*

drate of, Quinise hydriodas—q. Iodide of, Quinise hydriodas—q. Iodide of, Iodhydrate of, see Quinise hydriodas—q. Ioduret of, Quinise hydriodas—q. and Iron, Hydriodate of, see Quinia, Iodide of, Iodhydrate of—q. Lactate of, Quinise lactas—q. and Mercury, protochloride of, Hydrargyri et Quinise Protochloridum—q. Muriate of, Quinise murias—q. Nitrate of, Quinise nitras—q. Phosphate of, Quinise phosphas—q. Sulphate of, Quinise sulphate of.

QUINISE ACETAS, *Chini'num acet'icum, Acetas Chini'ni seu Chini'ni seu chini'nicus seu Qui'nise seu Quinise seu Quini'ni seu Kim'ni, Quina acetica, Acetate of Qui'nia or of Quinine.* Prepared by saturating Quinia with diluted acetic acid. Has the properties of the other salts of Quinia.

QUINISE ARSENIAS, *Quini'næ seu Qui'nise Arsen'ias, Chini'num Arsenico'num seu Arsenic'icum, Arseniate of Quinia or of Quina or of Quinine.* Formed by the union of arsenic acid and quinia. Employed as an antiperiodic in the dose of from three quarters of a grain to a grain and a half in the twenty-four hours.

QUINISE ARSENIIS, *Q. Diar'senis, Ar'senite of Qui'nia.* A salt resulting from the double decomposition of arsenite of potassa and sulphate of quinia. It has been used in chronic cutaneous diseases; and as an antiperiodic in ague, neuralgia, &c. Dose, one-third of a grain, three times a day.

QUINISE CITRAS, *Quinise seu Chini'ni citras, Citras chini'nicus seu qui'nicus, Chini'num seu Chini'num Citricum, Citrate of Quinia, of Quina, or of Quinine.* Formed from the union of citric acid and quinia. It has the same properties as the sulphate.

QUINISE ET CINCHONISE TANNAS, *Chini'num seu Chini'num tan'nicum, Tannate of Quinia and Cincho'nia.* This salt has the same properties as the salts of quinia in general.

QUINISE DIARSENIIS, *Quinise Arsenis.*

QUINISE FERROCYANAS, *Chini'num ferrocyanogena'tum seu ferrohdrocyan'icum, Ferrocyanate or hydrocyanoferrate of Quinia or of Quinine.* This salt is obtained by the decomposition of sulphate of quinia by means of a solution of ferrocyanuret of potassium. It has all the properties of sulphate of quinia, and, according to some, in a superior degree.

QUINISE HYDRIODAS, *Chini'num hydriod'icum, Hydriodate or Iodhydrate of Quinia*; called, also, *Ioduretum seu Iod'idum Qui'nise, Iod'uret or Iodide of Qui'nia, (F.) Hydriodate ou Iodhydrate de Quinine, Iodure de Quinine.* This is formed by precipitating sulphate of quinia by means of iodide of potassium. Given in scrofulous affections; half a grain to a grain, three times a day, to a child.

An iodide and a biniodide have been formed; the latter made by mixing double the quantity of the iodide of potassium with the sulphate of quinia.

An IODIDE OF IODHYDRATE OF QUINIA, (F.) *Iodure d'Iodhydrate de Quinine*, is prepared by pouring into an acid solution of quinia a solution of iodide of iron, containing a slight excess of iodine. The precipitate is treated with boiling alcohol: the liquor filtered, and crystals suffered to form. The salt possesses all the properties of the other salts of quinia. Under the name, *Hydriodate of Iron and Quinia*, a preparation has been introduced by Mr. Battley. It is possessed of tonic and antiperiodic virtues.

QUINISE IODIDUM, *Quinise hydriodas—q. Ioduretum, Quinise hydriodas.*

QUINISE LACTAS, *Quinise lactas, Chini'num lact'icum, Lactate of Qui'nia or of Quinine.* Made by the action of lactic acid on quinia. Used in the same cases as the other salts of quinia.

QUINISE MURIAS, *Chini'num muriat'icum seu salitum seu hydrochlor'icum, Murias chini'nicus, Muriate of Quinia or of Quinine.* May be prepared by dissolving quinia in dilute muriatic acid. Given as an antiperiodic. Dose, half a grain to a grain.

QUINISE NITRAS, *Chini'num seu Chini'num nitricum, Nitrate of Quinia or of Quinine.* May be formed by the addition of nitric acid to quinia. Its properties are those of the sulphate of quinia.

QUINISE PHOSPHAS, *Chini'num seu Chini'num phosphoricum, Phosphate of Quinia or of Quinine*; may be prepared by the addition of dilute phosphoric acid to quinia. It is thought by many to be next to the sulphate of quinia in its remedial powers.

QUINISE SULPHAS, *Quinine, sulphate of.*

QUINISE VALERIANAS, *Chini'num seu Chini'num Valerian'icum, Valerianate of Quinia, of Quina, or of Quinine*; may be formed by the union of valerianic acid with quinia. It has the properties of the salts of quinia.

QUININE, *Qui'nia, Quina, Kim'num, Chini'num, Quinina.* An alkaline, uncrystallizable substance; under the form of a porous, whitish mass; almost insoluble in water, soluble in alcohol and ether. It forms, with acids, salts that are in general soluble. It is obtained from different cinchonas, but chiefly from the yellow, and is the active principle of those valuable drugs.

QUININE, ACETATE OF, *Quinise acetas—q. Arseniate of, Quinise arsenias—q. Arsenite of, Quinise arsenis—q. Citrate of, Quinise citras—q. Ferrocyanate of, Quinise ferrocyanas—q. Hydriodate de, Quinise hydriodas—q. Iodhydrate de, Quinise hydriodas—q. Iodure de, Quinise hydriodas—q. Iodure d'Iodhydrate de, Quinia, iodide of iodhydrate of—q. Lactate of, Quinise lactas—q. Muriate of, Quinise murias—q. Nitrate of, Quinise nitras—q. Phosphate of, Quinise phosphas.*

QUININE, QUINA OR QUINIA, SULPHATE OF, *QUINISE seu Qui'nise seu Quini'næ Sulphus, Quinise Diul'phas, Chini'num seu Chini'num Sulphu'ricum, (F.) Sulfate de Quinine*—the salt usually employed in medicine—occurs in needles of a pearly and satiny appearance. It is employed with great success in the treatment of intermittents; and is available in many cases, where the bark in substance could not be retained, or would be injurious. Dose, as a tonic from 3 to 10 grains in the 24 hours. As an antiperiodic it may be carried much farther. Its action, in a large dose, is decidedly sedative. It is obtained, by treating the yellow bark with sulphuric acid. The following form is adopted in the Pharmacopœia of the United States,—*Cinchon. flav. in pulv. crass. lbiv; Acid. muriat. fʒij; Calcis, in pulv. ʒv; Aquæ, cong. v; Acid. Sulphur., Alcohol; Carbon. animal, ʒʒ q. s.* Boil the bark in one-third of the water mixed with the one-third of the muriatic acid, and strain through linen. Boil the residue twice successively with the same quantity of acid and water as before, and strain. Mix the decoctions, and, while the liquor is hot, gradually add the lime, previously mixed with two pints of water, stirring constantly, until the quinia is completely precipitated. Wash the precipitate with distilled water, and having pressed and dried it, digest it in boiling alcohol. Pour off the liquor and repeat the digestion several times, until the alcohol is no longer rendered bitter. Mix the liquors, and distil off the alcohol, until a brown viscid mass remains. Upon this substance, removed from the vessel, pour about half a gallon of distilled water, and having heated the mixture to the boiling point, add as much sulphuric acid as may be necessary to dissolve the impure alkali.

Then add an ounce and a half of animal charcoal; boil for two minutes; filter the liquor while hot, and set it aside to crystallize. Should the liquor, before filtration, be entirely neutral, acidulate it very slightly with sulphuric acid. Should it, on the contrary, change the colour of litmus paper to a bright red, add more animal charcoal. Separate the crystals from the liquor, dissolve them in boiling water slightly acidulated with sulphuric acid, add a little animal charcoal, filter and set aside to crystallize. Wrap the crystals in bibulous paper, and dry with a gentle heat. The mother-waters may be made to yield an additional quantity of sulphate of quinia by precipitating the quinia with solution of ammonia, and treating the precipitated alkali with water, sulphuric acid, and animal charcoal, as before.

QUININE, TANNATE OF, Quinise et cinchonise tannas—q. Valerianate of, Quinise valerianas.

QUININISM, *Quininitis*, *Quinism*, *Cinchonism*. The aggregate of encephalic or neuropathic phenomena induced by over-doses of quinia.

QUINOIDINE, Chinoidine.

QUINQUEFOLIUM, *Potentilla reptans*—*Quinquefolium majus*, *Potentilla reptans*.

QUINQUINA, *Cinchona*—q. *Aromatique*, *Croton cascarilla*—q. *Bicolor*, *Cinchona* *Caribææ cortex*—q. *Faux de Virginte*, *Cusparia febrifuga*—q. *Gris de Loza*, *Cinchona lancifolia cortex*—q. *Jaune*, *Cinchona cordifolia cortex*—q. *Orange*, *Cinchona lancifolia cortex*—q. *Piton*, *Cinchona Caribææ cortex*—q. *Rouge*, *Cinchona oblongifolia cortex*.

QUINSEY, *Cynanche tonsillarum*—q. *Nervosa*, *Angene*—q. *Wolf*, *Lycanche*.

QUINTAN, *Febris quinta'na*, *F. pempta'a*, *F.*

quinta; from *quintus*, 'a fifth.' A fever whose paroxysms return only every five days inclusively; and between which there are, consequently, three days of apyrexia.

QUINTE, (F.) This word is used synonymously with *paroxysm* or *fit*, when speaking of cough,—as *une Quinte de Toux*—'a fit of coughing.' Also, the influenza.

QUINTEFEUILLE, *Potentilla reptans*.

QUINTERON, see *Mulatto*—q. *black*, see *Mulatto*.

QUINTES, see *Pertussis*.

QUINTES'SENCE, *Quinta Essentia*. A name formerly given to alcohol, impregnated with the principles of some drug. It was, consequently, often synonymous with *Alcoholic tincture*. The most volatile principles of bodies were, also, called *Quintessences*.

QUINTI'STERNAL. The fifth osseous portion of the sternum. It corresponds to the 5th and 6th intercostal spaces.

QUINUA, *Chenopodium quinoa*.

QUOTID'IAN, *Quotidia'na*, *Ephemerus*.—itself from *quotidid*, 'daily.' That which takes place every day.

QUOTID'IAN FEVER, *Febris quotidiana seu hemerisia seu hemerina*, *Q. acuta*, *Anetus quotidiana'na*, *Cathermerus*, *Cathermerinus*, *Methemerinus*, *Amphemerinus*, *Amphemerinus*, *Amphemerus*, *Febris amphemera seu methemerina seu methemeria*, *Quotidia'na*, (F.) *Fièvre quotidienne*, is an intermittent, the paroxysms of which recur every day.

A *simple*, *double*, or *triple quotidian*, is a quotidian, which has one, two, or three paroxysms in the 24 hours.

R.

R is placed at the commencement of a prescription, as a contraction of *Rec'ipē*. (See Abbreviation.) Originally, it was the sign Λ of Jupiter, and was placed at the top of a formula, to propitiate the king of the gods, that the compound might act favourably.

RABDOIDES, (SUTURA) Sagittal suture.

RABID, *Rab'idus*, (F.) *Rabique*, *Rabétique*, from *rabies*, 'canine madness.' That which belongs to hydrophobia; as *rabid virus*, &c.

RABI'IQUE, *Rabid*.

RABIES CANINA, *Hydrophobia*.

RABI'IQUE, *Rabid*.

RACAHOUT, *Amylum quernum*. A name given by the Arabs to the starch prepared from an edible acorn obtained from *Quercus Ilex*, but, according to Plagge, the so called *Racahout* of the Arabs, sold in Paris, is a compound of potato starch, chocolate, and aromatics,—as vanilla.

RACCOON BERRY, *Podophyllum montanum*.

RACE, from *radice*, abl. of *radix*, 'root,' breed. The union or aggregate of individuals whose conformation or particular condition differs perceptibly from those of neighbouring varieties. In the human species, several races are designated. See *Homo*.

RACEMEUX, *Racemosus*.

RACEMOUSUS, *Rac'emosus*, *Rac'emosus*, (F.) *Racemeux*. In clusters, like grapes.

RACE'OUS. A cluster—as of grapes.

RACHAMEL'CA, from Hebr. רחם (*recham*) 'the womb,' and רמל (*molech*), 'a king:' *Recha-*

mal'ca. A peculiar formative principle, supposed, by Dolzeus, to exist in the uterus.

RACHE, *Porrigo*.

RACHIAI, *Rachisæi*.

RACHIALGIA, *Colic*, *metallia*, *Rhachiodynia*, *Vertebral disease*—r. *Mesenterica*, *Tabes mesenterica*—r. *Pictoniensium*, *Colic*, *metallia*—r. *Pictonium*, *Colic*, *metallia*.

RACHIALGIE MÉSENTÉRIQUE, *Tabes mesenterica*.

RACHIALGITIS, *Rhachialgitis*.

RACHIDIAN ARTERIES, *Spinal arteries*—r. *Bulb*, see *Medulla oblongata*—r. *Canal*, *Vertebral canal*.

RACHIOPHYMA, *Rachiphyma*.

RACHIPHY'MA, *Rhachiphyma*, *Rachiphyma*, *Tumor Dorsi*, from *ραχis*, 'the spine,' and *φυμα*, 'a tumour.' A tumour on the spine or on the back.

RACHIS, *Vertebral column*.

RACHIS'AGRA, *Rhachis'agra*, *Rhach'agra*, *Rhach'agra*, *Rhachid'agra*, *Rhach'itis spina'lis*, from *ραχis*, 'the spine,' and *αγρα*, 'a seizure.' A gouty or rheumatic affection of the spine.

RACHITÆ, *Rhachitæ*.

RACHIT'IC, *Rachit'icus*, *Rhachit'icus*, (F.) *Rachitique*. Same etymon as the next. Relating or appertaining to, or affected with rickets. Weak, feeble in the joints; defective in development.

RACHI'TIS, *Rhachit'is*, from *ραχis*, 'the spine,' and *itis*, a suffix denoting inflammation. Inflammation of the spine. Also, *Cyrt'is Ra-*

chia, Cyrtos'ous, Morbus Ang'licus, Osteomala'cia Infan'tum, Tabes pectora; Innutritio ossium, Spina nodosa, Rachitis' mus, English disease, Rickets; from 'paxis, 'the spine.' (F.) Rachitisme, Nouure. A disease characterized by crookedness of the long bones; swelling of their extremities; crooked spine; prominent abdomen; large head; and often precocity of intellect. It is accompanied by leanness, general debility, indigestion; and frequently induces atrophy and hectic. Rickets occurs, particularly, during the first years of existence, in weakly children, born of rickety or scrofulous parents; brought up in damp or confined situations; who are badly nourished, and do not take sufficient exercise. The progress and termination of the disease are very variable. Some children gradually recover their health: others become more and more deformed, and ultimately die of consumption, dropsy, or other organic disease. The treatment is almost wholly hygienic. Pure air; a healthy situation; nourishing diet; exercise; sea or common cold bathing, and tonics, afford the best prospect of success.

RACHITIS ADULTORUM, Mollities ossium.

RACHITISME, Rachitis.

RACHOSIS, *Rhacho'sis, Rako'sis*, from 'paxos, or 'paxos, 'I wrinkle.' A relaxation of the scrotum. *Propto'ma seu lax'itas Scroti, Scrotum pendulum.* An excoriation of the relaxed scrotum. — Dictionaries.

RACINE À BECQUET, Geranium moschatum — *r. de Bengal, Cassumuniar* — *r. de Charcis, Dorstenia contrayerva* — *r. de Dracke, Dorstenia contrayerva* — *r. des Philippines, Dorstenia contrayerva* — *r. de Safran, Curcuma longa* — *r. de Saint. Eprrit, Angelica* — *r. Salivaire, Anthemis pyrethrum* — *r. de Turbeth, Convolvulus turpe-thum.*

RACINES DU CERVELET, Corpora restiformia.

RACLURES DES BOYAUX, Ramenta intestinorum.

RACORNISSEMENT, (F.) from *se racornir*, 'to shrivel in the fire as leather does.' *Cor'nification.* A physical property, possessed by animal substances, which consists in a kind of contractility, accompanied with sudden corrugation and curling. It is produced by heat, and by chemical agents, especially by the strong mineral acids.

RADCLIFFE'S ELIXIR, see *Tinctura aloes composita.*

RADESYGE, Radzyge.

RADEZYGE, Radzyge.

RADIAD, see Radial aspect.

RADIAL, *Radia'lis*, from *radius*, a bone of the forearm. That which relates to the radius.

RADIAL ANTÉRIEUR, Palmaris magnus.

RADIAL ARTERY, *A. extern'a Cu'bitali.* It arises from the brachial, at the upper and anterior part of the forearm; descends on the outer side as far as the lower part of the radius, and proceeds downwards and backwards towards the superior extremity of the space which separates the first two metacarpal bones. It then buries itself in the palm of the hand, where it forms the *profound or radial palmar arch.* The radial artery gives off the *recurrent radial*, several *radio-muscular branches*, the *transverse palmar radio-carpal artery*, the *external superficial artery of the palm of the hand*, the *external dorsal of the thumb*, the *dorsalis carpi*, *dorsal interosseous artery of the index*, &c.

RADIAL ASPECT. An aspect towards the side on which the radius is situated. — Barclay. *Radial* is used by the same writer, adverbially, to signify 'towards the radial aspect.'

RADIAL EXTERNE PREMIER, see *Radialis* — *r. Externe second*, see *Radialis* — *r. Grand*, see *Radialis.*

RADIAL NERVE, *Radio-digital* (Ch.), *Spiral Nerve, Spiral muscular N., Musculo-spiral nerve*, arises from the four inferior branches of the brachial plexus. It is, at first, situate behind the other nerves of the plexus. It then becomes engaged between the three portions of the triceps brachialis, passes behind the humerus, and descends between the supinator longus and brachialis internus, as far as opposite the upper extremity of the radius. In its course it gives numerous filaments to the triceps, supinator longus, extensor carpi radialis longior, and to the integuments. Opposite the upper extremity of the radius it divides into two branches; — the one *posterior*, which turns backwards into the substance of the supinator brevis, and when it has reached the space between the two layers of muscles on the posterior surface of the forearm, divides into a great number of filaments, which are distributed to those muscles, and to the integuments of the hand. The other branch is *anterior*: it descends before the supinator brevis and the radius; until, near the inferior third of that bone, it engages itself between the tendons of the supinator longus and extensor carpi radialis longior; and, becoming afterwards subcutaneous, divides into two branches, whose filaments are distributed to the integuments of the thumb, index, middle finger, to the outside of the ring finger, and to the first interosseous muscle of the back of the hand.

RADIAL PETIT, see *Radialis.*

RADIAL VEINS, DEEP-SEATED, follow the same course as the radial artery.

RADIALIS EXTERNUS BREVIOR, *Extensor Carpi Radialis Bre'vior, Radialis secundus*, (F.) *Second radial externe, Petit radial, Épicondylus-métacarpien*, (Ch.) An extensor muscle of the wrist, situate beneath the extensor carpi radialis longior. It is attached, above, to the external tuberosity of the humerus, and terminates below, by a long tendon, inserted into the posterior part of the upper extremity of the third bone of the metacarpus. It has the same uses as the next muscle.

RADIALIS EXTERNUS LONGIOR, *Extensor Carpi Radialis Lon'gior, Radialis externus primus*, (F.) *Premier radial externe, Grand radial, Humérus-métacarpien*, (Ch.) It is seated at the outer part of the forearm; is thin, but thicker on the outside than on the inside. It is attached, above, to the inferior part of the outer edge, and to the corresponding tuberosity, of the humerus; and terminates, below, by a long tendon, which is attached to the superior extremity of the second bone of the metacarpus. It extends the hand on the forearm.

RADIALIS EXTERNUS BREVIOR, see *Radialis* — *r. Externus primus*, see *Radialis* — *r. Extensor longior*, see *Radialis* — *r. Internus, Palmaris magnus* — *r. Secundus*, see *Radialis.*

RAD'IATED, *Radia'tus*, from *radius*, 'a ray;' (F.) *Rayonné.* That which is arranged in rays; in lines, diverging from a common centre. An epithet given to several ligaments, &c., as to those which unite the ribs to the sternum; those which unite the tibia and fibula at their inferior extremity, &c.

RADIATED SUBSTANCE OF THE KIDNEY, see *Kidney.*

RAD'ICAL, *Radica'lis*, from *radix*, 'a root.' A *radical cure, cura radica'lis*, is one in which the disease is destroyed, as it were, from the root. It is used in opposition to *palliative cure.*

RADICAL MOISTURE, *Humidum radicale.*

RADICAL VESSELS, Vas'cular Rad'icles, (F.) *Radicules vasculaires*, are the small vessels that take their origin in the tissues, and by their union form larger vessels.

RADICES OSSIS HYOIDEI, Cornua ossis hyoidi.

RADICIS'ECA, from *radix, radicitis*, 'a root,' and *secare*, 'to out.' One employed in collecting and preparing plants was formerly so called.

RADICULA, *Raphanus hortensis*.

RADICULES VASCULAIRES, Radical vessels.

RADII CILIARES, Ciliary processes.

RADII FRONTIS. The folds or wrinkles of the forehead.

RADIO-CARPAL, *Radio-carpia'nus*. That which relates to the radius and carpus.

RADIO-CARPAL ARTICULATION is the wrist joint, or articulation of the os scaphoides, os semilunare, and os cuneiforme of the carpus with the inferior surface of the radius, and the fibro-cartilage, situated below the ulna. It is strengthened by lateral, anterior, and posterior ligaments.

RADIO-CARPAL TRANSVERSE PALMAR ARTERY, (F.) *Artère Radio-carpienne-transversale-pal-maire*. A transverse branch, given off by the radial artery, opposite the lower edge of the pronator quadratus, which sends several branches to the anterior or palmar surface of the carpus.

RADIO-CUTANÉ (NERF), see Cutaneous—*r. Phalangettien du pouce, Flexor longus pollicis manus*.

RADIOLUS, Sound.

RADIO-MUSCULAR, *Radio-muscula'ris*. A name given to the branches sent off from the radial artery to the muscles of the forearm in the first part of its course; as well as to the nervous filaments which the radial nerve sends to the same muscles.

RADIS, *Raphanus hortensis*.

RADISH, *Raphanus hortensis*—*r. Water, Nas-turtium amphibium*.

RADIUS, 'a spoke'—so called from its shape. *Cercis, Foc'ilis minus seu superius, Canna minor, Os ad cubita'le, Additamentum ulnae, Manubrium manus, Parape'chyon, Arun'do bra'chii minor, (F.) Os du Rayon*. A long, prismatic bone, the upper and lesser extremity of which is called the *head*. This is supported by a *cervix* or neck. At the part where the neck is confounded with the body of the bone is the *tubercle* or *bicipital tuberosity* or eminence for the insertion of the biceps. The radius is articulated, above, with the os humeri and with the lesser sigmoid cavity of the ulna; below, with the scaphoides, semilunare, and the head of the ulna. Its inferior extremity, which is larger than the superior, is flattened before and behind: is irregularly quadrilateral; and has, below, a double facette to be articulated with the first two bones of the carpus. On the outer side is the styloid process; and, on the inner, a concave facette, which joins the ulna. Behind, are grooves for the passage of the extensor tendons. The radius is developed from three points of ossification; one for the body, and one for each extremity.

RADIUS, COL DU, Collum radii.

RA'DIX, Râisa. A root: also, the male organ.

Radix, Root or fang of a tooth, is the part contained in the alveolus. The *radix* or root of the nail is the portion hidden under the skin, &c. Surgeons give the name to the prolongations, sent by scirrhus, cancerous, or other tumours into the neighbouring parts.

Five Aperient Roots, Quinque radi'ces aperien'tes, were, of old, asparagus, butchers' broom, fennel, parsley, and smallage.

Five Lesser Aperient Roots, Quinque radi'ces

aperien'tes minores,—were caper, dandelion, eryngo, madder, and rest-harrow.

RADIX ASCLEPIADIS CRISPA, see *Gomphocarpus crispus*—*r. Brasiliensis, Ipecacuanha*.

RADIX CORDIS, Basis Cordis. The base of the heart.

RADIX INDICA LOPEZIANA, Lopez radix—*r. Lingua*, see *Tongue*—*r. Lopeziana, Lopes radix*—*r. Ninsi, Sium ninsi*—*r. Rubra, Rubia*—*r. Serpentina*, see *Ophiorrhiza mungos*—*r. Unguis, Nail, root of*—*r. Ventris, Umbilicus*.

RADULA, *Raspatorium*.

RADZYGE, Radzygin, Radezyge, Radezyge, Thæ'ria, properly *Theria*, from *θηριον*, ('λας,) 'a malignant ulcer.' *Lepra borea'lis seu Norvegica, Norwegian Lep'rosy*. A name given, in Norway, to a disease, bearing considerable analogy to the yaws. Some have esteemed it a species of lepra or elephantiasis.

Another form—the *Spedalske, or Spedalskhd*—of Norway, appears to be a variety of elephantiasis Græcorum.

RAGE, Ira, Furor brevis, Orgè, Thymos, (F.) Colère. Violent passion, characterized by contraction of the muscles of the face, violence in every movement, extreme irritation of the nervous system, acceleration of the blood's motion, and redness and swelling of the face.

RAGE, Rhage.

RAGE, Hydrophobia.

RAGWEED, Ambrosia elatior—*r. Great, Ambrosia trifida*.

RAGWORT, Senecio Jacobæa.

RAIDEUR CADAVERIQUE, Rigor mortis.

RAIFORT, Raphanus hortensis—*r. Sauvage, Cochlearia armoracia*.

RAINBOW-WORM, Herpes iris.

RAINURE, Groove—*r. Digastrique, Mastoid groove*.

RAISIN, see *Vitis vinifera*—*r. d'Amérique, Phytolacca decandra*—*r. de Bois, Vaccinium myrtillus*—*r. d'Ours, Arbutus uva ursi*—*r. de Renard, Paris*.

RAISINIÈRE (F.) A name given to a small granular, brownish or blackish tumour, which forms occasionally at the surface of the cornea, in consequence of ulcers or accidental wounds of that membrane.—Nysten.

RAISINS, Uvæ passæ, see *Vitis vinifera*—*r. de Corinthe*, see *Vitis Corinthiaca*.

RAISON, Reason.

RAKASIRA. An American balsam; of a brownish or brownish-red colour; semi-transparent; brittle; softening and becoming tenacious by heat; inodorous when cold, but exhaling a very agreeable smell when heated; and possessing a balsamic and slightly bitter taste. The precise vegetable that furnishes it is not known. It has been used chiefly as a balsam in gonorrhœa and urinary affections.

RAKIA, see *Spirit*.

RAKOSIS, Rachosis.

RÂLE, Rattle, Rhonchus, Rhenchus, Rhenzia, from (D.) *Ratel*; *Rhoncus, Cerchus, Rhogmus, (F.) Râle*. Noise produced by the air in passing through mucus, of which the lungs are unable to free themselves. This condition is chiefly observed at the approach of death, and is commonly called, "the rattles."

The term *Râle* has been given to different sounds during respiration, caused by the air passing through fluid contained in the bronchi, or areolæ of the pulmonary tissue; which are perceived by the stethoscope.

RÂLE BRONCHIQUE SEC, Râle secare—*r. Bronchique humide, R. muqueux*—*r. Cavernæ, Gurgling*—*r. Cavernuleux, see Gurgling*—*r. Or-*

pitant, Rhonchus crepitans, see Crepitant—*r. c. Redur*, see Crepitant.

RÂLE MUQUEUX, *Rhon'chus muco'sus, Mucous Rattle, R. bronchique humide*. The sound produced by the passage of air through mucus accumulated in the larger bronchi or trachea, or through softened tubercular matter. This *râle* occurs in catarrh, and in softened tubercle. When carried to a very high degree, it constitutes *gurgling*, (F.) *Gargouillement*. The *sub-crepitant rhonchus*, (F.) *Râle sous-crepitant*, is produced by the bubbling of air through liquid of variable consistence in the minute bronchial tubes. When heard at the base of both lungs, it is a sign of capillary bronchitis. When heard at one base only, it is generally connected with tuberculosis higher up.

RÂLE SIBILANT, *Rhon'chus sib'ilus seu sib'itans, Sib'ilant Rattle*. A slight, though prolonged, whistling sound, occurring either at the commencement of inspiration, or of expiration, owing to the presence of mucus, thin and viscid, but not abundant, which obstructs, more or less completely, the smaller bronchial ramifications. It is seated in the small tubes, and occurs in the first stage of bronchitis. The *clicking* and *whistling* varieties differ, in the former being short, the latter prolonged. The former is a quick sharp sibilus or whistle, which ceases almost instantaneously; the latter a prolonged sibilus, of less sharpness, lasting almost the whole time of the movement which it accompanies. To these may be added the *hissing* variety, the name sufficiently indicating its character.

RÂLE SONORE, *Râle bronchique sec, R. ronflant, Rhonchus sonorus, Sonorous Rattle*. A sound resembling at times the snoring—(F.) *Ronflement*—of a person asleep; at others the sound of the bass string of an instrument when rubbed with the finger, and not infrequently the cooing—(F.) *Roucoulement*—of a dove. It seems to be caused by a contraction of the bronchial tubes, and is characteristic of chronic catarrh.

RÂLE SOUS-CRÉPITANT, see *Râle muqueux*.

RÂLE VÉSICULAIRE, see Crepitation.

RAMEAU, Ramus.

RAMENTA INTESTINORUM, (F.) *Racines des Boyaux*. The shreds or scrapings, as it were, of the mucous membrane of the bowels, often discharged in malignant dysentery. The evacuation in which these are contained has been termed *Diachorema zymatoïdes*.

RAMENTUM, Fragment, Scab.

RAMEX, Hernia—*r. Varicosus, Varicocele*.

RAMIFICATION, *Ramifica'tio*, from *ramus*, 'a branch,' and *fito*, 'to become.' A division of arteries, veins, or nerves into branches. Also, a branch itself.

RAMILLE, Ramusculus.

RAMOLLISSEMENT, Mollities—*r. du Cerveau, Mollities cerebri*—*r. du Cœur, Cardiomalacia*—*r. de l'Estomac, Gastromalacia*—*r. du Foie, Hepatomalacia*—*r. Gris*, see Hepatization—*r. de la Moelle épinière, Mollities medullæ spinalis*—*r. Rouge*, see Hepatization—*r. de l'Intestin, Entero-malacia*—*r. des Os, Mollities ossium*.

RAMPANT, (F.) *rampier*, 'to climb.' *Repens, Reptans*. That which creeps or drags on the earth. The French *Bandage rampant* has the folds arranged spirally around the part, leaving intervals between them. It is a retentive bandage, but is easily displaced, and, therefore, not employed.

RAMPES DU LIMAÇON, *Scalæ* of the cochlea.

RAMPHOS, Rostrum.

RAMULUS, Ramusculus.

RAMUNCULUS, Ramusculus.

RAMUS, *Clados*, a branch, (F.) *Rameau*. A division of an artery, vein, or nerve. Also, the male organ.

RAMUS DURIOR SEPTIMÆ CONJUGATIONIS, Facial nerve.

RAMUSCULUS, *Ram'ulus, Ramun'culus, Sur'culus, Cladis'cos*, diminutive of *ramus*. A division of a ramus. (F.) *Ramuscule, Ramille*.

RANA ESCULEN'TA, (F.) *Grenouille*. This frog and the bull-frog, *Rana Tauri'na*—are eaten as a delicacy. They are nutritious, and easily digested.

RANA, *Ranula*.

RANCE, Rancid.

RANCID, *Ran'cidus, Sapro*, (F.) *Rance*, from *rancere*, 'to be stale.' An epithet given to fatty bodies, which have become acrid from age or the contact of air. Mild ointments may thus become very irritating, and unfit for the purposes for which they were originally intended.

RANINE, *Ran'ina*; from *Rana*, 'a frog.' The termination of the lingual artery is so called; that is, the portion of the artery which advances horizontally between the genio-glossus and lingualis muscles as far as the point of the tongue. The ranine vein follows the same course as the artery, and opens into the internal jugular or into the superior thyroid.

RAN'ULA, from *Rana*, 'a frog,' so called from its resemblance; *Dyspha'gia Ranula, Emphrag'ma saliva'rè, Frog Tongue, Ba'trachos, Batra'chium, Hydroglos'sa, Hypoglossis, Hypoglossum, Hypoglot'tis, Hypoglot'sium, Rana*, (F.) *Grenouillette*. A small, soft, fluctuating, and semi-transparent tumour, which forms under the tongue, owing to the accumulation of saliva in Wharton's duct. In order to give exit to the accumulated fluid, and to establish a permanent opening for the discharge of the saliva, the cyst may be punctured, and the opening maintained by a minute cylinder, with a button at each extremity, as has been recommended by Dupuytren; or a portion of the cyst may be removed by the scissors, and the mouth be frequently washed by any astringent lotion. Sometimes, the salivary duct is found plugged by a small calculus.

RANULA LAPIDRA, see Calculi, salivary.

RANUN'CULUS, (F.) *Renoncule*. Family Ranunculaceæ. *Sex. Syst. Polyandria Polygynia*. A genus of plants, most of the species of which, when taken internally, act as acrid poisons. See Poison. They are, also, acrid and vesicant, when applied to the skin, and have accordingly been often used as counter-irritants. The following species answer to this description.

RANUNCULUS ABORTIVUS, *Small flowered Crow-foot, Chicken-pepper*.

RANUNCULUS ACRIS, *R. pratensis seu Stevenii seu ru'fulus seu sylvat'icus seu Sic'ulus, Upright Meadow Crowfoot, Butter Cups, Yellow-wced, Blister-weed, Pilewort, Burwort, Meadow-bloom, Yellow*, (F.) *Bouton d'or*.

RANUNCULUS ALBUS, *Anemone nemorosa*.

RANUNCULUS AQUATICUS, *R. sceleratus*.

RANUNCULUS BULBO'SUS, *R. latus, Ranunculus* (Ph. U. S.), *Bulbous-rooted Crowfoot*, (F.) *Renoncule bulbeuse, Bassinet*.

RANUNCULUS DIGITATUS, *R. sceleratus*.

RANUNCULUS DECLINATUS, *R. flammula*.

RANUNCULUS FICA'RIA, *Chelido'nium minus, Scrophular'ria minor, Fica'ria ranunculoïdes, seu verna seu commu'nis, Chelido'nia rotundifolia minor, Cur'suma hæmorrhoida'lis herba, Ranun-*

culus vernus seu præcox *Egole'thron*, Lesser celandine, *Pilewort*, (F.) *Petite Ohéldoine*, *Petite Scuire*, *Ficaire*. The leaves and root have been used medicinally;—the leaves as an antiscorbutic; the root as a cataplasm in piles.

RANUNCULUS FLAM'MULA, *R. declinatus*, *Flam'mula*, *Surrecta alba*, *Smaller Water Crowfoot*, *Lesser Spearwort*, (F.) *Petite Douve*.

RANUNCULUS ILLYRICUS.

RANUNCULUS LINGUA.

RANUNCULUS LÆTUS, *R. bulbosus*—*r. Nemorosus*, *Anemone nemorosa*—*r. Palustris*, *R. sceleratus*—*r. Pratensis*, *R. acris*.

RANUNCULUS PENNSYLVANICUS, *Bristly Crow-foot*.

RANUNCULUS PRÆCOX, *R. ficaria*.

RANUNCULUS PRÆBENS'ENS. Grows in ditches and marshes in South Africa. The expressed juice is used by the Cape Colonists in cancerous ulcers.

RANUNCULUS RUFULUS, *R. acris*.

RANUNCULUS SCCLERATUS, *R. Palustris seu umbellatus seu digitatus seu aquaticus*, *Risus A'pium*, *Hecato'nia palustris*, *Marsh Crowfoot*. **RANUNCULUS STICULUS**, *R. acris*—*r. Stevenii*, *R. acris*—*r. Vernus*, *R. ficaria*—*r. Virginianus*, *Lobelia syphilitica*—*r. Umbellatus*, *R. sceleratus*.

RAPA NAPUS, *Brassica rapa*—*r. Rotunda*, *Brassica rapa*.

RAPE, *Brassica napus*, *Stuprum*.

RAPHANE'DON, from *ραψανος*, 'a radish, like a radish.' *Rhaphanedon*. A transverse fracture of a long bone, leaving no splinters;—what has been called, in France, *Fracture en rave*.

RAPHA'NIA, *Convulsio Raphania*, *Raphania*, *Morbis spasmodicus mali'gnus seu popularis*, *M. Silesiacus*, *Eclampsia typhodes*, *Synclonus Raphania*. Linnæus gives this name to a convulsive disease, not uncommon in Germany and Sweden, and which has been attributed to the seeds of the *Raphanus Raphanistrum* seu *xylocaris*, *Raphanistrum seg'etum seu arvense*, *Rapistrum*, being mixed with the corn. The convulsions are seated in the limbs, and are attended with acute pain. See *Convulsio cerealis*.

RAPHANIA MALZITICA, *Pellagra*.

RAPHANIS, *Raphanus hortensis*—*r. Magna*, *Cochlearia armoracia*.

RHAPHANISTRUM ARVENSE, see *Raphania*.

RAPHANUS, *R. hortensis*.

RAPHANUS HORTENSIS, *Raphanus*, *R. sativus seu niger*, *Raphania*, *Raphanus*, *Radícula*, *Rhaphys*, *Raphys*, *Rhaps*, *Raps*, *Radish*, (F.) *Raisfort*, *Radia*. *Family*, *Cruciferae*, *Sec. Syst. Tetradynamia Siliquosa*. The root of this plant is a common esculent. It has, also, been given as a diuretic in calculous affections. The juice, made into a syrup, is exhibited to relieve hoarseness. Radishes have long been celebrated as antiscorbutics.

RAPHANUS MARINUS, *Cochlearia armoracia*—*r. Raphanistrum*, see *Raphania*—*r. Rusticanus*, *Cochlearia armoracia*—*r. Sylvestris*, see *Raphania*.

RAPHE, *Raphé*, 'a suture.' A name given to prominent lines resembling a raised stich. Such is the raphe or *transis* which divides the scrotum into two parts, and which extends from the anterior part of the anus to the extremity of the penis. The name *Raphe seu Linea Media'na seu Sutu'ra corporis callosi exte'na seu chorda longitudinalis*, is, also, given to two prominent lines which are longitudinal and parallel, and are seen at the upper surface of the corpus callosum, extending from the anterior to the posterior extremity of that commissure.

RAPHEX, *Chenopodium vulvaria*.

RAPHIANKIS'TRON, from *ραψανος*, 'a needle,' and *αγκυρα*, 'a hook.' An instrument employed in the formation of artificial pupil.

RAPHION, *Needle*.

RAPHIS, *Needle*.

RAPHYS, *Raphanus hortensis*.

RAPISTRUM, see *Raphania*.

RAPPORT (F.), *Relatio*, *Renunciatio*. A deposition made by a physician or surgeon to prove the condition of a person, the nature of a disease, the existence or non-existence of pregnancy, sudden or violent death, &c. Formerly, there were the *Rapports dénonciatifs*, made at the desire of the injured or their friends, and intended to point out to the judges the details of the crime or misdemeanor,—the *Rapports provisoires*, the object of which was to obtain provisions for the injured individual, both as regarded food and medicine, and to defray the expenses of prosecution;—and *Rapports mixtes*, or those which were both *dénonciatifs* and *provisoires*. At present, reports or depositions are generally divided into *judiciary*, or those which serve to throw light on the subject matter of any civil or criminal cause; and *administrative*, which afford information on subjects relating to any branch of the public administration, as on the nuisance, or otherwise, of certain establishments, the character of any epidemic, &c.

RAPPORT, *Eructation*.

RAPTUS POST-TERGANEUS, *Opisthotonos*.

RAPUM MAJUS, *Brassica rapa*.

RAPUNTIIUM SYPHILLITICUM, *Lobelia syphilitica*.

RAPURE, *Rasura*.

RAPYS, *Raphanus hortensis*.

RAQUETTE, *Cactus opuntia*.

RAREFA'CIENS, *Rarificiens*, *Aræot'icus*, (F.) *Raréfiant* from *rarus*, 'rare,' and *facere*, 'to make.' Medicines were so termed, which were supposed to be possessed of the power of giving more bulk or extension to the blood or other humours.

RARÉFIANT, *Rarefaciens*.

RARIFACIENS, *Rarefaciens*.

RA'RITAS, (F.) *Rarité*. *Rarity*; scantiness; fewness.

RARITAS DEN'TIUM. A large space between the teeth, which appear to be, and may be, too few.

RASCATIO, *Excretion*.

RASCETA, *Carpus*, *Malleolus*—*r. Pedis*, *Tarsus*.

RASCHA, *Carpus*, *Malleolus*.

RASETA, *Carpus*, *Malleolus*.

RASETA, *Carpus*, *Malleolus*.

RASH, *Exanthem*—*r. Fever*, *Scarlatina*—*r. Lichenous*, *Lichen*—*r. Mulberry*, see *Typhus*—*r. Nettle*, *Urticaria*—*r. Rose*, *Roseola*—*r. Summer*, *Lichen tropicus*—*r. Tooth*, *Strophulus*.

RASOIR, *Razor*.

RASORISM. The Italian medical doctrine of contro-stimulus, of which *Rasori* was the founder.

RASORIUM, *Rasporium*.

RASPATO'RIUM, *Rasorium*, *Rat'ula*, *Scalprum rasorium*, *Xyster*, *Xystrivium*, *Xystrum*, *Rad'ula*, *Runci'na*, *Runci'ula*, *Sculprum*. (F.) *Rugine*, *Grattoir*. An instrument used for rasping bones, to detach the periosteum,—either in certain surgical operations, or for anatomical purposes.

RASPBERRY, *Rubus idæus*—*r. Ground*, *Hydrastis Canadensis*—*r. Wild*, *Rubus strigosus*.

RASSETA PEDIS, *Tarsus*.

RASTETA, *Carpus*, *Malleolus*.

RASU'RA, *Xysma, Xysmos*, (F.) *Râpure*, from *radere, rasum*, 'to scrape.' A rasure, or scratch, or erosion. Also, the rasping or shaving of any substance; as *Rasu'ra Cornu Cervi, Hartshorn shavings*.

RASURA, Scobs.

RATAFIA. A liquor prepared by imparting to ardent spirits the flavour of various kinds of fruits, adding sugar.

RATANHY, *Krameria ratanhia*—r. of the Antilles, *Krameria ixina*.

RATE, Spleen.

RATÉLEUX, Spleneticus.

RATÉLIER, see *Dentier*.

RATIO, *Ration'alitas*, from *reor, ratus*, 'to think.' A reason, a cause, an explanation, a mode or manner; as *Ratio symptom'atum*, an explanation of the symptoms,—*Ratio meden'di*, *Genus curatio'nis*, *Via curandi*; the mode or manner of cure.

RATIO, Reason—r. *Medendi*, see *Ratio*—r. *Symptomatum*, see *Ratio*.

RAT'IONAL, *Ration'alitas*. That which is conformable to reason. This epithet is often opposed to *empirical*; as *rational treatment*. The French, also, say *Signes rationales*, in opposition to *Signes sensibles*. See *Organic*.

RATIONALITAS, Ratio.

RATSBANE, Arsenious acid.

RATTLE, *Râle*.

RATTLES, THE, see *Râle*.

RATTLEBUSH, *Sophora tinctoria*.

RATTLESNAKE, *Crotalus horridus*—r. Leaf, *Goodyera pubescens*—r. Plantain, *Goodyera pubescens*—r. Root, *Nabalus albus*, *Polygala senega*, *Trillium latifolium*—r. Weed, *Hieracium venosum*.

RATTLESNAKE'S MASTER, *Agave Virginica*, *Liatris scariosa*, *Nabalus albus*.

RATTLEWEED, *Actæa racemosa*.

RATULA, *Raspatorium*.

RAUCE'DO, *Rau'citas*, *Parapho'nia rauca*, *Asper'itas Artēriæ as'pera*, *Vox rauca*, *Branchus*, *Hoarseness*, (F.) *Enrouement*, *Raucité*. A change in the voice, which loses its smoothness and becomes low and obscure. It is a common symptom in diseases of the larynx and trachea.

RAUCEDO CATARREA'LIS. Hoarseness from cold.

RAUCITAS, *Raucedo*.

RAUCITÉ, *Raucedo*.

RAUCOUS, *Raucus*. Hoarse; as a raucous voice—*Vox rauca seu raucis'ona*.

RAVE, *Brassica rapa*.

RAYONNÉ, *Radiated*.

RAYONS SOUS-IRIENS, *Ciliary processes*.

RAZOR, *Culter Tonsor'ius*, *Macha'ris*, *Norac'ula*, *Xyrum*, *Xyruis*, (F.) *Rasoir*, from *radere, rasum*, 'to shave.' An instrument for shaving. Used in surgery to remove hairs, where they would interfere with any operation.

REACHING, *Vomituration*.

REACTION, *Reac'tio*, from *re*, 'again,' and *agere, actum*, 'to act.' An action of resistance to a power applied. A species of vital movement or excitement, tending to prevent or destroy the effects of any noxious power applied to the animal economy, and which, by some, has been attributed to the *vis medicatrix nature*. It is certainly dependent on the organic instinctive actions of the frame. It is the state of activity which succeeds the action on the nervous system of certain morbid influences.

REAL'GAR, *Realgal*, *Arlada*, *Arladar*, *Auripigmentum rubrum*, *Arsenicum rubrum facti'tium*, *Abessi*, *Sandara'cha Græcorum*, *Red Sul-*

phuret of Mercury. A violent poison. See *Poison*.

REASON, *Ra'tio*, *Logos*, (F.) *Raison*. Same etymon as *Ratio*. The faculty or property of the mind by means of which man perceives the distinction between right and wrong, in physics as well as in morals. *Reason* is a just conclusion resulting from the comparison of two ideas, by virtue of which we form a judgment.

REBOLEA, *Mummy*.

REBONA, *Mummy*.

REBOUTEUR, *Renoueur*.

RECEIV'ER, *Ampulla*, (F.) *Ballon*, *Récipient*. In pharmacy, a wide-necked globular vessel, the neck of which widens gradually outwards, to receive the tapering beak of the retort in distillation. Like the retort, the receiver may be *plain* or *tubulated*.

A *quilled receiver* is one that has a tapering tube from its lower surface, which is inserted into a graduated bottle through a cork joint, when it is desirable to know accurately the amount of fluid that has passed over.

RECEPTACULA DURÆ MATRIS, *Sinuses of the dura mater*.

RECEPTACULUM CHYLI, 'receptacle of the chyle;' *R. Pecquet'i seu Pecquetia'num*, *Diversorium Chyli*, *Stagnum chyli*, *Sacculus chylifer seu ro'riser*, *Saccus lacteus*, *Alveus ampull'osus seu ampulles'cens*, *Utriculus lacteus*, *Vesic'ula chyli*, *Ampulla chylif'era seu chyli*, *Cister'na lumbaris*, *C. Chyli*, *Chylo cystis*, *Chylodochi'um*, *Lat'ices lactei*, *Lumbar cistern*, *Reservoir of Pecquet*, (F.) *Réservoir du chyle*, *R. de Pecquet*, *Citerne lombaire*. A considerable dilatation of the thoracic duct, in front of the lumbar region of the vertebral column. It is the commencement of the duct.

RECEPTACULUM COTURNI. A triangular space, formed by a separation of the two laminae of the dura mater of the internal ear, near the middle of the posterior surface of the pars petrosa of the temporal bone, where the aqueductus vestibuli terminates. It is always filled with the *Fluid of Cotugno*.

RECEPTACULUM PECQUETI, *R. Chyli*—r. *Sellæ equinae lateribus appositum*, *Cavernous sinus*.

RECEPTIVITY, *Receptiv'itas*, (F.) *Réceptivité*, from *recipere, receptum*, 'to receive.' A word used by Tissot to express the susceptibility of certain organs to receive morbid impressions.

RECEPTUM, *Prescription*.

RECESSIO, *Paroxysm*.

RECESSUS, *Abscess*, *Sinus*—r. *Sulciformis*, see *Fovea vestibuli*.

RECHAMALCA, *Rachamelea*.

RECHUTE, see *Relapse*.

RECIDIVA MORBI, *Relapse*.

RÉCIDIVE, see *Relapse*.

REC'IPĒ, (L.) (*re*, and *capere*, 'to take.')

A Latin word which signifies 'take,' (F.) *Prenez*, and with which prescriptions are commenced. It is, often, represented by *R*, *R̄*, and was formerly by *4*, the symbol of Jove. See *Abbreviation*.

RÉCIPIENT, *Receiver*.

RECIPROCATION, *VIBRATIONS OF*, see *Sound*.

RECLINATIO, *Reclination*—r. *Palpebrarum*, *Ectropion*.

RECLINATION, *Reclina'tio*, from *reclinare*, (*re*, and *clinare*, 'to bend,') 'to bend back.' A mode of operating for the cataract, which consists in applying the needle in a certain manner to the anterior surface of the cataract and depressing it into the vitreous humour, in such a way, that the front surface of the cataract is the upper one and its back surface the lower one.

RECLUSOR PALPEBRARUM, Levator palpebræ superioris.

RECOMPOSITION, Metasynchronis.

RECONVALESCENTIA, Convalescence.

RECORDATIO, Memory.

RECORDATUS, Memory.

RECORPORATIVUS, Metasynoritic.

RECOVERY, Restauratio.

RECREATIO, Restauratio.

RECREMENT, *Recremen'tum*, from *re*, and *cernere*, *cretum*, 'to sift.' A humour, which, after having been separated from the blood, is again returned to it; such as the saliva, the secretion of serous membranes, &c. Such fluid is said to be *recrementitial*, (F.) *Récrementeux*, *Récrementiel*.

RECREMENTA VESICÆ, Urine.

RECREMEN'TO-EXCREMENTIT'IAL. Applied to secreted fluids, as the saliva, bile, &c., which are in part reabsorbed and in part excreted.

RECREMENTUM, Recrement.

RECRUDESCEN'TIA, *Palincote'sis*, *Recrudescence*, from *re*, 'again,' and *crudus*, 'raw.' An increase of a disease after a temporary remission.

RECTAL, *Recta'lis*. Appertaining, or relating to, the rectum,—as 'rectal tube.' See Tube, rectal.

RECTIFICA'TION, *Rectifica'tio*, from *rectum* *facere*, 'to make right.' An operation by which certain liquids are purified by distilling them either singly or after admixture with other substances.

RECTI'TIS. A hybrid word, from *rectum*, and *itis*, denoting inflammation; properly *architis*, or *proctitis*. Inflammation of the rectum. *Proctitis*, *Proctalgia inflammato'ria*.

RECTOSTENOSIS, Stricture of the rectum.

RECTO-VAG'INAL, *Recto-vagina'lis*. That which relates or belongs to the rectum or vagina.

RECTO-VAGINAL FISTULA is owing to a preternatural communication between the rectum and vagina, through the above septum.

RECTO-VAGINAL SEPTUM, (F.) *Cloison recto-vaginale*, is formed by the junction—back to back—(or by what the French term *adossement*) of the rectum and vagina. It separates these two canals from each other.

RECTO-VESICAL, *Recto-vesica'lis*. Having relation to the rectum and bladder; as the "recto-vesical fold or pouch" of the peritoneum, between the rectum and bladder.

RECTUM; so called from a notion that it is straight. It is not so. *Intestinum Rectum*, *Apeuthys'menos*, *Euthyen'teron*, *Longaon*, *Longas*, *Longanon*, *Archos*, *Cys'saros*, *Princeps*, *Monocolon* (?). The third and last portion of the great intestine. It forms the continuation of the sigmoid flexure of the colon, occupies the posterior part of the pelvis, and extends from the left side of the sacro-vertebral articulation to the coccyx, before which it opens outwards by the orifice called the *anus*. It is cylindrical, but *sacrated*, as it were, at its inferior portion, where it is consequently larger, and is attached to the sacrum by the mesorectum. Like the other portions of the canal it is formed of three membranes. Towards the lower extremity, some parallel and longitudinal wrinkles are observable on its inner surface: these are the *Columna*, *Colum'næ car'næ* of the Rectum or of Morgagni, (F.) *Colonnes du rectum* ou de Morgagni. They are merely folds of the mucous membrane, between which is a number of *Lacunæ*. The arteries of the rectum are numerous. They proceed from the inferior mesenteric, hypogastric, and internal pudic, and are called *hemorrhoidal*. The veins open, partly

into the hypogastric vein, partly into the inferior mesenteric. The nerves proceed from the sciatic and hypogastric plexuses. The rectum receives the fecal matters, as they pass from the colon, which serves as a reservoir.

RECTUS ABDOM'INIS, (F.) *Pubio-sternal*, *Sterno-pubien* (Ch.), *Droit de l'abdomen*. A long flat muscle, situate at the anterior part of the abdomen, and separated from that of the opposite side by the linea alba. It is attached, above, to the cartilages of the last three true ribs; and, below, to the pubis by a very strong tendon, the outer edge of which is continuous with the fascia transversalis. This muscle is enclosed in an aponeurotic sheath; and, in its course, has three or four transverse aponeurotic interseptions. It bonds the chest on the pelvis, and conversely.

RECTUS ANTERIOR BREVIS, *Rectus capitis internus minor*—r. *Anterior longus*, *R. capitis internus major*—r. *Capitis anticus longus*, *R. c. internus major*.

RECTUS CAPITIS INTERNUS MAJOR, *R. internus major*, *R. anterior longus*, *Rectus capitis anticus longus*, (F.) *Trachélo-basilaire*, *Grand droit antérieur de la tête*. This muscle is long in proportion to its breadth, flat, and broader above than below. It is situate at the anterior and lateral part of the neck, and arises from the transverse processes of the third, fourth, fifth, and sixth cervical vertebræ. It is inserted into the basiliary process of the occipital bone.

RECTUS CAPITIS INTERNUS MINOR, *R. internus minor*, *Ren'uens*, *An'nuens*, *R. anterior brevis*, (F.) *Petit trachélo-basilaire*, *Petit droit antérieur de la tête*. This is situate deeper than the last. It is thin, flattened, irregularly quadrilateral, and passes from the anterior surface of the body of the first vertebra, near the origin of the transverse process, to be inserted into the basiliary process.

RECTUS CAPITIS LATERA'LIS, *R. lateralis Fallo'pii*, *Transversa'lis anticus primus*, *Rectus lateralis*, (F.) *Trachélo-atloïdo-basilaire*, *Atloïdo-sous-occipital* (Ch.), *Droit latéral de la tête*. There is a muscle of this name on each side of the head. It is flat, quadrilateral, and passes from the transverse process of the atlas to the occiput, behind the jugular fossa. It inclines the head to one side.

RECTUS CAPITIS POSTI'CUS MAJOR, *R. Major*, *R. Capitis posticus minor* (Albinus), *Spino-atloïdo-occipita'lis*, (F.) *Azloïdo-occipitale* (Ch.), *Grand droit postérieur de la tête*. A flat, triangular muscle, situate at the posterior and superior part of the neck. It extends from the spinous process of the second cervical vertebra to the external surface of the lower semicircular ridge of the occipital bone. This muscle extends the head, inclines it to one side, and causes it to experience a rotary motion, which directs the face to its side.

RECTUS CAPITIS POSTI'CUS MINOR, *R. minor*, (F.) *Tuber-atloïdo-occipital*, *Atloïdo-occipital* (Ch.), *Petit droit postérieur de la tête*. A flat, triangular muscle, situate beneath the last, which passes from the posterior arch of the atlas to the occipital bone. It extends the head.

RECTUS CAPITIS POSTI'CUS MINOR, *R. c. p. major*—r. *Cruris*, *R. femoris*.

RECTUS EXTERNUS OCULI, *Abductor oculi*, *Indignabun'dus*, *Indignato'rius*, *Iracun'dus*, (*Oculum movens secundus*, *Orbito-ertus-ocleroticus*). All the recti muscles of the eye, four in number, arise from the bottom of the orbit, and are inserted into the sclerotic coat of the eye. The *Rectus externus*, (F.) *Droit externe*, *Iracible* or *Abducteur*, is divided, at its posterior extremity, into two portions, one of which is attached to the

outer part of the foramen opticum, and the other to the sphenoid bone.

RECTUS FEMORIS, *Rectus sive Gracilis anterior, Rectus cruris*, (F.) *Ilio-rotulien, Droit antérieur de la cuisse*. A straight muscle, seated at the anterior part of the thigh. It extends from the anterior and inferior spine of the ilium and the cotyloid cavity of the patella. This muscle extends the leg upon the thigh, and conversely. It can, also, bend the thigh upon the pelvis or carry the pelvis forward.

RECTUS INFERIOR OCULI, *Depressor oculi, Timidus, Deprimens, Humilis, Oculum movens quartus*, (F.) *Sous-optico-sphéro-scléroticien, Droit inférieur ou abaisseur de l'œil, Muscle humble*, arises below the optic foramen, from the sphenoid bone. It depresses the eye.

RECTUS INTERNUS OCULI, *Adducens oculi, Bitorius, Oculi adductor, Oculum movens primus*, (F.) *Orbito-intus-scléroticien, Droit interne de l'œil ou adducteur ou bureur*. It arises from the sphenoid at the inferior part of the foramen opticum. It turns the eye towards the nose.

RECTUS SUPERIOR OCULI, *Attollens oculi, Attollens oculum, Levator oculi, Superbus, Elevator oculi, Oculum movens tertius*, (F.) *Sus-optico-sphéro-scléroticien, Droit supérieur ou éleveur de l'œil, Dédaigneux*, is attached to the circumference of the foramen opticum.

All the recti muscles are concerned in the voluntary motions of the eye. The oblique muscles have been supposed by Sir C. Bell to execute the involuntary. [?]

RECTUS INFERIOR FEMORIS, *Gracilis* — r. *Internus major, R. capitis internus major* — r. *Internus minor, R. capitis internus minor* — r. *Lateralis, R. capitis lateralis* — r. *Lateralis Fallopii, R. capitis lateralis* — r. *Major, R. capitis posticus major* — r. *Minor, R. capitis posticus minor*.

RECUBITORIUM, *Anacinterium*.

RECUPERATION, *Restauratio*.

RECUPERATIVE, *Recuperatory*, from *recuperatio*, 'recovery.' Restorative. Recovering. Belonging to recovery.

RECURRENT, *Recurrens*, from *recurrere*, (re, and currere), 'to run back.' A name given to several arterial and nervous branches, which seem to re-ascend towards the origin of the trunk whence they emanate.

RECURRENT ARTERIES. This name has been given to several arteries of the forearm, and to one of the leg. In the forearm, there are, 1. The *Radial recurrent, Artère récurrente de l'épicondyle* (Ch.), which arises from the superior part of the radial, and ascends between the supinator longus, s. brevis, and the brachialis internus. 2. The *anterior cubital recurrent, A. récurrente de l'épitrochlée* (Ch.), which arises from the upper and inner part of the cubital, and ascends between the pronator teres and brachialis internus. 3. The *posterior cubital recurrent*, which arises from the preceding artery, or from the cubital itself, and ascends between the olecranon and internal tuberosity of the humerus. 4. The *posterior radial recurrent, A. récurrente olécranienne* (Ch.). It arises from the posterior interosseous, and ascends between the posterior cubital and anconeus muscles. In the leg, — the *Arteria recurrens tibialis, A. récurrente du genou* (Ch.), is furnished by the anterior tibial, and ascends to the tibialis anticus muscle.

RECURRENT BANDAGES are formed by convolutions of the bandages, which make a kind of sap for the part — as the head — to which they are applied.

RECURVATIO, see *Hump*.

RECUTITUS, *Apella*.

REDBEAN, *Abrus precatorius*.

REDBERRY, *Arbutus uva ursi*, *Gaultheria*, *Panax quinquefolium* — r. *Bitter*, *Cornus Florida*.
RED HEAD, *Asclepias Carassavica* — r. *Root*, *Celastrus*, *Sanguinaria Canadensis* — r. *Swamp*, *Vaccinium oxycoccos*.

REDIMICULUM, *Diadema*.

REDINGOTES ANGLAISES, see *Condom*.

REDINTEGRATIO, *Regeneration, Restauratio*.

REDIVIA, *Paronychia*.

RÉDONNANCE, *Plethora*.

REDOUBLEMENT, *Exacerbation, Paroxysm*.

REDS, *Menses*.

REDUCTIO, *Taxis* — r. *Præputii Impedita, Phimosis*.

REDUCTION, *Reductio, Repositio, Restitutio, Diaplasia, Diaplasmus, Syntaxis*, from *re*, and *ducere, ductum*, 'to lead.' A surgical operation, the object of which is to restore displaced parts to their original situation. Thus, we say the reduction of a luxation, when the displaced parts are again brought to their proper relative situation. The reduction of a hernia is the restoration of the protruded parts to the cavity of the abdomen. This is, also, called *Taxis*.

In pharmacy, the process of restoring oxides, chlorides, sulphurets, &c., to the metallic state.

REDUNDANTIA, *Plethora*.

REDUVIA, *Paronychia*.

RED MACE, *Typha latifolia*.

REFECTIO, *Restauratio*.

REFECTIVA, *Analeptica*.

REFECTUS, *Restauratio*.

REFICIENTIA, *Analeptica*.

REFLECTION, *Duplicatura*.

REFLECTOR EPIGLOTIDIS. A muscle, which arises from the arytenoid cartilage and inner part of the thyroid, and is inserted into the lateral edges of the epiglottis.

REFLEX SYSTEM OF NERVES, see *Nerves*.

REFLEXIO PALPEBRARUM, *Ectropion*.

REFRACTION, *Refractio, Photocampsis, Diaplasia*, from *re*, and *frango*, 'I break.' The change of direction which rays of light experience when they pass obliquely from one medium into another of different density. If the light passes from a rarer to a denser medium, it approaches the perpendicular raised at the point of immersion. The contrary occurs, when it goes from a denser to a rarer medium. The theory of lenses, telescopes, and of the eye, rests entirely on this property of light.

RÉFRAICHISSANTS, *Refrigerants*.

RÉFRIGÉRANT, see *Alembic*.

REFRIGÉRANTS, *Refrigerantia, Psychica, Antitherma, Frigefacientia*, (F.) *Réfranchissans, Réfrigeratifs*, from *re*, and *frigere*, 'to cool.' Medicines which depress the morbid temperature of the body. The chief reputed refrigerants are the Potassæ Nitras (?), the Sodæ Boras (?), but chiefly the abstraction of caloric by ice and ice-drinks, cold water, cold lemonades, soda-water, and effervescing draughts internally; and externally, cool air, cold water, evaporating lotions, and frigorific mixtures.

RÉFRIGÉRATIFS, *Refrigerants*.

REFRIGERATOR, see *Alembic*.

REGENERATIO, *Reproduction*.

REGENERATION, *Regeneratio, Palingensia, Redintegratio*, from *re*, and *generare*, 'to beget.' Reproduction of a part of the body, which has been destroyed.

REGIMEN, from *regere*, 'to govern.' The rational and methodical use of food, and of every thing essential to life; both in a state of health and disease. It is often restricted, in its mean-

ing, to *Diet*. It is sometimes used synonymously with hygiene.

REGINA PRATI, *Spiræa ulmaria*.

REGIO, Region.

REGIO AURICULARIS. The region of the ear.

REGIO BUCCA' LIS. The region of the cheeks.

REGIO CARDIACA, Epigastric region.

REGIO CERVICA' LIS. The region of the neck. The cervical region.

REGIO EPIGASTRICA, Epigastrium.

REGIO FACIA' LIS. The facial region.

REGIO FRONTALIS. The frontal region.

REGIO GASTRICA, Umbilical region—r. Hypogastrica, see Hypogastrium—r. Hypochondriaca, Hypochondre—r. Iliaca, Iliac region—r. Inguinalis, Inguinal region—r. Ischiadica, Ischiadic region—r. Jugalis, Jugal region—r. Lumbalis, Lumbi—r. Mentalis, Mental region—r. Mesogastriaca, Umbilical region—r. Nasalis, Nasal region—r. Nuchæ, Nuchal region—r. Nuchalis, Nuchal region—r. Occipitalis, Occiput—r. Occipitalis inferior, Nuchal region—r. Perinæi, Perinæum—r. Præcordiaca, Præcordial region—r. Pubis, Pubic region—r. Stomachalis, Epigastric region—r. Stomachica, Epigastric region—r. Temporalis, Temple—r. Umbilicalis, Umbilical region.

REG'ION, *Re'gio*. Same etymon. Anatomists have called *regiona*, determinate spaces on the surface of the body or of different organs. Thus, the abdomen has been divided into several; to which different names have been given. See Abdomen, Epigastrium, Hypochondrium, Hypogastrium.

REG'ION OMBILICALE, Umbilical region.

REGIONAL ANATOMY, see Anatomy.

REGLES, Menses—r. *Dévôts*, Menstruation, vicarious—r. *Difficiles*, Dysmenorrhœa.

RÉGLISSE, Glycyrrhiza.

REGLUTINATIO, *Décollement*.

REGNE ANIMAL, see Animal.

REG'ULAR, *Regula'ris*, from *regula*, 'a rule.' According to rule. Applied to the types of a disease, and to the pulse, when according to rule.

REGULAR PRACTIT'IONER. One who practises his profession according to the rules established by law or custom.

REGULUS ANTIMONII, Antimonium.

REGURGITATION, *Regurgita'tio*. The act by which a canal or reservoir frees itself, without effort, from substances accumulated in it. Usually, it is applied to the *puing* or *posseting* of infants; and to the *rising* of solids or fluids into the mouth in the adult,—from *re*, and *gorge*, 'the throat.' What is called "vomiting at pleasure" is regurgitation.

The substances brought into the mouth by regurgitation, the French call *Renvois*.

REIN, Kidney.

REINE DES PRÈS, *Spiræa ulmaria*.

REINERZ, MINERAL WATERS OF. Reinerz is a small town in Silesia, three German miles from Glatz. The waters are acidulous chalybeates. The principal springs are the tepid drinking spring, the cold spring, and three bathing springs.

REINFORCEMENT, FASCIC'ULUS OF, *F. Cineat'us*. A band of fibres from the *corpus inominatum*, or lateral part of the antero-lateral column of the medulla, which is continued up behind and around the corpus olivare, is lined on its inner or central surface with cineritious substance, enlarges as it ascends, passes over the upper surface of the pons Varolii, and is expanded into the optic thalamus. It thus forms, in its course, the anterior paries of the fourth ventricle, and is brought into view by brushing away the

tuberculum cinereum or gray matter of the ventricle. The band has received these names owing to its constantly increasing as it ascends, and being mixed up with gray matter on its inner face, from which it seems to derive new fibres.

REINS, Kidneys, Lumbi.

REJECTIO, *Anago'ge*, from *re*, and *jacere*, 'to cast.' Every excretion by the mouth; spitting, expectoration, regurgitation, or vomiting.

REJECTIO SANGUINIS & PULMONIBUS, Hemoptysis.

REJUVENES'CENCE, *Rejuvenescen'tia*, from *re*, 'again, and *juvenescens*, 'growing young;' (*juvenis*, 'a youth'). A renewal of youth. The state of being young again. The assumption of the characteristics of youth by the aged.

RELACHEMENT, Relaxation.

RELAPSE, *Hypot'ropæ*, *Epi'tropæ*, *Hypotrophê*, *Morbi recidi'va*, *Hypotropiad'mus*, from *re*, 'again,' and *labor*, 'I fall down.' The return of a disease, during, or shortly after, convalescence. The French use *Rechute* in this sense; and *Récidive* (*Morbus recidi'vus*) for the return of a complaint, at a greater or less period after the complete restoration of health.

The terms *Relapsing fever*, *Short fever*, *Five-day fever*, *Seven-day fever*, *Billious Remittent fever*, *Remitting Icteric fever*, and *Mild Yellow fever*, have been given to a form of continued fever, which has occasionally appeared epidemically, as in Edinburgh, in 1843 and 1847, and was generally attended with icteric symptoms. The main phenomena disappeared at about the end of a week; but in many cases a relapse occurred about the end of a fortnight. Few died of the affection.

RELAPSING FEVER, see Relapse.

RELATIO, *Rapport*.

RELATION, FUNCTIONS OF, see Function.

RELAX'ANT, *Laxans*, *Malact'icum*, *Chalacticum*, *Parelticum*, (F.) *Relaxant*, from *re*, and *laxare*, 'to loose.' A medicine which diminishes the tension of organs. Mucilaginous and fatty substances are relaxants.

RELAXANTIA, Emollients.

RELAXATIO CORDIS ET ARTERIARUM, Diastole.

RELAXA'TION, *Relaxa'tio*. Same etymon. *Chalact'is*, *Chalact'mos*, (F.) *Relachement*. In Physiology, relaxation is opposed to contraction. In Pathology, it means great looseness of a part.

RELEVEUR DE L'ANUS, Levator ani—r. *de la Lèvre inférieure*, Levator labii inferioris—r. *du Menton*, Levator labii inferioris—r. *de l'Omoplate*, Levator scapulæ—r. *de la Prostata*, Levator prostatae—r. *de l'Urèthre*, Levator urethrae.

RELIQUAT, (F.) The remnant or remnant of a disease.

REMAK FIBRES, see Fibres, Remak.

REMANSIO MENSIIUM, Amenorrhœa.

REMÈDE, Clyster, Medicament—r. *de Cupuchin*, Liqueur hydrargyri nitrici—r. *de Derrand*, Liqueur anodynus terebinthinatus—r. *du Duc d'Antin*, Liqueur hydrargyri nitrici.

REMEDIAL, Medicinal.

REMEDiate, Medicinal.

REMEDILESS, Incurable.

REMEDIUM, Juvans, Medicament—r. Dentifricium, Dentifrice.

REMEDY, Medicament—r. English, *Cinchona*.

REMISSIO, Decline, Remission—r. Cordis et Arteriarum, Diastole—r. Morbi, Remission—r. Virium, Atony.

REMIS'SION, *Remis'sio*, *Epan'esis*, *An'esis*, *Submis'sio*, *Aph'esis*, *En'do'is*, *Remis'sio*, *Mis'esis*, from *remittere*, (*re*, and *mittere*, 'to send')

'to relax.' In a more extensive signification, a temporary diminution of the symptoms of a disease, either acute or chronic, *Remissio morbi*. Diminution in the febrile symptoms, such as occurs in a remittent fever, between the exacerbations.

REMITTENS ICTERODES, Fever, yellow.

REMITTENT, *Remittens*. Same etymon. Any disease which presents remissions.

REMITTENT OF CHILDREN, Fever, infantile remittent.

REMITTENT FEVER, *Febris remittens*, *Epanctus*, *Exacerbating*, *paroxysmal*, *sub-continual*, *endem'ic*, *endem'ial* or *endem'ical* fever, (F.) *Fièvre rémittente*, is one which strikingly exacerbates and remits, but without intermission. The ordinary bilious fever of the United States is a simple remittent—*Epanctus mitis*, (F.) *Fièvre rémittente simple*.

REMITTENT FEVER, BILIOUS, Remittent fever, see Relapse.

REMITTING ICTERIC FEVER, see Relapse.

REMORA, from *remorari*, (*re*, and *mora*, 'delay,') 'to arrest.' The name of two surgical instruments, intended to retain parts *in situ*. The one was used, formerly, in castration, to prevent the intestines from protruding at the inguinal ring; the other, called *Remora Hilda'ni*, (F.) *Arrêt d'Hildan*, *Echene'is*, was employed to maintain fractures and luxations reduced. It is not now used.

REMORA ARATRI, *Ononis spinosa*.

REN, Kidney.

RENAL, *Renalis*, from *Ren*, 'the kidney.' That which relates to the kidney.

RENAL ARTERIES, *Emulgent Arteries*, are very large and short, and commonly two in number—one to each kidney. They arise from the sides of the abdominal aorta, forming with it a right angle. The left is commonly a little more anterior and elevated than the right. After a short course, they arrive at the fissure of the kidney, where they divide, before entering it, into three or four very considerable branches.

RENAL CAPSULE, Capsule, renal—*r.* Nerve, see Splanchnic Nerves.

RENAL PLEXUSES, *Emulgent Plexuses*. These are two:—one on each side. They proceed from fasciuli of the solar and coeliac plexuses; from the outer side of the semilunar ganglion and the final expansion of the small splanchnic nerves. These plexuses begin by three or four ganglions, situate at the commencement of the renal artery; and they give off from their circumference many fine, straight filaments, which do not anastomose, and which enter the kidney with the divisions of the renal artery. These divisions they accompany.

RENAL VEINS, *Emulgent Veins*. These are very large. Their roots follow the same course as the arteries in the substance of the kidney. In the fissure or pelvic portion of the kidney, they unite into a single trunk, which passes transversely inwards, and opens at the side of the vena cava descendens.

RENCHUS, Snoring, Stertor.

REN'CULUS, *Renic'ulus*, *Ren'ulus*, diminutive of *Ren*, 'a kidney.' A small kidney. A lobe of the kidney.

RENES SUCCENTURIATI, Capsules, renal.

RENICULUS, Renculus.

RENIFORM, Nephroid.

RENNES, MINERAL WATERS OF. Thermal salines in the department of Aube, France,

containing carbonic acid and chloride of magnesium. Temperature 103 to 121°, of Fahr.

RENNET, *Runnet*, from (G.) *gerinnen*, 'to coagulate.' (?) When the fourth stomach or *Abomasus* of the calf is salted and dried, it possesses the property of coagulating milk, when a portion of it is soaked in water, and the infusion—*Rennet*—is added to milk.

RENNET WHEY, see Serum lactis.

RENNSELÆRIA, *Leptandra Virginica*.

RENONCULE, *Ranunculus*—*r.* *Bulbosus*, *Ranunculus bulbosus*.

RENOUÉE, *Polygonum aviculare*.

RENOUEUR, (F.) *Rebouteur*, *Rhabilleur*. A bone-doctor:—a bone-setter. One who makes a trade of reducing fractures and dislocations.

RENOVATIO, Ananeosis.

RENUENS, *Rectus capitis internus minor*.

RENULUS, Renculus.

RENUM ATONIA, *Nephratonia*—*r.* *Paralysis*, *Nephratonia*.

RENUNCIATIO, *Rapport*.

RENVERSEMENT DE LA LANGUE, *Paraglossa*—*r.* *de la Matrice*, Uterus, inversion of the—*r. des Paupières*, *Ectropion*—*r. du Rectum*, *Proctocoele*—*r. de la Vessie*, *Exocyste*, *Exstrophia* of the bladder.

RENVOIS, see Regurgitation.

REPANDATIO, Lordosis.

REPARATION, Restauratio.

REPARATIVE, *Reparatory*. Having the power of restoring or repairing.

REPELLENTIA, Repellents.

REPELLENTS, *Repellentia*, *Repercussiva*, *Apocrus'tica*, *Repercussiva*, (F.) *Répercussifs*, from *re*, and *pellere*, 'to drive.' Medicines which, when applied to a tumefied part, cause the fluids, that render it tumid, to recede, as it were, from it. Astringents, cold water, ice, &c., are repellents.

RÉPERCUSSIFS, Repellents.

REPERCUSSIO, *Contra-fissura*, *Repercussion*.

REPERCUSSION, *Repercussio*, *Anac'lastis*, from *re*, *per*, and *quater*, 'to shake or batter.' Disappearance of a tumour or cutaneous eruption, in consequence of the application of a repellent. The action of a repellent remedy. The French writers use the term *Délitescence*, *Délitescencia*, for the sudden disappearance of a tumour, inflammation, eruptive disease, or purulent collection, without the disease occurring in any other part of the body: in this respect *délitescence* differs from *metastasis*: *Délitescence* of an inflammation or 'sudden disappearance' is distinguished by certain French pathologists from *Resolution*. *Repercussion* also means *Ballotement*.

REPERCUSSIVES, Repellents.

REPERCUTIENTIA, Repellents.

REPLETION, Fulness, Plethora.

REPLI LONGITUDINAL DE LA MENINGE, Falx cerebri.

REPOSITIO, Anaplasia, Reduction, Taxis.

REPOUSSOIR, Punch—*r. d'Arêtes*, Probang.

REPRIMENS, Epischeticus.

REPRODUCTION, *Reproduc'tio*, *Regenera'tio*, from *re*, and *producere*, (*pro*, and *ducere*.) The function by which living bodies produce bodies similar to themselves. See Generation. As a general remark, it will be found true, that the larger animals are uniparous; and the smaller, which are more exposed to destruction, multiparous. The mammalia being of the same natural class as man, it may be useful to compare them in this respect.

COMPARATIVE TABLE OF REPRODUCTION IN THE CLASS MAMMALIA.

Species.	Age capable of engendering.	Duration of gestation.	Number of young at each birth.	Period of cessation of the function.	
<i>Primates.</i>					
Man	14 years	9 months	1 to 3	At a somewhat advanced age.	
Monkeys (large).....	3 years	7 months	Do.		
Do. (long tailed)	2 years	6 months	Do.		
<i>Carnivora.</i>					
Bear	2 years	112 days	1 to 4	25 to 30 years.	
Badger	3 to 4	20 to 25 years.	
Hedgehog	1 year	1 mo. and 10 days	3 to 5	Produces during life.	
Ferret	11 months	Do.	5 to 9 twice a year		
Otter	3 months	3 to 4	10 years. (?)	
Pole-cat, Marten, Weasel, and Ermine, Didelphus, Opossum, and Philander, Lion	before 1 year	56 days	3 to 6		
Tiger, Leopard	2 years	3 to 4 months	3 to 4		
Lynx	Do.	3 months	4 to 5		
Wild Cat	before 1 year	9 weeks	3 to 4		
Wolf	2 years	56 days	4 to 6		
Dog, in the most natural state, }	10 months	73 days	5 to 9		
Fox	1 year	63 days	3 to 6		
Jackall	2 months	Do.		
Isatis	Do.	5 to 8		
Phoca	63 days	6 to 7		
.....	3 months (?)	2 to 3		
<i>Rodentia.</i>					
Squirrel	1 year	45 days	3 to 4 twice a year	Produces during life.	
Flying Squirrel	3 to 4	Do.	
Ondatra	3 to 5	Lives 6 years.	
Beaver	4 months	2 to 3	Lives 8 years. Lives 8 or 9 years. Produces during life. Do. Do. Do.	
Hare	1 year	30 days	{ 2 to 4 several } times a year		
Rabbit	6 months	Do.	4 to 8 do.		
Rat	Do.	5 or 6 weeks	5 to 6 do.		
Mouse	Do.	1 month	Do.		
Marmot	6 weeks	2 to 4		
Guinea Pig	5 to 6 weeks	3 weeks	5 to 8 times a year		
Dormouse	1 year	3 to 5		
<i>Edentata.</i>					
Armadilla	4 times a year		7 to 8 years. (?)
<i>Ruminantia.</i>					
Camel	4 years	11 months or 1 y'r	1	40 to 50 years.	
Dromedary	Do.	Do.	1	Do.	
Buffalo	3 years	9 months	1	15 to 18 years.	
Beef	2 years	Do.	1 to 2	9 years.	
Lama	3 years	Do.	12 years.	
Reindeer	2 years	8 months	1	Lives 16 years.	
Buck and Doe	1½ year	Do.	1 to 2	Lives 25 or 30 years.	
Roebuck	Do.	5 months	Do.	Lives 12 or 15 years.	
Saiga (Antelope).....	1 year	Do.	Do.	Lives 15 or 20 years.	
Chamois and Wild Goat	Do.	Do.	1, 2, and 3	Lives 18 or 20 years.	
Goat	Do.	Do.	Do.	7 years.	
Musimon	1½ year	Do.	1 to 2	8 or 10 years.	
Sheep	1 year	Do.	Do.	8 years.	
<i>Solipedes.</i>					
Horse	2½ years	290 days	1 to 2	25 or 30 years.	
Ass	Do.	Do.	Do.	Do.	
Zebra	Do.	Do.	Do.	Do.	
<i>Pachydermata.</i>					
Hog	9 months or 1 year	4 months	10 to 20	15 years.	
Elephant	16 years (?)	9 to 11 months	1 or 2	Lives 70 years. (?)	
Rhinoceros	5 years (?)	1 or 2 (?)	Lives 60 years. (?)	
Hippopotamus	1	Lives 60 years. (?)	
Morse	9 months	1		

REPULSORIUM, Punch.
 REPURGATIO, *Anacathar'ia*, from *re*, and *purgare*, 'to cleanse.' According to Castelli—purgation by transpiration or by expectoration. Medicines producing this effect are called *Repurgan'tia*.
 REQUIES, Acinesia.
 REQUIETIO, Acinesia.
 RES CONTRA-NATU'RAM. 'Things against

nature,' (F.) *Choses contre-nature*, are those things which tend to destroy man;—as disease, and every thing connected with it.
 RES CULINARIA, Culinary art—r. *Medica Medicina*.
 RES NATURA'LES, (F.) *Choses naturelles*. Those things, which, by their union, were conceived to constitute the nature of man; such as the elements, temperaments, humours, spirits, &c.

RES NON NATURALES, (F.) *Choses non-naturelles*. Those things which, anciently, formed the matter of hygiene. See Non-naturals.

RES VENEREA, Coition—r. Vestiaria, Vestitus.

RÉSEAU, Rete—r. Admirable, Rete mirabile—r. Merveilleux, Rete mirabile.

RESECTIO, Resection—r. Articulorum, see Resection.

RESECT'ION, *Resect'io*, from *resicare*, (*re*, and *secare*,) 'to cut off.' A name, given, especially by the French surgeons, to operations in which the carious extremities of long bones, or the unconsolidated extremities of fractured bones forming irregular joints, are removed with the saw—*Resectio articulo'rum*, *Decapita'tio articulo'rum*.

RESECT'ION, see Amputation.

RESEDA CRISPATA—r. luteola—r. Lanceolata—r. luteola.

RESEDA LUTE'OLA, *R. lanceolata* seu *cripa'ta*, *Lute'ola*, *Weld*, *Dyer's Weed*. A European plant naturalized in the United States, which was at one time used as a diaphoretic and diuretic.

RESERANS, Aperient.

RESERVE AIR, see Respiration.

RESERVOIR DE LA BILE, Gall-bladder—r. *de Chyle*, Receptaculum chyli—r. *des Larmes*, Lachrymal sac—r. of Pecquet, Receptaculum chyli—r. *de Pecquet*, Receptaculum chyli—r. of the Thymus, see Thymus.

RESIDENTIA, Sediment.

RESIDUAL AIR, see Respiration.

RESIMUS, Camus.

RESIN, *Resi'na*, *Rheti'na*. A vegetable product, commonly dry and concrete, more or less brittle, inodorous or slightly odorous, insipid, or of an acrid warm taste; of a smooth, glassy fracture, heavier than water, inflammable, insoluble in water, soluble in alcohol, ether, and yolk of an egg, and negatively electrifiable by friction. Many resins are used in medicine; the greater part are purgative and irritating. Some act like acrid poisons.

RESIN, CAYENNE, Caoutchouc—r. of the Spruce fir, see Pinus abies.

RESINA, Resin—r. Abietis, Pinus Abies, Pinus picea—r. Abietis humida, Pinus abies—r. Abietis sicca, see Pinus abies—r. Alba, see Pinus sylvestris—r. Alba humida, see Pinus Abies—r. Cayennensis, Caoutchouc—r. Copal, Copal—r. Elasticæ, Caoutchouc—r. Flava, see Pinus sylvestris—r. Fluida Canadensis, see Pinus balsamea—r. Juniperi, Sandarac—r. Laricis, see Pinus larix—r. Lentiscina, see Pistachia lentiscus—r. Liquida pini balsameæ, see Pinus balsamea—r. Liquidi pini laricis, see Pinus larix—r. Nigra, Colophonia—r. Pini, see Pinus sylvestris—r. Pini empyreumatica liquida, see Pinus sylvestris—r. Pini abietis sponte concreta, see Pinus abies—r. Strobilina, see Pinus balsamea, and Pinus mughos—r. Terebinthi, see Pistachia terebinthus.

RESINA'TUM, *Rhetino'ton*. An epithet for wine impregnated with resin, and used by the ancients as a stomachic.

RESINE DE GAIAC, see Guaiacum—r. *Gosmart*, see Bursera gummifera—r. *de Lierre*, see Hederæ helix.

RESINOCERUM, *Rhetinoce'ron*, from *pyrrus*, 'resin,' and *ceros*, 'wax.' A mixture of resin and wax.—Galen.

RESOLUTIO, Resolution—r. Membrorum, Paralysis.

RESOLUTIO MORBI. The resolution or disappearance of a disease; especially when without any critical evacuation.

RESOLUTIO ET DIABROSIS VENTRICULI, Gastro-malacia—r. Nervorum, Paralysis—r. Ventriculi autoptica, Gastro-malacia—r. Virium, Dialysis.

RESOLUTION, *Resolut'io*, *Discus'sio*, from

resolvere, (*re* and *solvere*, 'to loosen.') Removal or disappearance, as of a disease. Resolution is one of the terminations of inflammation, in which the inflamed part returns gradually, and without suppuration, to the healthy condition.

RÉSOLUTION DES MEMBRES, Paralysis. RESOLVENTIA, Discutients.

RES'ONANCE, (F.) *Retentissement*, *Résonance*, *Résonnement*, from *re*, 'again,' and *sono*, 'I sound.' 'A return of sound.' A resounding; a reverberation of sounds. A thrilling of the voice more loud than natural; or its existence in a part where it is not heard in health,—as detected by auscultation. A thickened and hardened state of the lungs, caused either by a mass of crude tubercles, or by inflammation, is generally considered to produce this phenomenon, by rendering the lung a better conductor of the murmur of the voice in the bronchi. Hence the origin of the term *Bronchoph'ony*, from *βρονχος*, 'bronchus,' and *φωνη*, 'the voice;' (F.) *Voix bronchique*, *Voix tubaire*, *V. bourdonnante*.

RESONANCE, VIBRATIONS OF, see Sound.

RESONITUS, Contra-fissura.

RES'ONANT, *Res'onans*, *Res'onus*, (F.) *Retentissant*, *Resonnant*, Resounding, see Resonance.

RÉSONNANCE, Resonance.

RÉSONNEMENT, Resonance.

RESORBENS, Absorbent.

RESORPTIO, Absorption, Resorption—r. Cutanea, see Absorption—r. Cutis, see Absorption.

RESORP'TION, *Resorp'tio*, from *resorbere*, (*re*, 'again,' and *sorbere*,) 'to absorb again.' Absorption of a fluid which has been previously deposited in a part by the exhalants,—as of pus, blood, serum, &c.

RESPIRABLE, *Respirab'ilis*. Same etymology as Respiration. Capable of being breathed. Adapted for respiration.

RESPIRAMEN, Respiration.

RESPIRAMENTUM, Respiration.

RESPIRATIO, Respiration—r. Abolita, Apnoea—r. Brevis, Dyspnoea—r. Difficilis, Dyspnoea—r. Stertens, Stertor—r. Stertuosa, Stertor.

RESPIRA'TION, *Respira'tio*, *Anap'noë*, from *respiro*, (*re*, and *spiro*,) 'I take breath.' *Anap'neusis*, *Pneusis spira'tio*, *Respira'men*, *Respiramentum*, *Respira'tus*, *Respir'itus*, *Spir'itus*. A function proper to animals, the object of which is, to place the materials of the blood—the mixture of the venous blood with lymph and chyle—in contact with atmospheric air, in order that it may acquire the vivifying qualities that belong to arterial blood. The organs for executing this function are, in the mammalia, birds, and reptiles, the *lungs*. In man, the respiration consists of mechanical and chymical phenomena. The mechanical are *Inspiration* and *Expiration*. The evident chymical phenomena consist in the formation of a certain quantity of carbonic acid, the absorption of a part of the oxygen of the air, and the disengagement of a quantity of water in the state of vapour. In the healthy condition the respiration is easy, gentle, regular, and without noise. In man, the respirations are generally about 35 per minute in the first year of life; 25 during the second; 20 at puberty; and 18 in the adult age.

The air of respiration has been divided into, *first*, the *residual air* or that which cannot be expelled from the lungs but remains after a full and forcible expiration, estimated at 120 cubic inches: *secondly*, the *supplementary or reserve air* or that which can be expelled by a forcible expiration, after an ordinary outbreathing, valued at 130 cubic inches: *thirdly*, the *breath, tidal or breathing air*, valued at 26 cubic inches: and *fourthly*, the *complementary or complemental air*, or that which

can be inhaled after an ordinary inspiration, which amounts to 100 cubic inches. This estimate gives 250 cubic inches as the average volume of air which the chest contains after an ordinary expiration.

RESPIRATION BRONCHIQUE, see Murmur, respiratory — *r. Exagérée*, see Puerile — *r. Hyperventriculaire*, see Puerile.

RESPIRATION, JERKING, (F.) *R. saccadée*. When the murmur of inspiration, in place of being continuous, is interrupted as by starts, it is called 'jerking.' It is a concomitant of incipient pleurisy, pleurodynia, spasmodic asthma, and tuberculosis of the lung with corresponding pleuritic adhesion. — Walshe.

RESPIRATION OF THE CELLS, Murmur, respiratory — *r. Metallic*, *Tintement métallique* — *r. Nulle*, see Murmur, respiratory — *r. Proof*, *Docimasia pulmonum* — *r. Puerile*, see Puerile — *r. Râpeuse*, see Murmur, respiratory — *r. Rude*, see Murmur, respiratory — *r. Silencieuse*, see Murmur, respiratory — *r. Saccadée*, *R. jerking* — *r. Soufflante*, Murmur, respiratory — *r. Supplémentaire*, see Puerile — *r. Tubal*, see Murmur, respiratory.

RESPIRATOR, same etymon. Various instruments, under this name, have been devised for the purpose of tempering the air before it reaches the lungs in winter. One of the best is that of Jeffrey, which is made of several layers of fine wire tissue.

RESPIRATORIUM VENTRIS, Diaphragm.

RESPIRATORIUS, Respiratory.

RESPIRATORY, *Respiratorius*, same etymon. Appertaining to respiration. An epithet applied to the murmur heard by auscultation in a healthy adult, during inspiration and expiration. It marks the entrance of the air into the cells, and its passage out of them. See Murmur.

RESPIRATORY, EXTERNAL NERVE, see Thoracic nerves — *r. Internal*, nerves, Diaphragmatic Nerves — *r. Nerve of the face*, Facial Nerve — *r. Superior*, nerve, Spinal Nerve.

RESPIRATORY TRACT, *Tractus respiratorius*. The middle column of the spinal marrow, described by Sir Charles Bell as that whence the respiratory nerves originate. See Nerves.

RESPIRATUS, Respiration.

RESPIRITUS, Respiration.

RESSERRÉ, (VENTRE.) Constipation.

RESTA BOVIS, *Ononis spinosa*.

RESTAGNATIO, Eructation.

RESTAURANS, Corroborant.

RESTAURATIO, *Refectio*, *Refectus*, *Analeptis*, *Anatreptis*, *Anacom'idis*, *Anall'esia*, *Anact'esia*, *Apocatus'tasis*. Restoration of strength, after disease or great fatigue; *Epanortho'sis*, *Recreatio*, *Redintegratio*, *Restauratio virium*. Return of the organs to their normal condition. *Recovery*, *Recuperation*, *Reparation*.

RESTAURATIO VIRIUM, see Restauratio.

REST HARROW, *Ononis spinosa*.

RESTIFORMIS, from *restis*, 'a rope,' and *forma*, 'shape.' Shaped like a rope, as the 'Corpora restiformia.'

RESTIFORMIS PROCESSUS, Coracoid.

RESTITUTIO, Reduction — *r. Organica*, *Morioplastice* — *r. Partium deperditarum*, *Morioplastice*.

RESTLESSNESS, Agitation.

RESTORATION, Restauratio.

RESTORATIVE, Corroborative.

RESTRICTIO INTESTINI RECTI vel ANI, Stricture of the rectum.

RESUMPTIVUS, *Resumptorius*; from *re*, 'again,' and *umere*, 'to take.' Causing to resume. *Resumptivum*. Any agent calculated to restore flesh and strength to one who has been reduced.

RESUMPTORIUS, *Resumptivus*.

RESURRECTION-MAN, *Resurrectionist*.

RESURRECTIONIST, *Resurrectionist*, *Body snatcher*: from *re*, and *urgere*, 'to arise.' An individual who violates the sanctuaries of the grave to obtain subjects for dissection.

RESUSCITATION, *Resuscitatio*, from *resuscitare*, (*re*, and *suscitare*, *sursum citare* seu *civem*), 'to move up,' 'to stir up anew.' *Resuscitatio*. The restoration of persons, apparently dead, to life. See Asphyxia and Suffocation.

RETCHING, Vomiturition.

RETE, Plexus — *r. Malpighii*, *Corpus mucosum*.

RETE, *Reticulum*; 'a net;' *Dietyon*, (F.) *Réseau*. A name given to the interlacing and decussation of blood-vessels, lymphatics, fluxus, and nerves when they form a kind of network.

RETE has also been applied to the *epilepsia* — Castelli.

RETE MAJUS, Epiploon, gastro-colic.

RETE MIRABILE, (F.) *Réseau admirable*, *R. merveilleux*. A name given to the ramifications and anastomoses of the internal carotid and vertebral arteries at the base of the brain.

RETE MIRABILE vel **RETE VASCULOSUM MALPIGHII** is the plexus formed on the cells of the lungs by the minute ramifications of the pulmonary artery.

RETE MUCOSUM, *Corpus mucosum*.

RETE seu **RETE VASCULOSUM TESTIS**. An irregular plexus or network, formed by the communication of the *Vasa recta* at the upper and back part of the testicle. These *Vasa recta* are sent out at the back part of the testicle, from the convoluted seminal tubes. The *Rete Vasculosum testis* sends out from twelve to eighteen straight tubes, called *Vasa efferentia*, which convey the semen from the testes to the epididymis.

RETENTIO, Retention — *r. Aerea*, *Dyspnoea* — *r. Alvina*, *Constipation* — *r. Biliis*, *Ischocholia*.

RETENTIO FLUXUS HÆMORRHOÏDALIS. Suppression of the hæmorrhoidal flux.

RETENTIO FETUS, *Dystocia* — *r. Lactis*, *Ischocholia* — *r. Lochiorum*, *Ischiolochia* — *r. Mensium*, see *Amenorrhœa* — *r. Spermatis*, *Ischo-permia* — *r. Sudoris*, *Hydroschesia*.

RETENTION, *Retentio*, *Apoplepsia*, *Apoplepsia*, from *retinere*, (*re*, and *tenere*), 'to hold back.' Accumulation of a solid or liquid substance in canals intended for its excretion, or in a reservoir, intended to contain it for a short period.

RETENTION OF URINE: *Paruria Retentiva vesicalis*, *Ischuria vesicalis*, *Retentio Urinæ*, (F.) *Rétention d'urine*. A disease in which the urine accumulated in the bladder cannot be evacuated; or, at least, cannot be passed without extreme difficulty. In the former case, the retention is said to be *complete*; in the latter, *incomplete*. Many writers have distinguished three degrees of this affection, to which they have given the names *Dysuria*, *Strangury*, and *Ischuria*. Retention of urine may depend upon loss of contractility, paralysis of the bladder, &c., or on some obstacle to the passing of the urine, as in cases of pressure of the womb on the bladder, of tumours in its vicinity, foreign bodies in its cavity, inflammation of the urethra, swelling of the prostate, stricture, &c. The pain is extremely violent, and the bladder may be found distended above the pubis. The treatment consists in introducing the catheter, or puncturing the bladder, and in combating the cause, which has produced the retention, by particular means adapted to each case.

RETENTISSANT, Resonant.

RETENTISSEMENT, Resonance — *r. Autophonique*, see *Autophonia*.

RETIA UTERI, see *Uterus*.

RETICULAR, *Retiform*, *Reticularis*, *Retinæ*, *Amphiblestroïdes*, *Dyctoi'des*, *Retiformis*, from *rete*, 'a net.' That which resembles a net. An epithet applied to many structures in the body.

RETICULAR BODY, *Corpus mucosum*—r. Substance, Cellular tissue.

RETICULARIA OFFICINALIS, *Lichen pulmonarius*.

RETICULUM: diminutive of *rete*, 'a net.' The *Bonnet* or *Honeycomb bag*—the second stomach of the ruminant animal. See also, *Epiploon*, and *Rete*.

RETICULUM CUTANEUM, *Rete mucosum*—r. *Mucosum*, *Rete mucosum*.

RETIFORM, *Reticular*.

RETINA, from *rete*, 'a net:' *Tu'nica retinæ seu reticularis seu retiformis seu intima oculi*, *Involucrum reti comparatum*, *Verricularis membrana*, *Amphiblestroïdes membrana*. A soft, pulpy, grayish, semi-transparent, very thin membrane; extending from the optic nerve to the crystalline, embracing the vitreous humour, and lining the choroid; without, however, adhering to either of those parts. It terminates by a defined edge—*margo dentatus*—at the posterior extremities of the ciliary processes. It is constituted, according to most anatomists, by the expansion of the optic nerve. The retina appears to be formed of two laminae; so joined together, that it is almost impossible to separate them. The one—the innermost—is medullary, and pulpy; the other—the outer—is stronger, and fibro-vascular. The retina is the essential organ of vision; on it the images of objects are impressed. Both it and the optic nerve are devoid of general sensibility. They may be punctured or lacerated without pain being experienced. The nerve of general sensibility distributed to the eye is the fifth pair.

RETINACULA, see *Retinaculum*—r. *Morgagnii*, see *Fœna* of the valve of *Baubin*.

RETINACULUM, from *retinere*, (*re*, and *tenere*), 'to hold back.' A surgical instrument, formerly used in the operation of castration; and in that of hernia, to prevent the intestines from falling into the scrotum.—*Scullet*. *Retinacula* are also band-like extensions of a cellulose-membranous structure, which seem to suspend the ovum in the *Follicle* of *De Graaf*. They appear to correspond to the *chalazæ* of the egg of the bird.

RETINACULUM, *Bride*.

RETINACULUM TENDINUM PERONEORUM, *Vaginata malleolaris externa*. The ligamentous sheaths that retain in situ at the outer ankle the tendons of the peroneal muscles.

RETINITIS, *Inflammatio Retinæ*, *Amphiblestroiditis*, *Dietyitis*, from *retina* and *itis*, a suffix denoting inflammation,—a term of hybrid formation. Inflammation of the retina; an uncommon affection, except as an accompaniment of other forms of ophthalmia.

RETINOSCOPY, *Retinoscopia*, from *retina*, and *scopus*, 'I view.' Examination of the retina.

RETINUS, *Reticular*.

RETORT', *Retorta*, *Batia*, *Cornu*, *Cornuta*, *Cornesita*, *Cornumusa*, (F.) *Cornue*, from *retorqueo*, (*re*, and *torqueo*, *tortum*), 'I bend back.' A vessel, commonly of glass or earthenware, employed in distillation. It may be *plain*, or have a *tubulure* for admitting substances whilst the distillation is going on. In the latter case, it is said to be *tubulated*, (F.) *Cornue tubulée*.

RETRAC'TION, *Retractio*, from *retrahere*, (*re* and *trahere*), 'to draw back.' State of a part, when drawn towards the centre of the body or backwards;—as retraction of the testicles.

Sometimes it is used synonymously with *shortening* or *drawing up*; as in retraction of the thigh.

RÉTRACTION DE LA MATRICE, *Retroversio uteri*.

RETRACTOR ANGULI ORIS, *Buccinator*.

RET'RAHENS AURIS, *Posterior Auris*, *Tri-caudalis*, *Triceps Auris*, *Retrahens Auriculæ*, *R. Auriculam*, *Secundus propriorum Auriculæ*, *Bicaudalis*, *Dep'rimens Auriculæ*, *Proprius Auris externæ*, (F.) *Mastoido-conchinien*, *Mastoido-orculaire* (Ch.), *Auriculaire postérieur*. It consists of one or more small fasciculi or fleshy, thin, somewhat irregular fibres, situated behind the ear. These are attached to the mastoid process, and pass horizontally forwards, to terminate at the convexity formed by the concha of the ear. If this muscle had any use, it would carry the ear backwards.

RÉTRÉCISSEMENT, *Aretatio*, *Stricture*.

RETRIMENTA VESICÆ, *Urine*.

RETRIMENTUM, *Excrement*.

RETROCESSION, *Retroces'sio*, *Retroces'sus*, *Retrogres'sus*, from *retrocedere*, (*retro*, 'backwards,' and *cedere*, 'to give place.')

The act of going back. A disappearance or metastasis of a tumour, eruption, &c., from the outer part of the body to the inner.

RETROCESSUS, *Retrocession*.

RETROFLEXIO UTERI, *Retroversio uteri*.

RETROGRESSUS, *Retrocession*.

RETROPHARYNGE'AL, *Retropharynge'us*, from *retro*, 'backwards,' and *pharynx*, 'the pharynx.' Relating to parts behind the pharynx,—as '*retropharyngeal abscess*,'—an abscess behind the pharynx.

RÉTROPULSION DE LA MATRICE, *Retroversio uteri*.

RETROVACCINATION; from *retro*, 'backwards,' and *vaccination*. Vaccination with matter obtained from the cow, after inoculating the animal with vaccine matter from the human subject.

RETROVER'SIO U'TERI, *Retroversion of the Uterus*, *Ædopto'sis Uteri retrocer'sa*, *Retroflex'io Uteri*, *Anapod'isis seu Anapodi'mus Uteri*, (F.) *Rétroversion*, *Rétraction*, *Obliquité* ou *Rétropulsion de la Matrice*. A change in the position of the uterus, so that the fundus of the organ is turned towards the concavity of the sacrum, whilst the neck is directed towards the symphysis pubis. This displacement is commonly attended with constipation, tenesmus, and retention of urine. Its usual period of occurrence is between the third and fourth months of pregnancy; before the uterus has escaped above the superior aperture of the pelvis. In the treatment, the catheter must be regularly used twice a day, until the uterus, by its growth, rises above the pelvis. The catheter should be small, flat, and curved considerably more than common, in consequence of the distorted course of the urethra. The bowels must be kept open; and absolute rest, in a recumbent posture, be enjoined. Should it be impracticable to draw off the urine, attempts must be made to replace the uterus. The woman being on her hands and knees, the fore and middle fingers of the accoucheur's left hand are to be passed up the rectum to the fundus uteri; which they must elevate, whilst the cervix uteri is carefully depressed by two fingers of the right hand in the vagina. Should the fingers employed to elevate the fundus not be long enough to effect this object, a piece of whalebone may be substituted, having a small piece of sponge attached to one extremity as a pad.

RÉTROVERSION DE LA MATRICE, *Retroversio uteri*.

REUNIO, Synthesis—r. Partium separatarum, see Synthesis—r. per Primam intentionem, see Intention—r. per Secundam intentionem, see Intention—r. Vasorum, Anastomosis.

RÉUNION PRIMITIVE, see Intention—r. Secondaire, see Intention.

RÉVASSERIE, Incoherence; see Somnium.

RÊVE, Somnium.

REVEIL, see Sleep—r. en Sursaut, see Sleep.

REVELLENT, Derivative.

REVERY, Aphelia.

REVIVIFICATION, Resuscitation.

RÉVULSIF, Derivative.

REVULSION, *Recul'sio*, from *re*, and *vellere*, 'to pluck'; *Antis'pasia*. The act of turning the principle of a disease from the organ in which it seems to have taken its seat. Rubefacients, vesicatories, bleeding in the foot, &c., are often used for this purpose. See Derivation.

REVULSIVE, Derivative—r. Bleeding, see Bloodletting.

REVULSORIUS, Derivative.

REX METALLORUM, Aurum.

REYNOLDS'S SPECIFIC, see Vinum colchici.

RHA, Rheum.

RHABBARBARUM, Rheum—r. Album, Convolvulus mechoachan—r. Antiquorum, Rheum Rhaponticum—r. Dioscoridis, Rheum Rhaponticum—r. Monachorum, Rumex patientia—r. Nigrum, Convolvulus jalapa—r. Pauperum, Thalictro—r. Sibericum, Rheum—r. Tartaricum Rheum—r. Turcicum, Rheum.

RHABARBE, Rheum—r. Blanche, Convolvulus mechoachan—r. des Moines, Rumex Alpinus.

RHABDOIDES (SUTURA), Sagittal suture.

RHABILLEUR, Renoueur.

RHACHETÆ, Rhachitæ.

RHACHETRUM, Medulla spinalis.

RHACHIELI, Rhachitæ.

RHACHIAGRA, Rachisagra.

RHACHIALGIA, Rachialgia, Rhachiodynia, Spinal irritation.

RHACHIALGITIS, Spinal irritation, Myelitis.

RHACHIDAGRA, Rachisagra, Rachialgia, Rhachiodynia.

RHACHIOCYPHOSIS, Gibbositas.

RHACHIODYN'IA; from *ραχις*, 'the vertebral column,' and *δύνη*, 'pain'; *Rhachial'gia*. Pain in the vertebral column.

RHACHIOMYELITIS, Myelitis.

RHACHIOPLEGIA, Paraplegia.

RHACHIOSCOLIOMA, Scoliosis.

RHACHIOSCOLIOSIS, Scoliosis.

RHACHIOSTROPHOSIS; from *ραχις*, 'the vertebral column,' and *στρέφω*, 'I turn'; *Contortio colum'næ vertebra'lis*. Deviation of the vertebral column.

RHACHIOTOMUS, *Rhachiot'omum*; from *ραχις*, 'the vertebral column,' and *τομή*, 'incision.' An instrument for opening the vertebral column.

RHACHIPARALYSIS, Paraplegia.

RHACHIPHUMA, Rachiphyma.

RHACHIRRHEUMA, Lumbago.

RHACHIS, Vertebral column—r. Nasi, see Nasus.

RHACHISAGRA, Rachisagra.

RHACHI'TÆ, from *ραχις*, 'the vertebral column'; *Rhachia'ci*, *Rachi'tæ*, *Rhache'tæ*, or *Rachia'ci*. The muscles of the spine.

RHACHITES, Medulla spinalis.

RHACHITICUS, Rachiticus.

RHACHITIS, Rachitis—r. Adulorum, *Mollities ossium*—r. Spinalis, Rachisagra.

RHACHITISMUS, Rachitis.

RHACHOSIS, Rachosis.

RHACHUS, *Rhacus*, *Rhagus*; from *ρᾶσσις*, 'to tear.' A wrinkle. A laceration of the skin. A lacerated ulcer—*ulcus lac'erum*.

RHACUS, Rhachus, Wrinkle.

RHÆBOCRANIA, Torticollis.

RHAG'ADES, *payades*, *Rhaga'dia*; from *ρᾶσσις*, 'to break or rend'; *Sciara'ra*, *Fim'ra*, *Fimæ*. Ruptures, chaps, or narrow and long ulcers, which form near the origin of mucous membranes, especially around the anus, and which are generally owing to the syphilitic virus.

RHAGADES, see Fissure.

RHAGÈ, *Ragè*; *payæ*. Same etymon. A suffix denoting violent rupture or discharge, as in *Hemorrhage*, *Menorrhagia*, &c.

RHAGE, Fissure.

RHAGES, *Uvæ passæ*.

RHAGODEITIS, Uveitis.

RHAGOIDES, *Rhago'des*, *Rhagoideus*, *Rhagicus*, from *ράξ*, 'a grape.' Grape-like; as *Fenica Rhagoideis*: the uvea. Also, the choroid coat of the eye.

RHAGUS, Rhachus, Wrinkle.

RHAMNUS, *Rhamnus catharticus*, *Spina cervi'na seu domes'tica*, *Rhamnus soluti'vus*, *Spina infecto'ria*, *Cervi'pi'na*, *Buckthorn*, *Purging buckthorn*, (F.) *Nerprun purgatif*. Family, *Rhamnoidæ*. *Sex. Syst.* Pentandria Monogynia. The berries—*Rhamni Bacca*—have a faint and disagreeable odour; and bitterish, nauseous taste. They are cathartic, and are apt to excite griping which must be obviated by the use of diluents.

RHAMNUS ALATERNUS, *R. Hispan'icus*, *Alaternus latifo'lius*, *Common alaternus*, (F.) *Alaternus*. The leaves have been used as detergents and astringents, in the form of gargle especially.

RHAMNUS FRAX'GULA. The *Black Alder*, *Frangula Alnus*, *Alnus Nigra*, (F.) *Aune noir*, *Bourdane*, *Bourgène*. All the parts of this tree as well as of the common alder, are astringent and bitter. The bark is most so. The inner, yellow bark of the trunk or root acts as a cathartic. It has also been employed as an antihelmintic.

RHAMNUS HISPANICUS, *R. alaternus*—r. *Jujuba*, see *Jujube*—r. *Lotus*, see *Jujube*—r. *Ziziphus*, see *Jujube*.

RHANTER, Canthus, (greater.)

RHAPHANEDON, Raphanedon.

RHAPHANIA, Raphania.

RHAPHANIS, Raphanus hortensis.

RHAPHANUS, Raphanus hortensis.

RHAPHÆ, Raphe, Suture.

RHAPHOSYMPHY'SIS; from *ρᾶσις*, 'suture,' and *σύνψυσις*, 'union.' Union by suture,—as of the bones of the cranium.

RHAPHYS, Raphanus hortensis.

RHAPONTICUM, Rheum Rhaponticum—r. *Vulgare*, *Centaurea centaurium*.

RHAPONTIQUE, Rheum rhaponticum.

RHAPS, Raphanus hortensis.

RHAPYS, Raphanus hortensis.

RHATANIA, *Krameria ratanbia*.

RHAX, see *Vitis vinifera*.

RHEGE, Cramp, Contusion, Laceration.

RHEGMA, Cramp, Contusion, Laceration, Rhexis—r. *Ligamentare*, *Apospasma*.

RHEGMUS, Cramp, Contusion, Laceration.

RHEMBASMUS, Somnambulism.

RHEMBE, *Rhembus*; from *ρᾶσις*, 'to wander about.' Irregularity in the return of febrile paroxysms.

RHEMBUS, Rhembe.

RHENCHUS, Rattle, Snoring.

RHENXIS, Rattle, Snoring.

RHEON, Rheum.

RHETINE, Resin.

RHETINOCERON, Resinatum.

RHETINOTON, Resinatum.

RHEUM, (pronounced *room*.) *Rheu'ma*, (F.)

Rhume; from *reu*, 'to flow.' Any thin watery discharge from the mucous membranes or skin; as the thin discharge from the air passages arising from cold.

RHEUM, SALT. A popular name in the United States, like 'tetter,' for various cutaneous affections of the eczematous and herpetic forms more especially. It is at times applied to a kind of chronic psoriasis; and likewise to cutaneous affections in those who immerse the hands in metallic or acid solutions. Webster defines it "a vague and indefinite popular name, applied to almost all the non-febrile cutaneous eruptions which are common among adults, except ringworm and itch."

RHEUM, *Rhabar'barum*, *Rheon*, *Rha*, *Rhœum*, *Lap'athum orient'alē*, *L. Chinen'sē*, *Rhabar'barum ve'rum*, *R. Tartar'icum*, *R. Siber'icum*, *R. Tur'cicum*, *Rhubarb*, (F.) *Rhabar'be*. Family, *Polygonæ*. *Ser. Syst.* *Enneandria Trigynia*. The root—*Rhœum*—is the part used in medicine. Its odour is aromatic, peculiar, and rather nauseous; taste, somewhat aromatic, subacid, bitterish, and astringent. It colours the saliva and the urine yellow. It is easily pulverized, and forms a powder of a bright buff-yellow colour. Both water and spirit extract its virtues. Rhubarb root is purgative, stomachic and astringent. (?) It is chiefly used for the properties first mentioned. Externally, the powder is sometimes sprinkled over ulcers, to assist their granulation. Dose, ℥j to ℥ss of the powder. In a smaller dose, it is stomachic.

Numerous species of Rheum, *Rh. palmatum*, *Rh. undulatum*, and *Rh. compactum*, have purgative roots.

The rhubarbs most used in the United States are the *Chinese* or *India Rhubarb*—*Rheum Sinen'sē* vel *Indicum*; the *Russian*, *Turkey*, or *Bucharian Rhubarb*—*Rheum Rus'sicum* vel *Tur'cicum*; and *European Rhubarb*.

RHEUM COMPACTUM, Rheum—r. *Indicum*, see Rheum—r. *Palmatum*, Rheum.

RHEUM RHAPON'TICUM, *Rhapon'tic Rhubarb*; *Rhapon'ticum*, *Rhabar'barum Dioscor'idis*, *R. Antiquo'rum*, (F.) *Rhapon'tique*, *Rhapon'tic*. The root of this seems to have been the rhubarb of the ancients. It is more astringent than that of the rheum palmatum, and less purgative; for the latter purpose, two or three drachms being required for a dose. *French*, *Rhapon'tic*, or *Krimea Rhubarb*, is obtained from this species, as well as from *Rh. undulatum*, and *Rh. compactum*.

RHEUM RUSSICUM, see Rheum—r. *Sinense*, see Rheum—r. *Turcicum*, see Rheum—r. *Undulatum*, see Rheum.

RHEUMA, Catarrh, Diarrhoea, Rheum, Rheumatism. Also, inflammation of a fibrous tissue, as in rheumatism and gout.—Fuchs.

RHEUMA CATARRHALE, Bronchitis, (chronic)—r. Epidemicum, Bronchitis, chronic, Catarrh, epidemic—r. Pectoris, Catarrh—r. Uteri, Leucorrhœa.

RHEUMAPYRA, Rheumatism, acute.

RHEUMARTHRTIS, see Rheumatism, acute.

RHEUMARTHROSIS, see Rheumatism, acute.

RHEUMATALGIA, Rheumatism, chronic—r. Arthritica, see Rheumatism, acute.

RHEUMATIC, *Rheumat'icus*, *Rheumat'ic mal*, (F.) *Rhumat'icale*, *Rhumat'ique*. Belonging to rheumatism; as rheumatic fever. Also, applied to one affected with rheumatism; (F.) *Rhumat'icant*.

RHEUMATIC DIATHESIS, *Diath'esis rheumat'ica*. The special condition of the body that gives occasion to rheumatism. It may exist without presenting the usual phenomena in the joints; whilst the heart may be seriously affected.

RHEUMATISM, *Catarrhœ'a*; from *ρρμα*, 'a defluxion, catarrh.' *Dolor Rheumat'icus et arthrit'icus*, (Hoffman,) *Rheumat'o'is*, *Myosot'is*, *Rheuma*, *Myodyn'ia*, (F.) *Rhumatisme*. A kind of shifting phlegmasia, sometimes seated in the muscles, sometimes in the parts surrounding the joints; and at others, within them. Hence the names *Muscular*, *Articular*, and *Synovial*, which have been applied to it. The disease may be acute, or chronic.

RHEUMATISM OF THE ABDOMEN, *Cœliorheuma*.

RHEUMATISM, ACUTE, *Rheumat'ismus acutus*, *Rh. articulo'rum acutus*, *Rh. univers'al'is febr'il'is*, *Arthro'ria acuta*, *Rheumatismus*, *Rh. inflammato'rius seu hyperethen'icus*, *Rheumat'ic Fever*, *Rheumatop'ya*, *Rheumap'ya*, *Febris rheumat'ica inflammato'ria*, *Syn'ocha rheumat'ica*, *Myosot'is*, *Myit'is*, *Cau'ra rheumat'ismus*, *Arthrit'is rheumat'ismus*, *Arthro-rheumat'ismus*, *Synov'itis rheumat'isma'lis*, *Hæmo-arthrit'is*, (F.) *Rhumatieme aiguë*, *Fièvre rhumat'icmale*, usually comes on with the ordinary symptoms of fever; soon after which, or simultaneously, or even before the appearance of febrile signs, excruciating pains are felt in different parts of the body, particularly in the larger joints, which are more or less red and swollen; the pain shifting from one to the other, at times with great rapidity. The disease rarely terminates in less than six weeks, during the greater part of which period the febrile symptoms remain severe; and what is peculiar to the disease, the skin may be covered daily with a profuse perspiration, although it feels extremely hot, and the pulse appears in no way modified by it. It is one of the essential symptoms of the affection, and consequently affords no relief. The only danger to be apprehended from acute rheumatism, notwithstanding the apparent severity of the symptoms, is the translation or extension of the disease (*metastatic rheumatism*) to some internal part, especially to the heart. This tendency must always be borne in mind. *Acute* rheumatism seldom terminates in *chronic*; they who are liable to the former are rarely so to the latter, and conversely. The disease will generally run its course in spite of treatment. The usual antiphlogistic plan had better be pursued during the first days of the disease. Blood-letting may be employed, if the vigour of the patient and of the disease seem to require it; but, although the blood is generally buffy, bleeding does not usually seem to afford much relief. The bowels must be kept open; effervescent draughts be administered, and opium be given in full doses to allay pain. This is, generally, all that is necessary during the first week; after which, advantage will usually be obtained from the exhibition of the sulphate of quinia with sulphuric acid. It does not augment the excitement, and will be found proper in almost all cases. Rheumatic inflammation is very different from other varieties, and this may account for the anomaly. After a few weeks, the disease usually goes off, but leaves the patient very liable to a recurrence on slight exposures or errors of diet: at times, acute rheumatism of the joints puts on the appearance of gout, and seems to be a complication of the two affections. It is then called *Gouty* or *Arthrit'ic rheumatism* or *Rheumatic gout*, *Rheumat'al'gia arthrit'ica*, *Rheumarthro'is*, *Rheumarthrit'is*, *Arthrit'is rheumat'ica seu juven'il'is*.

RHEUMATISM OF THE ARM, *Brachiorheuma*—r. *Arthritic*, see Rheumatism, acute—r. of the

Bladder, Cystorrhœma—r. of the Bowels, Enterorrhœma.

RHEUMATISM, CAP'SULAR, *Rheumatismus capsularis*. Rheumatism seated in the lining membrane of the joints and bursæ of the tendons. The parts most liable to its attacks are the feet and hands, where it is generally easily recognised by the enlargement of the joints; but the peculiar characters of the disease are, perhaps, most strikingly seen when it attacks the knee.

RHEUMATISM OF THE CHEST, Pleurodynia.

RHEUMATISM, CHRONIC, *Arthrosia chronica, Rheumatismus chronicus seu nonfebrilis, R. vulgaris seu inveteratus seu habitualis seu frigidus, Rheumatologia, Rheumatodynia, Arthrodynia, Arthritis arthrodynia, (F.) Rhumatisme chronique, Rhumatisme,* is attended with pains in the hips, shoulders, knees, and other large joints. These are, sometimes, confined to one joint; at others, shift from one to another, without occasioning inflammation, or fever. In this manner, the complaint often continues for a great length of time, and then goes off. There is no danger attendant upon it; but the patient may become lame, and is always liable to painful recurrences. Neither variety generally terminates in suppuration; but effusion of coagulable lymph is apt to occur, so as to occasion permanent thickening of the parts. The great preventive of chronic rheumatism, and one of the most valuable curative agents, is fannel, worn next the skin. The whole class of rubefacients may, also, be used with advantage. The warm bath, especially the natural warm bath, the temperature of which does not vary, is perhaps the most successful remedy of all.

RHEUMATISM OF THE EXTREMITIES, Acorrhœma—r. of the Face, Prosorrhœma—r. Gouty, see Rheumatism, acute—r. of the Heart, Cardiorrhœma—r. Lead, see Lead rheumatism—r. of the Leg, Scelorrhœma—r. of a Limb, Merorrhœma—r. Local, Merorrhœma—r. of the Loins, Lumbago—r. Metastatic, see Rh. acute—r. of the Neck, Torticolis—r. Partial, Merorrhœma.

RHEUMATISM, PRÆABDOMINAL, (F.) *Rhumatisme pré-abdominal.* Rheumatism of the muscles of the anterior and lateral portions of the abdomen; supposed by MM. Gênest and Requin to be the same as the *nervous affection of the peritoneum* of Gooch.

RHEUMATISM OF THE SKIN, see Dermalgia—r. Topical, Merorrhœma—r. of the Uterus, Metorrhœma.

RHEUMATISM, VISCERAL. Rheumatism affecting the muscular or fibrous tissues of the viscera.

RHEUMATISM WEED, *Pyrola maculata, P. umbellata.*

RHEUMATISMAL, Rheumatic.

RHEUMATISMUS, Abdominis, Coeliorrhœma—r. Acutus, Rheumatismus, acutus—r. Articulorum acutus, Rheumatismus, acutus—r. Brachii, Brachiorrhœma—r. Cancerosus, Neuralgia faciei—r. Cervicis, Torticolis—r. Colli, Torticolis—r. Cordis, Cardiorrhœma—r. Cruris, Scelorrhœma—r. Dorsalis, Lumbago—r. Extremitatum, Acorrhœma—r. Faciei, Prosorrhœma—r. Febrilis, Dengue—r. Inflammatorius seu hyperthênicus, Rheumatismus acutus—r. Intestini, Enterorrhœma—r. Intestini cum ulcere, Dysentery—r. Larvatus, Neuralgia faciei—r. Localis, Merorrhœma—r. Membrorum singulorum, Merorrhœma—r. Non febrilis, Rheumatismus, acutus—r. Partialis, Merorrhœma—r. Pectoris, Pleurodynia—r. Phlegmonodes, Myositis—r. Spurius nervosus, Neuralgia—r. Universalis febrilis, Rheumatismus, acutus—r. Uteri, Merorrhœma—r. Vesicæ urinariæ, Cystorrhœma

r. Vulgaris seu inveteratus seu habitualis seu frigidus, Rheumatismus, chronic.

RHEUMATODYNIA, Rheumatismus, chronic.

RHEUMATOPHTHALMIA, *Rheumatophthalmia;* from *ρρημα*, 'rheumatism,' and *οφθαλμια*, 'inflammation of the eyes.' Rheumatic ophthalmia.

RHEUMATOPYRA, Rheumatismus, acutus.

RHEUMATOSIS, Rheumatismus.

RHEUMOPHTHALMIA, Rheumatophthalmia, Sclerocentesis.

RHEXIS, *Rhegma, Diruptio, Ruptio, Ruptura, Rupture.* Rupture of a vessel or organ. Spontaneous opening of an abscess.

RHEXIS OCULI. Bursting of the eye from any cause; spontaneous or excited.

RHICNOSIS, from *ρικνωμαι*, 'to become wrinkled; *Cutis corrugatio.* Wrinkling of the skin from extenuation of the body; opposed to *arrens*, or distension from repletion.

RHIGOS, Rigor.

RHIN, Nasus.

RHINALGIA, *Rhinodynia,* from *ριν*, 'the nose,' and *αλγος*, 'pain.' Pain in the nose.

RHINALGIA AB INTRUSIS. Pain in the nose from foreign bodies.

RHINALGIA VERMINOSA. Pain in the nose from worms.

RHINAN'CHONÈ, *Rhinangia, Rhinostegosis;* from *ριν*, 'the nose,' and *αγγων*, 'narrowness.' Contraction of the nose. Snuffles.

RHINANGIA, Rhinangione, Snuffles.

RHINCHOS, Rostrum.

RHINENCEPHALIA, Cyclopia.

RHINEN'CHYSIS, *Rhinenchysia,* from *ριν*, 'the nose,' *εν*, 'in,' and *χυω*, 'I pour.' An infusion or injection, made into the nostrils, with a syringe called *Rhinenchites*.

RHINES, Nares.

RHINI'TIS, *Nasitis,* from *ριν*, *ρινος*, 'the nose,' and *ιτις*, denoting inflammation. Inflammation of the nose. Coryza.

RHINITIS ULCEROSA, OZENA.

RHINOBLENNORRHOEA, Rhinorrhœa.

RHINOC'ACÈ, *Coryza scarlatina;* from *ριν*, 'the nose,' and *ακος*, 'evil.' The offensive discharge from the nose, and other symptoms indicating a morbid condition of the Schneiderian membrane that accompany the worst forms of scarlatina.

RHINOCATARRHUS, Coryza.

RHINOCNES'MUS, from *ριν*, 'the nose,' and *κνημος*, 'itching.' Itching of the nose.

RHINODYNIA, Rhinalgia.

RHINOPHO'NIA, from *ριν*, 'the nose,' and *φωνη*, 'the voice.' A nasal voice, called, also, *Dysphonia immodulata nasalis, Paraphonia nasalis, Paraphonia resonans, Pællismus nasitas, Mycterophonia, Nasitas, Vox nasalis, Parala'lia nasalis.* Speaking through the nose.

RHINOPLAS'TIC, *Rhinoplastica* (ars), from *ριν*, 'the nose,' and *πλασσω*, 'I form.' An epithet applied to the operation for forming a new nose. The *Tulliacotian operation*, so called because described by Tagliacozzi. It consists in bringing down a portion of flesh from the forehead, and causing it to adhere to the anterior part of the remains of the nose.

RHINOP'TIA, from *ριν*, 'the nose,' and *επιτομαι*, 'I see.' The act of seeing over the nose. Squinting over the nose.

RHINORRHAGIA, Epistaxis.

RHINORRHAPHY, *Rhinorrhaphia,* from *ριν*, 'nose,' and *ραφην*, 'a suture.' An operation for the removal of epicanthis, which consists in pinching up a longitudinal fold of the skin, including this fold in two elliptical incisions, remo-

ving it, and bringing together the edges of the wound by harelip suture.

RHINORRŒA, *Rhinoblenorrhœa*, from *ῥίνας*, 'the nose,' and *ῥέω*, 'I flow.' A discharge of limpid mucus from the nose without any inflammatory symptom. A gleet from the nose.

RHINO'SIS, from *ῥίνας*, 'a skin, leather,' or from *ῥιγος*, 'rugous.' The state of looseness and excess of skin observed in phthisis. — Vogel.

RHINOSTEGNOSIS, Rhinanchone.

RHIPTASMUS, Jactation.

RHIPTOLUSIA, Afusion.

RHIS, Nîsus.

RHIZA, Radix.

RHIZAGRA, Punch.

RHIZOMA, *Rhizome*, from *ρίζα*, 'a root.' The part of the root of a plant, which consists of wood or flesh, as in the carrot.

RHIZOPHAGUS, from *ρίζα*, 'a root,' and *φαγεῖν*, 'I eat.' One who lives on roots.

RHIZOTOMIST, see Simples.

RHIZOTOMUS, Apothecary.

RHOA, Punica granatum.

RHODELÆON, *Oleum rosa'rum*. Oil of roses, or oil impregnated with roses.

RHO'DIA, *Rhodi'ola ro'sea*, *Rosea*, *Rosewort*, (F.) *Rhodi'ole*. *Sex. Syst.* Diœcia Octandria. The root, *Roseroot*, when dry, has a very pleasant smell, and is slightly astringent. It is not used.

RHO'DINUS, *Rho'dius*, *Rosa'ceus*, *Ro'seus*, *Rosa'tus*. Rosy. Formed of, or containing, roses.

RHODIOLA ROSEA, Rhodia.

RHODIOLE, Rhodia.

RHODITES VINUM. Wine in which roses have been macerated.

RHO'DIUM LIGNUM, *Rhodium* or *Rosewood*. The wood or root of a tree supposed to be *Geni'sta Canarien'sis* of Linnæus. (F.) *Bois de rose*, *Bois de Chypre*. Family, Leguminosæ. *Sex. Syst.* Diadelphica Decandria. The essential oil is a perfume, and possesses cordial and tonic virtues. Its smell is attractive to fish, rats, &c.

RHODIUS, Rhodius.

RHODOPHANNIS, Nerium oleander.

RHODODENDRON CHRYSAN'THEMUM, *R. chrysan'thum seu au'reum seu officina'le*, the *Olean'der*, *Rose-bay*, *Yellow rhododendrum*, *Mountain Laurel*, (F.) *Rosage*, *R. chrysanthe*. *Nat. Ord.* Ericaceæ. *Sex. Syst.* Decandria Monogynia. This plant has been recommended in rheumatism, gout, and syphilis. In an overdose, it produces acro-narcotic symptoms.

RHODODENDRON MAX'IMUM, *Great Laurel*, *American Rose-bay*. An indigenous shrub, *Order*, Ericaceæ, which flowers in July. It is stimulant and astringent, and has been used by the Indians in gout and rheumatism.

RHODOMELA PALMA'TA, *Dulse*, *Sac'charine Fucus*. One of the Algæ, eaten in large quantities throughout the maritime countries of the north of Europe, and in the Grecian Archipelago.

RHODOMELI, Mel rosæ.

RHODON, *Rosa centifolia*.

RHODOSACCHARUM, Confectio rosæ gallicæ.

RHODOSTACTON, Mel rosæ.

RHODOSTAGMA, Aqua rosæ.

RHŒA, Punica granatum.

RHŒAS, Papaver rhœas.

RHOEBDESIS, Absorption.

RHŒUM, Rheum.

RHOGMOS, Rattle.

RHOI'TES, *poirns*, a wine impregnated with the pomegranate; from *ῥοίς*, *Pomegranates*, — Dioscorides. A confection, made by boiling the

juice of the pomegranate in honey. — Paulus of Ægina.

RHOMBOÏDEUS, from *ῥομβος*, 'a rhombus,' whose sides are equal, with two obtuse and two acute angles. *Rhomboides major* and *minor*, *Rhomboi'des*, *Cervici-dorso-scapulaire*. A muscle situate at the posterior inferior part of the neck, and at the posterior part of the back. It has a rhomboidal shape, and is attached, by its inner edge, to the posterior cervical ligament, and to the spinous processes of the last cervical vertebra, and of the first four or five dorsal. By its outer edge, it is attached to the spinal or posterior edge of the scapula. It is divided into two fasciculi, constituting the *Rhomboides major* and *minor*, the latter being situate higher than the other. This muscle draws the scapula backwards and upwards, and impresses upon it a rotatory motion, which brings its inferior angle nearer to the spine; and, consequently, depresses the anterior angle and the shoulder.

RHOMBOS, *ῥομβος*. A bandage mentioned by Galen, so called on account of its rhomboidal shape.

RHONCHAL, *Rhoncha'lis*, from *ronchus*, 'rattle.' Relating or appertaining to rhonchus; — as 'rhonchal fluctuation,' the fremitus that occurs through the influence of respiration as an attendant on cavernous rhonchi. — Walshe.

RHONCHUS, Rattle, Snoring, Stertor.—r. Cavernous, see Gurgling.—r. Cavernulous, see Gurgling.—r. Crepitans, *Râle crépitant*—r. Crepitans Redux, see Crepitant.—r. Mucous, see *Râle muqueux*—r. Sibilans, see *Râle crépitant*—r. Sibilus, *Râle sibilant*—r. Sonorus, *Râle sonore*—r. Subcrepitant, see *Râle muqueux*.

RHOPALISMUS, Prinpismus.

RHOPALOSIS, Plica, Pupil, Uvea.

RHOPE, Congestion.

RHOTACISMUS, Rotacism.

RHUBARB, Rheum — r. Chinese, see Rheum — r. French, Rheum Rhaponticum — r. India, see Rheum — r. Krimea, Rheum Rhaponticum — r. Monk's, Rumex Alpinus, Rumex patientia—r. Poor man's, Thalictron—r. Rhapontic, Rheum Rhaponticum—r. Russia, see Rheum—r. Turkey, see Rheum—r. Wild, Convolvulus panduratus.

RHUBARBE FAUSSE, Thalictron — r. *des Pauvres*, Thalictron.

RHUE, Ruta.

RHUMATALGIE, Rheumatism, chronic.

RHUMATIQUE, Rheumatic.

RHUMATISANT, Rheumatic.

RHUMATISMALE, Rheumatic.

RHUMATISME, Rheumatism — r. *Aigu*, Rheumatism, acute—r. *Chronique*, Rheumatism, chronic — r. *Præabdominale*, Rheumatism, præabdominal — r. *de l'Utérus*, Metrorrhœuma.

RHUME, Rheum — r. *de Cerveau*, Coryza — r. *de Poitrine*, Catarrh.

RHUS CORIA'RIA, *Sumach*, *Shumach*, *Rhus Glabrum*, *Adu'rion*, *Elm-leaved Sumach*, (F.) *Sumac des Corroyeurs*. Family, Terebinthaceæ. *Sex. Syst.* Pentandria Monogynia. This is the only species of the genus rhus that is innocent. Both the leaves and berries have been used as astringents and tonics.

RHUS GLABRUM, Rh. coriaria.

RHUS RADI'CANS, *Rhus vernix*, *Poison vine* (America). This plant is poisonous (see Poisons, Table of), and is extremely acrid, when applied to the skin, producing erysipelas and vesications, and has been used, like the next variety, in paralysis and other nervous affections.

RHUS SYLVESTRIS, Myrica gale.

RHUS TOXICODEN'DRON, *Toxicoden'dron*, *Poison Oak* (America), (F.) *Sumac vénéneux*. This plant has been used in paralytic affections and cutane-

ous eruptions. It is poisonous, like the last. Dose, gr. ss to gr. iv.

RHUS VERNIX, Rh. radicans.

RHYPARIA, Rupia, Sordes primarum viarum.

RHYPOS, Sordes.

RHYPTICA, Detergents.

RHYPTICUS, Abstergent.

RHYSIS, Flux.

RHYSMUS, Rhythm.

RHYSSEMA, Wrinkle.

RHYTHM, *Rhythmus*, *Rhyemus*, 'measured movement.' The order or proportion, as regards time, which reigns between the different movements of an organ—as of the heart;—or of the organism in health and disease. Thus, rhythm is applied to the diurnal variations of the pulse; and to the paroxysmal movements of an intermittent.

RHYTHMICAL, Periodical.

RHYTHMICAL CONTRACTIONS OF MUSCLES, are those that succeed one another after regular intervals.

RHYTHMUS, Rhythm.

RHYTIDOSIS, Rutidosis.

RIB, Costa—r. Falso, see Costa—r. Floating, see Costa—r. Sternal, see Costa—r. True, see Costa.

RIBES NIGRUM, *R. ol'idum*, *Grossularia nigra*, *Cassis*. The Black currant, (F.) *Groseillier noir*. *Sex. Syst.* Pentandria Monogynia. The berries have been recommended in sore-throat, as diuretics. The leaves have been advised for the same purpose. They are chiefly used as preserves.

RIBES OLIDUM, *R. nigrum*—r. Officinale, *R. rubrum*.

RIBES RUBRUM, *R. officinalis seu vulgare*, *Grossularia non spinosa seu rubra*, the Red currant, (F.) *Groseillier rouge*; of which the White is only a variety. It is cultivated, and affords an agreeable fruit. It possesses the qualities of the subacid fruits in general, and makes an excellent preserve.

RIBES VULGARE, *R. rubrum*.

RIBS, NECK OF THE, *Collum costarum*—r. Short, see Costa.

RICE, *Oryza*—r. Disease, Cholera—r. Ground, see *Oryza*—r. Jelly, see *Oryza*.

RICE WATER, see *Oryza*. The evacuations of cholera have been termed—from their resemblance to rice-water—'rice-water discharges'; and in India, 'congee discharges';—congee in Hindoostanee meaning 'rice-water.'

RICE, Wild, *Zizania aquatica*.

RICHARDSONIA, see *Ipecauanha*.

RICHLEAF, *Collinsonia Canadensis*.

RICHWEED, *Actæa racemosa*, *Ambrosia trifida*, *Collinsonia Canadensis*, *Pilea pumila*.

RICIN, *Ricinus communis*.

RICINOIDES, *Jatropha curcas*.

RICINUS COMMUNIS. The Castor oil plant, *Cataputia major*, *Ricinus vulgaris seu viridis*, *Palma Christi*, *Faba purgatrix*, *Cerua*, *Kerua*, *Cici*, (F.) *Ricin*, *Fère purgatif*. *Family*, Euphorbiaceæ. *Sex. Syst.* Monœcia Monadelphica. Castor-oil seeds, whence the oil is obtained, are inodorous; taste acrid and slightly sweetish. One or two seeds—*Semina Cataputia majoris seu Ricini vulgaris*—will act as a cathartic; but the oil is alone used. It is obtained by bruising the castor-seeds, previously decorticated, and then expressing the oil without the application of heat. Recently-drawn castor oil, *Oleum de kerva*, *O. keri'num*, *Alker'ea*, *Oleum Ricini*, *O. Cie'inum*, *O. Palmæ liquidum*, *O. de Palmâ Christi*, (F.) *Huile de Ricin*, is inodorous and nearly insipid. It is cathartic, operating speedily, and may be used in all cases where

powerfully stimulating purgatives would be injurious. Dose, ℥j to ℥iiss. Hufeland recommends that a drop of croton oil shall be added to an ounce of the oil of poppy, and that the mixture shall be called *Oleum Ricini Officina'le*.

At the Cape of Good Hope the oil is obtained from *Ricinus liv'idus*.

A variety of *Ricinus* at Cape Verd is employed by the inhabitants to increase the secretion of milk. It is applied in the form of poultice, made with the green leaves, to the mamma, or of a strong decoction, with which the mamma and the external parts of generation are washed.

RICINUS LIVIDUS, see *Ricinus communis*—r. Major, *Jatropha curcas*—r. Minor, *Jatropha manihot*—r. Viride, *R. communis*—r. Vulgaris, *R. communis*.

RICKETS, Rachitis.

RICKETY, Rachiticus.

RICTUS LUPINUS, see Harelip.

RIDE, Wrinkle.

RIDÉ, Wrinkled.

RIDING (of Bones). *Ossium superpositio*, (F.) *Chevauchement*. Displacement of the fragments of a bone, chiefly produced by the contraction of muscles, which occasions shortening of the limb; the fractured extremities riding over each other, instead of being end to end.

RIGIDITAS, Rigidity.

RIGIDITAS ARTICULORUM, *Anchylosis sp'ria*. Stiffness of the joints. False ankylosis.

RIGIDITY, *Rigiditas*, from *rigere*, 'to stiffen.' Great stiffness of fibre, or want of suppleness. The stiffness of the dead body, (F.) *Roider cadavérique*, is one of the most certain signs of the cessation of life.

RIGOR, *Rhigos*, *Algor*, *Coldness*, *Cheimia*, (F.) *Frisson*. Same etymon. Sensation of cold, with involuntary shivering of the whole body;—a symptom of fever. A slighter degree, and at times full rigor, is occasionally termed a *chill*, *frigus ten'us*, *perfrigeratio*.

RIGOR ARTICULORUM, *Contractura*—r. *Cadaverens*, *Rigor mortis*—r. *Corporis mortui*, *Rigor mortis*—r. *Emortualis*, *Rigor mortis*—r. *Maxillæ interioris*, *Trismus*.

RIGOR MORTIS, *R. corporis mortui*, *R. cadaverens*, *R. emortualis*, *Necronarce'ma*, (F.) *Roider* ou *Raidur cadavérique*. 'Stiffness of death.' Death stiffening. The rigidity of limbs that occurs on dissolution.

RIGOR NERVORUM, *Tetanus*—r. *Nervosus*, *Tetanus*.

RIMA, *Schisma*, *Schiza*. A fissure, a cleft:—*Rima*, or *Rimula Glottidis seu Laryngis*, 'the opening of the glottis.' *Rima vulvæ*, *R. magna*, *Introitus*, *Sinus vulvæ*, *Scapha*, *Scaphus seu Fissura magna seu Scissura vulvæ*, *Schiza*, 'the opening of the vulva.' See *Vulva*.

RIMA CANALIS ORBITARII, *Suborbital fissure*—r. *ad Infundibulum*, *Vulva cerebri*—r. *Laryngis*, *Rima glottidis*—r. *Magna*, *Vulva*, see *Rima*—r. *Transversa Magna Cerebri*, *Fissure, transversæ*, of the brain.

RIMÆ, Rhagades.

RIMULA GLOTTIDIS, *Rima glottidis*—r. *Laryngis*, *Rima glottidis*.

RINÆUS, *Compressor naris*.

RINCHOS, *Rostrum*.

RING, Sax. *hrinð*, *ring*, Germ. *Ring*, *Circus*, (F.) *Anneau*. A name given to natural, circular, or roundish apertures, with muscular or spongerotic parietes, which serve for the passage of some vessel or canal:—as the *umbilical ring*, *inguinal ring*, &c.

RINGWORM, *Herpes circinatus*—r. of the

Scalp, Porrigo scutulata—r. Ulcerative, Herpes exedens—r. Vesicular, Herpes pręputil.

RIRE ou **RIS**, Risus—r. Canin, Canine laugh—r. Moqueur, Canine laugh—r. Sardonien, Canine laugh, Risus sardonicus—r. Sardonique, Canine laugh.

RISAGON, Cassumunar.

RISIGALLUM, Orpiment.

RISING, see Regurgitation—r. of the Lights, Cynanche trachealis.

RISING or **ELEVATION OF THE PULSE**, *Pulsus elevatio*. The pulse is said to rise, when it becomes more full and frequent, as occurs in the exacerbation of acute diseases.

RISORIVUS NOVUS. Santorini gives this name to a portion of the platysma myoides, which passes from the cheek towards the commissure of the lips.

RISIGALLUM, Orpiment.

RISUS, from *ridere*, *risum*, 'to laugh.' *Gelus*, *Laughing*, *Laughter*, *Laugh*, (F.) *Rire* ou *Ris*. An involuntary movement of the muscles of the face, and of the lips in particular, accompanied with a sonorous and interrupted respiration, commonly indicating mirth and satisfaction.

RISUS APIUM, *Ranunculus sceleratus*—r. Caninus, Canine laugh—r. Involuntarius, Canine laugh—r. Sardonicus, Canine laugh—r. Spasticus, Canine laugh.

RITA-CRISTINA. A celebrated double monster, born in Sardinia, in 1829. It lived to be nearly nine months old. Two distinct bodies were united at the pelvis. Below, the monster was single.

RIVER WEED, *Conferva rivalis*.

RIZ, *Oryza*.

ROAN TREE, *Sorbus acuparia*.

ROB, *Roob*, *Robub*, *Rohob*, *Rohab*, (F.) *Extrait des fruits*. This word, of Arabic extraction, means the juice of any fruit thickened to the consistence of honey by evaporation, before it has fermented. The juice of the grape, boiled to this consistence, was called *Sapa*, and, when not quite so thick, *Defrutum*.

ROB CYNOSBATUS, *Confectio rosę caninę*—r. *ex Moris*, *Diamorion*—r. *Nucum*, *Diacaryon*.

ROBIN RUN-AWAY, *Glechoma hederaceum*.

ROBINIA AMA'RA, *Family*, *Leguminosę*. *See Syst. Diadelphia Decandria*. The roots of the *Robinia amara* of Cochinchina are bitter, and have been recommended, especially in that country, in diarrhoea and dyspepsia.

ROBINIA PSEUDO-ACA'CIA, *Pseudacacia odorata*, *False Aca'cia*, *Black Locust*, *Locust-tree*; native of America. The flowers are said to possess antispasmodic properties.

ROBORANS, *Corroborant*.

ROBORANTIA, *Tonica*.

ROBUB, *Rob*.

ROCCELLA, *Lichen roccella*—r. *Tinctoria*, *Lichen roccella*.

ROCHE'S EMBROCATION FOR HOOPING-COUGH. An empirical preparation, composed of *ol. olive*. ℥xvj, *ol. succin.* ℥viii, *ol. caryoph.* q. s. to scent it strongly.

ROCHER, see *Temporal bone*.

ROCHETTA ALEXANDRINA, *Soda*.

ROCKET GARDEN, *Brassica eruca*—r. *Roman*, *Brassica eruca*.

ROCK ROSE, *Helianthemum Canadense*, *H. Corymbosum*.

ROCOU, *Terra Orleana*.

RODSCHIEDIA BURSA PASTORIS, *Thlaspi bursa*.

ROGNE, *Psora*.

ROHAB, *Rob*.

ROHENA BARK, *Swistenia*.

ROHOB, *Rob*.

ROHUN, see *Strychnos nux vomica*.

ROIDEUR CADAVERIQUE, *Rigor mortis*.

ROISDORFF, *MINERAL WATERS OF*. Alkaline waters in Germany, which contain carbonic acid and carbonate of soda.

ROLLER, *Bandage*, *Fascia*.

ROMARIN, *Rosmarinus*—r. *Sauvage*, *Ledum sylvestre*.

ROME, (CLIMATE OF.) The climate of Rome, as regards its physical qualities, is considered to be one of the best in Italy. It is peculiarly still; and, hence, has been esteemed favorable as a winter climate in pulmonary diseases, and for invalids generally, as it admits of their taking exercise in the open air at a lower temperature than they otherwise could do. In the early stages of consumption, Sir James Clark generally found the climate favourable.

ROMPEURE, *Hernia*.

RONCE, *Rubus idęus*—r. *Bleue*, *Rubus cęsius*—r. *de Montagne*, *Rubus chamęmorus*—r. *Noire*, *Rubus fruticosus*.

RONCHUS, *Snoring*, *Stertor*.

ROUND, *Round*—r. *Grand*, *Teres major*—r. *Petit*, *Teres minor*.

RONFLEMENT, *Snoring*, *Stertor*, see *Rattle*—r. *de Diable*, *Bruit de Diable*.

ROOB, *Rob*.

ROOF OF THE MOUTH, *Palate*.

ROOT, *Radix*—r. *Ague*, *Aletris farinosa*—r. *Bitter*, *Apocynum androsęmifolium*—r. *Canada*, *Asclepias tuberosa*—r. *Red*, *Celastrus*—r. *Rough*, *Liatris*—r. of *Scarcity*, *Beta hybrida*—r. *Squaw*, *Actęa racemosa*—r. *Sweet*, *Acorus calamus*—r. *Unicorn*, *Aletris farinosa*—r. *Yellow*, *Xanthoriza apiifolia*—r. *Yellow*, *Jeffersonia Bartoni*.

ROPE BARK, *Dorca palustris*.

ROQUETTE, *Brassica eruca*, *Soda*.

RORELLA, *Drosera rotundifolia*.

RORIF'EROUS, *Ror'ifer*, (F.) *Rorif'ere*, from *ros*, 'dew,' and *ferro*, 'to carry.' An epithet given to vessels which pour exhaled fluids on the surface of organs.

RORIFEROUS DUCT, *Thoracic duct*.

ROS, *Sperm*—r. *Calabrinus*, *Fraxinus ornus*—r. *Solis*, *Drosera rotundifolia*.

ROSA, *R. centifolia*—r. *Afzeliana*, *R. canina*.

ROSA ALBA, *R. veritatis'ima*, *R. leucantha*. *The White Rose*, (F.) *Rosier blanc*. *Family*, *Rosacęe*. *See Syst. Icosandria Polygynia*. The flowers of this species possess similar but inferior qualities to the damask.

ROSA ARMATA, *R. canina*—r. *Austriaca*, *R. Gallica*—r. *Calycina*, *R. canina*.

ROSA CANINA, *R. sylvestris seu sentico'sa seu Swartzia'na seu Afzelia'na seu arma'ta seu calyci'na seu rubra vulg'aris*, *Oynor'rhodon*, *Caniru'bus*, *Caninus Sentis*, *Cynocyt'isus*, *Cynospas'tum*, *Cynos'batus*, *Dog Rose*, *Wild Briar*, *Hip Tree*, (F.) *Rose du chien*, *Eglantier de chien*, *E. sauvage*. The fruit of this variety, called *Heps* or *Hips*, has a sourish taste, and is formed into a conserve. See *Confectio cynosbati*. It is seldom employed, except to give form to more active remedies; as to pills, boluses, linctures, &c.

ROSA CENTIFOLIA, see *Hecatophyll'la*, *Damask Rose*, *Rosa Damasc'na*, *R. Pal'tida*, (F.) *Rosier à cent feuilles*, *Rhodon*, *Rosa*. The petals of this rose have an extremely fragrant odour, and subacidulous taste. They are laxative; but are scarcely used for any purposes except for the distillation of rose water, *Oil of Roses*, *Oleum Rosa*, and the formation of a syrup.

ROSA DAMASCENA, *R. centifolia*.

ROSA GAL'LICA, *R. Austriaca*, *Rosa rubra*, *Red Rose*, (F.) *Rosier de Provine*. The petals of this variety are astringent; and are used in infusion, conserve, &c.

ROSA LEUCANTHA, R. alba—r. Pallida, R. centifolia—r. Rubra, R. Gallica—r. Rubra vulgaris, R. canina—r. Saltans, Essera—r. Senticosa, R. canina—r. Swartziana, R. canina—r. Sylvestris, R. canina—r. Usatissima, R. alba.

ROSACE, Roseola.

ROSACEUS, Rhodinus.

ROSAGE, Rhododendron chrysanthemum.

ROSAGO, Nerium oleander.

ROSALIA, Scarlatina.

ROSALIE, Scarlatina.

ROSATUS, Rhodinus.

ROSE, Erysipelas—r. Christmas, Helleborus niger—r. Corn, Papaver rhœas—r. Damask, Rosa centifolia—r. Dog, Rosa canina—r. Dog, conserve or confection of, Confectio rosæ caninæ—r. du chien, Rosa canina—r. Rash, Roseola—r. Red, Rosa Gallica—r. Rock, Helianthemum Corymbosum—r. Spots, Spots, red—r. White, Rosa alba.

ROSEA, Rhodia.

ROSEBALM, SCARLET, Monarda coccinea.

ROSEBAY, AMERICAN, Rhododendron maximum.

ROSE DROP, Gutta rosæ.

ROSELLINA, Roseola.

ROSEMARY, Rosmarinus—r. Marsh, Statice limonium, and S. Caroliniana—r. Wild, Eriocophalus umbellulatus.

ROSENHEIM, MINERAL WATERS OF. Rosenheim is 34 miles S. E. from Munich, in Bavaria. The waters contain sulphuretted hydrogen, carbonic acid, carbonate of lime, chlorides of calcium and magnesium, carbonate of soda, and oxide of iron. They are used as tonics.

ROSE'OLA, *Exanthē'sis Roseola*, *Rose Rash*, (F.) *Roséole*, *Éruption anomale*, *Rosace*, *Fièvre rouge*, *Efflorescence érysipélateuse*. An efflorescence in blushing patches, gradually deepening to a rose-colour, mostly circular or oval; often alternately fading and reviving; sometimes, with a colourless nucleus; and chiefly on the cheeks, neck, or arms. It is frequently found, as a symptom, in dentition, dyspepsia, rheumatism, &c., and is of no consequence. See Roseola, Rubeola, and Scarlatina.

ROSEOLA ACNOSA, Gutta rosæ.

ROSEOLA ÆSTIVA. The affection which prevails in summer. The eruption is of a darker colour, and is attended with more itching.

ROSEOLA ANNULA'TA. Characterized by patches in the form of rose-coloured rays, with central areas of the colour of the skin.

ROSEOLA FICOSA, Sycosis—r. Variolosa, Roseole.

ROSE'OLE, *Roseola*, *Rosell'ina*, *False measles*, *French measles*, (F.) *Roséole*, *Fausse rougeole*. This name is also given by some to an acute exanthem, midway between measles and scarlatina, and which belongs to neither one nor the other, as it affords no protection against either. It is, also, termed *Rubcolæ* by some. An eruption which often precedes that of small-pox is termed *Roseola Variolosa*.

ROSE'OLE, Roseola, Roseolæ.

ROSE PINK, Chironia angularis.

ROSES, MILK OF. A cosmetic wash, formed, according to one method, of *subcarbonate of potash*, gr. vj; *oil of almonds*, ℥j; *essence of bergamot*, ℥ij; *aquæ rosæ*, ℥iij; *orange flower water*, ℥ij. Mix.

ROSEUS, Rhodinus.

ROSEWOOD, Rhodium lignum.

ROSEWORT, Rhodia.

ROSIER BLANC, Rosa alba—r. à Cent feuilles, R. centifolia—r. de Provins, Rosa Gallica.

ROSIN, BLACK, Colophonias—r. Brown, Colophonias—r. Weed, Silphium terebinthaceum—

r. White, see Pinus sylvestris—r. Yellow, see Pinus sylvestris.

ROSIO STOMACHI, Cardialgia—r. Ventriculi, Cardialgia.

ROSMARINUM, Rosmarinus.

ROSMARINUS, *R. officinalis seu latifolius seu horten'sis*, *Alchachil*, *Libano'tis coronaria*, *Dentrolib'anus*, *Rosemary*, (F.) *Romarin*. Family, Labiata. Ser. Syst. Diandria Monogynia. The tops of this plant, *Rosmarinus*, (Ph. U. S.) *Herba Anthos*, have a fragrant, grateful smell; and an aromatic, warm, bitterish taste, which is dependent upon an essential oil, combined with camphor. Rosemary has been recommended in nervous headaches, in the form of infusion. It is now rarely used, except for its odour. The flower is called *Anthos*, *arōs*. Its oil—*Oleum Rosmarini*—is official. From two to six or ten drops are given in nervous complaints, rubbed up with sugar.

ROSMARINUS HORTENSIS, Rosmarinus—r. Lulfolius, Rosmarinus—r. Officinalis, Rosmarinus—r. Stachadis facie, Tencrium creticum—r. Sylvestris, Ledum sylvestre.

ROSSALIA, Scarlatina—r. Squamosa, Scarlatina.

ROSSI'GNOL. A name given, in France, to an affection to which pressmen are subject. It is a sprain, followed by tumefaction of the radiocarpal joint.

ROSSOLIO, see Spirit.

ROSTRUM, *Rhinchos*, *Rinchos*, *Ramplos*, 'a beak.' (F.) *Bec*. A name given to several old forceps, on account of their resemblance to the beaks of different birds. The principal were the *Rostrum corri'num*, *anati'num*, *psittaci'num*, *calturi'num*, *cyg'neum* vel *olori'num*, *grui'num*, *coacti'num*, &c.

ROSTRUM EXTERNUM, Olecranon—r. Porcium, Acromion—r. Posterius, Olecranon—r. Sphenoidale, Azyges processus.

ROSY BUSH, *Spiræa tomentosa*—r. Drop, Gutta rosæ—r. Whelk, Gutta rosæ.

ROT, Eructation.

ROT, Grinders', Asthma, grinders'.

ROTACISM, *Rotarium'us*, *Rhotaci'us*, *Prelit'mus rhotaci'us*, (F.) *Grassement*. A vicious pronunciation of the Greek, *Ρ, Ρου*, common in the northern parts of England; especially near Newcastle.

ROTACISMUS, *Grassement*.

ROTA'TOR, from *rota*, 'a wheel.' A name given to several muscles that turn the parts to which they are attached upon their axes:—such as, the oblique muscles of the eye, the pronators, supinators, &c.

ROTATOR, Trochanter.

ROTATOR'ES DORSI. Eleven small muscles on each side of the dorsal vertebra, which arise from the point or upper edge of each transverse process, and pass to the lower edge of the arch of the vertebra above, as far as the base of the transverse process. Their action is to rotate the individual vertebrae on each other.

ROTATOR'ES FEMORIS, Obturatores—r. Oculi, Oblique muscles of the eye.

ROTULA, Patella, Trochiscos—r. Genæ, Patella.

ROTULAD, see Rotular aspect.

ROTULAR, from *rotula*, 'the patella.' Relating or appertaining to the patella.

ROTULAR ASPECT. An aspect towards the side on which the rotula is situated.—Barclay. *Rotulad* is used by the same writer, adverbially, to signify 'towards the rotular aspect.'

ROT'ILE, Patella.

ROTUNDUS, Round.

ROUCOU, Terra Orleansa.

ROUEN, MINERAL WATERS OF. This water, known under the name, *Eau des fontaines de la Marguerite*, is cold, and contains carbonate of iron, carbonic acid, carbonate of lime, chloride of calcium, &c. It is tonic.

ROUGE, Colcothar—*r. d'Angleterre*, Colcothar.

ROUGEÔLE, Rubeola—*r. Fausse*, Roseolæ.

ROUGEURS, Flush.

ROUGH ROOT, Liatriis.

ROUILLE, Rubiginous.

ROUND, *Teres*, *Rotundus*, (F.) *Rond*. Anatomists have given this name to many organs whose fibres are collected in round fasciculi. See *Teres*.

ROUND FORAMEN, *Fora'men rotundum*. A foramen of the sphenoid bone, a little behind the *foramen lacerum superius*, which gives passage to the second branch of the fifth pair of nerves, called *superior maxillary*.

ROUND HEART, *Thaspium atropurpureum*.

ROUND LIGAMENTS OF THE UTERUS, *Ligamenta rotunda Uteri*, (F.) *Cordons sus-pubiens* (Ch.), *Cordons vasculaires*, *Ligaments ronds de l'utrus*. Two cords, which arise from the lateral and superior parts of the uterus, whence they proceed towards the abdominal rings, which they pass through, and terminate by vanishing in the areolar tissue of the groins, *mons veneris*, and *labia majora*. These cords are whitish, flattened, and narrower in the middle than at the extremities. According to Mr. Rainey, they are composed chiefly of the striped muscular fibre.

ROUTINE PRACTITIONER, *Routinist*.

ROUTINIST, pronounced *routene'ist*; (F.) *Routinier*; from (F.) *routine*; 'a regular habit or practice, unvaried by circumstances.' One who practises in such an unvaried manner:—*a routine practitioner*.

RUBBER, INDIAN, *Caoutchouc*.

RUBBING SOUNDS, *Bruit de Frottement*.

RUBE'DO, *Rubor*, Redness; from *rubere*, 'to be red.' A diffused, but not spotted, redness on any part of the skin; like that which arises from blushing. Blushing.

RUBEFA'CIENT, *Erethis'ma*, *Erethis'ticum*, *Rubefaciens*, from *rubens*, 'red,' and *facio*, 'I make.' (F.) *Rubéfiant*. That which produces redness. A medicine which causes redness of the skin. The action is called *Rubefaction*.

RUBÉFIANT, *Rubefacient*.

RUBE'OLA, *Rubeola vulgaris*, from *rubere*, 'to be red.' *Rose'olæ*, *Exanthe'ma Rubeola*, *Veterana*, *Blac'cia*, *Bovill'æ*, *Morbil'li*, *Scarlati'na pustulo'sa*, *S. Milia'ris*, *Febris morbillo'sa*, *Typhus morbillosus*, *Phœnicis'mus*; *Ecephy'mata*, *Measles*; (F.) *Rougeôle*, *Fièvre morbilleuse*. One of the major exanthemata; generally affecting individuals but once, and produced by specific contagion. The rash usually appears on the fourth, but sometimes on the third, fifth, or sixth day of a febrile disorder; and, after a continuance of four days, gradually declines with the fever. The disease generally commences from ten to fourteen days after the contagion has been received. The eruption first shows itself in distinct, red, and nearly circular spots, somewhat less than the ordinary areolæ of flea-bites. As these increase in number, they coalesce; forming small patches of an irregular figure, but approaching nearest to that of semicircles or crescents. These patches are intermixed with single, circular dots and with interstices of the natural colour of the skin. On the face they are slightly raised, so as to give the sensation of inequality of surface to the finger passed over the cuticle. The disappearance of the eruption is followed by desquamation of the cuticle. Measles is not dangerous

of itself; but it is liable to induce pneumonia in winter, and dysentery in summer, which are, at times, very fatal. These are apt to come on at the time of, or soon after, the disappearance of the eruption. When they supervene, they must be treated as idiopathic affections. It demands a general antiphlogistic treatment. Willan has pointed out a kind of RUBEOLA SPURIA, which he calls RUBEOLA sine CATARRHO. In this the rash runs its regular course, with little fever or catarrhal affection; affording no certain security against the common or regular disease. He also gives the name, RUBEOLA NIGRA or BLACK MEASLES, to an unusual appearance of the measles about the seventh or eighth day, when the rash becomes suddenly livid, with a mixture of yellow. It is devoid of inconvenience or danger; and is removed in a week or ten days by the mineral acids and tonics.

RUBEOLÆ, *Roseolæ*.

RUB'IA, *R. Tincto'rum seu peregrina seu sylvestris*, *Erythrod'anum*, *Rubia major*, *Radix rubra*, *Dyer's Madder*, *Madder*, (F.) *Garance*. Family, Rubiaceæ. Sex. Syst. Tetrandria Monogynia. The roots of this plant have a bitterish, somewhat austere, taste, and a slight, not agreeable, smell. They were formerly considered deobstruent, detergent, and diuretic.

RUBIG'INOUS, *Rubiginosus*, from *rubigo*, 'rust.' (F.) *Rouillé*. Rusty. Having the colour of rust. An epithet given to the sputa in certain cases of pneumonia.

RUBINUS VERUS, *Anthrax*.

RUBOR, *Rubedo*.

RUBR'ICA FABRI'LIS. A red, heavy, earthy matter, formerly employed for making drying plasters; *Hard Ruddle*, *Red Chalk*.

RUBRICA SINOP'ICA. A heavy, compact, reddish earth: formerly used in diarrhœa.

RUBRIN, *Hæmatin*.

RUBUS AFFINIS, *R. fruticosus*.

RUBUS ARCTICUS. The *Shrubby Strawberry*, *Dacca Norland'ica*. Family, Rosaceæ. Sex. Syst. Icosandria Polygynia. The fruit is recommended by Linnæus as possessing antiseptic, refrigerant, and antiscorbutic qualities.

RUBUS BATUS, *R. Cassius*.

RUBUS CÆSIUS, *R. batus*; the *Deuberry plant*, (F.) *Ronce bleue*. The fruit resembles the blackberry in appearance and properties. The bark of the root of *R. Trivia'lis*, *American Deuberry*, is astringent.

RUBUS CHAMÆMORUS; the *Cloudberry Tree*, *Chamæmorus*, *C. Norvegica*, *Chamædryis*, *Cloudberry*, *Knot-berry*, (F.) *Ronce de Montagne*. The ripe fruit is sometimes prepared like a jam, and used in fevers, &c., to allay thirst. It has been much extolled as an antiscorbutic.

RUBUS FRAMBESIANUS, *R. Idæus*.

RUBUS FRUTICOSUS, *R. affinis seu paniculatus seu niger seu vulgaris*; the *Common Bramble*, which affords *Blackberries*, (F.) *Ronce noire*. The berries are eaten as a summer fruit, of which they form a poor variety. The bark of the root of the *Rubus villosus*, *American Blackberry*, *High or standing blackberry*, *Hairy American Bramble*, is astringent, and has been used in the last stages of dysentery, and in cholera infantum.

RUBUS IDÆUS, *R. frambosianus*, *Batos*; the *Raspberry*, (F.) *Framboise*, *Ronce*. The fruit of the best varieties is extremely agreeable; and is much used. It was, formerly, called *Batinos moron*.

RUBUS NIGER, *R. fruticosus*—*r. Paniculatus*, *R. fruticosus*.

RUBUS STRIGO'SUS, *Wild red raspberry*, of the United States. The leaves are often used as a mild astringent.

RUBUS TRIVIALIS, see *Rubus cæsius* — r. Villosus, see *Rubus fruticosus* — r. Vulgaris, *R. fruticosus*.

RUCTAMEN, Eructation.

RUCTATIO, Eructation.

RUCTUATIO, Eructation.

RUCTUOSITAS, see Eructation.

RUCTUS, Eructation — r. Acidus, *Oxyregmia* — r. Nidorosus, *Cnissoregmia*.

RUDDLE, HARD, *Rubrica fabrilis*.

RUDOLPHIA FRONDOSA, *Butea frondosa*.

RUE, Ruta — r. Common, Ruta — r. de Chèvre, *Galega officinalis* — r. Goat's, *Galega officinalis* — r. Goat's, Virginia, *Galega Virginiana* — r. Meadow, *Thalictron* — r. des Murailles, *Asplenium ruta muraria* — r. des Près, *Thalictron* — r. Sauvage, Ruta.

RUFT, Eructation.

RUGA, Wrinkle.

RUGINÉ, *Raspatorium*.

RUGISEMENT, *Rugitus*.

RUGITUS, *Brycheth'mos*, from *rugire*, *rugitum*, 'to roar.' (F.) *Rugissement*. A Latin word, which ordinarily expresses the roaring of the lion: and which is used, by some medical writers, to designate a particular species of *borborygmus* compared to it.

RUGOSE, Wrinkled.

RUGOUS, Wrinkled.

RUM, *Tafia*, *Motas'es Spirit*. A spirit distilled from sugar, or molasses. See Spirit.

RUMA, Mamma.

RUMEN, Hypogastrium.

RUMEX ACETO'SA, *R. tuberosus* seu *intermedius*, *Lap'athum pratense*, Common Sorrel, *Ox'alis Aceto'sa*, *Acetosa vulgaris* seu *pratensis*, *Anax'yris*, *A. arvensis*, *Sorrel*, *Sour dock*, *Acetosa nostras*, (F.) *Oseille*. Family, Polygonesæ. *Sex. Syst.* Hexandria Trigynia. The leaves are sour, and are used in cookery, and also as a refrigerant.

RUMEX ACUTUS; *Sharp-pointed Wild dock*, *Oxylap'athum*, *Lap'athum*, *L. sylvestrè* seu *acutum*, *Rumex*, *R. paludosus* seu *pumillus*, *Lap'athos*, (F.) *Patience sauvage*. The decoction of the root has long been used in cutaneous affections. It is, sometimes, employed for the cure of the itch.

RUMEX ÆTNE'NSIS, *R. scutatus*.

RUMEX ALPINUS, *Aceto'sa Alpina*. The systematic name of the plant that affords the *Monk's Rhubarb*, (F.) *Rhabarb des Moines*. See *Rumex patientia*.

RUMEX AQUATICUS, *Rumex hydrolapathum* — r. Britannica, *Rumex hydrolapathum* — r. Confer'tus, *R. patientia* — r. Dignus, *Oxyria reniformis* — r. Glaucus, *R. scutatus* — r. Hastatus, *R. scutatus* — r. Hastifolius, *R. scutatus*.

RUMEX HYDROLAP'ATHUM, *Water-Dock*, *Hydrolapathum*, *Rumex aquaticus*, *Herba Britan'nica*, *Rumex Britan'nica*, *Lap'athum aquaticum*, (F.) *Pareille*, *Patience d'eau*. The leaves of this plant are subacid, and said to be laxative. The root has been used as a tonic, astringent, and antiscorbutic. It has also been employed externally in some cutaneous affections.

RUMEX INTERMEDIUS, *R. acetosa*.

RUMEX OBTUSIFO'LICUS, *Lap'athum sylvestrè*, *Blunt-leaved Dock*. The root of this, as well as of *R. crispus*, has similar virtues to that of the other species.

RUMEX OXYOTUS, *R. scutatus* — r. Paludosus, *R. acutus*.

RUMEX PATIEN'TIA, *R. confer'tus*, *Lap'athum hortensè*, *Rhabarb'barum monacho'rum*, *Hippolap'athum*, *Patientia*, *Garden Patience*, *Monk's Rhubarb*, (F.) *Patience*. This root, which is supposed to possess the virtues of rhubarb, but in an

inferior degree, is, according to Linnæus, obtained from the *Rumex patientia*; according to Murray, from the *Rumex alpinus*.

RUMEX PUBILLUS, *R. acutus*.

RUMEX SANGUIN'EUS. The root of the bloody dock has an austere and astringent taste; and has been employed in dysentery. It is called, also, *Lap'athum sanguineum*, (F.) *Oseille ou Patience Rouge*, *Sangdragon*.

RUMEX SCUTA'TUS, *R. glaucus* seu *hastifolius* seu *Ætne'nsis* seu *oxyotus* seu *hastatus*, *French Sorrel*, *Aceto'sa rotundifolia* seu *Roma'na* seu *Rotundifolia hortens'is* seu *scutata*, *Lap'athum scutum* seu *rotundifolia*, *Roman or Garden Sorrel*, *Green Sauce*, (F.) *Oseille boucher*, *Oseille ronde*, *Petite O*. Virtues the same as those of the common sorrel.

RUMEX TUBEROSUS, *R. acetosa*.

RUMINA'TION, *Ruminatio*, from *ruma* or *rumen*, 'the gullet.' *Mercurius*. A function peculiar to ruminating animals, by which they chew a second time the food they have swallowed. An analogous phenomenon is sometimes seen in man.

RUMP, *Croupion* — r. Bone, *Coccyx*.

RUNCINA, *Raspatorium*.

RUNCINULA, *Raspatorium*.

RUNNET, *Rennet*.

RUNNING, *Curus*, (F.) *Course*. A succession of leaps, executed with rapidity, to transport the body quickly from one place to another.

RUNUNCULA, *Raspatorium*.

RUPES, Lips of the Vulva.

RU'PIA, *Ulcus atonicum*, *Ecephly'sis Rhy'pia*, *Rhy'p'aria*, from *rupes*, 'filth.' An eruption of large flattish blebs, which contain a fluid—at first serous, afterwards puriform, and often bloody, which rapidly concretes into crusts, at the base of which are ulcers of variable depths.

It requires the use of tonics internally, and of stimulating ointments externally.

RUPTIBILITAS, *Fragilitas*.

RUPTIO, *Rhexis*.

RUPTORIUM, *Cauterium* — r. *Commune*, *Potassa fusa*.

RUPTURA, *Ecrexis*, *Hernia*, *Laceration*, *Rhexis* — r. *Cornes*, *Ceratorrhæxis* — r. *Herniosa*, *Hernia* — r. *Ovarii*, *Oariorrhæxis* — r. *Uteri*, *Uterus*, *rupture of the* — r. *Vaginae*, *Colporrhæxis*.

RUPTURE, *Hernia*, *Rhexis* — r. *du Coeur*, *Cardiorrhæxis* — r. *of the Groin*, *Bubonocèle* — r. *de la Matrice*, *Uterus*, *rupture of the* — r. *Wort*, *Herniaria glabra*.

RUPTURED, see *Hernial*.

RUSCUS, *R. aculeatus*, *Bruscus*, *Oxymyr'rhinë*, *Oxymyr'rhinë*, *Myrtacan'tha*, *Catan'gelo*, *Myacan'tha*, *Scop'ia regia*, *Wild Myrtle*, *Centromyrrinë*, *Butcher's Broom*, (F.) *Petit houx*, *Fragon*. Family, *Smilacææ*. *Sex. Syst.* *Diœcia Monadelphica*. The root has been recommended as an aperient and diuretic.

RUSCUS ACULEATUS, *Ruscus*.

RUSCUS HYPOGLOS'SUM; *U'cula'ria*, *Hypoglossum*, *Bialin'gua*, *Bonifa'cia*, *Laurus Alexandri'na angustifolia*, (F.) *Laurier Alexandria*. Formerly used against relaxed uvula.

RUSH, SWEET, *Acorus calamus*, *Juncus odoratus*.

RUSMA, see *Orpiment*.

RUSPINI'S STYPTIC, see *Styptic*, *Ruspini's*. RUSPINI'S TINCTURE FOR THE TEETH. An empirical preparation, composed of *Florentine orris* ℥viij, *cloves* ℥j, *rectified spirit Oij*, *amblyris* ℥i.

RUT, Heat.

RUTA, *Ruta graveolens* seu *hortens'is* seu *a'tera*, *Common Rue*, *Peg'anum*, *Bea'ea*, (F.) *Rue*, *Rhuc*, *Rue sauvage*. Family, *Rutacææ*. *Sex. Syst.* *Decandria Monogynia*. The plant has a

strong, ungrateful odour, and bitter pungent taste. It is acrid, so as to blister the skin. Its properties are reputed to be tonic, stimulant, antispasmodic, and emmenagogue. Dose, gr. xv to ℥ij.

Oleum Ruta, distilled Oil of Rue, is antispasmodic; and, externally, rubefacient. Dose, gr. ij to vj.

RUTA ALTERA, Ruta—r. Capraria, Galega officinalis—r. Graveolens, Ruta—r. Hortensis, Ruta—r. Muraria, Asplenium ruta muraria.

RUTABULUM, Penis.

RUTA'CEUM, from *Ruta*, 'rue.' Vinegar of rue.

RUTIDOMA, see Rutidosis.

RUTIDOSIS, *Rutido'sis*, *Rhytido'sis*, from *rutidōs*, 'I wrinkle.' The act of wrinkling; as

Rutido'ma means a shrivelled or wrinkled body. A destruction or atrophy of the eye. Corrugation and subsidence of the cornea.

RUYSCHIA'NA TU'NICA, (F.) *Lame* ou *Membrane Ruyschienne*. According to Ruysch, and the greater part of his disciples, the choroid coat of the eye is formed of two laminae. His son gave to the inner the name *Tunica Ruyschia'na* or *Membra'na Ruyschia'na* seu *Ruysch'ii*.

Tunica Cellulo'sa Ruyschia'na is the areolar substance under the peritoneal covering of the stomach. It is not numbered among the coats of that organ.

RYE, Secale—r. Horned, Ergot—r. Spurred, Ergot.

RYTIDOSIS, Rutidosis.

RYTIS, Wrinkle.

S.

S. A. &c., see Abbreviation.

SABADILLA, *Veratrum sabadilla*, see *Veratrina*.

SABADILLIN, see *Veratrina*.

SABATILLA, *Veratrum sabadilla*.

SABBATIA, *Chironia angularis*—s. *Angularis*, *Chironia angularis*.

SABINA, *Juniperus sabina*.

SABINE, *Juniperus sabina*.

SABLÉ, *Maculo'sus*, 'sanded.' Having the appearance as if strewed with sand. The terms *sablé* and *piqueté* are sometimes applied to the brain, when a slice of it exhibits red points as if it had been strewed with red sand. Such is the case in cerebral hyperæmia.

SABOT DE VÉNUS JAUNE, *Cypripedium luteum*.

SABUCUS, *Sambucus*.

SABULOUS, *Sabulo'sus*, *Areno'sus*, *Psammo'sis*. The sandy deposit often seen in the urine.

SABULUM CONARII, see Pineal gland.

SABURA, *Saburra*.

SABUR'RA, *Sabu'ra*, *Sordes*. This word signifies, by derivation, coarse sand, or ballast. In its common acceptation, it means *foulness of the stomach*, as it is sometimes called;—vitiated matters supposed to be retained and accumulated in the stomach—the result of imperfect digestion—and which have been sometimes considered as a morbid product of the mucous secretion of that organ, or of the biliary secretion; at others, as a residuum from alimentary substances badly digested. The *Saburral state*, *Collu'vies gas'trica*, *Urudita'tes ventric'uli*, *Gastri'mus*, (F.) *Embarras gastrique*, *État saburral*, is an accumulation of *saburrae*. (F.) *Saburres gastriques*, in the stomach, which the Humourists considered to be the cause of a number of diseases.

SABURRA VERMINOSA, Helminthiasis.

SABURRATIO, *Arenatio*.

SABURRES GASTRIQUES, see *Saburra*.

SAC HERNIAIRE, Hernial sac.

SACCATUS, Encysted.

SACCHAR, *Saccharum*.

SACCHARINA, *Saccharollés*.

SACCHAROLÉS (F.), *Sacchari'na*, from *saccharum*, 'sugar.' A name given by MM. Henry and Guibourt to medicines which have sugar or honey for excipient, or for predominant principle. M. Béral so calls an exact mixture of pulverized sugar with other substances also in powder, but in less quantity.

SACCHAROM'ETER, (F.) *Saccharomètre*, *Pleurosirop*, from *saccharum*, 'sugar,' and *μετρον*, 'measure.' A hydrometer adapted for determining the density of syrups.

SACCHAROMYCES, *Torula cerevisia*.

SACCHARORRHŒA, *Glycyrrhœa*—s. *Cutanea*, *Sudor dulcis*.

SACCHARORRHŒA LAC'TEA, *Galactorrhœa sacchara'ta*. A secretion of unusually sweet milk.

SACCHARORRHŒA PULMONA' LIS, *Sputum dulcè* seu *saccharatum*. The copious expectoration of unusually sweet matter from the lungs.

SACCHARORRHŒA URINOSA, *Diabetes mellitus*.

SAC'CHARUM, *Sacchar*. From Arabic, or rather Sanscrit, *Sa-kar*, 'white earth;' *Suchar*, *Succhar*, *Sutter*, *Zuchar*, *Zu'caro*, *As'sakur*, *Tigala*, *Zac'charum*, *Zosar*, *Zu'charum*, *Zuc'carum*, *Zuchra*, *Mel arundina'ceum*, *Sugar*, (F.) *Sucre*. The produce of the juice of the *Sac'charum officinarum* vel *officinale* of Linnæus, *Cal'amus Indicus*, *Cal'amus Sacchari'nus*, *Sugar Cane*, (F.) *Canne à Sucre*, *Cannamelle*; *Arundo saccharif'era* of Sloane. *Family*, Gramineæ. *Ser. Syst.* Triandria Digynia) and also of the beet, maple, &c.

True Sugars are those with which alcoholic fermentation may be effected, by the addition of yeast and water. They are:—

<i>Species.</i>	<i>Varieties.</i>
1.....	{ Hard sugar of the cane, maple, beet, chestnut, &c.
2.....	{ Liquid sugar, sugar of malt, of the sweet potato, molasses, honey, &c.
3.....	{ Hard sugar of the grape, ripe fruits, starch, diabetes, &c.
4.....	Hard sugar of the mushroom.

Imperfect sugars are those in which alcoholic fermentation cannot be effected by means of yeast and water.

<i>Species.</i>	<i>Varieties.</i>
1.....	Manna.
2.....	Sugar of Milk.
3.....	Sugar of jelly or glue.
4.....	Liquorice.
5.....	Picromel.

Sugar is prepared from the expressed juice of the sugar-cane, boiled with the addition of quicklime or common vegetable alkali. It is used, in pharmacy, for the preparation of syrups, conserves, lozenges, &c. It is very nutritious, and is employed as an aliment, and as a demulcent

and antiseptic. Dissolved in small quantities in water, as in tea, it is apt to disagree with dyspeptics; an evil which does not always occur when the same substance is taken more largely.

SACCHARUM ACER'NUM, *S. Canadense*, *Maple Sugar*, is often used as a demulcent.

SACCHARUM ALBUM, *S. purificatum*, *Saccharum* (Ph. U. S.), *White Sugar*, *Refined Sugar*, *Sal Indus*, is the *Loaf Sugar*. *Double-refined Sugar* has been called *Tabarzet*.

SACCHARUM CANDIDUM, *S. candum seu cantum seu canthum*, *Al'phenic*, *Nabot*, *Sugar candy*, (F.) *Sucre Candi*, is the crystallized juice of the cane.

SACCHARUM CANDUM, *S. Candidum*—*s. Cantum*, *S. Candidum*—*s. Canthum*, *S. Candidum*—*s. Commune*, *Saccharum non-purificatum*.

SACCHARUM HORDEA'TUM, *Barley Sugar*, *Penides*, *Penid'ium*, *Saccharum penid'ium*, is a variety of sugar candy.

SACCHARUM LACTIS, *Sugar of milk*.

SACCHARUM NON-PURIFICA'TUM, *Muscovado*, *raw or brown or moist sugar*, is the *S. commune*, *S. rubrum*, *Mel cannae*, or *coarse sugar*.

SACCHARUM OFFICINARUM, see *Saccharum*—*s. Penidium*, *Hordeatum*—*s. Rosaceum*, *Confectio rosee gallicae*—*s. Saturni*, *Plumbi superacetos*.

SACCHARURE, from *saccharum*, 'sugar.' A medicine resulting from the intimate union of sugar with the medicinal principles of alcohol or ethereal tinctures.—Béral.

SACCULATED, Encysted.

SACCULATUS, Encysted.

SACCULI ADIPOSITI, *Fatty vesicles*—*s. Chalicophori*, see *Lacunæ of Bone*—*s. Laryngei*, *Ventricles of the larynx*.

SACCULI MEDICINA'LES, *Bags containing medicinal substances*.

SACCULI MEDULLARES, see *Medullary membrane*.

SACCULUS, diminutive of *saccus*, 'a little sac.' This name has been given to two sacs formed by the membranous vestibule, which open into each other, and contain the *otolithes* and *otoconies*: one of these is termed the *sacculus vestib'uli*, the other *sacculus*. See *Semicircular canals*.

SACCULUS, Marsupium—*s. Cephalicus*, *Cucupha*—*s. Chylifer seu rorifer*, *Receptaculum chyli*—*s. Cordis*, *Pericardium*—*s. Ellipticus*, see *Semicircular canals*.

SACCULUS LARYN'GIS, A cæcal pouch, of variable size, formed by the mucous membrane in the ventricles of the larynx.—Hilton.

SACCULUS MEDICINALIS, *Pulvinar medicatum*—*s. Sphericus*, see *Semicircular canals*—*s. Vestibuli*, *Semicircular canals*.

SACCUS, Sac—*s. Coli*, *Cæcum*—*s. Cordis*, *Pericardium*—*s. Herniosus*, *Hernial sac*—*s. Epiploicus*, *Epiploon*—*s. Intestini crassi*, *Cæcum*—*s. Lacrymalis*, *Lachrymal sac*—*s. Lacrumalis*, *Lachrymal sac*—*s. Lacteus*, *Receptaculum chyli*—*s. Mucosus*, see *Bursæ mucosæ*—*s. Pleurae*, *Pleura*—*s. Venarum cavarum*, *Sinus dexter cordis*—*s. Venarum pulmonalium*, *Sinus pulmonalis*.

SACER, Sacral—*s. Ignis*, *Herpes zoster*—*s. Morbus*, *Epilepsy*—*s. Musculus*, *Transversalis dorsii*.

SACERDOTIS PENIS, *Arum maculatum*.

SACHET (F.), *Sacculus*, 'a bag.' A small bag containing perfumes to be placed among clothes to communicate to them an agreeable odour. The following is a formula for the powder they contain. *Powdered cloves* and *powdered cassia*, each one ounce; *powdered orris root*, an ounce and a half; *powdered yellow sandal wood*, one drachm; *oil of roses*, twenty-four drops; *oil of lavender*, *oil of bergamot*, each one drachm; *musk*, six grains. A scent-bag.

SACK. A wine used by our ancestors; *Vin sec*. Probably *Sherry*.

SACK, *Saccus*, *Seclusorium*; *Sax. jac*. A bag or pouch.

SACK, HER'NIAL, *Saccus herniosus*, (F.) *Sac herniaire*. An envelope or pouch, formed by the serous membrane of the cavity, whence a viscus has escaped. We distinguish, in a hernial sac, its orifice or the opening by which it communicates with the great cavity lined by the serous membrane: its *cervix* or *neck*, (F.) *Collet*, the narrow portion on the outside of the orifice, where strangulation sometimes occurs: the *body*, (F.) *Corps*, which is the round prominent part; and the *fundus* or *bottom*,—the part opposite to the orifice.

SACK POSSET; from *sack*, 'the wing,' and *posset*. A posset made of sack, milk and other ingredients.

SACK, SEROUS. The shut cavity formed by any serous membrane, as by the pleura or peritoneum.

SACRAD, see *Sacral*.

SACRA FISTULA, *Vertebral column*.

SACRAL, *Sacer*, (F.) *Sacré*. That which belongs or relates to the sacrum. A name given to several parts.

SACRAL ARTERIES are distinguished into 1. The *anterior or middle sacral. Median Artery of the Sacrum* of Chaussier, which arises from the posterior part of the abdominal aorta, in front of the 4th lumbar vertebra. It descends, in a serpentine manner, upon the sacro-vertebral articulation, and on the anterior surface of the sacrum. It furnishes many lateral branches, which unite with the lateral sacral arteries, and enter the anterior sacral foramina, to be distributed to the membranes of the marrow, &c. 2. The *lateral sacral arteries*, which are two in number; one on each side. They arise from the hypogastric, from the ilio-lumbar, or from the gluteal; and descend before the anterior sacral foramina, anastomosing in an arched manner, towards the coccyx, with the middle sacral. They give off *external and posterior branches*, which enter the sacral foramina; and *internal branches*, which are distributed to the pyramidalis, sacrum, &c.

SACRAL ASPECT. An aspect towards the region where the sacrum is situated.—Barclay. *Sacrad* is used by the same writer adverbially to signify 'towards the sacral aspect.'

SACRAL EXTREMITIES. The lower limbs.

SACRAL GROOVES, (F.) *Gouttières sacrées*. Two longitudinal excavations, slightly marked, at the posterior surface of the sacrum; which appear to terminate the vertebral grooves or gutters.

SACRAL NERVES, (F.) *Nerfs sacrés*, are generally six in number. They arise from the termination of the spinal marrow. The first, united with the great cord which descends from the lumbar plexus, concurs with the three others in the formation of the sacral or sciatic plexus. The third and fourth, with branches of the great sympathetic, form the hypogastric plexus. The fifth and sixth (*coccygeal nerve*) are distributed to the ischio-coccygeus muscle, and to the sphincter and levator ani.

SACRAL PLEXUS, *Sciatic plexus*.—the *sacral portion of the crural plexus* of Chaussier, constituted as just mentioned, is situate in front of the pyramidalis. It gives off, backwards, two branches, called the *puhic*, (F.) *honteux*, and the *lesser sciatic*. It terminates in the great sciatic nerve.

SACRÉ, Sacral.

SACROCOCCYGE'AL, *Sacro-coccygeus*. Relating to the sacrum and coccyx.

SACROCOCCYGE'AL ARTICULATION is that of

the lower extremity of the sacrum with the superior *facette* of the coccyx. It is closed by two ligaments;—an anterior and a posterior *sacro-coccygeal*.

SACROCOSTALIS, *Sacro-lumbalis*—*s. Fémoral*, *Gluteus major*.

SACROCOXAL'GIA, from *sacrum*, 'the os sacrum,' *coxa*, 'the hip,' and *algos*, 'pain,' a hybrid term. Some authors have called thus a rheumatic affection of the sacro-iliac symphysis.

SACROIL'IAC, *Sacro-ili'acus*. That which relates to the sacrum and ilium.

SACROIL'IAIC ARTICULA'TION, **SYM'PHYSIS**, or **SYNCHONDRO'SIS**, *Ilio-sacral articulation*, *symphysis* or *synchondrosis*, is the union of two surfaces;—two inclined planes, broader above than below; one formed by the sacrum, the other by the ilium. Both surfaces are incrustated by an articular cartilage. The bands which strengthen them are the two *sacro-sciatic ligaments*, the *sacro-spinal*, a *sacro-iliac* ligament, and some irregular fibres. The *sacro-iliac* ligament is a very thick assemblage of short, dense, irregular fibres, occupying the space which the sacrum and ilium leave between them, behind their articular surface. Some authors have termed some irregular fibres, situate in front of the sacro-iliac articulation, *anterior sacro-iliac ligaments*, in opposition to the preceding fasciæ, which they call *posterior sacro-iliac*.

SACROISCHIATICUS, *Sacro-sciatic*.

SACROLOMBAIRE, *Sacro-lumbalis*.

SACROLUMBAR, *Sacro-lumba'lis*, *Sacro-lombaire*. That which belongs to the sacrum and loins.

SACROLUMBAR, *Sacro-lumba'lis*, *Sacro-lumba'ris Muscle*, *Sacro-coxal'is*, *Dorso-trache'lian portion of the Sacro-spinal* of Chaussier, (*F.*) *Lombocoxo-trachélien*, *Sacro-lombaire*, is seated at the posterior part of the trunk; is thick and triangular below; flat and thin in the remainder, and terminates in a point at its upper extremity. It is attached to the posterior surface of the sacrum; to the corresponding portion of the crista ili; to the extremities of the transverse processes of the lumbar vertebra; to the angles of the eleven inferior ribs; to the tuberosity of the first, and the posterior tubercle of the transverse processes of the last five cervical vertebra. The *sacro-lumbalis* straightens the vertebral column when bent forwards, and maintains it straight. By means of its insertion into the ribs, it can elevate or depress these bones, according as it contracts from above to below, or from below to above. It acts, consequently, sometimes as an inspiratory, at others as an expiratory muscle.

From six or eight of the lower ribs arises an equal number of fleshy portions, which terminate at the inner side of this muscle, and are called *Mus'culi Accessor'ii vel Additamentum ad Sacro-lumbalem*, (*F.*) *Accessoires du Sacro-lombaire*.

From the upper part of the sacro-lumbalis, a fleshy slip, called *Cervical'is descendens*, *Cervicalis descendens Diemerbroeck'ii*, *Transversalis collateral'is colli*, *Accessorius ad Sacro-lumbalem*, (*F.*) *Transversaire grêle*, runs up, to be fixed to the transverse processes of the fourth, fifth, and sixth cervical vertebra, by three distinct tendons. These last parts, though separated by some anatomists, belong to the sacro-lumbalis.

SACROSCIAT'IC, *Sacro-ischiat'icus*. That which belongs to the sacrum and ischium.

SACROSCIATIC LIGAMENTS are two ligaments, which assist in securing the sacro-iliac articulation. The *great* or *posterior sacro-sciatic ligament* extends from the crista ili and the sides of the sacrum and coccyx to the tuberosity of the ischium. The *less* or *anterior sacro-sciatic liga-*

ment arises from the same point, and terminates in the spine of the ischium.

SACROSPINAL, *Dorso-trachelian* portion of the sacro-lumbalis.

SACROSPINA' LIS. That which relates to the sacrum and spine. Under this name, Chaussier describes the sacro-lumbalis, longissimus dorsi, transversalis, transverso-spinalis, and intertransversalis. He divides it into three portions.

SACROTROCHANTÉRIEN, *Pyramidalis*.

SACROVERT'EBRAL, *Sacro-vertebra'lis*. That which relates to the sacrum and the vertebrae.

SACROVERTEBRAL ARTICULATION is the junction of the last vertebrae of the loins with the sacrum. The angle which these two bones form at the anterior part has been called the *Prom'on-tory of the Sacrum*, or the *Sacro-vertebral Angle*.

SACROVERTEBRAL LIGAMENT is a strong ligament, which passes from the anterior part of each of the transverse processes of the last lumbar vertebra to be attached to the base of the sacrum. Its use is to maintain the articulation of those two bones *in situ*.

SACRUM, *Os sacrum*, *Os basilare*, *Os Alagaz*, *Os latum*, *Os clun'ium*, *Vertebra magna*, *Albagazi*, *H'eron ost'ion*, *Clunie*, *Subver'tebra*, *Subver'tebrium*, *Ver'tula*; from *sacer*, 'sacred;' because it contributes to protect the genital organs, which were considered sacred, or because it was offered in sacrifice. The bone, which forms the posterior part of the pelvis, and is a continuation of the vertebral column. The sacrum is symmetrical and triangular, situate at the posterior part of the pelvis, and concave anteriorly. It has,—
1. A *pelvic or anterior surface*, which corresponds to the pelvic cavity, and has four transverse furrows, that point out the parts where the primitive portions of the bone were separated from each other. On each side there are four foramina, called *anterior sacral*; these are oblique, and decrease in size, from above downwards. Through these pass the anterior branches of the sacral nerves. 2. A *spinal or posterior surface*, which is convex, rough, and covered by muscles. Upon the median line are four horizontal, tubercular eminences, forming a continuation of the spinous processes of the vertebra; and below, a triangular notch, where the *sacral canal* terminates. On each side of the surface are four foramina, called *posterior sacral*, which are smaller than the anterior, and give passage to the posterior branches of the sacral nerves. 3. The *vertebral surface or base*. Its greatest extent is transversely. It is articulated with the last lumbar vertebra. On it is seen the orifice of the *sacral canal*, of a triangular shape, which decreases in width from above downward; terminates the vertebral canal; is lined by a prolongation of the cerebral membranes; contains the fasciculi of the sacral nerves; communicates, externally, by the sacral foramina; and terminates at the triangular notch on the posterior surface of the bone. At the sides of the upper orifice of the sacral canal are two articular processes, which receive the articular processes of the last lumbar vertebra. The projection formed by the union of the base of the sacrum with the last lumbar vertebra, is called the *Prom'on-tory*, *Promontorium Ovis Sacri*, *Great Angle of the Sacrum* or *Sacro-vertebral Angle*. 4. A *coccygeal face or apex*, (*F.*) *Face coccygienne* ou *Sommet*, which is very narrow, and is articulated with the coccyx. 5. *Two lateral margins*, which have, above, a broad, oblique surface, articulated with the ilium.

The sacrum is developed by 30 to 36 points of ossification.

SADDLE, TURKISH, Sella Turcica.

SÆPES, Sepes.

SAFFLOW, *Carthamus tinctorius*.SAFFLOWER, *Carthamus tinctorius*.

SAFFRON, Crocus — *s. Bastard, Carthamus tinctorius* — *s. Dyers', Carthamus tinctorius* — *s. Flower, Carthamus tinctorius* — *s. Meadow, Colchicum autumnale*.

SAFRAN BÂTARD, *Carthamus tinctorius, Colchicum autumnale* — *s. des Indes, Curcuma longa* — *s. de Mars apéritif, Ferri subcarbonas* — *s. de Mars astringent, Colcothar* — *s. des Près, Colchicum autumnale* — *s. Racine de, Curcuma longa*.

SAFRANUM, *Carthamus tinctorius*.

SAFRE, Smalt.

SAGA, Sago.

SAGAPE'NUM, *Sag'apin, Serapi'non, (F.) Gomme staphique*. A gum-resin, supposed to be obtained from the *Fer'ula Per'sica*. Family, Umbelliferae. Sex. Syst. Pentandria Digynia. Its odour is fetid and alliaceous; taste pungent, bitterish, nauseous. It is in small, agglutinated masses of a yellow colour; tenacious; breaking with a horny fracture. It is a reputed antispasmodic and emmenagogue. Dose, gr. x to ℥ss.

SAGAPIN, Sagapenum.

SAGE, Salvia — *s. Indian, Eupatorium perforiatum* — *s. Jerusalem, Pulmonaria* — *s. Tree, Lantana* — *s. Wild, Salvia Africana*.

SAGE-FEMME, Midwife.

SAGENA, Epiploon.

SAGESSE DES CHIRURGIENS, *Sisymbrium Sophia*.

SAGIMEN VITRI, Soda, subcarbonate of.

SAGIT'TAL, *Sagitta'lia, Sagitta'tus, from sagitta, 'an arrow.'*

SAGITTAL FURROW, *Sagittal Groove, (F.) Gouttière sagittale*, is a channel on the median line of the inner surface of the skull-cap. It is excavated in the os frontis, in the two parietal and occipital bones, and extends from the crista galli to the internal occipital protuberance. It lodges the longitudinal sinus, which has been called the *sagittal sinus*.

SAGITTAL SUTURE, *Obela's sutu'ra, O. Raphæ, Sutura Virga'ta, S. juga'tis, S. Rabboid'es, Rhabdoid'es, Rhabdo'des, Rhabdoideus seu Biparieta'lis*. The suture which unites the two parietal bones, and which extends, from before to behind, on the median line, from the coronal suture to the lambdoidal. It is so called, from *sagitta, 'an arrow,'* because it seems to meet the coronal suture as an arrow meets the string of a bow.

SAGITTA'RIA VARIAB'ILIS, *Arrowhead, Arrowleaf, Wapata* of Oregon; *Nat. Ord. Alismacæ*; esculent, yielding fecula like arrow-root. The roots are cooling and sub-astringent, and are at times applied to the feet in cases of yaws and dropsical swellings of the legs. The leaves are applied to the breasts to dispel milk.

SAGITTA'RIMUM ALEXIPHAR'MACUM, *Malac'ca radix, Canna In'dica, Arum'do Indica*. A root cultivated in the West Indies, and supposed to be a remedy for wounds by poisoned arrows.

SAGITTATUS, *Sagittal*.

SAGO, *Sagus, Saga, Sngu, Segu, Am'yllum pal-maceum, (F.) Sagou, Sague*. A fecula, obtained from the pith of the *Sagus rumph'i, Cycas circina'lia, C. revoluta, &c.*, growing in the Moluccas, Philippine Isles, &c., and which is brought to us in small grains. The same substance is, also, obtained from the West Indies, but it is inferior to that from the East. By boiling in water or milk, sago becomes soft and transparent, and forms an agreeable and nutritious food in febrile,

calculous, and other disorders. It is made palatable by sugar, lemon-juice, or wine, where the last is not contra-indicated.

To make sago into a proper mucilage for the sick, a tablespoonful of it should be macerated in a pint of water for two hours, and then boiled for fifteen minutes, stirring assiduously. Care must be taken, that the grains are perfectly dissolved by long boiling and constant stirring.

Sago posset is made by putting *sago, ℥ij*, into water, *℔ij*; boiling until the mucilage is formed: then rubbing *sugar, ℥ss*, on the rind of a lemon, and putting it with *tincture of ginger, ℥℥j*, into *sherry, Oss*; adding this mixture to the mucilage, and boiling for five minutes.—It is a good restorative.

SAGO, FRENCH, see *Solanum tuberosum*, and Arrow-root, common — *s. Portland Island, see Arum maculatum*.

SAGOU, Sago.

SAGU, Sago.

SAGUE, Sago — *s. Petit, see Solanum tuberosum*.

SAGUS, Sago — *s. Rumphii, see Sago*.

SAHARA, Insomnia.

SAIGNÉE, Blood-letting — *s. Spoliaticæ, Spoliativa phlebotomia*.

SAIGNEMENT DU NEZ, Epistaxis.

SAILORS, DISEASES, &c., OF. Sailors, by nature of their occupation, are liable to many diseases. Several of these may, however, be warded off by proper attention to cleanliness and ventilation.

SAIN BOIS, *Daphne gnidium* — *s. Doux, Adeps preparatus*.

SAINT AMAND, MINERAL WATERS OF. Sulphuretted waters, in the department of Du Nord, France. They contain carbonic and sulphohydric acids. The *Boue* or deposit contains sulphohydric acid, and salts of iron and magnesia. Temperature, 64° to 82° Fahr.

SAINT AUGUSTINE, CLIMATE OF. This sea-port of Florida is a frequent retreat during the winter season for the valetudinarian from the more northern parts of the United States. The climate is certainly comparatively mild and equable; but it is liable to frequent north-east storms. There are only a few days, however, in winter, in which the invalid cannot take exercise in the open air. Tampa Bay, and Pensacola, in Florida, and Mobile, in Alabama, which are sometimes visited by the consumptive, are less liable to the storms in question.

SAINT CHARLES'S ROOT, *Carlo Sancto (Radix)*.

SAINT CROIX, Santa Cruz.

SAINT JAMES'S WORT, *Senecio Jacobææ*.

SAINT JOHN'S DANCE, see *Mania, dancing* — *St. John's Wort, Hypericum perforatum*.

SAINT KITTS, see *West Indies*.

SAINT LEONARD'S, CLIMATE OF. This place, which is situate about a mile to the westward of Hastings, in Sussex, England, is less sheltered than it, and is therefore a less favourable retreat, during the winter months, for the phthical valetudinarian.

SAINT MYON, MINERAL WATERS OF. Some cold, acidulous waters at Saint Myon, near Riom, in the department of Puy-de-Dôme. They contain free carbonic acid, subcarbonate of soda, chloride of sodium, and carbonate and sulphate of lime.

SAINT NECTAIRE, MINERAL WATERS OF. Springs in the department of Puy-de-Dôme, France. They contain carbonic acid, bicarbonate of soda, and chloride of sodium. Temperature, 75° to 103° Fahr.

SAINT PARDAUX, MINERAL WATERS

OF. Chalybeate springs in the department of Allier, France. They contain carbonic acid and iron.

SAINT SAUVEUR, MINERAL WATERS OF. Sulphurous waters in the department of Hautes-Pyrénées, France. Temperature, 76° to 93° Fahr.

SAINT VINCENT'S, see West Indies.

SAINT VITUS'S DANCE, Chorea, see Mania, dancing — s. Vitus's Dance of the Voice, Balbuties.

SAIRE, Essera.

bonas, Spiritus ammoniæ aromaticus — s. Volatile Benzoës, Benjamin — s. Volatile boracis, Boracic acid — s. Volatile oleosum Sylvii, Spiritus ammoniæ aromaticus — s. Volatile succini, Succinic acid — s. Volatilis salis ammoniaci, Ammoniac carbonas — s. Vomitorium vitrioli, Zinci sulphas.

SALAAM CONVULSION, see Convulsion, Salaam.

SALAB, Salep.

SALACITAS, Satyriasis — s. Vulvæ, Nymphomania.

SALAD, CORN, Valeriana dentata.

SALAP, Salep.

SALCOMBE, (CLIMATE OF.) A small place — the Montpellier of Huxham — which is one of the warmest spots on the S. W. coast of England, and, therefore, in this respect adapted for the phthisical invalid as a winter retreat.

SALEP, *Saloop'* (so pronounced.) *Salab, Salap.* The prepared bulb of the *Orchis maculata* and other species of Orchis. The salep of Cachmere is from a species of *Eulophia*. Salep is in small, irregular, hard masses. In its composition in relation to water, it is closely analogous to tragacanth. It is possessed of similar virtues with sago, tapioca, &c. The mucilage is prepared by dissolving the powdered salep in hot water, with assiduous stirring, and adding to the solution sugar and milk.

SALER'NUM, (SCHOOL OF.) An ancient school of medicine at Salerno in Italy. It was established by Charlemagne, in 802; and was the first Christian university at which medicine was taught. It was much celebrated, especially in the 12th century. The work on hygiene, "*De Conservandâ Valetudine*," which bears its name, has passed through several editions in various languages. It is supposed to have been written by John of Milan, in 1100, and is in Leonine verses.

SALICARIA, *Lythrum salicaria.*

SALICINE, see Salix.

SALICORNIA ARABICA, &c., see Soda.

SALINE, *Sali'nus, Salina'cius, Sulina'cidus, Sali'tus, Salus, Hali'nus, Halny'rus, Halico'des, Sali'nous*, from *sal*. That which contains a salt, or has the properties of a salt.

SALINE DRAUGHT OR MIXTURE. This may be made as follows:—*Potassæ carbon.* ℥j, *acid. citricæ*, vel *tartar.* gr. xv, vel *succ. limon. recent.* ℥ss, *aque f* ℥vij, *syrrup. cjujusvis* ℥j. M. Given in divided doses as a febrifuge.

SALINE EFFERVESCING DRAUGHT OR MIXTURE is made by adding a due proportion of either of the acids above mentioned, or of lemon-juice, to the proper proportion of the carbonate of soda or potassa. About 25 grains of the acid saturate 30 grains of the carbonate. See Powders, soda.

SALINOUS, Saline.

SALIS AMMONIACI FLORES, Ammonie carbonas.

SALITIO, Leap.

SALITUS, Saline.

SALIUM, Saliva.

SALIUNCA, Valeriana Celtica.

SALIVA, *Si'alon, Si'elon, Si'alo'ma, Ptyema, Pty'alon, Pty'elon, Sa'ikum, Sputa'men, Sputa'mentum, Sputum, Spittle.* An inodorous, insipid, transparent, slightly viscid fluid; secreted by the parotid, submaxillary and sublingual glands, and poured into the mouth by the ducts of Steno, Wharton and Rivinus; the use of which is to mix with the alimentary bolus, and to serve in the process of digestion. It is composed, according to Berzelius, of 992.2 parts of water, 2.9 of a particular animal matter, soluble in water, and insoluble in alcohol, *pty'alin, princip'ium saliva'la,*

mat'ria sial'i'na, of 1.4 of mucus, 1.7 of chlorides of potassium and sodium, 0.9 of lactate of soda and animal matter, and 0.2 of soda.

SALIVÆ FLUXUS CIBO VISO, see Salivation.

SALIVAIRE, Salivary.

SALIVAL, Salivary.

SALIVANS, Sialagogue.

SALIVANT, Sialagogue.

SALIVARIS, Salivary — *s. Herba*, Anthemis pyrethrum.

SALIVARY, *Saliva'rius*, *Saliva'ris*, *Salivo'rus*, *Sal'ival*, *Sal'ivous*, from *saliva*, (F.) *Salivaire*. That which belongs to the saliva.

SALIVARY CALCULI, see Calculi, salivary.

SALIVARY FIS'TULE, *Sialosyrin'gee*, are such as depend upon an accidental opening into the excretory ducts of the salivary glands. Fistulæ are most commonly met with in the duct of Steno.

SALIVARY GLANDS, *Secreting organs of the saliva*, *Salival glands*, are situate symmetrically, to the number of four, on each side of the face. Their form is very irregular, and their extent varies according to individuals. Their excretory ducts — *Ductus Saliva'rii*, (F.) *Osnaux* ou *Conduits salivaires*, carry the saliva directly into the mouth, without pouring it into any intermediate reservoir, as happens in the case of some of the other glands. The salivary glands have been distinguished into,—1. The *parotid*; 2. The *sub-maxillary*; 3. The *sublingual*; and 4. The *intra-lingual* or *lingual*, seated at the inferior surface of the tongue, where the mucous membrane forms a fringed fold.

SALIVATIO, Salivation—*s. Mercurialis*, Salivation, mercurial.

SALIVATION, *Saliva'tio*, *Saliva'tio cal'ida*, *Epiph'ora ptyali's'ius*, *Sialis'mus*, *Sputum Ora*, *Sial'achus*, *Sialismus*, *Sialorrh'æa*, *Sialos'e'mia*, *Ptyali's'mus*, *Pty'alium*, *Fluxus sili'væ*, (F.) *Flux de Bouche*, *Flux salivaire*. A superabundant secretion of saliva; occasioned either locally, by the use of irritating masticatories, or under the influence of some cause which acts on the whole economy, and especially of mercurial preparations. In this last case it is accompanied by a coppery taste in the mouth, by swelling of the gums, and sometimes by looseness of the teeth. Salivation may usually be diminished by the use of astringents, laxatives, &c.

Ptyalismus acutus sympath'icus, *Salivæ fluxus cibo viso*, *Mouth watering*, the increased flow of saliva produced by the sight, smell, or thought of agreeable food, is a species of ptyalism, as well as the *Ptyalismus acutus mellitus*, *Apoceno'sis ptyali's'mus mellitus*, or *Sweet spittle*. In this the saliva has a sweet or mucilaginous taste.

SALIVATION, MERCURIAL, *Saliva'tio mercuria'lis*, *Sialos'e'mia mercurialis*, *Ptyali's'mus mercuria'lis*, *P. hydrargyri'us*, (F.) *Ptyalisme mercuriel*, *Salivation mercurielle*. Salivation produced by mercury. The stomatitis that accompanies it is termed *mercurial*, *Hydrar'gyro-stomatit'is*, (F.) *Stomatite mercurielle*.

SALIVATION MERCURIELLE, Salivation, mercurial.

SALIVATUM, Sialagogue.

SALIVOSUS, Salivary.

SALIVOUS, Salivary.

SALIX. The *Willow*, *Ptea*, (F.) *Sauze*. A genus of plants in the Linnæan system.

SALIX FRAG'ILIS, *S. pen'dula* seu *decip'iens* seu *amygdali'na* seu *persicifolia* seu *Russelia'na* seu *pippoph'æfolia* seu *Tretera'nii*, or Crack willow (Ph. D.) SALIX ALBA, *S. cæru'lea* seu *virgeli'na*, or White willow (Ph. D. and Ph. U. S.) SALIX LATIFOLIA, or broad-leaved willow. SALIX CA'PREA, *S. ephacela'ta* seu *tomentosa*, or Great

round-leaved willow (Ph. L.) SALIX PYRAM'DRIA seu HERMAPHRODIT'ICA. SALIX HU'MILIS, Low bush willow, Speckled willow. SALIX VITCE-LI'NA, SALIX ERYOCHFF'ALA. The bark of each of these has a slightly aromatic odour, and a bitter astringent taste, which is nearly the same in all the species. It is tonic and astringent, and has been used in intermittents, and in cases of dyspepsia, worms, &c. The active principle has been separated, and called *Sal'icine*. It is like the quinia in medicinal efficacy. Dose, ℞j to ℞j of the powder. Dose of *Salicine* from 4 to 6 grains.

SALIX ÆGYPTIACA, Calaf.

SALLOW, Lurid.

SALMIAC, Ammonia murias.

SALOOP, Salep.

SALPETRA, Soda, nitrate of.

SALPINGEMPHRAX'IS, from *σαλπιγξ*, 'the Eustachian tube,' and *εμφραξις*, 'obstruction.' Obstruction of the Eustachian tube; — a cause of deafness.

SALPINGIT'IS, from *σαλπιγξ*, 'a tube,' and *itis*, 'denoting inflammation.' Inflammation of the Eustachian tube.

SALPINGOCYCE'ISIS, *Paracyc'is tuba'ria*, *Gravid'itas tuba'ria*, from *σαλπιγξ*, 'a tube or trumpet,' and *κύσις*, 'pregnancy.' Tubal pregnancy. — See Pregnancy.

SALPINGOMALLËEN, Tensor tympani — *s. Staphylinus internus*, Levator palati.

SALPINGOPHARYNGË'US, from *σαλπιγξ*, 'a trumpet,' and *φαρυγξ*, 'the pharynx.' Valsalva and Douglas have given this name to a bundle of fibres, which passes from the Eustachian tube to the pharynx.

SALPINGOSTAPHYLINUS, Circumflex muscle.

SALPINGOSTENOCHOR'IA, from *σαλπιγξ*, 'a tube,' *στενός*, 'narrow,' and *χωρα*, 'space.' Narrowness or stricture of the Eustachian tube.

SALPINX, Tuba.

SALSAFI, Tragopogon.

SALSAMENTUM CRUDUM, Omotarichos.

SALSAPARILLA GERMANICA, Sarsaparilla Germanica.

SALSEDO MUCRUM, Potassæ nitras.

SALSEPAREILLE, Smilax sarsaparilla — *s. d'Allemagne*, Sarsaparilla Germanica.

SALSILAGO, Muria.

SALSOLA DECUMBENS, S. Kali.

SALSO'LA KALI, *S. Decum'bens*, *Kali soda*, *Prickly Saltwort*, *Kali spinosum cochlea'tum*, *Tragus* sive *Tragum Matth'oli*. This plant, as well as the *Salsola sati'ra* and the *Salsola acida* seu *longifolia*, *Kali iner'mis* seu *soda*, *Herba vitæ*, produces the alkaline salt, commonly called *Barrilla*, *Soda*, or *Kelp*.

SALSOLA LONGIFOLIA, S. Kali — *s. Sativa*, &c., see S. Kali, and Soda — *s. Soda*, see S. Kali.

SALSUGINOSUS, Halmyrodes.

SALSUS, Salina.

SALT, *Sal*, *Hal*, *Hals*, 'αλς, (F.) *Sal*. A name formerly given to a considerable number of substances of very different nature. At present, chymists apply the term *Salts* exclusively to the combination of an acid with one or more bases. *Neutral salts* are those in which the acid and base reciprocally saturate each other. *Acid salts* or *supersalts*, (F.) *Sur-sels*, are those in which the acid predominates over the base. *Alkaline salts* or *subsalts*, (F.) *Sous-sels*, those in which the base is, on the contrary, predominant. The different denominations of the salts are compounded, 1. Of the name of the acid; the termination of which is changed into *ite*, when the name of the acid is

in *ous*; — *ate*, when it is in *ic*. Thus the salts formed by the sulphurous acid are *sulphites*; those by the sulphuric, *sulphates*. 2. This name is followed up by that of the oxyd, that enters into the composition of the salt. Thus, the *sulphate of protoxyd of iron* is a combination of sulphuric acid with the protoxyd of that metal. Frequently, to shorten the name, the word *oxyd* is suppressed; and *proto*, *deuto*, *trito*, &c., put before the acid:—as *protosulphate of iron*. *Simple salts* are those resulting from the combination of an acid with a single base: *double salts* with two different bases: *triple* with three, &c. A *haloid salt* is one constituted after the type of common salt, or which contains a metal and a *salt-radical*, as chlorine, iodine, &c. An *oxysalt* is formed from the combination of an acid with an oxide.

When *salt* is used in an abstract sense, it means the chloride of sodium.

SALT APERIENT, OF FREDERICK, Soda, sulphate of—s. Baker's, Ammoniae carbonas—s. of Barilla, Soda, subcarbonate of—s. Bay, Soda, muriate of—s. Bitter purging, Magnesia sulphas—s. Common, Soda, muriate of—s. Epsom, Magnesia sulphas—s. Glauber's, Soda, sulphate of—s. Glauber's, Lymington, see Soda, sulphate of—s. Rochelle, Soda, tartrate of—s. Rock, Soda, muriate of—s. Sea, Soda, muriate of—s. Secondary, Neutral salt—s. Seignette's, Soda, tartrate of—s. Smelling, Ammoniae carbonas—s. of Soda, Soda, subcarbonate of—s. Sore-throat, Potassae nitras fusus sulphatis paucillo mixtus—s. of Tartar, see Potassae subcarbonas, and Potash—s. Tasteless purging, Soda, phosphate of—s. of Urine, Ammoniae carbonas—s. White, Soda, muriate of—s. of Woodsoot, Ammoniae carbonas—s. of Wormwood, see Potash.

SALTANS ROSA, Urticaria.

SALTATIO, Dancing—s. Sancti Viti, Chorea.

SALTERTON. A village about four miles to the eastward of Exmouth, England, frequented as a winter abode by invalids. It is in a small, open valley on the seashore, and is well protected from winds, particularly the northerly.

SALTISH, Halmyrodes.

SALTPETRE, Potassae nitras.

SALTUS, Leap, Vulva—s. Tendinum, Subsul-tus tendinum.

SALTWORT, PRICKLY, Salsola kali.

SALUBRIOUS, Salutary.

SALUBRIOUSNESS, Salubrity.

SALUBRIS, Salutary.

SALUBRITY, *Salu'britas*, *Salu'briousness*, (F.) *Salubrité*, from *salus*, 'health.' Any thing which contributes to the health of individuals or of communities. Situations differ materially from each other in this respect; and the cause of the difference is often an interesting topic of inquiry.

SALUS, Sanitas.

SALUTAIRE, Salutary.

SALUTARY, *Peries'ticos*, *Saluta'ris*, *Salu'ber*, *Salu'bris*, *Hygie'nius*, *Hygiasticus*, *Hygie'rus*, *Salu'brins*, (F.) *Salutaire*. Same etymon. Healthy. That which is favourable to health. Some diseases have been considered salutary; but this is doubtful.

SALUTIFEROUS, *Salu'tifer*; from *salus*, 'health,' and *fero*, 'I bear.' Bringing health; health bearing.

SALVATELLA; same etymon, (?) *Vena sal-uate'la*, is situated on the back of the hand, near its inner margin. It begins on the posterior surface of the fingers and dorsal surface of the hand, by a plexus, formed of a number of radicles, frequently anastomosing with each other; it then ascends to the inner part of the forearm, where it takes the name—*posterior cubital*. The ancients

recommended this vein to be opened in certain diseases, as in melancholic and hypochondriacal affections; and they attributed to such abstraction of blood considerable efficacy in the cure of disease: hence its name.

SALVE, BLISTERING, Unguentum lytta—s. Eye, Unguentum oxidi zinci impuri—s. Eye, Singleton's, Unguentum hydrargyri nitrico-oxydi—s. Healing, Cerate of calamine.

SALVIA, *S. officinalis* seu *hortens'is* seu *vulga'ris* seu *minor*, *Elelis'phacos*, (F.) *Sauge*, *Petite Sauge*, *Thé d'Europe*, *Thé de France*. Family, Labiatae. Sex. Syst. Diandria Monogynia. Sage has a peculiar, aromatic odour, and a warm, aromatic, bitterish taste. Its virtues depend upon an essential oil. It is tonic, stimulant, and carminative. In the form of a weak infusion, it is occasionally used as a diluent, and as a wash for sore mouth. Dose, gr. xv to xxx or more.

SALVIA AFRICA'NA, *Wild Sage*, a South African species, has the same medical properties as *Salvia*.

SALVIA COLORATA, *Salvia*.

SALVIA HORMINUM, *Horminum*, *S. colorata*, *Horminum coloratum* seu *sativum*, (F.) *Sauge-hormin*, of the Pharmacopœias, is used in similar cases.

SALVIA HORTENSIS, *Salvia*—s. *Minor*, *Salvia*—s. *Officinalis*, *Salvia*.

SALVIA SCLAREA, *Sclarea*, *Gallitrichum*, *Ethio'pis*, *Bier'mas*, *Colus Jovic*, *Common Clary*, (F.) *Sauge sclarée*, *Grande sauge*, *Orvale* ou *Toute-bonne*. The leaves have been recommended as corroborants and anti-spasmodics.

SALVIA VITÆ, *Asplenium ruta muraria*—s. *Vulgaris*, *Salvia*.

SAMBU'CUS, *Sabu'cus*, *Sambucus nigra*, *S. vulga'ris*, *S. Arbo'rea*, *Actè*, *Infel'ix lignum*; *The Elder*, (F.) *Sureau commun*. Family, Capparifoliaceae. Sex. Syst. Pentandria Digynia—(The flower and bark were formerly called *Canopum*.) The flowers, berries, and bark of the elder have been used in medicine. The flowers have been reputed diaphoretic and discutient: the berries, aperient and sudorific: the bark, purgative, and, in small doses, deobstruent. The flowers are sometimes used in fomentations, and to form a cooling ointment.

SAMBU'CUS ARBOREA, *Sambucus*—s. *Chamae-acte*, *S. ebulus*.

SAMBU'CUS EBULUS, *Ebulus*, *Chamaeactè*, *Od'ocos*, *Sambucus Chamaeactè* seu *Hel'ion*, *Sambucus hu'milis* seu *Herba'cea*, *Dwarf-elder*, *Dane-wort*, (F.) *Hidde*. The root, interior bark, leaves, flowers, berries, (*Dacca* seu *Grana Actes*.) and seeds have all been given in moderate doses as resolvents and deobstruents; and in large doses as hydragogues. The berries of *Sambucus Canaden'sis*, the *Common Elder* of America, are made official in the American Pharmacopœia.

SAMBU'CUS HELION, *Sambucus ebulus*—s. *Herbacea*, *S. ebulus*—s. *Humilis*, *S. ebulus*—s. *Nigra*, *Sambucus*—s. *Vulgaris*, *Sambucus*.

SAMI TERRA, *Sa'mian Earth*. An argillaceous earth, found in the island of Samos, to which were ascribed virtues similar to those of the Terra Lemnii.—Galen, Dioscorides.

SAMIUS LAPIS. A stone found in the Isle of Samos, which the ancients believed to be astrigent and refrigerant.

SAMPHIRE, *Crithrum maritimum*.

SAMPSON, BLACK, *Echinacea purpurea*.

SAMPSUCIUS, *Thymus mastichina*.

SAMPSUCUS, *Origanum majorana*.

SAMPSYCHINON, *Sampsu'chinum*. An ointment composed of *σαμψυχον*; which was perhaps marjoram.—Dioscorides.

SANABILIS, Curable.

SANABLE, Curable.
SANAMUNDA, *Geum urbanum*.
SANATIO, Curation, Cure.
SANATIVE, Curative.
SAN GIULIANO, MINERAL WATERS OF.
 At the foot of the mountain San Giuliano, a league and a half from Pisa, are several mineral springs; temperature from 84° to 107° Fahr.
 The spring, *Pozzetto*, contains carbonic acid, sulphates of soda, lime, and magnesia; chlorides of sodium and magnesium; carbonates of lime and magnesia; argil and silica.—Santi.
SAND, see Gravel.
SANDALUM CÆRULEUM, *Guilandina moringa*—s. *Rubrum*, *Pterocarpus santalinus*.
SAN'DARAC, *Sandara'cha*, *Gum Ju'niper*, *Gum Sandarach*, *Pounce*, *Gummi Juniperi*, *Sandara'ca*, *Vernix sicca*, *Resina Juniperi*. A name given, by the Arabs, to an odorous resin, that flows from the *Thuya aphylla*. Family, Coniferae. *Ser. Syst.* Monœcia Monadelphia. It is stimulant, like all the resins; but is very little used.
SANDARACHA GRÆCORUM, Realgar.
SAND-BLIND. A defect of vision, in which small particles seem to fly before the eyes. See *Metamorphopsia*.
SANDERS, see Saunders.
SANDIVER, see Vitrum.
SANDIX, *Plumbi oxydum rubrum*.
SANDYX, *Plumbi oxydum rubrum*.
SANG, Blood—s. *Arteriel*, Arterial blood—s. *Dragon*, *Rumex sanguineus*—s. *Dragon*, see *Calamus rotang*—s. *Globules du*, Globules of the blood—s. *Perte de*, Hemorrhagia.
SANGAREE'. Wine and water, sweetened and spiced.
SANGLLOT, Sob.
SANGSUE, Hirudo.
SANGUIDUCTUS DURÆ MATRIS, Sinuses of the dura mater.
SANGUIIFICATIO, Hæmatisis—s. *Debilior*, *Hypohæmatisis*.
SANGUIFLUXUS, Hæmorrhagia—s. *Uterinus*, *Metrorrhagia*.
SANGUIMOTION, Circulation.
SANGUIMOTORY, Circulatory.
SANGUIN, (*Vaisseau*), Blood-vessel.
SANGUINALIS CORRIGIOLA, *Polygonum aviculare*.
SANGUINARIA, *S. Canadensis* seu *acaulis*, *Bloodroot*, *Bloodwort*, *Puccoon*, *Red Puccoon*, *Red Root*, *Indian Paint*, *Turmeric*. *Nat. Ord.* *Papaveraceæ*. *Ser. Syst.* *Polyandria Monogynia*. A North American plant, the rhizoma and seeds of which are used in medicine. They are emetic. Dose of the powder, 8 to 20 grains. They are said to reduce the velocity of the pulse, like digitalis.
SANGUINARIA, *Polygonum aviculare*.
SANGUINE, *Sanguineus*, *Sanguinosus*, *Hæmatæus*, *Hæmato'des*, *Hæmate'rus*, *Hæmatin'us*, *Hæmo'des*, *Hæmo'i'des*, *Sanguineous*; (F.) *Sanguin*. Bloody, blood-like; having the colour of blood, as 'a sanguine countenance.' Relating to, or containing blood—as 'sanguine temperament.' *Plethoric*.
SANGUINEA, *Potassæ nitras*.
SANGUINENESS, *Plethora*.
SANGUINEOUS, *Plethoric*, *Sanguine*.
SANGUINEUS, *Sanguine*.
SANGUINIS ABSORPTIO, Hæmorrhophesis—s. *Congestio*, *Congestion*—s. *Dissolutio*, *Hæmateclisis*—s. *Fluor*, *Hæmoptysis*—s. *Fluor Vesicæ*, *Cystorrhagia*—s. *Ictus*, *Apoplexy*—s. *Missio*, *Blood-letting*—s. *Profluviun copiosum*, *Hæmorrhagia*—s. *Profluviun ex Ore*, *Stomatorrhagia*—s. *Stagnatio*, *Hæmostasis*.

SANGUIN'OLENT, *Sanguinolen'tus*, from *sanguis*, 'blood.' Tinged with blood. An epithet applied, particularly, to the sputa when so tinged. *Bloody*.

SANGUINOSUS, *Sanguine*.

SANGUIPUR'GIUM, from *sanguis*, 'blood,' and *purgare*, 'to cleanse.' Purgation of the blood. A name given by some authors to mild fevers, from an idea that they purged the blood of noxious matters.

SANGUIS, Blood, Sperm—s. *Concretus*, *Coagulum*—s. *Draconis*, see *Calamus rotang*—s. *Hirci siccatas*, see *Blood*—s. *Menstruus*, see *Menses*—s. in *Urinâ*, *Hæmaturia*.

SANGUISOR'BA CANADEN'SIS, *Canada Burnett*. A tall indigenous plant—family, *Rosaceæ*—with white, sometimes purple, flowers, which appear from August to October. It has the same virtues as

SANGUISOR'BA OFFICINA'LIS, *S. carnea* seu *rubra*, *Ital'ian Pimpinella*, *Pimpinella Ital'ica* seu *officina'lis*, (F.) *Pimpinelle noire*. It was formerly used as an astringent and tonic, in hemorrhages, dysentery, &c.

SANGUISUGA, Hirudo.

SANGUISU'GUM. A barbarous term, to denote too great an accumulation of blood in the heart.—*Bonetus*.

SANICLE, *Sanicula*, *S. Marilandica*—s. *American*, *Heuchera cortusa*—s. *de Mariland*, *Sanicula Marilandica*—s. *Yorkshire*, *Pinguicola vulgaris*.

SANIC'ULA, *S. Europa'a* seu *officina'rum*, *Astrantia diapienia*, *Caucalis Sanic'ula*, *Cuculla'ta*, *Dodeca'theon*, *Symphytum petra'um*, *Sanic'ula mas*, *Diapienia*, *D. cortusa*, *Sanicle*, (F.) *Toute-saine*. Family, *Umbelliferae*. *Ser. Syst.* *Pentandria Digynia*. This herb was formerly used as a mild astringent. It is bitterish, and somewhat austere.

SANICULA, *Saxifraga granulæ*—s. *Eboracensis*, *Pinguicola vulgaris*—s. *Europa'a*, *Sanicula*.

SANIC'ULA MARILAN'DICA, *Sanic'ula*, *Mariland Sanicle*, *Black Snakeroot*, (F.) *Sanicle de Mariland*. This indigenous plant grows in marshes, or low and shaded ground. It is possessed of tonic virtues; and the powdered root is employed in popular practice as a favourite remedy in intermittent fever. It has been recommended, also, in chorea.

SANICULA MONTANA, *Pinguicola vulgaris*—s. *Officinarum*, *Sanicula*.

SANIDO'DES, *Sanio'des*, 'resembling a board,' from *ovis*, gen. *ovides*, 'a board,' and *odes*, 'resemblance.' One whose thorax is narrow, and, as it were, contracted.

SANIE, *Sanies*.

SANIES, *Ichor*, *Tabum*, *Virus*, *Pus malignum*, *P. corrosivum*, (F.) *Sanie*. A thin, serous fluid, presenting some of the qualities of pus and blood, and commonly exhaled at the surface of ulcers.

SANIODES, *Sanidodes*.

SANIOSUS, *Ichorous*.

SANIOUS, *Ichorous*.

SAN'ITORY, *San'atory*, *Healing*. (F.) *Sanitaire*. That which relates to health, and especially to public health; as *établissement sanitaire*; *police sanitaire*.

SANITA'RIVM, *Sanato'rium*; from *sanitas*, 'health.' A retreat selected for valetudinarians, in consequence of its salubrity. Also, an establishment for the treatment of the sick.

SAN'ITAS, *Hygie'na*, *Hyge'na*, *Hygiana'sis*, *Hygie'na'sis*, *Integ'ritas*, *Prosper'itas*, *Valetu'dinis*, *Salus*, *Hygie'na*, *Valetu'do*, *Valitu'do*, *Valetu'do bona* seu *secun'da* seu *com'moda*, *Hygie'na*, *Euno'dyna'mia*, *Health*, (F.) *Santé*, from *sanus*,

'sound.' Health has been defined,—a state, in which all the functions are exerted with regularity and harmony. A person may, however, be in health, although certain functions are not performed. A blind man, for example, has health when all his functions, except sight, proceed with regularity. *Sanity* is often used for soundness of mind.

SANITAS, Cure.

SANITY, Sanitas.

SANKIRA, Smilax China.

SANS PAIRE, (Veine,) Azygos vein.

SANTA CRUZ, (CLIMATE OF.) This West India island is frequently selected as a winter retreat for the phthisical valetudinarian from the United States; but it does not seem entitled to any preference, in such cases, over the other islands of the West Indies, whilst its general salubrity is said to be less than that of many.

SANTAL BLANC, Santalum album — s. Rouge, Pterocarpus santalinus.

SANTALUM, see Pterocarpus santalinus.

SANTALUM ALBUM, *S. citrinum* seu *palidum* seu *myrtifolium*, *Sirium myrtifolium*, *Yellow Saunders*, (F.) *Santal blanc*. *Sex. Syst.* Tetrاندريا Monogynia. The virtues of the wood of the white saunders reside in a volatile oil and resinous principle. The odour is fragrant, and resembles a mixture of ambergris and roses. It has been used as a stimulant and sudorific, but it is not now employed. The saunders woods are called, collectively, in French, *Santaux*.

SANTALUM MYRTIFOLIUM, S. album — s. Rubrum, Pterocarpus santalinus.

SANTÉ, Sanitas.

SANTONICUM, Artemisia santonicum.

SANTONINE, *San'tonia*, *Cinina*. A peculiar crystalline substance obtained from Artemisia Santonica. It possesses the anthelmintic properties of the plant. Dose, five or six grains.

SANTORINI, FISSURES OF, (F.) *Incisures* ou *Scissures de Santorini*. Clefts at the upper and back part of the fibro-cartilaginous portion of the external ear.

SANTORINI, TUBERCLES OF. Small cartilaginous projections at the top of the arytenoid cartilages, which support the ligaments of the glottis. See Corniculum Laryngis.

SANYE, Sinapis.

SAP, Sax. *Jæpe*, (G.) *Saft*, *Arborum Succus* seu *Lympha*, (F.) *Sève*. The circulating fluid of the vegetable, which corresponds to the blood of the animal.

SAPA, see Rob.

SAPHA'DA. Paracelsus has given this name to reddish scales adherent to the hair in some eruptions of the hairy scalp.

SAPHENA, Saphena.

SAPHENA, *Saphæ'na*, from *σαφης*, 'manifest,' 'evident.' (F.) *Saphène*. A name given to two subcutaneous veins of the lower limb. These are: 1. THE GREAT SAPHENA VEIN, *Saphena interna*, *Tibio-malleolar*, (Ch.,) (F.) *Grande Veine Saphène* ou *Saphène interne*. Its radicles occupy the inner part of the great toe, and form a transverse arch on the back of the foot, which unites with the saphena externa, and receives at its convex part, which is turned forwards, a number of branches coming from the toes. These radicles, when united, ascend before the inner ankle, and form a trunk, the size of which is farther increased by several branches that proceed from the region of the tarsus, and that of the metatarsus. This trunk ascends vertically at the inner part of the leg; passes behind the inner condyle of the femur; proceeds along the inner part of the thigh; receives other subcutaneous veins, such as the abdominal subcutaneous, the

external pudic, &c., and passes through the inferior opening of the crural canal to empty itself into the femoral vein. 2. THE LESSER VEIN SAPHENA or *Saphena externa*; the *Peroneo-malleolar Vein* of Chaussier, (F.) *Petite Veine Saphène* ou *Saphène externe*, commences by several roots, which are spread over the dorsum and outer side of the foot, and embrace the outer ankle. Behind this, they unite into a single trunk, which ascends obliquely, approaching the tendo Achillis, and proceeds vertically towards the ham to open into the popliteal vein.

SAPHÈNE, Saphena.

SAPHENOUS, *Saphenous*; from *Saphène*. Of or belonging to the saphena.

SAPHENOUS NERVES are two in number, and are branches of the crural or femoral nerve. They are the *short saphenous* — *nervus cutaneus internus*; and the *long saphenous*, — *nervus cutaneus internus longus*.

The *external saphenous*, formed by the union of the communicans poplitei and communicans peronei, passes down the leg by the side of the external saphenous vein of the foot.

SAPID, *Sa'porous*, *Sap'idus*, (F.) *Savoureux*. Possessed of sapidity. Having the power of affecting the organs of taste.

SAPIDITY, *Sap'idness*, *Saporosity*, *Sapor*, (F.) *Sapidité*, from *sapere*, 'to taste.' The quality of bodies that gives them taste.

SAPIN COMMUN, Pinus picea.

SAPINDUS, *S. Saponaria*, *Sapona'ria*, *Soap Tree*, (F.) *Savonnier commun*. The name of the plant that affords the *Soap Nuts*, *Sapona'ria Nutula*, *Bac'ca Bermuden'ses*, *Soap-berries*. A spherical fruit about the size of a cherry, the cortical part of which is yellow, glossy, and so transparent as to show the spherical black nut that rattles within, and includes a white kernel. The cortical part of this fruit, which has similar effects with soap in washing, has been recommended in chlorosis, and as a stomachic and deobstruent.

SAPO, *Soap*, Sax. *Jæpe*, *Smegma*, (F.) *Savon*. A product obtained by treating fatty bodies with caustic alkalies dissolved in water. In the Pharmacopœia of the United States, it means Soap made with soda and olive oil.

YELLOW SOAP is formed of turpentine, oil, and alkali.

Castile Soap, being made of fine olive oil, is generally used internally. The yellow and soft soaps are the most stimulating; and are, consequently, best adapted for particular cutaneous eruptions.

Internally, soap is purgative and diuretic; externally, it is detergent and stimulant. Soapy water is used with the greatest success, in cases of poisoning by acids. It is mostly applied externally to bruises and sprains. In Pharmacy, it is used to favour the solution of resins.

SAPO AC'IDUS, *Acid Soap*, is a combination of a fixed oil with an acid.

SAPO AMMONIACALIS, *Linimentum ammoniæ fortius* — s. *Ammoniæ oleaceus*, *Linimentum ammoniæ fortius* — s. *Amygdalinus*, *Sapo medicinalis* — s. *Cacaotinus*, *Sapo cocconus* — s. *Calcarius*, *Linimentum aquæ calcis* — s. *Castillensis*, see *Sap Medicinalis*.

SAPO COCO'NEUS, *Soap of Cocoa-Nut Oil*, *S. cacaoti'nus*, (F.) *Savon de cacao*, has been much used in Germany in herpetic affections.

SAPO DURUS, S. Hispanicus — s. Hispanicus, see S. medicinalis.

SAPO KALICUS, S. Mollis.

SAPO LIQ'UIDUS, *Liquid Soap*, *Lotio saponacea*, is a cosmetic which is composed of olive oil

ziv, ol. tartari per deliquium Zss . Rub together, and add *aqua rosarum* Zxij .

SAPo MEDICINALIS, *Medicinal Soap*, *Sapo amygdalivus*, (F.) *Savon médicinal*, is made with oil of sweet almonds and half its weight of caustic alkali, or, like the *Sapo Hispanicus* seu *Castilien'sis*, Spanish or Castile soap, *Sapo durus*, (F.) *Savon dur*, of olive oil and soda.

SAPo MOLLIS, Common or Soft Soap, *S. viridis*, *S. niger*, *S. kalicus*, (F.) *Savon mou*, *Savon noir*, is made of potass and oil or tallow. The *Sapo vulgaris*, or 'common soap' of the Pharm. U. S. is made with soda and animal oil.

SAPo NIGER, *Black Soap*, *Melanoemagma*, is a composition of train oil and an alkali: and **GREEN SOAP**, *Sapo viridis*, of hempseed, linseed, or rape oil, with an alkali. See *Sapo mollis*.

SAPo VEGETABILIS, *Pulvis gummosus alkalinus* — *s. Viridis*, *Sapo mollis* — *s. Vulgaris*, see *Sapo mollis*.

SAPONACEOUS; *Sapona'ceus*; from *Sapo*, 'soap.' Soapy. Containing soap, as *Lisimentum saponaceum*, Soap liniment.

SAPONAIRE, *Saponaria*.

SAPONARIA, from *Sapo*, 'soap.' *Soap-wort*, *Bruise-wort*, *Struthium*, *Lana'ria*, *Lychnis sylvestris*, *Ibica'uma*, *Bootia vulgaris* *Lychnis officinalis*, (F.) *Saponaire*. Family, Caryophyllæ. *Sex. Syst.* Decandria Digynia. A decoction of the leaves of this plant has been recommended in scrofula, cancer, old syphilis, cutaneous eruptions, jaundice, visceral obstructions, &c. It is hardly ever used.

SAPONARIA, *Sapindus saponaria*.

SAPONARLÆ NUCULÆ, see *Sapindus saponaria*.

SAPONEA, from *Sapo*, 'soap.' A pectoral medicine, prepared with sweetened syrup of violets, and oil of sweet almonds.

SAPONULES, *Sapon'ula*, (F.) *Savonules*. Same etymon. Combinations of volatile or essential oils with different bases.

ACID SAPONULES are combinations of such oils with different acids.

SAPOR, Sapidity, Savour.

SAPOROSITY, Sapidity.

SAPOROUS, Sapid.

SAPOTA, *Achras Sapota* seu *australis* seu *Zapota*, *Sapota alchras*, *El nispero*, *Oval-fruited Sapota*, (F.) *Sapotier*, *Sapotillier*, *Sapotilla*. *Fam.* Sapotæ. *Sex. Syst.* Hexandria Digynia. A tree which grows in the Antilles, and particularly at St. Domingo. Its fruit is much esteemed. It resembles the marmalade of quinces; and hence has been called *natural marmalade*. The seeds make an emulsion, which has been given in nephritic affections. The bark has been recommended as a febrifuge.

SAPOTA ALCHRAS, *Sapota*.

SAPOTIER, *Sapota*.

SAPOTILLA, *Sapota*.

SAPOTILLIER, *Sapota*.

SAPROPYRA, Typhus gravior.

SAPROS, Putrid, Rancid.

SAPROS'TOMUS, from *sarpes*, 'foul, of a bad odour,' and *stoma*, 'mouth.' One who has an offensive breath.

SAPROTES, Putrefaction.

SARAPUS, *Sarapous*. One who has a large foot; whose toes are largely separated, or whose feet are much asunder in walking; from *sarpes*, 'I grin,' and *pous*, 'the foot.' See *Kyllosis*.

SARATOGA, MINERAL WATERS OF. The Saratoga springs in New York are ten miles north-east from Ballston. They contain the same ingredients as those of the latter place; and are much frequented by visitors from every

part of the United States. The following analysis has been given of the *Congress spring*. In a wine gallon — *gaseous contents*: carbonic acid, 511 cubic inches; atmospheric air, 7. *Solid contents*. Chloride of sodium, gr. 385; iodide of sodium, gr. 3.5; bicarbonate of soda, gr. 8.982; bicarbonate of magnesia, 95.788; carbonate of lime, 98.098; carbonate of iron, 5.075; silica, 1.5; bromide of potassium, a trace. Total gr. 597.943. — Steel.

The *Walton* or *Iodine spring* contains chloride of sodium, carbonate of magnesia, and iodide of sodium.

SARCEPIPOCELE, *Sarcoëpiplocele*.

SARCEPIPLOMPHALOCELE, *Sarcoëpiplomphalocèle*.

SARCEPIPLOMPHALUS, *Sarcoëpiplomphalus*.

SARCIDIUM, Caruncle.

SARCINA, Fœtus.

SARCINA VENTRICULI, *Sarcina*, 'a pack, a woolpack.' A microscopic cryptogamous plant found in the fluid of waterbrash.

SARCION, Caruncle.

SARCITES, *Anasarca* — *s. Flatuosus*, *Emphysema*.

SARCITIS, Myositis.

SARCOCELE, *Hernia carno'ea*, *Scirrhus Testiculi*, from *sarç*, 'flesh,' and *κηλη*, 'a tumour.' *Sarco'ma serotii*, (F.) *Hernie charnue*. Scirrhus or cancer of the testicle. This disease affects adults particularly; and appears most commonly after an inflammatory swelling of the testicle. Sometimes it is dependent upon a blow; at others, it makes its appearance without any appreciable cause. It is well known by a hard, heavy, ovoid or spherical swelling of the testicle, which is, at first, slightly, or not at all painful, and merely causes an unpleasant traction on the spermatic cord. There is no heat or change of colour of the skin; the spermatic cord is swollen, and participates in the affection; very painful shootings occur; the lymphatic glands of the abdomen become swollen, and form a tumour, which may, at times, be felt through the abdomen; and the patient, at length, dies with every sign of the cancerous diathesis. The prognosis is very unfavourable. The only means, indeed, that can save life is the extirpation of the testicle.

SARCOCOLLA, (F.) *Colle-chair*, from *sarç*, 'flesh,' and *κόλλα*, 'glue.' A resinous matter, obtained from *Penæa Sarcocolla*, *P. mucronata*, and other species of *Penæa*. An African shrub, which has been so called from a belief that it facilitates the consolidation of flesh. It is in the form of small, oblong, semitransparent globules, of a yellowish or reddish blue, and smells like aniseed. It was once employed as an astringent and detergent.

SARCODES, Carneous.

SARCOËPIPOCELE, *Sarcoëpiploce'le*, from *sarç*, 'flesh,' *επιπλοον*, 'the epiploon,' and *κελη*, 'a tumour.' Epiplocele, complicated with sarcoma or sarcocele.

SARCOËPIPLOMPHALUS, *Sarcoëpiplomp'halus*, *Sarcoëpiplomp'haloc'le*, from *sarç*, 'flesh,' *επιπλοον*, 'the epiploon,' and *ομφαλος*, 'the navel.' Umbilical hernia, formed by scirrhous epiploon or complicated with sarcoma.

SARCOHYDROCELE, *Hydro-sarcocele*.

SARCOLEMMA, *Sarcolem'ma*, from *sarç*, 'flesh,' and *λεμμα*, 'a coat.' The sheath which surrounds the fibrils of muscle that form a fibre. It is quite distinct from the areolar membrane that binds the fibres into fasciculi. — *Bowman*. See *Perymysium*.

SARCOLOGIA, Myology.

SARCOLOGY, *Sarcolog'ia*, from *sarx*, 'flesh,' and *logos*, 'a discourse.' The part of anatomy which treats of the soft parts. It comprises myology, angiology, neurology, and splanchnology.

SARCOMA, *Emphy'ma Sarcoma*, *Sarcoma'tous tumour*, *Sarco'sis*, *Porrus*, *Sarcophy'ia*, *Escarco'ma*, *Exsarco'ma*, *Tumor car'neus*, *Exrescen'tia carno'sa*, *Pol'ypus carno'sus*, from *sarx*, 'flesh.' Any species of excrescence having a fleshy consistence.

SARCOMA, **CARCINOMATOUS**, *Scirrhus*—s. *Cercosis*, see *Cercosis*—s. *Epulis*, *Epulis*—s. *Mastoid*, *Mammary sarcoma*—s. *Medullare*, see *Encephaloid*—s. *Medullary Encephaloid*, *Hæmatodes fungus*—s. *Pulpy*, *Hæmatodes fungus*—s. *Scroti*, *Sarcocœle*.

SARCOMA, **COMMON VASCULAR OR ORGANIZED** of Abernethy, *Emphy'ma Sarcoma Vasculo'sum*, is vascular throughout: texture simple: when bulky, napped on the surface with arborescent veins. Found over the body and limbs generally.

SARCOMATEUX, *Sarcomatous*.

SARCOMATODES, *Sarcomatous*.

SARCOMATOSUS, *Sarcomatous*.

SARCOMATOUS, *Sarcomato'eus*, *Sarcomato'des*, (F.) *Sarcomateuz*. Belonging to, or having the characters of sarcoma.

SARCOMPHALUM, *Sarcophthalmus*.

SARCOM'PHALUS, *Sarcophthalmus*, from *sarx*, 'flesh,' and *ὠφθαλμος*, 'the navel.' A scirrhous or fleshy tumour, developed at the navel.

SARCOMYCES, *Sarcospongius*.

SARCOPHAGUS, *Carnivorous*, *Catheretic*.

SARCOPHYIA, *Excrescence*, *Sarcoma*.

SARCOPTES, *Acarus*.

SARCOPTES SCABIEI, see *Psora*.

SARCOPTO'DES, from *sarx*, 'flesh,' *ὄψων*, 'pus,' and *εἶδος*, 'resemblance.' Having the appearance of pus mixed with flesh. An epithet given to certain excreted matters, and particularly to the sputa of those labouring under consumption.

SARCO'SIS, from *sarx*, 'flesh.' The formation of flesh. Also, *sarcoma*.

SARCO'SIS BULBI, *Exophthal'mia fungo'sa seu sarcomat'ica*. A fleshy growth from the lobe of the eye.

SARCOSIS UTERI, *Metrauxis*.

SARCOSPONG'US, *Sarcomy'ces*, from *sarx*, 'flesh,' and *σπγγος*, 'fungus.' A fleshy fungus.

SARCOSTOSIS, *Osteo-sarcoma*.

SARCOTIC, *Incarnans*.

SARCOUS, from *sarx*, 'flesh.' Of, or belonging to, flesh or muscle—as '*sarcous tissue*.'

SARCOUS ELEMENTS, *Prim'itiue particles*. The elementary particles, which, by their union, form the mass of muscular fibre.—Bowman.

SARDIASIS, *Canine laugh*, *Risus sardonicus*. **SARDONIASIS**, *Canine laugh*, *Risus sardonicus*.

SARE, *Essera*.

SARRASIN, *Polygonum fagopyrum*.

SARRÈTE, *Trismus infantum*.

SARRIETTE, *Satureia hortensis*—s. *de Crète*, *Satureia capitata*.

SARSA, *Smilax sarsaparilla*.

SARSAPARILLA, *Smilax S.*—s. *False*, *Aralia nudicaulis*.

SARSAPARILLA GERMANICA, *Gramen major*, *G. rubrum*, *Salsaparilla Germanica*, *Carex Arenaria*, (F.) *Laiche*, *L. des Sables*, *Salsepareille d'Allemagne*. Family, *Cyperoides*. Sex. Syst. *Monœcia Triandria*. A plant, which grows plentifully on the sea-coasts of Europe. It has been recommended in some mucous affections of the trachea, in rheumatism, gout, &c.

SARSAPARILLA INDIAN, *Hemidesmus Indicus*. **SARTAPARILLA**, *Smilax sarsaparilla*.

SARTO'RIVUS, from *sartor*, 'a tailor,' because used in crossing the legs. *Suto'rius*, *Longis'simus Fem'oris*, *Fascia'tis*, *F. Longus seu suto'rius*, (F.) *Ilio-crenti-tibial*, *Ilio-prétibial* (Ch.), *Conturrier*. A muscle, situate at the anterior part of the thigh. It is long, small, and flattened, and extends, obliquely, from the anterior and superior spine of the ilium to the superior and inner part of the tibia. This muscle can, also, bend the pelvis on the thigh, and conversely.

SARX, *Flesh*, *Pulp*.

SARZA, *Smilax sarsaparilla*.

SASSAFRAS, *Laurus sassafras*—s. *Medulle*, see *Laurus sassafras*—s. *Radix*, *Radix cortex*, see *Laurus sassafras*—s. *Swamp*, *Magnolia glauca*.

SAT'ELLITE, *Satelles*. That which guards. That which is placed near.

SATELLITE VEINS are those that accompany arteries.

SATHE, *Penis*.

SATIES, *Satiety*.

SATIETAS, *Plemonsie*.

SATIETY, *Sati'etas*, *Satu'ritas*, *Sat'ies*, *Satura'tio*, *Plethoe*, *Plemonsie*, from *satiare* (itself from *satis*, 'enough'), 'to give enough.' Disgust for food; commonly produced by repletion.

SATIN, *Lunaria rediviva*.

SATURANS, *Absorbent* (medicine).

SATURATIO, *Satiety*, *Saturation*.

SATURA'TION, *Satura'tio*, from *satis*, 'enough.' The state of a compound in which its elements are combined in such proportions that a fresh quantity of either cannot be added without producing excess.

SATUREIA CAPITA'TA, *Cil'iated Sa'vory*, *Thymus*, *Thymus sylv'es'tris seu capita'tus*, *Thymus Crét'icus*, *Cun'ila*, (F.) *Sarricte de Crète*. Possesses similar properties to thyme.

SATUREIA HORTEN'SIS, *Satureia*, *S. sati'ea*, *Cun'ila sativa* *Plin'ii*, *Thymbra*, *Summer Sa'vory*, (F.) *Sarricte*. Family, *Labiatae*. Sex. Syst. *Didynamia Gymnosperma*. An aromatic plant, cultivated for culinary purposes. It has been used, as an excitant, in anorexia, anaphrodisia, &c.

SATUREIA ORIGANOIDES, *Cunila mariana*—s. *Sativa*, *S. hortensis*.

SATURITAS, *Satiety*.

SATURNI DULCEDO, *Plumbi superacetos*.

SATURNINE, *Saturni'nus*, from *saturnus*, 'lead.' Containing or caused by lead.

SATURNINE BREATH. The peculiar odour of the breath in one labouring under Saturnism.

SATURNISM'US, *Intoxicatio seu Cachexia saturni'na*, from *saturnus*, 'lead.' Poisoning by lead; lead-poisoning; saturnine cachexy.

SATURNUS, *Plumbum*.

SATYRIASIS, from *Σατυρος*, 'a Satyr;' because the Satyrs are said to have been greatly addicted to venery. *Satyriasis mus*, *Satyri's mus*, *Priapi's mus*, *Salac'itas*, *Brachu'na*, *Ara'con*, *Satyri'asis furens*, *Lagne'sis Salac'itas*, *Lagne'sis furor masculi'nis*, *Lagne'n*, *Lagni'a*, *Lagne'sis*, *Lasciv'ia*, *Lasciv'itas*, *Tenti'go ver'tri*. An irresistible desire, in man, to have frequent connexion with females, accompanied by the power of doing so without exhaustion. The causes are commonly obscure. Sometimes, the abuse of aphrodisiacs has occasioned it. The principal symptoms are:—almost constant erection; irresistible and almost insatiable desire for venery; frequent nocturnal pollutions. Cold lotions; the cold bath; a mild diet; active exercise, &c., are the only means that can be adopted for its removal.

SATYRIASIS FURBS, *Satyriasis*.

SATYRIASMUS, Satyriasis.
SATYRION, *Orchis maculosa*.
SATYRISMUS, Satyriasis.
SATYRIUM, *Goodyera pubescens*.
SAUCE-ALONE, *Alliaria*.
SAUCE, GREEN, *Rumex scutatus*.
SAUER KRAUT (G.), 'sour cabbage,' (F.) *Chou-croûte*. A culinary preparation, made with chopped cabbage, left to attain an incipient state of acetous fermentation. It is reputed by the Germans to be salubrious, easy of digestion, and eminently antiscorbutic.
SAUGE, *Salvia* — *s. des Bois*, *Teucrium scorodium* — *s. Grande*, *Salvia sclarea* — *s. Hormis*, *Salvia horminum* — *s. de Jérusalem*, *Pulmonaria* — *s. Petite*, *Salvia* — *s. Sclarea*, *Salvia sclarea*.
SAULE, *Salix*.
SAUMURE, *Muria*.
SAUNDERS, RED, *Pterocarpus santalinus* — *s. Tree*, *Pterocarpus santalinus* — *s. Yellow*, *Santalum album*.
SAURA, Lizard.
SAURURUS CER'NUUS, *Lizard's Tail*. Indigenous; Order, *Saururaceae*; flowering in June. It has been used in lumbago.
SAUSAGE POISON, Allantotoxium.
SAUT, Leap.
SAUVE-VIE, *Asplenium ruta muraria*.
SAVEUR, Savour.
SAVINE, *Juniperus sabinia*.
SAVINIER, *Juniperus sabinia*.
SAVON, Sapo — *s. Ammoniacal*, *Linimentum ammonis fortius* — *s. Cacao*, *Sapo ococonus* — *s. Calcaire*, *Linimentum aquæ calcis* — *s. Dur*, *Sapo durus* — *s. Médicinal*, *Sapo medicinalis* — *s. Mou*, *Sapo mollis* — *s. Noir*, *Sapo mollis*.
SAVONNIER COMMUN, *Sapindus saponaria*.
SAVONULE, *Saponulus*.
SAVONULUS, *Saponulus*.
SAVORY, CILIATED, *Satureia capitata* — *s. Summer*, *Satureia hortensis*.
SA'VOUR, *Sapor*, *Taste*, (F.) *Saveur*. Quality of bodies, by which they act upon the sense of taste. Chymists, at times, avail themselves of this quality to analyze an unknown substance.
SAVOUREUX, Savoury.
SA'VOURY, *Sap'idus*, (F.) *Savoureux*. An epithet given to bodies that have taste; and particularly to those that excite a very agreeable impression on the organ of taste.
SAVOYAN, *Galium verum*.
SAW, *Prion*, *Serra*, (Da.) *Sawe*, (Sax.) *raða*, (F.) *Soie*. A surgical instrument, made like a common saw; and used for sawing the bones in amputations, or for removing exostoses, &c. Saws of different sizes and shapes are used in surgery. The crown of the trepan is nothing more than a species of circular saw.
SAW, AMPUTATION, *Serra amputato'ria*. The saw used in amputation.
SAW, HEY'S. An instrument used by Mr. Hey, of Leeds, in fractures of the cranium. It consists of a long handle, to which a small saw with a convex or straight edge is attached, and by which a piece of bone of any shape may be removed. With the trephine, the saw must always be circular.
SAW PALMETTO, *Chamærops serratula* — *s. Wort*, *Liatris*.
SAXIFRAGA, *Pimpinella saxifraga* — *s. Angelica*, *Peucedanum silaus*.
SAXIFRAGA CRASSIFOLIA. Family, *Saxifragaceæ*. Ser. Syst. *Decandria Digynia*. The root of this species of saxifrage has been extolled by Pallas, as pre-eminently antiseptic.
SAXIFRAGA GRANULATA, *S. alba*, *Sanic'ula*,

Sedum, *White saxifrage*, (F.) *Saxifraga granulata*. Recommended as diuretic and lithontriptic; but not used.

SAXIFRAGA RUBRA, *Spiræa filipendula* — *s. Vulgaris*, *Peucedanum silaus*.

SAXIFRAGE, BURNET, *Pimpinella saxifraga* — *s. Granulée*, *Saxifraga granulata* — *s. Meadow*, *Peucedanum silaus* — *s. White*, *Saxifraga granulata*.

SAXIFRAGUS, Lithontriptic.

SAXONICUS PULVIS. A powder, prepared with the roots of the wild and cultivated angelica; the *asclepias vincetoxicum*, &c. It was considered formerly as an antidote.

SCAB, from *Scab'ies*, and *scabere*, 'to dig.' An incrustation, which forms upon a sore, owing to the concretion of the fluid discharged from it. An eschar.

SCABBY or **SCABBED**. Covered or diseased with scabs.

SCABIES, *Psora* — *s. Agria*, *Lichen* — *s. Capitis*, *Porriigo lupinosa*, *Porriigo scutulata* — *s. Capitis favosa*, *Porriigo favosa* — *s. Fera*, *Ecthyma*.

SCABIES FERINA, *Itch of animals*, *Mange*. A cutaneous disease, which affects almost all domestic animals, but especially the horse, sheep, dog, and cow. It is said to have been transmitted to man; but this is questionable.

SCABIES FERINA, *Psoriasis* — *s. Papuliformis*, *Prurigo* — *s. Sicca*, *Lichen*, *Psoriasis* — *s. Venerea contagiosa*, *Scherlievo*.

SCABIEUSE ORDINAIRE, *Scabiosa*.

SCABIOLA, *Scabies*.

SCABIOSA, *S. arven'sis*, *Tri'chera arcen'sis*, *Field Scabious*, (F.) *Scabiense ordinaire*. Family, *Dipsacaceæ*. Ser. Syst. *Tetrandria Monogynia*. The plant is bitter and sub-astringent, and was formerly used in the cure of leprosa affections and diseased lungs.

SCABIOSA ARVEN'SIS, *Scabiosa* — *s. Carduifolia*, *Echinops*.

SCABIOSA SUCCISA, *Succiea*, *S. pratens'is*, *Anteroceph'alus succian*, *Morsus Diab'oli*, *Devil's bit*, (F.) *Mors du Diable*, has similar properties.

SCABIOUS, *Erigeron Philadelphicum* — *s. Field*, *Scabiosa* — *s. Sweet*, *Erigeron heterophyllum*.

SCABISH, *Oenothera biennis*.

SCABRITIES, *Lichen*.

SCALA, 'a ladder.' A machine formerly used for reducing dislocations of the humerus.

SCALE OF THE COCH'LEA, *Gyri seu Ductus epira'les seu Cana'les cochleæ*, (F.) *Rampes ou Échelles du Limaçon* — are the cavities in the cochlea, separated from each other by the spiral septum. The one — *Scala inter'na seu poste'rior seu inferior coch'leæ*, *S. tym'pani* — would communicate with the cavity tympani by the fenestra rotunda, were it not for the membrane that closes it. The other — *Scala exter'na seu ante'rior seu superior coch'leæ*, *S. vestib'uli* — opens into the cavity of the vestibule. The scales communicate with each other by an opening at the top of the partition.

SCALE ANTERIOR COCHLEÆ, see *Scala* — *s. Clausa*, see *Scala* — *s. Externa cochleæ*, see *Scala* — *s. Inferior cochleæ*, see *Scala* — *s. Interior cochleæ*, see *Scala* — *s. Posterior cochleæ*, see *Scala* — *s. Superior cochleæ*, see *Scala* — *s. Tympani*, see *Cochlea*, and *Scala* — *s. Vestibuli*, see *Cochlea*, and *Scala*.

SCALE, *Sax. scale*, from *scyllan*, 'to divide, separate;' (G.) *Schale*, 'shell, peel;' *schälle*, 'to shell, to peel.' *Squama*, *Lepis*, (F.) *Écaille*, *Écaille*. An opaque and thickened lamina of cuticle; commonly produced by some degree of

Inflammation of the true skin, over which it is formed.

SCALE, DRY, Psoriasis.

SCALÈNE ANTÉRIEUR, *Scalenus anticus* —s. *Postérieur*, *Scalenus posticus*.

SCALENUS, 'irregular or unequal.' Geometers employ this word to designate a triangle whose three sides are unequal. Anatomists have given the name to two muscles. 1. SCALENUS ANTI'CUS, *Portion of the Costo-trachelian* (Ch.), (F.) *Scalène antérieur*, is situate at the internal and inferior parts of the neck. It is long and triangular; and is inserted, below, at the upper surface of the first rib; and, above, at the anterior tubercle of the transverse processes of the 3d, 4th, 5th, and 6th cervical vertebrae. This muscle bends the neck, and draws it to its side. It can also raise the first rib. 2. SCALENUS POS'TICUS, (F.) *Scalène postérieur*, *Portion of the Costo-trachelian* (Ch.), is situate behind the last. It is, also, long and triangular; but more bulky than the *S. anticus*. It is attached, below, to the outer surface of the first two ribs; and terminates, above, at the summit of the transverse processes of the last six vertebrae of the neck. This muscle bends the neck laterally, and can elevate the first two ribs. Some anatomists, as Albinus and Sömmerring, have described five scaleni muscles on each side, and have called them *Scalenus prior*, *S. minimus*, *S. lateralis*, *S. medius*, *S. posticus*. Riolan and Chaussier only describe one scalenus muscle on each side. Cowper and Douglas, and the generality of the English anatomists, admit three, *S. anticus*, *medius*, and *posticus*; or, *primus*, *secundus*, and *tertius*; Winslow, Boyer, and many of the French anatomists, — two, as above described.

SCALING—same etymon as Scale—in dentistry, is an operation, which consists in removing the tartar from the teeth.

SCALL, Impetigo—s. Asbestos, see Eczema of the hairy scalp—s. Dry, Psoriasis—s. Honeycomb, *Porrijo favosa*—s. Milky, *Porrijo larvalis*—s. Running, Impetigo—s. Running, Eczema—s. Washerwoman's, Psoriasis diffusa.

SCALED HEAD, *Porrijo scutulata*.

SCALP, Teut. Schelpe, 'a shell.' The integuments covering the head. The hairy scalp is called, also, *Capillit'ium*, *Tricho'ton*, (F.) *Chevelure*.

SCALPEL, *Scalpel'ium*, *Scalpel'tus*, *Cutter*, *Incisor'ium*, *Smi'leon*; from *scalpo*, 'I rasp, I cut.' A cutting instrument, formed of a blade of well-tempered steel, very sharp, of variable shape and size, and fixed solidly in a handle. Its use is to divide the soft parts in operations, dissection, &c.

SCALPELLUM, Scalpel—s. *Lenticulare*, *Phacopis*.

SCALPELLUS, *Bistouri*, Scalpel.

SCALPEUM, *Bistouri*.

SCALPRUM, *Raspatorium*—s. *Chirurgicum*, *Lancet*.

SCALPRUM DENTA'RIUM, *Lima dentaria*. A tooth-file. A file used by the dentist.

SCALPRUM RASORIUM, *Raspatorium*.

SCALY, Squamous.

SCALY DISEASES or SQUAMÆ, *Lepido'ses*, form the second order in Willan and Bateman's system of cutaneous diseases.

SCAMMA, Fossa.

SCAMMONÉE D'ALEP, *Convolvulus scammonia*.

SCAMMONIUM, see *Convolvulus scammonia*—s. *Syriacum*, *Convolvulus scammonia*.

SCAMMONY, *Convolvulus scammonia*—s. of Montpellier, *Cynanchum Monspeliacum*.

SCAMNON HIPPOCRATIS, *Bathron Hippocrati'um* of Galen, (F.) *Banc d'Hippocrate*. A machine invented by Hippocrates for reducing fractures. It was a sort of bed, six feet long, on which the patient was fixed. Straps were attached above and below the fracture or luxation, and extension and counter-extension were effected by a winch. It is described in Galen, Oribasius, Scultetus, &c. See *Bathron*.

SCANDIX, S. *cerefolium*.

SCANDIX BULBOCASTANUM, *Bunium bulbocastanum*.

SCANDIX CEREOFOLIUM, *Scandix*, *Scandyx*, *Pecten Ven'eria*, *Cerefolium*, *Daucus Seprin'ius*, *Chærophyllum*, Ch. *Sativum* seu *Cerefolium*, *Anthriscus cerefolium*, *Chærefolium*, *Chervil*, (F.) *Cerfeuil*. Family, Umbelliferae. Sex. Syst. Pentandria Digynia. A culinary herb, which is slightly aromatic and grateful. It is said to be gently aperient and diuretic.

SCANDIX ODORA'TA, *Sweet Cic'ely*. Properties the same as the other. Also, *Chærophyllum odoratum*.

SCANDULARIUS MUSCULUS, *Parathenar*, *Transversus pedis*.

SCANDYX, *Scandix cerefolium*.

SCAPHA, *Scaphus*, 'a skiff or cock-boat,' from *σκαφω*, 'I make hollow.' The excavation or cavity of the external ear, between the helix and anthelix. The meatus auditorius externus. The rima vulvæ. Also the name of a bandage for the head, mentioned by Galen, and called, likewise, *Tholus Diocle'us*.

SCAPHIA, Nates.

SCAPHION, Cranium, Papaver (Capsule).

SCAPHIUM OCULARE, *Pelvis Ocularis*, *Eye-glass*, (F.) *Bassin oculaire*, *Gondole oculaire*, *Œillière*. A small porcelain, glass or metallic vessel, used for applying lotions to the eye.

SCAPHO-CARPO-SUPER-PHALANGÆUS POLLICIS, *Abductor pollicis brevis*.

SCAPHOID, *Scaphoi'des*, from *σκαφη*, 'a skiff,' and *ιδος*, 'form.' A name given to several parts.

SCAPHOID FOSSA, *Fossa Scaphoi'des*, (F.) *Enfoncement Scaphoïde*. A small cavity at the upper part of the internal ala of the pterygoid process, in which the peristaphylinus internus is attached.

SCAPHOID BONE OF THE HAND, *Os Scaphoïdes Manûs*, *Os navicular'e*, *Os cymbifor'me*, *Boat-like bone*, (F.) *Scaphoïde de la main*. The first bone of the first row of the carpus. The upper surface is convex, and articulated with the radius. The under and outer surfaces are also convex,—to be articulated with the trapezium and trapezoides. Between the upper and under cartilaginous surfaces there is a rough fossa for the insertion of the capsular ligament. The anterior and inner surface has an oval cavity, where it is articulated with the os magnum, which gives name to the bone. There is a process on the outer end of the bone, for the attachment of part of the anterior transverse ligament of the wrist.

SCAPHOID BONE OF THE FOOT, *Os Scaphoïdes Pedis*, *Os navicular'e*, *Os cymbifor'me*, *Boat-like bone*, (F.) *Scaphoïde du Pied*. This bone is situate at the forepart of the astragalus and inner part of the foot. The posterior surface forms a cavity, somewhat like that of a boat, for receiving the head of the astragalus. There is a prominence at the inner side of the bone, for the insertion of tendons, muscles, and strong ligaments. The forepart of the bone is convex, and divided into three articular surfaces for articulation with the ossa cuneiformia. Between the os naviculare and astragalus, the foot has its principal lateral and rotary motions; although each of the other

joints of the tarsus contributes a little. Part of the tibialis posticus is inserted into it.

SCAPHOÏDE DE LA MAIN, Os scaphoides manus—*s. du Pied*. Os scaphoides pedis.

SCAPHOÏDO-ASTRAG'ALAN, *Scaphoïdo-astragala'nus*. That which relates to the scaphoid bone and astragalus. The articulation of these bones is so called; and the ligament which strengthens it is termed the *Scaphoïdo-astragalan ligament*.

SCAPHOÏDO-CUBOID, *Scaphoïdo-cuboida'us*. That which relates to the scaphoid and cuboid bones. The articulation of those bones is so called.

SCAPHULA, Navicularis fossa.

SCAPHUS, Auditory canal, external, Rima valvæ, Scapha.

SCAP'ULA, *Scap'ulum*, *Plata*, *Omopla'ta*, *Homopla'ta*, *Scop'tula*, *Epino'tion*, *Latitu'do hu'meri*, *Omoplatê*, *Os latum hu'meri*, *Scutum thora'cis seu cordis*, *Spath'ula*, *Pteryg'ium*, *Chelo'nium*, *Spat'ula*; the *Blade-bone*, the *Shoulder-blade*, (*F.*) *Omoplate*. An irregular, broad, flat bone, of a triangular shape, situate at the posterior part of the shoulder. It has, 1. A *posterior or dorsal surface* or *Dorsum*, *Testu'do scap'ulae*, divided transversely into two parts, by a triangular process, called *Spine of the Scapula*; which terminates by a considerable eminence, called *Aeromion*. Above the spine, is the *Fossa supra-spinata*; below it, the *F. infra-spinata*. 2. An *anterior or costal surface*, or *venter*, forming the *Fossa subscapularis*. 3. A *superior or cervical edge*, which is thin, and terminates, anteriorly, by a strong, curved apophysis, called the *coracoid process*. 4. A *posterior or vertebral edge*, called, also, the *base*. 5. An *outer or axillary or inferior edge*, having a thick, truncated angle, in which is the *glenoid cavity*. With this is articulated the head of the humerus. The glenoid cavity is separated from the body of the bone by a narrower part, called the *cervix* or *neck*. The edges or margins are, also, called *costæ*. The scapula has three angles—an *inferior*, *superior*, and *anterior*.

SCAPULA, Humerus.

SCAPULÆ NASI, *Partes latera'les nasi*. The lateral parts of the nose.

SCAPULAL'GIA; from *scapula*, 'the shoulder-blade,' and *algos*, 'pain.' Arthralgia of the shoulder-joint.

SCAPULAR, *Scap'ulary*, *Scapula'ris*, from *scapula*, 'the shoulder-blade.' That which relates or belongs to the scapula.

SCAPULAR APONEURO'SIS. A broad, thin aponeurosis, with decussating fibres; which is attached, above, to the spine of the scapula; below, to a crest between the teres major and infra-spinatus; within, to the spinal edge of the scapula; and which, at its middle, unites with the thin aponeurosis that covers a part of the external surface of the deltoid.

SCAPULAR ARTERIES. These are several.

a. The *Superior scapular*, *Superficial scapular* of Sömmering, *Dorsalis scapulae superior*, *Transversalis scapulae*, *T. Hu'meri*. This arises from the subclavian; and often from the inferior thyroid, or from a trunk common to it and the *posterior scapular* or *transverse scapular* or *cervical*. It passes behind the clavicle, above the superior edge of the scapula, and buries itself between the dorsal surface of that bone and the muscles inserted into it. b. The *inferior scapular* or *common scapular* or *internal scapular* or *subscapular artery*. A *Thorac'ica axilla'ris* vel *ala'ris*, is of considerable size. It arises from the inferior part of the axillary artery, behind the brachial plexus—gives off several branches to the armpit, and

divides into two branches:—the one, *Scapula'ris interna*, and the smaller of the two, is distributed, almost entirely, to the serratus major anticus, and latissimus dorsi; the other, the larger of the two, the *Dorsalis Scapulae inferior* vel *Circumflexa Scapula'ris*, which distributes its branches to the subscapular and supra-spinal, and infra-spinal regions.

SCAPULAR NOTCH, see Notch, scapular.

SCAPULAR VEINS follow the same course as the arteries, which they accompany.

SCAPULARE, Scapulary.

SCAP'ULARY, *Scapula're*, *Fascia Scapula'ris*, from *scapula*. A broad, linen bandage, divided into two tails for three quarters of its length, the undivided extremity of which is attached to the posterior and middle part of a bandage carried round the body; the tails passing over the shoulders; and being attached to the anterior part of the body bandage, to prevent it from slipping down.

SCAPULO-HUM'ERAL. An epithet given to the *shoulder-joint*. It is an orbicular articulation, resulting from the reception of the head of the humerus into the glenoid cavity of the scapula. To keep the bones in connexion, there are: 1. A very strong, conoidal capsular ligament; passing from the circumference of the glenoid cavity around the neck of the humerus. 2. A *fibro-cartilaginous ring*, called the glenoid ligament, and a synovial capsule.

SCAPULO-HUM'ERAL, Teres major—*s. Hæméro-olécranien*, Triceps extensor cubiti—*s. Hyoidien*, Omohyoideus—*s. Radial*, Biceps flexor cubiti—*s. Trochitrien*, *grand*, *Infra-spinatus*.

SCAPUS, Penis, see Hair.

SCAR, Cicatrix.

SCAR, Seam. To mark with a cicatrix or seam.

SCARABÆO'LUS HEMISPHERICUS, Coccus cacti.

SCAR'BOROUGH, MINERAL WATERS OF. Scarborough Spa. A celebrated English chalybeate, at Scarborough, in Yorkshire. One of the springs is a simple, carbonated chalybeate, like that of Tunbridge; the other has an admixture of purging salt. Scarborough, having the additional advantage of sea-bathing, is much frequented by invalids.

SCARDAMYG'MUS, *Scardamyx'is*, (*F.*) *Clignement*, from *skapapwocw*, 'to wink.' Winking, nictation.

SCARIFICA'TION, *Scarifica'tio* (Galen.) *Amyx'is*, *Schasis*, *Catacas'mus*, *Catachas'mus*, *Amyg'mus*, *Schaemus*, *Encharax'is*, from *skapapwocw*, 'to make a slight scratch.' The act of scarifying. Also, a small incision, *Am'yxê*, made into the skin with a lancet, bistoury, or scarificator, for different therapeutical purposes.—as to draw blood, or to discharge some effused fluid. When the scarifications are very superficial, and do not go farther than the skin, they are termed by the French, *Monchetures*.

SCARIFICA'TOR, *Scarificato'rium*, *Schaete'rium*. An instrument for making scarifications. It consists of a small brass box, of a cubical shape, in which 10 or 12 lancet points turn upon a common pivot. By means of a spring, all these blades can be made to issue at once, and make as many scarifications.

SCARIFICATORIUM, Scarificator.

SCARIOLA, Cichorium endivia, Lactuca scariola.

SCARIOLE, Cichorium endivia.

SCARLATA, Scarlatina.

SCARLATI'NA, from *scarlatta* (I.), 'a deep red.' *Scarlatina*, *Enanthë'sis Rosæ'lia*, *Rosæ'lia*, *Rosæ'lia*, *R. squamo'sa*, *Rosæ'lia*, *Rub'e'ola*, &

some, *Morbilli ignei*, *M. confluentes*, *Morbus scarlatinosus*, *Febris scarlatino'sa*, *Gut'turis morbus epidemicus Forest'i*, *Pur'pura*, *Typhus scarlatinosus*, *Febris rubra*, *Scarlet Fever*, *Rash-fever*, *Porphyria'mus*, *Porphyria'ma*, (*F.*) *Fièvre rouge*, *F. pourprée*. The characteristic symptoms of scarlatina are:—a scarlet flush, appearing about the second day of fever on the face, neck, and fauces; and progressively spreading over the body; terminating about the 7th day. Two great varieties may be reckoned;—the *S. simplex*, *S. febris*, *S. benigna*, *S. sine angina*, in which the fever is moderate and terminates with the efflorescence; prostration of strength being trifling, and the contagious property slight;—and the *S. Angino'sa*, *S. Pariethmitica*, *S. Cynanchica*, *S. mitior*, in which the fever is severe; the throat ulcerated; the eruption later in its appearance, and less extensive; often changing to a livid hue; the fever being highly contagious. *Scarlati'na maligna*, *S. gra'vior*, has been reckoned a variety of this, in its worst degree. It agrees with the *Cynanche maligna* of Cullen.

Scarlatina belongs to the *Major exanthemata*, and is a disease, chiefly, of children. The eruption differs from that of measles, in being an efflorescence not raised above the cuticle. Measles, too, is attended with catarrhal symptoms, whilst the complication, in scarlatina, is cynanche. The treatment of simple scarlatina need not be much. It must be antiphlogistic. If the throat be very much ulcerated, acid gargles and counter-irritants must be employed; and if the affection become manifestly typhoid, and the sore throat of a malignant character, the case must be treated like typhus gravior; with antiseptic gargles of bark, acid, &c. Anasarca sometimes supervenes on scarlatina, and requires attention Purgatives are here demanded as well as the use of sorbifacients, such as mercury and squill, &c.

SCARLATINA ANGINOSA, see *Scarlatina*—*s. Benigna*, see *Scarlatina*—*s. Cynanchica*, see *Scarlatina*—*s. Febris*, see *Scarlatina*—*s. Gravior*, see *Scarlatina*—*s. Milinris*, *Rubeola*—*s. Mitior*, see *Scarlatina*—*s. Pariethmitica*, see *Scarlatina*—*s. Pustulosa*, *Rubeola*—*s. Rheumatica*, *Dengue*—*s. sine Angina*, see *Scarlatina*—*s. Urticata*, *Urticaria*.

SCARLATINOUS, *Scarlati'nal*, *Scarlatino'sus*. Relating or appertaining to scarlatina.

SCARLET BERRY, *Solanum dulcamara*.

SCARLET FEVER, *Scarlatina*.

SCATACRASIA, *Scoracrasia*.

SCATACRATIA, *Scoracrasia*.

SCELAL'GIA, from *σκελος*, 'the leg,' and *αλγος*, 'pain.' Pain of the leg.

SCELALOGIA ANTICA, *Neuralgia femoro-pretibialis*—*s. Postica*, *Neuralgia femoro-poplitea*—*s. Puerperarum*, *Phlegmatia dolens*.

SCELETEU'SIS. Mummification. Also, the mode of making a skeleton, *Skeletope'a*, *Syntax'is*.

SCELETOLOGIA, *Skeletology*.

SCELETON, *Skeleton*.

SCELETOPEA, *Sceluteusis*.

SCILETUM, *Skeleton*—*s. Artificiale*, see *Skeleton*—*s. Naturale*, see *Skeleton*.

SCOLONCUS, *Phlegmatia dolens*.

SCELORRH'EUMA, *Rheumatismus cruris*, from *σκελος*, 'the leg,' and *ρευμα*, 'defluxion, rheumatism.' Rheumatism of the leg.

SCELOS, *Leg*.

SCELYTYRBE, *Chorea*, *Porphyra nautica*—*s. Febrilis*, see *Subsultus tendinum*—*s. Festinans*, *Paralysis agitans*—*s. Tarantismus*, *Chorea*.

SEFARNON, *Ammios*, *Ascia*.

SEPASTERIUM, *Couvrechef*.

SEPASTRUM, *Couvrechef*.

SCEPTRUM, *Penis*.

SCHASIS, *Scarification*.

SCHASMUS, *Scarification*.

SCHASTERION, *Fleam*, *Lancet*, *Scarificator*.

SCHEBA ARABUM, *Artemisia santonica*.

SCHERBET', *Sherbet'*, *Serbet'*, *Tscherbet'*, *Sorbe'thum*, *Sorbet'tum*, *Sorbe'tum*. A drink prepared by the Turks, Persians, &c., with sugar and the juice of acid fruits.

SCHERLIEVO, *Mal di Scherlievo*, *Mal di Breno*, *Mal di Fiume*, *Margaretiana*, *Morbus Croatus*, *Framboesia Illyrica*, *M. fluminensis*, *Falcadina*, *Mal di Scarlievo*, *Scabies venerea contagiosa*. A name given to a particular form of syphilis, observed in Illyria. It is said to be capable of being communicated without immediate contact; and that its principal symptoms are:—pains in the bones, ulceration of the fauces, pustules, and fungous growths in different parts of the body.

SCHERO'MA. A dryness of the eye from the want of lachrymal secretion.—*Dictionaries*.

SCHIAS, *Neuralgia femoro-poplitea*.

SCHIDAKE'DON, *Schidacodum*, *Schidacodum*, *Schindal'amus*, *Schindal'mus*, from *σχίζω*, 'I cleave.' A longitudinal fracture of a bone.—*Galen*.

SCHINDACEDUM, *Schidakedon*.

SCHINDALAMUS, *Schidakedon*, *Schindylesis*.

SCHINDALESIS, *Schindylesis*.

SCHINDALMUS, *Schidakedon*, *Schindylesis*.

SCHINDYLE'SIS, *Schindale'sis*, *Schindal'amus*, *Schindal'mus*. An articulation of bones—by furrowing, as it were; as in that of the vomer, which constitutes, in part, the septum narium. Also, the act of splitting into small pieces; from *σχινδύλω*, 'I split into small pieces.—*Hippocrates*.

SCHINELE'ON, from *επιονος*, 'the mastig tree,' and *ελαιον*, 'oil;' *Oleum lentiscinum*. Oil of mastic.—*Dioscorides*.

SCHINOCEPHALUS, *Scillocephalus*.

SCHINOS, *Scilla*.

SCHINZNACH or HAPSBURG, MINERAL WATERS OF. These springs are situate three leagues from Baden, and are amongst the most celebrated bathing-places in Switzerland. The waters are of the saline sulphurous kind; and have a high reputation in cutaneous and rheumatic affections, visceral obstructions, and glandular enlargements. They contain sulphate of lime, sulphate of soda, chloride of sodium, chloride of magnesium, sulphate of magnesia, sulphate of lime, carbonate of magnesia, and oxide of iron; sulphohydric acid, and carbonic acid gases.

SCHISMA, *Fissure*, *Rima*.

SCHISTOCEPH'ALUS, from *σχιστος*, 'cleft, separated,' and *κεφαλη*, 'head.' A monster having some part of the head cleft or fissured.—*Gurli*.

SCHISTOCOR'MUS, from *σχιστος*, 'cleft, separated,' and *κορμος*, 'trunk.' A monster having some part of the trunk cleft or fissured.—*Gurli*.

SCHISTOM'ELUS, from *σχιστος*, 'cleft, separated,' and *μελος*, 'a limb.' A monster whose limbs are fissured.

SCHISTORRHACHIS, *Hydrorachis*.

SCHISTOSO'MUS, from *σχιστος*, 'cleft,' and *σωμα*, 'body.' A malformation of the abdomen, in which the fissure and eversion extend over the entire length of the abdomen; the lower extremities being absent, or very little developed, so that the body appears as if truncated inferiorly.—*Vogel*.

SCHIZA, *Rima*, *Rima vulvæ*.

SCHIZATRICH'IA, *Trichos'chisis*, *Schimo-*

trich'ia, from *οχιζα*, 'a cleft,' 'a split,' and *θριξ*, 'a hair.' The splitting of the hairs at their extremities. — J. P. Frank.

SCHLANGENBAD, MINERAL WATERS OF. Schlangenbad is a much-frequented watering-place in Germany. The waters contain a little carbonic acid, and carbonate of soda. Temperature 86° Fahrenheit.

SCHNEIDERIAN MEMBRANE, Pituitary membrane.

SCHÖENANTHUS, Juncus odoratus.

SCHOLA, School.

SCHOLLERA OXYCOCCOS, Vaccinium oxycoccos.

SCHOOL, Schola. A place of education. (F.) *École.* In Europe the large Medical Schools are usually attached to the universities. In England, however, there has been no medical school of celebrity at either of the universities of Oxford or Cambridge; owing greatly to their provincial situation. Of late, two schools have existed in London, attached to the London University — University College and King's College. Excellent private schools have, however, long existed in that metropolis. The medical schools of Europe which have been most celebrated, are those of Edinburgh, Leyden, Berlin, Halle, Tubingen, Paris, Montpellier, Bologna, Padua, Pavia, and Pisa. In the United States, the medical schools are numerous; at this time not fewer than 30 or 40. Those most numerously attended, are the medical department of the University of Pennsylvania, Jefferson Medical College of Philadelphia, the University of the City of New York, and the Louisville Medical Institute.

SCHOOLEY'S MOUNTAIN, MINERAL WATERS OF. The waters of this New Jersey Spring are chalybeate. According to Dr. McNevin, they contain extractive, chloride of sodium, chloride of calcium, chloride of magnesium, carbonate of lime, sulphate of lime, carbonate of magnesia, silice, and carbonate, and oxide of iron.

SCHORBUTUS, Purpura.

SCHOUSBÆA COCCINEA, Coconcia cocconea.

SCHWALBACH, MINERAL WATERS OF. Schwalbach is a town of Germany, seated on the Aa, 32 miles west of Frankfurt. The waters contain chloride of sodium, carbonates of lime and magnesia, iron, sulphate of lime, carbonic acid, oxygen, &c. Employed as a tonic.

SCHWANN, WHITE SUBSTANCE OF, see Substance, white, of Schwann.

SCHWENDECK, MINERAL WATERS OF. These waters are about 5 leagues from Munich, in Bavaria. They contain carbonic acid; carbonate and sulphate of lime, chloride of calcium; chloride of magnesium; carbonate of soda, and oxide of iron, and are much used for cutaneous affections.

SCIATIC, Ischiatic, Ischiaticus, Sciaticus, from *οχιον*, 'the haunch.' A word formed by contraction from *ischiatric*, which latter is still used. See Ischiatic.

SCIATIC NERVE, GREAT, Nervus ischiadicus, Great fem'oro-popliteal, (Ch.) (F.) Grand nerf sciaticque, ought to be esteemed a continuation of the sacral plexus. It issues from the pelvis between the pyramidalis and superior gemellus; descends along the posterior part of the thigh; and after having given branches to the gemini, quadratus, obturator externus, glutæus maximus, semi-membranosus, semi-tendinosus, biceps and third abductor muscles, it divides, about the inferior third of the thigh, into two branches; the one, named the *external popliteal*; the other, the *internal*.

SCIATIC NERVE, LESSER, Inferior glutæal branch of the sacral plexus, Lesser fem'oro-popliteal nerve, (Ch.) (F.) Nerf petit sciaticque, which seems especially formed by the 2d and 3d sacral, is given off from the lower part of the plexus, and escapes from the pelvis beneath the pyramidalis muscle. It gives branches — *nervi cutanei clavinum inferiores* — to the glutæus maximus; a *sciatic branch* or *infra-pelvic cutaneous* or *perineal cutaneous, Pudenda'lis longus inferior*, which passes under the tuberosity of the ischium, and furnishes filaments to the glutæus maximus, and to the muscles of the perineum, urethra, penis, scrotum, &c.; and a *posterior femoral cutaneous branch* — *middle posterior cutaneous nerve* — the filaments of which traverse the femoral aponeurosis, to be distributed on the skin of the posterior part of the thigh. The principal branch of the lesser sciatic nerve divides, near the ham, into two or three filaments, which descend under the integuments almost as far as the inferior part of the leg.

SCIATIC NOTCH, GREAT, Sciatic Foramen, Incisura ischiad'ica major, (F.) Grande échancrure sciaticque or *grand trou sciaticque*, is a large notch at the posterior edge of each os innominatum, below the posterior and inferior iliac spine, which is converted into a foramen by the sacrum and sacro-sciatic ligaments. The *lesser sciatic notch, Incisura ischiad'ica minor, Luna Albi'ni, (F.) Petite échancrure ischiaticque*, is much smaller than the last, from which it is separated by the sciatic spine. It gives passage to the tendon of the obturator internus, and to the internal pudic vessels and nerves.

SCIATIC REGION, Ischiadic region.

SCIATIC SPINE, Spine of the Ischium, Spinosa Proc'ess of the Ischium, is a short, flat, pyramidal eminence on the os innominatum, above the preceding foramen; which gives insertion to the lesser sacro-sciatic ligament.

SCIATICA, Neuralgia femoro-poplitea.

SCIATIQUE, Neuralgia femoro-poplitea.

SCIE, Saw.

SCIENTIA HERMETICA, Alchymy — *s. Mendendi, Medicina* — *s. Medica, Medicina.*

SCIEROPIA, from σκίρος, 'shady,' and οψ, 'the eye.' A defect of vision, in which all objects have a darker hue than natural.

SCILLA, Scilla maritima, Scylla, Aschil, Schinoc, Oculus Typho'nis, Ornithogalum maritimum seu squill'a, Stella'ris scilla, Squilla, Squill or sea onion, Eye of Typhon, (F.) Oignon marin. Family, Liliaceæ. Sex. Syst. Hexandria Monogynia. Native of Spain, Austria, &c. The bulb or root of the squill has a bitter, nauseous taste, and is extremely acrid; inflaming the skin when rubbed on it. Its acrimony, on which its virtues depend, is destroyed by heat, drying, and keeping. It is extracted by vinegar, spirit, and water. In large doses, squill is emetic and purgative; in small doses, diuretic and expectorant. Its active principle has been called *scillitine*. Dose, gr. j to v of the dried root, united or not with mercury.

SCILLA ESCULENTA, Phalangium esculentum, Eastern Quamaok, Wild Hyacinth; indigenous; flowering in May. An article of diet amongst the Western Indians. It is made into bread and poultices for inflamed breasts.

SCILLOCEPHALUS, Schinocephalus, from σκίλλα, 'a bulbous-rooted plant, the squill,' and κεφαλή, 'head.' One who has a large bulbiform head.

SCINCUS, σκινκος or σκινγος. A species of Saurus or Lacer'ta, common in Egypt, and much extolled by the ancients, as alexipharmic and aphrodisiac.

SCINTILLA VEN'ERIS, 'a relic of Venus.' A name given, by Paracelsus, to the impotence and loss of power in the limbs, produced by syphilis.

SCIOM'ACHY, *Skio'machia*, *Skiamachia*; from *σκια*, 'a shade,' and *μαχη*, 'a fight.' An exercise with the ancients, which consisted in a mock encounter at boxing and jumping with one's own shadow.

SCIRRHE, *Scirrhus*.

SCIRRHOPHLEPHARONCUS, see *Scleriasis*.

SCIRRHOCELE, *Orcheocele scirrhosa*.

SCIRRHOGAS'TRIA, (F.) *Squirrogastrie*; *Scirrhus ventric'uli*; from *σκίρρος*, 'hard,' and *γαστρῆ*, 'stomach.' *Scirrhus* of the stomach.

SCIR'RHOID, *Scirrho'ides*, *Scirrho'des*, from *σκίρρος*, 'scirrhous,' and *ειδος*, 'resemblance.' Resembling *scirrhus*.

SCIRRHOMA, *Scirrhus*.

SCIRRHOPHTHAL'MIA, *Scirrhophthal'mus*, from *σκίρρος*, 'scirrhous,' and *οφθαλμος*, 'the eye,' *Cancer oc'uli*. Cancer of the eye.

SCIRRHOPHTHALMIA PALPEBRARUM, see *Scleriasis*.

SCIRRHOSARCA NEONATORUM, Induration of the cellular tissue.

SCIRRHOSIS, *Scirrhus*.

SCIRRHOUS, *Scirrho'sus*; same etymon as *scirrhus*. Of or belonging to *scirrhus*.

SCIRRHOUS SARCO'MA OF AB'ERNETHY, *Emp'hy'ma sarco'ma scirrho'sum*. Hard, rigid, vascular infarction of glandular follicles; indolent, insentient, glabrous; sometimes shrinking and becoming more indurated. Found in glandulous structures.

SCIRRHUS, *Squirrhus*, *Scirrho'ma*, *Scirrho'sis*, *Cancer scirrho'sus*, *Carcino'ma simplex*, *C. fibro'sum*, *Induratio maligna*, *Schirrus*, *Sclerius*, *Carcinom'atous sarco'ma*, *Hard cancer*, *Fibrous cancer*; from *σκίρρος*, 'hard,' 'indurated;' (F.) *Squirre*, *Schirre*, *Skirre*. A disease, so called from the hardness that characterizes it. It is a state of induration, of a peculiar kind, affecting glandular structures generally, but capable of occurring in other textures. It usually precedes carcinoma, of which it may, indeed, be considered as the first stage. *Scirrhus* must not be confounded with the induration which succeeds inflammation, although the two states are often complicated, and may stand, occasionally, in the relation of cause and effect to each other. *Scirrhus* is ordinarily accompanied by violent shooting pains. It is also irregular on its surface; and when cut into has a bluish or grayish white colour. When the surgeon is satisfied of the existence of *scirrhus*, he had better remove it at once. No other treatment seems to possess much advantage.

Galen uses the term *Scirrho'sis* for a livid excrecence caused by inflammation.

SCIRRHUS ET CARCINOMA VENTRICULI, see *Gastrostenosis cardiaca* et *pylorica*—s. *Hepatitis*, *Hepatoscirrhus*—s. *Intestinorum*, *Enteropathia cancerosa*—s. *Palpebrarum*, see *Scleriasis*—s. *Testiculi*, *Sarcocele*—s. *Uteri*, *Metroscirrhus*—s. *Ventriculi*, *Gastroscirrhus*.

SCISSIPARITÉ, see *Generation*.

SCISSORS, *Forfex*, *Forpex*, *Psalis*, *Tomis*, (F.) *Ciseaux*. A well-known instrument in common use, and often employed in surgery. Scissors are composed of two cutting blades, crossing each other and moving upon an axis. They are straight or curved. Sometimes the curve is on the flat side, when they are called, in France, *Ciseaux à cuiller*; at others, on their edges. The scissors, bent so that the blades make an

obtuse angle with the handles, are also much used. They are called in France *Ciseaux coudés*. Scissors are used for dividing soft, loose, isolated parts, which it would be difficult to reach and to cut with the bistoury. They are employed, likewise, in the operation for harelip, and for removing warts, fungous excrescences, &c.

SCISSURA, Fissure—s. *Vulvæ*, see *Rima*.

SCISSURÆ, Rhagades.

SCISSURE DE GLASER, Fissure, glenoid—s. *Grand médiane du Cervelet*, *Valley*—s. *de Santorini*, *Santorini*, fissure of.

SCLAREA, *Salvia sclarea*.

SCLEREMA, Induration of the cellular tissue.

SCLÉREME, Induration of the cellular tissue.

SCLEREMIA, Induration of the cellular tissue.

SCLEREMUS, Induration of the cellular tissue.

SCLERENCEPHA'LIA, *Induratio cer'ebri*, from *σκληρος*, 'hard,' and *κεφαλον*, 'the brain.' (F.) *Endurcissement du cerveau*. Induration of the brain.

SCLERIA, *Scleriasis*.

SCLERIASIS, *Sclero'ma*, *Sclero'sis*, *Scl'eria*, *Sotery'mus*, *Seph'irus*, from *σκληρος*, 'hard.' Any kind of hardness or induration. Sometimes hardness of the eyelids, *Callo'sitas palpebra'rum*, *Scirrhoblepharon'cus*, *Scirrhophthal'mia palpebra'rum*, *Scirrhus palpebra'rum*; at others, hardness of the genital organs of the female; probably synonymous with *scirrhus*.—Galen. Paulus. Hardness of bones, *Fragil'itas Os'sium*.

SCLERITIS, *Sclerotitis*.

SCLERODERMA, Induration of the cellular tissue.

SCLERODES, *Sclerotic*.

SCLEROMA, Induration of the cellular tissue, *Scleriasis*.

SCLEROMENINX, *Dura mater*.

SCLERONYXIS, *Scleroticonyxis*.

SCLEROPHTHALMIA, *Hordeolum*.

SCLEROS, *Hard*.

SCLEROSARCO'MA, from *σκληρος*, 'hard,' and *σαρκωμα*, 'a fleshy tumour.' A hard, fleshy tumour, seated on the gums, and resembling a cock's comb.

SCLEROSIS, Induration of the cellular tissue, *Scleriasis*.

SCLEROSTENOSIS CUTANEA, Induration of the cellular tissue.

SCLEROTIC, *Sclerot'ica*, from *σκληρος*, 'I harden.' *Cornea opa'ca*, *Sclero'des*, *Tunica dura* seu *albugin'ea* seu *du'rior* et *crass'ior* seu *ex'tima* seu *alba* seu *can'dida* seu *innomina'ta oc'uli*, *Sclero'tis*, (F.) *Sclérotique*. A hard, resisting, opaque membrane, of a pearly white colour and fibrous nature, which covers nearly the posterior four-fifths of the globe of the eye, and has the form of a sphere truncated before. It is strengthened by the expansion of the muscles of the eye, to which expansion many anatomists have given the name *Tu'nica albugin'ea*. It forms the white of the eye, *Albu'men*, *Album oc'uli*, *Lon'chades*, *Log'ades*, *Loch'ades*, *Leu'cades*. The sclerotic is penetrated posteriorly by a round opening, for the passage of the optic nerve; and, anteriorly, it has a much larger opening, into which the transparent cornea is received. There are, besides, many small oblong apertures in it for the passage of nerves and vessels, proceeding to the interior of the eye. In the foetus, the sclerotic may be separated into two very distinct laminae.

SCLEROTICA CERATOIDES, *Cornea*.

SCLEROTICITIS, *Sclerotitis*.

SCLEROTICONYX'IS, *Scleronyx'is*, *Sclerotonyx'is*, from *σκληρος*, 'hard,' and *νυξις*, 'punctur-

- ing.' Perforation of the scleroticæ in the operation for cataract by depression.
- SCLEBOTICUS, Indurans.
- SCLÉROTIQUE, Sclerotic.
- SCLEROTIS, Sclerotic.
- SCLEROTITIS, *Inflammatiō Sclerotica*, *Leucitis*, *Lonchaditis*, *Logaditis*, *Scleritis*, *Sclerocitis*, *Rhumat'ic ophthalmia*, *Ophthalmia arthrit'ica*, from *scleroticæ*, and *itis*, denoting inflammation. Inflammation of the sclerotic coat of the eye.
- SCLEROTIUM CLAVUS, see Ergot.
- SCLERUNTICUS, Indurans.
- SCLERUS, Induration, Scirrhus.
- SCLERYNTICUS, Indurans.
- SCLERY'SMA, from *σκληρος*, 'hard.' Induration; also, induration of the liver.
- SCLERYSMUS, Scleriasis.
- SCLIRUS, Scirrhus.
- SCLOPETA'RIUS, from *sclopetum*, 'a gun.' Relating to a gun. Hence, *Aqua sclopetaria*, a water for gunshot wounds. *Vul'nera sclopetaria*, gunshot wounds, &c.
- SCLOPETOPLAGÆ, Wounds, gunshot.
- SCOBS, *Prima*, *Xyama*, *Ramen'tum*, *Rasu'ra*. A shaving, also, an alkali; and the scoria of any metal.
- SCŒNANTHUM, *Juncus odoratus*.
- SCOLECESIS, Helminthiasis.
- SCOLECIASIS, Helminthiasis.
- SCOLEX, *Aecaris lumbricoides*.
- SCOLIOMA, Scoliosis.
- SCOLIO'SIS, *Scolio'ma*, *Rhachio-scolio'ma*, from *σκολιος*, 'crooked.' A distortion of the spine to one side. See Hump.
- SCOLOPENDRA, *Asplenium scolopendrium*.
- SCOLOPENDRIA, *Asplenium ceterach*, and *A. scolopendrium*.
- SCOLOPENDRIUM LINGUA, *Asplenium scolopendrium*—s. *Officinatum*, *Asplenium scolopendrium*—s. *Phyllitis*, *Asplenium scolopendrium*—s. *Ruta muraria*, *Asplenium ruta muraria*—s. *Vulgare*, *Asplenium scolopendrium*.
- SCOLOPOMACHÆRION, from *σκολομαχ*, 'the woodcock,' and *μαχαρη*, 'a knife;' so called because it is bent a little at the extremity like a woodcock's bill. A sort of blunt-pointed bistoury.—*Scultetus*.
- SCOLYMUS SATIVUS, *Cynara scolymus*.
- SCOOP, Teut. *Schoops*, *Cochlea'rè*, (F.) *Curette*. A surgical instrument of the shape of a spoon, which is used for the extraction of certain foreign bodies. The scoop is often employed to extract balls impacted in the soft parts; to remove calculi from the urinary bladder in lithotomy, &c. A small scoop is sometimes used to extract foreign bodies from the meatus auditorius externus, nasal fosse, &c.
- SCOPA REGIA, *Ruscus*.
- SCOPARIUS, see *Spartium scoparium*.
- SCOPE, *σκοπη*, *Scop'ia*, *Scopos*, from *σκοπιω*, 'I look around.' A common suffix to words meaning 'view, inspection,' as *cranioscopy*, *stethoscopy*, &c.
- SCOPOLINA ATROPOIDES, *Hyoscyamus scopolia*.
- SCOPTULA, *Scopula*.
- SCOPULA, Brush.
- SCOR, Excrement.
- SCORACRATI'A, *Scoracra'sia*, *Scatacra'sia*, *Scatacrati'a*, *Copracrati'a*, *Copracra'sia*, *Incontinentia Alvi*, from *scop*, 'excrement,' and *ακρασια*, 'want of control.' Want of power to retain the feces. Involuntary evacuation of the feces.
- SCORBUT', *Porphyra nautica*, *Purpura hæmorrhagica*—s. *des Alpes*, *Pellagra*—s. *de Terre*, *Purpura hæmorrhagica*.
- SCORBU'TIC, *Scorbuticus*. That which belongs to scurvy. One affected with scurvy.
- SCORBUTUS, *Purpura*—s. *Alpinus*, *Pellagra*—s. *Nauticus*, *Porphyra nautica*—s. *Oris*, *Cancer aquaticus*.
- SCORDINEMA, *Carebaria*, *Pandiculation*.
- SCORDINISMUS, *Carebaria*, *Pandiculation*.
- SCORDIUM, *Teucrium scordium*.
- SCORDON, *Allium*.
- SCORITH, *Sulphur*.
- SCORODON, *Allium*.
- SCORPIODEX'IS, from *σκορπιων*, 'the scorpion,' and *δξίς*, 'bite':—more properly, *SCORPIOSTIE'MA*; from *σκορπιων*, and *στυγμα*, 'puncture.' The sting of the scorpion.
- SCOR'PION, *Scorpio*, *Scorpius*, from *σκορπιων*, 'I puncture.' A genus of insects having a sting at the extremity of their tail, with which they make dangerous wounds. An *Oil of Scorpion* was once made from them, which is not now used.
- SCORPIOSTIGMA, *Scorpiodexis*.
- SCORPIUS, *Scorpion*.
- SCORTUM, *Serotum*.
- SCORZONE'RA, *S. hu'milis seu lana'ta seu nervosa*, *Eucorzone'ra*, *Viperaria*, *Serpentaria Hispanica*, *Offic'inal viper's grass*, *Viper's grass*, *Goat's grass*. Family, *Cichoraceæ*. Sex. Syst. Syngenesia Polygamia. The roots have been used as alexipharmics, and in hypochondriacal disorders and obstructions of the viscera. The root of the *Scorzonera Hispanica* is esculent, but inefficacious as a drug.
- SCOTAS'MA, *Scoto'ma*, *Scoto'dia*, *Scoto'ris*, *Scotos*; from *σκος*, 'darkness.' Obscurity of vision, darkness, *Suffusio rad'ians*. Also *Scotodinia*.
- SCOTCH FIDDLE, *Psora*.
- SCOTODIA, *Scotasma*, *Scotodinia*.
- SCOTODIN'IA, *Scoto'ma*, *Dinus Scoto'ma*, *Scotodine*, *Tenebrico'sa vertigo*, *Scotos*, *Scotas'ma*, *Scoto'is*, *Scotomy*, from *σκος*, 'darkness,' and *δινω*, 'I turn round.' Giddiness, with impaired sight, often succeeded by headach. See *Vertigo*.
- SCOTOMA, *Scotasma*, *Scotodinia*.
- SCOTOMY, *Scotodinia*.
- SCOTOS, *Scotasma*, *Scotodinia*.
- SCOTOSIS, *Scotodinia*.
- SCOTT'S ACID BATH, *Nitro-muriatic acid bath*. A bath of dilute aqua regia, employed by Dr. Scott, of India, as a remedy in hepatic diseases. Three pints by measure of muriatic acid, and two of nitric acid, are mixed to form the aqua regia. In preparing this for use, a pint of it is mixed with an equal quantity of water. The acid bath consists of three ounces of this dilute acid to every gallon of water.
- SCRATCH, *Psora*.
- SCREATUS, Excretion.
- SCRIPTULUM, *Scruple*.
- SCRIPULUM, *Scruple*.
- SCRIPULUS, *Scruple*.
- SCRIVENER'S CRAMP, *Cramp*, *writers'*.
- SCROBIC'ULUS, *Scrobic'ulum*, (F.) *Fossette*. A little ditch or furrow; diminutive of *scrobo*, 'a ditch.'
- SCROBIC'ULUS CORDIS, *Anticar'dium*, *Procar'dium*, (F.) *Fossette du cœur*, *Avant-cœur*, *Anti-cœur*. The pit of the stomach. The depression at the anterior part of the abdomen, below the xiphoid cartilage.
- SCROBICULUS VARIOLÆ, *Pockmark*.
- SCROFFÆ, *Scrofula*.
- SCROF'ULA, *Scroph'ula*, *Scroph'ula*; from *scrofa*, 'a sow'; because swine were presumed to be subject to a similar complaint. *Scrophulo'ria*, *Morbus scrophulo'rus*, *Vit'ium scrophulo'rum*, *Caco'hym'ia seu Cachex'ia seu Dyscrasia scrophulo'sa*, *Pedatroph'ia glandulo'sa*, *Struma*,

Chorus, Coiras, Tabes Glandularis, Adeno'sis scrofulosa, Scrofæ, Chææa, King's evil, The Evil, Cruela (Scotticè), (F.) *Scrophules, Scrofules, Strumes, Écrouelles, Humeurs froides, Tubercules des glandes lymphatiques, Mal du Roi*. A state of the system characterised by indolent, glandular tumours, chiefly in the neck; suppurating slowly and imperfectly, and healing with difficulty; the disease ordinarily occurring in those of a sanguine temperament, with thick upper lip, &c. The tumours, after suppuration, degenerate into ulcers; which, in process of time, cicatrize, leaving scars. The internal organs are apt to be attacked in those disposed to scrofula; hence they are often the subjects of phthisis and mesenteric affections. Scrofula is hereditary; and is frequently excited by insufficient or improper regimen, and by a close, confined air during the first years of existence. The best treatment is:—to strengthen the system by animal diet; pure air, and exercise, cold bathing, or sea-water bathing, &c.

SCROFULA ABDOMINALIS INTERNA, *Physconia strumosa*.

SCROFULAIRE, *Scrophularia nodosa*—s. *Aquatique*, *Scrophularia aquatica*.

SCROFULARIA, *Scrophularia*.

SCROFULEUX, *Scrophulus*.

SCROFULOUS, *Scrophulosus, Scrophularius, Strumous, Strumousus*, (F.) *Scrofuloux, Strumoux*. Suffering from, or relating to, scrofula.

SCROPHULA, *Scrofula*—s. *Mesenterica, Tabes mesenterica*—s. *Moluccana, Frambœsia*.

SCROPHULÆ, *Scrofula*—s. *Gonorrhœicæ, Gonorrhœa impura*.

SCROPHULARIA, *S. Nodosa*.

SCROPHULARIA AQUATICA, *Betonica aquatica, Fica'ria, Ferra'ria, Castran'gula, Greater Water Figwort, Water Bct'ony*, (F.) *Scrofulaire aquatique*. The leaves are celebrated as correctors of the bad flavour of senna. They were at one time regarded as eminently antiscrofulous, stomachic, and carminative.

SCROPHULARIA FÆTIDA, *Scrophularia nodosa*—s. *Lanceolata, S. Nodosa*—s. *Marilandica, S. Nodosa*—s. *Minor, Ranunculus ficaria*.

SCROPHULARIA NODOSA, *Figwort, Kennelwort, Holmseed, Heal-all, Scrophularia fœtida seu vulg'aris seu lanceolata, seu Marilandica, Millemor'bia, Scrophularia*, (F.) *Scrofulaire, Herbe aux écrouelles*. The root and leaves of this plant have been celebrated, both as an internal and external remedy, against inflammations, piles, scrofulous tumours, ulcers, &c.

SCROPHULARIA VULGARIS, *Scrophularia nodosa*.

SCROPHULARIUS, *Scrofulous*.

SCROPHULES, *Scrofula*—s. *Mésentériques*, *Tabes mesenterica*.

SCROPHULOSIS, *Scrofula*.

SCROPHULOSUS, *Scrofulous*.

SCROTAL, *Scrotalis*; from *scrotum*. Relating to the scrotum,—as *Hernia scrotalis*, *scrotal hernia*.

SCROTAL NERVE, see *Genito-crural Nerve*.

SCROTOCELE. A hybrid term; from (L.) *scrotum*, and *ελην*, 'a tumour.' *Hernia Scrotalis, Scrotal her'nia*. Inguinal hernia, descending into the scrotum; or *Oscheocele*.

SCROTUM, from *scorteus, scorteam*, 'made of leather.' (?) *Oschè, Os'cheus, Os'chus, Os'cheon, Och'cus, Perin, Scortum, Marsu'pium, Bur'sula, Bursa testium seu viri'lis, Cap'ulus*, (?) *Orchæa, Os'cus, Follic'ulus genit'alis, Her'nia, the Purse, the Cod*, (F.) *Les bourses*. The integuments which cover the testes. These are nothing more than a prolongation of the skin of the inner part of the thighs, perineum, and penis. The skin is remarkable for its brown colour, for the

numerous rugæ, especially when the scrotum is contracted; for the great number of sebaceous follicles it contains; and for the long and few hairs which issue from it in the adult. The scrotum is divided into two equal parts by a raphe, which extends from the anus to the root of the penis. Its organization is similar to that of the skin of other parts of the body, except that the chorion is thinner.

SCROTUM CORDIS, *Pericardium*—s. *Pendulum, Rhachosis*.

SCRUPLE, *Diob'olon, Gramma'rium, Scrup'ulus, Scrupulum, Scrip'tulus, Scrip'ulum, Scrip'ulus*. A weight of twenty grains, Troy; twenty-four grains, Poids de marc.

SCUDAMORE'S MIXTURE, see *Mixture, Scudamore's*.

SCULL, *Cranium*—s. *Cap, Calvaria*.

SCURF, Sax. *scurf*, Tent. Sch or ft; *Furfura*. Small exfoliations of the cuticle are so called.

SCURFY, *Furfuraceous*.

SCURVY OF THE ALPS, *Pellagra*—s. *Grass, Sisyrinchium Bermudianum*—s. *Land, Purpura hæmorrhagica*—s. *Petechial, Purpura simplex*—s. *Sea, Porphyra nautica*—s. *Grass, common, Cochlearia officinalis*—s. *Grass, lemon, Cochlearia officinalis*—s. *Grass, wild, Cochlearia coronopus*.

SCUTELLA, *Cup*.

SCUTELLARIA GALERICULA'TA, *Cassida galariculata, Tertiana'ria, Skull-cap*, (F.) *Casside bleue*. *Family, Personœæ. Sex. Syst. Didynamia Angiospermia*. This plant has a bitter taste and a garlic smell. It has been esteemed especially serviceable in tertian ague.

SCUTELLARIA LATERIFLORA, *Skull-cap, Madweed, Hoodwort, Blue Pimp'ernel*. An indigenous plant, which grows in all parts of the United States in moist places. It was at one time esteemed a preventive of hydrophobia, but is probably possessed of little virtue of any kind.

SCUTELLARIA INTEGRIFOLIA, —another indigenous variety,—is an intense bitter.

SCUTICULA DIGITORUM MANÛS, *Phalanges of the fingers*.

SCUTULÆ DIGITORUM MANÛS, *Phalanges of the fingers*.

SCUTUM, *Thyroid cartilago*—s. *Cordis, Scapula, Sternum*—s. *Genu, Patella*—s. *Pectoris, Thorax*.

SCUTUM STOMACH'ICUM. A large plaster, applied to the breast or stomach.

SCUTUM THORACIS, *Scapula*.

SCYBALA, plural of *σκυβαλον*, 'dung.' *Enterolithus Scybalum, Excrementa Alvi stercio'ra, Fæces induratae*. Hard fecal matters discharged in round lumps.

SCYLLA, *Scilla*.

SCYPHOPHORUS PYXIDATUS, *Lichen pyxidatus*.

SCYPHUS AUDITORIUS, *Infundibulum of the cochlea*—s. *Cerebri, Infundibulum of the brain*—s. *Vieussenii, Infundibulum of the cochlea*.

SCYROS, *Callosity*.

SCYTALIDES DIGITORUM MANÛS, *Phalanges of the fingers*.

SCYTHICA, (RADIX,) *Glycyrrhiza*.

SCYTHROPASMUS, from *σχυθρος*, 'gloomy;' *σχυθρωναζειν*, 'to look gloomy;' *Vultus tel'ricus et mœstus*. A gloomy, depressed countenance, of bad augury in serious diseases.

SCYTITIS, *Cytitis*.

SCYTODEPSIUM, *Tannin*.

SEA AIR. The air in the neighbourhood of the sea contains saline particles commingled with it, which render it a valuable change for scrofulous and debilitated individuals. The sea and

sea-coast are usually, also, more equable in their temperature than places inland.

SEA SICKNESS, *Nausea marina*—s. Water, see Water, Sea.

SEAL, GOLDEN, *Hydrastis Canadensis*—s. Solomon's, *Convallaria polygonatum*.

SEAM, Cicatrix.

SEARCHING, *Sounding*; from (F.) *chercher*, 'to seek.' The operation of ascertaining, by the introduction of a metallic instrument, whether a patient has a stone in the bladder.

SEASONING, Acclimation—s. Fever, Fever, stranger's.

SEAT, Anus—s. Bone, Ischion.

SÉBACÉ, Sebaceous.

SEBA'CEOUS, *Seba'ceus*, (F.) *Sébacé*; from *sebum*, 'suet.' That which has the nature of suet.

SEBACEOUS FLUX, Stearrhœa.

SEBACEOUS or SEBIP'AROUS GLANDS, *Sebaceous Follicles*, *Sebaceous Crypts*, *Folliculi seba'ci*, *Cryptæ seba'cea*, *Oil Glands*, *Military glands*, are small hollow organs, of a rounded or pyriform shape, seated in the substance of the skin, and opening on its surface by a small, excretory duct; furnishing a yellow, unctuous humour, *Smegma cuta'neum*. *Sebum cuta'neum*, having some analogy with suet, which is destined to lubricate the surface of the body. Follicles of a similar nature exist around the corona glandis of the male, and under the skin of the labia majora and nymphæ of females. They secrete a sebaceous matter, which emits a peculiar odour; and hence, after the name of one who described them, have been called *Gland'ula odorif'era Tyso'ni*, *G. Tyso'ni*, *Tyson's glands*.

SEBESTE'NA, *Cordia myxa seu sebest'na seu Africa'na seu domestica seu obli'qua*, *Sebest'na officina'lis*, *Sebest'en*, *Sebesten*, *Myxa*, *Cornus sanguin'ea*, *Prunus sebest'na*, *Smooth-leaved Cordia*, *Assyr'ian plum*, (F.) *Sebestier myxa*. The dark, black fruit of the *Sebestina* possesses glutinous and aperient qualities, and is exhibited, in decoction, in various diseases of the chest.

SEBESTIER MYXA, *Sebestena*.

SEBIPAROUS, see Sebaceous.

SEBORRHAGIA, Stearrhœa.

SEBORRHŒA, Stearrhœa.

SEBSTE'N, *Sebestina*.

SEBUM, *Pinguedo*, *Sevum*—s. Cutaneum, see Sebaceous glands.

SECA'LE, *S. cereal'is seu barba'tum*. The Rye plant. (F.) *Seigle*. Rye is chiefly used as an article of diet, particularly in the northern parts of Europe, where a spirit is also extracted from it. The grain is disposed to acescency: and hence its internal use at first generally produces a laxative effect.

SECALE BARBATUM, *Secale*—s. Cornutum, Ergot—s. Luxurians, Ergot.

SECALIS MATER, Ergot.

SECERNENT, Secreting.

SECERNING, Secreting—s. Substance, of the kidney, see Kidney.

SECESSIO FÆCUM, Defecation.

SECESSUS NIGER, Melæna.

SÈCHE, *Sepia*.

SECLUSORIUM, Sac.

SEC'ONDARY, from *secundus*, 'the second.' Something that acts subordinately to another; as the *secondary symptoms* of a disease; that is, those which supervene on the primary.

SECUNDINES, *Secundines*.

SECRETA. Same etymon as Secretion. Things or matters secreted or separated from the blood.

SECRE'TING, *Secretorius*, *Secern'ing*, *Secern'ent*, *Excer'nent*. Same etymon as Secretion. That which secretes,—as a secreting organ.

SECRETIO, Secretion—s. *Lactis*, *Galactosis*—s. *Lotii*, *Uropoësis*—s. *Urinæ*, *Uropoësis*—s. *Vicaria*, see Vicarious.

SECRETION, *Secretio*, *Apoc'risis*; from *æcernere*, 'to separate.' An organic function, which is chiefly executed in the glands, and consists in an elaboration or separation of the materials of the blood, at the very extremities of the arterial system, or rather of the vascular secretory system; and which differs in each organ according to its particular structure; hence the formation of different fluids;—bile, saliva, urine, milk, &c. The secretions are of three kinds:—*exhalant*, *follicular*, and *glandular*.

SECRETORIUS, Secreting.

SECT, METHODOICAL, Methodists.

SEC'TIO, *Section*. The act of cutting. A division.

SECTIO ALTA, see Lithotomy—s. Anatomica, Dissection—s. *Cadaveris*, *Autopsia cadaverica*—s. *Cadaveris legalis*, *Autopsia cadaverica*—s. *Cæsarea*, *Cæsarean section*—s. *Franconiana*, see Lithotomy—s. *Hypogastrica*, see Lithotomy—s. *Lateralis*, see Lithotomy—s. *Legalis*, *Obduccio*—s. *Mariana*, see Lithotomy—s. *Nympharum*, *Nymphotomy*—s. *Rectovesicalis*, see Lithotomy—s. *Renalis*, *Nephrotomy*—s. *Tendinum*, *Tenotomy*—s. *Vagino-vesicalis*, *Colpocystotomia*—s. *Vesicalis*, *Lithotomy*.

SECTION, *Sectio*—s. *Sigallian*, *Symphysotomy*.

SECUNDÆ, *Secundines*.

SECUNDINÆ, *Secundines*.

SECUNDINES, *Hyst'era*, *Deuter'ion*, *After-birth*, *Secun'dæ*, *Secund'ina*, (F.) *Arrière-fais*, *Secundines*, *Délivre*. All that remains in the uterus after the birth of the child,—viz. the placenta, a portion of the umbilical cord, and the membranes of the ovum. These are commonly not expelled till some time after the birth of the fœtus; hence their name. See *Délivrance*.

SECUNDUS PROPRIORUM AURICULÆ, *Retrahens auris*.

SEDANTIA, *Sedatives*.

SEDATIVES, *Sedati'va*, *Pauon'ta*, *Sedan'tia*, *Adec'ta*, *Catatast'tica*, *Deprimen'tia*, (F.) *Calmants*, *Temp'rants*, from *sedo*, 'I settle or assuage.' Medicines which directly depress the vital forces, and which are consequently employed whenever it is necessary to diminish preternaturally increased action. The chief reputed sedatives are: *Acidum Hydrocyanicum*, *Acidum Hydro-sulphuricum*, *Tabacum*, *Missio Sanguinis*, and certain gases by inhalation, as azote, carbonic acid, (?) carburetted and sulphuretted hydrogen.

SEDEM ATTOLLENS, *Llevator ani*.

SEDES, Anus, Excrement—s. *Cruentæ*, *Dysentery*, *Hæmatochesia*—s. *Lactescentes*, *Cœliæ flux*—s. *Procidus*, *Protocele*.

SEDHEE, *Bangœ*.

SEDIMENT, *Sédimen'tum*, *Lemma*, *Residen'tia*. Same etymon. (F.) *Dépot*. A deposit formed by the precipitation of some one or more of the substances held in solution or suspension by a liquid. That which is formed in urine, at the time of cooling, has been called *Hypostasis*, *Hypostéma*, *Residen'tia*, *Subsiden'tia*, (F.) *Dépot de l'urine*. This sediment or deposit varies in different states of the system. In calculous affections, it is one of the most important objects of attention.

SEDIMENTUM, *Sediment*—s. *Urinæ Istericum*, see *Lateralitiosum*—s. *Urinæ pityroides*, see *Furfuraceus*.

SEDITIA, *Nates*.

SEDLITZ, MINERAL WATERS OF, *Sedlitz*, *Seideckhitz* or *Seydeckhitz water*. Springs in Bohemia, near Prague, which are simple salines.

They contain a large quantity of sulphate of magnesia, a little sulphate of soda and sulphate of lime, carbonic acid, carbonates of lime and magnesia, and a resinous matter. (?) They are employed as purgatives in a multitude of diseases.

SEDLITS POWDERS may be formed of *Soda tartarizata* ℥ij, *Soda carbon.* ℥ij, in one paper; *Acid tartaric.* gr. xxxv, in another. For half a pint of water.

SEDON BRÛLANT, Sedum — *s. Reprise*, Sedum telephium.

SEDUM, *Sedum acré* seu *glacia'lé* seu *minus* seu *vermicula'rè*, *Illec'ebra*, *Hellec'ebra*, *Illec'ebum* *Vermicula'rè*, *Vermicula'ris*, *Piper mura'lè*, *Sempervivum acré*, *Wall pepper*, *Stone crop*, *Biting Stone crop*, *Small Houseleek*, *Aë'chryson*, *Exonia*, (F.) *Joubarbe acre*, *Orpin brûlant*, *Vermiculaire brûlante*, *Sédon brûlant*. Family, Crassulacæ. Ser. Syst. Decandria Pentagynia. In its recent state it is very acrid, and proves both emetic and cathartic. Externally, in the form of cataplasm, it produces vesications and erosions. It has been recommended in cancerous and malignant ulcers.

SEDUM, *Saxifraga granulata* — *s. Glaciale*, Sedum — *s. Minus*, Sedum — *s. Majus*, *Sempervivum tectorum* — *s. Minus*, Sedum.

SEDUM TELEPHIUM, *S. telephoides*, *Faba crassa*, *Crass'ula*, *O. Major*, *Illec'ebra major*, *Tele'phium*, *Faba'ria crass'ula*, *Faba crassa*, *Anacamp'seros*, *A. albicans* seu *triphyll'a* seu *vulgar'is*, *Orpine*, (F.) *Sédon reprise*, *Grand orpin*, *Fève épaisse*, *Joubarbe des vignes*, &c. Formerly used as a cataplasm in cuts, hemorrhoids, corns, whitlows, &c.

SEDUM TELEPHOIDES, *S. Telephium* — *s. Vermiculare*, Sedum.

SEED, Sperm.

SEGMENTA CARTILAGINEA, see Trachea.

SEGNIT'IA, *Segnit'ica*, from *segnis*, 'sluggish.' Sluggishness or torpor in the exercise of a function: — as *SEGNIATES ALVI*, Torpor of the bowels: *SEGNIATES VIRIUM*, Languor.

SEGNIATES, *Segnitia*.

SEGRAY, MINERAL WATERS OF. Near Pithiviers, in Gâtinais, in the French department of Loiret, there is a chalybeate spring, which has some reputation.

SEGU, Sago.

SEIDLITZ, Sedlitz.

SEIDSCHUTZ, Sedlitz.

SEIGLE, Secale — *s. Ergoté*, Ergot.

SEIN, Uterus, see Mamma.

SEIRIASIS, Coup de Soleil.

SEIZURES, HIDDEN, see Seizures.

SEKISKAYAVODKA, see Spirit.

SEL, Salt — *s. Admirable de Lémery*, Magnesiæ sulphas — *s. Admirable perle*, Soda, phosphate of — *s. de Cuisine*, Soda, muriate of — *s. de Déroïne*, Narcotine — *s. d'Égra*, Magnesiæ sulphas — *s. Maria*, Soda, muriate of — *s. d'Opium*, Narcotine — *s. de Saturne*, Plumbi superacetos — *s. de Verre*, see Vitrum — *s. Volatil d'Angleterre*, Ammonia carbonas.

SELAGO, *Camphorosma Mospeliaca*, *Lycopodium selago*.

SELENE, Moon, see Nail.

SELENIASIS, Somnambulism.

SELENIASMUS, Somnambulism.

SELENOBLETUS, Lunatic.

SELENOGAMIA, Somnambulism.

SELERY, Apium graveolens.

SELFABUSE, Masturbation.

SELF-HEAL, Prunella.

SELF-LIMITED. An epithet applied to diseases which appear to run a definite course, but

little modified by treatment, — small-pox, for example.

SELF-POLLUTION, Masturbation.

SEL'BRA, *Semili'bra*, *Sembella*, half a pound. Six ounces, Troy; eight, Avoirdupois.

SELIN'ITES, *σελινίτης*. Wine impregnated with the seeds of the *σελίνιον* or *smallage*. — *Dioscorides*.

SELINUM ANGELICA, *Angelica Sylvestris* — *s. Galbanum*, *Bubon galbanum* — *s. Imperatoria*, *Imperatoria* — *s. Opoponax*, *Pastinaca opoponax* — *s. Oreoselinum*, *Athamanta aureoselinum* — *s. Ostruthium*, *Imperatoria* — *s. Pastinaca*, *Pastinaca sativa* — *s. Peucedanum*, *Peucedanum* — *s. Pubescens*, *Angelica sylvestris* — *s. Sylvestris*, *Angelica sylvestris*.

SELLA, *S. Turcica* — *s. Equina*, *S. Turcica* — *s. Familiarica*, *Lassanum* — *s. Obstetricia*, *Diphrus* — *s. Sphenoidalis*, *S. Turcica*.

SELLA TUR'CICA, *Ephipp'ium*, *Fossa Pituita'ria*, *Sella*, *S. equina* seu *sphenoida'lia*, *Turkish Saddle*, (F.) *Selle Turcique* ou *du Turc*. A depression at the upper surface of the sphenoid bone, which is bounded, anteriorly and posteriorly, by the clinoid processes; and lodges the pituitary gland. It is so called from its resemblance to a Turkish saddle.

SELLA TURCICA, *Pituitaria fossa*.

SELLE TURCIQUE, *Sella Turcica* — *s. du Turc*, *Sella Turcica*.

SELS NEUTRES, Neutral salts.

SELTZ or **SELTZER**, MINERAL WATERS OF. Cold, acidulous springs, the source of which is at Seltz, nine leagues from Strasburgh, and in the Department of the Bas-Rhin. They contain carbonates of lime, magnesia, and soda, chloride of sodium, and much carbonic acid. They are refrigerant, tonic, diuretic, and aperient.

ARTIFICIAL SELTZER WATER may be made from *muriat. acid.* gr. xxxv, *water Oj*, *white marble* gr. iij. Stop up till dissolved. Add *carbonate of Magnesia*, gr. v, and, after some time, *subcarbonate of soda*, gr. xxxij. Close it till used.

SEMBELIA, *Selibra*.

SEMECARPUS ANACARDIUM, *Avicennia tomentosa*.

SEMEIOG'RAPHY, *Semeiograph'ia*, *Semiography*, *Semiograph'ia*, from *σημειον*, 'a symptom,' and *γραφη*, 'a description.' A description of symptoms or signs of disease.

SEMEIOLOGY, *Semeiot'icé*, *Semiology*, *Semioticé*, *Phænomenolog'ia*, from *σημειον*, 'a symptom,' and *λογος*, 'a discourse.' (F.) *Sêmeiotique*. The branch of pathology whose object is the doctrine of the symptoms or signs of disease.

SEMEION BOETHEMATICUM, Indication.

SEMEIOSIS, *Semeiology*.

SÊMÉIOTIQUE, *Semeiology*.

SEMEN, Sperm — *s. Badian*, *Illicium anisatum* — *s. Cinas*, *Artemisia santonica* — *s. Contra*, *Artemisia santonica* — *s. Contra vermes*, *Artemisia santonica* — *s. Masculinum* seu *virile* seu *genitale*, Sperm — *s. Muliebre*, Sperm (of the female) — *s. Sanctum*, *Artemisia santonica* — *s. Zedoariae*, *Artemisia santonica*.

SEMENCE, Sperm.

SEMENTINA, *Artemisia santonica*.

SEMI, from *ἡμισ*, 'half.' *Semi* or *demi*, in composition, universally signifies 'half;' both in French and English.

SEMIAN'IMIS, *Semimor'tuus*, *Sem'inez*, *Semivivus*; from *semi*, 'half,' and *animus*, 'soul.' Half-living. Half-dead.

SEMI-BULB OF THE FEMALE, *Bulbus vestibuli*.

SEMICALICULUS, *Sulcus*.

SEMICALALIS, *Sulcus*.

SEMICEPHALUS, *Hemicephalus*.

SEMICIRCULI OSSEI, Semicircular canals. **SEMICIRCULAR**, *Semicircularis*. That which represents the half of a circle.

SEMICIRCULAR CANALS, *Canales seu Ductus semicirculares seu tubiformes seu circulares*, *Semicirculi ossei*, *Funes seu Canaliculi semiannulares labyrinthi*, (F.) *Canaux semicirculaires*, are seated in the pars petrosa of the temporal bone, and open into the vestibule, behind which they are situate. They are three in number, of which one is superior or vertical, *canalis semicircularis verticalis superior*; another posterior or oblique, *canalis semicircularis verticalis posterior*, and the third anterior or horizontal, *canalis semicircularis horizontalis*. Their parietes are formed of a bony, compact, hard plate. Their uses in audition are not known: at their termination they have the elliptical arrangements called *ampullæ*; and by both extremities they open into the vestibule, in the sac at its superior part—the *Sacculus Ellipticus*, *Alveus seu Utriculus communis*, *Utriculus*, *Sinus* or *Alveus utriculo-sus*, *Sacculus vestibuli* or *Median sinus*. In front of the S. ellipticus, nearer the cochlea, and opposite the foramen ovale, is the *Sacculus sphericus* or *sacculus*.

SEMICIRCULUS EXSCULPTUS, Hiatus diaphragmatis aorticus.

SEMICONGIUS. Half a gallon, or four pints.

SEMICUPIUM, *Semicupium*, *Incesio*, *Incesio*, *Encathisma*, *Excathisma*, (F.) *Demibain*, from *semi*, 'half,' and *ebare*, 'to lie down.' A half-bath, or such as receives only the hips or extremities.

SEMICUPIUM, Bath, half, *Semi-cubium*—*Semi-fibulæus*, *Peroneus brevis*—*Semi-interosseus indicis*, *Abductor indicis*—*Semi-interosseus pollicis*, *Opponens pollicis*.

SEMILIBRA, *Selibra*.

SEMILLA DEL GUACHARO. Various kinds of hard and dry fruits, found in the stomachs of the young Guacharo, a sort of nocturnal bird. The fruits are a celebrated South American remedy in ague.

SEMILUNAR, *Semilunaris*, (F.) *Demi-lunaire* or *Semi-lunaire*, from *semi*, 'half,' and *luna*, 'the moon.' Having the shape of a half-moon.

SEMILUNAR CARTILAGES, *Semilunar fibro-cartilages*, *Sigmoid cartilages*, *Cartilaginee sigmoidæ* seu *semilunares*, are two fibro-cartilages, which exist between the condyles of the os femoris and the articular surfaces of the tibia. The innermost, which is longer from before to behind than transversely, is nearly semicircular. The outermost forms almost an entire circle; an arrangement, in both cases, corresponding to the different surfaces of the tibia. They are thicker at their outer circumference, which is convex, than at the inner, which is concave and very thin. Both are inserted, before and behind, into the spine of the tibia, by means of fibrous fasciæ.

SEMILUNAR GANGLION,—*Ganglion abdominale seu splanchnicum seu transversum seu solarè*, *G. sarrénal*, (Ch.), belongs to the great sympathetic. These ganglia present considerable variety, and are deeply situate in the abdomen, above and behind the supra-renal capsules. They correspond, posteriorly, to the pillars of the diaphragm and the aorta. They have the shape of a crescent reversed, often surrounded by other ganglia of a smaller size. From their periphery the numerous filaments proceed, which go to the formation of the solar plexus.

SEMILUNAR NOTCH OF THE STERNUM, *Fourchette*—s. *Valves*, *Sigmoid valves*—s. *Masculatus*, *Eunuch*.

SEMILUNULA UNGUIUM, see *Nail*.

SEMI-MAS, *Eunuch*.

SEMIMASCULUS, *Eunuch*.

SEMIMEMBRANEUS, *Semimembraneus*.

SEMIMEMBRANOUS US, *Semimembraneus*, (F.) *Ischio-popliti-fémoralis*, *Ischio-popliti-tibialis*, (Ch.) *Demimembraneus*. A muscle situate at the posterior part of the thigh. It is flat, thin, narrow, and aponeurotic in its upper third; broader and fleshy in the middle, and tendinous below. It is attached above to the tuberosity of the ischium; and below—by a tendon, which has three divisions—to the outer condyle of the femur, and to the posterior and inner part of the internal tuberosity of the tibia. This muscle is a rotator inwards, and a flexor of the leg. It can also bend the thigh upon the leg. In standing it maintains the pelvis in position, and can even draw it downwards.

SEMIMORTUUS, *Semianimis*.

SEMINA CATAPUTLE MAJORIS, see *Ricinus communis*.

SEMINA FRIGIDA MAJORA. The greater cold seeds: The ancients gave this name to the emulsive seeds of the cucumber, melon, gourd, and water-melon.

SEMINA FRIGIDA MINORA. The lesser cold seeds. The ancients gave this name to the seeds of the lettuce, purslane, endive, and chichory.

SEMINA RICINI VULGARIS, see *Ricinus communis*.

SEMINAL, *Spermaticus*—s. *Filaments*, *Spermatozoa*—s. *Fluid*, *Sperm*—s. *Granules*, see *Granula*.

SEMINALE MEMBRUM, *Penis*.

SEMINALIS, *Spermaticus*.

SEMINERVOSUS, *Semi-tendinosus*.

SEMIORBICULARIS, *Orbicularis oris*.

SEMIPESTIS, *Typhus*.

SEMINEX, *Semianimis*.

SEMINIA MORBORUM, *Predisposition*.

SEMINIFEROUS, from *semen*, 'sperm,' and *fero*, 'I carry.' *Spermatophorousus*. An epithet given to the vessels which secrete and convey the seminal fluid.

SEMINIUM, *Sperm*.

SEMIOGRAPHY, *Semeiography*.

SEMIOLGY, *Semeiology*.

SEMIOTICE, *Semeiologie*—s. *Faciei*, *Physiognomy*.

SEMIPTOLEGIA, *Hemiplegia*.

SEMIREXTUM, *Hemiction*.

SEMISICILICUS.—A weight of one drachm or three scruples.—*Rhodiis*.

SEMISIDERATIO, *Hemiplegia*.

SEMISIDERATUS, see *Hemiplegia*.

SEMISOMNIS, *Coma*.

SEMISOPITUS, *Coma*.

SEMISOPORUS, *Coma*.

SEMISPECULUM. An instrument used for dilating the incision made into the neck of the bladder in the operation of lithotomy.—*Fabricius Hildanus*.

SEMISPINALIS COLLI, *Semispinalis colli*, *Articulo-spinalis*, *Transverso-spinalis Colli*, *Spinalis cervicis*, *Spinalis Colli*, *Transversalis Colli*, *Transverso-spinalis*, (F.) *Demi-épineux* ou *transversaire-épineux du cou*. This muscle arises from the transverse processes of the six uppermost dorsal vertebrae, by an equal number of distinct tendons, which run obliquely under the complexus, and is inserted in the spinous processes of all the cervical vertebrae, except the first and last. Its action is, to extend the neck obliquely backwards and to one side.

SEMISPINALIS DORSI, *Semi-spinalis externa*, *Transverso-spinalis dorsii*, *Semi-spinalis*, (*Riolan*), *Transverso-spinalis*, (F.) *Demi-épineux du dos*, *Transversaire-épineux du dos*. This muscle arises from the transverse processes of the seventh, eighth, ninth, and tenth dorsal vertebrae,

by as many distinct tendons, which soon grow fleshy; and then again become tendinous, and are inserted into the spinous processes of the sixth or seventh uppermost dorsal, and two lowest cervical vertebrae, by as many tendons. Its action is, to extend the spine obliquely backwards.

SEMISPINALIS EXTERNUS, Semi-spinalis dorsi—*s.* Internus, Transversalis dorsi—*s.* Spinatus, Longissimus dorsi, Semi-spinalis dorsi.

SEMISPINATUS COLLI, Semispinalis collis. **SEMIS'SIS**, *Semis*. The half of a pound, ounce, drachm, &c.

SEMITENDINO'SUS, *Semi-nervo'sus*, (F.) *Ischio-cræti-tibialis*, *Ischio-prætibialis*, (Ch.) *Demitendineuz*. This muscle is situated at the posterior part of the thigh. It extends obliquely, downwards and inwards, from the tuberosity of the ischium—to which it is attached by a flat tendon, common to it and the biceps—as far as the posterior and inner part of the tibia, to which it is attached by means of another round tendon. Its fibres are commonly interrupted by an aponeurosis. Its uses are the same as those of the semimembranosus.

SEMITERTIANA, Hemitritea—*s.* Tierce, Hemitritea.

SEMIUNCIA, Hemiuncion.

SEMI'VIR, Eunuch.

SEMIVIVUS, Semianimis.

SEM'OLA, BULLUS. A farinaceous article of diet, which is recommended as highly nutritious and easily digestible, consequently well adapted for infants and invalids, is said to consist of the gluten of wheat, with a small proportion of starch. Semola and Semolina resemble each other greatly. They appear, indeed, to be identical.

SEMOLINA, *Manna croup*. This may be made by grinding wheat in an apparatus, separating the flour from the middlings, dressing the latter four different times in a bolting mill, and sifting through parchment sieves, until the product is perfectly freed from bran. In Poland it is called *Cracow groats*.

Semolina is generally imported into England from the Baltic, and in Russia is said to be manufactured from buckwheat. It has a granular form like some kinds of oatmeal, a dingy white colour, a farinaceous, somewhat insipid, taste, and is well adapted for the diet of children affected with derangement of the bowels. A recent analysis makes it consist of the gluten of wheat with a certain proportion of the starch, part of the latter having been removed.

SEMPERVIVUM ACRE, Sedum.

SEMPERVIVUM TECTORUM, *S. majus*, *House-Leek*, *Sedum Majus* seu *Tectorum*, *Aizoon*, *Beihatalen*, *Buphthalmus*, *Barba Jovis*, *Sengreen*, *Agriopsis'ara*, *Andrachahara*, *Chrysoesper'mum*, (F.) *Joubarbe des toits*. The leaves have a mild, subacid austerly, and are often applied to bruises and old ulcers.

SEMUNCIA, Hemiuncion.

SENA, Cassia senna.

SÉNÉ, Cassia senna—*s.* *d'Amérique*, Cassia Marilandica—*s.* *Faux*, *Colutea arborescens*.

SENEBIERA CORONOPUS, Cochlearia coronopus.

SENE'CIO, *S. vulgaris*, *Erig'erum*, *Cortalon*, *Erigeron*, *Groundael*, *Fireweed*, (F.) *Senecion commun*. Family, Corymbiferae. Sex. Syst. Syngenesia Polygamia Superdua. A common plant in Europe; frequently applied, bruised, to inflammations and ulcers, as refrigerant and anti-scorbutic.

SENECIO HIERACIFOLIA, *Erechthites hieracifolia*.

SENECIO JACOBÆA, *Jacobæa*, *St. James' Wort*, *Ragwort*, (F.) *Jacobée*. The leaves have a roughish, bitter, subacid, and extremely nauseous taste. A decoction has been used in dysentery. A poultice of the leaves has been recommended in rheumatic affections; and a decoction of the root has often been employed in cases of wounds and bruises.

SENEÇON COMMUN, Senecio.

SENECTA, Senectus.

SENECTA AN'GUIUM. The cast skin of a serpent. A decoction of it is said to cure deafness! **SENECTA DECREPITA**, Decrepitude—*s.* *Extrema*, Decrepitude—*s.* *Summa*, Decrepitude—*s.* *Ultima*, Decrepitude.

SENECTUS, *Senect'a*, from *senere*, 'to be old.' *Geras*, *Se'nium*, *Ætas senilis* seu *provec'ta* seu *mala*, *Old age*, *Senil'ity*, (F.) *Viellence*. The last period of life, commencing, according to some, at 60 years of age, but varying according to numerous circumstances. It is characterized by progressive diminution of the physical and moral faculties.

SENECTUS ULTIMA, Decrepitude.

SENEGA, Polygala senega.

SEN'EGAL, GUM, *Gummi Senegalen'se* seu *Sen'eca* seu *Sen'ega* seu *Sen'ica*. The exudation from the *Acacia* seu *Mimosa Senegal*—Family, Leguminosæ, Sex. Syst. Polygamia Monœcia—which grows in the country of Africa through which the river Senegal runs. It is in loose or single drops, much larger than gum Arabic, or the gum which exudes from the cherry tree; and is much more difficult of solution than the former.

SENEGINE, see Polygala senega.

SENEKA, Polygala senega.

SÉNEVE, Sinapis.

SENGREEN, *Sempervivum tectorum*.

SENILE, *Seni'lis*, from *senere*, 'to be old.' Relating or belonging to old age:—as '*senile delirium*;' dotage.

SENILITY, Senectus.

SENA, Cassia senna—*s.* *Alexandrina*, Cassia senna—*s.* *American*, Cassia Marilandica—*s.* *Bladder*, *Colutea arborescens*—*s.* *Essence of prepared*, Selway's, see *Infusum senne compositum*—*s.* *Germanica*, *Colutea*—*s.* *Italica*, Cassia senna—*s.* *Prairie*, Cassia chamæcrista—*s.* *Wild*, Cassia chamæcrista, Cassia Marilandica.

SENS, Sense.

SENSA'TION, *Sensa'tio*, from *sentire*, *sensum*, 'to feel.' *Æsthe'ma*. The consciousness or cognizance by the brain of an impression caused by an external body on the organs of the senses. (F.) *Sentiment*. It is not necessarily, however, confined to bodies external to us; for we can receive an impression by touching any part of our own body. The body which communicates the impressions needs but to be external to the part impressed. Sensations are divided into *external*, *internal* and *morbid*. The *external* are communicated by the five organs of the senses. The *internal* are such as occur within the body, and arise from some alteration in the function of the part, for the time being. Hunger and thirst are internal sensations, as well as all the natural wants. *Morbid* sensations may be either internal or external. *Objective sensations* are produced by impressions on the peripheral nerves; as in vision, audition, &c. *Subjective sensations*, such as originate centrally, or in the encephalon,—as tinnitus aurium.

SENSATIONAL, Sentient.

SENSE, *Sensus*, *Sen'sio*, *Æsthe'sis*, (F.) *Sens*. Same etymon as Sensation. A faculty, possessed by animals, of appreciating impressions from external objects. The senses are five in number: sight, hearing, smell, taste, and touch. Of these,

the first two and the last administer more to the intellect; and, hence, have been called by some, the *intellectual senses*: the other two seem more destined for the nutrition of the body: and, hence, have been termed *corporeal* or *nutritive senses*. Other senses have been suggested—as the intense sensation experienced during the venereal act; a sense of heat and cold; a muscular sense, a common sense or cœnæsthesia, &c.

SENSES, NERVOUS SYSTEM OF THE, Medulla oblongata.

SENSIBILITAS, Sensibility—a. Anomala, see Irritable—a. Aucta, see Irritable—a. Morbosa, see Irritable.

SENSIBIL'ITY, Sensibil'itas. Same etymon as Sensation; *Æthē'ma*. The faculty of receiving impressions, and having the consciousness of them. Bichat defines it as the property possessed by living bodies, of receiving impressions, whether the individual be conscious of them or not. In the former case, where conscious, he calls the sensibility *animal*: in the latter, where not, he terms it *organic*. This last is common to vegetables and animals, and presides over nutrition, absorption, exhalation, secretion, &c. The other does not exist in vegetables: it is the origin of the sensations—olfaction, vision, gustation, audition, thirst, hunger, pain, &c. There are few parts of the animal body, but what are sensible—if not in health—in disease. The free extremities of the hair and nails, and the epidermis, are not so. See Insensibility.

SENSIFEROUS, Sentient.

SENSIO, Sense.

SENSORIUM, Sensorium.

SENSORI-VOLIT'IONAL. A term applied to nervous fibres which pass to and from the cerebro-spinal axis, and are respectively concerned in sensation and volition.

SENSE'RIAL, Sentient.

SENSE'RIAL POWDER, according to Dr. Wilson Phillip, is composed of the two functions of sensation and volition. Dr. Darwin included in it the power of muscular contraction; but it ought not to be extended to acts in which there is not consciousness.

SENSE'R'IUM, Senses'rium commu'nē, Or'ganon senses'rium internum, Senses'rium, Empo'rium spirituum, Æsthet'erion, Senses'ry. The common centre of sensations.

SENSORY, Sensorium, Sentient.

SENSORY GANG'LIA. A name given by Dr. Carpenter to a series of ganglionic masses at the base of the brain, which are in direct communication with the nerves of sensation—as the *olfactory, optic, auditory* and *gustatory*.

SENSORY NERVES, Nerves of sensation, are so called in contradistinction to *Motor nerves*. There are *general sensory nerves*—as those connected with the posterior part of the spinal marrow, and the fifth pair; and *special sensory,* as those of the senses.

SENSUS ÆGRITUDINIS, Indisposition—a. Osmometricus, Olfaction—a. Perversus, Pseudæsthesia.

SEN'TIENT, Sen'tiens, Senses'ry, Ideig'cnous, Senses'rial, Senses'ational, Senses'ferous. Feeling, causing feeling.

SENTIENT EXTREMITIES OF NERVES are their minute terminations in the organs.

SENTIMENT, see Sensation.

SEPARATO'R'IUM, from separo, 'I separate.' A surgical instrument, for separating the pericranium from the skull.

A *Separatory, Vitrum Hypoclepticum,* is a pharmaceutical vessel for separating fluids of different densities from each other.

SEPEDOGENESIS, Sopedonogenesis.

SEPEDONOGEN'ESIS, Sopedogen'esia, from σῆδος, 'putrescency,' and γένεσις, 'generation.' A septic disposition or tendency; such as is met with in typhus gravior.

SEPEs, Sa'pes, 'A hedge,' 'a row:' as *Sepe* seu *Se'ries* seu *Pecten den'tium*:—a row of teeth.

SEPEs DENT'IUM, See Sepe.

SEPHIRUS, Sclerinasia.

SE'PIA, S. officina'lis, Sep'ium, Cuttle-Fish, (F.) Sèche. The osseous part of the cuttle-fish—*Præcip'itans mag'nium*—has been used as an absorbent, and is often added to tooth-powders.

SEPLASIA'R'IUS. A name formerly given to one who sold perfumes, ointments, &c. It is derived from *Seplasia,* the name of a public place at Capua, where such preparations were frequently sold. A druggist.

SEPSICHY'MIA, Septochymia.

SEPSIS, Putrefaction.

SEPTÆ'MIA; from σῆτος, 'rotten,' and αἷμα, 'blood.' A morbid condition of the blood produced by septic or putrid matters.

SEPTANA FEBRIS, Fever septan.

SEPTENARY, Septena'rius, (F.) Septnaire, from *septem, 'seven,'* 'Consisting of seven.' The septenary years of the old believers in critical periods were times at which, it was supposed, important changes might be expected to take place. The grand climacteric was fixed at 63, and it was considered that if a person passed that age, he had well-founded expectations that his life might be protracted to 90.

SEPTENNIAD, Climacteric, (years.)

SEPTFOIL, UPRIGHT, Tormentilla.

SEPTIC, Sep'ticus, Septus, from σῆτος, 'to rot,' σῆτος, 'rotten.' That which produces putrefaction. A substance which corrodes and disorganises the soft parts without causing much pain.

SEPTIC POISON, see Poison.

SEPTICÆ'MIA, Septæmia.

SEPTIMESTRIS FÆTUS, see Fœtus septimestris.

SEPTINERVIA, Plantago.

SEPTOCHY'M'IA, Sepsichym'ia; from σῆσις, 'putrefaction,' and χυμος, 'juice.' Putrefaction or putrescency of the humours.

SEPTOPYRA, Typhus gravior.

SEPT'ULUM; diminutive of *septum, 'a partition.'* A division between small spaces or cavities—as the *septula* or fibrous cords given off by the mediastinum testis to be inserted into the inner surface of the tunica albuginea.

SEPTUM, (F.) Cloison. A part intended to separate two cavities from each other, or to divide a principal cavity into several secondary cavities.

These septa are numerous in the human body. The chief are the following:—

SEPTUM CEREBELLI, Falx cerebelli—a. *Cerebri, Falx cerebri*—s. *Cochliæ auditoriæ, Lamina spiralis.*

SEPTUM CORDIS, Septum mæ'dium cordis. The partition which separates the two ventricles of the heart.

SEPTUM ENCEPHALI, Tentorium.

SEPTUM LU'CIDUM seu *pelluci'dum* seu *ten'ud* et *pellucidum* seu *medium* seu *Spec'ulum lucidum* seu *Lapis specula'ris* seu *Mediast'num* seu *Diaphragma ventriculo'rum laterali'um cerebri, Speculum,* (F.) *Septum mæ'dian,* (Ch.) *Cloison transparente.* The soft portion or medullary substance, which separates the two lateral ventricles of the brain from each other. This septum is composed of two laminae; between which a small cavity exists, filled by a serous fluid, and called the *Fossa of Syl'rius, 5th ventricle of Cuvier, Sinus of the median septum,* (Ch.) The brothers Wem-

zel are of opinion that this cavity is lined by a peculiar membrane.

SEPTUM MÉDIAN, *S. lucidum*—*s. Médian du cerveau*, *Falx cerebelli*—*s. Medium cerebri*, *S. lucidum*.

SEPTUM NA'RIUM, *Interseptum* seu *Dissepimentum* seu *Interfrenium* seu *Discrimen* seu *Imbræx* seu *Diaphragma na'rium*, (F.) *Cloison des Fosses nasales*. The partition between the nares. It is formed by the vomer, the perpendicular plate of the ethmoid bone, and a cartilage of a triangular shape. These parts are lined by the pituitary membrane, which receives a considerable number of nerves and vessels.

SEPTUM NASI, see *Nares*.

SEPTUM PARVUM OCCIPITALE, *Falx cerebelli*—*s. Pectiniforme*, see *Cavernous bodies*—*s. Pellucidum*, *S. lucidum*—*s. Scalæ*, *Lamina spiralis*—*s. Staphylin*, *Velum pendulum palati*—*s. Tenue et pellucidum*, *S. lucidum*—*s. Thoracis*, *Mediastinum*—*s. Transverse*, *Tentorium*—*s. Transversum*, *Diaphragm*—*s. Vestibuli nervoso-membranaceum*, see *Labyrinth*.

SEPTUS, *Septicus*.

SEPTUM, *Sevum*.

SEQUES'TRUM, from *sequestro*, 'I separate.' The portion of bone, in necrosis, which is dead, and separated from the living bone; acting, whilst retained, as an extraneous body. When the sequestrum is superficial and small, it is called *Exfoliation*.

SERAPEUM, Syrup.

SERAPINON, *Sagapenum*.

SERAPIUM, Syrup.

SERBET, Scherbet.

SER'ICUM, *Silk*; from *Seres*—the Thibetans probably—from whom it was first obtained. (F.) *Soie*. The thread spun by the *Bombyx Mori* or *Silkworm*. Silk is used by surgeons for ligatures, &c.

SERICUM ANGLICUM, see *Sparadrapum adhasivum*.

SERIES DENTIIUM, see *Sepes*.

SÉRIEUX, Serious.

SERINGUE, Syringe.

SERIOLOA, *Cichorium intybus*.

SER'IOUS, (F.) *Sérieux*, *Grave*. A term applied to a disease, *Dyspathia*, *Morbus gravis*, and to a symptom that is attended with danger.

SERIS, *Cichorium intybus*.

SERMOUNTAIN, *Lasertium album*.

SERO-COLITIS, see *Colitis*.

SERO-CYSTIC, *Sero-cyst'icus*. An epithet to tumours of the female breast, which consist, in the first stage, of one or more membranous cysts, produced perhaps by dilatation of portions of the lactiferous tubes.

SERO-HEPATITIS, see *Hepatitis*.

SER'OLIN, from *serum*, 'whey.' A fatty matter detected in the blood by Boudet, Lecanu, Sanson, and others.

SÉROSITÉ, Serum.

SEROSITY, Serum.

SEROUS, *Sero'sus*, (F.) *Séroux*. Thin; watery. Relating to the most watery portion of animal fluids, or to membranes that secrete them. See *Serum*.

SEROUS LAYER, see *Tache embryonnaire*.

SEROUS MEMBRANES, Membranes, serous.

SERPEDO, Psoriasis.

SERPENT, *Serpens*, *Anguis*, *Ophis*; from *serpo*, 'I creep.' A snake.

SNAKE BROTH was, at one time, recommended as a restorative.

Many serpents are venomous: and the bites of some fatal. See *Poisons*, Table of.

SERPENTAIRE NOIRE, *Actæa racemosa*.

SERPENTARIA, *Aristolochia serpentaria*—

s. Gallorum, *Arum draconculus*—*s. Hispanica*, *Scorzonera*—*s. Minor*, *Arum maculatum*—*s. Nigra*, *Actæa racemosa*.

SERPENTARIÆ BRAZILIENSIS RADIX, *Caincaë radix*.

SERPENTIN, see *Alembic*.

SERPENTINE, *Ophites*.

SERPENTINUS, *Ophites*.

SERPES, *Herpes*.

SERPIG'INOUS, from *serpere*, 'to creep.'

An epithet given to certain affections, which creep, as it were, from one part to another,—'Serpiginous erysipelas,' (F.) *Erysipèle serpiginoux*.

SERPIGO, *Herpes circinatus*, *Lichen psoriasis*.

SERPILLUM, *Thymus serpyllum*.

SERPOLET, *Thymus serpyllum*.

SERPULLUM, *Thymus serpyllum*.

SERPULLUM, *Thymus serpyllum*—*s. Citratum*, see *Thymus serpyllum*.

SERRA, Saw—*s. Amputatoria*, Saw, amputation—*s. Vesatilis*, Trepan.

SERRAT'ULA AMA'RA, *Family*, *Cynarcephales*. See *Syst. Syngenesia Polygamia æqualis*. A species of *Sawwort*, recommended in ague.

SERRATULA BEHEN, *Centaurea behen*.

SERRATUS ANTICUS MINOR, *Pectoralis minor*—*s. Major*, *Serratus magnus*.

SERRAT'US MAGNUS. So called from its serrated appearance; from *serra*, 'a saw.' *Serratus major anticus*, *Serratus major*, (F.) *Costobasiscapulaire*, *Costo-scapulaire*, (Ch.), *Grand dentelé*. A very broad (especially anteriorly,) thin, flat, irregularly quadrilateral muscle, situate at the sides of the thorax. It is attached, before, to the external surface of the first 8 or 9 ribs, by as many distinct digitations; and, behind, to the spinal edge of the scapula. The superior fibres are almost horizontal; the lower become gradually more and more oblique upwards and backwards. This muscle carries the scapula forwards, and causes it to execute a movement of rotation, which directs its inferior angle forwards, and the anterior upwards. When the shoulder is fixed, it raises the ribs.

SERRATUS POST'ICUS INFERIOR, (F.) *Dorso-lombo-costal*, *Lombo-costal*, (Ch.), *Petit dentelé postérieur et inférieur*. A broader and thinner muscle than the following, but nearly of the same shape. It is situate obliquely at the lower part of the back; and extends from the spinous processes of the last two or three dorsal vertebrae, and the first two or three lumbar, to the inferior margin of the last four false ribs. This muscle depresses the ribs, and thus concurs in expiration. It is an antagonist to the next.

SERRATUS POST'ICUS SUPERIOR, (F.) *Cervico-dorso-costal*, *Dorso-costal*, (Ch.) *Petit dentelé supérieur*. A flat, thin, quadrilateral muscle; situate obliquely at the posterior inferior part of the neck, and the superior part of the back. It passes from the posterior cervical ligament, the spinous process of the last cervical vertebra; from the spinous processes of the first two or three dorsal, to the second, third, fourth, and fifth ribs; into which it is inserted by as many digitations. It raises the ribs, and is, consequently, an inspiratory muscle.

SERTULA CAMPANA, *Trifolium mellilotus*.

SERUM, Sperm.

SERUM, 'whey.' *Orrhos*, *Oros*, *Seros'ity*, (F.) *Sérosité*. The most watery portion of animal fluids, exhaled by serous membranes. It is a constituent part of blood, milk, &c.

SERUM OF THE BLOOD, *Hæmydor*, *Orrhos*, *Ichor sanguinis*, (F.) *Sérum du Sang*, is the

liquid which separates from the blood, when coagulated at rest. It is of a greenish-yellow colour; viscid, slightly coagulable by heat, acids, and alcohol. It is composed of water; chloride of sodium; certain phosphates; and albumen, constantly united to soda, almost in a saponaceous combination.

The fluid which exudes from the albumen of the serum of the blood, when coagulated by heat, is by some called *serosity*.

SÉRUM DU SANG, S. of the blood.

SÉRUM LACTIS, *Aqua lactis*; *Serum of Milk*, *Whey*, (F.) *Sérum du lait*, *Petit lait*. That part of milk, from which the butter and caseous matter have been separated. It is a transparent, citrine-coloured liquid, containing sugar of milk, mucilage, acetic acid, phosphate of lime, and some other saline substances. It is used as a slightly nutritious diluent and refrigerant.

SÉRUM LACTIS HOFFMAN'NI, (F.) *Petit-lait d'Hoffmann*, is a name given to the liquid resulting from treating with boiling water milk which has been evaporated to an almost solid consistence. It is not much used.

RENNET WHEY is made thus: milk 2 pints; rennet $\frac{3}{4}$ ss, infused in a little hot water; mix and keep in a gentle heat for some hours, then strain.—Gray.

SÉRUM OF SEROUS MEMBRANES, *Serum membranarum serosarum*, *Water of Dropsy*, (F.) *Sérum des membranes séreuses*, *Eau des hydro-piques*. It resembles the serum of the blood,—especially in cases of hydrocele. The water of hydrothorax and ascites contains much less albumen:—sometimes enough to coagulate on the application of heat: at others, not.

SERVICE, MOUNTAIN, *Sorbus acuparia*—s. Tree, *Sorbus domestica*.

SERVLETTE EN CARRÉ, *Couvrechef*.

SESAMOID, *Sesamoides*, *Sesamoïdes*, *Sesamoides*, from *εσσαμη*, 'a grain of sesamum,' and *ειδος*, 'resemblance.'

SESAMOID BONES, *Ossa seu Ossic'ula sesamoides*, are small bones, situate in the substance of tendons, near certain joints. Their number is various. They are commonly more in the male than female. Two are constantly met with beneath the metatarso-phalangeal articulations of the great toe. Sometimes, the articulations of other bones of the metatarsus with the phalanges of the toes have them likewise. In the hand, there are two before the metacarpo-phalangeal joint of the thumb. At times, they are met with in the other metacarpo-phalangeal articulations. Occasionally, two exist behind the condyles of the femur, in the tendons of the gastrocnemii muscles. A considerable os sesamoides is also met with in the tendon of the peronæus longus. These bones are commonly round, and flattened only on one surface, which is incrustated with cartilage. Their size is very variable, according to the joints in which they exist. Traces of sesamoid bones are not observed in infants: in them, they are replaced by small, cartilaginous concretions. They are developed by a single point of ossification: and are, like the patella (which is a true sesamoid bone,) composed of much cellular substance, covered by a thin layer of compact tissue. The use of these bones is,—to allow the tendon to be inserted into the lever at a greater angle; and thus enable the power to act more advantageously.

Riolan has given the name *Ossa sesamoides* to two bony points sometimes met with;—the one at the outer side of the carotid canal of the tem-

poral bone; and the other at the edge of the cavernous sinus, at the side of the internal carotid artery.

SESAMUM, see *Sesamum orientale*.

SES'AMUM ORIENTA'LE, *S. edule seu oleiferum*, *Benné*, *Oily Grain*. The seeds of this African plant are cultivated in Georgia and South Carolina, where the negroes use them with Indian corn as an article of food. They yield a larger proportion of oil than any other vegetable; one hundred weight producing ninety pounds of oil, which is, at least, equal to Florence oil.

Benne oil, *Oleum Ses'ami*, is used in the Southern States as a laxative. The leaves—*Sesamum* (Ph. U. S.)—afford, by infusion, an excellent mucilage.

SESCUN'CIA, *Sesquium'cia*, *Hemio'ion*. An ounce and a half. See *Sesqui*.

SESELL, *Laserpitium siler*—s. *Ægopodium*, *Ligusticum podagraria*—s. *Annuum*, *S. tortuosum*—s. *Carum*, *Carum*—s. *Carvi*, *Carum*—s. *Creiticum*, *Tordylum officinale*—s. *Feniculifolium*, *Sison ammi*—s. *Graveolens*, *Apium graveolens*—s. *Meum*, *Æthusa meum*—s. *Patens*, *S. tortuosum*—s. *Pratense*, *Peucedanum silaus*—s. *des Près*, *Peucedanum silaus*.

SES'ELI TORTUOSUM, *Seseli Massiliens'is seu annuum seu patens*, *Enanthè str'ita rig'ida*, *Hartwort of Marseilles*. The seeds have a warm taste; and a greater degree of pungency than those of *Laserpitium siler*, which is the *Seseli* of the Pharmacopœias.

SESQUI. This word, joined with any number, weight, measure, &c., signifies one and a half; as *sesquigranum*, 'a grain and half.'

SESQUIUNCIA, *Sescuncia*.

SETA EQUINA, 'a horse's hair.' *Hairworm*, *Helmin'thus Gor'dii*. A kind of worm, found in stagnant water, from 4 to 6 inches long, and twisted into various knots and contortions; colour pale-brown, with dark extremities. It is common in the intestines of the Laplanders; causing the *Col'ica Lappon'ica*, in which the gripings are, at times, exceedingly severe.

SETA'CEUM, *Seto*, *Seton*, from *seta*, 'a bristle.' A long strip of fine linen or cotton twist, passed through the skin and areolar membrane, to keep up an issue; or through suppurating cavities, between the fragments of fractured bones, &c. to fulfil certain indications. The term is, also, applied to the issue so established. The operation is simple. It consists in laying hold of a fold of skin, and passing a seton-needle through it, with the thread attached. Every day a fresh portion of the thread is drawn through the sore. Setons are established in many diseases;—in obstinate ophthalmiæ, cephalalgic; epilepsy, thoracic and abdominal affections, &c.; but they are not as much used as formerly.

SETARIA ROCCELLA, *Lichen roccella*.

SETFAST, see *Furunculus*.

SETO, *Setaceum*.

SETON, *Setaceum*.

SETTERWORT, *Helleborus foetidus*.

SEVADILLA, *Veratrum sabadilla*.

SEVATIO, *Steatoma*.

SÈVE, *Sap*.

SÈVRAGE, *Weaning*.

SEVUM, *Pinguedo*.

SEVUM, *Sebum*, *Sepum*, *Stear*, *Adeps ovilli*, *Serum verveci'num*. Suet, mutton suet; Pinguedo.

SEVUM PRÆPARATUM, *Serum* (Ph. U. S.)—*Ovilli Serum Præparatum*, *Prepared Suet*, (F.) *Graisse de Mouton*, *Suif*, is formed by cutting suet in pieces; melting over a slow fire, and straining through linen. It is emollient

and is sometimes boiled in milk (Ξij to Oj), and is used in diarrhoea and dysentery. Its principal employment is in the formation of plasters.

SEVUM VERVACINUM, Sevum.

SEX, *Sexus, Genos, Physis*. The physical difference between male and female in animals and vegetables;—as the *Male sex, Sexus potior seu fortior seu virilis*; and the *Female sex, Sexus sequior, S. muliebris, Alter Sexus, 'The Sex.'*

SEXTANS, *Sexta pars librae*. The sixth part of a pound.—Galen.

SEXTARIUS. An ancient measure for liquid and solid substances. See Weights and Measures.

SEX'TULA, *Hexagium, 'εξαις*. The sixth part of an ounce.

SEX'UAL, *Sexua'lis, from sexus, 'sex.'* That which relates to the sex; which characterizes the sex.

SEXUAL DISEASES, *Morbi sexua'les*, are the diseases of the genital organs; as SEXUAL FUNCTIONS are the genital functions.

SEXUAL INTERCOURSE, Coition—s. Organs, Genital organs.

SEXUS, Sex—s. Alter, see Sex—s. Fortior, see Sex—s. Muliebris, see Sex—s. Potior, see Sex—s. Sequior, see Sex—s. Virilis, see Sex.

SEYDSCHÜTZ WATER, Sedlitz water.

SHALLOT, Echalotte.

SHAMPOO'ING, *Massing, (F.) Massage, Massament*. A Hindoo process, which consists in pressing the body of the bather in a peculiar manner; cracking the various joints, and employing blows and friction.

'Kneading' consists in pressing alternately upon a part of the body to arouse the muscles to more energetic action. It is employed at times in dyspepsia.

SHAMROCK, INDIAN, *Trillium latifolium*—s. Water, *Menyanthes verna*.

SHANKER, *Chanere*.

SHARON SPRINGS, NEW YORK. These springs, which are situate about 10 or 12 miles south of Canajoharie, N. Y., and 45 miles west of Albany, are much frequented. They contain, according to the analysis of Dr. Chilton, sulphate of magnesia, sulphate of lime, chloride of sodium, chloride of magnesium, sulphohydrate of sodium, sulphohydrate of calcium, vegetable extractive matter, and free sulphohydric acid gas. Their temperature is 48° Fahr.

SHEATH, Vagina.

SHEEP POISON, *Kalmia latifolia*.

SHELLBARK, see Hickory.

SHELL FLOWER, *Trillium latifolium*—s. Liquid, see *Calcia murias*—s. Membrane, *Membrana testæ*.

SHEPHERD'S PURSE, *Thlaspi bursa*.

SHERBET, Scherbet—s. Orange, see *Syrupus aurantii*.

SHERMAN'S WORM LOZENGES, see *Worm lozenges, Sherman's*.

SHERRY, Sack, see *Wine*.

SHIELD, WATER, *Nelumbium luteum*.

SHIN, *O'crea, Crista tib'ia*. The spine or anterior part of the tibia or leg. It is, also, called *Anticnemion*, and *Crea*.

SHINGLES, *Herpes zoster*.

SHIP FEVER, see *Typhus*.

SHOCK, see *Concussio*.

SHORT, Sax. γεροντ, from γειραν, 'to cut, to shear,' shored, shor'd, short, (F.) *Court*. A word used, by anatomists, in opposition to *long*; and to distinguish parts from each other that have otherwise the same name.

SHORT BONES, for example, are those in which

the three dimensions—length, breadth, and thickness—are nearly alike; such are the vertebrae, bones of the carpus, tarsus, &c.

SHORT RIBS, see *Costa*.

SHORTSIGHTED, Myopic.

SHORTSIGHTEDNESS, Myopia.

SHORTWINDED, Pury.

SHOTBUSH, *Aralia spinosa*.

SHOULDER-BLADE, Scapula.

SHOVEL PICKEREL WEED, *Unisema deltofolia*—s. Pond, *Unisema deltofolia*.

SHOW, see *Parturition*.

SHOW-CHOO, see *Spirit*.

SHOWER-BATH, see *Bath*.

SHRUB, perhaps, from Arabic, *sharab*, 'syrup.' A compound of spirits, lemon-juice, and sugar.

SHRUB, SWEET, *Calycanthus*—s. Sweet-scented, *Calycanthus*.

SHUD'DERING, *Frem'itus, Phryag'ma*, from (G.) Schauder, Schauer, (F.) *Frémissement, Tressaillement*. A peculiar sensation, felt either externally or internally; and which seems to be the result of a spasmodic movement of the parts in which it occurs. A slight feeling of cold sometimes accompanies it. It is, at times, the result of a moral cause, and is often the precursor of shivering.

SHUMAC, *Rhus coriaria*.

SIAGANTRI'TIS, from *σιαγων*, 'the jaw,' *στρογγυ*, 'a cavity,' and *itis*, denoting inflammation. Inflammation of the lining membrane of the antrum of Highmore.

SIAGON, Maxillary bone.

SIAGO'NAGRA, from *σιαγων*, 'the jaw,' and *αγπα*, 'a seizure.' *Arthritie maxilla'ris*. A gouty or rheumatic affection of the joint of the lower jaw.

SIALACHUS, Salivation.

SIAL'AGOGUE, *Sialago'gus, Sial'ogogue, Ptyal'agogue, Ptyas'magogus, Sali'vans, Saliva'tum, Sialocinet'icus, Apophlegmat'icans per os, (F.) Salivant*; from *σιαλον*, 'saliva,' and *αγω*, 'I expel.' That which provokes the secretion of saliva. Pyrethrum and mercury are sialogogues. Sialogogues may be of two kinds,—those which act through the circulation, and those which act immediately on the salivary organs. Mercury belongs to the former,—pyrethrum to the latter class. The chief sialogogues are armoraci, calamus, mezerium, pyrethrum, tabacum, and singiber.

SIAL'ICA, from *σιαλον*, 'saliva.' Medicines, which affect the salivary glands.—Pereira.

SIALISMUS, Salivation.

SIALOCINETICUS, Sialogogue.

SIALOLITHI, Calculi, salivary.

SIALOLOG'IA, from *σιαλον*, 'saliva,' and *λογος*, 'a discourse.' A treatise on saliva.

SIALOMA, Saliva.

SIALON, Saliva.

SIALORRHŒA, Salivation.

SIALOS'CHESIS, from *σιαλον*, 'saliva,' and *σχησις*, 'retention.' Retention or suppression of the saliva.

SIALOSYRINGES, Salivary fistulae.

SIALOZEMIA, Salivation—s. *Mercurialis, Salivation, mercurial*.

SIAMESE TWINS, see *Twins, Siamese*.

SIBARE, Phrenitis.

SIBBENS, *Sivvens, Framba'sia Sco'tica*. An infectious disease in the mountainous parts of Scotland, viewed to be of the venereal kind. *Siuwin*, in the Keltic, means raspberry; and it is said that, in this affection, fungi appear like raspberries. From *siwin*, the inhabitants have made *siwin, sibben, sibbens, and sivvens*. By some, this affection is regarded as a complication of the

venereal and itch. In the Orkneys, *sibbens* means itch.—Jamieson.

SIBILANT, *Sib'ila*, *Sib'ilans*, from *sibilo*, 'I hiss or whistle.' Making a hissing or whistling sound. See *Rhle sibilant*.

SIBILISMUS AURIUM, Tinnitus aurium.

SIBILUS AURIUM, Tinnitus aurium.

SICCANTIA, from *siccare*, 'to dry.' *Xeran'tica*, (F.) *Siccatis*. Drying medicines.—Galen.

SICCANTIA, Desiccativa.

SICCATIFS, Siccantia.

SICCATIO, Drying.

SICCHA'SIA, *sixxasia*, 'disgust.' A distressing disgust for food; such as is experienced by women with child.

SICILICUM. A Roman weight of about two drachms.

SICK, Sax. *yeoc*, *Eger*, *Egro'tus*, *Nos'eros*, *Nos'ides*, *Jacens*, *Laborio'sus*, *Laborans*, (F.) *Malade*. Labouring under disease. Such is its acceptance in old English, and generally in the United States. In England, it most commonly means,—affected with disorder of the stomach or nausea.

A sick person, *Eger*, *Egro'tus*, (F.) *Malade*, who is under the charge of a physician is said to be a *patient*, or the patient of the physician. At times, but rarely, patient is used for a sick person in the abstract.

SICK STOMACH, Milk sickness.

SICKLY, *Morbo'sus*, *Valetudina'rius*, *Adyn'atos*, *Nosac'eros*, *Nos'ides*, *Morbose*, (F.) *Maladif*. One who is subject to be sick, or is in feeble health.

SICKNESS, Disease—s. Falling, Epilepsy—s. River, Milk sickness—s. of the Stomach, Vomiting—s. Swamp, Milk sickness.

SICLIUM, Sicilicum.

SICUA, Cupping-glass.

SICULA, Beta, Penis.

SICYEDON, Caledon.

SIDA ABUTILON, *Abutilon cordatum*.

SIDE, PAIN IN THE, Pleurodynia.

SIDERA'TIO, *Sydera'tio*, *Sidera'tion*, from *sidus*, 'a star'; because the condition was thought to be produced by the influence of the stars. The state of one struck suddenly, without apparent cause, and as if by the influence of the stars or planets—*Planet-struck*. The ancients comprised, under this name, different morbid conditions, such as paralysis, apoplexy, and gangrene.

SIDERATIO, Apoplexy, Asphyxia, Phrenitis—s. Osis, Spina ventosa.

SIDERATION, Astrobolismos, Sideratio.

SIDERION, Ferramentum.

SIDERITES, Magnet.

SIDERITIS, Magnet, Teucrium chamæpity.

SIDEROS, Ferrum.

SIDEROXYLON, *Chrysophyllum cainito*.

SIDHEE, see Gunjah.

SIDMOUTH (CLIMATE OF). Sidmouth is in Devonshire, England, on the sea-beach, at the mouth of the Sid. It is much frequented by invalids, both during the summer and winter. The climate is, however, damp, and subject to sea-fogs.

SIÈGE, Anus.

SIELISMOS, Salivation.

SIELON, Saliva.

SIEVE, see Cribration—s. Drum, see Cribration.

SIFFLEMENT (F.), from *siffler*, 'to whistle.' Whistling.

SIFFLEMENT MODULÉ, *Chant des artères*, *Bruit musical*, 'modulated whistling, or music of the arteries.' A kind of sound heard on auscultation, resembling, at times, the humming of certain insects.

The sound is chiefly met with in those labouring under chlorosis.

SIGAULTIAN SECTION, Symphysectomy.

SIGE, Taciturnity.

SIGH, Suspirium.

SIGHT, Vision—s. Askew, *Dysopia lateralis*

—s. False, *Metamorphopsia*, *Pseudoblepsia*—s. Feebleness of, *Amblyopia*.

SIGILLUM SALAMONIS, *Convallaria polygonatum*—s. *Virginitatis*, *Hymen*.

SIGMATOID, Sigmoid.

SIGMOID, *Sigmoid'al*, *Sig'matoid*, *Sigmo'ides*, *Sigmo'des*, *Sigmo'ideus*. That which has the form of the Greek S or C; from *sigma*, and *ides*, 'resemblance.'

SIGMOID CARTILAGES, Semilunar cartilages.

SIGMOID CAVITIES or **FOSSE OF THE ULNA**, (F.) *Cavités* ou *Fosses sigmoïdes*, are two notches at the upper part of that bone,—one for the reception of the humerus; the other for that of the radius.

SIGMOID FLEXURE OF THE COLON, *Flexura sigmo'idea*, is a turn the colon takes immediately before its termination in the rectum.

SIGMOID or **SEMILUNAR VALVES**, *Valvule Sigmo'ides*, *Processus Sigmo'ides*, (F.) *Valvules sigmoïdes* ou *semilunaires*, are three valvular folds, at the commencement of the pulmonary artery and aorta. These valves have the form of a crescent, when applied against the parietes of the vessel. When the blood is sent from the ventricles by their contraction, the valves are applied against the sides of the vessel; but, during the diastole of the ventricle, they are depressed, and prevent the blood from returning to the heart. At the middle of the convexity of each valve is a small, hard, triangular granulum, called *Corpusculum seu Globulus Aran'tii*, which completely closes up the passage. It is, also, called *Corpusculum Morgagn'i*, and *C. Scam'i-deum*, (F.) *Globule d'Aran'tius*.

SIGN, *Signum*, *Semi'on*, (F.) *Signe*. Any present or past circumstance, afforded by the examination of a patient, or of matters concerning him, whence a conclusion may be drawn regarding the nature and seat of his disease. The phenomena which precede the disease are called *anæcnetic* or *commemorative signs*—those which accompany it are termed *diagnostic*, if they reveal the nature or seat of the disease,—*prognostic*, when they indicate its probable duration and termination.

SIGNA ASSIDENTIA, see *Assidens*.

SIGN'ATURE, *Signatura*, *Signa'tio*, from *signum*, 'a sign'; *Episphagm'os*. This term was applied in the Eastern countries, in the middle ages, to mystic characters of good or bad augury, with which it was pretended that every one was marked by the star under which he was born.

SIGNATURES OF PLANTS meant certain peculiarities in their external formation or colour, which indicated that they were adapted for particular diseases:—as in the case of the *Lungwort*, *Liverwort*, &c.

SIGNES AVANT-COUREURS, Precursory signs—s. *Précurseurs*, Precursory signs.

SIGNUM, see Parturition—s. Characteristicum, see Pathognomonic—s. Coniunctum, see Pathognomonic—s. Diacriticum, see Diacritica sigma—s. Morbi essentialis, see Pathognomonic.

SILACH, *Silac*. An Arabic word, used to designate thickening of the eyelids, *Crassit'ies Palpebra'rum*; and, also, *Alopecia*.—*Forestus*, *Stephanus*.

SILENCE, see *Murmur*, respiratory.

SILENE CRASSIFOLIA, *Cucubalus bobas*—

s. Infata, Cucubalus behen — *s. Thorei*, Cucubalus behen.

SILENE VIRGINICA, *Ground Pink*, *Wild Pink*, *Catch Fly*. The root has been employed, in decoction, as an efficacious anthelmintic.

SILER LANCIFOLIUM, *Laserpitium siler* — *s. Montanum*, *Laserpitium siler*.

SIL'IQUA, *Cera'tion*; the carat. A weight of about four grains. A pod.

SIL'QUA ARABICA, *Tamarindus* — *s. Araci aromatici*, see *Vanilla* — *s. Banillæ*, see *Vanilla* — *s. Dulcis*, *Ceratonium siliqua* — *s. Vanigliæ*, see *Vanilla* — *s. Vanillie*, see *Vanilla*.

SIL'QUASTRUM PLINII, *Capsicum annuum*.

SILK, *Sericum* — *s. Weed*, *Asclepias Sullivantii*, *Asclepias tuberosa* — *s. Weed*, common, *Asclepias Syriaca* — *s. Worm*, see *Sericum*.

SIL'LOV, *Sulcus* — *s. Horizontal de la veine ombilicale*, see *Liver* — *s. Transversale*, see *Liver* — *s. de la Veine cave inférieure*, see *Liver* — *s. de la Veine porte*, see *Liver*.

SIL'O, *Camus*.

SILPHIUM, *Laserpitium*.

SIL'PHIUM PER'FOLIATUM, *Cup Plant*, *Turpentine Sea Flower*, and

SILPHIUM TERE'BINTHINACEUM, *Pra'irie Burdock*, *Kosin Weed*; *Nat. Order*, *Compositæ*; indigenous in Ohio and Michigan, and flowering from July to September; yield a fragrant gum, which is esteemed stimulant and antispasmodic.

SILUS, *Camus*.

SILVER, *Argentum* — *s. Ammonio-chloride of*, see *Argentum* — *s. Chloride of*, see *Argentum* — *s. Chloruret of*, see *Argentum* — *s. Cyanide of*, see *Argentum* — *s. Cyanuret of*, see *Argentum* — *s. Iodide of*, see *Argentum* — *s. Ioduret of*, see *Argentum* — *s. Leaf*, *Magnolia macrophylla* — *s. Muriate of*, see *Argentum* — *s. Nitrate of*, *Argentinitras* — *s. Oxide of*, see *Argentum* — *s. and Ammonia*, *Chloride of*, see *Argentum* — *s. and Ammonia*, *Chloruret of*, see *Argentum*.

SILYBUM, *Carduus marianus* — *s. Maculatum*, *Carduus marianus* — *s. Marianum*, *Carduus marianus*.

SIMAROUBA, *Quassia simarouba* — *s. Bitter*, *Quassia simarouba* — *s. Faux*, *Malpighia mourella*.

SIMARUBA, *Quassia simarouba*.

SIMARUBA CEDRON. A South American tree, the seeds of which — *cedron seeds* — have been used as an antidote for snake-bites. They have, also, been proposed in mental diseases and in epilepsy. The scrapings of the wood have been used as a substitute for sulphate of quinia.

SIMARUBA OFFICINALIS, *Quassia simarouba*.

SIMILATIO, *Assimilation*.

SIMITIUM, *Plumbi subcarbonas*.

SIMO, *Camus*.

SIMONEA FOLLICULORUM, *Acarus folliculorum*.

SIMOTRACHELUS, *Bysanthen*.

SIMPLES. Medicinal herbs. One skilled in simples is called a *Simplist*, a *Rhizot'omist*.

SIMPLIST, see *Simplex*.

SIMULATED DISEASES, *Feigned diseases*.

SIMULATI MORBI, *Feigned diseases*.

SIMUS, *Camus*.

SINA LEVANTICA, *Artemisia santonica*.

SINAPELE'ON, from *sivani*, 'mustard,' and *aior*, 'oil.' Oil impregnated with mustard.

SINAPI, *Sinapis*.

SINAPIS, *Sinapis nigra* seu *cer'nua* seu *Olive'ria'na*, *Bras'sica nigra*, *Napus*, *Eru'ca*, *Sina'pè*, *Sina'pi*, *Na'pium*, *Napy*, *Common Black Mustard*, (F.) *Moutarde noire*, *S'tneré*, *Sanvre*. *Family*, *Cruciferae*. *Sex. Syst.* *Tetradynamia Siliquosa*. The seeds are inodorous, when entire; but, when bruised, the odour is very pungent; taste bitterish and acrid. They yield their virtues to water, and

afford a bland oil by expression. The seeds are stimulant, diuretic, emetic, and rubefacient. They are sometimes recommended to be swallowed whole, in dyspepsia, torpor of the bowels, &c. Externally, they are applied in the form of cataplasm. See *Sinapiasm*.

SINAPIS ALBA, *S. folio'sa*, *Bonannia officina'lis*, *White Mustard*, *Napus Leuco'sina'pis*, is also used medicinally. It is somewhat less pungent than the black. The distilled oil — *Oleum Sinapis* — is a powerful stimulant and rubefacient.

Whitehead's Essence of Mustard consists of oil of turpentine, camphor, and a portion of spirit of Rosemary; to which is added a small quantity of flour of mustard. It is a celebrated embrocation for rheumatism, &c.

Whitehead's Essence of Mustard Pills consist of yellow resin and balsam of tolu enough to make into pills.

Mustard Whey is made by taking bruised mustard seeds $\frac{z}{ss}$, and milk Oj . Boil together until the milk is curdled, and strain.

This whey is used in dropsy.

SINAPIS ARVEN'SIS, *S. Timoria'na*, *Charlock*, *Wild Mustard*, has the seeds sometimes substituted for black mustard.

SINAPIS CER'NUA, *Sinapis* — *s. Eruca*, *Brassica eruca* — *s. Foliosa*, *S. alba* — *s. Oliveriana*, *Sinapis* — *s. Tamoriana*, *S. arvensis* — *s. Tuberosa*, *Brassica rapa*.

SINAPISIS, *Bole Armenian*.

SIN'APISM, *Sinapis'mus*, from *sivani*, 'mustard.' A cataplasm, of which mustard forms the basis, which is used for exciting redness, and acting as a counter-irritant. It is prepared by mixing flour of mustard and vinegar together to the duo consistence. See *Cataplasmata sinapis*.

SIN'ICIPUT, *Sincipital Region*, *Bregma*, *Syn'ciput*, *Menocra'nium*, *Mesoc'ranium*, *Hemicephalæ'um*, *Hemicephal'ium*, *Hemiceph'alum*; the top of the head. The French use it synonymously with *vertex*. By some it is applied to the frontal region or fore-part of the cranium. The parietal bones have been called *sincipital bones*, *Ossa sincip'itis*, (F.) *Oss du sinciput*.

SINDON, *σινδών*, very fine linen. A small piece of rag, or a round pledget, supported by a thread at its middle, and introduced into the opening in the cranium made by the trephine.

SIN'EW, *Tendon*.

SINGLETON'S GOLDEN OINTMENT is formed of sulphuret of arsenic (realgar), and lard or spermaceti ointment.

SINGULT'OUS, *Lygmo'des*, *Lygo'des*, *Lyngo'des*, *Lynggo'des*; from *Singultus*, 'hiccough.' Relating to or affected with hiccough.

SINGULT'US, *Lynx*, *Lygmus*, *Spasmodygmus*, *Clonus singul'tus*, *Pneusis singul'tus*, *Hiccough*, *Hiccup*, (F.) *Hoquet*. A noise made by the sudden and involuntary contraction of the diaphragm, and the simultaneous contraction of the glottis, which arrests the air in the trachea. It is a symptom of many morbid conditions, and especially of gangrene, but occurs, frequently, in persons otherwise in good health.

SIN'ISTRAD, from *siniater*, 'to the left hand.' A term used by Dr. Barclay, adverbially, to signify 'towards the sinistral aspect.' See *Mesial*.

SINISTRAL ASPECT, see *Mesial*.

SIN'UEUX, *Sinuous*.

SINUOSITAS, *Sinus*.

SIN'UOUS, *Sinuo'sus*, (F.) *Sinueux*, from *sinus*, 'a bay or curve.' An epithet given to certain ulcers, and especially to certain fistulæ, which are tortuous.

SIN'US, *Sinuo'sitas*, *Colpos*, *Abcon'sio*, *Eurycho'ria*, *Reces'sus*, (F.) *Golfe*. Any cavity, the interior of which is more expanded than the en-

trance. In this sense, anatomists have applied the term to cavities in certain bones of the head and face. It has been, also, applied to certain venous canals, into which a number of vessels empty themselves; such as the sinuses of the dura mater and of the spine; the sinus of the vena porta; uterine sinuses, &c.;—and to the bosom.

In *surgery*, it means a long, narrow, hollow track, leading from some abscess, diseased bone, &c., (F.) *Clavier*.

Sinuses of bones form part of the basal cavities. They are the frontal, sphenoidal, maxillary, &c. The name has also been given, occasionally, to the ethmoid and mastoid cells.

SINUS ACUSTICUS, Auditory canal, internal—s. Ampullaceus, Cavitas elliptica—s. Aortici, Sinuses of Valsalva—s. Arteriosus, S. pulmonalis—s. Basilar, Sinus transversus—s. Cavernex, Cavernous sinus—s. Cavernosi uteri, Sinus uterini—s. Cavernosus, Cavernous sinus—s. Cerebri, Ventricles of the brain—s. Choroidien, S. quartus—s. Circular, of Ridley, Sinus coronarius—s. Circularis, S. coronarius—s. *Coronaire du cœur*, see *Cardiac* veins.

SINUS CORONARIUS, *Sinus circula'ris*, S. *circula'ris* Ridley, *Circular sinus of Ridley*, *Coronary sinus*. A venous canal, which surrounds, in a more or less regular manner, the pituitary fossa and gland, emptying itself into the corresponding cavernous sinus by each of its extremities.

SINUS, CORONARY, Sinus coronarius—s. Coronary of the heart, Sinus coronary, venous.

SINUS CORONARY, VENOUS, *Coronary sinus of the heart*. A name given, on account of its great size, to that portion of the great coronary vein which embraces the left auriculo-ventricular furrow.

SINUS COXÆ, see *Cotyloid*—s. *Droit*, S. quartus.

SINUS DEXTER CORDIS, *Sinus vena'rum cava'rum*, S. *veno'sus*, *Saccus vena'rum cava'rum*. The right auricle of the heart:—*A'trium cordis dex'trum*. See *Auricula*.

SINUSES OF THE DURA MATER, *Sinus seu Fis'tula seu Cavita'tes seu Ventricu'li seu Tu'buli seu Sanguinac'tus seu Receptac'ula Duræ matris*, are formed by a separation of the layers of the dura mater, which acts as a substitute for the outer membrane of veins. Bichat admits only four great sinuses, of which all the others seem to be dependencies;—the *two lateral sinuses*, the *straight sinus*, and the *longitudinal sinus*. To the lateral sinuses belong,—the *petrous sinuses*, superior and inferior; the *transverse sinus*; the *cavernous sinuses*; the *coronary sinus*, and the *occipital sinuses*. To the straight sinus belongs the *inferior longitudinal*. The longitudinal sinus, properly so called, has no sinus under its dependence.

SINUS FALCIFORMIS INFERIOR, S. longitudinal, inferior—s. *Falciformis superior*, S. longitudinal, superior—s. Fourth, Torcular Herophili—s. *Genæ pituitarius*, Antrum of Highmore—s. of the Jugular vein, see *Jugular veins*—s. *Lacrymalis*, *Lachrymal sac*.

SINUSES OF THE LARYNX, Ventricles of the larynx.

SINUSES, LATERAL, *Sinus transver'si*, S. *magni*, S. *laterales*, (F.) *Sinus lateraux*. Each of these sinuses, distinguished into right and left, begins at the torcular Herophili, or confluence of the sinuses, and terminates at the sinus of the jugular vein.

SINUS LATÉRAUX, Sinuses, lateral.

SINUSES, LONGITUDINAL, S. *Longitudina'les*. These are two in number. 1. SUPERIOR LONGITUDINAL SINUS, S. *falciformis superior*, S. *triangularis*, *Sinus median*, (Ch.) A long, triangular canal; convex above, concave below; which oc-

cupies the whole of the upper edge of the falx cerebri. It is broad behind, and much narrower before, where it commences by a *cul-de-sac*, at the *cristi galli* of the ethmoid bone. It passes along the frontal or coronal crest, sagittal suture, and the vertical groove of the occipital bone. It receives several veins from the dura mater; and all those that are spread over the convex and plain surfaces of the two hemispheres of the brain. It discharges itself into the upper part of the torcular Herophili. 2. INFERIOR LONGITUDINAL SINUS, *Sinus falciformis inferior*, *Vena falcis cerebri*. This is much narrower than the last, and occupies the inferior edge of the falx cerebri, from its anterior third to the tentorium cerebelli, where it terminates, commonly by two branches, in the straight sinus.

SINUS MAGNI, Sinuses, lateral—s. Maxillary, Antrum of Highmore—s. *Median*, Sinus longitudinal superior—s. *Median*, see *Semicircular canals*—s. *Muliebris*, *Vagina*.

SINUS, OCCIPITAL, *Sinus occipita'lis*. These sinuses commence at the sides of the foramen magnum ossis occipitis, and ascend—becoming broader and nearer each other—into the substance of the falx cerebelli, where they frequently unite. Each opens into the inferior part of the torcular Herophili. They receive the veins of the falx cerebelli, of the dura mater which lines the fossæ cerebelli, and of the posterior part of the cerebellum. Haller and Sömmering have given them the name of *posterior occipital sinuses*, to distinguish them from the transverse sinus, which they have called *anterior occipital sinus*.

SINUS OCCIPITALIS ANTERIOR, Sinus transversus—s. Ophthalmic, see *Cavernous sinus*—s. *Perpendicularis*, S. quartus—s. *Pituitari frontis*, *Frontal sinuses*—s. *Pocularis*, see *Ejaculatory ducts*—s. *Polymorphus*, *Cavernous sinus*—s. *Portarum*, see *Liver*.

SINUS, PROSTATIC, *Sinus prostat'icus*. A fossa on each side of the verumontanum, in which are seen the numerous openings of the ducts of the prostate.

SINUS PUDENDI, *Vagina*—s. *Padoris*, *Vagina*, *Vulva*.

SINUS PULMONALES, Sinuses of Valsalva.

SINUS PULMONALIS, S. *sinu' ter cordis*, *A'trium cordis sinu'trum*, S. *vena'rum pulmona'lium*, S. *arteriosus*, *Saccus vena'rum pulmona'lium*. The left auricle of the heart. See *Auricula*.

SINUS OF THE PULMONARY VEINS, *Auricle*, left.

SINUS QUARTUS, S. *perpendicularis*, (F.) *Sinus choroidien* (Ch.), *Sinus droit*, *Straight sinus*. This sinus—triangular throughout; wide posteriorly; narrower anteriorly; slightly oblique downwards and backwards—passes along the base of the falx cerebri, from the termination of the inferior longitudinal sinus to the torcular Herophili. It receives the inferior longitudinal sinus, the veins of the lateral ventricles or *vena Galeni*, the superior cerebellous veins, &c.

SINUS RENUM, Pelvis of the kidney—s. *Rhomboideus*, see *Ventricles of the brain*—s. of the *Septum lucidum*, *Ventriole*, fifth—s. *Sinister cordis*, S. *pulmonalis*—s. *Sphenoidalis*, *Cavernous sinus*—s. *Straight*, S. quartus—s. *Superioris*, *Frontal sinuses*—s. *Terminalis*, *Circulus venosus*—s. *Transversi*, Sinuses, lateral.

SINUS TRANSVER'SUS, S. *occipita'lis anterior*, *Bas'ilar sinus*. This sinus lies transversely at the anterior part of the basiliary process of the occipital bone. It forms a communication between the two petrous sinuses, and the cavernous sinus of one side, and those of the other. Its breadth is commonly very great. It is situated between two layers of the dura mater, and presents, internally, a kind of cavernous tissue.

SINUS TRIANGULARIS, S. longitudinal, superior—s. Urogenitalis, Urogenital sinus.

SINUS UTERINI, *Sinus cavernosi Uteri*, *Uterine sinuses*. A name given to cavities, formed by the uterine veins in the substance of the uterine parietes. They are very large during pregnancy.

SINUS UTRICULOSUS, see Semicircular canals—s. *des Vaisseaux séminifères*, Corpus Highmori.

SINUSUS OF VALSALVA are three depressions in the aorta—*Sinus aortici*—and pulmonary artery—*Sinus pulmonales*—immediately opposite the semilunar valves. Their use is to leave the edges of the valves free, so that they can be caught by the refluxing blood. Where the aorta is about to send off the first of its large branches, at the top of the thorax, it is of great size, and has been called the *Large sinus of Valsalva*.

SINUS OF THE VENA CAVA, Auricle, right—s. *Venarum cavarum*, S. dexter cordis—s. *Venarum pulmonalium*, S. pulmonalis—s. *Venosus*, S. dexter cordis.

SINUSSES, VERTEBRAL, (F.) *Sinus vertebrae*. Two great venous sinuses, different from those of the dura mater, which extend the whole length of the vertebral canal, from the occipital foramen to the end of the sacrum, behind the bodies of the vertebrae, before the dura mater, and at the sides of the posterior vertebral ligament. At their inner side they communicate with each other by means of branches, which form true *transverse sinuses*. They are situate at the middle of the body of each vertebra, passing under the posterior vertebral ligament. They receive, at their middle part, the veins that arise in the spongy tissue of the vertebrae. By their external side, the vertebral sinuses communicate with the posterior branches of the vertebral, intercostal, and lumbar veins. At their posterior side they receive the veins, which creep on the prolongation of the dura mater that envelops the marrow.

SINUS VULVAE, Rima vulvae.

SIPERRI, Bebeeru.

SIPERINE, see Bebeeru.

SIPHAR, Peritonium.

SIPHILIS, Syphilis.

SIPHITA, Somnambulium—s. *Parva*, Chorea.

SIPHON, Siphon—s. *Urinae*, Diabetes.

SIPHON, *Sipho*, *siphon*, 'a tube.' A bent tube, whose limbs are of unequal length, employed in pharmacy for transferring liquids from one vessel to another. With this view, the shorter limb is plunged into the fluid; and air is sucked from the extremity of the lower limb. The pressure of the atmosphere forces the fluid through the tube; and the flow will continue as long as the extremity of the longer limb is below the level of the fluid in which the shorter limb is immersed.

An exhausting syringe is, at times, attached to the longer extremity of the siphon by means of which the air can be drawn from it.

SIPHON, PLUNGING. An instrument, used in pharmacy for obtaining a specimen,—at times, a measured specimen,—of any liquid. With this view, the instrument is immersed into liquid, and allowed to remain there until full. The opening at the top is then closed with the thumb; and the contents, thus removed, are allowed to flow out by removing the thumb and permitting the entrance of air. It is a form of the *pipette*.

SIPHONIA CAUCHU, see Caoutchouc—s. *Elastica*, see Caoutchouc.

SIPHUNCULUS, Syringe.

SIRA, Orpiment.

SIRENS, Symmeles.

SIRIASIS, *Coup de Soleil*, Insolation, Phrenitis—s. *Egyptiaca*, *Coup de Soleil*.

SIRIUM MYRTIFOLIUM, Santalum album.

SIRIUS, Canicula.

SIROP DE CAPILLAIRE, see *Adiantum capillus veneris*—s. *de Coralline*, see *Corallina Corsicana*.

SIRUP, Syrup.

SISON AMMI, *Ethusa ammi*, *Cnidium tenuifolium*, *Pimpinella laterifolia*, *Seseli feniculifolium*. Family, Umbelliferae. *Sex. Syst.* Pentandria Digynia. The plant that affords the *Ammi verum* of the shops; (F.) *Ammi des Boutiques*. The seeds—*Semen Ammiis cretici seu veri*—were once used as a carminative.

SISON AMOMUM, (F.) *Amome faux*, is considered to be excitant and diuretic. It is the *field honewort*.

SISON ANISUM, *Pimpinella anisum*—s. *Podagraria*, *Ligusticum podagraria*.

SISTENS, Episceticus.

SISYMBRIUM ALLIARIA, *Alliaria*—s. *Barbarea*, *Erysimum barbarea*—s. *Erucastrium*, *Brassica eruca*—s. *Menthastrum*, *Mentha aquatica*.

SISYMBRIUM NASTURTIUM, *Nasturtium aquaticum* sed *officinale*, *Laver odoratum*, *Cruciferae*, *Cressi*, *Cardaminè fontana* seu *nasturtium*, *Water Cress*, (F.) *Cresson de fontaine*. Family, Cruciferae. *Sex. Syst.* Tetradynamia Siliquosa. Water-cresses are commonly used in salad. They have obtained a place in the materia medica for their antiscorbutic qualities.

SISYMBRIUM OFFICINALE, *Erysimum*—s. *Paviflorum*, S. *sophia*.

SISYMBRIUM SOPHIA, *S. parviflorum*, *Herb Sophia*, *Sophia Chirurgorum*, *Flix* or *Flux-weed*, (F.) *Sagesse des Chirurgiens*. It was once reputed to be anthelmintic, and valuable in hysterical affections. It is not used.

Other species of *Nasturtium*, as N. *PALUSTRE*, *Marsh water-cress*; and N. *amphibium*, *Water-radish*, possess similar virtues with *Nasturtium officinale*.

SISYRINCHIUM BERMUDIANUM, *Blue-eyed grass*, *Lily grass*, *Physic grass*, *Scurry grass*; indigenous; Order, *Iridaceae*; flowering from June to August. Used as a cathartic by the Thompsonians. A decoction of the root is acrid and cathartic.

SITICULOSUS, *Dipsodes*, see *Alterative*.

SITIENS, *Dipsodes*.

SITIS, Thirst—s. *Intensa*, *Polydipsia*—s. *Morbosa*, *Polydipsia*.

SITKA, MINERAL WATERS OF. See *Archangel*. New, mineral waters of.

SITOS, Aliment.

SITUS ANOMALUS seu **PERVERSUS INTESTINORUM**, *Splanchnectopia*—s. *Mutatus*, see *Monster*.

SITZBATH, see *Bath*, half.

SIUM, *Sium nodiflorum* seu *angustifolium* seu *Berula* seu *erectum* seu *incisum*, *A'pium sium*, *Berula angustifolia*, *Berula*, *Creeping Water-parsnep*, (F.) *Berle nodiflore*. Family, Umbelliferae. *Sex. Syst.* Pentandria Digynia. It is stimulant, and supposed to be diuretic and lithontriptic. It is, sometimes, employed in cutaneous eruptions.

SIUM ANGUSTIFOLIUM, S. *nodiflorum*—s. *Apium*, *Apium graveolens*—s. *Berula*, S. *nodiflorum*—s. *Bulbocastanum*, *Bunium bulbocastanum*—s. *Carvi*, *Carum*—s. *Erectum*, S. *nodiflorum*—s. *Graveolens*, *Apium graveolens*—s. *Incisum*, S. *nodiflorum*.

SIUM LATIFOLIUM is the common *Water-parsnep* of the United States. It is said to be poisonous.

SIUM NINSI. The plant whose root is called *Radix Ninsi*, *Ninatin*, *Nindsin*. This root was long supposed to be the same as ginseng, and it possesses similar, though weaker properties.

SIUM SILAUS, *Peucedanum silaus*.

SIVM SIS'ARUM, *Skirret*, is used as a salad in Europe; and has been supposed a useful diet in chest affections.

SIVM VULGARE, *Ligusticum podagraria*.

SIVVENS, Sibbens.

SKELETIA, Emaciation.

SKELETOL'OGY, *Sceletolog'ia*, (F.) *Squeletologie*, from *σκελετος*, 'a skeleton,' and *λογος*, 'a discourse.' A treatise on the solid parts of the body. This part of anatomy comprehends *Osteology* and *Syndesmology*.

SKEL'ETON, *Scel'etum*, from *σκελετος*, *Cadaver exsiccatum*; (F.) *Squelette*, *Skeleton*, a dried body; from *σκελλω*, 'I dry.' The aggregate of the hard parts of the body, or the bones. A skeleton is found in almost all animals, although it may not always be formed in the same manner. In some, as in the crustacea and testacea, it is wholly or partly *external*, *Ezo-skeleton*, *Dermo-skeleton*. In others, as in birds, the mammalia, &c., it is *internal*, *Endo-skeleton*, *Neuro-skeleton*. It serves as a support for other organs. On it the general shape of the body and of its various parts is greatly dependent. When the bones are united by their natural ligaments, the skeleton is said to be *natural*, *Scel'etum natura'le*; when articulated by means of wires, *artificial*, *Scel'etum artificia'le*.

SKELETOPE'IA, *Scel'etopa'a*, *Scel'etew'sis*, from *σκελετος*, 'a skeleton,' and *ποιω*, 'I make.' The part of practical anatomy which treats of the preparation of bones, and the construction of skeletons. Bones are prepared to exhibit their conformation, structure, chymical composition, mode of development, and changes; the different cavities formed by the union; and to demonstrate their connexions, relations, modes of union, &c.

SKEVISCH, *Erigeron Philadelphicum*.

SKEVISH, *FLEABANE*, *Erigeron Philadelphicum*.

SKIN, *Cutis*.

SKIN-BOUND DISEASE, *Induration of the cellular tissue*.

SKIOMACHIA, *Sciomachy*.

SKIRRET, *Sium sisarum*.

SKIRSE, *Scirrhus*.

SKOKE, *Phytolacca decandra*.

SKOLEMORA FERNAMBUCENSIS, *Geofraa vermicifuga*.

SKUE-SIGHT, *Dysopia lateralis*.

SKULL, *Cranium*.

SKULL-CAP, *Calvaria*, *Scutellaria galericulata*.

SKUNK-CABBAGE, *Dracontium foetidum*.

SKUNK-WEED, *Dracontium foetidum*.

SLATE, *IRISH*, *Hibernicus lapis*.

SLATERS, *Onisci aselli*.

SLATKAIA TRAVA, see *Spirit*.

SLAV'ERING, from *saliva*. *Ptyalis mus iners*, *Dri'elling*, (F.) *Bave*. Involuntary flow of saliva, from sluggishness of deglutition, without increased secretion. It is seen in the infant, the aged, and the idiot.

SLEEP, *Sax. fleep*; *Somnus*, *Sompnus*, *Sopor*, *Dormit'io*, *Hypnos*, (F.) *Sommeil*. Temporary interruption of our relations with external objects. A repose of the organs of sense, intellectual faculties, and voluntary motion.

The act of quitting this condition is called *awaking*, (F.) *Éveil*, *Evigilation*, *Reveil*. Sometimes this is progressive and natural; at others, sudden and starting; (F.) *Reveil en sursaut*,—as in nightmare, affections of the heart, hypochondriasis, &c.

SLEEP, **MAGNETIC**, *Hypno'sis biomagnet'ica*, is the sleep induced by the so called animal magnetism. See *Magnetism*, animal.

SLEEP, **NERVOUS**, see *Magnetism*, animal.

SLEEPLESSNESS, *Insomnia*.

SLEEP-WALKING, *Somnambulism*.

SLIACS, **MINERAL WATERS OF**. *Sliacs* is a favourite bathing-place in Hungary, a few miles from Neusohl. Some of the waters are cold; others, thermal: the former are carbonated chalybeates; the latter are much used in the same cases as thermal springs in general.

SLING, (G.) *Schlinge*, *Mitel'la*, *Mit'rium*. A bandage employed to keep the forearm bent on the arm, in cases of injury done to those parts, in fracture of the clavicle, injury of the hands, &c. A handkerchief is often sufficient for this purpose. It must be folded diagonally, and be tied, by the extremities, round the neck. The French surgeons have used many varieties of *Écharpes orslings*; as the *Grande écharpe*, *Écharpe moyenne*, *Petite écharpe*, *Écharpe de J. L. Petit*, &c.

SLIPPERS, *Impatiens*.

SLIT AND TAIL BANDAGE, *Invaginated bandage*.

SLOE-TREE, *Prunus spinosa*.

SLOUGH, *Eschar*.

SLOWS, *Milk-sickness*.

SLUG, *Limax*—s. *Sea*, *Biche de Mer*.

SLUMBER, *Somnolency*.

SMALLAGE, *Apium graveolens*.

SMALL-POX, *Variola*—s. *Modified*, *Varioloid*.

SMALT, *Protax'ide of Cobalt*, *Smaltum*, *Sofre*, *Azur*, *Blue Starck*. This oxyd has been given in rheumatism, in the dose of ten to twenty grains. A larger quantity excites vomiting.

SMARAG'DUS, (F.) *Émeraude*. The emerald. It was formerly regarded as a tonic.

SMARTWEED, *Polygonum punctatum*.

SMECTICA, *Detergents*.

SMECTIS, *Cimolia terra*.

SMECTRIS, *Cimolia terra*.

SMEGMA, *σμηγμα*, from *σμηγμα*, 'to wipe, to rub off.' Soap, grease, a salve, a liniment. Also, the secretion from the sebaceous follicles of the skin.

SMEGMA ARTICULARE, *Synovia*—s. *Cutaneum*, see *Sebaceous glands*.

SMEGMA PRÆPUTII. The fatty secretion from the sebaceous follicles of the glans penis.

SMEGMATORRHŒA, *Stearrhœa*.

SMEGMORRHŒA, *Stearrhœa*.

SMELL, **SENSE OF**, *Olfaction*.

SMELLING, *Olfaction*.

SMELLOME'S OINTMENT FOR THE EYES, *Ceratum resine*.

SMILAX, *Taxus baccata*—s. *Aspera* *Chinensis*, *Smilax China*—s. *Aspera* *Peruviana*, *Smilax sarsaparilla*—s. *Canellaefolia*, *S. pseudo-China*.

SMILAX CHINA, *Smilax as'pera* *Chinensis* *Family*, *Smilacem. Sex. Syst. Diaccia* *Hexandria*. The root—*China*, *Ch. orientalis* seu *ponderosa* seu *vera*, *Sankira*, *Gauquara*, *China root*, (F.) *Squine*, *Esquine*. Formerly much used in cutaneous and venereal affections.

SMILAX GLAUCA, *S. sarsaparilla*—s. *Hederifolia*, *S. pseudo-China*—s. *Indica* *Spinosa*, *Smilax pseudo-China*—s. *Officialis*, *Smilax sarsaparilla*.

SMILAX PSEUDO-CHINA, *Smilax Indica spinosa* seu *canellaefolia* seu *hederifolia*, *China occidentalis*, *China spuria nodosa*, *American* or *West India* *China*. In scrofulous disorders, the root has been often preferred to the oriental kind. In other cases, it possesses similar virtues.

SMILAX SARSAPARILLA, *S. officinalis* seu *glauca*, *Sarsaparilla*, *Sartaparilla*, *Smilax as'pera* *Peruviana*, *Sarsa*, *Sarsa*, *Cariillan'di*, *Isa* *Pecan'ga*, *Macapalli*, *Zarsa*, *Zarsaparilla*, (F.) *Salsepareille*. The root of the *Sarsaparilla* is inodorous; taste bitterish, feculaceous, and fibrous. of a dark colour externally; white within. It is

possessed of diuretic and demulcent properties, and has been often employed in the sequelæ of syphilis; when, after a mercurial course, nocturnal pains, ulceration, &c., continue. It has, also, been advised in scrofula, chronic rheumatism, &c.; but its efficacy is, to say the least of it, a matter of doubt. Dose, ℥j to ʒj of the powder.

SMILE, *σμάλη*. A curved, two-edged bistoury. A knife.

SMILEON, Scalpel.

SMYRNA, Myrrha.

SMYRNISMOS, Embalming.

SMYRNIUM OLUSA'TRUM, *Hippoceli'num*, *Smyr'nium*, *Macero'na*, *Macedonis'ium*, *Herba Alexandri'na*, *Gri'elum*, *Agri'oseli'num*, *Alexan'ders*, *Alaunders*. A plant formerly cultivated for culinary purposes. The seeds are bitter and aromatic, and the roots more powerfully bitter. They have been recommended as resolvents, diuretics, emmenagogues, &c.

SNAGREL, *Aristolochia serpentaria*.

SNAIL, *Limax* — s. Shell, *Cochlea*.

SNAKEHEAD, *Chelone glabra*.

SNAKERROOT, *Garuleum bipinnatum* — s. Birthwort, *Aristolochia serpentaria* — s. Black, *Actæa racemosa*, *Sanicula Marilandica* — s. Button, *Eryngium aquaticum*, *Liatris spicata* — s. Canada, *Asarum Canadense* — s. Dewitt, *Prenanthes* — s. Evergreen, *Polygala paucifolia* — s. Heart, *Asarum Canadense* — s. Virginiana, *Aristolochia serpentaria* — s. White, *Eupatorium ageratoides*.

SNAKEWEED, *Aristolochia serpentaria*, *Helenium autumnale*, *Polygonum bistorta* — s. American, *Cicuta masculata*.

SNEEZING, from Sax. *niepan*, (G.) *Niesen*, *Glonus Sternuta'tio*, *Sternuta'tio*, *Sternutamentum*, *Sternumentum*, *Ptarmos*, (F.) *Éternement*. A convulsive motion of the expiratory muscles, by which the air is driven rapidly, and rushes sonorously, through the nasal fossæ, carrying with it the mucus and foreign bodies, which adhere to the pituitary membrane, and have occasioned the movement.

SNEEZEWORD, *Achillea ptarmica*, *Helenium autumnale*.

SNORING, *Rhenchus*, *Rhenxis*, *Ronchus*, *Rhonchus*, *Stertor*, *Renchus*, (F.) *Ronflement*, from (G.) *ʒcharnen*. Noise made in the posterior part of the mouth and nasal fossæ during the movements of inspiration, particularly in sleep, both when the person is in health, and in disease, as in apoplexy. In certain affections of the chest — in some cases of pulmonary catarrh — a kind of snoring may be distinctly heard by applying the ear or the stethoscope to the chest.

SNOT, Nasal mucus.

SNOUT, *Nasus*.

SNOW, Sax. *snay*, *Nix*, *Chion*, (F.) *Neige*. Water in a solid state, which falls from the atmosphere in white flakes. It is used externally as a tonic and discutient.

SNOWBALL, *Cephalanthus occidentalis*.

SNOWBERRY, *Symphoricarpos racemosus*.

SNUFF, **CEPHALIC**, *Pulvis asari compositus*.

SNUFFLES, Teut. *S nuffeln*, *Gracedo nentat'rum*, *Rhinari'gia*, *Rhinach'onê*. Breathing hard through the nose, often owing to accumulation of the mucous secretions, — an affection to which infants are liable, and which is relieved by iling the interior of the nostrils.

SOAP, *Sapo* — s. Acid, see *Sapo* — s. Berries, *Lapidus saponaria* — s. Black, see *Sapo* — s. Castile, *Sapo durus* — s. of the Coconut oil, see *Sapo* — s. Common or soft, see *Sapo* — s. Liquid, see *Sapo* — s. Medicinal, see *Sapo* — s. Spanish, *Sapo durus* — s. Yellow, see *Sapo*.

SOAPWORT, *Saponaria*.

SOB, from Sax. *reofian*, 'to grieve' (F.) *Sanglot*. A spasmodic, sudden, and momentary contraction of the diaphragm, immediately followed by relaxation, by which the little air, that the contraction has caused to enter the chest, is driven out with noise. It is an evidence of corporeal or mental suffering.

SOBOLES, Epigone.

SOBRIETAS, Temperance.

SOCIA PAROTIDIS, see *Parotid*.

SOCIETY, *Soci'etas*, (F.) *Société*, from *sociare*, 'to associate.' An association for the promotion of some common object.

SOCIETIES, MEDICAL. Associations of medical gentlemen for the promotion of science have been numerous, and productive of valuable results. In the United States, societies exist in many of the states, possessing the power of examining into the qualifications of every one who may be desirous of practising within their particular jurisdiction. In some of the states, however, the qualified and unqualified are permitted to exercise their profession with equal privileges and immunities.

Amongst the medical associations that have issued from time to time useful transactions or publications, are the following: **IN AMERICA**, — The *Massachusetts Medical Society*; the *Physico-medical*, and *Medical Societies of the State of New York*; the *College of Physicians of Philadelphia*, and the *American Medical Association*. **IN EUROPE**, — The *Association of Fellows and Licentiates of the King's and Queen's College of Physicians of Ireland*; the *Medico-Chirurgical and Phrenological Societies of Edinburgh*; the *College of Physicians, the Medico-Chirurgical, the Medical and the Sydenham Societies of London*; the *Associated Apothecaries and Surgeon Apothecaries of England and Wales*, and the *Provincial Medical and Surgical Association*; the *Royal Academy of Surgery*, the *Royal Society of Medicine*, the *Société Médicale d'Emulation*, the *Société de Médecine*, the *Royal Academy of Medicine*, and the *Société Médicale d'Observation, of Paris*; the *Medico-Chirurgical Academy of Vienna*; the *Medical Societies of Berlin and Copenhagen*, &c., &c. **IN ASIA**, — The *Medical and Physical Society of Calcutta*.

Valuable medical essays are likewise contained in the published *Transactions of the American Philosophical Society*; of the *Royal Societies of London, Edinburgh, Göttingen*, &c.; of the *Royal Academy of Sciences of Paris*; the *Imperial Society of Sciences of St. Petersburg*; the *Royal Academy of Sciences of Turin*; the *Academia Imperialis Leopoldina Naturæ Curiosorum*, &c.

SOCORDIA, Hallucination.

SODA. An Arabic word. *Protur'ide of sodium*, (F.) *Soude*, is obtained by adding *caustic lime* to a solution of *carbonate of soda*. The soda in solution may be obtained by evaporation as hydrate of soda. Its action is like that of potassa; but it is not officinal.

Soda impu'ra, *Barilla*, *Bariglia*, *Barillor*, *Soda Hispanica*, *Anat'ron*, *Natron*, *Anat'on*, *Nitrum Antiquo'rum*, *Kelp*, *Ap'ronit'rum*, *Sal alkali'nis fixus fossilis*, *Carbonas Sodæ impu'rus*, *Subcar'bonas Sodæ impu'ra*, *Anach'ron*. The mineral alkali is obtained from several sources; — naturally, in Egypt, from the incineration of marine plants; and from the decomposition of sulphate of soda, &c. It is principally, however, derived from plants growing on the sea-coast; — as the *Salsola nat'iva*, *S. soda*, *S. tragus*, *Salicornia herbacea*, *Salicornia Arab'ica*, &c. The *Barilla ashes* are from the ashes

of the *Salicornia Europæa*: the *Kelp*, *Soude de Varecq*, from the *Fucus vesiculosus* and other varieties;—the *Turkey Barilla*, *Roquette*, *Cendre du Levant*, *Roche'ta Alexandrina*, from the *Mesembryanthemum Copticum*;—the *Allicant Barilla*, *Soda Alicanti'na*, *S. Alonen'sis*, from the *Mesembryanthemum nodiflorum*;—and the *Carthagena Barilla*, from the *Salicornia* and *Salso'la*.

Impure subcarbonate of soda, (F.) *Soude du commerce*, consists of subcarbonate of soda, potash, chloride of sodium, clay and other earthy substances. It is chiefly used for preparing the pure subcarbonate.

SODA, CARDIALGIA, Cephalalgia, Pyrosis.

SODA ACETA'TA, *Soda Acetas*, *Ac'etate of Soda*, *Terra foliata mineralis*, (F.) *Acetate de soude*. This salt is used in similar cases with the acetate of potash.

SODA AERATA, *Soda carbonas*—s. *Alonen'sis*, *Soda*—s. *Biborate of Borax*—s. *Bicarbonate of Soda carbonas*—s. *Borate of Borax*—s. *Boraxata*, *Borax*.

SODA CAR'ONATE OF, *Soda Carbonas*, *Carbonas Natricum*, *Soda Atrata*, *Soda Bicarbonas*, *Bicarbonate of Soda*, *Carbonate of protoxide of Sodium*, (F.) *Carbonate de Soude*, *S. effervescente*, *S. aere*, *S. Crayeuse*. (*Soda subcarb*, lbj, *aqua destill*. Oijj. Dissolve the subcarbonate of soda, and pass carbonic acid through the solution; set it aside, to crystallize.) Its use is the same as the subcarbonate, than which it is less caustic, and better adapted for effervescing draughts.

SODA CAU'STICA, *Protoxide of Sodium*, *Cautic Soda*, (F.) *Soude caustique*, *S. à la Chaux*, *Soude pure*. The impure subcarbonate, treated by quicklime, and consequently deprived of its carbonic acid. It may be used as a caustic, like the *Potassa fusa*, and is even preferable to it, as it does not deliquesce and run.

SODA CHLORIDE OF, *S. Chlorinata*, *Soda Chloridum*, *Chlorinated Soda*, *Natron Oxymuriaticum*, *Soda Chloruretum*, *Oxymuriate of Soda*, (F.) *Chlorure de Soude*, *Chlorure d'oxide de Sodium*. This salt is used as a disinfecting agent; both to remove offensive smells in chambers, and to alter the condition of fetid ulcers. See *Liquor Soda Chlorinata*.

SODA CHLORINATED, *Soda*, chloride of—s. *Hispanica*, *Soda*—s. *Hydrochlorate of Soda*, *muriate of*.

SODA HYPOSULPH'ITE OF, *Soda hyposulph'is*, (F.) *Hyposulfite de Soude*. This salt has been lately extolled in chronic cutaneous, and scrofulous affections. It is given in syrup.

SODA LITHATE OF, *Urate of soda*—s. *Mephite of Soda*, subcarbonate of.

SODA MU'RIATE OF, *Soda murias*, *Soda muria'ta*, *S. muriat'ica*, *Alkali mineralis salinum*, *Sal communis*, *Sal culinaris*, *Sal fontium*, *Sal gemma*, *Sal marin'us*, *Natron muriatum*, *Sal albus*, *Natron muriaticum*, *Common salt*, *Sea salt*, *Hydrochlorinas Natricus*, *Sal fossilis*, *Sal bicidum*, *Muria*, *Rock salt*, *Bay salt*, *White salt*, *Quadrichloruret of Sodium*, *Hydrochlorate of protoxide of Sodium*, *Hydrochlorate of Soda*, *Chloruretum Sodii*, *Sodii Chloridum*, *Chloride of Sodium*, (F.) *Chlorure de Sodium*, *Sel marin*, *Sel de Cuisine*. In an impure state, this salt is one of the most abundant of natural productions. It is soluble in 3 parts of water, and is tonic, purgative, and anthelmintic. Externally, stimulant. It is a well-known and useful culinary substance.

SODA, NITRATE OF, *Soda Nitras*, *Natron nitricum*, *Alkali mineralis nitratum*, *Nitrum Cuius*, *Nitrate of protoxide of Sodium*, *Protoni-*

trate of Sodium, *Nitrum Rhomboide'le*, *Nitrus Natricum*, *Salpe'tra*, *Cubic Nitre*. Its virtues are similar to those of the nitrate of potash, for which it has been substituted.

SODA, OXYMURIATE OF, *Soda*, chloride of.

SODA, PHOSPHATE OF, *S. Phosphorata*, *Soda phosphas*, *Subphosphate of protoxide of Sodium*, *Phosphas Natricum*, *Natron Oxyposphorides*, *Subprotophosphate of Sodium*, *Subphosphate of Soda*, *Sal mirabilis perlatum*, *Tribasic phosphate of Soda*, *Alkali mineralis phosphoratum*, *Tasteless purging salt*, (F.) *Phosphate de Soude*, *Sel admirable perlé*. (*Bone burnt to whiteness and powdered*, lbx; *Sulphuric acid*, lbvj; *Carbonate of soda*, q. s. Mix the bone with the acid in a covered vessel, add a gallon of water, and stir. Digest for three days, occasionally adding a little water to that lost by evaporation, and frequently stirring the mixture. Pour in now a gallon of boiling water, and strain through linen, gradually adding more boiling water, until the liquor passes nearly tasteless. Set the strained liquor by, that the dregs may subside; from which pour off the clear solution, and boil down to a gallon. To this solution, poured off from the dregs and heated in an iron vessel, add by degrees the carbonate of soda previously dissolved in hot water, until effervescence ceases, and the phosphoric acid is completely neutralized; then filter the liquor, and set it aside to crystallize. Having removed the crystals, add, if necessary, a small quantity of carbonate of soda to the liquor, so as to render it slightly alkaline; then alternately evaporate and crystallize so long as crystals are produced. Lastly, preserve the crystals in a well stopped bottle.—Ph. U. S.) *Cathartic*, in the dose of from ℥ss to ℥j.

SODA, PHOSPHATE OF, TRIBASIC, *S. Phosphate of*.

SODA, SUBCARBONATE OF, *Soda Subcarbonas*, *Soda Carbonas* (Ph. U. S.), *Subcarbonate of protoxide of Sodium*, *Mephite of Soda*, *Natron praparatum*, *Sal Soda*, *Salt of Soda*, *Flos Sais*, *Sagimen Vitri*, *Salt of Barilla*, *Sal alkali*, *Carbonas Soda* of some, (F.) *Sous-carbonate de Soude*. The impure subcarbonate, dissolved in water; the solution filtered and crystallized. Soluble in two parts of water at 60°. It is much used as an antacid; and also as a deobstruent in scrofulous and other affections. Dose, gr. x to ℥ss.

The dried *Subcarbonate of Soda*, *Soda Subcarbonas exsiccata*, *Soda carbonas exsiccata*, (Ph. U. S.) *Carbonas Soda siccatum*, (F.) *Sous-carbonate de Soude desséché*, is employed as an antacid and lithontriptic. Dose, gr. x to xv.

SODA, SUBPHOSPHATE OF, *S. phosphate of*.

SODA, SULPHATE OF, *Soda Sulphas*, *Natron vitriolatum*, *Sal catharticus Glauberi*, *Alkali mineralis sulphuricum*, *Natron sulphuricum*, *Soda vitriolata*, *Sulphas natricus*, *Sal mirabilis Glauberi*, *Aperient Salt of Frederick*, *Glauber's Salt*, (F.) *Sulfate de Soude*. Obtained from the salt that remains after the distillation of muriatic acid; the superabundant acid being saturated with subcarbonate of soda. It is soluble in three parts of water at 60°; is purgative, and, in small doses, diuretic. Dose, ℥vj to ℥i.

The *Lymington Glauber's Salt* is a *Sulphate of Magnesia and Soda*, and is obtained from the mother liquor of sea-water, or by dissolving Epsom salt in a solution of Glauber's salt.

SODA, TARTRATE OF, *Tartrate of potash and Soda*, *Soda Tartarizata*, *Tar'tarized Soda*, *Sal Rupellen'sis*, *Rockelle Salt*, *Sal Polyphretum*, *Seignette's*, *S. Seignette's*, *Seignette's Salt*, *Natron tartarizatum*, *Tartris potas'ea et Soda*, *Soda et Potas'ea Tartras* (Ph. U. S.), *Soda potassio-tartras*, *Tartras Potas'ea et Soda*, *Tartrate de po-*

tasæ et de Soude. (*Sodæ carb. bi; potass. bitart.* in pulv. \mathfrak{z} xv), *Ag. bullient.* Ov. Dissolve the carbonate in water; and add, gradually, the bitartrate. Filter the solution and crystallize, (Ph. U. S.) It is a gentle cathartic. Dose, \mathfrak{z} ss to \mathfrak{z} i.

SODA, URATE OF, Urate of Soda—s. *Vitriolata, S. sulphate of*—s. Water, Acidulous water, simple.

SODÆ ACETAS, Soda, acetate of—s. *Biboras Borax*—s. *Bicarbonas, Soda, carbonate of*—s. *Boras, Borax*—s. *Boras alcalescens, Borax*—s. *Boras supersaturus, Borax*—s. *Carbonas, Soda*—s. *Carbonas, Soda, subcarbonate of*—s. *Carbonas exsiccatus*, see *Soda, subcarbonate of*—s. *Carbonas impurus, Soda*—s. *Chloras, Soda, chloride of*—s. *Hyposulphis, Hyposulphite of soda*—s. *Murias, Soda, muriate of*—s. *Nitras, Soda, nitrate of*—s. *Phosphas, Soda, phosphate of*—s. et *Potassæ tartras, Soda, tartrate of*—s. *Potassio-tartras Soda, tartrate of*—s. *Subboras, Borax*—s. *Subcarbonas impura, Soda.*

SODII AURO-TERCHLORIDUM, see *Gold*—s. *Chloridum, Soda, muriate of*—s. *Chloruretum, Soda, muriate of.*

SODIUM, Na'trium, Natro'nium. The metallic basis of soda.

SODIUM, CARBONATE OF PROTOXIDE OF, Sodæ carbonas—s. *Chloride of, Soda, muriate of*—s. *Chlorure de, Soda, muriate of*—s. *Chlorure d'Oxide de, Soda, chloride of*—s. *Protonitrate of, Soda, nitrate of*—s. *Protoxide of, Soda*—s. *Protoxide of, hydrochlorate of, Soda, muriate of*—s. *Protoxide of, nitrate of, Soda, nitrate of*—s. *Protoxide of, phosphate of, Soda, phosphate of*—s. *Protoxide of, subcarbonate of, Soda, subcarbonate of*—s. *Quadri-chloruret of, Soda, muriate of*—s. *Subborate of protoxide of, Borax*—s. *Subprotoborate of, Borax*—s. *Subprotophosphate of, Soda, phosphate of.*

SODOMA GALLORUM, Syphilis.

SODOMIA, Buggery.

SODOMY, Buggery.

SOFTENING, Mollities.

SOL-POUR-SOL, Homœozygy.

SOLE, Sericum.

SOLF, Thirst—s. *Excessive, Polydipsia.*

SOL, Gold.

SOL-LUNAR, Sol-luna'ris; from *sol*, 'the sun,' and *luna*, 'the moon.' An epithet applied to a fancied influence exerted by the sun and moon on man in a state of health and disease.

SOLAMEN INTESTINORUM, Pimpinella anisum—s. *Scabiosorum, Fumaria.*

SOL'ANOID, Solanoï'des; from *solanum*, 'the potato,' and *oidos*, 'resemblance.' Resembling a potato; potato-like. An epithet applied to a form of cancer, which appears to be intermediate between scirrhus and encephaloid, increasing more rapidly than the former, yet approaching it in firmness.

SOLANUM, S. nigrum seu *vulga'rē* seu *vulga'tum, Common Nightshade, Garden Nightshade*, (F.) *Morelle à fruit noir.* Family, Solanæ. Sez. Syst. Pentandria Monogynia. A narcotic poison. The *Huile de Morelle* is made, by macerating in oil, for several days, the leaves and fruit of this plant. The oil is anodyne and discutient.

SOLANUM DULCAMARA, Dulcamara, D. flexuosum, Solanum Scandens, Glyciph'eros, Ana'ra dulcis, Solanum lignosum, Σρωγγος of Theophrastus, *Bittersweet, Woody Nightshade, Bittersweet Nightshade, Bittersweet Vine, Nightshade Vine, Violet bloom*, (F.) *Douce-amère, Morelle grimpante.* The taste of the stalks is bitter, followed by sweet-

ness; hence its name. It has been used in many diseases, as a diuretic and sudorific, especially in chronic rheumatism, humoral asthma, dropsy, various skin diseases, scrofula, and jaundice. Dose, in powder, \mathfrak{D} j to \mathfrak{z} i.

SOLANUM ESCULENTUM, S. tuberosum—s. *Fœtidum, Datura stramonium*—s. *Furiosum, Atropa belladonna*—s. *Humboldtii, S. Lycopersicum*—s. *Lethale, Atropa belladonna*—s. *Lignosum, S. dulcamara.*

SOLANUM LYCOPER'SICUM; Lycoper'sicon esculentum, Lycoper'sicum pomum amo'ris, S. Humboldt'ii seu *pseudolycoper'sicum, Malum lycoper'sicum, Love-apple plant.* The fruit of this, called *Toma'ta* or *Love-apple*, (F.) *Pomme d'Amour*, is much eaten in the United States; and, with the French, Spaniards, Portuguese, &c., forms an esteemed sauce.

SOLANUM MAGNUM VIRGINIANUM RUBRUM, Phytolacca decandra—s. *Maniacum, Atropa belladonna, Datura stramonium*—s. *Melanocerasus, Atropa belladonna.*

SOLANUM MELON'GENA, Melongena, Egg-plant, Mud Apple plant; (F.) Aubergine. A native of Asia, Africa, and America. Its oblong, egg-shaped fruit, *Ponum Melon'gena, Malum insa'nium*, is prepared in soups and sauces in those countries, like the tomato.

SOLANUM NIGRUM, Solanum.

SOLANUM NIV'EUM, A South African plant, the leaves of which, applied to foul ulcers, cleanse them. The fresh juice of the berries and leaves, made into an ointment with lard or fat, is used by the farmers for the same purpose.

SOLANUM PARMENTERII, S. tuberosum—s. *Pseudolycopersicum, S. Lycopersicum*—s. *Quadrifolium, Paris*—s. *Racemosum Americanum, Phytolacca decandra.*

SOLANUM SANCTUM; Palestine Nightshade. The fruit of this is globular, and is much eaten in the countries where it is a native.

SOLANUM SCANDENS, S. Dulcamara.

SOLANUM TUBEROSUM, Bata'bas, Solanum esculentum seu *Parmenter'ii, Lycoper'sicum tuberosum, Pappas America'nus, Pappus America'nus, America'num Tuberosum, Battu'ta Virginia'na; the Pota'to*, (F.) *Pomme de Terre.* A native of Peru. A nutritious and wholesome vegetable; one of the most useful, indeed, that exists. One hundred pounds of potatoes afford ten pounds of starch, which is equal to arrow-root, as a nutrient and demulcent. It is called *Potato Flour, P. Starch, French Sago, Petit Sague, Common Arrow-root*, &c.

SOLANUM URENS, Capsicum annuum—s. *Vesicarium, Physalis*—s. *Vulgare, Solanum.*

SOLAR, Sola'ris, from *sol*, 'the sun.' Relating to the sun; having rays like the sun.

SOLAR PLEXUS, Plexus sola'ris, Centrum commu'ne, Cerebrum abdominal'e. A collection of ganglions and filaments, interweaving and anastomosing with each other repeatedly, and belonging to the system of the great sympathetic. This vast plexus, lying on the vertebral column, the aorta, and the pillars of the diaphragm, has a very irregular shape. The ganglions and filaments composing it are soft, reddish, and almost all issue from the semilunar ganglions. It receives, also, branches from the pneumogastric. It seems to be chiefly intended for the aorta, and accompanies all its branches; furnishing many secondary plexuses, which are called the *infra-diaphragmatic, colicæ, superior mesenteric, inferior mesenteric, renal or emulgent, spermatic*, &c.

SOLDANELLA, Convolvulus soldanella.

SOLDIER'S WEED, Matioc.

SOLE, *Solum*, *Solea*, *Basis corporis*, *Ichnus*, *Superficies plantaris pedis*, *Peti'na*, *Vestigium*, *Pe'dion*, *Peza*, *Pelma*, *Plantaris superficies pedis*, *Facies concava seu inferior seu Planum seu Concavum seu Pars inferior seu Plantis'ies seu Planta seu Vola pedis*, (F.) *Plante du Pied*. The sole of the foot; the under surface of the foot.

SOLEA, *Sole*—s. *Ipecacuanha*, see *Ipecacuanha*.

SOLEAIRE, *Soleus*.

SOLEN, *Cradle*, see *Vertebral column*.

SOLENA'RIUM, from *σωλην*, 'a canal.' An instrument of surgery, representing a kind of gutter, in the cavity of which the penis was placed, like a limb in a *cradle*.—Galen. The word *Solen* itself—*σωλην*, *Canalis*—was used, in antiquity, for a grooved channel, in which a fractured limb was placed.

SOLENOSTEMMA ARGEL, *Cynanchum oleosifolium*.

SOLE'US, *Gastrocnemius internus*, *Tibiocalcaneus*, (Ch.;) (F.) *Solaire*, from *solea*, 'a sole of a shoe.' A muscle situate at the posterior part of the leg. It is broad, flat, and almost oval; and is attached, above, to the posterior edge of the fibula, to the oblique line on the posterior surface, and to the inner edge of the tibia. It terminates, below, by a large tendon, which unites to that of the *gastrocnemius externus*, to form the *tendo Achillis*. This muscle extends the foot on the leg, and conversely.

SOLID, *Solidus*, *St'reos*. A body whose integrant molecules are so united by the force of cohesion, that they will not separate by their own weight. The solids, in the human body, are the bones, cartilages, tendons, muscles, ligaments, arteries, veins, nerves, membranes, skin, &c. The anatomy, or rather study of the solids, is called *Stereology*, from *στερεος*, 'solid,' and *λογος*, 'a discourse.'

SOLIDAGO, see *Solidago virgaurea*—s. *Saracenia*, *S. virgaurea*.

SOLIDA'GO RIGIDA, *Rigid Goldenrod*, *Bones' styptic*; indigenous; of the *Composite family*, flowering in August and September; is astringent and tonic.

SOLIDA'GO VIRGAU'REA, *S. vulgaris* seu *Saracenia*, *Virga aurea*, *Herba do'rea*, *Cony'sa coma aurea*, *Symphytum Petre'um*, *Elichrysum*, *Consolida* seu *Saracenia*, *Golden rod*. *Nat. Ord.* *Compositæ Corymbiferae*. *Sex. Syst.* *Syngenesia superflua*. (F.) *Verge d'or*. The leaves of *Solidago odorata*—*Solidago* (Ph. U. S.)—and the flowers have been recommended as aperients and tonics, in urinary diseases, and in internal hemorrhage.

SOLIDAGO VULGARIS, *S. virgaurea*.

SOLIDISM, *Pathologia solidaris*. The doctrine of those physicians who refer all diseases to alterations of the solid parts of the body. To the believers in this doctrine, the appellation *Solidists* has been given. The solidists think that the solids alone are endowed with vital properties; that they alone can receive the impression of morbid agents, and be the seat of pathological phenomena. Solidism has been the prevalent doctrine. It is scarcely necessary to say, that in all our investigations, the condition of both solids and fluids must be regarded.

SOLIUM, *Baignoire*, *Tænia solium*—s. *Pedis*, *Metatarsus*.

SOLUBILITY, *Solubilitas*, from *solvere*, *solutum*, 'to dissolve.' That property of a body by virtue of which it can be dissolved in a menstruum.

TABLE OF THE SOLUBILITY OF SOME SUBSTANCES
IN WATER.

NAMES OF SALTS.	Solubility in 100 parts water.	
	at 60°	at 121°
<i>Acids.</i>		
Benzoiic.....	6.900	4.17
Citric.....	133	206
Oxalic.....	50	109
Tartaric.....	very soluble	
<i>Salts.</i>		
Acetate of Potassa.....	109	
Soda.....	25	
Bitartrate of Potassa.....	1.5	3.3
Borate of Soda.....	8.4	16.3
Carbonate of Ammonia.....	50	
Magnesia.....	2	
Potassa.....	25	
Soda.....	50	
Chlorate of Potassa.....	6	40
Soda.....	25	35
Chloride of Lime.....	200	
Magnesium.....	100	
Potassium.....	33	
Sodium.....	35.42	36.16
Muriate of Ammonia.....	33	100
Nitrate of Potassa.....	14.25	100
Soda.....	33	100
Phosphate of Soda.....	25	50
Sulphate of Ammonia.....	50	100
Copper.....	25	50
Iron.....	50	100
Magnesia.....	100	133
Potassa.....	6.25	20
Soda.....	37	125
Supersulphate of Potassa.....	5.0	100
Tartrate of Potassa.....	25	
Potassa and Soda.....	30	
Antimony & Potassa.....	6.6	33

SOLUM, *Sole*.

SOLUTÉ, *Solution*.

SOLUTIO, *Solution*—s. *Alexiteria Gaubiana*, see *Disinfection*—s. *Ammonia subcarbonatis*, *Liquor ammoniæ subcarbonatis*—s. *Arsenicals*, *Liquor arsenicalis*—s. *Arsenicata*, *Liquor arsenicalis*—s. *Arsenitis kalicæ*, *Liquor arsenicalis*—s. *Calcis*, *Liquor calcis*—s. *Camphoræ ætheræ*, *Tinctura ætheræ camphorata*—s. *Camphoræ oleosa*, *Linimentum camphoræ*—s. *Continui*, *Solution of continuity*—s. *Ferri nitratis*, *Liquor Ferri nitratis*—s. *Guaiaci gummosa*, *Mistura guaiaci*—s. *Muriatis barytis*, *Baryta*, *muriate of*—s. *Muriatis calcis*, see *Calcis murias*—s. *Muriatis ferri ætheræ*, *Tinctura seu alcohol sulfurico-æthereus ferri*—s. *Muriatis hydrargyri oxygenati*, *Liquor hydrargyri oxymuriatis*—s. *Potassii iodidi iodureta*, *Liquor iodini compositus*—s. *Resinæ guaiaci aquosa*, *Mistura guaiaci*—s. *Subcarbonatis ammoniaci spiritiosa*, *Spiritus ammoniac*.

SOLUTIO SULPHATIS CUPRI COMPOSITA, *Aquæ vitriol'ica caru'lea*, *Sydenham's Styptic Water*. (*Sulph. cupri*, ℥ij, *alum.*, *acid. sulph.*, ʒi ℥ij, *aqua*, ℥vii: dissolve, and filter.) A styptic, and, largely diluted, an astringent collyrium.

SOLUTION, *Solutio*, *Lysis*, (F.) *Dissolution*. An operation which consists in dissolving a solid body in a menstruum. Likewise, the product of such operation—*Solutum*, (F.) *Soluté*. It means, also, with many, the termination of a disease:—with others, a termination accompanied by critical signs;—and, with others, again, it is synonymous with crisis.

SOLUTION OF ACETATE OF AMMONIA, *Liquor ammoniæ acetatis*—s. of *Acetate of morphia*, *Liquor morphiæ acetatis*—s. *Alkaline*, see *Puligokali*—s. of *Alkaline iron*, *Liquor ferri alkalii*—s. of *Alum*, compound, *Liquor aluminis compositus*—s. of *Ammoniated copper*, *Liquor cupri ammoniati*—s. *Arsenical*, *Liquor arsenicalis*—s. of *Charcoal*, concentrated, see *Tinctura catechu*.

—s. of Chlorinated soda, Liquor sodæ chlorinatæ
 —s. of Citrate of magnesia, see *Magnesia citras*
 —s. of Citrate of potassa, Liquor potassæ citratæ
 —s. of Continuity, see Continuity—s. of Corrosive sublimate, Liquor hydrargyri oxymuriatis—s. Donovan's, see Arsenic and Mercury, Iodide of
 —s. Fowler's, Liquor arsenicalis—s. of Hydroiodate of potass, Liquor potassæ hydriodatis—s. of Iodide of iron, Liquor ferri iodidi—s. of Iodine, compound, Liquor iodini compositus—s. of Iron, nitrated, see Tinctura ferri muriatis—s. Labarraque's *Eau de Javelle*—s. of Lime, Liquor calcis—s. Lugol's, Liquor iodini compositus—s. of Magnesia, condensed, Magnesia, fluid—s. of Monro, Liquor of Monro—s. of Nitrate of iron, Liquor ferri nitratis—s. of Oxymuriate of mercury, Liquor hydrargyri oxymuriatis—s. Plenck's, see Hydrargyri oxydum cinereum—s. de Potasse, Liquor potassæ—s. of Potassa, Liquor potassæ—s. of Sesquioxide of iron, Liquor ferri nitratis—s. of Subacetate of Lead, Liquor plumbi subacetatis—s. of Subacetate of lead, diluted, Liquor plumbi subacetatis dilutus—s. of Subcarbonate of potass, Liquor potassæ subcarbonatis—s. of Sulphate of morphia, Liquor morphis sulphatis—s. of Tartarized antimony, Vinum antimonii tartarizati—s. of Ternitrate of sesquioxide of iron, Liquor ferri nitratis—s. of Van Swieten, Liquor hydrargyri oxymuriatis.

SOLUTIVUS, Laxative.

SOLUTUM, Solution.

SOLVENS, Solvent—s. Minerale, Liquor arsenicalis.

SOLVENT, *Solvens*, (F.) *Fondant*, from *solvere*, 'to dissolve.' A medicine supposed to possess the property of dissolving or removing obstructions and extraneous substances. Thus we have *solvents* of the stone in the bladder, &c. See Dissolventia.

SOLVENT, MINERAL, Liquor arsenicalis.

SOMA, Body, Corpus.

SOMACETICS, Gymnastics.

SOMATIC, *Somat'icus*; from *σῶμα*, 'the body.' That which concerns the body;—as *somatic* death, or death of the body, in contradistinction to *molecular* death or the death of a part.

SOMATODYM'IA, from *σῶμα*, *σῶματος*, 'the body,' and *δύω*, 'I enter into.' A double monstrosity in which the trunks are united. Of this, there are several varieties;—*Vertebrody'm'ia*, where the union is by the vertebrae; *Ischiody'm'ia*, by the ossa ischii; *Sternody'm'ia*, by the sternum; *Supraomphalody'm'ia*, (F.) *Sus-omphalodymie*, by the super-umbilical regions; *Supra et infra-omphalody'mia*, by the superior and inferior umbilical regions; and *Sterno-omphalody'm'ia*, where the union is by both the sternal and the umbilical regions.—Cruveilhier.

SOMATOL'OGY, *Somatolog'ia*, from *σῶμα*, 'the body,' and *λογος*, 'a discourse.' A treatise on the human body. Anatomy.

SOMATOTOMY, Anatomy.

SOMMEIL, Sleep.

SOMNAMBULATION, Somnambulism.

SOMNAMBULISM, *Somnambula'tio*, *Hypnotate'sis*, *Hypnotata'sis*, *Hypnobati'a*, *Rhemba'tismus*, *Lunatis'mus*, *Hypnoner'gia*, *Selenoga'mia*, *Nyctobate'sis*, *Autonyctobati'a*, *Selen'asis*, *Selenias'mus*, *Somnambulis'mus*, *Nyctob'asis*, *Noctambula'tio*, *Noctambulis'mus*, *Nyctoba'dia*, *Nyctoba'tia*, *Siph'ita*, *Syp'h'ita*, *Paroni'ria ambulans*, *Noctieu'gium*, *Oneirody'm'ia acti'va*, *Somno-vigil*, *Somnambula'tion*, *Sleep-walking*, from *somnus*, 'sleep,' and *ambulare*, 'to walk.' A condition of the brain which occasions the individual to execute, during sleep, some of those actions that commonly take place when awake. It has been imagined that the somnambulist is guided solely

by his internal senses; but there are many facts which induce the belief that the external senses are not always entirely suspended. The causes of somnambulism are very obscure; and the principal indication of treatment is,—so to arrange the bed-chamber of the somnambulist, that he cannot get out of it during sleep; and to avoid suppers, as well as all bodily and mental excitement.

SOMNAMBULISM, MAGNETIC MESMERIC, or ARTIFICI'AL, *Somnambulis'mus artificia'lis*, *Cataph'ora magnet'ica*, *Hypnotism*, *Somnip'athy*, is that peculiar condition, into which individuals have been thrown by the *Animal Magnetizer*. It has occurred only in those of weak nervous temperament; in hysterical females, &c.

SOMNAMBULIS MUS, Somnambulism—s. Artificialis, Somnambulism, magnetic.

SOMNAM'BULIST, *Somnam'bulus*, *Hypnob'ates*, *Noctam'bulus*, *Lunat'icus*, *Noctam'bulus*, *Somnam'bulus*. A sleep-walker.

SOMNAMBULIS'TIC. Relating or appertaining to somnambulism,—as the '*somnambulis'tic state*.'

SOMNAMBULO, Somnambulist.

SOMNIA'TIO, from *somnium*, 'a dream.' The act of dreaming.

SOMNATIO MORBOSA, Oneironosis—s. in *Statu Vigili*, Hallucination.

SOMNIF'EROUS, *Som'nifer*, *Sopor'ifer*, *Hypnot'icus*, *Hypnopae'us*, *Soporati'vus*, *Soporif'is*, *Soporiferous*. A medicine which causes sleep.

SOMNIL'QUIST; same etymon as the next. One who talks in his sleep.

SOMNILO'QUIUM, *Somniloquis'mus*, *Somnil'ouquism*, from *somnus*, 'sleep,' and *loquor*, 'I speak.' Talking in the sleep.

SOMNOPATHY, Somnambulism, magnetic.

SOMNIUM, *Enypp'nion*, *Inson'ium*, *a Dream*, (F.) *Rêve*, *Songe*. A confused assemblage, or accidental and involuntary combination of ideas and images, which present themselves to the mind during sleep. Dr. S. Mitchell, of New York, used the word *Somnium* to signify the state between sleeping and waking, in which persons perform acts of which they are unconscious.

For 'waking dreams,' see Hallucination.

Those distressing dreams which occur during a state of half sleep, are called, by the French, *Rêvasseries*.

SOMNO-VIGIL, Somnambulism.

SOM'NOLENCY, *Somnolen'ia*, *Hypnæsthe'sis*, *Hypno'dia*, *Dormita'tio*, *Heav'iness*, *Curus Lethar'gus*, *Cataph'ora*, *Cataphora*, *Coma*, *Somnolen'tum*, *Caro'sis*, *Slumber*, (F.) *Assoupissement*. Sleepiness. Also a state intermediate between sleeping and waking. It is often a symptom of disease.

SOMNUS, Sleep.

SOMP'NUS, Sleep.

SON, Furfur, Sound.

SONCHUS, *S. Olera'ceus*, *Hiera'cium olera'ceum*, *Cicer'bita*, *Sow Thistle*, (F.) *Laiteron doux*. Family, Cichoraceæ. Most of the species of Sonchus abound with a milky juice, which is very bitter, and said to possess diuretic virtues.

SONCHUS FLORIDANUS, Mulgedium Florida-num.

SONDE, Sound, Specillum—s. *Canulé*, Director.

SONDE D'ANEL. A very fine stylet of silver, awl-shaped at one end. It is used for probing the lachrymal passages through the punctum lacrymale.

SONDE DE BELLOC. An instrument invented by Belloc for plugging the nasal fossæ, in cases of hemorrhage. It consists of a curved silver canula, open at both ends, and furnished with a button. The instrument is passed through the nares to the throat; and a plug is attached solely

to the button, so that, when the instrument is drawn forwards through the nose, the posterior nostril is stopped.

SONDE BRISÉE, (F.), Eyed probe. A long, straight stylet, composed of two parts, which may be screwed to each other; blunt at one end, and furnished at the other with an eye, so that it may be used either as a probe for punctured wounds, or for a seton needle.

SONDE À CONDUCTEUR, (F.) A modification of the ordinary catheter;—to facilitate the changing of catheters, without the fear of making false passages. It is a common catheter, open at its beak. The *Stylet* or *Mandrin* is one half longer than that of the ordinary catheter. To use the instrument, the stylet is pushed into the cavity of the bladder through the catheter. The latter is then withdrawn by slipping it over the stylet, which is kept in its place, and serves as a guide to a fresh catheter.

SONDE À DARD, see Lithotomy (high operation.)

SONDE DE LAFOREST. A small, crooked canula, used for probing the nasal duct from below upwards, and for throwing injections into it.

SONDE ou PINCE DE HUNTER. A cylindrical silver canula; of the size of a common catheter; open at both extremities, and containing a wire of iron, one of the ends of which is split into two parts; each being terminated by a small silver scoop, and separating from each other by virtue of their elasticity, when pushed out of the canula, and again approximating when drawn in. It has been used for laying hold of small calculi in the urethra.

SONDE DE VARECQ, Soda.

SONGE, Somnium.

SONITUS AURIUM, Tinnitus aurium — s. Fluidi, Hygrecema — s. Hepaticus, Hepatechema — s. Intestinalis, Enterechema — s. Stomachicus, Gasterechema.

SONOROUS RHONCHUS, Râle sonore.

SONUS, Sound — s. Vocis, Accent.

SOOJA, see Dolichos.

SOOJIE, BASTER'S, a farinaceous article of diet, is said to consist of wheat flour sweetened with sugar.

SOOL, Gastroperiodynia.

SOOT, Fuligo — s. Tea, see Fuligokali — s. Wart, Cancer, chimney-sweeper's.

SOPHIA, Sisymbrium sophia — s. Chirurgorum, Sisymbrium sophia.

SOPHISTICATION, Falsification.

SOPHORA HEPTAPHYL'LA, Anticholericæ Family, Leguminosæ. Sex. Syst. Decandria Monogynia. The root and seeds of this shrub are intensely bitter, and are said to have been found useful in cholera, colic, dysentery, &c.

SOPHORA TINCTO'RIA, Baptisia tinctoria, Podalyria tinctoria, Indigofera, Wild Indigo, Indigo Weed, Broom, Indigo Broom, Horsefly Weed, Yellow Broom, Clover Broom, Rattle Bush, Yellow Indigo. An American plant, the taste of whose root is unpleasant, sub-acrid, and nauseous—very similar to ipecacuanha. In a large dose, the bark of the root acts both as an emetic and cathartic. It has been considered antiseptic and febrifuge, and has been used, in the form of fomentation or cataplasm, in phagedenic and gangrenous ulcers. A liniment, prepared by simmering the cortical part of the root in cream, has been found an efficacious application to sore nipples and to ulcerated breasts.

Baptisia Leucantha, Tall white false Indigo, an indigenous plant, has the same properties.

SOPHRONISTÆ DENTES, see Dentition.

SOPHRONISTERES DENTES, see Dentition.

SOPHROSYNÉ, Temperance.

SOPHENS, Paregoric.

SOPHIO, Opium.

SOPOR. A profound sleep, from which the person can be roused with difficulty. It is a symptom in many of the neuroses.

SOPOR CAROTICUS, Carus.

SOPORARIÆ ARTERIÆ, Carotida.

SOPORATIVUS, Somniferous.

SOPORIFERUS, Somniferous.

SOPORIFIC, Somniferous.

SOPOROUS, So'porus, from sopor, 'sleep.' Sleepy: causing sleep.

SORA, Essera.

SORB TREE, Sorbus domestica.

SORBASTRELLA, Pimpinella saxifraga.

SORBIFA'CIENT, Sorbefaciens, from sorbere, 'to suck in,' and facere, 'to make.' A remedy that promotes absorption.

The following are the chief sorbefaciens:—Acida Vegetabilia; Alkalia; Ammoniacum; Brominum; Galbanum; Hydrargyri Præparata; Iodinum; Liquor Calci chloridi; Spongia usta; Compression, (methodical;) Friction; Mental Sorbefaciens, (Imagination, Emotions.)

SORBETHUM, Sherbet.

SORBETTUM, Sherbet.

SORBETUM, Sherbet.

SORBIER DES OISELEURS, Sorbus asparia.

SORBITIO, Jus.

SORBITIO CARNIS seu EX CARNE. Broth or soup made of meat.

SORBITUM, Jus.

SORBUM, see Sorbus domestica.

SORBUS, Cratægus aria, S. domestica.

SORBUS ACUPA'RIA, seu Aucupa'ria, Mee'pilus, M. acupa'ria, Mountain Service, Mountain Ash, Quicken tree, Roan tree, (F.) Sorbier des Oiseleurs. The berries of this tree are employed for similar purposes as the last.

SORBUS ALPINA, Cratægus aria—s. Aria, Cratægus aria—s. Aucuparia, S. acuparia—s. Cydonia, Pyrus cydonia.

SORBUS DOMESTICA, Sorbus, Pyrus domestica, Mee'pilus domestica, Oie, Service or Sorb Tree, (F.) Cormier. Family, Rosacæ. Sex. Syst. Icosandria Trigynia. The fruit of this tree, *Sorbium*, is astringent, and has been recommended in diarrhœa and dysentery. It is given in the form of rob. A kind of cider is made from it, and also brandy.

SORBUS MALUS, Pyrus malus.

SORDES, Rhypos. A dirty-looking sanies, discharged from ulcers. Also, accumulations of the secretions of the mouth, on the teeth in adynamic fevers more especially, and of foul matters in the stomach—*Sordes prim'arum riarum, Rhyppa'ria.* The French call an ulcer, exhibiting such an appearance, *sordid*. Also dirt of any kind.

SORDES, Ichor, Saburra — s. Acidæ, Acidities — s. Aurium, Cerumen — s. Primarium viarum, Embarras gastrique, see Sordes — s. Ventris, Excrement.

SORDICULÆ AURIUM, Ceramen.

SORE, Ulcer.

SORE, BAY. A disease which Mosely considers to be a true cancer. It is endemic in the Bay of Honduras.

SORE MOUTH, Stomatitis — s. Clergyman's, Pharyngitis, follicular — s. Gangrenous, Cancer aquaticus — s. Inflammatory, Cynanche tonsillaris — s. Putrid, Cynanche maligna — s. Throat, Cynanche — s. Throat, tubercular, Pharyngitis, follicular — s. Throat, ulcerous, Cynanche maligna.

SORENESS, from Teut. *seer*, (G.) *Sehr*, 'very,' Sax. *ƿap*, *Parapsis acris teneris* do. Painful uneasiness or tenderness, local or general, on being touched with a pressure that does not usually excite distressing feeling. Often, a febrile symptom. Also, the tenderness of a wound, ulcer, &c.

SORGHUM, *Panicum Italicum*.

SOROCCO, Puna.

SOROCHE, Puna.

SORORIA'TIO. The period at which the breasts of the female become developed. The act of becoming thus developed. A young maiden, whose mammae begin to show, was formerly called *sororians virgo*. — Plautus.

SORREL, COMMON, *Rumex acetosa* — s. French, *Rumex scutatus* — s. Garden, *Rumex scutatus* — s. Mountain, *Oxalis acetosella*, *Oxyria reniformis* — s. Salt of, Potass, oxalate of — s. Roman, *Rumex scutatus* — s. Tree, *Andromeda arborea* — s. White, *Oxalis acetosella* — s. Welsh, *Oxyria reniformis*.

SOSTRUM, improperly *Sotrum*; from *σωζωω*, 'to save.' A reward given to one who saves the life of another. A physician's fee or *honorarium*.

SOTERIA DOCTRINA, *Medicina*.

SOTERIAE AQUÆ, Waters, mineral.

SOTIREL'LA. Ancient name of a medicine composed of *opium*, several *narcotics*, nutmeg, saffron, camphor and *soot*. It was used in certain diseases of the teeth.

SOTRUM, *Sostrum*.

SOUBRESAUT, *Subsultus tendinum*.

SOUCHERLOON, Bit noben.

SOUCHET DES INDES, *Curcuma longa* — s. *Odorant*, *Cyperus longus* — s. *Rond*, *Cyperus rotundus*.

SOUCI, *Calendula officinalis*, *Panophobia* — s. *des Champs*, *Calendula arvensis* — s. *Ordinaire*, *Calendula officinalis*.

SOUDE, Soda — s. *Acétate de*, Soda, acetate of — s. *Aéré*, *Sodæ carbonas* — s. *Borate de*, *Borax* — s. *Borate saturé de*, *Borax* — s. *Carbonate de*, *Sodæ carbonas* — s. *Cautique*, Soda caustica — s. *à la Chaux*, Soda Caustica — s. *Chlorure de*, Soda, chloride of — s. *du Commerce*, Soda — s. *Orayene*, *Sodæ carbonas* — s. *Effervescente*, *Sodæ carbonas* — s. *Hypoanifite de*, Soda, hyposulphite of — s. *Phosphate de*, Soda, phosphate of — s. *et de Potasse*, *Tartrate de*, Soda, tartrate of — s. *Pure*, Soda caustica — s. *Sousborate de*, *Borax* — s. *Sous-carbonate de*, Soda, subcarbonate of — s. *Sulfate de*, Soda, sulphate of.

SOUFFLÉ, see *Murmur*, respiratory — s. *Amphorique*, see *Cavernous respiration* — s. *Métallique*, see *Cavernous respiration* — s. *Placentaire*, *Bruit placentaire* — s. *Tubaire*, see *Murmur*, respiratory — s. *Utérin*, *Bruit placentaire* — s. *Voilé*, see *Cavernous respiration*.

SOUFRE, Sulphur — s. *Iodure de*, *Sulphuris iodidum* — s. *Sublimé*, *Sulphur sublimatum*.

SOUND, *Specillum*, *Stylus*, *Exploratorium*, *Radiolus*, (F.) *Sonde*. An instrument used by surgeons to discover whether there be a stone in the bladder. It is usually made of highly polished steel, and is shaped like the catheter. The operation is termed *sounding*.

The French *Sonde* has, however, a more extensive signification. It means different instruments introduced into cavities of certain organs, or into wounds, fistulas, &c., to investigate their condition, or to fulfil some therapeutical indication. See *Sonde*.

SOUND, *Sonus*, *Echos*, *Noise*, (F.) *Son*, *Bruit*. The sensation produced on the auditory nerve by the vibrations of a sonorous body. Sounds may be propagated in three modes. 1. By *reciprocation* or *consonance*, as when a sounding body, of

a definite pitch, produces a musical tone when another body of the same pitch is sounded near it. 2. By *resonance*, as when a sounding body is placed in connection with another, one or more of whose parts may be thrown into reciprocal vibration; and 3. By *conduction*, as where the vibrations are transmitted through fluid, liquid, or solid media.

SOUND, Catheterize, S. *Auricular*, *Apyromele* — s. *Bellows*, *friction*, *rasp*, *saw*, *lancet*, &c., see *Bruit* — s. *Crumpling*, *pulmonary*, *Froissement pulmonaire* — s. *Laryngeal*, *Laryngeche*.

SOUNDING, Searching, see *Sound*.

SOUNDNESS OF MIND, *Sanity*.

SOUPIR, Sigh.

SOUR BERRY, see *Oxyacantha Galeni*, *Vaccinium oxycoccos* — s. *Dock*, *boreal*, *Oxyria reniformis* — s. *Leaf*, *Andromeda arborea* — s. *Tree*, *Andromeda arborea* — s. *Wood*, *Andromeda arborea*.

SOURCIL, *Supercilium*.

SOURCILIER, *Corrugator supercillii*, *Superciliary*.

SOURDS MUETS, see *Mutitas surdorum*.

SOURIS, *Nictation*.

SOUS-ACROMIO-CLAVI-HUMÉRAL; *Deltoïd* — s. *Alloïdien*, *Subaltoïdeus* — s. *Azoidien*, *Subaxoïdeus* — s. *Clavier*, *Subclavius* — s. *Costaux*, *Intercostal* — s. *Cutané*, *Subcutaneous* — s. *Épineux*, *Infra-spinatus* — s. *Lingual*, *Sub-lingual* — s. *Maxillaire*, *Submaxillary* — s. *Marillo-Labial*, *Depressor anguli oris* — s. *Mental*, *Submental* — s. *Métacarpo-latéri-phalangien*, *Prior annularis* — s. *Optico-sphéno-scléroticien*, *Rectus inferior oculi* — s. *Orbitaire*, *Suborbitar* — s. *Pubio-coccygien*, *Levator ani* — s. *Pubio-crétii-tibial*, *Gracilis* — s. *Pubio-pré-tibial*, *Gracilis* — s. *Pubio-trochantérien-externe*, *Obturator externus* — s. *Pubio-trochantérien-interne*, *Obturator internus* — s. *Scapulaire*, *Subscapularis* — s. *Scapulo-trochinnien*, *Subscapularis* — s. *Sels*, see *Salt*.

SOUTHERNWOOD, *Artemisia abrotanum* — s. *Field*, *Artemisia campestris* — s. *Maritime*, *Artemisia maritima* — s. *Tartarian*, *Artemisia santonica*.

SOWBREAD, *Arthanita*, *Cyclamen*.

SOWENS, *Plummary*.

SOY, see *Dolichos soja*.

SOYMIDA, *Swietenia febrifuga*.

SPA, MINERAL WATERS OF. A town seven leagues southeast of Liége, where there are several springs, possessing a sharp acidulous taste; containing much carbonic acid, carbonates of iron, lime, and magnesia; carbonate of soda, and chloride of sodium. The water is much used as a tonic.

SPA WATER, ARTIFICIAL. *Sodæ subcarb.*, gr. vij; *magnesiæ carbon.*, ℥j; *limat. ferri.*, gr. iij; *sodii chlorid.*, gr. j; *aqua*, Oij. Impregnate with gas from *marble powder* and *sulph. acid.*, ʒʒ ℥x.

SPACE, INTERPEDUNCULAR, *Tarini pons* — s. *Perforated*, *anterior*, *Locus perforatus anterior* — s. *Perforated*, *posterior*, *Tarini pons*.

SPADO, *Castratus*, *Eunuch*, *Spasm*.

SPAGYRIA, *Chymistry*.

SPAGYRISTS, from *σπαω*, 'I separate,' and *αγυρω*, 'I assemble;' because they reduced compounds into elements, and formed the latter into compounds (?). A sect of physicians, who pretended to account for the changes that occur in the human body in health and disease, in the same manner as the chymists of their day explained those of the inorganic kingdom. — *Medici'na Paracelsica* seu *Spagyrica*, was likewise called *Hermética*, because it was believed that the

means of cure adopted in it had been found in the books of Hermes.

SPANÆMIA, from *σπῆμα*, 'poor,' and *αἷμα*, 'blood.' Poverty of the blood. Diminution in the quantity of fibrin and red corpuscles of the blood,—as where bleeding has been carried beyond certain limits.—Simon.

SPANÆMIC, *Spanæmicum* (remedium), *Dysplasticum*, *Plastilyticum et erethilyticum*, *Hæmatolyticum*, *Dyscrasiacum*. Same etymon as the last. Relating to spanæmia.

A medicine whose protracted use is said to impoverish the blood,—as iodine, bromine, &c.

SPANDARAPUM, *Sparadrappum*.

SPANISH FLY, *Cantharis*.

SPANOPOGON, from *σπῆμα*, 'rare,' and *πῶγος*, 'beard.' One who has lost his beard, or has a thin beard.

The Greeks called those who had little beard, or who had lost it, *Spanopogones*.

SPARADRAPA, *Sparadrappum*.

SPARADRAPIER. The name of a machine for spreading sparadraps. A *Plaster machine*. It consists of a table, with two raised pieces, movable, and furnished with points, by which the cloth can be stretched, and of a lamina or blade of metal to extend the plaster over it.

SPARADRAPUM, *Sparadrappa*, *Sparadrappus*, *Tela emplastica*, *Spandrapum*, (F.) *Sparadrapp*. Any adhesive plaster spread upon linen or paper. The chief sparadraps are the following:—

SPARADRAPPUM ADHÆSIVUM, *Adhæsive Plaster*. A spread plaster of the *Emplastrum adhæsivum*. It is also called *Strapping*.

English Court Plaster is a Sparadrapp, (F.) *Taffetas agglutinatif*, *T. gommé*, *Tuffetas d'Angleterre*; *Sericum Anglicum*, *Emplastrum Anglicum*, *E. Anglicanum*, *E. Adhæsivum Woodstockii*, *E. Ichthyocolia tela inductum*, *E. Glutinatum*, *Tela Ichthyocolia glutinans*, *Isinglass Plaster*. It is made by stretching black silk, and brushing it over with a solution of isinglass ℥j, in proof spirit ℥xij, to which tinct. benzoin ℥ij, are added. When dry, this is repeated five times; after this, two coats are given it of a solution of tereb. Chia ℥iv, in tinct. benz. ℥vj, which render it less liable to crack.

Liston's Isinglass Plaster is made by spreading several coats of strong solution of isinglass in weak spirit over oiled silk, or, still better, over animal membrane previously prepared for the purpose from the peritoneal coat of the cæcum of the ox.

SPARADRAPPUM PRO FONTICULIS, *Issue Plaster*, is sometimes made of *simple diachylon*, ℥ij; *Burgundy pitch* and *sarcocolla*, each ℥iv; *common turpentine*, ℥j. Spread upon linen and polished with a moistened calendering glass rubber.

SPARADRAPPUM seu TELA GALTERI, *Defensive Plaster*, (F.) *Toile de Gautier*. This is made of olive oil, ℥ss; *suet*, ℥iv; *wax*, ℥x; *litharge*, *common turpentine*, *thua*, and *mastic*, ʒ℥ ℥ij; *bole armeniacæ*, *flour*, ʒ℥ ℥j. Pour it, while liquid, upon cloth, and spread. Used for issues and to keep on dressings.

SPARADRAPPUM VESICATORIUM. Several substances have been introduced as substitutes for blistering plaster, (see *Emplastrum Lyttae*.) under the names, *Tela vesicatoria*, *Blistering Tissue*, &c., and other forms of which are the *Taffetas vesicant*, *Papier épispastique*, *Charta vesicatoria*, *Taffetas épispastique*. They are made of an ethereal or alcoholic extract of cantharides, or of cantharidin, mixed with wax and spread, in a very fine layer, on silk or paper previously oiled or waxed. They are efficient agents.

SPARADRAPPUM VIRIDE, *Corn Plaster*. This may be made of *yellow wax*, ℥ij; *Burgundy pitch*, ℥xij; *common turpentine*, ℥vj; *verdigris*, ℥ij; spread on cloth and polished.

Kennedy's Corn Plaster is made of *yellow wax*, ℥ij; *Venice turpentine*, ℥ij; *verdigris*, ℥j.

SPARADRAPPUS, *Sparadrappum*.

SPARAGMA, *Laceration*.

SPARAGMOS, *Spasm*.

SPARAGUS, *Asparagus*.

SPARALIUM, *Olyster uterina*. An injection into the vagina.—Ruland and Johnson.

SPAREDIA. A ligature covered with the white of egg.—Paracelsus.

SPARGANIUM RAMOSUM, *Great Burreed*. Indigenous; *Order*, Typhaceæ; flowering in July and August. The roots are substrigent, but esulent; yielding a fine fecula, similar to salep. They are sometimes made into a poultice for inflamed mammae.

SPARGANON, *Sparaganum*, from *σπάγγω*, 'I swathe,' 'I wrap.' 'Swathing clothes,' a kind of bandage, with which children were formerly surrounded.—Fœsius. Also, a fascia.

SPARGANOSIS, *Spargoria*, *Intumescen'tia lactea mamma'rum*, *Mastodyn'ia polygala*, from *σπάγγω*, 'I am ready to burst.' Extreme distention of the breasts by milk. Sparganosis also means the wrapping of a child in swathing clothes.

SPARGANOSIS PUERPERARUM, *Phlegmatia dolens*.

SPARGANUM, *Sparganon*.

SPARROWGRASS, *Asparagus*.

SPARSUS, *Sporadic*.

SPARTIUM JUNCEUM, *Spanish broom*.

A small European shrub, cultivated in the gardens of the United States, on account of its yellow flowers. The seeds are diuretic and tonic, in small doses; emetic and cathartic in large. They have been used in dropsy—10 or 15 grains three times a day.

SPARTIUM SCOPARIUM, *Cytisus scoparius*, *Genista*, *G. scoparia*, *Genista hirsuta*, *Broom*, *Cytisogenista*, (F.) *Géné d'Isaï*. *Family*, Leguminosæ. *Sex. Syst.* *Diadelphia Decandria*. *Broom Tops*, *Spartii Cucumina*, *Scoparius*, (Ph. U. S.) have a bitter taste, and are possessed of diuretic properties. They have been used in dropsy. Dose, of the powder, ℥j to ℥j. All the geniste have similar virtues. A decoction of geniste, along with the cauterisation of the pustules under the tongue, has been recommended in hydrophobia.

SPARTIUM TINCTORIUM, *Genista tinctoria*.

SPASM, *Spasmus*, *Sparagmos*, *Synol'sé*, *Spasmo*, from *σπῆμα*, 'I draw.' The Greeks gave this name to all kinds of convulsions. It is now usually applied to involuntary muscular contractions; and these, again, have been divided into *tonic spasm*, *Paraton'ia*, which consists in permanent rigidity and immobility of the muscles that are the seat of it (see *Tetanus*); and *clonic spasm*, which consists in alternate contractions and relaxations (see *Convulsion*).

Cullen has a class, *Spasmi*—the *neurospasmi* of Fuchs.

SPASM, CLONIC, *Convulsion*—s. *Cynic*, see *Canine laugh*—s. of the *Glottis*, *Asthma thymicum*—s. of the *Larynx*, *Asthma thymicum*—s. with *Rigidity*, *Tetanus*.

SPASM, WRITERS'. Involuntary spasms of the muscles of the thumb and index finger, observed, at times, in those who are much accustomed to writing. See *Cramp*, *writers'*.

SPASMATICUS, *Spasmodicus*.

SPASMATODES, *Spasmodicus*.

SPASME, DE LA GLOTTE ET DU THO-

R. II. Asthma thymicum — *s. de la Vessie*, Cysto-
spasmus.

SPASMI, see Spasm.

SPASMODES, Convulsive.

SPASMODIC, Spasmodicus.

SPASMOL'OGY, *Spasmol'og'ia*, from *σπασμο*,
spasm, and *λογος*, 'a treatise.' A treatise on
spasms.

SPASMOLYGMUS, Singultus.

SPASMOT'ICUS, *Spasmodicus*, *Spasmodicus*,
Spasmodicus, *Spasmodicus*. Any thing relat-
ing to spasm. Also, an antispasmodic.

Morbi contracti'orii, *M. spasmodici*, &c., are
diseases accompanied with spasm.

SPASMUS, Convulsion. Spasm — *s. Aurium*.

Otalgia — *s. Caninus*, see Canine laugh — *s. Cloni-*
cas, Convulsion — *s. Cynicus*, see Canine laugh —
s. Facialis, Tic — *s. Glottidis*, Asthma thymicum
— *s. Linguae*, Glossospasmus — *s. Maxillae inferioris*,
Trismus — *s. Muscularis*, Cramp — *s. Muscularum*
Faciei, Canine laugh — *s. Universalis*, Syn-
clonus — *s. Ventriculi*, see Cardialgia — *s. Vesicae*,
Cystospasmus.

SPAS'NIA, same etymon as Spasm. A term
used by Mercurialis, to designate the lancinating
pain produced, at times, in the chest by violent
fits of coughing.

SPASTIC, Spasmodicus, Tonic spasm.

SPASTICUM, Tetanic.

SPATHA, Hypalepiron.

SPATHES'TER, from *σπασ*, 'I draw.' (?) A
surgical instrument, used for drawing the prepuce
over the glans, when too short. — P. Amman.

SPATHOMELE, Spatula.

SPATHULA, Scapula, Spatula — *s. Fœtida*,
Iris foetidissima.

SPATHYEMA FŒTIDA, Dracontium fetidum.

SPAT'ILE, *σπαρτλος*, 'human excrement.' A
liquid fecal evacuation. Excrement. — Hippo-
crates.

SPATIUM ORIS, Mouth — *s. Trigonum*, Lyra.

SPAT'ULA, *Spathula*, diminutive of *Spatha*,
σπαθην, 'a broad-sword.' *Spathomele*, *Spicillum*
latum. An instrument used for spreading plas-
ters, stirring ointments, holding down the tongue,
&c. Also, the scapula.

SPATULA PRO ORB, Glossopatha.

SPEARWORT, Ranunculus flammula.

SPEAUTER, Zinc.

SPECIES, Powders, compound — *s. Aromaticæ*,
Pulvis cinnamomi compositus — *s. Diacinnamo-*
mi, *Pulvis cinnamomi compositus* — *s. Diaerete*,
Pulvis cretæ compos. — *s. Diagalapæ*, *Pulvis jal-*
apæ compositus — *s. Diambræ sine odoratis*, *Pul-*
vis cinnamomi compositus — *s. Diatragacanthæ*
frigidae, *Pulvis tragacanthæ compositus* — *s. Hieræ*
pierræ, *Pulvis aloës cum canellâ* — *s. Latifcantes*
Rhazis, *Pulvis cinnamomi compositus* — *s. e Scor-*
dio cum opio, *Pulvis cretæ compositus cum opio*
— *s. e Scordio sine opio*, *Pulvis cretæ compositus*.

SPECIF'IC, *Specificus*, from *species*, 'a form
or fashion,' and *facere*, 'to make.' A substance
to which is attributed the property of removing,
directly, one disease rather than any other. Prob-
ably no such remedy exists. Mercury in syphi-
lis, and sulphur in the itch, have been regarded
as the strongest examples.

SPECIFIC OF HERRENSCHWAND. A once cele-
brated German vermifuge. It is said to have
consisted of 10 grains of Gamboe, with 20 of
Carbonate of Potassa. It is affirmed, that mer-
cury and arsenic have also been found in it. —
Paris.

SPECIFICUM PARACELSI, Potassæ sul-
phas.

SPECIL'UM, *Melè*, *Stylus*, *Exploratorium*,
from *specio*, 'I examine,' *Specularium*, a probe,

F. *Stylus*, *Stylus*. A surgical instrument, em-
ployed for examining wounds, fistulas, and for
passing setons, &c. It is usually formed of sil-
ver; and is terminated, at one end, by an olive-
shaped button. The *eyed probe* has an aperture
at the other extremity.

SPECILLUM, Evericulum, Hypalepiron, Sound
— *s. Auricularium*, Apyromele — *s. Cereum*, *Rou-*
que — *s. Excavatum*, *Stylus excavatus* — *s. Latum*,
Spatula — *s. Minus*, *Melitis*.

SPECLARION, Specillum.

SPECTACLES, from *spertare*, 'to behold,'
Conspectivus, (F.) *Besels*, *Luette ordinaires*,
Converres. Glasses to assist the sight: arranged
so as to be adapted to both eyes. These glasses
are more or less *convex* or *concave*, according as
the sight is more or less short, (*hyperopic*) or long,
(*presbyopic*). When the glass is adapted to one
eye, it is called an *Eyglass*, *Conspectivum*, *Per-*
spicillium, *Vitrum oculari*.

SPECULARIS LAPIS. A transparent mine-
ral, but of what nature is not clear, which was
formerly employed in epilepsy. In old times it
was used for glass. — Pliny.

SPECULUM, *Catop'ter*, *Catop'tron*, *Diop'tron*.
In Latin, 'a mirror;' from *specio*, 'I see.' In
surgery, it means different instruments for dilat-
ing cavities, and facilitating their examination.
See Dilator. There are various instruments of
this kind, — the *S. Ani*, *S. Auris*, *S. Vaginae*,
(*Colporhynchus*, *Egystroungator*) *S. Matricis*, *S.*
Oculi, *S. Oris* (F.) *Baillon*, *S. Gutturis*, *S.*
Vesicae.

SPECULUM CITRINUM, Orpiment — *s. Indicum*,
Ferri limatura — *s. Lucidum*, *Septum lucidum* — *s.*
Oris, *Glossocatochus* — *s. Veneris*, *Achillea mille-*
folium.

SPECUS, Vulva — *s. Cordis*, Ventricle of the
Heart — *s. Pro medulla spinali*, see Vertebral col-
umn — *s. Vertebralis*, see Vertebral column.

SPEDALSKE, see Radzyge.

SPEDALSKHED, see Radzyge.

SPEECH, Voice, articulated.

SPEECHLESSNESS, Mutitas.

SPEEDIMAN'S PILLS, see Pilule aloës et
myrrha.

SPEEDWELL, BROOKLIME, *Veronica beca-*
bunga — *s. Female*, *Antirrhinum elatine* — *s. Offi-*
cial, *Veronica* — *s. Pur-lain*, *Veronica peregrina*
— *s. Water*, *Veronica becabunga*.

SPELTRUM, Zincum.

SPERAGUS, Asparagus.

SPERM, from *σπερμα*, 'I sow.' *Spermatio*
fluid or *liquor*, *Seminal fluid*, *Seed*, *Semen*, *S.*
civile seu *masculinum* seu *genitale*, *Seminalium*,
Genitale, *Medulla*, *Rytidina*, *Ros*, *Sanguis*, *Ser-*
rum, *Humor genitalis* seu *seminalis* seu *vene-*
reus, *Urina genitalis*, *Genitura*, *Sperma*, *S.*
civile, *Spermium*, *Tho'ri*, *Tho'rus*, *Lac muris*,
Lagna, *Lagna*, *Lagna*, *Germen*, *Male's*
milk, *Propagatory* or *genital liquor*, *Vitalè vir-*
rus, *Vital* or *quickening virus*, (F.) *Semenec*, *Flu-*
ide seminal. A whitish, viscid fluid, of a peculiar
smell, secreted by the testicles, whence it is car-
ried by the vasa deferentia to the vesiculae semi-
nales, to be thrown into the vagina, during co-
ition, through the ejaculatory ducts and the ure-
thra. It is the fecundating fluid, and must come
into actual contact with the germ of the female.
The *Aura seminalis*, *Gonorrhœa*, is incapable of ef-
fecting fecundation. The semen, at the time of
emission, is composed of two different fluids: the
one liquid and transparent, which is considered
to be the secretion of the prostate, — the other,
white, and as thick as mucilage; the product of
the testicular secretion. The sperm contains, ac-
cording to Vauquelin, 900 parts of water, 50 of
animal mucilage, 10 of soda, and 30 of calcareous

phosphate. The animal matter is peculiar, and by some termed *spermatin*.

Microscopic observations show that it contains *spermatozo'a*, or more properly *spermatozo'ide*; for their animalcular nature is not demonstrated. They are produced in cells—*sperm-cells*—and have probably no more title to be considered animalcular, than the cilia of the ciliated epithelium. By careful examination, other minute, round, granulated bodies may almost always be detected, which are in all cases much less numerous than the spermatozoa. These bodies are the *seminal granules*, *gran'ula sem'inis*. Pure sperm, in its most perfect state, consists principally of spermatozooids and seminal granules; both of which are enveloped in a small quantity of fluid, *liquor sem'inis*.

It has been imagined, but erroneously, that during coition there is a secretion of female sperm—*Semen mulie'bre*, *Thelyg'onum*. The increased secretion that takes place is chiefly from the glands of Duverney.

Sperm also means spermaceti.

SPERM CELL, see Sperm.

SPERMA, Sperm—s. Mercurii, Hydrargyrus acetatus.

SPERMA RANA'RUM, *Spermi'ola* seu *Sperni'olum* seu *Spermi'ola* seu *Spermi'olum rana'rum*. Frog's spawn. Once used in medicine.

SPERMACETI, Cetaceum—s. Whale, see Cetaceum.

SPERMACRASIA, Spermatorrhœa.

SPERMATACRASIA, Spermatorrhœa.

SPERMATACRATIA, Spermatorrhœa.

SPERMATIC, *Spermat'icus*, *Semina'tis*, *Sem'inal*. That which relates to the sperm. A name given to different parts connected with the organs of generation.

SPERMATIC ARTERIES, *A. Spermat'icæ*, *A. præparan'tes*, (F.) *Artères testiculaires*, *A. de l'ovaire* (Ch.), are two in number—one on each side—and arise from the sides of the aorta, sometimes from the renal arteries. They descend, almost vertically, at the sides of the vertebral column, and are distributed differently in the two sexes. In man, the spermatic artery, situate at the side of the vas deferens, issues by the abdominal ring; gives numerous ramifications to the spermatic chord, and divides into two fasciculi of branches, one of which goes to the testicle,—the other to the epididymis. In the female, the spermatic artery, *ova'rian artery*, dips into the pelvis, and passes to the ovarium, Fallopian tube, and round ligament.

SPERMATIC CHORD, *Testicular Chord*, *Funic'ulus Spermaticus*, *Corpus varico'sum*, (F.) *Cordon spermaticus* ou *testiculaire*. The vascular and nervous chord, by which the testicle is suspended. It is composed of the spermatic artery and veins; of other small vessels; of lymphatics; of nervous filaments from the spermatic plexus, and from the genito-crural branch of the lumbo-abdominal plexus; of the vas deferens, and, very often, of a fibro-cellular chord, which unites the peritoneum to the upper part of the tunica vaginalis, and in which encysted hydrocele of the spermatic chord occurs. All these parts are united together by a very lax, areolar tissue, and surrounded by coats, which, reckoning from without, are:—1. The skin and areolar membrane. 2. A fibro-cellular membrane, formed by the fascia superficialis. 3. A very thin layer, formed by fibres of the cremaster muscle, united archwise before, and often also behind, the chord. 4. The proper sheath of the spermatic vessels, or the tubular prolongation furnished by the fascia transversalis to the chord, on a level with the superior orifice of the inguinal canal. The spermatic

chord is commonly shorter on the right side than on the left; and of a different size in different individuals. It ascends, almost vertically, from the superior margin of the testicle as far as the lower orifice of the inguinal canal; passes through this canal and enters the abdomen, crossing the epigastric artery. Here it forms an evident elbow, directing its course backward. At this part, also, the organs composing it separate from each other:—the vas deferens descending into the pelvis to pass behind the bladder;—the blood-vessels and lymphatics ascending towards the lumbar region, &c.

SPERMATIC FLUID, Sperm.

SPERMATIC GANGLION. A large ganglion, formed by branches from the hypogastric ganglion, and from the spermatic plexus. It supplies the fundus uteri. Besides these ganglia, Dr. Robt. Lee describes *ves'ical* and *rag'inal ganglia*, and anterior and posterior *subperitone'al ganglia* and *plexuses*, which communicate with the preceding, and constitute an extensive nervous rete over the entire uterus.

SPERMATIC LIQUOR, Liquor, Sperm.

SPERMATIC PASSAGES OR WAYS, *Vie Spermaticæ*, are the canals concerned in the excretion of semen.

SPERMATIC PLEXUSES OF NERVES, *Plexus testiculares*, are two in number, and are furnished by the renal plexuses. Their filaments, called *Spermatic nerves*, follow the arteries of the same name to the testicle in man; and to the ovary and Fallopian tube in the female,—*ova'rian nerves*. They cannot be traced into the substance of these organs.

SPERMATIC VEINS are two or three in number, on each side. They accompany the spermatic artery, and open—those of the right, into the vena cava inferior; those of the left, into the corresponding renal vein. These veins form, above the testicle, a kind of venous network, called, by some, the *Spermatic Plexus*; and another plexus before the psoas muscle, called the *Corpus pampini'forme*.

SPERMATIN, see Sperm.

SPERMATIS'MUS, *Emis'io sem'inis*, from *σπερμα*, 'sperm.' The emission of sperm.

SPERMATOCE'LE, *Hernia semina'lis scroti*, *Oscococ'elè semina'tis*, *Gonococ'elè*, from *σπερμα*, 'sperm,' and *κύλη*, 'a tumour.' The ancients gave this name to certain swellings of the testicle which were regarded as produced by an accumulation of sperm in the organ. Also, varicocele.

SPERMATOCLEMMMA, see Pollution.

SPERMATOCLEPSIS, see Pollution.

SPERMATOCYSTIDORRHAG'IA, *Coulorrhag'ia ejaculato'ria*, *Hæmatu'ria ejaculato'ria*, *H. semina'lis*, from *σπερμα*, *σπερμαρος*, 'sperm,' *κυστις*, 'bladder,' and *ρῆγν*, 'a breaking forth.' A discharge of blood from the urethra, or the act of ejaculation of sperm.

SPERMATODES, Gonoides.

SPERMATOGON'IA, *Spermogon'ia*, *Spermotopæ'ia*, *Spermato'pō'is*, *Spermi'am*, from *σπερμα*, 'sperm,' and *γενναω*, 'to beget.' The preparation or secretion of sperm.

SPERMATOID, Gonoides.

SPERMATOLEPSIS, see Pollution.

SPERMATOLIPSIS, see Pollution.

SPERMATOL'OGY, *Spermatolog'ia*, from *σπερμα*, 'sperm,' and *λογος*, 'a discourse.' A treatise on sperm.

SPERMATOPH'OROUS, *Seminif'erous*, from *σπερμα*, 'sperm,' and *φέρω*, 'I carry.' Sperm-bearing. The cells or granules in the sperm have been so called.

SPERMATOPŒIA, Spermato'gonia.

SPERMATOPOESIS, Spermatogonia.

SPERMATOPOETIC, Spermatopœus.

SPERMATOPOËTUS, *Spermatopœit'icus*, *Spermatopœit'icus*, *Spermatopœit'icus*, *Spermatopœit'icus*, *Gonepœus*, *Gonepœit'icus*, *Gonepœit'icus*, from *σπέρμα*, 'sperm,' and *ποιέω*, 'to make.' Food, to which has been attributed the property of augmenting the secretion of semen; and, consequently, of exciting the venereal act. Very succulent and very nutritious substances have been so considered.

SPERMATORRHŒA, *Spermorrhœa*, *Spermacrasi'a*, *Spermatozœmia*, *Spermatacrasi'a*, *Gonacrasi'a*, *Gonacrat'i'a*, *Spermatacrati'a*, *Gonorrhœa vera*, (F.) *Flux de Sperme*, *Pollutions*, *Pertes séminales*; from *σπέρμα*, 'sperm,' and *ρῆσις*, 'I flow.' An emission of sperm, without copulation. See Gonorrhœa, and Pollution.

SPERMATORRHŒA ATONICA, *Gonorrhœa laxorum*.

SPERMATOSCHESIS, from *σπέρμα*, 'sperm,' and *σχέσις*, 'retention.' Retention or suppression of the spermatio secretion.

SPERMATOZEMIA, *Spermatorrhœa*.

SPERMATOZO'A, *Zooper'mata*, from *σπέρμα*, 'sperm,' and *ζωον*, 'animal.' *Zoöpermes*, *Spermatozœire*, *Spermatozœids*, *Animal'cula seminaria* seu *epermat'ica*, *Vermiculi spermatici*, *Seminal filaments*, *Spermatic* or *seminal animalcules* (?). Reputed animalcules seen in the sperm; by most physiologists supposed to be the formative agents in generation. See Sperm.

SPERMATOZOAIRES, *Spermatozoa*.

SPERMATOZOIDS, *Spermatozoa*.

SPERMIOLOM RANARUM, *Sperma ranarum*.

SPERMIMUM, Sperm, Spermatogonia.

SPERMOBOLE, see Ejaculation, *Spermatismus*.

SPERMOEDIA CLAVUS, Ergot.

SPERMOGONIA, Spermatogonia.

SPERMORRHŒA, *Spermatorrhœa*.

SPERNIOLOM RANARUM, *Sperma ranarum*.

SPEWING, Vomiting.

SPHACELATION, Mortification.

SPHACÈLE, *Sphacelus* — s. de la Bouche, Cancer aquaticus.

SPHACELIA SEGETUM, see Ergot.

SPHACELISMUS, *Sphacelus* — s. Cerebri, Phrenitis.

SPHAC'ELUS, *Gangrœna Sphacelus*, *Sphacelis'mus*, *Cold mortification*, (F.) *Sphacèle*, *Gangrène froide*, from *σφαζω*, 'I slay.' This word is used, by some, synonymously with gangrene; by others, with gangrene when it occupies the whole substance of a limb. Commonly, it means the disorganized portion, in cases of mortification, *anthraconecro'sis*, which must be thrown off—or is, in other words, totally dead. The foul disorganized portion of an ulcer—called the *slough*—must be considered a kind of sphacelus.

Sphacelus was formerly used to denote excessive pain; and for agitation from excessive pain, or violent emotion.

SPHACELUS CEREALIS, Ergotism — s. Nosocomialis, Hospital gangrene.

SPHÆRA, Pila — s. Marina, Pila marina — s. Thalassia, Pila marina.

SPHÆRANTHUS INDICUS, Adaca.

SPHÆRIDION, Piliula.

SPHÆRION, Globule, Piliula.

SPHÆROCEPHALA ELATIOR, Echinops.

SPHÆROCOCCUS CRISPUS, *Fucus crispus* — s. Helminthochortus, *Corallina Corsicana* — s. *Lichenoides*, *Fucus amytaeus*.

SPHÆRULÆ SANGUINIS, Globules of the blood.

SPHAGE, Throat.

SPHENDONE, Funda.

SPHENOID, *Sphenoid'ides*, *Sphenoid'ides*, *Sphenoid'ides*, *Sphenoid'alis*, from *σφην*, 'a wedge,' and *ειδος*, 'resemblance.' Wedge-shaped. Hence,

SPHENOID BONE, *Sphenoides os*, *Ossa basilare* seu *cuneifor'me* seu *cu'neo comparat'um* seu *sphenoid'ale* seu *multifor'me* seu *azygos* seu *papillare* seu *polymor'phon* seu *paxillare* seu *basillare* seu *alafor'me* seu *sphœcoï'des* seu *vepsifor'me* seu *inconjugat'um*, *Pterygoid bone*. An azygous bone, situate on the median line, and at the base of the cranium. It articulates with all the other bones of that cavity; supports them, and strengthens their union. Its form is singular, and resembles a bat with its wings extended. It has, 1. An inferior or guttural surface, on which is situate the crista, that joins the vomer; a channel, which concurs in forming the pterygo-palatine foramen; the pterygoid process; the pterygoid fossa; the scaphoid depression; the Vidian or pterygoid canal; the foramina—ovale, spinale, &c. 2. A superior or cerebral surface, on which are:—the clinoid processes; the pituitary fossa; the foramina (ovale, rotundum, and spinale); the *Apophysis of Ingrassias* or lesser wing; the foramen opticum, &c. 3. An occipital or posterior surface, which is articulated with the basiliary process of the occipital bone. 4. An anterior or orbitarnasal surface; having, anteriorly, a crista to unite with the ethmoid bone; and, on each side, a round aperture, which leads into two cavities in the substance of the bone, separated by a middle septum, and called the *sphenoidal sinuses*. 5. Two *zygomato-temporal* or *external surfaces*, which correspond to the temporal and zygomatic fossæ.

Some divide the sphenoid into *body* or *middle portion*; and *ala*, which are four in number, and are subdivided into *great* (*Temporal Plates* or *Wings*) and *little* (*Apophyses of Ingrassias*). The *Sphenoid suture* surrounds the bone.

SPHENOID, SPINOUS PROCESS OF THE, *Sphenoid spine*.

SPHENOID'AL, *Sphenoid'alis*. That which belongs or relates to the sphenoid bone.

SPHENOIDALIA COR'NUA, (F.) *Cornu's sphenoidaux*, *Cornets de Bertin*; *Ossic'ula Berti'ni*, *Ossa triangul'aria*, *Pyramide of Wistar*. Two small, thin, and curved bones, situate between the sphenoid and ethmoid, with which they are confounded in the adult. They have the shape of a hollow pyramid, with the base turned backwards; and are developed by a single point of ossification. They are articulated with the sphenoid, ethmoid, palate bone, and vomer.

SPHENOIDAL or SUPERIOR ORBITARY FISSURE, *Foramen lac'erum superius*, (F.) *Fente sphenoidale*, is a large fissure, situate between the great and little ala of the sphenoid. It is seen at the upper and back part of the orbit between which and the cranium it is a means of communication.

SPHENOIDAL SPINE, (F.) *Épine sphenoidale*, *Spinous Process of the Sphenoid*;—1. A projecting crista at the inferior surface of the sphenoid-bone, for articulation with the vomer. 2. A triangular process, *Apophyse sous-temporale* (Ch.), met with near the posterior margin of the same bone, behind the foramen spinale. At the point of the spinous process, a *styloid process* is frequently met with.

SPHENOIDES, Cuneiform, Sphenoid — s. *Ossa*, Sphenoid bone.

SPHENOMAXILLARY, *Sphenomaxillaris*. That which relates to the sphenoid and maxillary bones.

SPHENOMAXILLARY FISSURE, *Inferior orbitar*

Figure 7. Fente sphenomaxillaris or spheno-maxillaris (called *fenestra sphenomaxillaris* by *F. Cassin*) is a fissure situated at the posterior part of the angle formed by the union of the sphenoid and ethmoidal parietes of the orbit. It is a cleft, bounded above by the sphenoid bone below by the superior maxillary and palatine bones and closed by the nasal bone. It is narrower at the middle than at the extremities, and forms a communication between the orbital cavity and the sphenoidal fossa.

SPHENO-MAXILLARY FISSURE is a name given by some anatomists to a depression at the union of the sphenomaxillary and pterygomaxillary fissures.

SPHENOID BITAR. A name given by Bérard to the anterior part of the body of the sphenoid bone, which is developed by a variegated surface of spongy structure.

SPHENOPALATINE, *spheno-palatineus*. That which relates to the sphenoid and palatine bones.

SPHENOPALATINE ARTERY, *Arteria sphenopalatina*. *A.* is the terminal part of the inferior maxillary. It enters at the posterior part of the superior meatus of the nose, through the sphenopalatine foramen, and spreads its numerous branches on the primary membrane covering the septum, the conchæ, and the meatus.

SPHENOPALATINE FORAMEN is a round aperture, formed by the vertical portion of the sphenoid and the sphenoid. It establishes a communication between the nasal fossæ and the sphenoidal fossa.

SPHENOPALATINE GANGLION, *Ganglion of Meckel*, *Sphenoidal G. Ch.* A small, nervous, cordiform, or triangular ganglion, of variable size, situate without the foramen sphenopalatinum, in the pterygomaxillary fissure. It seems suspended by several nervous filaments to the trunk of the superior maxillary nerve, and gives off internal or sphenopalatine filaments, inferior or palatine filaments, and a posterior filament, which is the *Vidian* or *pterygoid nerve*.

SPHENOPALATINE NERVES, *Lateral nasal nerves*, arise from the ganglion—just described—at its inner part, and enter the nasal fossæ by the sphenopalatine foramen. They are five or six in number, and distribute their filaments to the outer and inner parietes of the nasal fossæ. One of the most remarkable branches is the *Naso-palatine*.

SPHENOPALATINUS, *Levator palati*.

SPHENOPARIETAL, *Spheno-parietalis*. That which belongs or relates to the sphenoid and parietal bones.

SPHENOPARIETAL SUTURE is formed by the articulation of the extremity of the greater ala of the sphenoid with the anterior and inferior angle of the parietal bone.

SPHENO-PTERYGO-PALATINUS, *Circumflexus*—*s.* *Salpingostaphylinus*, *Circumflexus*—*s.* *Salpingo-mallian*, *Laxator tympani*.

SPHENOSIS, see *Wedged*.

SPHENOSTAPHYLINUS, *Levator palati*.

SPHENOTEMPORAL, *Spheno-temporalis*. That which belongs to the sphenoid and temporal bones.

SPHENOTEMPORAL SUTURE is the suture at the articulation of the great ala of the sphenoid bone with the squamous portion of the temporal. Bérard gives the name *sphenotemporal* to the posterior part of the body of the sphenoid, which is developed by distinct points of ossification.

SPHIX, *Wasp*.

SPHINCTER, *Constrictor*, *Musculus constrictorius*, from *σφινγω*, 'I constrict.' A name given to several annular muscles, which constrict or close certain natural openings.

50

SPHINCTER ANI, *Analis* or *Ani*. Many anatomists have described two sphincter muscles of the anus—1. The *Sphincter ani, Sup. et int.*, *Sphincter ani, Superior et inferior*, *Constrictor ani, Superior et inferior*. It is situate around the anus, is elliptical, from before to behind, flattened, and pierced at its middle by the fibres of the concentric area, which are attached, behind, to the extremity of the coccyx, and a lesser areolar substance; and are continued anteriorly, with the bulbocavernosus and transversus perinei muscles. This muscle contracts and closes the anus. 2. The *inferior* or *internal sphincter ani*, *Sphincter intestinalis* of Winslow, is by many anatomists considered as the termination of the circular fibres of the rectum. It is annular, and situate around the inferior extremity of the rectum, to the extent of about a finger's breadth. It has the same uses as the other.

SPHINCTER GULÆ, *Constrictores pharyngis*—*s.* *Lat. Bœhmii*, *valve of the Intestinalis*, *Sphincter intestinalis*—*Lat. Fran.* *Orbicularis orocæli*, *Constrictor palato-pharyngæus*—*s.* *Palato-pharyngæus*, *Constrictor palato-pharyngæus*—*s.* *Pylori*, see *Pylorus*—*s.* *Vannæ*, *Constrictores cunni*—*s.* *Vertricht. Pylorici*.

SPHINCTER VESTIGÆ, *Sphincter of the bladder*. Some anatomists have given this name to whitish, elastic, and circular fibres, which surround the neck of the bladder, but do not constitute a particular muscle. Morgagni has given the name *Pseudo-Sphincter* to the anterior fibres of the levator ani, which pass beneath the neck of the bladder, and, by their contraction, close that opening. See *Compressor urethræ*.

SPHONDYLIIUM, *Hæraclæum spondylium*.

SPHONGUS, *Spongia*.

SPHRAGIDONYCHARGOCOMETIA, from *σφραγις*, 'a seal,' *οὐχ*, 'the nail,' *αγυος*, 'white,' or perhaps *αργυρος*, 'silver,' and *κομητις*, 'I adorn.' A charlatan who adorned his fingers to the very nails with rings.—Aristophanes, Hippocrates.

SPHYGMA, *Pulse*.

SPHYGMICA ARS, *Sphygmia art*, from *σφυγμος*, 'the pulse.' The art of judging by the pulse, in health or disease.

SPHYGMICA DOCTRINA, *Sphygmologia*.

SPHYGMICUS, *Throbbing*.

SPHYGMOCEPHALUS, *Crotaphæ*.

SPHYGMODES, *Throbbing*.

SPHYGMOLOGIA, *Sphygmica Doctrina*, from *σφυγμος*, 'the pulse,' and *λογος*, 'a description.' The doctrine of the pulse.

SPHYGMOMETER, *Pulsilegium*.

SPHYGMOS, *Pulsation*, *Pulse*.

SPHYGMOSCOPIUM, *Pulsilegium*.

SPHYRA, *Malleolus*.

SPHYXIS, *Pulsation*.

SPIC, *Lavendula*.

SPICA, *Fascia repens*, the *Spica bandage*. (*F.*) *Épi*. A bandage so called in consequence of its somewhat resembling a spike of barley. The turns of the bandage cross like the letter V:—each leaving a third of the roller uncovered. It is distinguished into *ascending* and *descending*. It may be applied over various parts of the body, and in a different manner in each case: thus, there is the *Spica seu Fascia inguinalis*, *Spica inguinalis duplex*, the *spica* for the shoulder, and another for the thumb.

SPICA, *Lavendula*.

SPICA ALPINA, *Valeriana Celtica*—*s.* *Celtica*, *Valeriana Celtica*—*s.* *Indica*, *Nardus Indica*—*s.* *Nardi*, *Nardus Indica*.

SPICEBERRY, *Gaultheria*, *Laurus Benzoin*.

SPICEBUSH, *Laurus Benzoin*.

SPICES, FOUR, see *Myrtus pimenta*.
SPICEWOOD, *Laurus Benzoin*.
SPICILLUM, *Speicillum*.
SPIDER, see *Aranes tela*.
SPIDERWORT, *Liliago*, *Tradescantia Virginica*.
SPIGELIA, *S. Marilandica*.
SPIGELIA MARILAN'DICA, *Anthel'mia*, *Spige'lia Lonie'era*, *Lonie'era Marilan'dica*, *Peren'nial Wormgrass* or *Indian Pink*, *Caroli'na Pink*, *Star-bloom*, *Wormroot*. *Nat. Ord.* Gentianæ. *Class.* Pentandria. *Order.* Monogynia. Indigenous. The root—*Spigelia* (Ph. U. S.)—is celebrated as an anthelmintic, particularly in cases of lumbrici.
 It is, also, asserted to have been found serviceable in remittent fever. It is a narcotico-acrid. *Dose*, gr. x to ʒss.
SPIGNEL, *Æthusa meum*.
SPIKENARD, *Conyza squarrosa*, *Nardus Indica*—s. American, *Aralia racemosa*—s. Small, *Aralia nudiculis*—s. Tree, *Aralia spinosa*.
SPILANTHES ACMELLA, *Spilanthus acmella*.
SPILANTHUS ACMEL'LA, *S. citia'ta* seu *fmbr'ita*, *Spilan'thes acmel'la*, *Bidens acmella*, *Acmella*, *Acemella*, *A. Mauritiana*, *Verbes'ina acmella*, *Balm-leaved Spilanthus*. *Family.* Compositæ. *Sex. Syst.* Syngenesia Polygamia æqualis. This plant possesses a glutinous, bitter taste, and fragrant smell. The herb and seed are said to be diuretic and emmenagogue. They have been used in dropsies, jaundice, fluor albus, and calculous complaints; given in infusion.
SPILANTHUS, BALM-LEAVED, *Spilanthus acmella*—s. *Ciliata*, *S. acmella*—s. *Fimbriata*, *S. acmella*.
SPILANTE'US OLERA'CEUS, *Spear-leaved Spilanthus*, (F.) *Cresson de Para*. A tincture of the plant has been recommended in toothach.
SPILL, see *Nævus*.
SPILOMA, see *Nævus*.
SPILLOSIS, *Epicichrosia*—s. *Ephelis*, *Ephelides* s. *Poliosis*, *Poliosis*.
SPILSBURY'S ANTISCORBUTIC DROPS. An empirical preparation, formed of *hydrarg. oxymer.*, *rad. gentian.*, *cort. aurant. sicc.* ʒʒ; *antimon. crud.*, *santal. rubr.* ʒʒ; *spiritus vini rectific.*, *aquæ*, ʒʒ viij.
SPINA, 'a thorn'; *Spine*, (F.) *Épine*. A process on the surface of a bone, which has been compared to the spines or thorns on certain vegetables. The chief processes of this name are:—the *nasal spine*, the *spine of the scapula*, the *spine of the ischium*, the *four iliac spines*, the *palatine spine*, the *maxillary*, the *sphenoid*, &c. The *spine of the back* is the collection of vertebræ constituting the *vertebral column*.
SPINA, Penis—s. *Acida*, *Oxycantha Galeni*—s. *Ægyptiaca*, see *Acacia gummi*—s. *Alba*, *Carduus marianus*, *Mespilus oxycantha*, *Onopordum acanthium*—s. *Bifida*, *Hydrorachis*—s. *Cervina*, *Rhamnus*—s. *Domestica*, *Rhamnus*—s. *Dorsi*, *Vertebral column*, see *Nasus*—s. *Dorsi introrsum Flexa*, *Lordosis*—s. *Ferrea*, *Pin*—s. *Helmontii*, *Aiguillon*—s. *Hirci*, *Astragalus verus*—s. *Infectoria*, *Rhamnus*—s. *Nodosa*, *Rachitis*.
SPINA VENTOSA, *Spinæ ventos'ita*, *Tere'do*, *Fungus Artic'uli*, *Ostiarthro'acæ*, *Tumor fungo'sus artic'uli*, *Lup'ia juncturæ*, *Hyperspon'gia*, *Flatus spinæ*, *Arthro'acæ*, *Pedarthro'acæ*, *White Swelling* (of bone), *Siderat'io Ossis*, *Cancer Ossis*, *Gangræ'na Ossis*, *Erosio'nis*. A term of no definite meaning, as is obvious from these various words having been considered its synonyms. By some, it is defined to be—a disease of the osseous system, in which the texture of the bone dilates, seeming to be distended with air, and constituting a variety of osteo-sarcoma. By others, it is

considered to be a tumour arising from an internal cavity of a bone; occurring most frequently in the carpus or tarsus. The term itself is a translation from the Arabic of Rhazes. See, also, *Hydrarthrus*, and *Mollities Ossium*.

SPINA VERTEBRALIS, *Vertebral column*.

SPINACH, *Spinacia*.

SPINACHIA, *Spinacia*.

SPINA'CIA, *Spinacia*, *Spinacia olera'cea*, *Spin'age*, *Spinach*, (F.) *Épinard*. *Family.* Atriplicæ. *Sex. Syst.* Dicoeca Pentandria. A plant which resembles the cabbage in its dietetic powers. The leaves boiled, with the addition of oil, form a good emollient cataplasm. It has been used in phthisical complaints; but its medicinal properties, if it have any, are not now regarded.

SPINACIA OLERACEA, *Spinacia*.

SPINÆ, *Spinous processes*—s. *Ventositas*, *Spina ventosa*.

SPINAGE, *Spinacia*.

SPINAL, *Spina'lis*, *Spino'sus*, *Spina'tus*, (F.) *Épinière*, from *spina*, 'the spine.' That which relates to the vertebral column.

SPINAL ARTERIES are two in number, viz: 1. The *posterior spinal*, *Artère médiane postérieure du Rachis*, (Ch.) It arises from the vertebral, near the corpora pyramidalia, and descends on the posterior surface of the spinal marrow, distributing its ramifications to it. 2. The *anterior spinal artery*, *A. médiane antérieure*, (Ch.) is larger than the last, and arises, also, from the vertebral. It descends, in a serpentine manner, upon the anterior surface of the marrow; furnishes ramusculi to it, and unites with that of the opposite side, opposite the foramen magnum occipitis. A very tortuous branch arises from this union, which descends as far as the inferior extremity of the marrow, to which it sends numerous divisions.

The term *Spinal Arteries* or *Rachidian Arteries* is also given, in the abstract, to all the arteries of the spinal marrow and vertebral canal. The same may be said of the veins and nerves.

SPINAL CORD, *Medulla spinalis*.

SPINAL FORAM'INA, (F.) *Trous rachidiens*, in the abstract, are the foramina formed by every two contiguous vertebræ, through which the spinal nerves issue. See *Vertebral*. The term *Foramen Spina'le* is especially applied, however, to a small foramen, in front of the spinous process of the sphenoid bone, through which the middle artery of the dura mater enters the cranium. It is, likewise, called *Foramen epheno-spinosum*, (F.) *Trou Sphéno-épineux* ou *petit rond*, *Trou épineux*.

SPINAL IRRITATION, *Rhachialg'ia*, *Rhachial'gia*, *Neural'gia spina'lis*, *Notal'gia*. A modern pathological view, which refers most nervous diseases to irritation of the spinal cord. This irritation is presumed to be indicated by tenderness on pressure over the spinous process of one or more vertebræ, or over the nerves proceeding from the cord and distributed to the parts at the sides of the spine. Such tenderness, however, by no means indicates the pathological condition in question, as it is often met with in those enjoying perfect health. The treatment advised is cupping and counter-irritation on each side of the spine, which may be beneficial in such diseases, no matter what part of the frame may be in a morbid state, by exciting a new and revelent impression on a very sensible portion of the cutaneous surface.

SPINAL NERVE, *Accessory of the Par vagum* or *8th pair*, *Accessory nerve of Willis*, *Spinal Accessory*, *Spino-cranio-trapæzien*, *Superior res'piratory N.*, *Eleventh pair of encephalic nerves*, *Trachélo-dorsal* (Ch.), arises from the medulla spi-

malis, within the vertebral canal, between the anterior and posterior roots of the cervical nerves at a greater or less distance from the cranium. The roots unite to form the nerve, which ascends into the cranium through the foramen magnum of the occipital bone, and issues by the foramen lacerum posterius, crossing the sterno-cleido-mastoideus, to which it gives filaments, and losing itself entirely on the trapezius muscle. The pneumogastric and spinal accessory nerves together—*nervus vagus cum accesso'rio*—resemble the spinal nerves; the former, with its ganglion, being the posterior root; the latter, the anterior.

SPINAL NERVES, Vertebral nerves—s. Prolongation, Medulla spinalis.

SPINAL SYSTEM OF NERVES, see Nerves.

SPINALES COLLI MINORES, Interspinales colli—s. et Transversales lumborum, Transversalis dorsi.

SPINALIS CERVICIS, Semi-spinalis colli—s. Colli, Semi-spinalis colli.

SPINALIS DORSI, *Grand épineux du dos*, *Spinalis Dorsi major*. Winslow calls thus some fleshy fascioli, which are situate on the lateral surfaces of the spinous processes; from the third dorsal vertebra to the first or second lumbar; and which form part of the transverso-spinalis of most authors. The same anatomist calls—*Spinalis Dorsi minor*, *Petit épineux du dos*—some small, fleshy fibres, situate on each side of the interspinal ligament. They are short, flat, and pass from one spinous process to the other. Like the preceding, they form part of the transverso-spinalis. All these fleshy fascioli strengthen the vertebral column.

SPINATI, Interspinales colli.

SPINATUS, Spinal.

SPINDLE TREE, *Euonymus Americanus*.

SPINE, Vertebral column—s. Curvature of the, Gibbositas—s. Hæmal, Sternum—s. Neural, Spinous process.

SPINI-AXOIDO-OCCIPITALIS, *Rectus capitis posticus major*—s. *Axoido-trachelii-atloidien*, *Obliquus inferior capitis*.

SPINITIS, Myelitis.

SPINO-DORSITIS, Myelitis.

SPINOLA, see *Hydrorachis*.

SPINOSUS, Spinal.

SPINOUS, *Spino'sus*, (F.) *Épineux*. Having the shape of a spine or thorn.

SPINOUS PROCESSES or APOPHYSES of the *Vertebra*, *Acan'tha*, *Spina*, *Cynol'ophoi*, *Neural Spines* of Mr. Owen, (F.) *Apophyses epineuses*, are situate at the posterior part of each vertebra, and afford attachment to the muscles, whose office it is to extend the spine. See *Vertebra*.

SPIRACULA, (F.) *Spiracules*, from *spiro*, 'I breathe.' Respiratory pores of the skin.

SPIRÆ CEREBRI, Convulsions, cerebral.

SPIRÆA DENUATA, *S. ulmaria*.

SPIRÆA FILIPENDULA, *Filipendula*, *Sarif'raga rubra*, *Dropwort*, (F.) *Filipendule*. Family, Rosaceæ. *Sec. Syst.* Icosandria Pentagynia. The root of this plant is said to possess astringent and lithontriptic virtues.

SPIRÆA TOMENTOSA, *Hardhack*, *Red meadow-sweet*, *Steeple bush*, *Rosey bush*, *White leaf*. This indigenous species, which is abundant in the northern States of the Union, is tonic and astringent; and is usually administered either in the form of extract or decoction, (*Spirææ* Zss; *aque* Oj.)

SPIRÆA TRIFOLIATA, *Gillenia trifoliata*.

SPIRÆA ULMARIA, *S. denudata*, *Ulmaria*, *U. palustris*, *Reg'na Prati*, *Barba capræ*, *Meadow Sweet*, *Queen of the Meadows*, *Bar'bula capri'na*, (F.) *Ulmair*, *Reine des Près*. The leaves have

been recommended as mild astringents:—the

flowers as antispasmodics and diaphoretica.

SPIRAMENTA PULMONUM, see *Palma*.

SPIRAMENTUM ANIMÆ, *Palma*.

SPIRAMINA PALPEBRARUM, *Lachrymal puncta*—s. *Pulmonum*, see *Palma*.

SPIRATIO, Respiration.

SPIRIT, *Spir'itus*; from *spirare*, 'to exhale.'

(F.) *Esprit*. A name given to every liquid product of distillation. Spirits were formerly distinguished into—*inflammable*, *acid*, and *alkaline*; and consequently a number of substances were crowded together, which often resembled each other in no other property than in being volatile. The term is now confined to alcoholic liquors, of which the following are the chief:

Arrack. Distilled from coarse palm sugar, named jaggery, fermented with the bark of the *Mimosa leucophlea*; also from rice and the fermented juice of the Palm; made in India. Its varieties are:—

1. *Makwah Arrack*. Made in India from the flowers of the Madhuca tree, *Bassia butyracea*.

2. *Tuba*. Made from palm wine, in the Philippine Islands.

Araka. Distilled, by the Tartars, from koumis, fermented mares' milk.

Araki. Distilled from dates, by the Egyptians.

Arika. A variety of koumis, distilled from fermented mares' milk, in Tartary and Iceland.

Brandy. Distilled from wine, figs, peaches, persimmon, apple, mulberries, and sometimes other fruits, in Europe, Asia, North and South America, wherever wine is made. The best brandy is that of Cognac; the next, that of Bordeaux and Rochelle. The varieties are—

1. *Aguardiente*, (S.) In Peru, the common brandy obtained from grapes is the *Aguardiente de Pisco*, so called, because shipped at the port of Pisco. Another kind, much dearer, and of excellent flavour, is made from Muscatel grapes, and is called *Aguardiente de Italia*. It is sometimes seen in the United States.

2. *Lau*. Made from rice, in Siam.

3. *Rakia*. Made in Dalmatia from the husks of grapes mixed with aromatics.

4. *Rosolio*. Made at Dantzic, from a compound of brandy, rossolis, and other plants.

5. *Troster*. Made on the Rhine, from the husks of grapes, fermented with barley and rye.

6. *Sekis-kayarodka*. Made from the lees of wine and fruit at Seio.

Genera Hollands, (*genièvre*, French for juniper.) Distilled from malted barley and rye, rectified on juniper berries, in Holland. Its variety is—

Gin. Made in England, from malted barley, rye, potatoes; rectified with turpentine.

Goldwasser. Distilled at Dantzic, from wheat, barley, and rye, rectified with aniseed, cinnamon, and other spices.

Kirschwasser. Distilled from the Malaché cherry, in Switzerland.

Maraschino. Distilled from the *Maraschia* cherry, at Zara, the capital of Dalmatia.

Rum, (supposed to be derived from the terminal syllable of the word *saccharum*: but the aboriginal Americans call this liquor *Ram*.) Distilled, in the West Indies and South America, from cane-sugar and molasses, and in North America from maple-sugar. Its variety is—

Slatkaia trava. Made in Kamschatka, from a sweet grass.

Show-choo. Distilled, in China, from the lees of mandarin, a wine made from boiled rice.

Whisky, (supposed to be derived from *uisge*, the first two syllables of *uisgebhagh*, the original name in Ireland.) Distilled, in Scotland and Ire-

land, from malted and raw barley, rye, oats, and potatoes; and in the south of France, from sloes. In Ireland it was called *buil-ceann*, or madness of the head. The best Scotch whisky is *Glenlivet*, the best Irish, *Enniskowen*.

Y-wer-a. Distilled, in the Sandwich Islands, from the root of the Tee-root, baked, pounded, and fermented.

To these may be added an intoxicating liquor made by the Afghanistans, from ewes' milk; and that made in Kamschatka, from a species of mushroom, named *muchumer*.

SPIRIT OF ANISEED, *Spiritus anisi*.—s. Bathing, Freeman's, see *Linimentum saponis compos.*—s. Bathing, Jackson's, see *Linimentum saponis compos.*—s. Bezoardic of Bussius, see *Bussii spiritus Bezoarticus*.—s. Bone, *Liquor volatilis cornu cervi*.—s. of Burrhus, *Burrhi spiritus matricalis*.—s. of Carraway, *Spiritus carui*.—s. of Ether, aromatic, *Spiritus ætheris aromaticus*.—s. Fuming, of Beguin, *Ammonis sulphuretum*.—s. Fuming, of Boyle, *Ammonis sulphuretum*.—s. of Harts-horn, *Liquor cornu cervi*.—s. of Horseradish, compound, *Spiritus armoracis compositus*.—s. of Lavender, *Spiritus lavandulæ*.—s. of Lavender, compound, *Spiritus lavandulæ compositus*.—s. of Mindereus, *Liquor ammonis acetatis*.—s. of Nitre, sweet, *Spiritus ætheris nitrici*.—s. of Nitric ether, *Spiritus ætheris nitrici*.—s. of Pennyroyal, *Spiritus pulegii*.—s. of Peppermint, *Spiritus menthæ piperitæ*.—s. Proof, *Spiritus tenuior*.—s. of Salt, *Muriaticum acidum*.—s. of Sourvygrass, golden, see *Spiritus armoracis compositus*.—s. of Spearmint, *Spiritus menthæ viridis*.—s. of Sulphuric ether, *Spiritus ætheris sulphurici*.—s. of Sulphuric ether, compound, *Spiritus ætheris sulphurici compositus*.—s. of Turpentine, *Oleum terebinthinæ rectificatum*.—s. Verdigris, *Aceticum acidum*.—s. of Vitriol, *Sulphuric acid*.—s. of Wine and camphor, *Spiritus camphoræ*.

SPIRITS, ANIMAL, Nervous fluid.

SPIRITUOUS, Alcoholic.

SPIRITUS, Breath, Life, Respiration, Spirit—s. *Ætheris nitrosus*, *Spiritus ætheris nitrici*.—s. *Ætheris vitriolicus*, *Spiritus ætheris sulphurici*.

SPIRITUS ÆTHERIS AROMATICUS, *Æther Sulphuricus cum Alcoho'le aromaticus*, *Elix'ir vitrioli dulcè*, *Sweet Elix'ir of Vitriol*, *Viga'ni's Elix'ir of Vitriol*, *Aromatic Spirit of Ether*. (*Cinnam. cort. contus. ʒij. cardam. sem. contus. ʒiss. piperis longi fruct. cont., singib. rad. concis., sing. ʒj. spiritus ætheris sulphurici. Oj.* Macerate, for 14 days, in a stopped glass vessel and strain. *Ph. L.*) It is used as a stimulant in nervous affections. Dose, $fʒss$ to $fʒj$.

SPIRITUS ÆTHERIS NITRICI, *Sp. Ætheris nitrosi*, *Sp. nitri dulcis*, *Sp. Ætheris nitrosus*, *Sweet Spirit of Nitre*, *Nitre drops*, *Æther nitricus alcoholisatus*, *Spirit of Nitric Ether*. (*Nitrate of Potassa*, in coarse powder, $ʒij$, *Sulphuric acid*, $ʒi$; *Alcohol*, $oixss$; *Diluted Alcohol*, Oj ; *Carbonate of Potassa*, $ʒj$. Mix the nitrate of potassa and the alcohol in a large glass retort, and having gradually poured in the acid, digest with a gentle heat for two hours; then raise the heat, and distil a gallon. To the distilled liquor add the diluted alcohol and carbonate of potassa, and again distil a gallon.—*Ph. U. S.*) It is refrigerant, diuretic, antispasmodic, and diaphoretic. Dose, $gtt. xxv$ to $fʒj$. Specific gravity, 0.834.

SPIRITUS ÆTHERIS SULPHURICI, *Æther Sulphuricus cum Alcoho'le*, *Liquor Ætheris Sulphuricus*, *Spiritus Vitrioli dulcis*, *Spiritus Ætheris vitriolici*, *Liquor Sulphuricus alcoholisatus*, *Spirit of Sulphuric Ether*. (*Æther. sulphuric. Oss; sp. rec. Oj. Mix. Ph. L.*) Stimulant,

diaphoretic, diuretic, and antispasmodic. Dose, $fʒss$ to $fʒij$.

SPIRITUS ÆTHERIS SULPHURICI COMPOSITUS, (*Ph. U. S. 1842*), *Sp. ætheris vitriolici compositus*, *Spiritus Ætheris compositus* (*Ph. U. S. 1851*), *Liquor anodynus Hoffmanni*, *Compound Spirit of Sulphuric Ether*, *Hoffmann's Anodyne Liquor*. (*Æther Sulphuric. Oss; Alcohol, Oj; Ol. Ether. ʒij. Ph. U. S. Ph. L.*) *Mix.* A stimulant and antispasmodic. Specific gravity, 0.816.

SPIRITUS ÆTHERIS VITRIOLICI COMPOSITUS, *Spiritus ætheris sulphurici. comp.*

SPIRITUS AMMONIÆ, *Alkali ammoniacum spirituosum*, *Alcohol ammoniacum*, *Sp. salis ammoniaci*, *Ammoniacæ alcoholisata*, *Liquor ammoniaci vino'sus*, *L. ammoniac spirituosus*, *Lixivium ammoniacalè vino'sum*, *Spiritus salis ammoniaci vino'sus seu dulcis seu dulcificatus*, *Solutio subcarbonatis ammoniaci spirituosus*, (*F.*) *Esprit d'ammoniaque*. (*Ammon. muriat. in pulv. subtilissim., calcis, aa ʒij; alcohol. fʒxx; aquæ, fʒix.* The water is employed to slake the lime; the muriate of ammonia is then well mixed with it, and by means of heat, the ammonia is made to pass into the distilled water contained in a quart bottle. *Ph. U. S.*) Stimulant and antispasmodic. Dose, $fʒss$ to $fʒj$.

SPIRITUS AMMONIÆ AROMATICUS, *Alcohol ammoniacum aromaticum*, *Aromatic ammoniacated Alcohol*, *Sal volat'ile Drops*, *Spiritus salis volat'ilis oleosus*, *Sp. volatilis aromaticus*, *Sal volatile oleosum Sylvii*, *Sp. ammoniac compositus*, *Tinctura aromatica ammoniacata*, *Liquor oleosus Sylvii*, *Lixivium ammoniacalè aromaticum*. (*Ammon. muriat. ʒv; Potass. carb. ʒviiij. cinnam. cont. caryophyll. cont.aa ʒij; Limon. cort. ʒiv; alcohol., aquæ aa, Ov. M.* Distil *Ovijs*. Stimulant. Dose, $fʒss$ to $fʒj$.)

SPIRITUS AMMONIÆ COMPOSITUS, *Spiritus aromaticus*.

SPIRITUS AMMONIÆ FÆTIDUS, *Sp. volat'ilis fætidus*, *Fit Drops*, *Alcohol ammoniacum fætidum*, *Tinctura acasfetida ammoniacata*, *Fetid Spirit of Ammonia*. (*Sp. ammoniac Oij, acasfetida ʒij.* Macerate for 12 hours, and distil *Oiss*. *Ph. L.*) Stimulant and antispasmodic. Dose, $fʒss$ to $fʒj$.

SPIRITUS AMMONIÆ SUCCINATUS, *Succinated Spirit of Ammonia*, *Commun Eau de Luce*, *Ammoniacum succinatum*, *Aqua Lu'cia*, *Liquor ex Ammonia et Oleo Succini*, *Liquor ex'citans*, *Spiritus Ammoniac cum Succino*, *Sp. Salis Ammoniaci lactescens seu lacteus*. (*Mastic. ʒij, sp. rect. fʒix, ol. lavand, gtt. xiv, ol. succin. gtt. iv liq. ammon. fʒx.* Macerate the mastic in the alcohol, and pour off the clear tincture: add the rest and shake. *Ph. L.*) Stimulant and antispasmodic. Dose, $gtt. x$ to $fʒss$, or $fʒj$.

SPIRITUS ANIMALES, see Nervous fluid.

SPIRITUS ANISI, *Spiritus Anisi compositus*, *Aqua anisi fortis*, *Aqua Sem'inum Anisi composita*, *Spirit of Aniseed*, (*F.*) *Esprit d'anis*. (*Anisi sem. cont. ʒss, spirit tenuior. cong., aquæ quod satis sit ad prohibendum empyreuma. Ph. L.*) Carminative. Dose, $fʒss$ to $fʒss$. In the compound spirit, angelica is usually an ingredient.

SPIRITUS ANTHOS, *Spiritus rosmarini*.

SPIRITUS ARMORACIÆ COMPOSITUS, *Sp. Raphani compositus*, *Aqua Raphani composita*, *Compound Spirit of Horseradish*, (*F.*) *Esprit de raifort composité*. (*Armorac. rad. recent. concis., aurant. cort. exsicc., sing. ʒj, myrist. nuc. contus. ʒss, spirit. ten. cong. aquæ q. s. ad prohibendum empyreuma. Ph. L.*) Stimulant and antiscorbutic. (?) Dose, $fʒj$, to $fʒiv$.

The Golden Spirit of Scurey grass—an empirical preparation—is formed by adding gamboge $ʒviiij$, to one gallon of the *sp. armoracis compositus*.

Greenough's Tincture for the teeth, is formed of amygd. amar. ℥ij, lig. Bresil., cassia bacc., ʒʒ ℥iv, trid. Florent. ℥ij, coccinell., sal. acetosella, alum. ʒʒ ℥j, sp. vin. rect. Oij, sp. armoracia comp. fʒss.

SPIRITUS BEGUINI, Ammonis sulphuretum—s. Bellidis, see Osmitopsis asteriscoides.

SPIRITUS CAMPHORÆ, *Sp. camphora'tus*, *Sp. vinosus camphoratus*, *Tinctura Camphoræ*, (Ph. U. S.) Spirit of Wine and Camphor, Spirit of Camphor, (F.) Esprit de Camphre, Alcool camphré, Eau de Vie camphrée. (Camphor. ℥iv, alcohol. Oij. Dissolve.) Stimulant, anodyne and discutient. Used only externally.

SPIRITUS CARUI, *Sp. Cari Carui*, Spirit of Carraway, Aqua Seminum Carui fortis, A. Seminum Carui, Strong Carui Waters, (F.) Esprit de Carvi. (Carui sem. cont. Miss, sp. tenuior. cong., aqua q. s. Distil a gallon. Ph. L.) Carminative. Dose, fʒj to fʒss.

SPIRITUS CINNAMOMI, *Sp. Lauri Cinnamomi*, Spirit of Cin'namon, Aqua Cinnamomi fortis, Aqua Cinnam. spirituos'a, Strong Cinnamon Water, (F.) Esprit de Cannelle. (Cort. cinnam. ℥v, sp. rect. Oivss.) Stimulant and carminative. Dose, fʒj to fʒss.

SPIRITUS COLCHICI AMMONIAT'US, Ammoniated Spirit of Colchicum. (Sem. colchic. cont. ℥ij, sp. ammon. aromat. Oj. Ph. L.) Narcotic, cathartic, and diuretic. Used in gout, rheumatism, and dropsy. Dose, from grt. xxx to fʒj.

SPIRITUS CORNU CERVI, LIQUOR C. C.—s. Fumans Beguini, Ammonis sulphuretum—s. Genitalis, Aura seminis.

SPIRITUS JUNIPERI COMPOSITUS, Compound Spirit of Juniper, Aqua Juniperi composita, (F.) Esprit de genévre composé. (Ol. junip. ℥iss, Ol. carui, Ol. fenicul., ʒʒ ℥x; Alcohol dilut. cong. Solve. Ph. U. S.) Stimulant and diuretic. Dose, fʒj to fʒss.

SPIRITUS LAURI CINNAMOMI, Spiritus cinnamomi.

SPIRITUS LAVANDULÆ, *Sp. Lavandulæ spicæ*, Spirit of Lavender, Sp. Lavand. simpl., Lavender Water, (F.) Esprit de Lavande. (Lavand. recent. ℥ij, Alcohol. cong., aqua Oij. Distil a gallon.) Usually made by adding the oil to rectified spirit. Used as a perfume chiefly.

SPIRITUS LAVANDULÆ COMPOSITUS, *Tinctura Lavandulæ composita*, Red Hartshorn, Lavender drops, Compound Spirit of Lavender, (F.) Esprit de Lavande composé. (Sp. Lavand. Oij, sp. rosamarin. Oj, cinnam. contus. ℥j, myristic. cont. ℥ss. Caryophyll. cont. ℥ij, santali conc. ℥ij). Macerate for 14 days, and filter through paper. Stimulant. Dose, grt. xl to fʒij.

SPIRITUS LETHALIS, Carbonic acid—s. Lumbrocorum, Liquor volatilis cornu cervi.

SPIRITUS MENTHÆ PIPERITÆ, Spirit of Peppermint, Aqua Menthæ piperitidis spirituos'a, Sp. Menthæ piperitidis (F.) Esprit de Menthe poivrée. (Olei menth. pip. ℥vss, sp. rectif. Oivss, aqua, q. s. distil a gallon. Ph. L.) Carminative and stimulant. Dose, fʒss to fʒij.

SPIRITUS MENTHÆ SATIVÆ, Spiritus menthæ viridis.

SPIRITUS MENTHÆ VIRIDIS, Spearmint, Spiritus menthæ sativæ, Aqua Menthæ vulgaris spirituos'a, (F.) Esprit de Menthe verte. (Olei Menth. virid. ℥vss, sp. rectif. Oivss, ag. q. s. Distil a gallon. Ph. L.) Like the last in properties and dose.

SPIRITUS MILLEPEDARUM, Liquor cornu cervi.

SPIRITUS MYRISTICÆ, Spiritus Myristicæ Moschatæ, Sp. Nucis Moschatæ, Aqua Nucis Moschatæ, Nutmeg Water, Aqua Nephriticæ, (F.)

Esprit de Muscade. (Myrist. cont. ℥ij, Alcohol. dil. cong., aqua Oj. Distil a gallon.) Cordial and carminative. Dose, fʒj to fʒiv.

SPIRITUS MYRTI PIMENTÆ, Spiritus pimentæ—s. Nitri acidus, Nitric acid—s. Nitri dulcis, Spiritus ætheris nitrici—s. Nitri duplex, Nitric acid—s. Nitri fumans, Nitric acid—s. Nitri Glauberi, Nitric acid—s. Nitri simplex, see Nitric acid—s. Nitri vulgaris, see Nitric acid—s. Nucis moschatæ, Spiritus myristicæ—s. Ophthalmicus Mindereri, Liquor ammonis acetati.

SPIRITUS PIMENTÆ, *Sp. Myrti Pimentæ*, Spiritus Pimentis, Spirit of Pimento, Aqua Mirabilis. (Ol. Piment. f. ℥ij, Alcohol. dilut. cong. Solve. Ph. U. S.) Cordial and carminative. Dose, fʒj to fʒiv.

SPIRITUS PULEGII, Spirit of Pennyroyal, Aqua Pulegii spirituos'a, Spirituosus Pennyroyal Water, (F.) Esprit de Pouliot. (Olei pulegii ℥vij, sp. rect. Oivss, aqua, q. s. Distil a gallon. Ph. L.) Same as spirit of spearmint in properties and dose.

SPIRITUS PYRO-ACETICUS, Acetone.

SPIRITUS RECTIFICATUS, *Sp. Vini rectificatus*, *Enostagma*, *Enelamum*, *Pyrc'mum*, *Sp. Vinosus rectificatus*, *Alcohol*, *A. Vini*, Spirit of Wine, (F.) Esprit de Vin rectifié. Rectified spirit is much used in Pharmacy to dissolve resinous and other substances. It is seldom exhibited internally; although it exists in the diluted state in all vinous and spirituous liquors. Externally it is employed as a discutient.—S. g., according to the London Pharmacopœia, 0.838; according to that of Dublin, 0.840; of Edinburgh and United States, 0.835, (see Alcohol,) and of Paris, 0.819 to 0.827.

SPIRITUS RECTOR, Aroma—s. Raphani compositus, Spiritus armoraciæ compositus.

SPIRITUS ROSMARINI, *Sp. Rosmarini officinalis*, Spirit of Rosemary, Spiritus Anthos, Hungary Water, (F.) Esprit de Romarin. (Ol. rosmarini ℥iv, Alcohol. cong. Solve. Ph. U. S.) Stimulant. Dose, fʒj to fʒiv.

SPIRITUS SALIS ACIDUS seu FUMANS, Muriaticum acidum—s. Salis ammoniaci, Spiritus ammonis—s. Salis ammoniaci aquosus, Liquor ammonis—s. Salis ammoniaci lactescens seu lacteus, Spiritus ammonis succinatus—s. Salis ammoniaci sulphuratus, Ammonis sulphuretum—s. Salis Glauberi, Muriaticum acidum—s. Salis marini, Muriaticum acidum—s. Salis marini coagulatus, Potassæ murias—s. Salis volatilis oleosus, Spiritus ammonis aromaticus—s. Sulphurico-æthereus camphoratus, Tinctura ætheres composita—s. Sulphurico-æthereus martialis, Tinctura seu Alcohol sulphurico-æthereus ferri—s. Sulphuris, Sulphurous acid—s. Sulphuris per campanam, Sulphurous acid—s. Sulphuris volatilis, Ammonis sulphuretum—s. Sulphurous volatilis, Sulphurous acid.

SPIRITUS TENUIOR, Alcohol dilutum, Spiritus vinosus tenuior, Proof Spirit (F.) Esprit de vin délayé. Generally made for pharmaceutical purposes, by mixing equal parts of rectified spirit and water. S. g. Lond. 0.920; Edinb. and United States, 0.935. It is employed in the same cases as those in which the alcohol is used:—chiefly, as a solvent of vegetable matters, in the form of tinctures.

SPIRITUS VENERIS, Aceticum acidum—s. Vini rectificatus, Spiritus rectificatus—s. Vinosus camphoratus, Spiritus camphoræ—s. Vinosus tensor, Spiritus tenuior—s. Vitalis, Nervous fluid—s. Vitrioli, Sulphuric acid—s. Vitrioli acidus Vogelii, Sulphuricum acidum dilutum—s. Vitrioli coagulatus Mynsichti, Potassæ sulphas—s. Vitrioli dulcis, Spiritus ætheris sulphurici—s. Vitrioli phlogisticatus, Sulphurous acid—s. Volatilis

aromaticus, Spiritus ammoniæ aromaticus—s. Volatilis foetidus, Spiritus ammoniæ foetidus.

SPIROID CANAL, Aquæductus Fallopii.

SPIROM'ETER; badly compounded from *spiro*, 'I breathe,' and *μετρον*, 'a measure:'—properly *Anapnom'eter*, *Pneusom'eter*, *Pneumom'eter*, *Pneumatom'eter*. Any instrument for measuring the quantity of air concerned in respiration, and, consequently, the capacity of the lungs.

SPIROPTERA HOMINIS, see Worms.

SPISSANTIA, Incrassantia.

SPIT, Sputum.

SPIT'AL, MINERAL WATERS OF. The village of Spital is situate on the south side of the Tweed, near Tweedmouth. The springs there contain chloride of calcium, sulphate of soda, sulphate and carbonate of lime. They act as saline cathartics.

SPITH'AMA, *Dorans*. A measure of twelve fingers' breadth.

SPITTING, Exspuition.

SPITTLE, Saliva—s. Sweet, see Salivation.

SPLANCHNA, Entrails.

SPLANCHNECTOP'IA, *Splanchnodias'tasis*, *Situs perver'sus* seu *anom'alus intestino'rurum*; from *σπλαγγων*, 'an intestine,' *εκ*, 'out of,' and *τοπος*, 'place.' Misplacement or ectopia of the intestines.

SPLANCHNELMINTHA, Worms.

SPLANCHNEURYS'MA, from *σπλαγγων*, 'an intestine,' and *ευρυνω*, 'I dilato.' Morbid dilatation of the intestines.

SPLANCHNIC, *Splanchn'icus*, *Vis'ceral*, from *σπλαγγων*, 'viscus.' Relating or belonging to the viscera.

SPLANCHNIC CAV'ITIES are the three great cavities of the body;—those of the cranium, chest, and abdomen.

SPLANCHNIC NERVES belong to the great sympathetic, and are two in number on each side. They are distinguished into:—1. The *great splanchnic nerve*, (F.) *Grand splanchnal* (Ch.). Its roots—four or five in number, come from the 6th, 7th, 8th, 9th, and sometimes the 10th, thoracic ganglia. They descend inwards, on the sides of the vertebral column, beneath the pleura, and unite into a single trunk, which enters the abdomen through a separation of the fleshy fibres of the pillars of the diaphragm; passes behind the stomach, and divides into several branches, which pass into the semilunar ganglion. 2. The *lesser splanchnic nerve*, *Renal nerve*, (F.) *Splanchnique accessoire* of Walther, *Petit splanchnal*, (Ch.) is composed of two distinct branches, proceeding from the 10th and 11th thoracic ganglion, which unite on the 12th dorsal vertebra into a cord, that pierces the diaphragm singly; enters the abdomen, and divides into two branches, one of which anastomoses with the greater splanchnic nerve, whilst the other sends its filaments to the renal and solar plexuses.

SPLANCH'NICA. Medicines adapted to diseases of the bowels. Also, the 2d order of the class *Calicea* of Good; defined,—diseases affecting the collatitious viscera, and characterized by disquiet or diseased action in the organs auxiliary to the digestive process, without primary inflammation.

SPLANCHNODIASTASIS, Splanchnectopia.

SPLANCHNOD'YNE, from *σπλαγγων*, 'a viscus,' and *δύνη*, 'pain.' Pain in the bowels.

SPLANCHNOGRAPHIA, Splanchnography.

SPLANCHNOGRAPHY, *Splanchnogra'phia*, from *σπλαγγων*, 'a viscus,' and *λογος*, 'a description.' The part of anatomy which treats of the viscera.

SPLANCHNOLITHI'ASIS; from *σπλαγγων*, 'a viscus,' and *λίθος*, 'a stone.' The formation of a calculous concretion in any viscus.

SPLANCHNOL'OGY, *Splanchnolog'ia*, from *σπλαγγων*, 'a viscus,' and *λογος*, 'a discourse.' A treatise on the viscera:—also, Splanchnography.

SPLANCHNOPATHI'A, from *σπλαγγων*, 'a viscus,' and *παθος*, 'suffering.' A disease of the intestines.

SPLANCHNOSCLERO'SIS, from *σπλαγγων*, 'a viscus,' and *σκληρος*, 'hard.' Induration of a viscus.

SPLANCHNOT'OMY, *Splanchnotom'ia*, *Splanchnot'omē*, from *σπλαγγων*, 'a viscus,' and *τομω*, 'I cut.' Dissection or anatomy of the viscera.

SPLAYFOOT, see Kyllosis.

SPLEEN, *Lien*, *Hepar sinistrum* seu *adulte-ri'num*, (F.) *Rate*. A soft, spongy, parenchymatous organ; of a more or less deep violet red, situate deeply in the left hypochondrium, below the diaphragm, above the colon, between the great tuberosity of the stomach and the cartilages of the false ribs, and above and anterior to the kidney. Its ordinary length is $4\frac{1}{2}$ inches; its thickness 2; and its weight 8 ounces. Its parenchyma, which is bathed in blood, contains a multitude of grayish, soft, and semi-transparent granulations—*splenic corpuscles* or *Malpighian bodies* of the spleen. It is covered by a serous membrane, furnished by the peritoneum; and by a proper coat, of a fibrous nature, which is intimately united with it, and transmits into its interior delicate, solid, and very elastic prolongations—*trabeculae*. At its inner edge is a fissure, by which the vessels and nerves enter the organ. The functions of the spleen are unknown. One of the latest opinions is, that it belongs to the lymphatic system; and acts as a diverticulum to the vascular system.

SPLEEN, Hypochondriasis—s. Malpighian bodies of the, see Spleen—s. Supernumerary, *Lien-culus*.

SPLEENWORT, Asplenium, A. filix foemina, Asplenium scolopendrium—s. Bush, *Comptonia asplenifolia*.

SPLENAL'GIA, *Neural'gia lie'nis*, *Sple'nicæ*, *Splenodyn'ia*, from *σπλην*, 'the spleen,' and *αλγος*, 'pain.' Pain in the spleen.

SPLENALGIA BENGALENSIS, see Cachexia, splenic—s. Phlegmonodea, Splenitis—s. Subinflammatoria chronica, Splenoncus.

SPLENATROPH'IA, *Atroph'ia Lie'nis*, from *σπλην*, 'spleen,' and *atroph'ia*, 'atrophy.' Wasting or atrophy of the spleen.

SPLENAUXE, Splenoncus.

SPLENECTAMA, Splenoparectama.

SPLENECTASIS, Splenoparectama.

SPLENECTOM'IA, *Splenec'tomē*, from *σπλην*, 'the spleen,' *εκ*, 'out of,' and *τομω*, 'I cut.' Extirpation of the spleen.

SPLENECTOP'IA, *Dislocat'io lie'nis* seu *sple-nis*; from *σπλην*, 'the spleen,' and *εκτασος*, 'out of place.' Dislocation of the spleen. Not a common occurrence.

SPLENEMPHRAX'IS, *Splenophraz'ia*, from *σπλην*, 'the spleen,' and *εμφρασσω*, 'I obstruct.' Obstruction of the spleen.—Vogel. See Splenoncus.

SPLENES, Hypochondriasis.

SPLENET'ICUS, *Sple'nicus*, *Splenit'icus*, *Lien-oc'cus*, (F.) *Rat'leux*. That which relates to the spleen: one labouring under diseased spleen. A medicine adapted for diseases of the spleen.

SPLENIC, *Sple'nicus*, *Sple'nius*, from *σπλην*, 'the spleen.' That which relates to the spleen.

SPLENIC ARTERY. It arises from the cœliac; and passes from right to left, forming many windings along the upper edge of the pancreas, which lodges it in a special groove. It reaches the fissure of the spleen, and divides into several branches that enter the organ. In its course it furnishes the pancreatic, left gastro-splenic, and the *vasa brevia*.

SPLENIC CACHEXIA, see Cachexia splenica—s. Corpulesces, see Spleen.

SPLENIC PLEXUS is a nervous network, which proceeds from the cœliac plexus, and accompanies the splenic artery, sending secondary plexuses to each division.

SPLENIC VEIN arises from the spleen, and accompanies the splenic artery; proceeding from left to right, to unite with the superior mesenteric vein, and to form, with it, the abdominal vena porta. In its course, it receives veins corresponding to the *vasa brevia*, the right and left gastro-splenic, the duodenal, pancreatic, coronaria ventriculi, and inferior mesenteric veins.

SPLENICA, Splenalgia. Also, medicines which affect the spleen.—Pereira.

SPLENICUS, Spleneticus, Splenic.

SPLENIOLA, Compress.

SPLENIS TUMOR, Ague cake.

SPLENISATION, Splenization.

SPLENISCUS, Compress.

SPLENITICUS, Splenic.

SPLENI'TIS, from *σπλην*, 'the spleen,' and *itis*, denoting inflammation. Inflammation of the spleen. *Empres'ma splenitis, Inflammatio lie'nis, I. splenis, Splenal'gia phlegmono'dea,* (F.) *Inflammation de la Rate.* A rare disease, characterized by local pain, swelling, and heat, which sometimes terminates by suppuration. It must be treated like other inflammations.

SPLENIUM, Compress—s. *Corporis Callosi,* see *Corpus callosum*—s. *Cruciatum, Croix de Malte.*

SPLENIUS, *S. Cap'itis, S. Colli,* (F.) *Cervico-dorso-mastoidien et duro-trachélien, Cervico-mastoidien* (Ch.), *Posterior mastoid muscle.* So called from its resemblance to the spleen of certain animals. A muscle situate at the posterior part of the neck, and upper part of the back. It is much broader above than below, where it terminates in a point. It is attached, by its inner edge, to the spinous processes of the first five dorsal vertebrae; to that of the 7th cervical, and to the inferior part of the posterior cervical ligament. By its upper extremity, it is attached to the transverse processes of the first two cervical vertebrae, to the mastoid process, and to the posterior surface of the occipital bone. Some have considered this muscle to be formed of two portions, which they have called *Splenius colli,* and *Splenius cap'itis.* The splenius extends the head, inclines it, and rotates it. If the splenii of each side act together, they extend the head.

SPLENIZA'TION, *Splenizatio,* (F.) *Splénisation,* from *σπλην*, 'the spleen.' A term applied to the state of the lung in the first or second stage of pneumonia in which its tissue resembles that of the spleen.

SPLENOCE'LE, *Her'nia liena'lis,* from *σπλην*, 'the spleen,' and *ελην*, 'a tumour.' Hernia formed by the spleen.

SPLENODYNIA, Splenalgia.

SPLENOG'RAPHY, *Splenograph'ia,* from *σπλην*, 'the spleen,' and *γραφη*, 'a description.' A description of the spleen.

SPLENOHÆ'MIA, (F.) *Splénohémie,* from *σπλην*, 'the spleen,' and *αίμα*, 'blood.' Congestion or hyperæmia of the spleen, a common phenomenon in many diseases, especially in typhoid and intermittent fevers.

SPLENOID, *Splenoid'ea, Spleno'dea,* from *σπλην*, 'spleen,' and *ειδος*, 'resemblance.' Spleen-like. Having the appearance of the spleen.

SPLENOL'OGY, *Splenolog'ia,* from *σπλην*, 'the spleen,' and *λογος*, 'a discourse.' A treatise on the spleen.

SPLÉNONCIE, Splenoncus.

SPLENON'CUS, *Megalosple'nia, Hypertroph'ia* seu *Supernutrit'io splenis* seu *lie'nis, Intumescen'tia* seu *Infarctus* seu *Physcon'ia lie'nis, Splenal'gia subinflammato'ria chron'ica, Splenemphra'is, Splenau'z'e, Hypersplenotroph'ia, Lien ingens,* (F.) *Splénocie, Hypertrophie de la Rate;* from *σπλην*, 'the spleen,' and *ογκος*, 'a tumour.' Tumefaction of the spleen. See Ague cake.

SPLENOPAREC'TAMA, *Splene'ctama, Splenoparec'tasis, Splene'ctasis,* from *σπλην*, 'the spleen,' and *παρισκταμα*, 'excessive volume.' Excessive enlargement of the spleen.—Ploucquet.

SPLENOPARECTASIS, Splenoparectama.

SPLENOPHRAXIA, Splenemphraxia.

SPLENORRHAG'IA, from *σπλην*, 'the spleen,' and *ραγη*, 'rupture.' Hemorrhage from the spleen.

SPLENOSCIR'RHUS, from *σπλην*, 'the spleen,' and *σκιρρος*, 'hardness.' Scirrhus or cancer of the spleen.

SPLENOT'OMY, *Splenotom'ia, Splenot'omie,* from *σπλην*, 'the spleen,' and *τομή*, 'I cut.' Dissection of the spleen.

SPLINT, Teut. *Splinter,* from *splijten*, 'to split'; *Hastel'la, Ass'ula, Asser'culum, Plag'ula, Narthex, Fer'ula,* (F.) *Attelle, Éclisse.* A flexible and resisting lamina of wood, used in the treatment of fractures, to keep the fragments in apposition, and prevent their displacement. Splints are made of iron, wood, bark of trees, leather, gutta percha, pasteboard, &c. They are generally padded, and are fixed by a roller or by tapes, according to circumstances.

SPLINTER, (F.) *Équille.* Same etymon. This term is sometimes applied to a small portion of wood, which occasionally enters the skin, and gives occasion to much irritation until it is removed.—*Acu'leus lign'eus,* (F.) *Écharde.*

It is also applied to fragments that separate from a fractured or diseased bone.

SPLITROCK, *Heuchera cortusa.*

SPODIUM GRÆCORUM, *Album græcum.*

SPOLIARIUM, *Apodyterium.*

SPO'LIATIVE, *Spoliat'iva,* from *spolio,* 'I take away.' *Phlebotom'ia spoliat'iva,* (F.) *Nigante spoliative.* Blood-letting, used for the purpose of diminishing the mass of blood.

SPOLIATORIUM, *Apodyterium.*

SPONDYLAL'GIA, *Spondylodyn'ia,* from *σπονδυλος*, 'a vertebra,' and *αλγος*, 'pain.' Pain in the vertebrae. *Cacorrhachitis.* See *Vertebral Disease.*

SPONDYLARTHRI'TIS, from *σπονδυλος*, 'a vertebra,' *αρθρον*, 'a joint,' and *itis*, denoting inflammation. Gouty or rheumatic inflammation of the spinal column.

SPONDYLARTHROCAE, *Vertebral disease.*

SPONDYLI, *Vertebrae.*

SPONDYLIS, *Coccyx.*

SPONDYLI'TIS, *Inflammatio vertebrae,* from *σπονδυλος*, and *itis*, denoting inflammation. Inflammation of the vertebrae.

SPONDYLIUM, *Coccyx, Heraclæum spondylium.*

SPONDYLOCAE, *Vertebral disease.*

SPONDYLODYNIA, *Spondylalgia.*

SPONDYLOPATHI'A, from *σπονδυλος*, 'a vertebra,' and *παθος*, 'a disease.' A disease of the vertebral column.

SPONDYLOPYOSIS, Vertebral disease.

SPONDYLUS, σπονδύλος. A vertebra; and, especially, the two large cervical vertebrae. Also, the vertebra.

SPONGE, BASTARD, Alcyonium.

SPONGI. The tumefied glands of the neck.

SPONGIA, *Spongos*, *Sphongus*, *Spongia officinalis*, *Spongia Marina*, *Sponge*, (F.) *Éponge*. An organized marine substance, of the great class of Zoophytes, met with in many seas, but especially in the Mediterranean and Arabian. It is supple, elastic, porous, and capable of absorbing fluids in which it may be placed, and of thus increasing in size. It is employed in surgery, for cleansing or washing; for absorbing acrid discharges from ulcers; suppressing hemorrhage when the mouth of the vessel can be compressed by it, and for forming tents for dilating wounds; in which case, the sponge is immersed in melting wax, and cooled before being used. It is then called *Prepared Sponge* or *Sponge Tent*.

SPONGIA ASSA, S. Usta.—Cynosbati, Bedegar.

SPONGIA USTA, S. Assa, *Carbo spongia*, *Burnt Sponge*, contains carbonate and phosphate of lime, carbonate of soda, charcoal, and iodine. It is used in bronchocoele, scrofulous affections, and herpetic eruptions; and its good effects seem to be dependent upon iodine. It is made by cutting sponge into pieces, and heating it, that any extraneous matter may be separated; burning it in a close iron vessel until it becomes black and friable, and, lastly, rubbing it into very fine powder.—Ph. U. S.

SPONGIÆ LAPIS. A name given to small friable stones found in sponge. They were formerly esteemed lithontriptic.

SPONGIODES, Spongoid.

SPONGIOLE, *Spongiolum*: from σπγγιον, 'a small sponge.' The soft succulent extremity of the fibrils or true roots of a plant, by which it absorbs or sucks up fluid. Similar spongioles have been supposed to exist at the terminations of the absorbents in animals.

SPONGION. Ancient name of an epithem made of goats' dung: and also of a malagma, which was considered capable of absorbing the serum in dropsies, like a sponge.—Paulus, Gorræus.

SPONGIOSUM (OS), Ethmoid bone.

SPONGIOSUS, Spongoid.

SPONGOID, *Spongoidea*, *Spongioidea*, *Spongioidea*, from σπγγια, 'sponge,' and είδος, 'resemblance.' Resembling sponge. Of the nature of sponge.

SPONGOID INFLAMMATION, Hæmatodes fungus.

SPONGOID TISSUE, (F.) *Tissu spongoïde*. An adventitious spongy tissue, found in cases of rickets.—Guérin.

SPONGOS, Tonsil.

SPONSA SOLIS, *Calendula officinalis*.

SPONTANEOUS, *Spontaneus*, from sponte, 'voluntarily.' That which occurs of itself, or without any manifest external cause. Evacuations are termed *spontaneous*, which are not produced by medicine. *Spontaneous lactation* is that which is not the result of fatigue. Diseases are also *spontaneous* which supervene without apparent cause. *Spontaneous Amputation* is the separation of a limb from the fetus in utero.

SPONTANEOUS EVOLUTION, see Evolution—S. Version. Evolution, spontaneous.

SPONTÉPARITÉ, Generation, spontaneous.

SPONWOOD, *Kalmia latifolia*, *Tilia*.

SPORADIC, *Sporades*, *Sporadici*, *Morbi dispersi*, *Morbi sparsi*, from σπριπειν, 'to spread.' Diseases are so called which supervene indifferently in every season and situation, from acci-

dental causes, and independently of any epidemic or contagious influence.

SPORE, *Sporule*, *Sporum*, *Sporulum*, from σπειρω, 'I sow.' The reproductive body in cryptogamous plants, which is analogous to the seed of phanerogamous plants.

SPORIDIUM; same etymon. The reproductive body in algaecious plants, which resembles the spore of other plants.

SPORULE, Spore.

SPORUM, Spore.

SPOTS, GERMINAL, see Molecule.

SPOTS, RED, (F.) *Taches rouges*, *Rose spots*. Small red spots which appear in typhoid fever, from the 8th to the 15th day of the disease. They are most frequently seen on the lower and middle portions of the chest, and upper part of the abdomen.

SPOTS, ROSE, Spots, red.

SPRAIN, corrupted from strain:—*Subluxatio*, *Distortio*, *Dia'trophê*, *Dia'strem'ma*, *Luxatio imperfecta*, *Exarthre'ma*, *Exarthro'sis*, *Strem'ma*, *Thlasma Strem'ma*; a wrench, (F.) *Détorse*, *Entorse*, *Foulure*. A violent straining or twisting of the soft parts surrounding the joints. According to the degree of the sprain, the fibrous parts of the joint may be simply stretched, or they may be ruptured. This affection, which has been regarded as incomplete luxation, occurs, particularly, in the ginglymoid joints;—as in the foot, wrist, knee, &c. The violence causes an afflux of blood; the serum of the blood is poured out, and often the blood itself, owing to the rupture of vessels; and inflammation arises, which ends in resolution or induration. Local, antiphlogistic applications are required, with perfect rest; and, when the inflammatory action has subsided, cold pumping and friction, with the application of a plaster and bandage, will afford support till the parts affected recover their due tone.

SPRAT, YELLOW-BILLED, *Clupea thryssa*.

SPRUCE BEER, *White Spruce Beer*. A beer made as follows: To 10 gallons of water, add 6 pounds of sugar, and 4 oz. of essence of spruce. Add yeast, and bottle, when ready. It is grateful and antiscorbatic.

SPRUCE BEER POWDERS may be formed of white sugar, ℥j, and ℥ij; soda subcarb., gr. xxvj; essence of spruce, gr. x, in each blue paper; and acid of tartar, ℥ss in each white paper. For half a pint of water.

SPUITIO, Exspuition.

SPUMA ARGENTI, *Plumbi oxydum semivitreum*—s. *Cerevisia*, *Yeast*—s. *Trium draconum*, *Antimonium muriatum*.

SPUMEUX, Frothy.

SPUMOSUS, Frothy.

SPUNK, *Boletus ignarius*.

SPUR, Sax. *ƿpur*, (F.) *Éperon des Artères*. The angle at which the arteries leave a cavity or trunk.

SPUR, Ergot.

SPURGE, **CAPER**, *Euphorbia lathyris*—s. *Cypress*, *Euphorbia Cyparissias*—s. *Flax*, *Daphne gnidium*—s. *Flowering large*, *Euphorbia corollata*—s. *Garden*, *Euphorbia lathyris*—s. *Greater*, *Euphorbia palustris*—s. *Ipecacuanha*, *Euphorbia ipecacuanha*—s. *Laurel*, *Daphne laureola*—s. *Marsh*, *Euphorbia palustris*—s. *Olive*, *Cneorum tricoecum*—s. *Olive*, *Daphne mezereum*—s. *Sea*, *Euphorbia paralias*.

SPUTA, PRUNE JUICE, see Prune Juice.

SPUTAMEN, *Saliva*, *Sputum*.

SPUTAMENTUM, *Saliva*, *Sputum*.

SPUTATIO, Exspuition.

SPUTATION, Exspuition.

SPUTUM, Plural, *Sputa*, *Apochrem'ma*, *Chrem'ma*, *Empty'ma*, *Sputa'men*, *Pty'olon*, *Pty'd'ma*,

Spit, from *spuere*, *sputum*, 'to spit.' (F.) *Crachat*. The secretions ejected from the mouth in the act of spitting. It is composed of saliva, and of the mucus secreted by the mucous membrane of the nasal fossæ and fauces, and often by the membrane of the larynx and bronchia. The sputa are, sometimes, called *eruginous*, when of a greenish-yellow colour; *gummy*, when they resemble a thick solution of gum; *frothy*, (F.) *mousseux*, when covered with froth; *rubiginous*, (F.) *rubiginoux* ou *rouillés*, when of a reddish-yellow; and *streaked*, (F.) *striés*, when mixed with lines of blood. Also, saliva.

SPUTUM CRUENTUM, Hæmoptysis — s. Dulce, Saccharorrhœa pulmonalis — s. Oris, Salivation — s. Saccharatum, Saccharorrhœa pulmonalis — s. Sanguinis, Hæmoptysis.

SQUALLING, Vagitus.

SQUAMA, Scale, Table.

SQUAMÆ, Scaly diseases.

SQUAMARIA, Plumbago Europæa.

SQUAMEUX, Squamous.

SQUAMIFORMIS, Squamous.

SQUAMOUS, *Squamo'us*, *Lepidoi'des*, *Lepido'des*, *Squamiformis*, *Scaly*; from *squama*, 'a scale.' That which relates to or resembles a scale.

SQUAMOUS PORTION of the temporal bone, (F.) *Portion squameuse* ou *écailleuse du Temporal*, is the upper part of the temporal, so called from a fancied resemblance to a scale.

SQUAMOUS SUTURE, *Sutu'ra squamo'ea*, *S. mendo'ea* seu *lepidoi'des* seu *lepidi'des*, *Sutu'ra cranii squamo'ea*, (F.) *Suture squameuse* ou *écailleuse*. The suture which unites the squamous portion of the temporal bone to the parietal.

Certain *scaly* cutaneous affections are also called *squamous*, (F.) *equameux*. See *Scale*.

SQUARE STALK, *Monarda coccinea*.

SQUAW-MINT, *Hedeoma*.

SQUAW-ROOT, *Actæa racemosa*, *Caulophyllum thalictroides*.

SQUAW-WEED, *Erigeron Philadelphicum*.

SQUEAMISHNESS, *Pastidium cibi*.

SQUEAZINESS, *Nausea*.

SQUELETTE, *Skeleton*.

SQUELETTOLOGIE, *Skeletology*.

SQUILL, *Scilla* — s. *Vinegar* of, *Acetum scillæ*.

SQUILLA, *Scilla*.

SQUINANCIE, *Cynanche*, *Cynanche tonsillaris*.

SQUINANCY, COMMON, *Cynanche tonsillaris*.

SQUINANTHIA, *Cynanche*.

SQUINANTHUS, *Juncus odoratus*.

SQUINE, *Smilax China*.

SQUINSY, *Cynanche tonsillaris*.

SQUINT-EYED, see *Strabismus*.

SQUINTER, see *Strabismus*.

SQUINTING, *Strabismus*.

SQUIRRE, *Scirrhus*.

SQUIRREL CORN, *Dicentra Canadensis*.

SQUIRROGASTRIE, *Scirrhogastria*.

SQUIRRUS, *Scirrhus*.

SQUIRT, *Syringe*.

STACHELBERG, MINERAL WATERS OF. *Stachelberg Springs* are far down in the valley of the Linth, in Switzerland. The waters are sulphureous, and are much visited by gouty and rheumatic invalids.

STACHYS FÛETIDA, *Galeopsis*.

STACTE, *Myrrha*.

STADE, *Stage*.

STADIUM, *Period*, *Stage*.

STADIUM ACNES seu *STASIOS*. The period of the height of a disease.

STADIUM ANNIHILATIO'NIS seu *CONVALESCENTIE* seu *RECONVALESCENTIE*. The period of recovery from disease.

STADIUM AUGMENTI seu *INCREMENTI MORBI*. The period or stage of increase of a disease.

STADIUM CALORIS, *Stage*, (hot) — s. *Convalescentis*, *S. annihilationis*.

STADIUM DECREMENTI. The period or stage of decrease of a disease.

STADIUM FRIGORIS, *Stage*, (cold) — s. *Incrementi Morbi*, *S. Augmenti morbi* — s. *Latentis Contagii*, *Prodromus* — s. *Opportunitatis*, *Prodromus* — s. *Prodromorum*, *Prodromus* — s. *Reconvalescentiæ*, *S. Annihilationis*.

STAFF, (D.) *Sta'f*. An instrument of great importance in lithotomy, — being the director for the gorget or knife. It is made of steel; and the handle is flat and rough, in order that it may be more securely held. The groove is on its convex surface.

STAFF TREE, CLIMBING, *Celastrus scandens*.

STAFFA, *Stapes*.

STAG'S PIZZLE, see *Cervus*.

STAGE, *Sta'dium*, (F.) *Estage*, *Étage*, *Stade*. The period or degree of a disease; especially the period of an intermittent: — as the *cold stage*, — *sta'dium fri'goris* — *hot stage*, &c.

STAGGERWEED, *Delphinium*.

STA'GIUM. The sixth part of an ounce.

STAGMA, from *στα'ζε*, 'I distil'; *Stag'ma*. Any distilled liquid or liquor.

STAGMA, *Gutta*.

STAGNATION, *Stagna'tio*, from *stagnare*, 'to form a pond.' Accumulation and retardation of fluids in any part of the body.

STAGNUM CHYLI, *Receptaculum chyli*.

STAHLIAN. One who follows the doctrine of *Stahl*.

STAHL'IANISM. The doctrine of *Stahl*, which considered every vital action under the direction and presidency of the soul. See *Animist*.

STALAGMA, *Stagma*.

STALAGMITIS CAMBOGIOI'DES, *S. Cambogia*. Gamboge was long ascribed to this fancied Ceylonese plant. It is now known, that the name was given by Murray to specimens of two distinct trees of different genera. See *Cambogia*.

STALAGMOS, *Distillation*.

STALVICUS, *Incarناس*.

STAMMERING, *Balbuties* — s. of the *Fingers*, *Cramp*, *writers'*.

STAMPING MILL, see *Pulverisation*.

STANGOS, *Tin*.

STANNI MURIAS, *Tin*, *muriate* of — s. *Oxyduli murias*, *Tin*, *muriate* of — s. *Pulvis*, see *Tin*.

STANNIOLUM, *Tinfoil*.

STANNUM, *Tin* — s. *Cinereum*, *Bismuth* — s. *Foliatum*, *Tinfoil* — s. *Glaciale*, *Bismuth* — s. *Granulatum*, see *Tin* — s. *Indicum*, *Zincum*.

STAPÉDIEN, *Stapedius*.

STAPÉDIUS, *Stapes*, (F.) *Stapédien*, *Pyramidal-stapédien*. A muscle of the middle ear, which draws the stapes obliquely upwards.

STAPES, *Stapha*, *Staffa*, 'a stirrup.' (F.) *Étrier*. The innermost of the small bones of the ear, so called because it resembles a stirrup. It is situated horizontally in the cavity of the tympanum. Its head, which is directed outwards, is articulated with the os orbiculare. Its base faces inwards, and is applied to the fenestra ovalis, which it closes imperfectly, and to the membrane of which it is united. Its branches are one anterior, and the other posterior. They are curved; and the space between them is parabolic. Surgeons have given the name *Stapes* to a bandage used in bleeding from the foot; which forms a figure of 8 around the ankles.

STAPHA, *Stapes*.

STAPHIS, *Delphinium staphisagria*.

STAPHISAGRIA, *Delphinium staphisagria*.

STAPHISAIGRE, *Delphinium staphisagria*.

STAPHYLŒMATO'MA, from *σταφυλή*, 'the uvula,' and *hæmatoma*. A tumour formed by effusion of blood beneath the mucous membrane of the uvula.

STAPHYLĀGRA, *Staphylepartes*.

STAPHYLE, *Uvula*, see *Vitis vinifera*.

STAPHYLEPAR'TES, from *σταφυλή*, 'the uvula,' and *παίρω*, 'I lift up.' *Staphylagra*. An instrument for laying hold of, and removing the uvula. — Paulus.

STAPHYLINI, see *Azygos muscle* — s. *Medii*, see *Azygos muscle*.

STAPHYLINO-PHARYNGEUS, *Palato-pharyngeus*.

STAPHYLINUS EXTERNUS, *Circumflexus*.

STAPHYLIS, *Nipple*.

STAPHYLITIS, *Uvulitis*.

STAPHYLIUM, *Nipple*.

STAPHYLODIALYSIS, *Cionis*, *Staphylodema*.

STAPHYLŒDE'MA, *Angi'na uvula'ris*, *Dysphagia uvulo'sa*, *Hypostaphylē*, *Hypostaphylit'is*, *Staphyloidal'ysis*, *Prolapsus seu Propt'is u'vulae*, *Causis u'vulae*, *Hymas*, *Himanto'ma*, *Himanto'sis*, *Staphylon'eus*, *Staphylon'cia*, *Ede'ma u'vulae*, *Productio uvulae à pituit'â*, *U'vula decid'ua seu relax'ata*, *Oras'pedon*. Relaxation and tumefaction of the uvula, which, either from inflammation or infiltration, hangs down so as to occasion difficult deglutition, cough, &c. Scarification, astringent gargles, and, if necessary, excision, constitute the treatment.

STAPHYLO'MA, from *σταφυλή*, 'a grape.' *Usa'tio*, *Myoceph'alum*, *Myioceph'alum*, *Parop'sis* *Staphylo'ma*, *Staphylo'ma*, *Polygro'ma*. A name given to different tumours of the anterior surface of the globe of the eye.

STAPHYLOMA CONICUM, *Staphyloma of the cornea* — s. *Pellucidum conicum*, *Staphyloma of the cornea*.

STAPHYLOMA OF THE CORNEA, *Sugar-loaf Cornea*, *Con'ical Cornea*, *Con'ical hydrorhthalm'ia*, *Staphylo'ma con'icum*, *S. pellucidum con'icum*, *Conorhthalm'ia*, *Prolap'sus cor'neae*, *Ceraton'eus*, *Hypercerato'sis*, *Hypercer'asis*, is an unequal, embossed, bluish or whitish, round or conical tumour; of variable size; formed by the projection of the transparent cornea, which is sometimes extenuated and distended, at others thickened.

STAPHYLOMA OF THE IRIS is the disease described by Scarpa under the name *Procidencia Iridis*. It is hernia of the iris, through an accidental opening of the cornea. Also, *iridæuxesis*.

STAPHYLOMA OF THE SCLEROT'IC differs from the last, in the prominence existing on a part of the eye covered by the sclerotic, which is much thinner.

STAPHYLOMA UVEÆ, *Iridæuxesis*.

STAPHYLONCIA, *Staphylodema*.

STAPHYLONCUS, *Staphylodema*.

STAPHYLOPLAS'TIC, *Staphyloplas'ticus*, from *σταφυλή*, 'the uvula,' and *πλασσω*, 'I form.' An epithet applied to the operation for replacing the soft palate, when it has been lost.

STAPHYLOR'RAPHY, *Velosynth'esis*, *Staphylorrhaph'ia*, *Ktionorrhaph'ia*, *Cionorrhaph'ia*, *Uranorrhaphê*, *Uranorrhaph'ia*, *Uranicorrhaph'ia*, *Uranicor'rhapê*, from *σταφυλή*, 'the uvula,' and *ραφή*, 'a suture.' The operation for uniting a cleft palate. It consists in paring the edges of the cleft; passing ligatures through them, and bringing them together.

STAPHYLOSIS, *Staphyloma*.

STAPHYLOT'OMY, *Staphylo'tomia*, from *σταφυλή*, 'the uvula,' and *τομή*, 'incision.' Amputation of the uvula.

STAR-APPLE, **BROAD-LEAVED**, *Chryso-phyllum cainito* — s. *Blazing*, *Aletris farinosus* — s. *Bloom*, *Spigelia Marilandica* — s. *Grass*, *Aletris farinosa*, *Hypoxy's erecta* — s. *Knap-weed*, *Centaurea calcitrappa* — s. *Stroke*, *Coup-de-soleil* — s. *Wort*, *Aletris farinosa* — s. *Wort*, *golden*, *Bubonium*.

STARBECK SPA. A chalybeate spring at Harrogate.

STARCH, *Amylum* — s. *Blus*, *Smalt*.

STARCH, IODIDE OF, *Iod'idium seu Iodure'tum Am'gli*, *Am'glum ioda'tum*, (F.) *Iodure d'Amidon*; prepared by triturating iodine and starch, is said to have the eutrophic effects of iodine; but, by some, is esteemed inert. Dose, four to six grains.

STARCH, POTATO, see *Solanum tuberosum* — s. *Sugar*, *Glucose*.

STARKEY'S PILLS, see *Pilulæ ex helleboro et myrrhâ*.

STASE, *Stasis*.

STASIS, *στασις*, from *εστω*, 'I stop,' (F.) *Stase*. This word has nearly the same signification as stagnation. Stagnation, however, sometimes includes a morbid condition of the fluids, — *Stasis* never.

STASIS, *Station*.

STATIC. An epithet applied to the physical phenomena presented by organized bodies in contradistinction to the organic or vital.

STATICA SEPTI NA'R'IUM, *Appen'dix cutanea septi narium*. The cutaneous appendage to the septum narium.

STATICE CAROLINIA'NA of the United States, *American Thrift*, *Marsh Rose'mary*, *Marsh Root*, *Seaside Thrift*, *Inkroot*, *Sea Lavender*, is considered to be a mere variety of the staticæ limonium.

STATICE LIMO'NIUM, *S. Marit'imum*, *S. Behen rubrum*, *Limo'nium*, *L. majus seu vulgare*, *Behen*, *Sea Lavender*, *Red Behen*, *Behen Ackmar*, *Marsh Rosemary*, *Lavender Thrift*, (F.) *Behen rouge*. Family, *Plumbagineæ*. Sex. Syst. *Pentandria Pentagynia*. The roots have been esteemed astringent, tonic, and eminently antiseptic.

STATICE MARITIMUM, *S. limonium* — s. *Vulgare*, *S. limonium*.

STA'TION, *Sta'tio*, *Stasis*, *Status*, from *stare*, 'to stand.' The act of standing.

STA'TIONARY, *Stationarius*, from *stare*, 'to stand.' A name given by Sydenham and Stoll to certain diseases, which depend upon a particular state of the atmosphere; and which prevail in a district for a certain number of years, and then give way to others.

STATIS'TICS, MEDICAL, *Vital Statistics*, *Biostat'ica*, (F.) *Statistique médicale*. That part of medicine which relates to details — *medico-statistical* — connected with the mortality, salubrity, &c., of different countries and situations.

It has, also, been used in a wider sense to signify the same as *Numerical method*, (F.) *Méthode numérique*; which is applied to the systemization of medical facts, or to the use of numbers in the investigation of disease.

STATISTICS, VITAL, *Statistics*, *medical*.

STATURE, *Statu'ra*, *Meg'ethos*, *Magnitudo corporis*, from *sto*, *statum*, 'I stand.' The height of the human figure. The following table exhibits the results of several admeasurements, with the heights of some of the monkey species, on the authority of Mr. Lawrence.

	STATURE.	
	Feet.	In.
An Englishman,.....	5	4½
	to	
	5	00
An Englishwoman,.....	5	4
	to	
	5	00
European male skeleton,.....	5	8
Do.	5	5
A Negro at the Lunatic Hospital, Liver- pool,.....	5	10½
Another from Virginia,.....	5	5½
Another from the Gold Coast,.....	5	8
Another,.....	5	00
Negro skeleton,.....	4	11
Another,.....	5	7½
A Lascar,.....	5	4
Venus de Medici,.....	5	00
Tyson's Chimpanzé (<i>Simia Troglodytes</i>)	2	2
Mr. Abel's Orang Utang,.....	2	7
Camper's Do.	less than 30	
Mr. White's Monkey,.....	2	2

STATUS, Acme — s. Cruditatis, Crudity — s. Erethiticus, Nervous diathesis — s. Gastricus, *Embarras gastricus* — s. Nervosus, Nervous diathesis — s. Sthenicus, Sthenia — s. Verminosus, Helminthiasis.

STAVESACRE, Delphinium staphisagria.

STAXIS, *Apostax'ia*. A slight epistaxis or nasal hemorrhage. — Hippocrates.

STEAM-DOCTOR. A term applied to one who treats all or most diseases by steam.

STEAR, Pinguedo, Sebum.

STEARIN, see Pinguedo.

STEARINUM CETACEUM, Cetaceum.

STEARRHŒ'A, *Steatorrhœ'a*, *Seborrhœ'a*, *Seborrhag'ia*, *Smegmatorrhœ'a*, *Smegmorrhœ'a*, *Sebaceous Flux*, from *stear*, 'suet,' and *rho*, 'I flow.' Augmentation of secretion from the sebaceous follicles of the skin.

STEATITES, Polysarcia.

STEATOCE'LE, from *stear*, 'suet,' and *κηλη*, 'a tumour.' A tumour formed by a collection of steatomatous matter in the scrotum.

STEATO'MA, *Tumor lar'deus*, from *stear*, 'suet.' *Sevat'io*, *Steat'osis*, *Empy'ma ency'stis steatoma*. An encysted tumour, whose contents are similar to fat.

STEATOPYGA, from *stear*, 'fat,' and *πυγη*, 'buttocks.' *Buttock-hump*. Fat buttocks; such as exist in the Hottentot females.

STEATORRHŒA, Stearrhœa.

STEATO'SIS, Steatoma.

STEATO'SIS CORDIS, *Degenerat'io adiposa cordis*, *Cardiethmolip'osis* and *Cardiomyolip'osis* (Piorry), *Fatty heart*. Unusual deposition of fat on the heart:—by some presumed to be occasionally a true adipous degeneration of the substance of the heart, which is probably incorrect.

STEATOZOON FOLLICULORUM, *Acarus Folliculorum*.

STEEL, Chalybs.

STEEPLE-BUSH, *Spirœa tomentosa*.

STEER'S OPODELDOCH, see *Opodeldoch*, Steer's.

STEGANOP'ODES, *στεγανοπ'οδες*, *Planip'edes*. They who have fat feet, or are web-footed, from *steyavos*, 'covered,' and *πους*, 'foot.'

STEGNO'SIS, *Steno'sis*, *Constipa'tio*, *Stipa'tio*, *Condensa'tio*, *Obstruc'tio*, from *steyvov*, 'I constrict.' Constriction or narrowness of the pores and vessels. Stricture. Constipation. Suppression of the evacuations. See *Arctatio*.

STEGNOTICA, Astringents.

STEIROSIS, Sterilitas.

STELENGIS, *Stridor dentium*.

STELLA, *Fascia stella'ta*, (F.) *Etoile*. A bandage, improperly compared to a star, because it is crossed like the letter X. This bandage is applied upon one or both shoulders. In the first case, it is called *simple*; in the second, *double*. It was employed in cases of fractures of the sternum, clavicle, and scapula; in luxations of the humerus, &c.

STELLA TERRÆ, *Plantago coronopus*.

STELLARIA MEDIA, *Aisine media*—s. *Scilla*, *Scilla*.

STELLATA RUPINA, *Centaurea calcitrapa*.

STELOCHITIS, *Osteocolla*.

STENAGMUS, *Suspirium*.

STENAXIS, *Suspirium*.

STENIA, *Sthenia*.

STENICUS, *Activa*.

STENOBREGMATE, see *Cranium*.

STENOCARDIA, *Angina pectoris*, *Cardiostenosis*.

STENOCHO'RIA, *Stenochori'asis*. *Angustia*. Employed by some for contraction of the vagina.

STENOCHORIA INTESTINI RECTI, *Stricture of the rectum* — s. *Œsophagi*, *Dysphagia constricta*.

STENOMYCTE'RIA, from *steyvos*, 'narrow,' and *μυκτηρ*, 'nose.' Contraction of the nasal passages.

STENOSIS, *Stegnosis*.

STENOSTEGNOSIS, *Stenostenosis*.

STENOSTENO'SIS, *Stenostegno'sis*, from *Steno*, and *steyvov*, 'contraction.' *Obstruc'tio ductus Stenonia'na*. Narrowness or contraction of the duct of *Steno*.

STENOSTOM'IA, from *steyvos*, 'narrow,' and *στρωμα*, 'mouth.' Contraction of the mouth.

STENOTHORA'CES, from *steyvos*, 'narrow,' and *θωραξ*, 'the chest.' They who have narrow chests.

STENTOROPHO'NUS, from *στεινωρ*, *Stentor*, a Greek in the army before Troy; and *φωνη*, 'voice.' One who has a strong voice.

STEPHANE, *Crown*.

STEPHENS, MRS., REMEDY FOR THE STONE. This consisted of lime, prepared by calcining the shells of eggs and snails, made into pills with soap. A decoction was, also, administered, consisting of chamomile, fennel, parsley, and burdock, with a portion of Alicant soap. Its virtues were dependent upon the lime and the tonic properties of the decoction. Hales, Hartley, Kirkpatrick, Lobb, and others, wrote in favour of this nostrum; and it was ultimately bought by the British parliament for £5000.

STERA, *Uterus*.

STERCORA'CEOUS, *Stercorarius*, *Dinchorret'icus*, *Ster'coral*, from *stercus*, 'dung.' *Fœcal*, *Fœcal*, (F.) *Stercoraire*, *Stercoral*.

The French use the term *Fistules stercoraires* for those which are kept up by the constant passage of fecal or *stercora'ceous matter*. The name *Stercoraires* is sometimes given, in derision, to those physicians who are fond of purging their patients: *à posteriori* has been similarly used.

STERCORAIRE, *Stercoraceous*.

STERCUS, *Excrement*, *Fimus* — s. *Anseris*, *Fimus anseris* — s. *Caninum album*, *Album Grœcum* — s. *Diaboli*, *Asafœtida* — s. *Equi non castrati*, *Fimus*.

STERCUS HUMANUM, *Homerda*. Human excrement.

STERCUS LACERTÆ, *Crocodilia*.

STEREOCYST'IS, from *steyvos*, 'hard,' and *κυστις*, 'cyst.' A hard steatoma.

STEREOS, *Solid*.

STEREOT'ICA, from *steyvos*, 'hard.' *Fortu-*

tous lesions or deformities affecting the hard parts. The 2d order, class *Tychica* of Good.

STER'ILE, *Ster'ilis*, *A'gonos*, *Aph'oros*, *Aph'oricus*, *Ablast'es*, *Infecund'us*, (F.) *Sterile*. Same etymon as *Sterilitas*. Not producing fruit: infecund.

STERILIS, *Sterile*.

STERILITAS, *Agon'ia*, *Steiro'sis*, *Stiro'sis*, *Agenne'sia*, *Agenne'sis*, *Infecund'itas*, *Steril'ity*, *Acy'e'sis*, *Bar'renness*, *Infecund'ity*, *Apho'ria*, *Atec'nia*, *Atoc'ia*, from *στερος*, or *στερος*, 'hard, barren.' Quality of that which is barren. Sterility may be *absolute* or *relative*. The former depends upon some vicious conformation of the genital organs, apparent or concealed, and occasionally admits of cure. Sterility is *relative* when a female does not conceive with one individual, but does with another. Sterility in females is often dependent upon a condition of the uterus characterized by membranous menstruation.

STERNAL, see *Sternal*.

STERNAL, *Sterna'lis*, from *sternum*, 'the breast bone.' Relating or appertaining to the sternum or breast bone.

STERNAL ASPECT. The aspect of the body where the sternum is situate.—Barclay. *Sternad* is used by the same writer adverbially to signify towards the sternal aspect.

STERNALGIA, *Angina pectoris*.

STERNO-CLAVIC'ULAR, *Sterno-clavicula'ris*. That which relates to the sternum and clavicle.

STERNO-CLAVIC'ULAR ARTICULA'TION is the union of the inner extremity of the clavicle with a round facette at each side of the superior extremity of the sternum. In this articulation there are, besides the incrusting cartilages, two radiated *sterno-clavicular*, (F.) *Sterno-claviculaires rayonnées*; one anterior, and one posterior—an *inter-clavicular ligament*, extending between the two clavicles, and two synovial capsules, separated by an *inter-articular fibro-cartilage*. The costo-clavicular ligament may also be considered to belong to this articulation.

STERNO-CLAVIO-MASTOÏDIEN, *Sterno-cleido-mastoideus*—s. *Cleido-hyoideus*, *Sterno-hyoideus*.

STERNO-CLEIDO BRACHIALIS, *Pectoralis major*.

STERNO-CLEIDO-MASTOÏDEUS, *Sterno-mastoideus*, *Cleido-mastoideus*, *Mastoideus*, *Mastoideus anterior*, *Nuta'tor cap'itis*; (F.) *Sterno-clavio-mastoidien*, *Sterno-mastoidien*; from *στερον*, 'the sternum,' *κλεις*, 'the clavicle,' and *μαστος*, 'the mastoid process.' A muscle situate at the anterior and lateral part of the neck. It is long and flattened: simple, above: and divided into two portions below; where it is inserted into the anterior and superior part of the sternum, and the inner quarter of the clavicle. Above, it terminates at the mastoid process, which it embraces, at the neighbouring part of the temporal bone, and at the outer third of the upper curved line of the occipital bone. It carries the head forward; inclines, and rotates it to one side. When both contract, they bend the head directly forwards.

STERNO-COSTAL, *Triangularis sterni*—s. *Costo-clavio-humeral*, *Pectoralis major*—s. *Dymnia*, see *Somatodynia*—s. *Humeral*, *Pectoralis major*.

STERNO-HYOÏDEUS, *Sterno-cleido-hyoideus*, *Sterno-hyoideus*, *Hyoideus primus*; from *στερον*, 'the sternum,' and *υοειδης*, 'the os hyoides.' A muscle situate at the anterior part of the neck; inserted, above, at the inferior edge of the body of the hyoid bone; below, into the upper part of the posterior surface of the sternum;—at the posterior part of the sterno-clavicular articulation, and sometimes into the cartilage of the first rib. It depresses the os hyoides.

STERNO-MASTOÏDIEN, *Sterno-cleido-mastoideus*—s. *Pubien*, *Rectus abdominis*.

STERNO-THYROÏDEUS, *Sterno-thyroïdes*, *Bron'chius*. A muscle, situate at the anterior part of the neck. It is attached, above, to the oblique line seen on the outer surface of the thyroid cartilage; and terminates, below, at the upper part of the posterior surface of the sternum, and the cartilage of the second rib. When it contracts, it depresses the thyroid cartilage and os hyoides, by the medium of the thyro-hyoid membrane.

STERNODYNIA SYNCOPALIS, *Angina pectoris*—s. *Syncoptica* et *Palpitans*, *Angina pectoris*.

STERNO-OMPHALODYMIA, see *Somatodymia*.

STERNUM, *Sternon*, from *στερος*, 'solid'; *Pectus*, *Os asser* seu *pectoris* seu *xiphoides* seu *gladi'oli* seu *ensifor'me*, *Scutum cordis*, *Breast Bone*, *Hæmal Spine* of Owen. An azygous symmetrical bone, situate at the fore-part of the chest. It is flat; broad above; narrower in the middle; and terminates, below, by a pointed cartilage—the xiphoid. It has an *anterior* or *cutaneous surface*, a *posterior* or *mediastinal*—a *superior* or *clavicular extremity*, and an *inferior* or *abdominal*. It is articulated with the clavicles and the seven upper ribs on each side, by means of their cartilages. According to Bèclard, it is formed of six principal bones, which he names, from their position, 1. *Primi-sternal* or *clavi-sternal*: 2. *Duo-sternal*: 3. *Tri-sternal*: 4. *Quarti-sternal*: 5. *Quinti-sternal*: 6. *Ultimi-sternal* or *ensisternal*.

STERNUMENTUM, Sneezing.

STERNUTAMENTORIA, *Achillea ptarmica*.

STERNUTAMENTUM, Sneezing.

STERNUTATIO, Sneezing.

STERNUTATOIRE, *Sternutatory*.

STERNUTATORY, *Sternutato'rius*, from *sternutare*, 'to sneeze.' *Sternutamentum*, *Errh'inum*, *Ptar'micum*, *Anarrh'inum*, (F.) *Sternutatoire*. A substance which provokes sneezing; as tobacco, &c.—See *Errhine*.

STERTEUR, *Stertor*.

STERTOR, *Ronchus* or *Rhonchus*, *Renchus*, *Rhencus*, (F.) *Sterteur*, *Ronflement*, from *stertere*, 'to snore.' The deep snoring which accompanies inspiration in some diseases, particularly in apoplexy. Such respiration is said to be *stertor'ous*; *Respiratio stertuo'sa* seu *stertens* seu *stertoro'sa*.

STERTOROUS, see *Stertor*.

STETHÆ'MIA, *Hyperæ'mia Pulmo'num* seu *Pec'toris*, *Conges'tio Pulmonum* seu *Pectoris*, (F.) *Hyperémie des Poumons*, *Congestion des Poumons*. Hyperæmia of the lungs. Congestion or accumulation of blood in the pulmonary vessels.

STETHOCATHARSIS, Expectoration.

STETHOCHYSIS, Hydrothorax.

STETHODESMIS, Corset.

STETHODESMIUM, Corset.

STETHODESMUS, Corset.

STETHOM'ETER, from *σθηθος*, 'the chest,' and *μετρον*, 'measure.' An instrument, proposed by Mr. Richard Quain, for measuring the extent of movement of the walls of the chest, as a means of diagnosis in thoracic diseases. It consists of a flat case, not unlike a watch-case, having on its upper surface a graduated dial and index, which is acted on by a simple mechanism. A silk cord, long enough to surround one-half the chest, passes through an aperture in the case. The dial is graduated into fifty equal parts, each of which represents the 1.200th of an inch. In using the instrument, the dial is placed firmly against the spine, and the point of the tape over the sternum, or at any other spot according to the part to be

examined. The extension of the string, as indicated by the dial, shows the amount of elasticity of the parietes of the thorax.

STETHOPARALYSIS, *Paral'ysis nervo'rum thora'cis, phrenicorum, &c.*; from *σθητος*, 'the chest,' and *παλυσις*, 'paralysis.' Palsy of the muscles of the chest.

STETHORRHEUMA, Pleurodynia.

STETHOSCOPE, *Stethoscop'ium, Stethos'copium, Echoscop'ium, Psophom'eter, Thoracoscop'ium*, from *σθητος*, 'the chest,' and *σκοπειν*, 'I examine.' An instrument invented by Laënnec, of Paris, for exploring the chest. The stethoscope, sometimes called *Pectoriloque*, is a cylinder of wood, from four inches to a foot long; pierced through and through by a longitudinal canal about a quarter of an inch in diameter. The longer are generally composed of two portions, that fit together by means of a screw, one of which is hollowed at the extremity, in the shape of a funnel. These two portions being screwed to each other, the physician lays hold of the instrument, as he would of a pen, puts the funnel-shaped extremity on the chest of the patient, and applies his ear to the other. To explore the pulsations of the heart, the funnel is plugged up by a piece of the same kind of wood accurately adapted to it, and pierced by a canal of the same width as that in the body of the instrument. Stethoscopes are sometimes flexible, like the flexible ear-trumpet.

This mode of examining affections of the chest, *Steth'oscopy, Stethoscop'ia, &c.*, is what Laënnec terms *Auscultation médiante, Mediate Auscultation.*

STETHOSCOPIA, see *Auscultation*, and *Stethoscope*.

STETHUS, Thorax.

STEW, Stove.

STHENIA, *Steni'a, Diath'esis sthen'ica, Status sthen'icus, Vis aucta*, from *σθενος*, 'strength,' 'power.' Excess of strength; excitement of the organic actions. A word used, especially by the Brunonians, as well as *Athenia*,—its antitheton. *Sthenic or dynamic diseases* are such as depend upon excessive excitement.

STHENICUS, Active.

STHENOPYRA, Synocha.

STIBI, Antimonium.

STIBIALIS, Antimonial.

STIBIATUS TARTRIS LIXIVLÆ, Antimonium tartarizatum.

STIBII BUTYRUM, Antimonium muriatum—s. Deuto-murias sublimatus, Antimonium muriatum—s. et Potassæ deuto-tartras, Antimonium tartarizatum—s. Hydrosulphuretum rubrum, Antimonii sulphuretum rubrum—s. Oxidum acido muriatico oxygenato paratum, Algaroth—s. Oxidum album mediante nitro confectum, Antimonium diaphoreticum—s. Oxidum præcipitando paratum, Algaroth—s. Oxodes album, Antimonium diaphoreticum—s. Oxodes sulphuretum, Antimonii sulphuretum præcipitatum—s. Oxydi sulphurati hydro-sulphuretum luteum, Antimonii sulphuretum præcipitatum—s. Oxydulati sulphuretum, Antimonii sulphuretum præcipitatum—s. Oxydulum vitreatum, Antimonii vitrum—s. Oxidum semivitrum, Antimonii vitrum—s. Oxidum sulphuratum, Oxidum stibii sulphuratam—s. Subhydrosulphas, Antimonii sulphuretum rubrum—s. Submurias præcipitando paratum, Algaroth—s. Sulphurati hydrosulphuretum rubrum, Antimonii sulphuretum rubrum—s. Sulphuretum nigrum, Antimonium—s. Vitrum, Antimonii vitrum.

STIBIOSUM HYDROSULPHURETUM CUM SULPHURE, Antimonii sulphuretum præcipitatum—s. Oxidum, Antimonium diaphoreticum.

STIBIUM, Antimonium.

STICHAS ARABICA, *Lavendula stœchas.*

STICKWORT, Agrimony.

STICTA PULMONACEA, Lichen palmariarius.

STIFF JOINT, MUSCULAR, Contractura.

STIFF JOINTS, Milk sickness.

STIFNECK, Torticollis.

STIGMA, Cicatrix.

STIGMATA, see *Nævus*. The breathing pores of insects are so called.

STIGMATA OVARIO'RUM, *Cicatrix Ovario'rum*. The cicatrices left in the ovary after the escape of ova.

STILBOMA, Cosmetic.

STILL, Alembic.

STILLA, Gutta.

STILLATIO SANGUINIS E NARIBUS, Epistaxis.

STILICIDIUM, *Substil'ium, from stillare*, 'to drop.' This term is often used synonymously with *Strangury*. It means the flow of any fluid—particularly the urine—drop by drop. Also a kind of embrocation, *Stilicid'ium supra partem*, effected by dropping a liquid upon a part.

STILICIDIUM LACRYMARUM, Epiphora—s. *Narium, Coryza*—s. *Sanguinis e naribus, Epistaxis*—s. *Supra partem*, see *Stilicidium*.

STILLIN'GIA, *S. sylvatica, Queen's Root, Queen's delight, Yaw root, Mar'cory, Cockup hnt.* An indigenous plant, which grows in pine barrens, from Virginia to Florida. *Sex. Syst. Monœcia Monadelphia. Nat. Ord. Euphorbiacæ.* The root is said to be used in syphilis, obetinate cutaneous affections, &c., like sarsaparilla.

STIMATO'SIS, *Stymatosis, Hemorrhog'ia Penis, Stymatorrhag'ia, Phallorrhag'ia, Caulorrhag'ia*, from *στυμα*, 'priapism,' it-self from *στυμα*, 'to erect.' Hemorrhage from the male organ, accompanied or not with priapism.

STIMMI, Antimonium.

STIMULANT, *Stimulans, Excitans, Ercitans, In'citans, Incentivum, Irritans, Incitant, Hypersthen'ic, from stimulare*, 'to goad.' A medicine which has the power of exciting the organic action of the different systems of the economy. Some stimulants are *diffusible*,—that is, have a prompt but temporary action; others are *permanent or persistent*. The action of stimulants is called *Stimulation, Stimulatio, Incitatio.*

The chief stimulants are the following: *Æther Sulphuricus, Ammonia, Asafetida, Brucia, Camphora, Capsicum, Castoreum, Cinnamomum, Copaiba, Cubeba, Guaiacum, Hydrargyri Præparata, Iodinum, Nux Vomica, Olea Essentialia, Opium* (in small dose), *Piper, Sinapis, Strychnia, Zingiber*,—*Alcohol, Caloric, Electricity, Mental Emotions, (the Impetuous.)*

STIMULUS, 'a goad.' *Incitamen'tum, Irritamen'tum, Irritamentum, Potentia Irritans*. Any thing which excites the animal economy.

STINK POKE, *Dracontium fetidum*—s. *Weed, Chenopodium anthelminticum, Datura stramonium, Polanisia graveolens.*

STIPATIO, Stegnosis.

STIPATIO TELÆ CELLULOSÆ INFANT'UM. Induration of the cellular tissue of children.

STIRO'SIS, Sterilitas.

STITCH, same root as *stick*, *Sax. ſtician, (G.) stecken, (F.) Point, (L.) Punctum*: (from *passere, punctum*, 'to prick or sting.') An acute lancinating pain, like that produced by the puncture of a sharp needle.

STITCH, Common, Suture, common—s. *Royal Suture, common*—s. in the *Side, Pleurodynia.*

STIZOLOBIUM, *Delichos pruriens.*

STLENGIS, *Stridor dentium*.
 STOBÆA RUBICAULIS. A South African plant, *Nat. Ord. composiæ*. A tincture of the bruised roots is diuretic, and of great service in gravel.

STOCHEION, Element.

STOCKING, LACED, (F.) *Bas laccé*. A bandage used by surgeons, which consists of a stocking made of firm cloth or dog-skin, admitting of being tightly laced anteriorly. It is employed in varices and ulcers of the legs.

STECCHAS ARABICA, *Lavendula stœchas*.

STOMA, Mouth.

STOMAC'ACE, *Stomatoc'acé, Stomal'gia, Labriul'cium, Cheiloc'acé, Uloc'acé, Cheilomala'cia, Stomaton'na, Stomatonecro'sis*, from *stoma*, 'the mouth,' and *kakos*, 'evil.' *Cancer Oris, Canker*. Fœtor of the mouth with a bloody discharge from the gums. (F.) *Cancer aquaticus*; see *Cancer Aquaticus*. Also, *Scurvy*.

STOMACACE, *Porphyra nautica*—s. *Gangrænosum, Cancer aquaticus*—s. *Universale, Purpura hæmorrhagica*.

STOMACAL, Stomachal.

STOMACALGIA, *Cardialgia*.

STOMACH, *Stom'achus, Ventric'ulus, Nedy, Anoc'alia, Gaster*, (F.) *Estomac*, from *stoma*, 'a mouth.' One of the principal organs of digestion. It is a musculo-membranous reservoir; continuous, on the one side, with the œsophagus; on the other, with the duodenum. It is situate beneath the diaphragm, between the liver and the spleen; and occupies the epigastrium and a part of the left hypochondrium. In it the food is converted into chyme. When viewed externally, the stomach has, 1. An anterior face, which looks a little upwards. 2. An inferior face, directed downwards. 3. An inferior or colic margin, which is convex and extensive, and is called the greater curvature, (F.) *Grand courbure*. It gives origin to the omentum majus. 4. A superior or diaphragmatic margin, which is shorter, concave, and is called the lesser curvature, (F.) *Petit courbure*. The lesser omentum is attached to this. 5. A left or œsophageal orifice, called, also, the cardia, *Os ventric'uli* or upper orifice. 6. A right or intestinal, or inferior orifice, called the pylorus. 7. A considerable dilatation, situate to the left of the cardia and greater curvature—the great tuberosity of the stomach; and, 8. A less extensive dilatation, situate to the right of the greater curvature,—the lesser tuberosity or lesser cul-de-sac, *Antrum Pylori*. The inner surface of the stomach is of a reddish-white colour, and has a marbled appearance. It is constantly covered by thick mucus, and is lined by a mucous membrane, which presents numerous wrinkles. The parietes of the stomach consist of three membranes in superposition. The outermost is serous, and is an extension of the peritoneum; the middle coat is muscular,—some of its fibres running longitudinally; others, transversely, and others obliquely; the innermost membrane is of a mucous nature, *Crusta villosa ventric'uli, Gastro-myood'erie*, but not exactly a continuation of the membrane that lines the œsophagus. The mucous and muscular membranes form, at the pylorus, a valve, called the *Pyloric valve*. These three coats are united by a dense, close, areolar membrane; and, between the mucous and muscular coats, along the two curvatures especially, is a quantity of muciparous glands, called *Glands of Brunner*. The arteries of the stomach are very numerous, and proceed from the cœnaria ventriculi, the pyloric, splenic, and right and left gastro-epiploic. The veins have the same name, and pursue the same course as the arteries. They pour their blood into the trunk

of the vena porta. Its lymphatic vessels are very numerous, and pass into ganglia, situate along the two curvatures. The nerves of the stomach proceed from the pneumogastric, and three divisions of the cœliac plexus.

STOMACH CELL, see *Favulus*—s. *Disease, Lismosis*—s. *First, Inguivies*.

STOMACH PUMP, *Gastren'chyta, Antli'a gas'trica*. A useful instrument for conveying fluids to the stomach, when deglutition is impracticable, and for pumping out the contents of that organ. It consists of a forcing syringe, to the bottom and nozzle of which flexible tubes can be attached. When the object is to force fluids into the stomach, the stomach-tube must be attached to the nozzle, and passed down the throat,—the tube connected with the bottom of the syringe being placed in the fluid to be injected. To empty the stomach, the stomach-tube must be attached to the bottom of the instrument. This instrument has been of great service where poisons have been taken. The antidote, when any exists, and is at hand, should be administered immediately prior to its use.

The stomach pump was first employed in America by Dr. Physick, in the year 1812.

STOMACH, SECOND, *Proventriculus*—s. *Sick, Milk sickness*—s. *Third, Ventriculus callosus*—s. *Tube*, see *Tube, œsophageal*.

STOM'ACHAL, *Stomach'ic, Stomach'ical, Cardiac'us, Stomach'icus, Stomacha'lis, Viscera'lis*, (F.) *Stomacal, Stomachique*. That which belongs to the stomach; that which is good for the stomach; which strengthens the stomach. A medicine that gives tone to the stomach.

STOMACHALGIA, *Cardialgia*.

STOMACHI RESOLUTIO, *Dyspepsia*.

STOMACHIC, *Stomachal*.

STOMACHICAL, *Stomachal*.

STOMACHIQUE *Stomachal*.

STOM'ACHUS, from *stoma*, 'mouth.' This word has been used in several different acceptations; for example, for the œsophagus, for the cardiac orifice of the stomach, (see *Cardia*), and for the stomach itself. Hippocrates calls the neck of the bladder *στραχος κωριος*; and the neck of the uterus *της μητρας στραχος*.

STOMAL'GIA, *Stomatal'gia, Stomatodyn'ia*, from *stoma*, 'mouth,' and *algos*, 'pain.' Pain in the mouth; *Stomac'acé*.

STOMAPYRA, *Aphthæ*—s. *Aphthæ, Aphthæ*.

STOMATALGIA, *Stomalgia*.

STOMAT'IC, *Stomat'icus*, from *stoma*, 'mouth.' A medicine used in diseases, &c., of the mouth. Dentifrices, masticatories, &c., are stomatics.

STOMATITE APHTHEUSE, *Stomatitis*, aphthous—s. *Charbonneuse, Cancer aquaticus*—s. *Couenneuse, Stomatitis, pseudo-membranous*—s. *Crémense pullacée, Aphthæ*—s. *Folliculeuse, Stomatitis, aphthous*—s. *Gangræneuse, Cancer aquaticus*—s. *Mercurielle*, see *Salivation, mercurial*—s. *Ulcéreuse, Stomatitis, aphthous*.

STOMATITIS, from *stoma*, 'the mouth,' and *itis*, denoting inflammation. (F.) *Inflammation de la Bouche*; Inflammation of the mouth.

STOMATITIS, APHTHOUS, *S. follic'ular, S. ulc'erosus, Emphy'rie Aphthæ, A. Adulto'rum*, (F.) *Stomatite, S. aphtheuse, S. folliculeuse, S. ulc'ereuse*. An inflammation of the follicles of the mouth, constituting the aphthæ of the adult, which is generally accompanied by cephalic, gastric, and general disturbance. It may be either discrete or confluent, and requires general and local treatment, adapted to the case.

STOMATITIS, ERYTHRE'ATOUS. Simple inflammation of the mouth.

STOMATITIS, EXUDATIVA, Aphthæ—s. Follicular, S. aphthous—s. Gangrenous, Cancer aquaticus.

STOMATITIS, MERCURIAL, Hydrargyrostomatitis, Hydrargyrostomatitis, Stomatitis mercurialis. Inflammation of the mouth induced by mercury.

STOMATITIS OF NURSING-WOMEN appears to be a variety of S. aphthous.

STOMATITIS, PSEUDOMEMBRANOUS, (F.) Stomatite couenneuse, Diphthérie buccale, Pseudomembranous inflammation of the mouth;—in its worst form, *Stomatyphus*, (F.) *Fégarite*. Inflammation of the mouth accompanied by the exudation of a false membrane,—a disease which is rarely seen except in large foundling establishments.

STOMATITIS, ULCEROUS, S. aphthous—s. *Vesiculosa infantum, Aphthæ*.

STOMATOCACE, Stomacace.

STOMATODYNIA, Stomalgia.

STOMATO-GASTRIC, Sto'mato-gas'tricus, from *στομα*, 'the mouth,' and *γαστρον*, the stomach. Appertaining to the mouth and stomach,—as the *stomato-gastric ganglia* of the lower animals.

STOMATOMALACIA PUTRIDA, Cancer aquaticus.

STOMATONECROSIS, Cancer aquaticus, Stomacace.

STOMATONOMA, Stomacace.

STOMATOPA'NUS, from *στομα*, 'the mouth,' and *πανος*, 'a glandular tumour.' *Stomatophy'ma glandulosum, Panus Fau'cium.* Tumefaction of the glands of the mouth.

STOMATOPHY'MA, from *στομα*, 'the mouth,' and *φυμα*, 'a swelling.' A swelling in the mouth.

STOMATOPHYMA GLANDULOSUM, Stomatopanus.

STOMATOPLAS'TIC, Stomatoplas'ticus; from *στομα*, 'the mouth,' and *πλασσω*, 'I form.' The operation of forming a mouth, where the aperture has been contracted from any cause.

STOMATORRHAG'IA, Stomatorrhœ'a, Hæmorrhag'ia oris, H. fau'cium, San'guinis profu'sivum ex Orî, Hæmorrhœi'des Oris, Stomato'sis, Stomorrhag'ia, (F.) Hémorrhagie buccale, from *στομα*, 'the mouth,' and *ρηνυμι*, 'I break out.' Hemorrhage from the mouth.

STOMATORRHAGIA ALVORORUM, Phatnorrhagia—s. *Gingivarum, Ulorrhagia.*

STOMATORRHŒA, Stomatorrhagia.

STOMATOSCOPE, from *στομα*, 'mouth,' and *σκοπεω*, 'I view.' Any instrument for keeping the mouth open, so as to permit the parts within to be inspected; *Speculum oris.*

STOMATOSEPSIS, Cancer aquaticus.

STOMATOSIS, Stomatorrhagia.

STOMATOSPASMUS, Trismus.

STOMATYPHUS, Stomatitis, pseudomembranous.

STOMOMANICON, Platysma myoides.

STOMORRHAGIA, Stomatorrhagia.

STONE IN THE BLADDER, Calculi, vesical—s. *Binder, Osteocolla*—s. *Crop, Sedum*—s. *Crop, biting, Sedum*—s. *Mint, Cunila mariana*—s. *Pock, Acne*—s. *Root, Collinsonia Canadensis.*

STONES, THE, Testes.

STOOL, Dejectio.

STOOL, CALOMEL, see Calomel.

STORAX, Styrax—s. *Liquida, Liquidambar styraciflua.*

STOREY'S WORM CAKES. An empirical preparation, formed of *calomel* ℞j, *jalap.* ℥j, *sin-gib.* ℞ij, *sacch.* ℥j, *cinnab.* antim. q. s. to colour them; *symp. simp.* q. s. to make into cakes.

STORKBILL, Geranium maculatum.

STOVE. Old French *Estue, Stupa*; a

Stew, Estua'rium, (F.) Estue. A limited space, warmed artificially, and in which the air is slowly renewed. It is used for drying various substances, as plants, extracts, conserves, &c., or for taking vapour baths. In this case, the *stew* or *stove* is said to be *wet* or *humid*; in the opposite case, it is said to be *dry, (F.) sèche.* The latter, which is used by the Turks, is the *Laconicum* or *Calidarium* of the Romans. The former is their *Te'pidarium* or *Vapora'rium.* These kinds of baths greatly excite the cutaneous transpiration; and are valuable agents in rheumatic and other affections.

STRABI, see Strabismus.

STRABILISMOS, Strabismus.

STRABIS'MUS, Strabili'mos, Parop'sis Strabismus, from *στραβος*, 'twisted,' 'one who squints'; *Strabos'itas, Loxophthal'mus, Distor'sio, Lus'itas, Illo'sis, Illo'sis, Helo'sis, Squinting, Goggle Eye, (F.) Strabisme, Vue louche, Louchement.* Want of concordance of the optic axes. It may be dependent upon natural or acquired inequality in the action of the motor muscles of the eye; or a convulsive state of one of those muscles; a difference in the sensibility of the two eyes; or a cerebral affection. In the treatment, if the disease seem to depend upon an excess of strength in one of the motor muscles, we must endeavour to give tone to that which is too weak, by placing before the eye a mask having a small aperture on the side to which it is necessary to direct the pupil; or by wearing glasses, provided with a piece of looking-glass, on the side to which the eye is vitiously turned; so that the reflection may be inconvenient, and occasion the organ to be turned in an opposite direction; or by putting a black patch on the angle opposite to that to which the eye is turned. If owing to weakness, the organ must be strengthened by being exerted alone, and by leaving the other at rest. If the disease be symptomatic of cerebral affection, attention must, of course, be directed to the latter.

Strabismus may be *single* or affect one eye only, or *double*, and it may be *convergent* or *divergent.*

Those affected with Strabismus are called *Strabi, Strabo'nes, Strabo'ni, Strebli, Illi, Squint'ers, Squint-eyed*; in French, *Louches, Bigles.*

STRABISMUS, CONVERGENT, see Strabismus—s. *Divergent, see Strabismus*—s. *Double, see Strabismus*—s. *Single, see Strabismus.*

STRABONES, see Strabismus.

STRABONI, see Strabismus.

STRABOSITAS, Strabismus.

STRABOT'OMY, Strabotom'ia, from *στραβος*, 'one who squints,' and *τομη*, 'incision.' The operation for the removal of squinting by the division of the muscle or muscles that distort the eye-ball.

STRAIN, Sprain.

STRAIN, colare, (F.) couler, from *εραγγυω*, stringere, (F.) estreindre, 'to constrict or squeeze.' To pass decoctions, infusions, &c., forcibly through linen; also, to exert an effort. This is accomplished by fixing firmly the parts where the muscles to be exerted originate, in order that their full power may be developed.

STRAINING, Nirus.

STRAITS OF THE PELVIS, see Pelvis.

STRAMO'NE, Datura stramonium.

STRAMONIA, Datura stramonium.

STRAMONIUM, Datura stramonium—s. *Fetidum, Datura stramonium*—s. *Majus album, Datura stramonium*—s. *Spinosum, Datura stramonium*—s. *Vulgatum, Datura stramonium.*

STRANGAL'IDES, from *εραγγυω*, 'I torment.' Small, hard tumours, which form in the breast, when the milk does not find issue.

STRANGALION, Tubercle.

STRANGALIS, Tubercle.

STRANGALISMUS, Strangulation.

STRANGERS' FEVER, see Fever, strangers'.

STRANGULATIO, Orthopnoea, Strangulation — s. Uterina, Angone.

STRANGULA'TION, *Strangula'tio*, *Pnix*, *Pnig'mos*, *Strangalis'mus*, (F.) *Étranglement*, *Strangulation*. State of a part too closely constricted. Thus we say that there is *strangulation* of an intestinal hernia, when the opening that gives passage to the portion of protruded intestine contracts, so as to intercept the continuity of the digestive canal. In *Legal Medicine*, it means the forcible obstruction of the air passages, by a ligature or by the hand, for criminal purposes. See Suffocation.

STRANGULATOR, see Lycopoides.

STRANGURIA, Enuresis—s. Cruenta, Cystorrhagia.

STRANGURIE, Strangury—s. *Menstruelle*, *Dysmenorrhœa*.

STRANGURIOSUS; same etymon as the next. Affected with, or of the nature of, strangury.

STRANG'URY, *Strang'uria*, *Paru'ria stilla'titia*, from *σπρῦννυ*, 'to squeeze,' and *ουρον*, 'urine': *Dyu'ria*, *Uri'na Stillicidium* vel *Substillum*, (F.) *Strangurie*. Extreme difficulty in evacuating the urine, which issues only drop by drop, and is accompanied with heat, pain, tenesmus at the neck of the bladder, &c. See Ischuria, and Retention.

STRATHPEFFER, MINERAL WATERS OF. A sulphuretted water, at Strathpeffer, a few miles west from Dingwall, in Ross-shire, Scotland. It contains sulphate of soda, sulphate of lime, chloride of sodium, sulphate of magnesia, and sulpho-hydric acid.

STRATIOTES, *Achillea millefolium*.

STRATUM BACILLATUM, see Tunica Jacobi—s. Malpighii, Corpus mucosum—s. Pigmenti, see Choroid—s. Proligerum, Proligerous disc.

STRAWBERRY, *Fragaria*—s. Bush, *Euonymus Americanus*—s. Shrubby, *Rubus arcticus*—s. Tree, *Euonymus Americanus*—s. Wild, *Fragaria Virginiana*.

STREAK, PRIMITIVE, Groove, primitive.

STREATHAM, MINERAL WATERS OF. Streatham is a village near London. The waters are saline and cathartic.

STREBLI, see Strabismus.

STREBLOSIS, Luxation.

STREMMMA, Luxation, Sprain.

STREPITUS MORBUS. 'Noisy disease.' A kind of flatulent disease, said by Sorbait to be not uncommon in the Austrian Alps, in which emphysematous tumours form on different parts of the body, —accompanied by sonorous excretion of gas by the mouth and anus.

STREPITUS AURIUM, Tinnitus aurium.

STRETCHING, Pandalication.

STRIE, Vibices—s. Ciliares, Ciliary processes—s. Cornæ, *Tenia semicircularis*—s. Longitudinales Lancisii, see Corpus callosum—s. Medullares, see Processus teretes—s. Retinæ subjectæ ligamento ciliari, Halo signatus—s. Semilunares, *Tœnia semicircularis*—s. Terminales, *Tœnia semicircularis*—s. Transversæ Willisii, see Corpus callosum.

STRIATED MUSCULAR FIBRE, see Muscular fibre.

STRIATUS, *Cannellé*, Grooved, see Corpora striata.

STRIBILIGO, Efflorescence.

STRICTURA, Stricture—s. Ani, Stricture of the rectum—s. Intestini recti, Stricture of the rectum—s. Intestinali recti spasmodica, Stricture of the rectum, spasmodic—s. Œsophagi callosa,

Dysphagia constricta—s. Œsophagi spasmodica, Œsophagismus—s. Pharyngis seu Œsophagi vera, *Dysphagia constricta*—s. Præputii, Phimosi—s. Urethræ, Urethrostenosis—s. Ventriculi, Stricture of the stomach.

STRICTURE, *Strictu'ra*, from *stringere*, *strictum*, 'to tie hard.' *Coarcta'tio*, *Stegno'sis*, (F.) *Rétrécissement*. A diminution or contracted condition of some tube or duct, as the œsophagus, rectum, urethra, &c. This must be dilated by appropriate bougies. Strictures may, also, occur in the intestines: they are unmanageable, with the exception of those of the rectum, which admit of topical applications.

STRICTURE OF THE ŒSOPHAGUS, *Dysphagia constricta*—s. of the Pharynx, *Dysphagia constricta*.

STRICTURE OF THE RECTUM, SPASMODIC, *Strictu'ra Intestini Recti spasmodica*, *Obstruc'tio Recti spas'tica*. An affection occurring in the nervous especially, which subsides spontaneously, after a longer or shorter continuance.

Stricture of the rectum, *Strictu'ra Ani* seu *Intestini Recti*, *Archostegno'ma*, *Rectostenosis*, *Euthyenterostenoma*, *Archostegno'sis*, *Archostenosis*, *Proctoœnclisis*, *Angusta'tio et Restrictio intestini recti vel ani*, *Stenochoria intestini recti*, *Proctostenosis organica*, occurs also organically, and is a very serious affection; being generally dependent upon scirrhus.

STRICTURE OF THE STOMACH, *Gastrostenosis*, *Coarcta'tio* seu *Strictu'ra ventriculi*. See Gastrostenosis cardiaca, &c.

STRICTURE OF THE URETHRA, Urethrostenosis—s. of the Urinary bladder, Cystostenochoria—s. Vesicæ urinariæ, Cystostenochoria.

STRIDOR DENTIUM, Brygmus.

STRIGA CARTILAGINOSA CORDIS, Isthmus of the fossa ovalis.

STRIGIL, *Strig'ilia*, *Silen'gia*, *Stelen'gia*. A flesh-brush. Also, an instrument, anciently used in the baths, for scraping off the sweat.

STRIPED MUSCULAR FIBRE, see Muscular fibre.

STROBILITTES, from *στροβίλος*, *stro'bilus*, 'a cone of the pine.' Wine impregnated with the cones of the pine.

STROEMIA, Cadaba.

STROKE, APOPLECTIC. An apoplectic seizure.

STROKE, BACK, OF THE HEART, Impulse, diastolic.

STROKE, PARALYTIC. A sudden attack of encephalo-spinal paralysis.

STROMA, *Strag'ulum*, *Stramen'tum*; from *σπρῦννυ*, *σπρῦννυμι*, 'to spread out; to cover.' The bed or foundation-texture of an organ,—as the stroma of the ovary. Applied, also, to the bed or base of any deposit,—as the 'amorphous stroma' of scrofulous deposits.

STROMBULCUS, Forceps (bullet.)

STRONGLE, *Strongylus*—s. *Géant*, *Strongylus gigas*.

STRONGYLUS, from *στρογγύλος*, 'round.' Hippocrates, Chabert, and others, mean the *Ascaris lumbricoides* by this term. The *Strongylus Gigas*, (F.) *Strongle*, *S. géant*, is, however, distinct. It has an obtuse, flat head; mouth surrounded with six flattish papillæ: the whole bursa of the male truncated: the tail of the female rounded. It is sometimes met with,—five inches, a foot, a foot and a half, and even three feet long,—and from two lines to half an inch in diameter. It is occasionally found in the human kidney; rarely in other viscera, and still more rarely in the intestinal tube.

STRONGYLUS, Teres.

STROPHOS, Tormina.

STROPHULE, *Strophalosa*.

STROPHULUS, *Lichen'aria strophulus*, *Edullit'io*, *Exanthe'ma atrophulus*, *Exor'mia atrophulus*, *Red Gum*, *Red Gown*, *Tooth Rash*, *White Gum*, *Milk-spots*, (F.) *Strophule*, *Feux de dents*. It consists of an eruption of red, or sometimes whitish pimples; occurring in early infancy, chiefly about the face, neck, and arms, surrounded by a reddish halo; or interrupted by irregular patches of cutaneous blush. All the varieties under this genus arise in consequence of the extreme vascularity and irritability of the skin at this period of life, when the constitution is liable to be disturbed by irritation, either in the alimentary canal, gums or other parts. None of these eruptions are of any importance, and no medical treatment is usually necessary. If the stomach seem at all disordered, a little rhubarb and magnesia may be administered occasionally. Willan and Bateman reckon five species, — *Strophulus intertinctus*, *Red gum or gown*; *S. albidus* or *white gum*; *S. confertus* or *runk red gum*, *Tooth rash*; *S. volat'ious* or *Erythe'ma volat'ious*, and *S. can'didus*.

STROPHULUS SYLVESTRIS, *Ignis sylvaticus*—s. *Volaticus*, *Ignis sylvaticus*.

STROPHUS, *Tormina*.

STRUCTIO, *Structura*.

STRUCTURAL; same etymon as the next. Of, or belonging to, structure.

STRUCTURE, *Structu'ra*, *Struc'tio*, *Conformatio*, *Catacecu's*, from *struere*, *structum*, 'to build.' The arrangement of the different tissues or organic elements of which animals and vegetables are composed.

STRUMA, *Bronchocele*, *Scrofula*.

STRUMA ADIPO'SA, *Obes'itas colli*. *Fatty neck*. Prominence of the neck from obesity.

STRUMES, *Scrofula*.

STRUMEUX, *Scrofulous*.

STRUMOSIS CEREBRI, *Encephalophymata*—s. *Pulmonum*, *Tuberclos* of the lungs.

STRUMOSUS, *Scrofulous*.

STRUMOUS, *Scrofulous*.

STRUTHIOPH'AGUS, from *στροθιον*, 'a young ostrich, and φάγω, 'I eat.' Struthiophagous tribes still exist in some parts of Africa.

STRUTHIUM, *Saponaria*.

STRUVE'S LOTION FOR HOOPING-COUGH, see *Lotion*, *Struve's*, for *hooping-cough*.

STRYCHNIA, *Strychni'na*, *Strych'nine*, *Strychni'num*, *Strychnium*, *Vauquelina*. An alkaline principle; solid, crystalline, inodorous, bitter, and excessively poisonous, which has been discovered in the *Strychnos nux vomica*. (*Nucis vomica*. *rasur*. ℥vj; *calcis pulv*. ℥vj; *acid. muriat*. f℥ij; *alcohol*, *acid. sulphuric dil.*, *liquor. ammonia*, *carbon. animal. purif.*, *aqus*, ℥s q. s. Digest the nux vomica in two gallons of water, acidulated with a fluidounce of muriatic acid, for 24 hours; then boil for two hours, and strain with expression through a strong linen bag. Boil the residuum twice successively in the same quantity of acidulated water, each time straining as before. Mix the decoctions, and evaporate to the consistency of thin syrup; then add the lime previously mixed with a pint of water, and boil for ten minutes, frequently stirring. Pour the mixture into a double linen bag, and having washed the precipitate well with water, press, dry, and powder it. Treat the powder repeatedly with boiling alcohol, until deprived of its bitterness; mix the liquors, and distil off the alcohol by means of a water-bath. Mix the residue with water, and having applied heat, drop in sufficient diluted sulphuric acid to neutralise and dissolve the strychnia; then add purified animal charcoal; boil for a few minutes, filter, evaporate, and crystallize. Dissolve the crystals in water, and add sufficient

solution of ammonia to precipitate the strychnia. Lastly, dry the precipitate on bibulous paper. Ph. U. S.) The medical action of strychnia on man and animals is exactly like that of the alcoholic extract of nux vomica. It is, however, more active. An eighth of a grain is sufficient to kill a large dog; and a quarter of a grain produces marked effects on the human body, when in health. It has been given in paralysis and other cases like the nux vomica. Dose, one-twelfth to one eighth of a grain.

STRYCHNIA, ACETATE OF, *Strychnis acetat*—s. *Hydriodate of Strychnis hydriodas*—s. *Iodate of Strychnis iodas*—s. *Iodide of Strychnis hydriodas*.

STRYCH'NIA, I'ODIDE OF IODHYDRATE OF. (F.) *Iodure d'Iodhydrate de Strychnine*, is made by a solution of *ioduretted iodide of potassium* into a solution of a salt of strychnia; treating the precipitate with *boiling alcohol*, and crystallizing. Used in the same cases as strychnia. Dose, a sixth of a grain.

STRYCHNIA, NITRATE OF, *Strychnis nitras*—s. *Sulphate of Strychnis sulphas*.

STRYCHNIA AND ZINC, DOUBLE IODIDE OF, *double Iodide of Zinc and Strychnia*.

STRYCH'NIAE ACET'AS, *Strychni'num seu Strychni'num aceticum*, *Acet'as strychnii seu strychnicus*, *Ac'etate of Strychnia or Strychnine*. This salt is formed by the direct combination of strychnia with acetic acid. It is given in the same cases as pure strychnia.

STRYCH'NIAE HYDRI'ODAS, *S. iodhyd'ras*, *Strychni'num hydroiodicum*, *Hydri'odas seu Iodhyd'ras strychnicus*, *Hydri'odate or Iodide of Strychnia*, is prepared by mixing a solution of *iodide of potassium* with a concentrated solution of *acetate of strychnia*.

STRYCH'NIAE I'ODAS, *Strychni'nae Iodas*, *Strychni'na Ioda'ta*, *Strychni'num seu Strychni'num Iod'icum*, *Iodas Strychnii seu Strychnicus*, *Iodate of Strychnia or Strychnine*. This salt may be formed by adding a concentrated solution of *iodic acid* to strychnia; treating with *boiling alcohol*; filtering, and leaving it to spontaneous evaporation.

STRYCHNIAE NITRAS, *Strychni'num nitricum*, *Nitrate of Strychnia or Strychnine*. Used in the same cases as strychnia.

STRYCH'NIAE SULPHAS, *Strychni'num sulphuricum*, *Sulphate of Strychnia or Strychnine*. Has the same properties.

STRYCHNINA, *Strychnia*.

STRYCHNINE, *Strychnia*.

STRYCHNINIUM, *Strychnia*.

STRYCHNIUM, *Strychnia*—s. *Aceticum*, *Strychnis acetat*—s. *Nitricum*, *Strychnis nitras*—s. *Sulphuricum*, *Strychnis sulphas*.

STRYCHNOS, *Solanum dulcamara*—s. *Guianensis*, see *Curare*—s. *Ignatii*, *Ignatia amara*.

STRYCHNOS NUX VOM'ICA, *Nux Vomica*, *Nux Metel'la*, *Caniram*, *Koochla tree*. *Family*, *Strychnoides*. *Sex. Syst.* *Pentandria Monogynia*. (F.) *Vomiquier*. A tree of the family *Strychnoideae*, which grows in India, and the seeds of which have been long sold in the shops, under the names, *Nux Vomica*, *Vomic nut*, *Poisson nat*, *Bachelors' buttons*, &c., (F.) *Noix vomique*. For a long time, these seeds were used only for poisoning rats; but of late years, an alcoholic extract has been prepared from them, which has been administered in paralytic affections, in small doses. Dose of the *Alcoholic Extract*, *Extractum nucis vom'icæ spirituosum*, *E. nucis vomicæ resinosum*, *E. n. v. alcoholicum*, (F.) *Extrait alcoolique de noix vomique*, one or two grains. It produces a kind of tetanic convulsion in the paralyzed parts, when given to the requisite extent. It has, also, been administered in chronic diar-

rhea and dysentery. The following is the formula for the preparation of the *EXTRACTUM NUCIS VOMICÆ* of the Pharm. U. S. Take of *Nux vomica*, ℞j; *Alcohol*, a sufficient quantity. Expose the *Nux Vomica* to steam till it is softened; then, having sliced and dried it, grind it into powder. Introduce it into an apparatus for displacement, and pour alcohol upon it gradually, until the liquid passes without bitterness. Distil off the greater part of the alcohol from the filtered liquor, and evaporate the residue to the proper consistence.

The bark is the *false angustura* or false *cusparia bark*; *Rohun*.

The wood of *Strychnos colubrina*, an Indian tree, contains strychnia. It was formerly considered a specific against the bites of venomous animals; and was recommended by Boerhaave in intermittents. It is the *Lignum Colubrinum*, (F.) *Bois de Couleuvre*.

STRYCHNOS TOXICARIA, see Curare.

STRYPHNA, Astringent.

STRYPHOS, Acerb.

STUDIOSUS MEDICINÆ, Philiatros.

STUDIUM INANE, Aphelxia otiosa.

STUDY, BROWN, Aphelxia otiosa.

STUFFING, Cynanche trachealis.

STULTITIA, Fatuitas.

STUMP, (G.) *Stumpf*, (D.) *Stomp*, 'a stump;' also, 'blunt.' (F.) *Moignon*. The part remaining from which a limb or other part has been amputated or removed in any manner.

STUNNED. Old French, *Estonné*, (L.) *attonitus*, 'astonished.' (F.) *Étonné*. An epithet, applied to one who, in consequence of a fall or other accident, has received such a concussion of the brain as to deprive him, for a time, of his mental manifestations.

STUPA, *Stupa*, *Stuppa*, *Stupeion*. Tow, used in certain surgical apparatuses and dressings. Also, a *Stupe*, that is, cloth or tow used in fomentations. A flannel or other article wrung out of hot water, plain or medicated, applied to a part, is a *stupe*. The act of applying such stupe is called *stuping*.

STUPE, *Stupa*.

STUPEFACIENTIA, Narcotics.

STUPEFACTIFS, Narcotics.

STUPEFACTIO, Narcosis.

STUPEFIANTS, Narcotics.

STUPEION, *Stupa*.

STUPEUR, *Stupor*.

STUPHA, *Stove*, *Stupa*.

STUPIA, Tin.

STUPIDITAS, Idiostism, Imbecility.

STUPING, see *Stupe*.

STUPOR, *Eplexia*, *Eplexia*, *Consternatio*, (F.) *Stupeur*, from *stupere*, 'to be stupified.' Diminished activity of the intellectual faculties; often amounting to lethargy. It occurs in many affections, especially in the neuroses.

STUPOR, Narcosis—s. *Artuum*, *Obdormitio*—s. *Dentium*, *Hæmodia*—s. *Formicans*, *Formication*—s. *Mentis*, *Fatuitas*—s. *Vigilans*, *Catalepsy*.

STUPPA, *Stupa*.

STUPRATIION, *Stuprum*.

STUPRUM, *Rape*, *Stupratiion*, (F.) *Defloratiion*, *Viol*. Forcible and illicit enjoyment of a married or unmarried female. When committed upon the latter, which is most commonly the case, it is also called, *Defloratiion*, *Defloratiio*, *Devirginaltiio*, *Vitiatiio*, *Apanthiismus*, &c. In judging whether rape has been committed under such circumstances, the state of the genital organs; the age of the individual; and the possibility of accidents and diseases of the parts, will have to be considered. It will be necessary, also,

to be acquainted with the evidences of virginity; and to determine,—if signs of virginity no longer exist,—whether its loss be attributable to copulation, or to the introduction into the vagina of any other body than the male organ, &c. *Recent deflowering* can, of course, be much more readily distinguished than that which has taken place some time.

STUTTERING, *Balbuties*.

STYAN, *Hordeolum*.

STYE, *Hordeolum*.

STYMATES. M. J. Cloquet has proposed this word, or *Stigmates*, from *στυγμα*, 'a mark,' to designate the marks, in form of cicatrices, which remain on the peritoneum after the obliteration of the neck of the hernial sac. They are, commonly, radiated folds, of a whitish appearance, more or less thick, and of a fibrous or fibro-cartilaginous nature.

STYLET, *Specillum*.

STYLI, *Styloid processes*.

STYLIFORM, *Styloid*.

STYLO-CERATOIDES, *Stylo-hyoideus*—s. *Cerato-hyoideus*, *Stylo-hyoideus*.

STYLO-CHONDRO-HYOÏDEUS. A name given, by Douglas and Albinus, to a fleshy fasciculus which the stylo-hyoid muscle sometimes presents, and which is attached to the lesser cornu of the os hyoides. It is the same fasciculus which Santorini calls *Stylo-hyoïdes novus*, *Stylo-hyoïdes alter*.

STYLO-GLOSSUS. A muscle situate at the anterior and superior part of the neck. It is narrow behind, much broader before; is attached to the styloid process of the temporal bone, and to the stylo-maxillary ligament; and is inserted into the side of the tongue. It raises the base of the tongue and carries it backwards.

STYLO-HYOÏDEUS, *Stylo-hyoïdien*, *Stylocerato-hyoïdeus*, *Stylo-ceratoïdes*, *Stylo-hyoïdes major*. A muscle, situate at the superior, anterior, and lateral part of the neck. It is thin and narrow,—especially posteriorly; anteriorly, it opens to give passage to the tendon of the digastricus. It is attached to the styloid process of the temporal bone, and to the body of the os hyoides. It raises the os hyoides, and carries it backwards.

STYLO-HYOID LIGAMENT is a fibrous, flattened cord, which passes from the styloid process to the lesser cornu of the os hyoides.

STYLO-HYOID NERVE is the second branch given off by the facial nerve.

STYLOID, *Styliform*, *Styloïdes*, *Graphioïdes*, *Graphoïdes*, *Graphioïdes*, *Graphidoïdes*, *Belonoïdes*, from *στυλος*, 'a style,' 'a peg,' 'a pin,' and *ειδος*, 'shape.' Shaped like a peg or pin.

STYLOID CORNUA, see *Hyoides os*.

STYLOID PROCESSES, *Pencil-like Processes*, *Processus Beloïdes* seu *Belemnoïdes* seu *Belonoïdes* seu *Graphioïdes* seu *Graphoïdes*, *Styli*, art. 1. A long and slender process of the temporal bone, to which are attached the stylo-glossus, stylo-pharyngeus, and stylo-hyoideus muscles, and the stylo-hyoid and stylo-maxillary ligaments. 2. Two slender and pyramidal processes at the inferior extremities of the radius and ulna.

STYLO-MASTOID, *Stylo-mastoïdeus*. That which relates to the styloid and mastoid processes.

STYLO-MASTOID ARTERY arises from the posterior auricular, and, in some subjects, from the occipital. It enters the stylo-mastoid foramen; passes along the aqueduct of Fallopius, and spreads its ramifications on the mucous membrane of the tympanum, and in the mastoid cells, and semi-circular canals; and terminates by anas-

terminating with a branch of the *Arteria meningæ media*, which enters by the *Hiatus Fallopii*. Murray has given the name—*Stylo-mastoid*—to the posterior auricular artery itself.

STYLO-MASTOID FORAMEN, *Foramen Stylo-mastoidæum* or *F. Aquæductus Fallopii*, (F.) *Trou anonyme*, is situate at the inferior surface of the petrous portion of the temporal bone, between the styloid and mastoid processes. It terminates the aqueduct of Fallopius, and gives passage to the facial nerve.

STYLO-MAX'ILLARY, *Stylo-maxilla'ris*. That which relates to the styloid processes and jaw.

The **STYLO-MAXILLARY LIGAMENT** is a ligamentous, flat cord, extending between the styloid process and the angle of the jaw.

STYLO-PHARYNGEUS, (F.) *Stylo-thyro-pharyngien*. A muscle, situate at the anterior and lateral part of the neck. It is slender; thin above; attached to the styloid process of the temporal bone, and terminates in the parietes of the pharynx, as well as at the posterior margin of the thyroid cartilage. It raises the pharynx and carries it backwards. Professor Chaussier has united, under the name *Stylo-pharyngien*, the three constrictor muscles of the pharynx, the stylo-pharyngeus, and palato-pharyngeus.

STYLOPH'ORUM DIPHYL'LUM, *Meconopsis diphylla*, *Celandine Poppy*, *Horn Poppy*, *Bruise root*. An indigenous plant, of the family Papaveraceæ, growing from western Pennsylvania to Wisconsin, which flowers from May to August. The juice is fetid and narcotic. Infused in wine, it has been given internally in gravel; and has been applied externally to contusions, &c.

STYLO-THYRO-PHARYNGIEN, *Stylo-pharyngien*.

STYLUS, Sound.

STYLUS EXCAVATUS, *Specillum excavatum*. A hollow sound.

STYMA, Erection, Priapismus.

STYMATOSIS, Stomatosis.

STYMATATA, from *στυμα*, 'that which constricts or thickens.' The most solid ointments. Also, the ingredients proper for increasing their consistence.

STYPSIS, Astriction, Constipation.

STYPTERIA, Alumen, Styptics.

STYPTIC, EATON'S. A name first given to *Helvetius's Styptic*, when introduced into Great Britain. It is now usually made of calcined green vitriol, ℥j; proof spirit, tinged with a little oak bark, Oij.

STYPTIC, HELVETIUS'S, see *Ferrum tartarizatum*.
STYPTIC, RUSPINI'S, *Liquor Stypticus Ruspini*. A nostrum, said to consist of gallic acid, a small quantity of sulphate of zinc and opium, dissolved in a mixture of alcohol and rose-water, which has had much reputation as an internal and external astringent.

STYPTICS, *Contrahentia*, *Constrictiva Medicamenta*, *Constringentia*, *Anastaltica*, *Stypteria*, from *στυμα*, 'I constrict.' Sometimes used synonymously with astringent, but generally applied to a substance employed to arrest hemorrhage, — *Ena'mon*. A mechanical styptic is one that arrests the flow of blood, by being applied immediately to the mouth of the bleeding vessel, or by inducing a coagulum, mechanically, in it. A chymical styptic is one which coagulates, chymically, the blood around a bleeding orifice.

STYRAC'INUM O'LEUM. Oil obtained by boiling storax in good olive oil.

STYRAX, from *στυραξ*, 'a reed,' in which it

was preserved. A resin obtained from the *Styrax officinalis* and *S. colami'ta*. It is the solid storax; — *officinal storax*. There are two kinds of storax met with: 1. The *Red Storax*, *Gum Storax*, *Thus Judæorum*, *Styrax rubra*, *Styracis balsamum*, *Balsamum styracis officinalis*, which is obtained by incision from the *Styrax officinalis*, and, perhaps, from the *Liquidambar orientalis*. The purest is in tears; but it has lost some of its smell in drying. 2. *Common Storax*, *Styrax calami'ta*. That which has been received in reeds or vessels, and has had saw-dust added immediately to thicken it. The odour of storax is fragrant; the taste aromatic. It is considered, like the other balsams, to be stimulant and expectorant, but is rarely used long.

PURIFIED STORAX, *S. colami'ta*, *S. purifica'ta*, is prepared by dissolving storax in alcohol; straining the solution; then distilling off the alcohol with a gentle heat, until the storax acquires the proper consistence. — Ph. U. S. Dose, gr. x to xxx.

STYRAX ALBA, see *Myroxylon Peruiferum* — a. Benzoin, see Benjamin — s. Calamita, see *Styrax* — s. Liquida, *Liquidambar styraciflua* — a. *Officinalis*, see *Styrax*.

STYSIS, Erection, Priapismus.

SUAVEOLENS, Benevolens.

SUB. A common Latin prefix, signifying 'beneath.'

SUBAC'TIO, *Chiro'sis*, *Cheirosis*. The operation of making plasters, extracts, &c., with the hand, or with the pestle and mortar.

SUBAFFECTIO, Hydropathia.

SUBAGITATRIX, *Tribade*.

SUB-ATLOÏDEUS, *Infra-atloideus*. (F.) *Sous-atloïdien*. That which is situate beneath the atlas or first cervical vertebra. Chaussier has given this name to the second pair of cervical nerves.

SUB-AXOÏDEUS, *Infra-axoïdens*. (F.) *Sous-axoïdien*. That which is below the axis or vertebra dentata. Chaussier has given this name to the third pair of cervical nerves.

SUBBORAS NATRICUM, Borax.

SUBCARTILAGINEUM, Hypochondre.

SUBCLAVIAN, *Subclavius*, *Subclavicula'ris*, from *sub*, 'under,' and *clavus*, 'the clavicle.' That which is under the clavicle.

SUBCLAVIAN ARTERIES, (F.) *Artères sous-clavières*, are situate at the upper part of the chest, and the lateral and lower parts of the neck. The right arises at the corresponding side of the trachea, and comes off from the *arteria innominata* or brachio-cephalic trunk. The left leaves the aorta at the end of the arch. Both extend as far as the superior surface of the first rib, in the space between the scapular muscles, beyond which they take the name *axillary arteries*. The subclavian arteries run, for some distance, without sending off any branch. In the neighbourhood of the first rib, however, they give off, 1. Upwards, the vertebral and inferior thyroidal. 2. Downwards, the internal mammary and superior intercostal. 3. Outwards, the transverse cervical or posterior scapular, the superior scapular, and the posterior cervical or profunda.

SUBCLAVIAN OR SUBCLAVIUS MUSCLE, *Subclavia'nus*, (F.) *Costo-claviculaire* (Ch.). *Sous-clavier*, is situate at the superior and anterior part of the chest. It is attached, by its inner extremity, to the superior surface of the cartilage of the first rib; and by its superior margin and outer extremity to the inferior surface of the clavicle. This muscle depresses the clavicle, and carries it forward. When the shoulder is fixed, it can raise the first rib.

SUBCLAVIAN VEINS, (F.) *Veines sous-clavières*,

are continuations of the axillary, and extend from the inferior extremity of the scalenus anticus, in front of which they pass, to the vena cava superior, which they form by their union. The right subclavian vein is very short; the left, longer and broader. These veins receive the mouths of the internal and external jugulars, vertebral and superior intercostal. The left subclavian receives two veins more than the right,—the left internal mammary and left inferior thyroid. The thoracic duct opens into the left subclavian:—the corresponding great lymphatic vessel into the right.

SUBCLAVIC'ULA, from *sub*, 'under,' and *clavicula*, 'the clavicle.' The first rib.

SUBCLAVICULARIS, Subclavian.

SUBCLAVIUS, Subclavian muscle.

SUBCRUEN'TUS, 'somewhat bloody;' from *sub*, and *cruentus*, 'bloody;' *Hyph's'mos*. That which has the colour and nature of blood. An epithet given to certain excreted substances, which are mixed with blood, or have the appearance of blood.

SUBCRURÆI, see *Cruræus*.

SUBCUTA'NEOUS, *Subcutaneus*, from *sub*, 'under,' and *cutis*, 'the skin;' *Intercuta'neus*, (F.) *Sous-cutané*. That which is placed immediately under the skin.

SUBCUTANEUS COLLI, *Superficialis colli*—s. *Malæ* (Nervus), Orbital nerve.

SUBDELIRIUM, Typhomania.

SUB'DITA, *Subditit'ia*, from *subdere*, 'to put under;' *Pros'theta*. Medicines introduced into some one of the natural apertures;—as suppositories, pessaries, &c.

SUBDITITIA, *Subdita*.

SUBDUCTIO, Dejection.

SUBER, *Cork*:—the bark of the *Quercus Suber* or *Cork Tree*. (F.) *Liège*. Family, *Amentaceæ*. *Sax. Syst.* *Monœcia Polyandria*. Cork, when burnt, is applied as a mechanical styptic to bleeding piles, &c. Surgeons use it for making tents; and it has been recommended to be worn as an amulet to suppress the secretion of milk!

SUBETH, *Coma*.

SUBFRONTALIS SUTU'RA. A suture resulting from the articulation of the os frontis with the nasal process of the superior maxillary bone, and the proper bones of the nose.

SUBGRONDATIO, Depression.

SUBHUMERATIO, Catomismos.

SUBIGATOR, *Tribade*.

SUBINFLAMMATIO, *Subinflammation*—s. *Hepatis*, *Hepatitis*, chronic.

SUBINFLAMMATION, *Subinflamma'tio*, from *sub*, 'under,' and *inflammatio*. *Inflammatiuncula*, *Hypophlegma'sia*. A mild degree of inflammation, so slight as hardly to deserve the name *inflammation*. Broussais understood by the term, an augmentation in the vital phenomena of the vessels that convey white blood. Lymphatic engorgements, scrofula, herpes, and cancer he considered *subinflammations*.

SUBINTRANTES FEBRES, from *sub*, 'under,' and *intrare*, 'to enter.' *Communicantes febres*. Fevers primarily intermittent, whose paroxysms approximate, so that one paroxysm begins before that which preceded it has gone through its stages.—L. Bellini.

SUBJECTIVE SENSATIONS, see *Sensation*.

SUBJEE, *Banque*.

SUBLIGACULUM, *Truss*.

SUBLIGATURA, *Truss*.

SUBLIMENTUM, *Enœorema*.

SUBLIMATE, *CORROSIVE*, *Hydrargyri oxymurias*.

SUBLIMATION, *Sublima'tio*, *Meteoris'mus*, *Hypo'sis*, from *sublimo*. 'I raise up.' An operation by which dry and solid matters are volatilized

and condensed at the upper part of a subliming apparatus. Calomel, sal ammoniac, &c., are commonly obtained by sublimation. The product of sublimation is a *Sublimate Sublimatum*, (F.) *Sublimé*.

SUBLIMATUS CORROSIVUS, *Hydrargyri oxymurias*.

SUBLIME, *Sublimis*.

SUBLIME, *Enœorema*, *Sublimate*—s. *Corrosif*, *Hydrargyri oxymurias*.

SUBLI'MIS, (F.) *Sublime*, 'high, elevated, superficial.' Anatomists have given the name *sublimis* to certain muscles, which are situate more superficially than their kindred muscles. These last they have called *profundi*. Of the former, the *flexor sublimis digitorum* is an example.

The French use the term '*respiration sublime*' for the respiration which is accompanied by considerable elevation of the ribs, and with separation of the *alæ nasi* at the time of inspiration.

SUBLINGUA, *Uvula*.

SUBLIN'GUAL, *Sublingua'lis*, (F.) *Souslingual*, from *sub*, 'under,' and *lingua*, 'the tongue.' That which is seated under the tongue.

SUBLINGUAL ARTERY, with some, is the *Lingual*. With others, it is a branch given off by the lingual opposite the genio-glossus muscle, which is distributed particularly to the sublingual gland, to the mylo-hyoid, and genio-glossus muscles, &c.

SUBLINGUAL GLAND, *Glandula sublingua'lis*, *G. Bartholinia'na*, *G. Rivinia'na*, is seated in the substance of the inferior part of the mouth, beneath the anterior part of the tongue. It is smaller than the submaxillary, of which it frequently seems to be only a prolongation. It is oblong, flattened, amygdaloid, and is covered by the mucous membrane of the mouth, beneath which it projects. This gland has 10 or 12 excretory ducts—*Ductus Rivinia'ni* seu *Waltheria'ni*—some of which open beneath the frænnum linguæ, joining Wharton's duct, whilst others pierce the mucous membrane of the mouth separately. It has the same structure as the parotid.

SUBLINGUIUM, *Uvula*.

SUBLINGUUM, *Epiglottis*.

SUBLOB'ULAR, *Sublobula'ris*; from *sub*, 'under,' and *lobus*, 'a lobe.' That which is placed under a lobe.

SUBLOBULAR VEINS OF THE LIVER. The veins in which the intra-lobular veins terminate. By their union, the sublobular veins form the hepatic veins.

SUBLUXATIO, *Sprain*.

SUBMAX'ILLARY, *Submaxilla'ris*, *Infra-maxilla'ris*, (F.) *Sous-maxillaire*, from *sub*, 'under,' and *maxilla*, 'the jaw.' That which is seated beneath the jaw.

SUBMAXILLARY GANGLION is a small nervous ganglion, situate opposite the gland. It seems to be formed by the superior branch of the Vidian nerve, and communicates with the lingual nerve of the inferior maxillary. Its filaments form a plexus which penetrates the submaxillary gland.

SUBMAXILLARY GLAND, *Max'illary Gland*, *Hypognath'aden*, is a salivary gland, less than the parotid, seated at the inner side of the ramus and body of the inferior maxillary bone, in the triangular space between the two bellies of the digastricus. Irregularly ovoid, and flattened on three surfaces, it has the same aspect and organization as the other salivary glands. Its excretory duct is called *Wharton's Duct*, and terminates at the side of the frænnum linguæ, by a very small orifice. It is also called *Ductus inferior*.

SUBMEN'TAL, *Submenta'lis*, (F.) *Sousmental*,

from *sub*, 'under,' and *mentum*, 'the chin.' Situate under the chin.

SUBMENTAL ARTERY is furnished by the facial, near the base of the jaw. It passes forwards along the attachment of the mylo-hyoidens, to which it furnishes branches that cross it to anastomose with those of the sublingual. Near the median line it bifurcates, to be distributed to the chin and muscles of the infra-hyoid region.

SUBMENTAL VEIN, which accompanies the artery, opens into the labial.

SUBMER'SION, *Submer'sio*, from *sub*, 'under,' and *mergere*, *mersum*, 'to plunge.' The act of plunging, or being entirely plunged, in a liquid.

Asphyx'ia by *submer'sion*, *Drowning*, *Asphyxia Immer'sorum*, is not owing to a certain quantity of liquid being introduced into the alimentary or air-passages; but simply to the interception of air, and of the respiratory phenomena. It is a case of suffocation, the signs of which, on dissection, are equivocal, without circumstantial evidence.

SUBMISSIO, Remission—*s. Cordis, Systole.*

SUBMU'COUS, *Submuco'sus*; from *sub*, 'under,' and *mucus*. Under a mucous membrane.—as the 'submucous areolar tissue.'

SUBMURIAS AMMONIACO-HYDRARGYRIGUS, Hydrargyrum præcipitatum.

SUBMUS'CLAR, *Submuscula'ris*; from *sub*, 'under,' and *musculus*, 'a muscle.' Seated beneath muscles or a muscular layer.

SUBOCCIP'ITAL, *Suboccipita'lis*; from *sub*, 'under,' and *occiput*. That which is situated under the occiput.

SUBOCCIP'ITAL NERVE, Occipital nerve.

SUBOR'BITAR, *Suborbita'rius, Infra-or'bitar, Infra-orbita'lis, Infra-orbita'rius*, (F.) *Sous-orbitaire*, from *sub*, 'under,' and *orbita*, 'the orbit.' That which is seated beneath the orbitar cavity.

SUBORBITAR ARTERY, *Infra-orbitar, A.*, proceeds from the internal maxillary, from which it separates near the anterior and superior part of the zygomatic fossa. It enters the infra-orbitar canal, and passes through it, giving branches to the anterior and superior dental canal; issues by the foramen infra-orbitarium; and divides, in the fossa canina, into a number of branches, which lose themselves in the neighbouring parts. The infra-orbitar vein follows the same course.

SUBORBITAR CANAL, *Infra-orbitar Canal*, (F.) *Canal ou Conduit sous-orbitaire*, is a small canal, which runs obliquely through the substance of the inferior paries of the orbit. It begins, behind, by a simple gutter, and divides, anteriorly, into two branches, one of which descends into the anterior paries of the maxillary sinus, whilst the other passes out, in the canine fossa, by an orifice, called *Foramen-infra-orbitarium*, (F.) *Trou sous-orbitaire*. The infra-orbitar artery and nerve pass along it.

SUBORBITAR FISSURE, *Infra-orbitar Fissure, Rima cana'lis orbita'rii, Fissura infra-orbita'lis*. A fissure in the superior maxillary bone; the superior commencement of the suborbitar canal.

SUBORBITAR FOSSA, Canine fossa.

SUBORBITAR NERVES, *Infra-orbitar Nerves*, seem to terminate the superior maxillary. They issue from the infra-orbitar canal by the foramen of the same name, and spread out in a radiated manner in the fossa canina, to divide into *superior or palpebral filaments, inferior or labial, internal or nasal, and external or buccal.*

SUPERITONE'AL, *Subperitonea'lis*; from *sub*, 'under,' and *peritoneum*. That which lies under the peritoneum.

SUPERITONEAL APONEUROSIS, Fascia, subperitoneal—*s. Ganglia*, see Spermatic ganglion.

SUBPLACENTA, Decidua membrana.

SUBPOPLITÆUS, *Poplita'us muscla.*

SUBPUBIC ARCH, *Arcus subpu'bicus*. A strong arch of the superior pelvic aponeurosis, which completes the posterior orifice of the obturator or subpubic canal.

SUBPUBIC MEMBRANE, Obturator membrane.

SUBPUBIO-FEMORALIS, *Abductor brevis*—*s. Prostaticus, Compressor prostatae.*

SUBPUTRIS, *Hyposaprus.*

SUBSCAP'ULAR, *Subscapula'ris*, (F.) *Sous-scapulaire, Sous-scapulo-trochinien*, from *sub*, 'under,' and *scapula*, 'the shoulder-blade.' That which is beneath the scapula.

SUBSCAPULAR FOSSA, *Fossa Subscapula'ris*. A considerable excavation at the anterior surface or venter of the scapula, in which the subscapularis is seated.

SUBSCAPULAR MUSCLE, *Subscapula'ris Muscla, Immer'sus, Infra-scapula'ris*, (F.) *Sous-scapulo-trochinien* (Ch.), *Porte-feuille, Muscle sous-scapulaire*. A muscle situate in the above-mentioned fossa. It is flat, broad, and triangular; is attached, by its base, to the subscapular fossa and to the anterior lip of the edge of the spine of the scapula, and is inserted into the lesser tuberosity of the humerus. It carries the arm in rotation inwards. It can also depress it, and bring it towards the body.

SUBSCAP'ULAR NERVES are two in number. One arises from the brachial plexus above the clavicle; the other from the posterior aspect of the plexus within the axilla. They are distributed to the subscapularis muscle.

SUBSE'ROUS, *Subsero'sus*; from *sub*, 'under,' and *serous*. Under a serous membrane,—as the 'subserous areolar tissue.'

SUBSIDENTIA, Sediment.

SUBSTANCIE ÉMAILLÉE DES DENTS, Enamel of the teeth—*s. Horny*, see Tooth.

SUBSTANCE, HYALINE, *Cytoblastema*—*s. Intercellular, Cytoblastema*—*s. Vitrée des Dents*, Enamel of the teeth.

SUBSTANCE, WHITE, of SCHWANN. A hollow cylinder within the tubular nervous fibre, which differs in composition and refracting power from the matter that occupies the centre of the tube.

SUBSTANTIA ADAMANTINA DENTIUM, Enamel—*s. Filamentosa dentium, Enamel*—*s. Hyalina, Cytoblastema*—*s. Ossea dentium*, see Tooth—*s. Ostoides*, see Tooth.

SUBSTANTIA PERFORATA ME'DIA. When the pia mater has been removed from the space between the crura cerebri termed the *intercrural* or *interpeduncular*, the surface appears cribriform from the perforations of the numerous minute vessels which penetrate it. This is the *substantia perforata media* of Vicoq d'Asyr.

SUBSTANTIA PULPOSA DENTIS, Dental pulp—*s. Rhomboides, Corpus dentatum*—*s. Spongiosa Urethræ, Corpus spongiosum urethræ*—*s. Vitrea dentium, Enamel of the teeth*—*s. Vitrea, Cytoblastema.*

SUBSTANTIVE, *Substanti'vus*; from *substare*, (*sub* and *stare*), 'to stand under or subsist.' An epithet applied by Dr. Paris to aliments which are nutritious, in contradistinction to *adjective* aliments, which are themselves not possessed of nutritive virtues, but impart to the digestive organs greater energy, so as to enable them to extract more nutriment from the substantive aliments. Meat, for example, is a *substantive* aliment; the condiment, as mustard, eaten with it, an *adjective* aliment.

SUBSTILLUM, Stillidium.

SUBSULTIO, Palpitation.

SUBSULTUS TEN'DINUM. *Saltus ten'dinum, Clonus subultus, Subsultus, Corpulog'is spasmod'ica, Myopal'mus, Twitching of the Ten-*

lons, (F.) *Soubreeaut*, from *subeilire*, *subultum*, (*sub* and *salire*), 'to make short leaps.' Twitching, communicated to the tendons by the involuntary and instantaneous contraction of the muscular fibres. It is more observable at the wrist than elsewhere; and is an evidence of great cerebral irritability, and debility, when it occurs at an advanced period of fever.

The muscular agitations or twitchings observed in febrile diseases, especially of children, have been termed *Convulsibil'itas*, *Sclerotyr'bē febr'ilis*, and *Irritabil'itas morbo'sa*.

SUBSURTITAS, Deafness.

SUB'UBERES, from *sub*, 'under,' and *ubera*, 'the breasts.' *Infantes eugen'tes*, *Sucking children*. Infants at the breast, in contradistinction to the *Ex'uberes*, ἀπογαλακτοι, or those which have been weaned.

SUBUN'GUAL, *Subun'guical*, (F.) *Sous-ungéale*, from *sub*, 'under,' and *unguis*, 'a nail.' Belonging to parts under the nail;—as *subungual exostosis*, (F.) *Exostose sous-ungéale*, an exostosis under the nail of the great toe especially.

SUBVRSIO STOMACHI, Vomiturition.

SUBVERTEBRA, Sacrum.

SUBVERTEBRUM, Sacrum.

SUBVOLA, Hypothenar.

SUC, *Succus*—*s. de Citron*, see *Citrus medica*—*s. Gastricæ*, *Gastric juice*—*s. M'dullaire*, *Marrow*—*s. du Limon*, see *Citrus medica*.

SUCCA'GO, from *succus*, 'juice.' The inspissated juice of plants; robs, jellies, &c.

SUCCEDA'NEUM, *Succida'neum*, *Substitu'tum*, *Antiballon'enum*, *Surroga'tum*, *Antembal'lon'enum*, *Quid pro quo*, from *succedere*, (*sub*, and *cedere*), 'to go under, to come in place of another.' An epithet for medicines that may be substituted for others possessing similar properties.

SUCCENTURIA'TUS, from *succenturiare* (*sub*, and *centuria*), 'to supply a soldier to fill a vacancy,' and hence, 'to substitute or put in the room of.' That which is a substitute for another; as *Renes succenturiati*, *Ventriculus succenturiatus*, &c.

SUCCHAR, *Saccharum*.

SUCCIDANEUM, *Succedaneum*.

SUCCIN, *Succinum*.

SUCCINCTURA, *Diaphragm*.

SUCCINCTUS, *Diaphragm*.

SUCCINI RESINA, *Musk*, artificial.

SUCCIN'IC ACID, *Ac'idum Suc'cini*, *A. Succin'icum*, *Acor Succin'eus*, *Sal Succini*, *Sal volat'ilē Succini*, has been considered antispasmodic and diaphoretic, in the dose of from five to twenty grains.

SUC'GINUM, *Elec'trum*, *Ambra*, *Ambra*, *Am-par*, *Bereni'cē*, *Amber*, *Yellow Amber*, (F.) *Succin*, *Ambre jaune*. This substance, which is found on the shores of the Baltic, is composed of a resinous matter, of essential oil, and an acid *sui generis*. It is inodorous, except when heated or rubbed; insipid; in fragments of a pale golden-yellow colour; transparent, and has a shining lustre. S. g. 1.08; insoluble in water, and slightly acted on by alcohol. It is used for affording its essential oil—the *O'leum* or *Bal'eum Suc'cini*, (F.) *Huile de Succin*. This oil possesses stimulant, antispasmodic, diuretic, and rubefacient properties.

The *O'leum Suc'cini rectificatum*, *Rectified Oil of Amber*, is made as follows:—*Oil of Amber*, Oj; *water*, Ovj. Mix in a glass retort, and distil until Oiv of the water have passed with the oil into the receiver; separate the oil from the water, and keep it in well-stopped bottles.—(Ph. U. S.)

The *White amber*, *Leuceleotrum*, (F.) *Ambra blanc*, is a variety.

SUCCINUM CINEREUM, *Ambergris*—*s. Griseum*, *Ambergris*.

SUCCION, *Sucking*.

SUCCISA, *Scabiosa succisa*—*s. Praten'sis*, *S. succisa*.

SUCCOLATA, *Chocolate*.

SUCCORY, *WILD*, *Cichorium intybus*, *Chironia angularis*.

SUC'UBUS, from *sub*, and *ubare*, 'to lie.' Some authors have used this word synonymously with *nightmare*. Others mean by it a female phantom, with which a man in his sleep may believe he has intercourse;—as *Incubus* has been applied to the male phantom, with which a female may dream she is similarly situated.

SUCCUS, *Chylus*, *Opos*, *Opis'ma*, *Chylis'ma*, *Echyloma*, *Apothim'ma*, *Juice*, (F.) *Suc*. The fluid obtained by pressing plants, flesh, &c.; *succus expressus*. It is, also, applied to certain animal fluids, as *S. Gastricæ*, &c.

SUCCUS ACACIÆ GERMANICÆ INSPISSATUS, see *Prunus spinosa*—*s. Acaciæ nostratis*, see *Prunus spinosa*—*s. Arborum*, *Sap*—*s. Cicutæ spissatus*, *Extractum conii*—*s. Cyrenaiicus*, *Laserpitium*.

SUCCUS ENTER'ICUS, *S. Intestina'lis*, *Intestinal Juice*. The fluid secreted from the lining membrane of the small intestines.

SUCCUS EXPRESSUS, *Apothlimma*—*s. Gastricus*, *Gastric juice*—*s. Glycyrrhizæ*, *Extractum glycyrrhizæ*—*s. Hypocistidis*, see *Cytinus*—*s. Intestinalis*, *Succus entericus*—*s. Japonicus*, *Catechu*—*s. Limonis*, see *Citrus medica*—*s. Liquiritiæ*, *Extractum glycyrrhizæ*—*s. Nervæus*, *Nervous fluid*—*s. Nutritivus*, *Chyle*—*s. Orni concretus*, see *Fraxinus ornus*—*s. Pancreaticus*, see *Pancreas*—*s. Spissatus Aconiti Napelli*, *Extractum aconiti*—*s. Spissatus atropæ belladonnæ*, *Extractum belladonnæ*—*s. Spissatus conii maculati*, *Extractum cicutæ*—*s. Spissatus hyoscyami nigri*, *Extractum hyoscyami*—*s. Spissatus lactucæ sativæ*, *Extractum lactucæ*.

SUCCUS'ION, *Hippocrat'ic Succus'ion*, *Succus'io*, from *succutio* (*sub*, and *quatio*), 'I shake from beneath.' A mode of ascertaining the existence of a fluid in the thorax, (*fluctuation by succussion*;) by giving the body one or more slight shakes.

SUCCUSSIO, *Ballotement*.

SUCHOR, *Saccharum*.

SUCKING, *Suc'tio*, *Suctus*, *Athel'sis*, *Bdalsis*, *Myz'e'sis*, (F.) *Succion*, from *eugere*, *suctum*, 'to suck.' The act of drawing liquid into the mouth, by forming a vacuum with the tongue acting as a piston, during inspiration.

SUCKING BOTTLE. A bottle so formed, that, when filled with milk, it can be sucked from instead of the breast.

SUCKING CHILD, *Lactens*. A suckling.

SUCKLE, *Lactare*, γαλακτορροφειν, τρῖθησιν, (F.) *Allaiter* ou *Alaiter*. To give suck. To nurse.

SUCKLING, *Lactation*, *Sucking child*.

SUCRE, *Saccharum*—*s. Candi*, *Saccharum candidum*—*s. de Lait*, *Sugar of milk*—*s. de Saturene*, *Plumbi superacetat*.

SUCTIO, *Exsuctio*, *Sucking*.

SUCTION POWER. The force exerted on the blood in the veins, by the active dilatation of the heart. See *Derivation*.

SUCTO'RIA, from *sugo*, 'I suck.' Animals provided with mouths for sucking. Also, organs for sucking or adhesion,—hence termed *suctorial*—as 'suctorial oscula.'

SUCTORIAL, see *Suctoria*.

SUCTUS, *Sucking*.

SUDAM'INA, *Hydro'ata*, *Hidro'ta*, *Pap'ula sudora'les*, *Suffens'ra*, *Alha'sef*, *Planta noctis*, *Boa*, from *sudor*, 'sweat.' Small vesicles,

which appear upon the skin, especially in the summer time, in hot countries, and in diseases attended with much sweating. It is a military eruption. See Military fever.

SUDAMINA, Desudatio, *Échaubouluers*, Lichen tropicus.

SUDARIUM, Achicolum.

SUDATION, Hidrosis.

SUDATORIA, Hidrosis — s. Maligna, see Sudor Anglicus.

SUDATORIUM, Achicolum.

SUDOR, *Hidros*, (F.) *Sueur*, 'sweat.' The product of cutaneous transpiration, when visible on the surface of the body. It is colourless; of an odour more or less strong and variable; and of a saline taste. It is composed, according to Berzelius, of water, lactic acid, lactate of soda united with a little animal matter, chloride of sodium, and a little chloride of potassium, an atom of earthy phosphate, and some oxyd of iron.

SUDOR, Military fever.

SUDOR ANGLICUS, *Hidron'osus*, *Hidrop'gra*, *Hidrop'getos*, *Febri' sudato'ria*, *Milia'ris sudato'ria*, *Sudor milia'ris*, *Morb'us sudatorius*, *Ephem'era malig'na*, *E. sudatoria*, *E. Britan'nica*, *Pestis Britan'nica*, *Sudato'ria malig'na*, *E. Anglica pestilens*, *Sweating Sickness*, *Sweating Fever*, (F.) *Suette*, *S. Miliare*, *S. epidémique*, *Sueur Anglaise*. A very severe epidemic disease, characterized by profuse sweating, which appeared in England in 1486; and recurred, at different times, until about the middle of the 16th century. It was accompanied with coldness, excessive prostration of strength, palpitation, frequency and inequality of the pulse, &c., and terminated favourably or unfavourably in the course of 24 hours. The French have given the name *SUETTE DE PICARDIE*, *Suette des Picards*, *Fievre suante*; *Miliaris sudatoria*, *Sudor Picard'icus*, to an epidemic disease, which has appeared several times in that province; the principal symptoms of which were profuse sweats and a military eruption. The disease recurred in 1821, and has been described, at length, by M. Rayer, who considers it to consist of a simultaneous state of inflammation of various tissues; and proposes to class it with variola, scarlatina, and measles.

SUDOR COLLIQUATIVUS, S. Profusus.

SUDOR CRUENTUS, *S. sanguineus*, *Hæmatidros'is*, *Hæmatidros'is*, *Epidros'is cruent'a*, *Hæmorrhag'ia per Cutem*, (F.) *Hæmatidrose*, *Sueur de Sang*; *Sweating of blood*, *Bloody sweat*, *Hæmorrhage from the skin*. Cutaneous perspiration intermixed with blood: — a very uncommon affection.

SUDOR DULCIS, *Saccharorrhœ'a cuta'nea*, *Epidros'is sacchara'ta*. A discharge of saccharine matter by perspiration.

SUDOR LOCALIS, Meridrosis — s. Miliaris, Military fever, Sudor Anglicus — s. Partialis, Meridrosis.

SUDOR PERFUSUS, *S. Colliquati'vus*. A profuse or immoderate sweat.

SUDOR SANGUINEUS, Sudor cruentus — s. Universalis, Panhidrosis.

SUDORIFER, Sudoriferous, Sudorific.

SUDORIFEROUS, *Sudor'ifer*, *Hydroph'orus*, from *sudor*, 'sweat,' and *fero*, 'I carry.' That which carries sweat, as the *sudoriferous* ducts or glands.

SUDORIFIC, *Sudorif'icum*, *Sudor'ifer*, *Hidrot'icum*, *Hydrot'e'rium*, *Hydrotopœ'um*, *Hidropœt'icum*, from *sudor*, 'sweat,' and *facio*, 'I make.' A medicine which provokes sweating. See Diaphoretic.

FOUR SUDORIFIC WOODS, *Quatuor ligna sudorifica*, were, formerly, *guaiacum*, *perfumed cherry*, *sassa-parilla*, and *sassafras*.

SUDORIPAROUS, see Perspiration.

SUDORIS NULLITAS, Anidrosis — s. Præ-ratio, Anidrosis — s. Suppressio, Ischidrosis.

SUET, Sebum.

SUETTE, Sudor Anglicus — s. *Épidémique*, Sudor Anglicus — s. *Miliare*, Sudor Anglicus — s. *de Picardie*, Sudor picardicus — s. *des Picards*, Sudor picardicus.

SUEUR, Sudor — s. *Anglaise*, Sudor Anglicus — s. *d'Expression*, Expression, sweat of — s. *de Sang*, Diapedesis, Sudor cruentus.

SUFFERSURÆ, Sudamina.

SUFFIMEN, Suffimentum.

SUFFIMENTUM, *Hypocapnis'ma*, *Suffi'men*, *Thym'ama*, *Suffi'tus*, *Suffumiga'tio*, *Suffumiga'tion*, (F.) *Parfum*. A perfume; suffumige; fumigation.

SUFFITIO, Fumigation.

SUFFITUS, Fumigation, Suffimentum.

SUFFLATIO, Puffiness.

SUFFOCATIO, Suffocation, Orthopnea — s. Hypochondriaca, Hypochondriasis — s. Hysterica, Angone — s. Stridula, Cynanche trachealis — s. Uterina, Angone.

SUFFOCATION, *Suffoca'tio*, *Præfoca'tio*, *Apophiz'is*, *Asphyz'ia*, *Melana'ma*, from *sub*, 'under,' and *foc'us*, 'a fire-place.' Death, or suspended animation from impeded respiration, whether caused by the inhalation of noxious gases, drowning, hanging, strangling, or smothering. The principal morbid appearances in such cases are: — the lungs of a deep-blue colour, with the blood extravasated in the air-cells; right auricle and ventricle filled with dark blood, as well as the neighbouring veins; lividity of the countenance, turgescence, and, perhaps, rupture of the vessels of the brain.

Treatment of suspended animation by suffocation in general. The patient must be conveyed into a room not too warm. Blood-letting must be used, if at all, with caution; — friction must be employed with salt, or warm flannels: stimulating fluids, in a dilute state, be poured into the stomach by means of a tube, and attempts be made to inflate the lungs. Laryngotomy, if necessary.

SUFFOCATION, *Pnigoph'bia*, (F.) *Étouffement*, is used for threatened suffocation, as *strangling* is. It means the state of dyspnoea and oppression experienced when a sufficient quantity of air does not enter the lungs, or when the chemical phenomena of respiration are imperfectly executed; as in cases of asthma.

SUFFOCATION UTÉRINE, Hysteria.

SUFFRAGO, Poples.

SUFFUMIGATION, Suffimentum.

SUFFUMIGE, Suffimentum.

SUFFUMIGIUM, Fumigation.

SUFFUMINATIO, Fumigation.

SUFFUSIO, Pseudoblepsia — s. Auriginosa, Icterus — s. Bilis, Icterus — s. Colorans, Chromopsia — s. Dimidiata, Hæmiopia — s. Exclarans, Oxyopia — s. Fellis, Icterus — s. Lentis crystallina, Cataract — s. Metamorphosis, Metamorphopsia — s. Multiplicans, see Diplopia — s. Myodes, Metamorphopsia — s. Nigra, Amaurosis — s. Oculi, Cataract, Pseudoblepsia — s. Oculorum, Metamorphopsia — s. Radians, Scotasma — s. Sanguinis, Ecchymoma.

SUGAR, Saccharum — s. Barley, Penidium — s. Candy, Saccharum candidum — s. Cane, see Saccharum — s. Diabetic, Glucose — s. Fruit, Glucose — s. Grape, Glucose — s. Honey, Glucose — s. of Lead, Plumbi superacetat.

SUGAR OF MILK, *Saccharum lactis*, *Gala'to-saccharum*, *Lactine*, (F.) *Sucre de Lait*, is obtained from whey by evaporation and crystallization. It possesses the demulcent properties of the sugars.

SUGAR, PINE, see Arrowroot—s. Starch, Glucose.

SUGARS, VARIOUS, see Saccharum.

SUGARBERRY, *Celtis occidentalis*.

SUGILLATION, *Sugilla'tio*, *Livor*, *Sugillation*, *Œdema cruentum*; a bruise; from *sugillare*, 'to give a black eye.' By most authors used synonymously with ecchymosis and ecchymoma. It is, also, applied to the spots, or ecchymoses which occur in consequence of intrinsic causes,—in disease and in incipient putrefaction. It is common in dead bodies. To this last case it is, indeed, restricted by some medico-legal writers; and an interesting question sometimes arises:—Whether the appearance have been induced before death or afterwards? Whether it be a case of ecchymosis or of sugillation? In the former, the extravasated blood will usually be coagulated; not so in the latter. It is often, however, difficult to form a correct judgment without reference to the history of the case.

SUGGRUN'DIUM, perhaps from *suggerdi*, 'to go under.' The eave of a house.

SUGGRUNDIUM OCULI, Superciliary arch—s. Supercilium, Frontal protuberance.

SUCIDA, Autochir.

SUCIDAL INSANITY, Suicide.

SUCIDE, *Suici'dium*: from *sui cædes*, 'murder of one's self.' The act of killing one's self. *Autochi'ria*, *Autocton'ia*, *Idiocton'ia*, *Autophon'ia*. Suicide is very frequently the result of disease of the mind; the individual seeming, at times, to be irresistibly impelled to self-destruction.—*Melancho'lia Suicid'um*, *M. autochi'ria*, *Suici'dal Insanity*. Also, one who commits self-murder.

SUIE, Fuligo.

SUIF, Sevum.

SUITES DE COUCHES, Lochia.

SULCATUS, *Cannelé*, Grooved.

SULCULUS LABII SUPERIORIS, *Lacona Labii superioris*.

SULCUS, *Semicana'lis*, *Semicanalic'ulus*. A furrow. A groove. (F.) *Sillon*. Anatomists have given this name to grooves on the surface of bones and other organs.

French writers on anatomy often use the term *Sillons* for the grooves which lodge the arteries and creep on the surface of bones; whilst those that receive veins are called *gouttières*, 'gutters.' Also, the vulva.

SULCUS ANTERO-POSTERIOR JECORIS, see Liver—s. *Labii superioris*, *Lacona Labii superioris*.

SULCUS, LAT'ERAL, ANTE'RIOR, OF THE SPINAL MARROW. A mere trace on the marrow, marked only by the attachment of the filaments of the anterior roots of the spinal nerves.

SULCUS, LAT'ERAL, POSTERIOR, OF THE SPINAL MARROW, corresponds with the attachment of the posterior roots of the spinal nerves.

SULCUS TRANSVERSALIS, see Liver—s. Umbilicalis, see Liver.

SULFATE D'AMMONIAQUE, *Ammonis sulphas*.

SULFIDUM CARBONII, *Carbonis sulphuretum*.

SULFUR, Sulphur.

SULFURE DE CARBON, *Carbonis sulphuretum*.

SULPHAS ALUMINARIS, *Alumen*—s. *Ammoniacæ Cupratæ*, *Cuprum ammoniatum*—s. *Cadmiceus*, *Cadmii Sulphas*—s. *Kalico-aluminium*, *Alumen*—s. *Natricus*, *Soda*, sulphate of—s. *Zincicum*, *Zinci sulphas*.

SULPHUR, *Sulfur*, *Scorith*, *The'ron*, *Thion*, *Averich*, *Terra folia'ta*, *Fumus cit'rinus*, *Aq'uila*, *Brimstone*, (F.) *Soufre*. The Native Sulphur is called *Rock Sulphur*, *Sulphur vivum*, &c. Sulphur, as we meet with it, is in *rolle*, *Sulphur in*

rot'ulis, *S. rotun'dum*, *Roll Brimstone*. It is a volcanic production, and is obtained, in large quantities, from Solfatara, in Italy. *Roll Sulphur* is impure sulphur, melted, and run into moulds. It is unpleasantly odorous, when heated or rubbed; insipid; solid, and brittle. S. g. 1.99. Fusible at 226°; volatilizable by heat, and condensing unchanged.

SULPHUR ANTIMONIATUM, *Antimonii sulphuretum præcipitatum*—s. *Carburet of Carbonis sulphuretum*—s. *Chloratum*, *Sulphur*, *Chloride of*.

SULPHUR, CHLORIDE OF, *Sulphuris Chlo'ridum*, *Sulphuris Dichlo'ridum*, *Dichlo'ride of Sulphur*, *Protochlo'ride of Sulphur*, *Hypochlo'ride of Sulphur*, *Subchlo'ride of Sulphur*, *Sulphur chlora'tum*, *Hypochlore'tum Sulphuro'sum*, *Bisulphuret of Chlorine*, *Chlorum hyper sulphure'tum*, is obtained by passing dry chlorine gas over washed and dried flowers of sulphur, until they are for the most part dissolved, and distilling the decanted fluid from the excess of dissolved sulphur. One drachm of the liquid to an ounce of lard has been used in lepra, psoriasis, and other chronic cutaneous diseases. Ten drops, dissolved in ether, have been given in adynamic fever.

SULPHUR, DICHLORIDE OF, *Sulphur*, *chloride of*—s. *Hypochloride of Sulphur*, *chloride of*—s. *Iodatium*, *Sulphuris iodidum*—s. *Iodide of Sulphuris iodidum*—s. *Ioduret of Sulphuris iodidum*—s. *Liver of Potassæ sulphuretum*.

SULPHUR LOTUM, *Sulphur sublima'tum lotum*, *Washed Sulphur*, *Magisterium Sulph'uris*, *Sulphuris Flores loti*, is prepared by pouring boiling water on sublimed sulphur, so as to wash away any acid it may contain, and then drying it.

SULPHUR PRÆCIPITA'TUM, *Læo Sulph'uris*, *Milk of Sulphur*, *Precipitated Sulphur*, (F.) *Crème de Soufre*, is prepared by boiling sublimed sulphur and lime together, and adding muriatic acid to precipitate the sulphur.

SULPHUR, PROTOCHLORIDE OF, *Sulphur*, *chloride of*—s. *Subchloride of Sulphur*, *chloride of*.

SULPHUR SUBLIMA'TUM, *Sulphur*, (Ph. U. S.) *Sublimed Sulphur*, *Flowers of Sulphur*, (F.) *Soufre sublimé*, *Fleurs de Soufre*, is the sulphur of commerce, sublimed in close vessels.

Sulphur is possessed of stimulant, laxative, and diaphoretic properties. As a laxative, it is used in hemorrhoidal and other affections. In the itch, applied externally and taken internally, it has been considered as a specific (?), and it is a valuable remedy in most cutaneous affections that are local. Dose, ℥ss to ʒi.

The fæces or dregs, left in the purification or sublimation of sulphur, are called *Horse Brimstone*, *Dregs of Sulphur vivum*, *Sulphur caballi'num*, *S. vivum*, *Sulphuris vivi recremen'ta*. They are very impure, and are only used externally.

SULPHUR, VEGETABLE, *Lycopodium*—s. *Wort*, *Peucedanum*.

SULPHURATUS, *Sulphureous*, *Sulphurated*. **SULPHUREOUS**, *Sulphuro'sus*, *Sulphuro'sus*, *Sulphura'tus*, *Sulph'uretted*. Possessing the properties of, or relating to, or containing sulphur.

SULPHURETTED, *Sulphureous*—s. *Hydrogen*, see *Hydrogen*, *sulphuretted*.

SULPHURETUM AMMONIACÆ, *Ammonis sulphuretum*—s. *Ammonis hydrogenatum*, *Liquor fumans Boylii*—s. *Kalium*, *Potassæ sulphuretum*—s. *Lixiviæ*, *Potassæ sulphuretum*.

SULPHURIC ACID, *Ac'idum Sulphu'ricum* vel *Sulfuricum*, *Oleum Vitrioli*, *Spir'itus Vitrioli*, *S. v. fortis*, *Acidum vitriol'icum*, *Oil of Vitriol*, *Spirit of Vitriol*, *Vitriol'ic Acid*, *Acidum Vitriol'i dephlogistica'tum*, *Acor Sulphuris*, (F.) *Acide Sulphurique* ou *Sulfurique*. Sulphuric acid is inodorous; has a strong acid taste, and is corrosive. S. g. 1.845 (Ph. U. S.) It is escharotic,

stimulant, and rubefacient. Mixed with lard, it is sometimes used in local pains, and certain cutaneous affections.

SULPHURIC ACID, AROMATIC, *Ac'idum Sulphuricum Aromaticum, A. vitriol'icum aromaticum, A. vitriolicum alicoholis aromaticum, Elixir vitrioli, E. v. aromaticum, E. vitrioli Mynick'ti, E. vitrioli Edinburgen'sium, E. vitrioli cum tinctura aromatica, E. vitrioli dulcè seu acido-aromaticum, Alcohol cum aromat'ibus sulphuricatus, Tinctura acidi sulphurici,* is formed of sulphuric acid, f̄ijss; ginger, bruised, ℥j; cinnamon, bruised, ℥iss; Alcohol, Oij. — Ph. U. S. Dose, gr. x to xxx.

SULPHURIC ACID, DILUTED, *Ac'idum Sulphuricum Dilutum, Acidum vitriol'icum dilutum, Elixir of Vitriol, Elixir vitrioli, Spiritus vitrioli ac'idus Vogler'i, (F.) Acide sulfurique délayé,* is formed, according to the Pharmacopœia of the United States, by adding aq. destillat. f̄xxij, to acid. sulph. f̄℥j. It is tonic, astringent, and refrigerant. Dose, gr. x to xx, largely diluted. When used as a gargle, half a drachm may be added to ℥vj of water.

Very dilute sulphuric acid was formerly termed *Phlegma vitrioli*.

SULPHURIS CHLORIDUM, Sulphur, chloride of—s. Dichloridum, Sulphur, chloride of.

SULPHURIS IODIDUM, *S. Ioduratum, Sulphur Iodatum, Ioduret or Iodide of Sulphur, (F.) Soufre Ioduré, Iodure de Soufre.* It is thus directed to be prepared in the Pharmacopœia of the U. S. (*Iodin. ℥iv; sulphur. ℥j.*) Rub the iodine and sulphur together in a glass, porcelain, or marble mortar, until they are thoroughly mixed. Put the mixture into a matrass, close the orifice loosely, and apply a gentle heat, so as to darken the mass without melting it. When the colour has become uniformly dark throughout, increase the heat so as to melt the iodide; then incline the matrass in different directions, in order to return into the mass any portions of iodine which may have condensed on the inner surface of the vessel: lastly, allow the matrass to cool, break it, and put the iodide into bottles, which are to be well stopp'd.

SULPHURIUS, Sulphureous.

SULPHUROUS, Sulphureous.

SULPHUROUS, Sulphureous.

SULPHUROUS ACID, *Ac'idum sulphurosicum, A. sulphuris volat'ile, A. Sulphurosium vel Sulurosium, Spiritus sulphuris, Spiritus sulphurosus volat'ilis, Sp. sulphuris per camp'nam, Sp. vitrioli phlogistica'tus, Gas sulphuris, (F.) Acide Sulfureux, Air Acide Vitriolique.* Obtained by treating mercury with concentrated sulphuric acid, or by burning sulphur. It is sometimes used in the gaseous,—at others, in the liquid state. Sulphurous acid gas is used to disinfect cloths, confined air, letters coming from infected places, &c. It is also exhibited, with great success, in the form of fumigation, in the treatment of certain chronic cutaneous affections, and of sciatic and rheumatic pains in general. If respired pure, it acts in the manner of violent irritants; and is not long in producing death.

SULTZMALT, MINERAL WATERS OF. Sultzmalt is a village in the department of the Upper Rhine; where are several sources of cold, acidulous waters, which seem to contain carbonic acid, subcarbonate of soda, subcarbonate of lime, sulphate of lime, and a little bitumen. They are refrigerant, aperient, and alterative.

SUMAC DES CORROYEURS, *Rhus coriaria—s. Vénéneux, Rhus toxicodendron.*

SUMACH, *Rhus coriaria.*

SUMBUL. The name of a root, *Sum'buli radix, Jatamansi, Musk-root,* presumed to belong

to the Umbellifera family, much employed in Russia and Germany against cholera. Its exact botanical history is not determined. It contains a strongly odorous principle like that of musk; and is regarded as an antispasmodic.

SUMBULI RADIX, Sumbul root.

SUMEN, Hypogastrium.

SUMMER COMPLAINT. A popular name in the United States, for diarrhoea occurring in summer. It is often, also, made to include dysentery and cholera infantum. With some it means cholera infantum only.

SUMMER DISEASES, see Estival—s. Rash, Lichen tropicus.

SUMMITAS CUTIS, Epidermis.

SUMMUS HUMERUS, Acromion.

SUNBURN, Ephelides—s. Dew, Drosera rotundifolia—s. Flower, false, Helenium autumnale—s. Flower, swamp, Helenium autumnale—s. Flower, tickweed, Coreopsis trichosperma—s. Flower, turpentine, Silphium perfoliatum—s. Pain, see Hemierania—s. Rash, Lichen—s. Stroke, *Coup de Soleil—s. Egyptian, Coup de Soleil.*

SUPELLECTILE DIOGENIS, Palm.

SUPELLEX ANATOMICA, Muscum anatomicum—s. Diogenis, Palm.

SUPER. A common Latin prefix; in composition, signifying 'above.'

SUPERBUS, Rectus superior oculi.

SUPERCHLORIDUM FORMYLICUM, Chloroform.

SUPERCILIARIS, Corrugator supercilii.

SUPERCILIARY, *Superciliaris,* from *super,* 'above,' and *cilium,* 'the edge of the eyelid.' That which relates to the supercilia or eyebrows. (F.) *Sourcilier* ou *Surcilier.*

SUPERCILIARY ARCHES, *Superciliary Ridges, Arcus superciliar'ies, Suggun'dia oculo'rum, (F.) Arcades sourcilières,* are two slightly projecting apophyses, situate at the anterior surface of the os frontis, above the superior margin of the orbits. They are separated by the nasal fosse, and covered by the superciliaris muscle, to which they give attachment.

SUPERCILIARY RIDGES, Superciliary arches.

SUPERCILIUM, *Ophrys, Oph'rya, Vallum, (F.) Sourcil.* Same etymon. The eyebrows are two arched eminences,—convex above, and more or less prominent, according to the individual,—which lie on the superciliary arch of the os frontis, above the eyelids, and extend from the sides of the root of the nose to the temple. Their inner extremity or *head* is more prominent than the outer or *tail*. The eyebrows are covered with short and stiff hairs, which are directed, obliquely, from within outwards, and are, commonly, of the colour of the hair. The skin in which these hairs are implanted, rests on the *orbicularis palpebrarum, frontalis,* and *superciliaris* muscles, which move the eyebrows in different directions. The eyebrows serve as an ornament to the countenance; and by covering the eye defend it from the impression of too strong a light. They direct the perspiration also from the eye.

SUPERCILIUM ACETAB'ULL. The edge of the cotyloid cavity of the os innominatum.

SUPERCONCEPTION, see Superfecundation.

SUPEREVACUATIO, Hypercrosis.

SUPERFŒCUNDATIO, see Superfecundation.

SUPERFICIALIS COLLIS, *Subeum'neus Collis.* A nerve formed by communicating branches from the second and third cervical nerves. It is distributed to the superficial parts of the neck.

SUPERFICIES PLANTARIS PEDIS, Sole.

SUPERFŒCUNDATIO, Superfecundation.

SUPERFŒTATIO, Superfœtation.
SUPERFŒTATION, *Superfœtatio*, *Epicys-e-sis*, *Hypercys-sis*, *Superimprægnatio*, *Epig'onê*, *Superfœcundatio*, *Superfœcundation*, *Superimprægnation*, from *super*, 'upon,' and *fœtare*, 'to bring forth young.' Conception of a fœtus—*epicys-sis*—in a uterus which already contains one. The impregnation of a female already pregnant. The possibility of this has been denied; but there is abundant evidence to show, that it is possible at a very early period of pregnancy. Twin cases may be of this kind of *superconception*.

SUPERGEMINALIS, Epididymis.
SUPERGENUALIS, Patella.
SUPERHUMERALE, Epomis.
SUPERIMPRÆGNATIO, Superfœtation.
SUPERIOR AURIS, *Atollens aurem*—s. *Rotundus clitoridis*, Ischio-cavernous.
SUPERLABIA, Clitoris.
SUPERLIGAMEN, Epidesmus.
SUPERLIGULA, Epiglottis.
SUPERNUTRITIO LIENIS, Splenoncus—s. *Splenis*, Splenoncus.
SUPEROXALAS KALICUM, Potass, oxalate of.

SUPERPURGATIO, Hypercatharsis.
SUPERSCAPULARIS, *Supraspinatus*—s. *Inferior*, *Infra-spinatus*.
SUPINATEUR COURT ou **PETIT**, *Supinator radii brevis*—s. *Grand* ou *long*, *Supinator radii longus*.

SUPINATION, *Supinatio*, from *supinus*, 'lying on the back.' The movement in which the forearm and hand are carried outwards, so that the anterior surface of the latter becomes superior. In Pathology, *Supination*, *Supinatio*, *Hyptias-ma*, *Hyptias-mus*, means the horizontal position on the back, with the head thrown back, and the legs and arms extended. It is often a sign of great weakness in disease.

SUPINATOR. Same etymon. That which produces supination. A name given to two muscles of the forearm.

SUPINATOR BREVIS seu **MINOR**, *Supinator radii brevis*—s. *Longus* seu *major*, *Supinator radii longus*.

SUPINATOR RADII BREVIS, *S. brevis* seu *minor*, (F.) *Epicondylo-radial* (Ch.), *Supinateur court* ou *petit supinateur*. A muscle, seated at the outer and back part of the forearm. It is flattened, triangular, and curved upon itself, in such a manner that it embraces the superior extremity of the radius. It is attached, on the one hand, to the external tuberosity of the humerus, and to a small portion of the posterior surface of the ulna, and is inserted into the upper third of the outer and upper surfaces of the radius. It produces, by contracting, the motion of supination.

SUPINATOR RADII LONGUS, *S. longus* sive *major*, *Bra'chio-radialis*, (F.) *Huméro-sus-radial* (Ch.), *Long* ou *grand supinateur*, is seated at the anterior and outer part of the forearm. It arises from the inferior part of the outer edge of the os humeri, and from the external intermuscular aponeurosis; and is inserted, by a long tendon, into the outer edge of the radius, near the base of the styloid process. It causes the supination of the forearm, which it can likewise bend on the arm.

SUPPEDANEA, Hypopodia.
SUPLANTALIA, Hypopodia.
SUPPLEMENTA EPIPLOICA, Epiploic appendages.

SUPPLEMENTARY AIR, see Respiration.
SUPPORTER, ABDOMINAL. Belt, Russian—s. *Utero-Abdominal*, see Belt, Russian.

SUPPOSITION DE PART, Pregnancy, pro-tended.

SUPPOSITORIUM, Suppository—s. *Uterinum*, Pessary.
SUPPOSITORY, *Supposito'rium*, *Hypoth-eton*, *Bacil'lus*, *Balanis'mus*, *Balanus*, *Glans*, from *supponere*, (*sub*, and *ponere*, 'to put,') 'to put under.' Any solid medicine, in the form of a cone or cylinder, intended to be introduced into the rectum;—either for the purpose of favouring intestinal evacuations, or to act as an anodyne. Purgative suppositories are made of soap, aloes, or any other irritating substance.

SUPPRESSIO ALVI, Constipation—s. *Lochiorum*, *Ischolochia*—s. *Lotii*, *Ischuria*—s. *Mensium*, *Amenorrhœa*—s. *Menstruationis*, *Amenorrhœa*—s. *Sudoris*, *Ischidrosis*.

SUPPRESSION DU FLUX MENSTRU-EL, *Amenorrhœa*—s. *de Part*, see Parturition—s. *d'Urine*, *Ischuria*.

SUPPURANS, Suppurative.
SUPPURATION, *Suppuratio*, *Ecpye'ma*, *Pu-rulentia*, *Pyo'sis*, *Pye'sis*, *Diapye'ma*, *Diapye-sis*, *Pyogenia simplex*, *Pu'rulencia*, *Pu'rulency*, (F.) *Aboutissement*. Formation or secretion of pus, (see, also *Pyogenia*,) from *sub*, 'under,' and *pus*. It is a frequent termination of inflammation, and may occur in almost any of the tissues. This termination is announced by slight chills; by remission of the pain, which, from being lancinating, becomes heavy; by a sense of weight in the part, and, when the collection of pus can be easily felt, by fluctuation. When pus is thus formed in the areolar membrane, and is collected in one or more cavities, it constitutes an *abscess*. If it be formed from a surface exposed to the air, it is an *ulcer*: and such ulcers we are in the habit of establishing artificially in certain cases of disease.

SUPPURATIVE, *Suppurans*, *Suppurati'vus*, *Diapye'ticus*, *Ecpyo'ticus*, *Ecpyiscon'tus*. That which facilitates suppuration. Suppuratives are, generally, vesicants mixed with lard.

SUPRA. A common Latin prefix: in composition, signifying 'above.'

SUPRA-COSTA'LES, *Levato'res Costa'rum*, (F.) *Sur-costaux*, from *supra*, 'above,' and *costa*, 'a rib.' A name given to twelve small, fleshy fasciculi, which are flattened, triangular, and with radiating fibres. They pass from the transverse processes of the dorsal vertebrae to the superior margin of the rib beneath. Spigelius, Cowper, Boyer, Chaussier, and others consider them to form part of the intercostales externi.

SUPRA-OMPHALODYMIA, see Somatodymia—s. et *Infra-omphalodymia*, see Somatodymia.

SUPRA-OR'BITAR, *Supra-orbita'lis*, *Supra-orbita'rius*, (F.) *Sus-orbitaire*, from *supra*, 'above,' and *orbita*, 'the orbit.' That which is situated above the orbit.

SUPRA-OR'BITAR FORA'MEN, *Fora'men Supra-orbita'rium*, *F. orbitarium superius*, (F.) *Trou sus-orbitaire* ou *orbitaire supérieur*, is a foramen or notch completed by a ligament at the inner third of the orbitar arch. It gives passage to the *supra-orbitar* or *superciliary* artery, a branch of the ophthalmic, which ascends the forehead, and is distributed thereto.

SUPRA-PU'BIAN, *Supra-pubic*, *Supra-pubiana*, from *supra*, and *pubes*. That which is seated above the pubis.

SUPRA-PUBIAN NERVE, (F.) *Nerf sus-pubien*, is the internal ramus of the inguino-cutaneous branch of the first lumbar nerve. It is the *genito-crural* branch of Bichat. It descends almost vertically before the psoas muscle; and, near the crural arch, divides into two branches. One of

SUS-SPINEUX, *Supra-spinatus*—*s. Maxillo-labial*, Levator anguli oris—*s. Maxillo-labial, grand*, Levator labii superioris alæque nasi—*s. Maxillo-labial moyen*, Levator labii superioris proprius—*s. Maxillo-nasal*, Compressor naris—*s. Omphalodymie*, see Somatodymia—*s. Optico-sphéno-scléroticien*, Rectus superior oculi—*s. Orbitaire*, Supra-orbitar—*s. Phalangien du pouce*, Abductor pollicis brevis—*s. Pubio-fémoral*, Pectinalis—*s. Scapulo-trochitérien, le plus petit*, Teres minor—*s. Scapulo-trochitérien, petit*, Supra-spinatus—*s. Spino-scapulo-trochitérien*, Supra-spinatus.

SUSCEPTIBILITY, *Facile suscipiens*, (*sub* or *ens*, and *cipio*, 'I take,') 'easily taking, or undertaking.' Sensibility, in its most enlarged acceptation. Impressibility. This term, with the epithet *nervous*, is sometimes used for that increase in the moral sensibility which is particularly observed in nervous affections.

SUSCEPTIO INTESTINORUM, Intususception.

SUSPENSICULUM, Cremaster.

SUSPENSÀ, Emorema.

SUSPENSIOIRE, Suspensory.

SUSPENSORIUM, Suspensory—*s. Testis*, Cremaster.

SUSPENSORY, *Suspensorius*, from *suspenderè*, (*sub* or *ens*, 'under, and *pendere*, 'to hang,') 'to hang under.' (F.) *Suspensoire*. That which sustains or suspends.

SUSPENSORY BANDAGE, *Suspensorium*, is a bandage intended to support the scrotum, in cases of disease of the testicle or of scrotal hernia. It consists of a kind of bag, fixed above to a cincture, and retained below by strings passing between the thighs, and fixed to the cincture behind.

SUSPENSORY LIGAMENT OF THE LIVER, *Ligamentum suspensorium hepatis*, *Perpendiculum hepatis*, is a triangular duplicature of the peritoneum, between the inferior surface of the diaphragm and the upper surface of the liver, which is continuous with the great falc of the umbilical vein.

SUSPENSORY LIGAMENT OF THE PENIS is a fibro-cellular fascia, of a triangular shape, which extends from the anterior part of the symphysis pubis to the corpus cavernosum, which it sustains. A similar ligament belongs to the clitoris.

SUSPENSUM, Emorema—*s. Urinæ*, Emorema.

SUSPIRATION, Suspirium.

SUSPIRATUS, Suspirium.

SUSPIRITUS, Suspirium.

SUSPIRIUM, *Suspiratio*, *Suspiratus*, *Suspiritus*, from *sub* or *ens*, 'under,' and *spiro*, 'I breathe;' *Mygmus*, *Mychmus*, *Mychthimus*, *Stenagmus*, *Stenaxia*, *Sigh*, *Suspiratio*, (F.) *Suspir*. A short breathing. A slow, voluntary contraction of the diaphragm and intercostal muscles, the effect of which is to restore the due relation between the circulation and respiration, or to free ourselves from an inconvenient sense of weight felt in the chest, when we are much depressed,—a weight, which appears to be chiefly dependent on the functions of the heart being disturbed through the moral influence. The sigh differs from the *sob*:—the latter being involuntary and spasmodic. Sighing, occurring in fevers to a great extent, indicates considerable depression. When accompanied with a vocal sound, it constitutes a *groan*.

SUSPIRIUM CARDIACUM, Angina pectoris.

SUSTENTACULUM, Aliment.

SUSTENTATOR CLITORIDIS, Erector clitoridis—*s. Penis*, Erector penis.

SUSURRATION, Whispering.

SUSURRUS, *Bourdonnement*:—*s. Aurium*, Tinnitus aurium.

SUTELA, Suture.

SUTERBERRY, Xanthoxylum fraxineum.

SUTORIUS, Sartorius.

SUTTER, Saccharum.

SUTURA ABDOMINALIS, Gastroraphy—*s. Arcualis*, Coronal suture—*s. Biparietalis*, Sagittal suture—*s. Clavata*, Suture, quilled—*s. Corporis callosi externa*, see Raphe—*s. Cranii squamosa*, Squamous suture—*s. Dentata*, see Suture—*s. Frontoparietalis*, Coronal suture—*s. Jugalis*, Sagittal suture—*s. Lambdoidal*, Lambdoid suture—*s. Limbosa*, see Suture—*s. Lepidoides*, Squamous suture—*s. Mendosa*, Squamous suture—*s. Notha*, see Suture—*s. Obelisa*, Sagittal suture—*s. Ossium Spuria*, Harmony—*s. Proræ*, Lambdoid suture—*s. Punctata*, Suture, common—*s. Puppis*, Coronal suture—*s. Rhabdoides*, Sagittal suture—*s. Serrata*, see Suture, Sagittal suture—*s. Vera*, see Suture.

SUTURAL, *Sutura'lis*; same etymon as the next. Relating to a suture.

SUTURE, *Sutu'ra*, *Sute'ta*, *Armè*, *Rhaphè*, from *suere*, *sutum*, 'to stitch;' *Dore-tail joint*, (F.) *Engrenure*. A kind of immovable articulation, in which the bones unite by means of serrated edges, which are, as it were, *dore-tailed* into each other. The articulations of the greater part of the bones of the skull are of this kind. The coronal, lambdoidal, and sagittal sutures are called *true sutures*, the two temporal are called *false sutures*, *sutura notha*.

A *dentated suture*—*Sutu'ra denta'ta*—is one in which the processes are long and dentiform, as in the interparietal suture. In a *serrated suture*—*sutu'ra seu syntax'is serra'ta*—the indentations and processes are small and fine, like the teeth of a saw, as in the suture between the two portions of the frontal bone. In the *sutu'ra limbo'sa* there is along with the dentated margin a degree of bevelling of one, so that one bone rests on the other, as in the occipito-parietal suture.

SUTURE, in *Surgery*, *Rhaphè*, means an operation which consists in stitching the lips of a wound to procure their union. The suture was, at one time, largely employed; but, in modern times, its use has been wisely restricted. There are few wounds in which the edges may not be brought together by adhesive plaster appropriately applied. This kind of union, by adhesive plaster simply, has been absurdly termed *Sutura sicca* or *dry suture*, in opposition to the *Sutura cruenta* or suture properly so called. The suture is generally performed with waxed thread and straight or curved needles, according to the arrangement of parts.

The chief sutures are the *interrupted suture*, the *quilled suture*, and the *twisted suture*. 1. The **INTERRUPTED SUTURE**, (F.) *Suture à points séparés*, *Suture entrecoupée*, is performed by passing a needle, armed with a ligature, through the lips of the wound previously brought into contact; and then tying the extremities of the thread. The other stitches are made in the same manner. They are separate or interrupted. It is the suture most commonly used. 2. The **QUILLED SUTURE**, *Sutura clava'ta*, (F.) *Suture enchevillee ou empennee ou empennee*, *Compound Suture*, is merely the interrupted suture, with this difference, that the ligatures are not tied over the face of the wound, but over two quills or rolls of plaster, or bougies, which are laid along the sides of the wound. It is used by some surgeons, on account of there being less danger of the stitches tearing out. It is not much employed. 3. The **GLOVER'S Su-**

TURN, Contin'ued Suture, Uninterrupted Suture, (F.) Suture de Pelletier, Suture en surget, is executed by introducing the needle first into one lip of the wound from within outwards, then into the other in the same way; and, in this manner, sewing up the whole extent of the wound. It has been chiefly used in wounds of the intestinal canal. It is now rarely employed except for stitching up dead bodies. The common stitch or suture, *Sutura punctata*, (F.) *Suture à points passés*, has been used in similar cases. 4. The **ROYAL STITCH** or **SUTURE** is the name of an old operation for the cure of bubonocoele. It consisted in putting a ligature under the hernial sac, close to the abdominal ring, and then tying that part of the sac, so as to render it impervious by the adhesive inflammation thus excited. 5. The **TWISTED SUTURE**, (F.) *Suture entortillée*, is employed, chiefly, to unite wounds of the cheeks and of the free edges of the lips. To perform it, a pin or needle is passed through the edges of the wound, so as to keep them accurately in contact. A piece of thread is then wound accurately around the pin, from one side of the division to the other, in the form of the figure ∞. The number of pins and sutures must, of course, correspond with the extent of the wound. This is the suture used in cases of harelip. 6. The **SUTURE À ANSE**, of Le Dran, has only been employed in cases of wounds of the intestines. For this purpose, the edges of the wound are brought together, and as many needles, with unwaxed threads, used as there are to be stitches. Each stitch is then made by passing a needle through the edges; and all the ligatures which belong to one side of the wound are tied together, and twisted so as to form a thread, which is fixed externally.

SUTURE, COMPOUND, Suture, quilled—s. Continued, Suture, glover's—s. *Écailleuse*. Squamous suture—s. *Empennée*, Suture, quilled—s. *Emplumée*, Suture, quilled—s. *Enchevillée*, Suture, quilled—s. *Entortillée*, Suture, twisted—s. *Entrecoûpée*, Suture, interrupted—s. False, Harmony—s. *Occipitale*, Lambdoid suture—s. *Occipito-parietal*, Lambdoid suture—s. *de Pelletier*, Suture, glover's—s. *à Points passés*, Suture, common—s. *à Points séparés*, Suture, interrupted—s. Sagittal, see Sagittal suture—s. *Squamense*, Squamous suture—s. *en Surget*, Suture, glover's—s. Superficial, Harmony—s. Uninterrupted, see Suture, glover's.

SWAB, from Sax. *ſwēbban*, 'to clean with a mop.' A piece of sponge or rag tied to a rod of whalebone or wood, for cleansing the mouth of the sick, or applying remedial agents to deep-seated parts.

SWADDLING CLOTHES, Swathing clothes.

SWAGBELLY, *Physconia*.

SWALLOW, *Hirundo*—s. Wort. *Asclepias vincetoxicum*—s. Wort, orange, *Asclepias tuberosa*—s. Wort, tuberous-rooted, *Asclepias tuberosa*—s. Wort, white, *Asclepias vincetoxicum*.

SWALLOW'S NEST, *Nidus hirundinis*.

SWAMP CABBAGE, *Dracontium fetidum*—s. Dogwood, *Petala trifoliata*—s. Sickness, Milk sickness—s. Wood, *Cephalanthus occidentalis*, *Dirca palustris*.

SWATHING CLOTHES, *Swaddling Clothes*, *Incurab'ula*, *Fascia*, *Panni*, from Sax. *ſwēban*, 'to bind.' (F.) *Maillet*. The kind of clothing or bandaging formerly applied to children during the first year of life. It is now, properly, laid aside, and every freedom allowed to muscular exertion.

SWEAT, Sudor—s. Bloody, *Sudor cruentus*—s. Glands, see Perspiration—s. Root, *Polemonium reptans*—s. Scab, *Crusta genu squinae*.

SWEATING, Hidrosis—s. Bath, *Achicolum*. s. of Blood, see *Diapedesis*, and *Sudor cruentus*. s. House, *Achicolum*—s. Plant, *Eupatorium p. foliatum*—s. Room, *Achicolum*—s. Sickness, & odor *Anglicus*.

SWEATING SICKNESS, MALWAH. A disease which appears to be allied to the worst form of cholera, and to bear a close relation to malignant congestive fever. As its name imports, it occurs in Malwah in India.

SWEET BITTER, Triosteum—s. Bush, *Comptonia asplenifolia*—s. Fern, *Comptonia asplenifolia*—s. Flag, *Acorus calamus*—s. Pod, *Ceranium siliqua*—s. Root, *Aralia nudicaulis*.

SWELLING, Epanaste'ma, Exar'ma, Exosis, Pressis, Presma, Oncus, Exstume'factio, Tum Tume'factio, (F.) Enflure, Gonflement, from S. Pjellan, (D.) s wellen (G.) s chwellen, swell.' Morbid increase of bulk in the whole, a part, of the body. See Tumour.

SWELLING, WHITE, Hydrarthrus.

SWERTIA CHIRAYITA, Gentiana chirya—s. *Diformis*, see *Calumba*—s. *Fraseri*, *Calumba*—s. *Lutea*, *Gentiana lutea*.

SWIETE'NIA FEBRIFUGA, & Swai Soym'ida, S. Febrifuga, Febrifuge Swiete's (F.) Mahogun'febrifuge. Family, Meliaceae. S. Syst. Decandria Monogynia. The bark of a tree, which is a native of the East Indies, is called there *Rohena Bark*, has an aromatic odour and bitter taste. It is tonic and stomachic, and has been used in intermittents, and in diseases where bitter tonics are indicated. Dose, ℞ij ℞ij of the powder.

SWIETE'NIA MAHOG'ANI, Cedrus Mahog's Mahogany Tree, grows in the West Indies & tropical America, and is possessed of similar properties.

SWIETENIA SOMIDA, S. Febrifuga.

SWIMBLADDER, Airbladder.

SWIMMING, Nutation—s. Bladder, *Airbladder*—s. of the Head, *Vertigo*.

SWOON, Syncope.

SWOONING, Syncope.

SYALADENT'ITIS, Inflamma'tio glandularum salivati'um, from σιαλον, 'saliva, adv. gland,' and itis, denoting inflammation. Inflammation of the salivary glands.

SYCAMINOS, Morus nigra.

SYCAMINUM, see Morus nigra.

SYCE, Ficus, Ficus carica.

SYCEA, Ficus.

SYCEPH'ALUS, from συψ, 'with,' and κεφα, 'head.' A monster having two heads united together.

SY'CION, συκιον, from συκος, 'a fig.' A decoction of dried figs.

SY'CIOS ANGULA'TUS. One-seeded cucumber, Wild Bry'ony. The roots and seeds of this indigenous plant, *Order Cucurbitaceae* are bitter, purgative and diuretic. It is used dropsy in the same cases as bryony.

SYCI'TES, from συκος, 'a fig.' Wine, in which figs have been infused.

SYCTES, Catorchites.

SYCOMA, Ficus.

SYCO'SIS. Same etymon. A tumour of the shape of a fig. Also, a fungous ulcer. A hot excrescence about the eyelids. Dr. Bateman defines it:—an eruption of inflamed but not very hard tubercles occurring on the bearded part of the face and on the scalp, in adults; usually clustering together in irregular patches.—*Phyma Sycoisis, Rose'ola sico'sa.* Of this has given two species: 1. *Sycoisis Menti, S. barb Men'tagra, Menti'go, Varus Men'tagra, Chinese Barber's Itch, (F.) Dartro pustuloseus mentis*

and, 2. *Sycosis Capilli*, *S. Capillitii*. The treatment, in both cases, resembles that for porrigo favosa.

SYCOISIS, Ficus.

SYCOM, Ficus.

SYDERATIO, Sideratio.

SYLLEPSIS, Conception.

SYLLEPSIOLOG'IA, from *σλληψις*, 'conception,' and *leyes*, 'a description.' The doctrine of conception.

SYM, SYN, *συν*, 'with, together,' like the *cum*, *con*, *col*, *cor*, &c., of the Latins. A common prefix. Before *b*, *p*, *ph*, *ps*, and *m*,—*sym*, or *syn*, is changed into *sym* or *syn*, (com;) before *c*, *ch*, *g*, *k*, and *x*, into *syn* or *syn*, *συ*, *ζυ*, (con;) before *l* into *syl* or *xy*, (col;) before *r* into *syn* or *syn* (cor;); and before *s* into *sy* or *xy*, and *eye*, (co and cos).

SYMBLEPHARON, Ankyloblepharon.

SYMBLEPHARO'SIS, *Concre'tio palpebra-rum cum bulbo oc'uli*, from *συν*, 'with,' and *βλεφαρον*, 'an eyelid.' A preternatural adhesion between the eyelids; and especially between the upper eyelid and globe of the eye.

SYMBLEPHAROSIS, Ankyloblepharon.

SYMBOL, *Sym'bolum*, *Charac'ter*, (F.) *Carac'tère*, from *συμβάλλω* (*συν*, 'with,' and *βάλλω*, 'I throw'), 'I compare.' A sign or representation of something else.

The following are the symbols used in prescriptions:

- R, Recipe. See R.
- gr., *Granum*, a grain.
- ʒ, *Scrupulus seu scrupulum*, a scruple.
- ʒ, *Drachma*, a drachm.
- ʒ, *Uncia*, an ounce.
- lb, *Libra*, a pound.
- m, *Minimum*, a minim.
- ʒ, *Fluidrachma*, a fluidrachm.
- ʒ, *Fluiduncia*, a fluidounce.
- ʒ, *Octarius*, a pint.
- C, *Congius*, a gallon.

SYMBOLE, Commisssure.

SYMBOLEUSIS, Consultation.

SYMBOLISMUS, Sympathy.

SYMBOLIZATIO, Sympathy.

SYMBOLOGICA, Symptomatology.

SYMBOLUM, Sympathy.

SYM'MELES, from *συν*, 'with,' and *μελες*, 'an extremity.' *Mon'opus*. A genus of monsters whose extremities are joined together: *Sirens*.—L. G. St. Hilaire.

SYMMETRIA, Symmetry.

SYMMET'RICAL, *Symmet'ricus*, *συμμετρος*, from *συν*, 'with,' and *μετρον*, 'to measure.' An epithet given to those parts of the body, which, if seated on the median line, may be divided into two equal, and perfectly like halves; or which—if situate, the one to the right, the other to the left of this line—have a similar conformation, and a perfectly analogous arrangement.

SYMMETRICAL DISEASES, see Symmetry.

SYMMETRY, *Symmet'ria*, *Commen'sum*, *Mem-brorum Om'nium Competen'tia*, *Proportio*. The regularity in form, observed in many parts, situate on the median line; and, also, the resemblance which exists between many organs that are situate on each side of the median line. Bichat first noticed that this symmetry was confined to the organs of animal life; as the head, brain, spine, organs of sense, locomotion, &c.

It has been affirmed—and there is evidence in favour of the assertion—to be a law of the animal economy, that, when uninfluenced by disturbing agents, all general or constitutional diseases affect equally and similarly the correspond-

ing parts of the two sides of the body. This has been called the *Symmetry of Diseases*; and the resulting diseases are said to be *symmetrical*.

SYMMETRY OF DISEASES, see Symmetry.

SYMPARATERESIS, Observation.

SYMPASMA, Catapasma.

SYMPATHESIS, Sympathy.

SYMPATHET'IC, *Sympath'icus*, *Sympathet'icus*, (F.) *Sympathique*, from *συν*, 'with,' and *παθος*, 'suffering.' That which depends on sympathy. Sympathetic affections of an organ are those morbid phenomena that supervene without any morbid cause acting directly on it, and by the reaction of another organ primarily affected. Thus, itching of the nose is a *sympathetic affection*, produced by irritation in the intestinal canal.

The epithet *sympathetic* is, also, given to different nerves. See Trisplanchnic, Pneumogastric, and Facial.

SYMPATHETIC, GREAT, Trisplanchnic nerve—Middle, Pneumogastric.

SYMPATHETIC POWDER, *Pulvis sympathet'icus* of Sir Kenelm Digby, was composed of calcined sulphate of iron, prepared in a particular manner. It was long supposed to be able to cure a wound, if applied to the weapon that inflicted it; or even to a portion of the bloody clothes. It is proper to remark, however, that the wound itself was carefully excluded from the air, and from all irritation.

SYMPATHETICUS MINOR, Facial nerve.

SYMPATHETISMUS, Sympathy.

SYMPATHIA, Consent of parts.

SYMPATHICUS, Sympathetic.

SYMPATHIQUE, Sympathetic.

SYMPATHY, *Sympathi'a*, *Sympathe'is*, *Com-pas'sio*, *Consensus*, *Sympathet'icus*, *Sympathi'a*, *Conflux'io*, *Conspira'tio*, *Commer'cium*, *Consortium*, *Homoiopathi'a*, *Homoth'nia*, *Adelphiz'is*, *Symbolis'mus*, *Symboliza'tio*, *Sym'bolium*. The connexion that exists between the action of two or more organs, more or less distant from each other; so that the affection of the first is transmitted, secondarily, to the others, or to one of the others, by means unknown. A knowledge of the particular sympathies between different organs throws light on the etiology of diseases, their seat, and the particular organ towards which our therapeutical means should be directed. See Irritation.

SYMPEPSIS, Coction.

SYMPEXIS, Concretion.

SYMPHORA, Congestion.

SYMPHOREMA, Congestion.

SYMPHORESIS, Congestion.

SYMPHORICAR'PUS RACEMOSUS, *Snow-berry*. An indigenous plant, *Order* Caprifoliaceæ, *Tribe* Loniceræ, whose berries are large, bright white, and remain till winter; flowering from June to September. The root is tonic and astringent, and has been used in ague; and by the Indians in syphilis.

SYMPHYIA, Symphysis.

SYMPHYOCEPH'ALUS, *Metop'ages*, *Cephalop'ages*, from *συμφυνη*, 'united together,' and *κεφαλη*, 'head.' A monstrosity in which twins are united by the head.

SYMPHYSEOT'OMY, *Symphysot'omy*, *Synchondrot'omy*, *Symphysotom'ia*, *Symphysiotom'ia*, from *συμφυνησις*, and *τεμνω*, 'I cut.' The operation or section of the *Symphysis*, *Sigaultian operation*, *Sigaultian section*. This operation is performed with the view of augmenting the diameter of the pelvis, in order to facilitate delivery in certain cases of faulty conformation of that cavity, with wedging of the head of the child therein. To perform the operation, (F.) *Désymphyser*, the fo-

male is placed on her back; the pubes is shaved; and, with a strong scalpel, the soft parts are divided on the median line. The articulation is then cut. As soon as the fibrous parts, which hold the bones together, are divided, they separate to a certain distance from each other; and the delivery may be accomplished. The knife, with which the operation is performed, is called, by the French, *Couteau symphysien*.

SYMPHYS'IA, from *συμφυσις*, 'a growing together.' A malformation consisting in the union of parts that are usually divided. — Breschet.

SYMPHYSIOTOMIA, Symphyseotomy.

SYM'PHYSIS, *Symphysia*, *Coalescentia*, *Coalitus*, from *συφύω* (*συφ*, 'with,' and *φύω*, 'I grow'), 'I unite together.' A union of bones. The bond of such union. The aggregate of means used for retaining bones *in situ* in the articulations. The name symphysis has, however, been more particularly appropriated to certain articulations; as to the *symphysis pubis*, *sacro-iliac symphysis*, &c. See *Monster*.

SYM'PHYSIS, Coalescence, Commissure, Insertion — *s.* Cartilaginea, Synchondrosis — *s.* Ligamentosa, Syndesmosis — *s.* Ossium muscularis, Syssarosis — *s.* Pubis, Pubic articulation.

SYM'PHYSOTOMY, Symphyseotomy.

SYM'PHYTOS, Hereditary.

SYM'PHYTUM. Same etymon. *Symphytum officinale* seu *album* seu *Bohemicum*, *Umsol'ida major*, *Comfrey*, *Alum*, *Alus*, (F.) *Grande Consoude*. Family, Boraginæ. *Sez. Syst.* Pentandria Monogynia. The roots of this European plant are very mucilaginous, and are employed as emollients. They are used in decoction in hæmoptysis, dysentery, chronic diarrhœa, &c.

SYM'PHYTUM, *Solidago virgaurea* — *s.* *Album*, *Symphytum* — *s.* *Bohemicum*, *Symphytum* — *s.* *Minimum*, *Bellis* — *s.* *Minus*, *Prunella* — *s.* *Officinale*, *Symphytum*.

SYM'PHYTUM PETRÆ'UM, *Coris Monspeliensis*, *Montpellier Coris*. An intensely bitter and nauseous plant, which is said to have been useful in syphilis. See, also, *Sanicula*.

SYMPLOCAR'PUS ANGUSTISPATHA, *Dracontium angustispatha* — *s.* *Fœtida*, *Dracontium fetidum*.

SYMPOD'IA, *Monopod'ia*, from *συν*, 'together,' and *πους*, *podis*, 'a foot.' A monstrosity in which there is coalescence of the lower extremities.

SYMPTOM, *Sympto'ma*, *Ac'cidens*, *Casus*, from *συν*, 'with,' and *πτωμα*, 'a fall,' from *πτωω*, 'I fall.' Any change, perceptible to the senses, in any organ or function, which is connected with morbid influence. It is by the aggregate and succession of symptoms that a disease is detected. The term *symptoms of symptoms* has been used for the effects which result from the symptoms of a disease; but which effects are not essentially connected with the disease itself. Thus, the debility arising from the frequency of evacuations in dysentery is a symptom of symptoms. See *Sign*.

SYMPTOMA TURPITUDINIS, Nymphomania.

SYMPTOMATIC, *Symptomat'icus*. That which is a symptom of some other affection. Thus we speak of a symptomatic disease, in opposition to one that is idiopathic.

SYMPTOMATOL'OGY, *Symptomatolog'ia*, *Symbolog'ica*, from *συμπτωμα*, 'a symptom,' and *λογος*, 'a treatise.' The branch of pathology, the object of which is the knowledge of symptoms.

SYMPTO'SIS, from *συν*, 'with,' and *πτωω*, 'I fall.' Depression or collapse, emaciation or atrophy, either of the whole body or of a part.

SYNÆREMA, Corrugation.

SYNÆTION, Concausa.

SYNANCHE, *Cynanche*, *Cynanche tonsillaris*.

SYNANCIE, *Cynanche*.

SYNAPHYMENTIS, see *Ophthalmia*.

SYNAPTASE, see *Amygdalin*.

SYNARTHRODIA, *Synarthrosis*.

SYNARTHRO'DIAL, *Synarthrodia*, from *συν*, 'with,' and *ἄρθρωσις*, 'articulation.' That which belongs to synarthrosis; as *Synarthrodial articulation*.

SYNARTHRO'SIS, *Synarthro'dia*, *Abricula'tio*, *Coarticula'tio*. An immovable articulation. Synarthrosis includes three species: *Suture*, *Harmony*, and *Gomphosis*.

SYNATHROESIS, Congestion.

SYNATHROISMUS, Congestion.

SYNCAN'THUS, from *συν*, 'with,' and *αὐθός*, 'the corner of the eye.' A morbid adhesion between the globe of the eye and the orbit.

SYNCHONDRO'SIS, *Sym'physis seu Cop'ula seu Connex'io cartilagin'ea*, *Chondrosyn-des'm*, from *συν*, 'with,' and *χόνδρος*, 'a cartilage.' Union or articulation of bones by means of cartilage: — as the articulations of the ribs with the sternum, by means of their cartilages of prolegation.

SYNCHONDROTOMY, Symphyseotomy.

SYNCHRONIUS, Synchronous.

SYN'CHRONOUS, *Syn'chronus*, *Synchron'us*, *Isach'ronous*, from *συν*, 'with,' and *χρονος*, 'time.' That which occurs at the same time. Thus the pulsations of an artery may be synchronous with those of the heart.

SYNCHRONUS, Synchronous.

SYNCHYSIS, Confusion.

SYNCIPUT, Sinciput.

SYNCLONESIS, *Synclonus*.

SYN'CLONUS, *Synclone'sis*, from *συνακλονω*, (*συν*, 'with,' and *κλονω*, 'I shake,') 'I shake together.' *Clon'ici universa'les*, *Clonus*, (YONG.) Tremulous, simultaneous, and chronic agitation of various muscles, especially when excited by the will. Also, general spasm, *spas'mus universa'lis*. See *Tremor*, *Chorea*, &c.

SYNCLONUS BALLISMUS, *Paralysis agitata* — *s.* *Berberia*, *Berberi* — *s.* *Chorea*, *Chorea* — *s.* *Raphania*, *Raphania* — *s.* *Saltans*, *Chorea* — *s.* *Tremor*, *Tremor*.

SYNCOMIS'TUS, from *συνακμιζω*, (*συν*, and *κμιζω*,) 'I bring together.' *Autop'yros*, *Pennis domes'ticus*, *secundarius*, *cibari'us*, *confusus*. Bread of the whole wheat or of the unsifted meal. *Household bread*. Also, a cataplasm made of the same.

SYN'COPAL, *Synco'pal'is*, *Synco'p'ticus*, *Synco'p'tus*. Same etymon as Syncope; as *Syn'copal Fever*, *Febris Synco'pal'is*. A pernicious intermittent, characterized by repeated attacks of syncope.

SYN'COPE, from *συνακρωω*, 'I fall down.' *An'imi defectio*, *Animi deliquium*, *Leipopsych'ia*, *Lipopsych'ia*, *Apsych'ia*, *Apsych'ia*, *Lipais An'imi*, *Asphyx'ia*, *Apopsych'ia*, *Lipothym'ia*, *Leipothym'ia*, *Eclips'ia*, *Su'bitus animi casus*, *Swoon*, *Swooning*, *Fainting*, *Fainting fit*, *Faintness*, *Erolu'tion*, (F.) *Évanouissement*, *Défaillance*, *Pamoin*. Complete and, commonly, sudden loss of sensation and motion, with considerable diminution, or entire suspension of the pulsations of the heart and the respiratory movements. Syncope is, commonly, an affection of no consequence; but, sometimes, it is an index of diseased heart. Placing the patient in the horizontal posture; sprinkling cold water over the face, and the application of volatile substances to the nose, are

all that will be required during the fit. See Asphyxia, and Suffocation.

An approach to this condition is termed faintness.

SYNCOPE ANGINA, Angina pectoris—s. Anginosa. Angina pectoris.

SYNOPTICUS, Syncopeal.

SYNOPTUS, Syncopeal.

SYNCRITICA, Astringents.

SYNDACTYLUS, Aschistodactylus.

SYNDESMITIS, see Ophthalmia. Also, inflammation of articular ligaments; *Inflammatiō ligamentorum*.

SYNDESMOGRAPHY, *Syndesmographia*, from *σύνδεσμος*, 'a ligament,' and *γραφία*, 'a description.' A description of the ligaments. The part of anatomy which describes the ligaments.

SYNDESMOL'OGY, *Syndesmol'ogia*, from *σύνδεσμος*, 'a ligament,' and *λογία*, 'a treatise, discourse.' A treatise on the ligaments.

SYNDESMOPHARYNGEUS. A fasciculus of the constrictor pharyngis superior.

SYNDESMOS, Ligament.

SYNDESMOSIS, *Synnesurosis*, *Synmenesis*, *Complexio seu Symphysia ligamentosa*, *Commissura nervosa*, *Conneruatio*, *Colligatio*, from *σύνδεσμος*, 'ligament,' and *σύνδεσις*, 'articulation of two or more bones by means of ligament;—as of the radius with the ulna.

SYNDESMOT'OMY, *Syndesmatomia*, from *σύνδεσμος*, 'ligament,' and *τομή*, 'I cut or dissect.' Dissection of the ligaments.

SYNDESMUS, Bandage, Ligament.

SYNDROME, from *σύν*, 'with,' and *δρῶμος*, 'a course.' *Concur'sus*, *Concourse*. A name given by the Empirical Sect to the union of symptoms which takes place in diseases. *Syndromē plethorica*, for example, meant the union of symptoms produced by plethora.

SYNDYASMUS, Coition.

SYNECHES, see Continued fever.

SYNECHIA, from *σύν*, 'with,' and *εχέω*, 'to have,' or 'to hold.' Adhesion between the iris and transparent cornea, or between the iris and crystalline lens. The former case is called *Synechia anterior*: the latter, *S. posterior*.

SYNERGIA, Synergy.

SYNERGIA, Synergy.

SYNERGIE, Synergy.

SYNERGY, *Synergia*, *Synnergia*, (F.) *Synergie*; from *σύν*, 'with,' and *εργον*, 'work.' A correlation or concurrence of action between different organs in health; and, according to some, in disease.

SYNESIS, Intellect.

SYNEUROSI, Syndesmosis.

SYNEZIZIS, *Synize'is*, *Considen'tia*, from *σύν*, 'with,' and *ζεύω*, 'to join.' *Paropsis Synize'is*, *Caligo à Synize'is*, *Caligo Pupill'ia*, *Imperforatio pupillæ*, *Closure or occlusion or obliteration of the Pupil*, *Phthisis Pupill'ia*, *Amy'osia*. This disease is sometimes faulty conformation, depending upon the continued existence of the *membrana pupillaris*, or the absence of the pupil. It is, in other words, *congenital*. At other times, it is owing to accident, and supervenes on violent ophthalmia, or on the operation for cataract. They who are affected with *synze'is* are completely blind;—the iris having no central aperture. In certain cases, a remedy may be obtained by making an opening in the iris, which may supply the place of the pupil, and through which the rays of light may reach the retina. This operation is called the *operation for artificial pupil*.

SYNGENES, Hereditary.

SYNGENICUS, Congenital.

SYNHYMENESIS, Synymenesis.

SYNIMENESIS, Synymenesis.

SYNIZESIS, Considentia, Synze'is.

SYNNEUROSIS, Syndesmosis.

SYN'OCHA, from *σύνεχω*, (*σύν*, and *εχω*, 'I have or hold,') 'I continue.' *Inflammatory Fever*, *Dynam'ic Fever*, *Angiopy'ra*, *Sthenopy'ra*, *Feb'ris causo'des*, *F. caumato'des*, *Feb'ris deu'rens*, *F. ardens*, *Feb'ris contin'ua sanguin'ea*, *Feb'ris contin'ua non putris*, *Syn'ochus* (Vogel), *Feb'ris acma'tica*, *Synochus impu'tris* (Galen,) *Feb'ris acu'ta*, *F. acu'ta sanguin'ea*, *F. continens*, *F. continens non pu'trida*, *F. angioten'ica*, *F. sthen'ica*, *F. sanguin'ea*, *Homot'onos*, *F. inflammat'oria*, *Enc'cia cauma*, *Enc'cia*, *F. ton'ica*, *Phlogopy'rus*, *Cauma*, *Calentura continua*, (F.) *Fie'vre ardente*, *F. continente inflammatoire*, *F. sanguine*, *F. irritative*, *F. angioténique*, *F. inflammatoire*, *Gastro-entérite intense*, *General inflammation*. A species of continued fever, characterized by increased heat; and by quick, strong, and hard pulse; urine high-coloured; disturbance of mind slight. It requires, of course, the most active treatment.

SYNOCHA RHEUMATICA, Rheumatism, acute—s. *Vaccina*, *Vaccina*.

SYN'OCHAL, *Synochal'is*; same etymon. Relating to, or having the characters of, synocha.

SYN'OCHUS, *Enc'cia syn'ochus*, *Feb'ris lenta*, (Linnæus,) same etymon. Continued fever, compounded of synocha and typhus;—in its commencement often resembling the former; in its progress, the latter: *Mixed fever*, *Common continued fever*, *Syn'ochoid fever*. See Continued fever, Fever, and Typhus.

SYNOCHUS, Synocha—s. Biliosa, Fever, gastric, Fever, bilious—s. Catarrhalis, Influenza—s. Ictero'des, Fever, yellow—s. Imputris, Synocha—s. Miliaria, Miliary fever—s. Varicella, Varicella.

SYNOLCE, Spasm.

SYNONIA, Synovia.

SYNSTEOG'RAPHY, *Synstoeogra'phia*, from *σύν*, 'with,' *στέον*, 'a bone,' and *γραφία*, 'I describe.' The part of anatomy which describes the joints.

SYNSTEOL'OGY, *Synstelog'ia*, from *σύν*, 'with,' *στέον*, 'a bone,' and *λογία*, 'a treatise.' A treatise on the joints.

SYNSTEOSIS, *Synosto'sis*, from *σύν*, 'with,' and *στέον*, 'a bone.' Union by means of bone.

SYNSTEOT'OMY, *Synstetotomia*, from *σύν*, 'with,' *στέον*, 'a bone,' and *τομή*, 'to cut.' Dissection of the joints.

SYNSTOSIS, Synostosis.

SYNO'VIA, from *σύν*, 'with,' and *ωον*, 'an egg.' *Mucila'go*, *Un'guen articula'rē*, *Syno'nia*, *Axun'gia articula'ris*, *Unguentum seu Sme'gma articula'rē*, *Mucila'go articulo'rum seu junctura'rum*, *Humor articula'ris*, *Hydrarthrus*, *Humor seu Hu'midum nativum seu Gluten articulo'rum* (F.) *Synov'ie*. A fluid resembling the white of egg, which is exhaled by the synovial membranes surrounding the moveable articulations. The synovia has been found, on analysis, to consist of water, a little albumen, soda, chloride of sodium, phosphate of lime, and—Fourcroy fancied—uric acid. Its use is to lubricate the joints, and the sheaths in which tendons play.

SYNO'VIAL, *Synovia'lis*. That which relates to the synovia.

SYNOVIAL GLANDS, *Haver's Glands*, *Gland'ula articula'ris*, *G. Synovia'les*, *G. Haver'siana*, are the secretory fringes, which float in the interior of the synovial capsules (see Capsules.) They do not seem to be glandular. They have been

A familiar apparatus through which any liquor is squirted.

Various forms of syringe are used in medicine and surgery.

SYRINGE, CLYSTER, *Syrin'ga clysmat'ica, Clysanthi'um*, (F.) *Clycopompe*. A syringe for administering clysters.

SYRINGE, CUPPING, *Antlia sanguisuga*.

SYRINGICUS, Fistulous.

SYRINGITIS EUSTA'CHII, Inflammation of the Eustachian tube.

SYRINGMOS, Tinnitus aurium.

SYRINGODES, Fistulous.

SYRINGOTOME, *Syringot'omus, Syringot'omum*, from *συνεχέ*, 'a pipe,' 'a fistula,' and *τομή*, 'to cut.' A surgical instrument, formerly used in the operation for *fistula in ano*. It is a bistouri, concave at its edge, and terminated by a long, flexible, probe-pointed stylet. This stylet or probe was first introduced by the external opening of the fistula into the rectum, whence it was drawn externally through the anus, carrying with it the cutting edge of the instrument, which divided the intermediate parts. The operation for fistula in ano has been called *Syringotomy*.

SYRINGOTOMY, *Syringotom'ia*. Same etymon as the last. The operation for fistula in ano by incision.

SYRLNX, Eustachian tube, Fistula, Syringe, Trachea—s. Hiera, Vertebral column.

SYRMAIS'MOS, from *συναίξω*, 'I evacuate.' A gentle evacuation by vomiting or stool.

SYROP, Syrup—s. *d'Ail*, Syrupus allii—s. *d'Armoise composé*, Syrupus aromaticus—s. *de Chicorée composé*, Syrupus de cichorio compositus—s. *des Cinq racines*, Syrupus e quinque radicibus—s. *de Cuisinier*, Syrupus de sarsaparilla et sennâ compositus—s. *d'Ether*, Syrupus cum æthere sulphurico paratus—s. *de Gingembre*, Syrupus singiberis—s. *de Guimauve*, Syrupus althææ—s. *de Longue vie*, Mellitus de mercuriali compositum—s. *de Mercure*, Syrupus de mercurio mediante gummi—s. *de Mâres*, Syrupus mori—s. *de Nerprun*, Syrupus rhamni—s. *de Pavots blancs*, Syrupus papaveris—s. *de Pommes composées*, see Syrupus sennæ—s. *de Quinquina avec le Vin*, Syrupus de kinâ kinâ cum vino—s. *de Roses pâles*, Syrupus rosæ—s. *de Roses rouges*, Syrupus rosæ—s. *de Vinaigre*, S. acetii.

SYRUP, *Syrup, Syrupus, Seropi'um, Serape'um*, (F.) *Syrop*; derived, according to some, from *σύνω*, 'I draw,' and *σώω*, 'juice,' but more probably, from the Arabic *Siruph, Sirab*, or *Scharab*, which signifies 'a potion.' A saturated solution of sugar in water, either simply, or united with some vegetable or other principle. Syrups, in general, require two pounds of sugar to the pint, and they are judged to be sufficiently boiled when a portion, taken up in a spoon, flows like oil. In the Pharmacopœia of the United States, it is directed, that syrups, whose density is not precisely determined by the process, should have the s. g. 1.261, when boiling, and of about 1.319 at ordinary temperatures. Syrups should be kept in small bottles in a cool place. They are chiefly used to render medicines palatable. See Syrupus simplex.

SYRUP, see Syrupus—s. of Almonds, Syrupus amygdalæ—s. Antiscorbatic, Syrupus antiscorbaticus—s. of Buckthorn, Syrupus rhamni—s. of Capillaire, common, Syrupus simplex—s. of Cinchona with wine, Syrupus de kinâ kinâ cum vino—s. of Citric acid, Syrupus acidi citrici—s. of Clove July flower, Syrupus caryophylli rubri—s. of Clove pinks, Syrupus Caryophylli rubri—s. of Ether, Syrupus cum æthere sulphurico paratus—s. of Five roots, Syrupus e quinque radicibus—s. of Garlic, Syrupus allii—s. of Ginger,

Syrupus singiberis—s. of Gum Arabic, Syrupus acaciæ—s. Hive, Syrupus scillæ compositus—s. of Honey, Mellitus simplex—s. of Iodide of Iron, Liquor Ferri iodidi—s. of Ipecacuanha, Syrupus ipecacuanhæ—s. of Lemon, Syrupus limonis—s. of Marshmallows, Syrupus althææ—s. of Meadow saffron, Syrupus colchici autumnalis—s. of Mugwort, compound, Syrupus aromaticus—s. of Mulberries, Syrupus mori—s. of Orange juice, see Syrupus aurantii—s. of Orange peel, Syrupus aromaticus—s. of Orgeat, Syrupus amygdalæ—s. of Poppies, Syrupus papaveris—s. of Poppy, red, Syrupus rhœadæ—s. of Rhatany, Syrupus krameris—s. of Rhubarb, Syrupus rhej—s. of Rhubarb, aromatic, Syrupus rhei aromaticus—s. of Rhubarb, spiced, Syrupus rhej aromaticus—s. of Saffron, Syrupus croci—s. of Squills, Syrupus scillæ—s. of Squill, compound, Syrupus scillæ compositus—s. of Succory, compound, Syrupus de cichorio compositus—s. of Tolu, Syrupus toluitanus—s. of Vinegar, Syrupus acetii—s. of Violets, Syrupus violæ—s. of Wild cherry bark, Syrupus Pruni Virginianæ.

SYRUPUS, S. simplex.

SYRUPUS ACA'CIÆ, *Syrup of Gum Arabic*, (*Acaciæ* ʒij, *Sacchar.* ʒ xv, *Aq.* fʒ viij). Dissolve the gum in the water; add the sugar, and strain. Ph. U. S.) A good pectoral syrup. Dose, fʒj to ʒij.

SYRUPUS ACET'I, *S. Ac'idi Acetosi*, *Syrup of Vinegar*, (F.) *Syrop de Vinaigre*. (*Aceti* Ojss, *sacch. purif.* ℥iiss). Boil to form a syrup. Ph. E.) It is refrigerant and antiseptic. Dose, fʒj to ʒij.

SYRUPUS ACIDI ACETOSI, S. acetii.

SYRUPUS AC'IDI CITR'ICI, *Syrup of Citric Acid*. (*Acid. citric.* pulv. ʒij; *Ol. Limon.* ℥iv; *Syrup.* Oij). Rub the acid and oil with an ounce of the syrup; add the rest of the syrup, and dissolve with a gentle heat. Ph. U. S.) Virtues the same as those of the Syrupus Limonis.

SYRUPUS CUM Æ'THERE SULPHU'RICO PARATUS, *Syrup of Ether*, (F.) *Syrop d'Éther*. (Very pure sugar, 1000 p.; distilled water, 500 p.; dissolve in the cold, and strain; add sulphuric ether, 48 p. Shake for five or six days, and draw off the limpid syrup. Ph. L.) Properties like those of ether.

SYRUPUS AL'LII, *Syrup of Garlic*, (F.) *Syrop d'ail*. (*Allii* recent. concis. ʒvi; *acet. destillat.* Oj, *sacchar.* ℥ij). Macerate the garlic in the vinegar, in a glass vessel, for four days; then express the liquor and set it by, that the dregs may subside; lastly, add the sugar to the clear liquor, and proceed in the manner directed for syrup. Ph. U. S.) Use, same as that of garlic. Dose, fʒj to ʒij.

SYRUPUS ALTHÆ'Æ, *Syrup of Marshmallow*, *Syrupus ex Althæ'â*, S. *de Althæ'â*, S. *Althææ officinalis*, (F.) *Syrop de Guimauve*. (*Althææ rad. recent.* cont. ℥ss, *sacch. pur.* ℥ij, *agua Oiv*). Boil the root in the water to one-half, and press out the liquor; when cold, defecate; add the sugar, and boil. Ph. L.) Emollient and demulcent. Dose, fʒj to ʒij.

SYRUPUS ANOMI ZINGIBERIS, S. singiberis.

SYRUPUS AMYG'DALÆ, *Syrup of Almonds*, *Syrup of Orgeat*, *Orgeat*. (*Amygdal. dulc.* ℥j, *amygdal. amar.* ʒiv, *agua*, Oij, *sacchar.* ℥vj). Blanch the almonds, and rub them in a mortar to a very fine paste, adding, during the trituration, three fluidounces of the water, and a pound of the sugar. Mix the paste thoroughly with the remainder of the water; strain with strong expression; add the remainder of the sugar to the strained liquor, and dissolve it with the aid of a gentle heat. Strain the syrup through fine linen, and having allowed it to cool, put it into bottles,

which must be well stopped, and kept in a cool place. *Ph. U. S.*)

SYRUPUS ANTICAUROBUTICUS, see Anticaurobutic.

SYRUPUS ANTISCORBUTICUS, *S. de Armora'cid compositus*, *Antiscorbutic Syrup.* (Leaves of cocklebaria, buckbean, water-cresses, horse-radish root and bitter oranges, each ℥j, cinnamon, ℥ss. Cut, and pour on white wine ℔v. Macerate for two days; distil over Oj in a sand-bath; add to this of sugar, ℔ij, and form a syrup. Again, take what remains in the occurbit: pass it through cloth; let it rest; decant, and add sugar ℔ij; make into a syrup, and clarify with white of egg. Mix it with the first while yet warm. *Ph. P.*) Antiscorbutic, alterative, tonic, stomachic, &c. Dose, fʒij to fʒij.

SYRUPUS AROMATICUS, *S. de Artemisia compositus*, *Compound Syrup of Mugwort*, (*F.*) *Syrup d'armoise composit.* (Tops of artemisia vulgaris, in flower, ℥vj, inula root, ligusticum levisticum, and fennel, each ℥ss, pennyroyal, catmint, savine leaves, each ℥vj, marjoram, hyssop, pyrethrum, rue, basil, each ℥ij, aniseed and cinnamon, each ℥ij; bruise and macerate in hydromel ℔xvij; distil over Oss; add to this a pound of sugar. Again, take the liquid that remains in the occurbit, strain it gently; and add sugar ℔iv. Then mix the two. *Ph. P.*) Tonic, emmenagogue, &c.

SYRUPUS DE ARMORACIA COMPOSITUS, *S. antiscorbuticus*—*s. de Artemisia compositus*, *S. antiscorbuticus*—*s. Asparagi*, see Asparagus.

SYRUPUS AURANTII, *S. Aurantiorum*, *S. Citri Aurantii*, *S. Corticis Aurantii*, *S. Aurantii Corticis* (*Ph. U. S.*), *S. e Corticibus Aurantiorum*, *S. de Cortice Aurantiorum*, *Syrup of Orange peel.* (Aurant. cort. cont. ℥ij, aq. feru. Oj, sacch. ℔ijss. Macerate the peel in the water for twelve hours. Add the sugar. *Ph. U. S.*) Stomachic. Dose, fʒj to fʒij.

A Syrup of Orange Juice, Orange Sherbet, Syrupus e succo Aurantiorum, may be made by adding white sugar ℔ij to ℔j of the juice of oranges, strained and clarified.

SYRUPUS BALSAMICUS, *S. toluatanus*.

SYRUPUS CARYOPHYLLI RUBRI, *S. Dianthi Caryophylli*, *Syrup of Clove July flower*, *Syrup of Clove Pinks*, *Syrupus infusionis florum caryophyllorum.* (Petalarum dianth., caryoph. recent. unguibus resectis ℔j, aquæ bull. Oiv, sacch. purif. ℔vij. *Ph. E.*) Aromatic.

SYRUPUS CASSIÆ SENNÆ, *S. sennæ*.

SYRUPUS DE CICHORIO COMPOSITUS, *S. de Rheo*, *Compound Syrup of Succory*, (*F.*) *Syrup de chicorée composit.* (Root of succory ℥vj, leaves of succory ℥ix, leaves of fumitory and scolopendrium, each ℥ij, Alkekengi berries ℥ij. Boil in water Oxiv to Oxij: pass through cloth, and dissolve in white sugar ℔v. Boil till it has the consistence of syrup. Again, take water Ovij, rhubarb ℥vj, yellow sanders and cinnamon, each ℥ss. Infuse for twenty-four hours; pass through linen, and add the preceding syrup. *Ph. P.*) It is laxative and stomachic. Dose, fʒj to fʒss.

SYRUPUS CINCHONÆ CUM VINO, *S. de kinâ kinâ cum vino*.

SYRUPUS CINCHONÆ, *Syrup of Cincho'nia.* (Simple syrup one pound; sulphate of cinchonina nine grains. Mix.) Six spoonfuls are commonly sufficient to arrest an intermittent.

SYRUPUS CITRI AURANTII, *S. aromaticus*.

SYRUPUS COLCHICIS AUTUMNALIS, *S. Colchici*, *Syrup of Meadow Saffron.* (Rad. colch. autumn. recent. ℥j, acidi acetosi fʒxvi, sacch. pur. ℥xxvj. Macerate the root in the vinegar for two days, occasionally shaking the vessel; then strain, with gentle expression. To the strained fluid add the sugar, and boil to a syrup. *Ph. E.*) Diuretic, antiarthritic. Dose, fʒj to fʒss, or more.

SYRUPUS CORTICIS AURANTII, *S. aromaticus*—*s. Citri medicæ*, *S. limonum*—*s. e Succo citrionum*, *S. limonum*.

SYRUPUS CROCI, *Syrup of Saffron.* (Croc. stigmat. ℥j, aquæ fervent. Oj, sacch. purif. ℔iiss. *Ph. L.*) Cardiac. Chiefly used for colouring.

SYRUPUS DIACODION, *Diacodion*—*s. Dianthi Caryophylli*, *S. caryophylli rubri*.

SYRUPUS EMETINÆ, *Syrup of Em'etine.* (Simple syrup ℔j, emetina 16 gr.) In small doses, expectorant; and in large, emetic.

SYRUPUS EMPYREUMATICUS, *Melasses*—*s. Ferri iodidi*, *Liquor Ferri iodidi*—*s. Hydrargyri*, *Syrupus de mercurio mediante gammii*—*s. Infusionis florum caryophyllorum*, *Syrupus caryophylli rubri*.

SYRUPUS IPECACUANÆ, *Syrup of Ipecacuanha.* (Ipecac. in pulv. crass. ℥j, alcohol. dilut. Oj, sacchar. ℔iiss, aquæ q. s. Macerate the ipecacuanha in the alcohol for 14 days, and filter. Evaporate the filtered liquor to 6 fluidounces, again filter, and add sufficient water to make the liquid measure a pint; add the sugar, and evaporate by a water-bath to a proper consistence. *Ph. U. S.*) It may also be prepared by displacement.

SYRUPUS DE JALAP'Â, *Syrup of Jalap.* (Puls. Jalapæ ℥x, sem. coriandr., fascicul. dulc. ℔â ℥ss; aquæ fʒxijss, sacch. ℥xxv. *Ph. P.*) Cathartic. Dose, fʒij to fʒss for children.

SYRUPUS DE KINÂ KINÂ CUM VINO, *S. Cincho'na cum vino*, *Syrup of Cinchona with wine*, (*F.*) *Syrup de quinquina avec le vin.* (Cort. cinchona officinalis ℥ij, ext. cinchona ℥vj, vini albi (Vin. Lunel. vel cujusvis ei similis,) Oj, alcohol (s. g. .985, to .915.) fʒj, sacchar. alb. ℔iiss. Bruise the cinchona; gradually add the alcohol, so as to form a soft mass; pour on the wine; macerate for two days, and strain. Dissolve the extract, add the sugar, and make a syrup. *Ph. P.*) Dose, fʒss to fʒj.

SYRUPUS KRANNE, *Syrup of Rhatany.* (Ert. Kramer. ℥ij, aquæ Oj, sacchar. ℔ijss. Dissolve the extract in the water, and filter; then add the sugar, and form into syrup. *Ph. U. S.* It may also be made by displacement from Kramer. in pulv. crass. ℔j, sacchar. ℔iiss; aq. q. s.) An adjunct to astringent mixtures; or given in diarrhoea, a tea-spoonful to a child.

SYRUPUS LIMONIS, *S. Limonum*—*s. Succi limonis*, *S. limonum*.

SYRUPUS LIMO'NUM, *S. limonis*, (*Ph. U. S.*) *S. citri medicæ*, *S. e succo citrionum*, *S. e succo limonum*, *S. succi limonis*, *Syrup of Lemon*, *Lemon Syrup.* (Limon. succ. colat. Oj, sacchar. ℔ij.) Cooling, antiseptic.

SYRUPUS E MËCONIO, *S. papaveris*—*s. de Melle*, *Mellitum simplex*.

SYRUPUS DE MERCURIO MEDIANTE GUMMI, *Mercu'rius gummosus Plenkii*, *Syrupus Hydrargyri*, (*F.*) *Syrup de mercure ou Mercure gommeux de Plenk.* (Hydrargyri pur. ℥j, p. gum. accia, ℥ij, syrup diacod. ℥ss. Rub together till the mercury is extinguished. *Ph. P.*) Possesses the properties of the blue pill. Dose, gr. ij to viij, or more.

SYRUPUS MORI, *S. e succo mororum*, *S. succi mori*, *Syrup of Mul'berries*, (*F.*) *Syrup de mûres.* (Mori succ. colat. Oj, sacchar. purif. ℔ij. *Ph. L.*) Gratefully refrigerant.

SYRUPUS E SÛCCO MORORUM, *S. mori*.

SYRUPUS MORPHIÆ ACETATIS, *Syrup of acetate of morphia.* (Syrup, one pint, acetate of morphia, gr. iv.) Dose, two tea-spoonfuls, as an opiate. It is about the strength of the same quantity of syrup of poppies.

SYRUPUS MORPHIÆ SULPHATIS is made in the same way.

SYRUPUS NIGER, *Melasses*.

SYRUPUS PAPAVERIS, *S. papaveris commifori*,

S. papaveris albi, *S. e meco'nio*, *S. de meconio*, *Diacodion*, Syrup of poppies, (F.) Syrup of *patula blanda* on diacode. (*Papav. capsul. exsiccata* et contus. exemptis seminibus, ℥ xiv, sacch. pur. ℥ ij, aq. fervent. cong. ijss. Macerate the capsules in water for 12 hours; boil to a gallon, and express strongly. Boil the liquor to Oij; and strain while hot. Defecate by rest, and boil to Oj, adding the sugar so as form a syrup. Ph. L.) One ounce contains about one grain of opium. Anodyne and demulcent.

The Dublin college has a SYRUPUS OPII, called *Common Syrup of Poppies*, which is made by dissolving 18 grains of the *Watery Extract of Opium* in 18 ounces of boiling water. Properties, those of opium and syrup.

SYRUPUS DE PAPAVERE ERRATICO, *S. rhœados* — *a. de Pomis compositus*, see *S. sennæ*.

SYRUPUS PROTEÆ, see *Protea mellifera*. Syrup of *Pruni Virginia'nae*, Syrup of *Wild cherry bark*. (*Pruni Virginia'nae* in pulv. crass. ℥ v, sacchar. ℥ ij, Aqua q. s. Moisten the bark with water; let it stand for 24 hours; transfer it to a percolator; pour water gradually upon it, until a pint of filtered liquor has passed. Add the sugar in a bottle, and dissolve by agitation. Ph. U. S., 1851.) Dose, as a demulcent expectorant, f ℥j to f ℥ij.

SYRUPUS QUI'NINE, Syrup of *Quinia*. (*Simple syrup*, 2 pints, *sulphate of quinia*, 64 grains.) Six spoonfuls are commonly sufficient to arrest an intermittent.

SYRUPUS B QUINQUE RADICIBUS, Syrup of *five roots*, (F.) Syrup of *des cinq racines*. (*Rad. apii, fœniculi, apii petroselinii*, āā ℥ v. Infuse for 24 hours in boiling water Oiss, and strain. *Rad. asparag., rusci aculeati*, āā ℥ v, aqua, Ovj. Boil and reduce to half; adding, towards the end, the residue of the preceding infusion. Boil again for some minutes; strain, and add *white sugar*, ℥ vj. Ph. P.) Aperient and diuretic. Used in obstructions of the liver, spleen, and mesentery; and in dropsy, &c. Dose, f ℥ss to f ℥j, or more.

SYRUPUS RHAMNI, *S. Rhamni cathartici*, *S. de Spinâ cervinâ*, *S. spinæ cervinæ*, Syrup of *Buckthorn*, (F.) Syrup of *serprun*. (*Rhamn. baccar. succ. recent. Oiv, zingib. rad. concis., pimentæ bacc. contrit.*, āā ℥ss, sacch. purif. ℥iiss. Defecate the juice for 3 days, and strain. To a pint of this, add the ginger and pimento; macerate for 4 hours, and strain; boil what remains to Oiss. Mix the liquors and add sugar, so as to form a syrup. Ph. L.) Cathartic, but apt to gripe. Dose, f ℥iv to f ℥ij.

SYRUPUS RHEI, Syrup of *Rhubarb*. (*Rhei*, in pulv. crass. ℥ ij; Alcohol, Oss; Aqua Oiss; sacchar. ℥ ij. Mix the alcohol and water; pour f ℥iv on the rhubarb, mixed with an equal bulk of sand, and allow the whole to stand four hours; put the mass into a percolator, and gradually pour on the remainder of the alcohol and water. By means of a water-bath, evaporate to f ℥xij; add the sugar, and make a syrup. Ph. U. S.) Dose to a child, as a laxative, one or two teaspoonfuls.

SYRUPUS RHEI AROMATICUS, *Aromatic Syrup of Rhubarb*, *Spiced Syrup of Rhubarb*. (*Rhei*, cont. ℥iiss; *Caryophyl. cont., Cinnam. cont.* āā ℥ss; *Myrist. cont.* ℥ij; Alcohol dilut. Oij; Syrup Ovj. Macerate the rhubarb and aromatics in the diluted alcohol for 14 days, and strain; then, by means of a water-bath, evaporate the liquor to a pint, and while still hot, mix with the syrup previously heated. Ph. U. S.) It may also be made by the process of displacement.

The aromatic syrup of rhubarb is a gentle carminative cathartic. Dose to a child, f ℥j; to an adult, f ℥j.

SYRUPUS DE RHEO, Syrupus de *Cichorio composito*.

SYRUPUS RHÆ'ADOS, *S. de papaverē erratico*, *S. papaveris erratici*, Syrup of *Red Poppy*, (F.) Syrup of *coquelicot*. (*Rhœad. petal. recent. ℥j, aq. fervent. f ℥xviiij, sacch. purif. ℥iiss.* To the water, heated in a water-bath, add the petals. Remove the vessel; macerate for 12 hours; express; defecate, and add sugar to form a syrup. Ph. L.) Chiefly used to give colour.

A factitious syrup is often made of aloe, dissolved in simple syrup.

SYRUPUS ROSÆ, Syrupus *rosa'rum soluti'vus*, *S. e rosæ sticcis*, *S. rosæ centifolia*, *S. rosæ o'cus soluti'vus*, Syrup of *Roses*, (F.) Syrup of *roses pâtes*. (*Rosæ centif. petal. exsicc. ℥vij, sacch. purif. ℥vj, aq. fervent. Oiv.* Macerate the petals for 12 hours. Evaporate the strained liquor to ℥iiss. Add the sugar. Ph. L.) Gently laxative. Dose, f ℥j to f ℥iiss, or more.

SYRUPUS ROSÆ GAL'LICÆ, Syrup of *Red Roses*, (F.) Syrup of *roses rouges*. (*Rosæ Gallic. petal. exsicc. ℥vij, aqua bull. Ovj, sacch. purif. ℥vj;* prepared like the last. Ph. E.) Mildly astringent. Added to stomachic infusions.

SYRUPUS SACCHARI, *S. Simplex*.

SYRUPUS SARSAPARILLÆ, Syrup of *Sarsaparilla*. (*Rad. Sarsap. cont. ℥j, aqua bullient. cong., sacch. purif. ℥j.* Macerate the root for 24 hours; boil to Oiv. Strain while hot; add the sugar, and boil. Ph. L.) Used in the same cases as the root. Dose, f ℥j to f ℥ij, and more.

SYRUPUS DE SARSAPARILLÆ ET SENNÆ COMPOSITUS, Compound Syrup of *Sarsaparilla and Senna*, (F.) Syrup of *Cuisinier*. (*Rad. Sarsap. concis. ℥ij.* Infuse for 24 hours in warm water Oij; boil for a quarter of an hour; pass with expression, and boil again the residuum in Ox of water. Reduce this to Ovj, and repeat the operation 2 or 3 times. Mix all the liquors and boil them together with *flowers of borage, white roses, senna leaves and aniseed*, each ℥ij; reduce to half, pass, and add *honey* ℥ij. Boil to a syrup. Ph. P.) It is considered to be alterant, depurative, and sudorific. Dose, f ℥ss to f ℥ij.

A similar syrup, under the name SYRUPUS SARSAPARILLÆ COMPOSITUS, Compound Syrup of *Sarsaparilla*, is directed in the Pharmacopœia of the United States. (*Sarsaparill. cont. ℥ij; Lign. guaiac. rasur. ℥ij; Rosæ centifol., Sennæ, Glycyrrhiz. cont. āā ℥ij; Ol. Sassafras, Ol. Anisi. āā m. v.; Ol. Gaultheriæ m. ij; Alcohol. dilut. Ox.; Sacchar. ℥viiij.* Macerate the sarsaparilla, guaiacum wood, roses, senna, and liquorice root in the diluted alcohol for 14 days; express and filter. Evaporate the tincture in a warm bath to four pints; filter, add the sugar, and form into syrup. Lastly, having rubbed the oils with a small quantity of the syrup, mix them thoroughly with the remainder. Ph. U. S.)

It may also be made by the process of displacement.

SYRUPUS DE SCAMMO'NIO, Syrup of *Scammony*. (*Pulv. Scammon. ℥ss, sacch. alb. ℥iv. alcohol. (s. g. .985 to .915) f ℥viiij.* Heat the mixture moderately: then set fire to the alcohol with a lighted taper; agitate constantly, until the flame is extinguished. Suffer it to cool; pass through cloth, and add Syrup of *Violets*, f ℥iv. Ph. P.) ℥j contains 18 grains of scammony. Dose, f ℥j to f ℥ss.

SYRUPUS SCILLÆ, *S. scillit'icus*, *S. scillæ marit'ime*, Syrup of *Squill*. (*Acet. scillæ. Oj, sacch. ℥ij.*) Diuretic, expectorant, and emetic. Used in the same cases as the oxymel.

SYRUPUS SCILLÆ COMPOSITUS, *Mel Scilla Compositum*, Compound Honey of *Squill*, Compound Syrup of *Squill, Hive Syrup*. (*Scilla*

cont; *Senega* cont. ℞ ℥iv; *Antim. et Potassa Tart. gr.* xlvij; *Aqua* Oiv; *Sacchar.* ℞iiss. Pour the water upon the squills and seneka, and, having boiled to one-half, strain and add the sugar. Then evaporate to three pints, and while the syrup is still hot, dissolve in it the tartrate of antimony and potassa.)

It may also be formed by the process of displacement. *Ph. U. S.*

It is often given as an emetic in cases of croup, and in catarrh, especially in children. Dose, to infants, 10 drops to a drachm, repeated every 15 minutes, if vomiting be desirable.

SYRUPUS SENEGAE, Syrup of Seneka. (*Senega* cont. ℥iv; *Aqua* Oj; *Sacchar.* ℞j. Boil the water with the seneka to one-half, and strain; then add the sugar, and form into syrup. *Ph. U. S.*)

It may also be formed by the process of displacement. *Ph. U. S.*

This is a favourite stimulant expectorant (?) with many practitioners. Dose, f℥j or f℥ij.

SYRUPUS SENNAE, S. cassiae sennae, Syrup of Senna. (*Senna* ℥ij, *sem. fœnicul.* cont. ℥j, *sacch. pur.* ℥xv, *aqua bullient.* Oj. Macerate the senna leaves and fennel-seeds with a gentle heat for an hour. Strain; add the sugar, and make into a syrup. *Ph. U. S.*) Cathartic. Dose, f℥ij to f℥iiss, or more.

The Parisian Codex has a *Syrupus de Senna* of a compound character, called *Syrupus de pomis compositis*, (F.) *Syrup de pommes composé.* It contains, also, borage, bugloss, &c. Dose, f℥ss to f℥ij.

SYRUPUS SIMPLEX, Syrupus (Ph. U. S.), *S. Sacchari, Saccharum clarificatum, Liguarium, Simple Syrup, Syrup, Common syrup of capillaire.* (*Sacch. purif.* ℞iiss, *aqua* Oj. Dissolve the sugar; set aside for 24 hours; remove the scum, and pour off the clear liquid.) Used to cover nauseous tastes, &c.

SYRUPUS DE SPINA CERVINA, Syrupus rhamni — a. de Stœchade communis, see Lavendula.

SYRUPUS TOLUTANUS, S. Tolutani, S. toluiferæ balsami, S. balsamicus, Balsamic syrup, Syrup of tolu. (*Tinct. Tolut.* f℥iiss; *Aqua* Oj; *Sacchar.* ℞iiss. Mix the tincture with the sugar in coarse powder; expose it on a shallow dish to a gentle heat, until the alcohol has evaporated; pour the water upon it; heat gradually until the sugar is dissolved, and strain. *Ph. U. S.*) Use—to give flavour.

SYRUPUS VIOLÆ, S. viola odoratæ, S. viola-rum, S. e succo violarum, Syrup of Violets. (*Flor. recent. viol. odorat.* ℞ij, *aq. bull.* Oviij, *sacch. pur.* ℞xv. Macerate, in a covered vessel, for 24 hours; pass, without expression, through linen; add the sugar so as to form a syrup. *Ph. E.*) Very gently laxative. Dose, f℥j to f℥ij.

SYRUPUS E SUCCO VIOLARUM, S. violæ.

SYRUPUS ZINGIBERIS, S. amo'ni singiberis, Syrup of Ginger, (F.) *Syrup de gingembre.* (*Tinct. Zingib.* f℥iv; *Aqua* Oiv; *Sacchar.* ℞x. Mix the tincture with four pounds of the sugar in coarse powder; and expose it in a shallow dish to a gentle heat until the alcohol has evaporated. Add the rest of the sugar, and then the water in a covered vessel; heat gradually until the sugar is dissolved, and strain. *Ph. U. S.*) To the strained liquor add the sugar, and form a syrup.

N. B. The Parisian Codex contained a few other compound syrups besides those enume-

rated; amongst these is a *Syrup of calf's lungs, Syrupus e pulmonibus vitulinis*, (F.) *Syrup de mou de veau*, as an expectorant.

These syrups are made according to the usual rule, and possess the virtues of the substances after which they are named.

SYSPA'SIA, from *συσπαι*, (*συ*, and *σπαι*, 'I draw,') 'I contract.' Clonic spasm, with diminished sensibility and inability of utterance. A genus in Good's Nosology, which includes convulsion, epilepsy, and hysteria.

SYSPASIA CONVULSIO, Convulsion — s. *Epilepsia, Epilepsy* — s. *Hysteria, Hysteria*.

SYSSARCO'SIS, from *συν*, 'with,' and *σαρξ*, 'flesh.' *Commissura ossium carnea, Symphysis ossium muscularis, Connexio ossium cornu'ca, Carnatio, Concarnatio.* Union of bones by means of muscles; such as the union of the os hyoides with the lower jaw, of the scapula with the ribs, &c.

SYSTALCIS, Systole.

SYSTAL'TIC, Systal'ticus, Peristal'tic; from *συσπαι*, (*συ*, and *παι*), 'I contract.' A systaltic motion in a part is one in which there is alternate contraction and dilatation. See *Systole*.

SYSTAT'ICA, from *συσταται*, (*συ*, and *σταται*, 'I place,') 'I associate.' Diseases affecting several or all of the sensorial powers simultaneously; irritation or inertness of mind, extending to the muscles, or external senses; or of the muscles, or external senses, extending to the mind; — the 4th order, class *Neurotica*, of Good.

SYSTEM, Syste'ma, from *συν*, 'together,' and *σταται*, 'I place.' This word, taken in a good sense, means the collection and arrangement of different matters having an analogy to each other, or working towards the same end. In natural history, it means a methodical arrangement of beings for the purpose of facilitating their study. System is, however, sometimes used in an unfavourable sense in physical science, and often means, — a purely gratuitous supposition, by which the march of nature is attempted to be universally explained, and to which every thing is made to bend. In anatomy, system is an assemblage of organs, composed of the same tissues, and intended for similar functions; for instance, the *nervous system, muscular system, &c.*

SYS'TEMATISM. A method, according to which every fact of a science is collected around an opinion, true or false. One who reduces things to such a method is called a *Sys'tematist*.

SYSTEMATIST, see *Systematist*.

SYSTEMATOL'OGY, Systematolog'ia, from *συστημα*, 'system,' and *λογος*, 'a discourse.' The doctrine or a treatise of systems.

SYSTÈME VASCULAIRE À SANG NOIR, see *Vascular* — s. *Vasculaire à sang rouge*, see *Vascular*.

SYSTEMIC. Belonging to the general system — as 'systemic circulation' in contradistinction to the 'pulmonic.'

SYSTOLE. Same etymon as *SYSTAL'TIC; Systal'tis, Constrictio, Contractio* seu *Angustatio* seu *Submissio* seu *Micatio cordis.* The movement of constriction or contraction of the heart, to give impulse to the blood, or to cause its progression. It is opposed to the *Diastole* of the organ.

SYSTOLIC, Systol'icus; same etymon. Relating to the systole of the heart, — as 'systolic murmur.'

SYZYGIUM NERVORUM, Par nervorum.

T.

T BANDAGE, *T. fascia*, *Fas'cia T. formis* seu *Helioco'dri*, *Cru'cial Bandage*. A bandage shaped like the letter T. It consists of a strip of linen, of variable length and breadth, the middle of which is attached, at right angles, to the extremity of another strip, also of variable length and breadth. When two such strips are attached, at a distance from each other, the bandage is called a *double T*. This bandage is used, principally, for supporting the dressings after the operation for fistula in ano, in diseases of the perinæum, groin, anus, &c.

T FASCIA, *T Bandage*.

TABAC, *Nicotiana tabacum*—*t. des Savoyards*, *Arnica montana*—*t. des Vosges*, *Arnica montana*.

TABACUM, *Nicotiana tabacum*.

TABARZET, *Saccharum album*.

TAB'ASHEER, *Tabaschir*, *Tabazir*. A substance found in the knots of the bamboo, in the East Indies, as a consequence of a morbid condition of the part. It is distinguished for its great proportion of silicic acid, in combination with a small quantity of mineral and vegetable matters; as well as for its slight refractive property. It has been used in obstruction of the bowels. The sweet juice of the bamboo stalks has also been called *Tabasheer*.

TABEFACTION, Emaciation.

TABEFY, Emaciate.

TABEL'LA, *Tab'ula*, *Tabula'tum*, *Lozan'ga*, *Lozan'gia*, *Mor'sulus*, *Morcel'lus*, a lozenge; *Tea-vel'la*, (F.) *Tablette*, 'a small table.' A solid medicine, composed of a powder, sugar, and mucilage; and generally shaped like a disk. See *Pastil*, and *Troch.*

TABELLA, *Table*.

TABELLÆ ABSORBENTES, *T. de Magnesîâ*.

TABELLÆ AC'IDI OXAL'ICI, *T. ad sitem*, *Lozenges of Oxalic Acid*. (*Acid. oxalic. ℞, sacch. alb. ℥ss, ol. limonis, gtt. xviii vel gtt. xij. Make into lozenges with mucilage of gum tragacanth. Ph. P.*) Lozenges are made in the same way with the citric and tartaric acids. They are refrigerant.

TABELLÆ DE ALTHÆ'A, *Lozenges of Marsh-mallows*. (*Rad. althææ, pulv., ℥iss, sacchar. alb. pulv. ℥ivss; f. massa. Ph. P.*) Demulcent; expectorant.

TABELLÆ ANTIMONIA'LES KUNCKE'LII, *Tabellæ de stib'ii sulphure'to*, *Lozenges of Sulphuret of Antimony*, *Mor'suli antimonial'es*, *M. stibii*, *M. stibiati*, *Trochisci stibiati*. (*Amygdal. dulc. ℞, sacch. lbs, sem. cardam., cinnam. pulv., sulph. antim. prepar., ℞ ℥j; fiant tabellæ. Ph. P.* Each to weigh 10 grains.) Recommended in cutaneous diseases, blennorrhagia, arthritic pains, &c. Dose, 4 or more.

TABELLÆ AD ARDOREM VENTRICULI, *Trochisci carbonatis calcis*—*t. Cardialgiæ*, *Trochisci carbonatis calcis*.

TABELLÆ DE CAT'ECU ET MAGNE'SIÂ, *Lozenges of Catechu and Magnesia*, (F.) *Tablettes de catechu et de magnésie*. (*P. catech. ℥vj, p. magnes. ℥iv, p. cinnam. ℥ij, sacch. alb. lbs, g. tragac. gr. xij, aq. cinnam. q. s. ut f. massa. Ph. P.* Each to weigh 12 gr.) Antacid, absorbent, and stomachic. Dose, 5 to 10 lozenges.

TABELLÆ CINCHO'NÆ, *T. de kind kind*, *Bark Lozenges*. (*Ext. cinchon. sicc. ℥ss, sacch. ℥iv, cinnam. ℥ss, mucilag. g. trag. q. s. ut f. massa. Ph. P.*) Tonic.

TABELLÆ DE CITRO ET DIACARTHAMO, *T. de Scammonio et Sennâ*.

TABELLÆ DE FERRO, *Steel lozenges*, *Tabulæ martin'les*, *T. instaurant'es*, *T. antichloro'icæ*. (*Ferri limat. porphyris. ℥ss, p. cinnam. ℥j, p. sacch. ℥v, g. trag. et aq. cinnam. q. s., ut fiat massa. Each lozenge to weigh 12 gr. Ph. P.*) Tonic, stomachic. Dose, v to x.

Aromatic lozenges of steel. These consist of sulphate of iron, with a small proportion of the Tincture of *Cantharides*.

TABELLÆ DE KINÂ KINÂ, *T. cinchonæ*.

TABELLÆ DE MAGNE'SIÂ, *P. absorbent'es*, *Magnesia lozenges*. (*Magnes. ℥j, sacchar. alb. ℥iv, mucil. g. tragac. q. s. Ph. P.*) Absorbent and antacid.

TABELLÆ DE RHEO, *Rhubarb lozenges*. (*P. rhej ℥ss, sacch. ℥v, mucilag. gum. tragac. q. s.; f. massa. Each to contain 12 grains. Ph. P.*) Stomachic and laxative.

TABELLÆ DE SCAMMO'NIO ET SENNÂ COMPOS'ITÆ, *Compound lozenges of scammony and senna*, *T. de citro et diacarthamo*. (*Scammon. ℥ij, Senna ℥ivss, rhej. ℥iss, caryoph. ℥j, corticis limon. confect. ℥j, sacch. ℥vj; f. massa. Ph. P.*) Purgative. Dose, ℥ij to ℥vj, or more.

TABELLÆ AD SITEM, *T. acidii oxalici*—*t. ad Sodam*, *Trochisci carbonatis calcis*—*t. de Stibii sulphureto*, *T. antimoniales Kunckelii*.

TABELLÆ DE SULPHURE SIM'PLICES, *Simple sulphur lozenges*. (*Sulph. lot. ℥ss, sacch. ℥iv, muc. g. tragac. cum aquâ rosâ prepar. q. s. Ph. P.*) Expectorant, demulcent, &c. Used in diseases of the chest, and in cutaneous affections. Dose, a lozenge.

TABELLÆ DE SULPHURE COMPOS'ITÆ, *Compound sulphur lozenges*. (*Sulph. lot. ℥ij, acid. benzoic. gr. xij, rad. irid. p. ℥ss, ol. anisi, gtt. viij, sacch. ℥vss, g. trag. q. s. Ph. P.*) Aperient, expectorant, and stimulant. (?) Dose, 4 a day.

TABERNA MEDICA, *Pharma copulium*.

TABES, *Maras'mus Tabes*, *Tabum*, *Tab'idness*, from *tabere*, 'to consume'; *Te'kedon*, *Atroph'ia*, *Decline*. Emaciation of the whole body, with general languor, hectic fever, and, for the most part, depressed spirits.

TABES, *Atrophy*, *Phthisis*—*t. Coxaria*, *Ischiophthisis*—*t. Diabetica*, *Diabetes mellitus*—*t. Diuretica*, *Diabetes mellitus*.

TABES DORSAL'IS, *T. Dorsua'lis*, *Maras'mus tabes dorsa'lis*, *Phthisis no'tias* seu *dorsa'lis* seu *sicca*, *Myelophthi'sis*, *Myelatroph'ia*, *Tabes ossis sacri*. By this term is meant a wasting of the body, attended at first with a pain in the back or loins, and afterwards in the neck or head,—caused, it has been conceived, by too early or too frequent addiction to venery.

TABES GLANDULARIS, *T. mesenterica*, *Scrofula*—*t. Ischiadica*, *Ischiophthisis*—*t. Lactea*, *Atrophia lactantium*, see *Galactia*.

TABES MESENTER'ICA, *Atroph'ia mesenter'ica*, *Atroph'ia Infant'um*, *A. glandula'ris*, *A. infant'ilis*, *A. dorsî*, *Paraby'sma mesenter'icum*, *Ma'cies Infant'um*, *Pædatroph'ia*, *Tabes glandula'ris*, *T. Scrofulo'sa*, *Scrof'ula mesenterica*, *Rachial'gia mesenterica*, *Myelophthi'sis sicca*, *Feb'ris hec'tica infant'um*, *Phthisis mesar'ica*, *Phyco'n'ia mesenterica*, *Mesenterit'is*, *Mesenter'ic Disease*, (F.) *Carreau*, *Chartre*, *Scrofules* ou *Écrouelles mése'n'tériques*, *Éti'ic mése'n'térique*, *Rachial'gie mése'n'térique*, *Atrophie mése'n'térique*, *Phyco'nic mése'n'térique*, *Entéro-mése'n'térite*, *Tubercles des ganglions mése'n'tériques*, *Phthisis mése'n'térique*. Ad cu-

gorgement and tubercular degeneration of the mesenteric glands, followed by emaciation and general disorder of the nutritive functions. The disease is often owing to inflammation or irritation of the lining membrane of the intestines, giving occasion to enlargement of the glands of the mesentery, — as injury to the upper or lower extremities causes inflammation, and enlargement of the lymphatic glands of the axilla and groin. It occurs, particularly, in children of a scrofulous diathesis; and in those who are weaned too early, or fed on indigestible substances. Diarrhoea, emaciation, anorexia, or immoderate appetite; hardness and swelling of the abdomen; and, towards the end, hectic fever, are the chief symptoms of this affection; the prognosis of which is usually unfavourable. On opening the bodies of those who die of the disease, the mesenteric glands are found disorganised, tubercular, or in a more or less advanced state of suppuration. The treatment is the same as in scrophulosis. Frictions may be added over the abdomen and spine; and mercury, in small doses, so as to excite a new action in the system. The food must be easy of digestion, and the bowels be kept soluble.

TABES NUTRICUM, Atrophia lactantium, see Galactia — t. Osis sacri, Tabes dorsalis — t. Pectoris, Rachitis — t. Pulmonalis, Phthisis pulmonalis — t. Scrofulosa, T. mesenterica — t. Senum, Marasmus senilis.

TABESCERE, Emaciate.

TABID, *Tab'idus*, (F.) *Tabide*. Same etymon as Tabes. Relating or appertaining to tabes. Wasted by disease.

TABIDNESS, Tabes.

TABLE, *Tab'ula*, *Tabell'a*, *Tabula'tum*, *Lam'ina*, *Partes*, *Squama*. A name given to the plates of compact tissue, which form the bones of the cranium. Of these, one is external; the other internal, and called *Tab'ula vi'trea*, on account of its brittleness.

TABLES DE MORTALITÉ, Mortality, bills of.

TABLET, Trochiscus.

TABLETTE, Tabella.

TABLETTES DE CACHOU ET DE MAGNÉSIE, *Tabellæ de catechu et magnesiâ*.

TABLIER, *Ventrale outanum*.

TABOURET, *Thlasi burgera*.

TABULA, *Tabella*, *Table*.

TABULÆ ANTICHLOROTICÆ, *Tabellæ de ferro — t. Instaurantes*, *Tabellæ de ferro — t. Martiales*, *Tabellæ de ferro*.

TABULATUM, *Tabella*, *Table*.

TABUM, *Ichor*, *Sanies*, *Tabes*.

TAC, *Influenza*.

TACAMAHACA, *Fagara octandra* — t. *Caragna*, *Caranna*.

TACHE, *Macula*.

TACHE EMBRYONNAIRE, 'Embryonic spot'; *Cu'mulus*, *Ger'minal cu'mulus*, *Cu'mulus germinati'vus* seu *prolig'erus*, *A'rea germinati'va*, *Nu'cleus cicatric'ulæ* seu *blastoderm'atis*. A name given by M. Coste to a spot seen on the blastoderma about the end of the first week, from which the development of the embryo proceeds.

According to Bischoff, the blastodermic vesicle consists here of a double layer — the upper one the *serous* or *animal*; the lower, the *mucous* or *vegetative*; and between these is afterwards formed the *vascular layer*.

TACHE GERMINATIVE, see *Molecule — t. de Naissance*, *Nævus*.

TACHENCAUSIS, *Combustion*, *human*.

TACHES HÉPATIQUES, *Chloasma*.

TACHES LAITEUSES, *Plaques lacteuses*,

'milky spots or patches.' White spots occasionally seen on the heart, and regarded by many pathologists as the results of previous pericarditis.

TACHES DE ROUSSURE, *Ephelides* — t. *Rouges*, *Spots*, *Red*.

TACHYIA'TER, *Tachyiatrus*. Same etymon as the next. One who cures speedily.

TACHYIATRIA, from *ταχος*, 'quick,' and *ιατρία*, 'healing.' The art of curing quickly.

TACH'YTOMY, *Tachytomia*, from *ταχος*, 'quick,' and *τομη*, 'incision.' The art of cutting or operating rapidly.

TACITURNITY, *Taciturnitas*, *Sigs*, 'silence,' from *tacere*, 'to be silent.' 'State of a person who does not speak.' Morbid taciturnity sometimes exists as a symptom of the neuroses, especially of melancholy.

TACT, *Tactus*, from *tangere*, *tactum*, 'to touch.' A modification of the sense of touch. Passive judgment by the cutaneous nerves regarding bodies exterior to the skin. Tact is passive: Touch, active.

TACTILE, *Tac'tilis*; same etymon. Relating or appertaining to touch.

TACTION, *Touch*.

TACTUS, *Tact*, *Touch* — t. *Dolorificus*, *Haptodyspthoria*.

TÆDÆ, *Dæs*, *daic*. A term used for a medicine employed under the form of fumigation, pessary, or troch.

TÆNIA, *Te'nia*, *Fas'cia*, from *ταenia*, 'a fillet, a riband.' See *Bandage*. Also a genus of intestinal worms, characterized by an elongated, flattened, and articulated body, with four suckorial oscula on the head. Of this genus, two only inhabit the human body — the *Tænia lata*, (see *Bothriocephalus latus*), and *Tænia solium*.

TÆNIA ACEPHALA, *Bothriocephalus latus* — t. *à Anneaux courts*, *Bothriocephalus latus* — t. *à Anneaux longs*, *Tænia solium* — t. *Articulos demittens*, *Tænia solium* — t. *Cucurbitina*, *Tænia solium* — t. *Dentata*, *Bothriocephalus latus* — t. *Grisea*, *Bothriocephalus latus* — t. *Hippocampi*, *Corpora fimbriata* — t. *Humana armata*, *Tænia solium* — t. *Humana inermis*, *Bothriocephalus latus* — t. *Hydatigena*, *Hydatid* — t. *Lata*, *Bothriocephalus latus* — t. *à Longues articulations*, *Tænia solium* — t. *Membranacea*, *Bothriocephalus latus* — t. *Nervosa Halleri*, *Ganglion of Gasser* — t. *Non arm.*, *Bothriocephalus latus* — t. *Occlus lateralis geminis*, *Bothriocephalus latus* — t. *Occlus lateralis solitarii*, *Bothriocephalus latus* — t. *Occlus marginalibus solitarii*, *Tænia solium* — t. *Occlus superficialibus*, *Bothriocephalus latus* — t. *Prima*, *Bothriocephalus latus* — t. *Sans épine*, *Tænia solium* — t. *Secunda*, *Tænia solium*.

TÆNIA SEMICIRCULARIS, *T. striata*, *Gem'inum centrum semicirculârè*, *Limbus posterior corporis striati*, *Stria cor'neæ seu semilunares seu terminales*, *Frænulum novum*, *Fascia semicircularis*, (F.) *Bandelette des ténueces pyriformes* (Ch.), *Bandelette*, *B. demicirculaire*, *Lame cornée*. A medullary, grayish, semitransparent layer, situate in the groove that separates the thalamus opticus from the corpus striatum in the lateral ventricle.

TÆNIA SOLIUM, *T. occlus marginalibus solitarii*, *Tænia cucurbitina*, *Tænia humana armata*, *Hallysis solium*, *Vermis cucurbitina*, *Lumbricus latus*, *Tænia sans épine*, *Tænia articulos demittens*, *Solium*, *T. secunda*, *Tænia à longues articulations*, *Tænia à anneaux longs*, *Ver solitaire*, *V. cucurbitain*, *Long Tape Worm*, has an almost hemispherical, discrete head; an obtuse beak; the neck full anteriorly; all the joints slightly obtuse, the anterior very short; the next almost square, and the rest oblong; the marginal

foramina vaguely alternated. The tænia solium is commonly a few feet long; sometimes its length is enormous. It is said to have been met with 600 feet long. It principally inhabits the small intestines, and is not common. The oil of turpentine, in some form, largely exhibited, is perhaps the best remedy.

TÆNIA STRIATA, *T. semicircularis* — *t. Tarii*, *Lamina cornes* — *Tenella*, *Bothriocephalus latus* — *t. Vulgaris*, *Bothriocephalus latus*.

TÆNIE COLI, see Colon.

TÆNIAFUGE, *Tæniafugum*, from *tænia*, and *fugo*, 'I drive off.' A remedy calculated to expel tænia.

TÆNIOLA, *Bandelette*. Used by Gerber for a simple, band-like, or flat fibre, *Filum tæniiforme*, seen under the microscope.

TAFFETAS AGGLUTINATIF, *Sparadrapum adhesivum* — *t. d'Angleterre*, see *Sparadrapum adhesivum* — *t. Épispatique*, *Sparadrapum vesicatorium* — *t. Gommé*, see *Sparadrapum adhesivum* — *t. Vésicant*, *Sparadrapum vesicatorium*.

TAFIA, Rum.

TAILLADE, Incision, see *Entaille*.

TAILLE, Lithotomy — *t. Hypogastrique*, *Hypogastric operation of lithotomy*, see *Lithotomy* — *t. Par le rectum*, see *Lithotomy* — *t. Postérieure*, see *Lithotomy* — *t. Recto-vésicale*, see *Lithotomy* — *t. Sus-pubiéenne*, see *Lithotomy*.

TAKAMAHAKA, *Fagara octandra*.

TAL. A word formerly employed for alkali. It also meant the dung of the peacock.

TALC EARTH, *Magnesia*.

TALCUM NEPHRITICUM, *Nephreticus lapis*.

TALENTUM, *ταλαρον*. An ancient weight equal to 54 pounds, 2 oz., 5 dr., and 24 grains *Poids de Marc*. See *Weights and Measures*.

TALEOLUS, *Malleolus*.

TALIACOTIAN OPERATION, *Rhinoplastie*.

TALINUM UMBELLATUM, see *Mistura*.

TALIPES, *Kyllosis* (*Clubfoot*) — *t. Equinus*, see *Kyllosis* — *t. Valgus*, see *Kyllosis* — *t. Varus*, see *Kyllosis*.

TALON, see *Calcaneum*.

TALPA, 'a mole.' *Topina'ria*, *Tupina'ria*, *Talpa'ria*, *Testudo*, (F.) *Taupe*. A tumour situate on the head, which has been supposed to burrow like a mole.

TALPARIA, *Talpa*.

TALUS, *Astragalus*, *Malleolus*, see *Calcaneum*.

TAMARA CONGA, *Averrhoa carambola*.

TAMARÆA ZECLA, *Tamarindus*.

TAMARIN, *Tamarindus*.

TAMARIN'DI PULPA, *Pulp of tamarinds*, (*Tamarinds*, *q. s.* Digest them with a small quantity of water, until they become of a uniform consistence; then separate the seeds and filaments, by pressing through a hair-sieve. Ph. U. S.)

TAMARINDS, PULP OF, *Tamarindi pulpa*.

TAMARIN'DUS, *T. Indica*, *Thamarindus*, *Oriphanicon*, *Sil'iqua Arab'ica*, *Balampul'i*, *Tamara'a zecla*, *Oryphan'cia*, *Aca'cia Indica*, *Tamarind tree*, (F.) *Tamarin*. *Family*, *Leguminosæ*. *Sex. Syst.* *Triandria Digynia*. The pulp of the tamarind with the seeds connected by numerous tough strings, is exported from the West Indies, preserved in syrup, — *Tamarindus*, (Ph. U. S.) It is refrigerant and laxative. *Tamarind whey* is made by boiling \mathfrak{z} ij of the pulp with \mathfrak{f} iss of milk. When strained, it is used as a diluent in fever.

TAMARISCUS, *Tamarix Gallica*.

TAM'ARIX, *T. Gal'lica*, *T. Pentan'dra*, *Tamari'ca*. The *Tamariak tree*. *Family*, *Portulacæ*. *Sex. Syst.* *Pentandria Pentagynia*. The

bark, wood, and leaves were formerly employed medicinally; — the former for its aperient and corroborant virtues, in obstructions of the liver; the latter in icterus, hæmoptysis, and some cutaneous affections.

TAMBOUR, *CAVITÉ DU*, *Tympanum*.

TAMPA BAY, see *Saint Augustine*.

TAMPON, see *Plugging*.

TAMPONNEMENT, *Plugging*.

TANACE'TUM, *T. vulga'ris*, *Tana'cia*, *Athana'cia*, *Parthe'nium mas*, *Tansy*, (F.) *Tanaisia vulgaire*. *Family*, *Corymbifera*. *Sex. Syst.* *Syngenesia Polygama*. The leaves and flowers of tansy have a peculiar, strong odour, and warm, bitter taste. They are tonic, deobstruent(?), and anthelmintic. Dose, \mathfrak{z} ss to \mathfrak{z} j. The infusion is usually drunk as tea.

TANACE'TUM BALSAMI'TA, *Balsami'ta mas seu vulga'ris*, *B. suaveolens*, *B. major*, *Tanacetum hortense*, *Costus hortorum*, *Mentha Roma'na seu Saraceni'ca*, *Costmary*, *Alecost*, *Cock-mint*, (F.) *Menthe coq*, *Herbe au coq*, *Grand Baume*. A fragrant-smelling herb, somewhat resembling mint, and formerly much esteemed as a corroborant, carminative, and emmenagogue.

TANACE'TUM HORTENSE, *T. balsamita*.

TANACE'TUM MULTIFLO'RUM. A South African plant, which is used as a tonic, antispasmodic and anthelmintic. It is given in flatulency, gout, amenorrhœa and dropsy: but is especially prescribed in cases of ascarides lumbricoides and other entozoa. It is administered in the form of powder or infusion; the latter acting also, as a diaphoretic and diuretic. It is used likewise as a resolvent and anodyne fomentation.

TANASIE VULGAIRE, *Tanacetum*.

TANASIA, *Tanacetum*.

TANGE, *ταγγα*, 'rancidity.' A putrescent tumour.

TANNINUM, *Tanninum*.

TANNIC ACID, *Tannin*.

TANNICUM PURUM, *Tannin*.

TANNIN, from (F.) *tanner*, 'to tan.' *Tannicum purum*, *Tanninum*, *Tanninum*, *Principium adstringens seu Scytodep'sicum seu Byrsodep'sicum seu Coria'cium*, *Scytodep'sium*, *Acidum Tannicum*, *A. Quercitan'nicum*, *Tannic acid*, (F.) *Acide tannique*. A principle obtained from oak bark and other astringent vegetables, so called from its forming the principal agent in the process of tanning. Pure tannin, obtained from galls, by the action of ether, (see Ph. U. S.) has been employed as an excellent and powerful astringent. Dose, two grains repeated several times a day.

TANSY, *Tanacetum* — *t. Wild*, *Potentilla anserina*.

TAPER, HIGH, *Verbascum nigrum*.

TAPE'TUM, *Ta'pestry*, *Tapetum choroidea*. A shining spot, on the outside of the optic nerve, in the eyes of certain animals, which is owing to the absence of the pigmentum nigrum, occasioning the reflection of a portion of the rays from the membrana Ruyschiana. Its use appears to be, by reflecting the rays, to cause a double impression on the retina, and thus add to the intensity of vision.

TAPETUM, see *Corpus Callosum*.

TAPETUM ALVE'OLI, *Membrana exter'na dentifium*. The outer membrane of the teeth. The lining membrane or periosteum of the alveoli.

TAPEWORM, BROAD, *Bothriocephalus latus* — *t. Long*, *Tænia solium*.

TAPIOCA, see *Jatropha manihot* — *t. Pearl*, see *Jatropha manihot*.

TAPUSUS BARBATUS, *Verbascum nigrum*.

TAPSBARIA, *Decoctum hordei*.

TAR, see *Pinus sylvestris* — t. Barbadoes, Petroleum — t. Mineral, Pissasphaltum.

TAR'ACHÈ, *Tarax'is, Tarax'ma, Tarax'mus*, 'disorder.' A disorder of sight, which arises from a blow, compression of the eye, or the action of dust, smoke or other external cause. By some, it is understood to signify mild or incipient ophthalmia.

Ταραχη της κοιλίας, 'disturbance of the belly.' Diarrhœa.

TARAGMA, Tarache.

TARAGMUS, Tarache.

TARAGON, *Artemisia dracunculus*.

TARANTALISMUS, Tarantismus.

TARANTISM'US, *Tarentis'mus, Tarantalis'mus, Dinoma'nia, Chore'a Sancti Valentini, Tarentulism, Tar'antism*. A feigned or imaginary disease in Apulia, characterized by excessive avidity for dancing at the sound of instruments, and which was ascribed, by the vulgar, to the bite of the tarantula. A sort of tarantismus, considered peculiar to Africa, and believed to be spontaneous, has been called *Tarentismus Tangita'nus, Japon-tarentisme*.

TARAN'TULA, from Tarentum or Tarento, a town of Italy where it abounds; *Tarent'ula*, (F.) *Tarentule*. A species of spider—the *Ara'nea Tarentula* of Linnæus, *Lyc'o'ea Tarentula* of Latreille, whose bite has been looked upon as dangerous. Music has been thought to cure it.

TARASCON, MINERAL WATERS OF. Chalybeate springs in the department of Arriège, France. They contain iron and carbonic acid.

TARAXACUM, *Leontodon taraxacum* — t. *Dens leonis, Leontodon taraxacum*.

TARAXIS, Tarache, see Ophthalmia.

TARCHON SYLVESTRIS, *Achillea ptarmica*.

TARENTISMUS, Tarantismus — t. *Tangitaneus, Tarantismus*.

TARENTULA, *Tarantala*.

TARENTULISM, Tarantismus.

TARGAR, *Juniperus communis*.

TARI. Palm or cocoa wine, from which sugar was obtained, called *Jagre*. It was once used as a tonic.

TARI'NI PONS, *Interpedun'cular space, Posterior perforated space, Locus perforatus posterior*. A cineritious substance, between the corpora albicantia, which assists in forming the bottom of the third ventricle.

TARO, *Arum esculentum*.

TARQUETTE, *Horniaris glabra*.

TARSAL, *Tar'seus*. That which relates to the tarsus.

TARSAL ARTICULATIONS result from the union of the bones of the tarsus with each other.

TAR'SEA LATA (LIGAMENTA). Three ligaments, described by Winslow as stretching from the edge of the orbit to that of the tarsi, with which, he thought, they formed a complete layer of the eyelids. Zinn could not trace the ligaments all the way to the tarsi; whilst Haller doubted altogether their ligamentous texture, and Zeis regards them as merely areolar substance.

TARSEUS, Tarsal.

TARSO-METATARSAL, *Tarso-metatar'seus*. That which relates to tarsus and metatarsus.

TARSO-METATARSAL ARTICULATIONS are those between the bones of the second row of the tarsus and the metatarsal bones. The term *Tarso-metatarsal* is likewise applied to ligaments connected with these joints, some of which are *dorsal*, and others *plantar*.

TARSO-MÉTATARSI-PHALANGIEN DU POUCE, Adductor pollicis pedis — t. *Phalangiën du pouce, Flexor brevis pollicis pedis* — t. *Sous-phalangiën du petit orteil, Flexor brevis minimi*

digiti pedis — t. *Sous-phalangiëtien du premier orteil, Flexor brevis pollicis pedis*.

TARSOPHY'MA, from *Tarsus*, and *φωρα*, 'a tumour.' A swelling of the tarsus.

TARSOR/RHAPHY, *Tarsorrhaph'ia*, from *ter'sus*, 'the tarsal cartilage,' and *ραφή*, 'suture.' An operation for diminishing the size of the opening between the eyelids, when it is enlarged by surrounding cicatrices.

TARSOT'OMY, *Tarsotom'ia*, from *tarsus*, and *τομή*, 'incision.' The section or removal of the tarsal cartilages.

TARSUS, *Planta prima pedis, Rasce'ta seu Rasce'ta pedis, Pe'dium, Caric'ula pedis sodus*. 1. The posterior part of the foot. The tarsus consists of 7 bones, arranged transversely in two rows, between which amputation is sometimes performed. The *first or Tibial row*, (F.) *Pre-mière rangée, R. jambière*, consists of the astragalus and os calcis; the *second or metatarsal*, (F.) *seconde rangée, R. métatarsienne*, of the scaphoides, cuboides, and three ossa cuneiformia. 2. The *Tarsi*, Tarsal cartilages, *Tarsal fibro-cartilages, Orchoi, Crepid'ines seu Coro'næ seu Chela seu Un'gula Palpebra'rum, Tarsi*, are two small cartilaginous layers, seated in the substance of the free edge of each eyelid. The upper is larger and broader than the lower. Both commence at the bifurcated extremity of the tendon of the orbicularis palpebrarum, and pass to the opposite commissure of the eyelids. They are broader in the middle than at their extremities.

TARTAR, Antimonium tartarizatum (improperly), Potassæ supertartras impurus — t. Calcareous, Potassæ subcarbonas — t. Crystals of, Potassæ supertartras — t. Emetic, Antimonium tartarizatum — t. Soluble, Potassæ tartras, see Potash.

TARTA'REI MORBI. A term employed by Paracelsus to designate certain diseases which he attributed to tartar.

TARTARI CRYSTALLI, Potassæ supertartras.

TARTAR'IC ACID, *Ac'idum tartar'icum, A. tartaro'sum, Acor tartar'icus, Acidum tartari essentialè, Tartar'ous acid, Sal tartari essentialè*. (Potassæ bitart. Diiss, aq. destillat. ferr., cong. ij, creta ppt. ℞j, acidi sulph. ℞j.) Boil the bitartrate with two gallons of the water, and gradually add the prepared chalk, until no more bubbles appear; let the tartrate of lime subside; then pour off the fluid and wash the tartrate of lime with distilled water, until it is tasteless. Pour upon it the sulphuric acid, diluted with a gallon of boiling distilled water; and set the mixture aside for 24 hours, occasionally stirring it. Filter and evaporate to crystallize. Ph. L.) It is refrigerant and antiseptic, but is chiefly used for making effervescent draughts with soda.

TARTARUM, Potassæ supertartras impurus — t. Vitriolatum, Potassæ sulphas.

TARTARUS AMMONIÆ, Ammoniac tartras — t. Chalybeatus, Ferrum tartarizatum — t. Crudus, Potassæ supertartras impurus — t. Dentium, Odontolithos — t. Emeticus, Antimonium tartarizatum — t. Kalioferricus, Ferrum tartarizatum — t. Kalinus, Potassæ tartras — t. Lixivium, Potassæ tartras — t. Martialis, Ferrum tartarizatum — t. Potassæ ferruginosus, Ferrum tartarizatum — t. Subpotassicus, Potassæ supertartras — t. Superpotassicus, Potassæ supertartras — t. Tartarizatus, Potassæ tartras.

TARTRATE D'AMMONIAQUE, Ammoniac tartras.

TARTRE BRUT, Potassæ supertartras impurus — t. Cru, Potassæ supertartras impurus — t. *dentis*, Odontolithos — t. *Émetique*, Antimonium

tartarizatum—*s. Snibié*, Antimonium tartarizatum.

TARTRUM SOLUBILE, Potassa tartaras.

TASIS, Extension, Tension.

TASTE, *Gustus, Genus, Geuma, Geuthmos*, (F.) *Goût*. One of the five external senses, which instructs us of the savours of bodies, and of which the tongue is the principal organ.

Gustation, Gustatio, is the exercise of this faculty. In disease, the taste frequently becomes variously vitiated. The nerves of taste are probably the lingual branch of the fifth pair and the glosso-pharyngeal.

TASTE, Savour.

TAUPE, Talpa.

TAUROCOLLA, from *ταυρος*, 'a bull,' and *κόλλα*, 'glue.' Glue made of the ears and genitals of the bull. It was formerly much esteemed.

TAURUS, Penis, Perineum.

TAXIS, 'arrangement;' from *τάσσω*, 'I order,' 'I arrange;' *Repositio*, *Reductio*, *Syntaxis*. A methodical pressure exerted by the hand on a hernial tumour, for the purpose of reducing it. This operation is generally easy in herniæ that are free from adhesions, of small size, and with a large opening into the sac; but it is very difficult and frequently impracticable in those that are adherent or strangulated. To perform the taxis, the patient should be put in the horizontal posture, and in one in which the parietes of the abdomen are relaxed. The manual procedure varies in each species of hernia. In all cases, too strong pressure of the parts must be avoided; as inflammation and gangrene might be induced. The displaced organs must be pushed into the abdomen, according to the direction of the axis of the hernial sac. The reduction is sometimes favoured by blood-letting *ad deliquium*; the warm bath; warm fomentations; tobacco; emollient glysters; and, at times, by cold applications, as ice, &c. In a case of strangulated hernia, should the taxis fail, an operation becomes necessary.

TAXUS BACCA'TA. The *Yew tree*, *Smilax*, *Smilax*, *Thym'alos*, (F.) *If. Family*, Coniferae. *Scr. Syst.* Diœcia Monadelphia. The ancients believed the yew to be poisonous; but the fruit may be eaten without inconvenience. The leaves have been often recommended in epilepsy. The resin, obtained from the bark, has been called *albir*.

TAYE, Caligo.

TAYLOR'S REMEDY FOR DEAFNESS, see Allium.

TEA, Thea—*t. Apple*, see Apple tea—*t. Bahama*, *Lantana camara*—*t. Beef*, see Beef tea—*t. Berried*, *Gaultheria*—*t. Berry*, *Gaultheria*—*t. Blankenheim*, see *Galeopsis grandiflora*—*t. Brasil*, *Lantana pseudothea*—*t. Bushman's*, *Methacophyllum glaucum*—*t. Caffre*, *Helichrysum nudifolium*—*t. Chicken*, see *Chicken tea*—*t. Flaxseed*, *Infusum Lini compositum*—*t. Ginger*, *Infusum Zingiberis*—*t. Hottentots'*, *Helichrysum serpyllifolium*—*t. Labrador*, *Ledum latifolium*—*t. Lemon-peel*, see *Citrus medica*—*t. Marsh*, *Ledum palustre*—*t. Mexico*, *Chenopodium ambrosioides*—*t. Mountain*, *Gaultheria*—*t. Mutton*, see *Mutton tea*—*t. New Jersey*, *Celastrus*—*t. Oswego*, *Monarda coccinea*—*t. Redberry*, *Gaultheria*—*t. Slippery elm*, *Infusum Lini compositum*—*t. Boot*, see *Fulgicokali*—*t. South sea*, *Ilex vomitoria*—*t. Spanish*, *Chenopodium ambrosioides*—*t. Veal*, see *Veal tea*.

TEAR, *Sax. Tear*, *Lacryma*, *Lachryma*, *Lacryma*, *Lacryma*, *Dacry*, *Dacryma*, *Dacryon*, *Humor lacrymalis*, *Eyedrop*, (F.) *Larme*. An excrementitious humour, secreted by the lachrymal gland, and poured between the globe of the eye,

and the eyelids, to facilitate the motions of those parts. The tears are saline, inodorous, and colourless. They turn the syrup of violets green; and contain chloride of sodium, with excess of base, phosphates of lime and soda, and albumen.

TEARS, DEERS', Bezoar of the deer.

TEASEL, CULTIVATED, *Dipsacus sylvestris*.

TEAT, Nipple.

TEAZEL, *Eupatorium perfoliatum*.

TECEDON, Phthisis.

TECNOCTONIA, Infanticide.

TECOLITHOS, *Judeus* (lapis.)

TECO'MA RADICANS, *Bygnonia radicans*, *Trumpet flower*, *Trumpet creeper*, *Virgin'ia creeper*. Indigenous; the orange and scarlet flowers appearing in July. *Order*, *Bignoniaceae*. The leaves are acrid.

TECTARIA CALAHUALA, see *Calaguala radix*—*t. Ferruginea*, see *Calaguala radix*.

TEETH, see *Tooth*—*t. Eye*, *Canine teeth*—*t. Jaw*, *Molar teeth*—*t. Milk*, see *Dentition*—*t. Neck of the*, *Collum dentium*—*t. Vitreous substance of the*, *Enamel of the teeth*.

TEETHING, *Dentition*.

TEGIMEN, *Integument*.

TEGMEN, *Integument*.

TEGULA HIBERNICA, *Hibernicus lapis*.

TEGUMEN, *Integument*.

TÉGUMENT, *Integument*.

TEGUMEN'TARY. Relating or appertaining to the integument.

TEGUMEN'TUM, *Integument*—*t. Auris*, see *Tympanum*—*t. Ventriculorum cerebri*, *Centre*, *oval*, of the brain.

TEIGNE, *Pityriasis*, *Porriigo*, *Porriigo lupinosa*—*t. Annulaire*, *Porriigo scutulata*—*t. en Anneau*, *Porriigo scutulata*—*t. Favense*, *Porriigo favosa*—*t. Furfuracée*, *Porriigo furfurans*—*t. Nummulaire*, *Porriigo scutulata*.

TEINESMOS, *Tenesmus*.

TEINODYN'IA; from *τείνω*, 'to extend,' and *ὄδυνη*, 'pain.' Pain of the sinews or tendons.

TEINOPHLOGO'SIS; from *τείνω*, 'to extend,' and *φlogωσις*, 'inflammation.' Inflammation of the sinews or tendons.

TEINTURE, *Tincture*—*t. Éthérée*, *Æthereal*—*t. Rubéfiante*, *Tinctura cantharidis*.

TEKEDON, *Tabes*.

TELA, *Texture*, *Tissue*—*t. Accidentalis*, *Medullaris*, *Encephaloid*—*t. Cellulosa*, *Cellular tissue*—*t. Emplastica*, *Sparadrappum*—*t. Erectilis*, *Erectile tissue*—*t. Galteri*, *Sparadrappum Galteri*—*t. Hippocratis cribrosa*, *Cellular tissue*—*t. Hy-menochondroides*, *Tissue*, *cartilaginous*—*t. Hy-menochondroides*, *Tissue*, *cartilaginous*—*t. Ichthyocollæ glutinans*, see *Sparadrappum adhæsivum*—*t. Inodularis*, *Tissue*, *inodular*—*t. Organica*, *Histos*—*t. Vesicatoria*, *Sparadrappum vesicatorium*.

TELAMON, *Habena*.

TELAMO'NES, *τελαμωνίς*, 'bandages.' Charpie, used for wounds; or linen, employed for bandages.

TELANGECTASIS, *Telangiectasia*.

TELANGIECTA'SIA, *Telangiectasia*, *Telangiectasia*, *Angiectelecta'sia*, *Hæmatotelangi'sis*, *Hæmatotelangi'sis*, *Angiecta'sia*, *Anastomosis aneurysmal'ica*; from *τελες*, 'far,' *αγγιον*, 'vessel,' and *σπασίς*, 'dilatation.' Dilatation of vessels. *Nævus maternus*. *Aneurism* by *anastomosis*. According to some, *fungus hæmatodes*. See *Hæmatodes fungus*.

TELANGIECTASIA OCULI, *Cirsophthalmus*.

TELEPHIUM, *Ulcus telephium*. The ancients gave this name to any ulcer of a very bad kind, and difficult to cure, because the wound, which

Achilles inflicted on Telephus, degenerated into a similar-ulcer.

TELEPHIUM, *Sedum telephium*.

TELLURISMUS, Magnetism, animal.

TELLUM, Penis.

TEMPE, Temple.

TEMPERAMENT, *Temperamentum*, *Temperamentum*, *Temperatio*, *Temperies*; originally from *tempus*, 'time,' the great temperer; *Complexio*, *Craisis*, *Eucrasia*. A name given to the remarkable differences that exist between individuals, in consequence of the variety of relations and proportions between the constituent parts of the body. Thus, of old, it was supposed that, according to the predominance of any one of the four humours then generally admitted,—blood, lymph, bile, and atrabillis or black bile,—the manifestations of the functions were tempered or modified so as to give rise to a sanguine, lymphatic, choleric, or atrabillious or melancholic predominance or temperament. The idea of the existence of certain of these humours has been banished; yet the influence of some, as of the blood, lymph, and bile, is still admitted by many. Too much influence has, doubtless, been assigned to temperament in the sense in which it was formerly and still is generally understood, although there can be no question that difference of organization occasions a difference in the activity of organs.

TEMPERAMENT, BILIOUS, Choleric temperament.

TEMPERANCE, *Sophrosynē*, *Nephalotes*, *Sobrietas*, *Sobrietas*. Moderation, opposed to gluttony and drunkenness. The advantage of temperance, in a hygienic point of view, requires no comment.

TEMPÉRANTS, Sedatives.

TEMPERATIO, Temperament.

TEMPERATURA, Temperament.

TEMPERIES, Temperament.

TEMPLE, *Tempus*, *Religio Temporalis*, *Crotaphus*, (F.) *Tempe*. A depression, on each side of the head, between the forehead and eye anteriorly, and the ear posteriorly. The *temples*, distinguished into *right* and *left*, correspond to the temporal fossa on each side. The word is said to be from the Latin *tempus*, 'time,' because in this part the hair first begins to turn white, and to indicate age.

TEMPORAL, *Temporalis*. That which relates to the temples.

TEMPORAL APONEURO'SIS is a very strong aponeurosis, of a bluish, shining colour, which is attached to the whole of the curved line of the temporal bone; to the posterior edge of the malar bone; to the superior margin of the zygomatic arch; and forms an envelope for the temporal muscle.

TEMPORAL ARTERIES, *Crotaphite Arteries*, are several:—1. The *Temporal Artery*, properly so called, arises from the outer side of the superior part of the external carotid. It ascends between the ramus of the jaw, the meatus auditorius externus, and the parotid gland, which covers it as far as the zygomatic arch. Above this it becomes subcutaneous; and, when it has attained the middle of the temporal region, it divides into two branches: the one anterior—*A. temporalis frontalis* seu *inter-na* seu *ante-rior*; the other posterior—the *A. temporalis occipitalis* seu *exter-na* seu *superior*. The temporal artery, before its division, gives off, 1. Branches to the parotid; to the joint of the lower jaw; to the meatus auditorius, and to the masseter. 2. The *transverse artery of the face*. 3. The *middle temporal*, which arises beneath the cheek-bone, and traverses the temporal aponeurosis, immediately beneath that bone. II. The *Deep-seated Temporalis*. *A. tem-*

porales profundæ. These are two in number. They arise from the internal maxillary, and have been distinguished, from their position, into *anterior* and *posterior*. They send their principal divisions to the temporal muscle.

TEMPORAL BONE, *Os temporis* seu *temporis* seu *arcuallè* seu *armallè* seu *parietallè inferius* seu *crotaphiticum* seu *mementum mori* seu *mentum* seu *crotaphus*, is seated at the lateral inferior part of the cranium, of which it forms part; and contains, within it, the special organ of audition. It is usually divided into three portions:—1. The *squamous*, *Pars squamosa*, *lepidodes* seu *equamosa* seu *equamiformis*, (1) *Portion écailleuse ou squameuse*. 2. The *mastoid portion*, and, 3. The *Petrous portion*, *Pars Proc'ess*, *Pars petroea*, *Pyramis trig'na*, *lapideum* seu *lepidosum* seu *saxum* seu *petrosum* seu *lithoides* seu *durum* seu *prærupta rupi* seu *mitatum* seu *nerualè*, *Pars pyramidalis ossis temporis*, (F.) *Portion pierreuse*, *Rocher*, *Os petri* *Apophyse pyramidale*, *A. pétée*.

It has, first, an *articular* or *external face*, which is a surface that makes part of the temporal fossa; the *zygomatic process*; the *glenoid cavity*; the *fissure of Glaser*; the *meatus auditorius externus*; the *mastoid process*; the *digitric groove*; the *canalis caroticus*; the *jugular fossa*; the *styloid process*; the *style-mastoid ramus*, &c. 2. A *cerebral* or *internal surface* which corresponds to the cavity of the cranium and on which is the *Pars petrosa*, the *hæmus F. lopii*, the *meatus auditorius internus*, the *fenestra of the aquæductus vestibuli*, a portion of the *greater for the lateral sinus*, &c. 3. A circumference on which is observed the orifice of the *bony portion of the Eustachian tube* and the *acquaduct cochleæ*, &c. The temporal bone is articulated with the sphenoid, occipital, parietal, malar, and inferior maxillary bones. It is developed from five points of ossification.

TEMPORAL FOSSA is an excavation, observed at each side of the head. It is filled by the muscle whose name it bears, and is formed by: temporal and sphenoid, below; by the parietal and frontal bones, above; is separated, by transverse crista, from the zygomatic fossa; a completed, before, by the cheek-bone.

TEMPORAL MUSCLE, *Temporalis*, *Crotaphiti* (F.) *Arca-di-temporo maxillaire*, *Temporo-maxillaire* (Ch.), is a broad, flattened, triangular muscle, which fills the temporal fossa. Its fibres are attached to the temporal aponeurosis and *foveæ* and all converge into a strong tendon, which passes under the zygomatic arch, and is inserted into the coronoid process of the lower jaw. The muscle raises the lower jaw, and applies the teeth against each other.

TEMPORAL NERVES. These are distinguished into the *superficial temporal*, furnished by the inferior maxillary branch of the fifth pair, behind the condyle of the jaw; and the *temporales profundi*,—*anterior* and *posterior*,—furnished by the same nerve, at its exit from the cranium. Sömmering has given the name *temporal* to the divisions sent by the facial nerve to the temporal regions.

TEMPORAL VEINS were formerly called *Æti* or *Ætioi Phlebes*, *Aquillæ Venæ*.

TEMPORO-AURICULAIRE, Attollens auris rem.

TEMPORO-FACIAL, *Temporo-facialis*. Belonging to the temple and face.

TEMPORO-FACIAL NERVE, *Nervus temporo-facialis*. A branch of the facial nerve distributed to the face and temple.

TEMPORO-MAXILLAIRE, *Temporo-maxillaris* muscle.

TEMPORO-MAXILLARY, *Temporo-maxillaria*. That which belongs to the temporal bone and lower jaw.

TEMPORO-MAXILLARY ARTICULATION or joint of the lower jaw, is seated between the glenoid cavity and transverse process of the temporal bone on the one hand, and the condyle of the lower jaw on the other. Two thin cartilages cover the surfaces of these bones. The one is common to the transverse process and the portion of the glenoid cavity, anterior to the fissure of Glaser; the other belongs to the condyle. This articulation is furnished with an inter-articular fibro-cartilage, two synovial capsules, and two lateral ligaments:—the one internal, and the other external.

TEMPORO-MAXILLARY NERVES of Bichat are the divisions of the facial nerve, distributed to the temporal and maxillary regions.

TEMPUS, Temple — t. Intercalare, Apyrexia, Intermission.

TEMULENCE, *Temulentia*.

TEMULEN'TIA, *Ebr'etas, Ebrios'itas, Methys'mus, Temulence, Temulency, Inebriation, Intoxication, Drunk'ennes*:—from wine, *Enophlyg'ia, Enophlyx'ia, Vinolen'tia, Vinolence, (F.) Ivesse*. Plater gave this name to delirium; Ettmuller, to an apoplectic condition, depending upon drunkenness; the *Apoplex'ia Temulen'tia* or dead drunkenness. Commonly, *Temulentia* is used synonymously with drunkenness, *Methè*; and is often employed in the description of diseases to indicate a state resembling drunkenness. *Mania e Timulentia* is the same as *Delirium Tremens*.

TENACULA, Bone-nippers — t. Volsella, Forceps (lithotomy).

TENAC'ULUM, from *teneo*, 'I hold.' A kind of fine hook attached to a handle which is thrust through the parietes of a blood vessel to draw it out and enable it to be tied.

TENACULUM, ASSALINI'S. An ingenious instrument, invented by Assalini. It consists of a forceps, or double tenaculum, the points of which are fine, sharp, and bifurcated, so as to be readily received into each other when the instrument is closed on the artery, which it is by a spring. It is of great use when the surgeon has no assistant at hand. The instrument is figured in S. Cooper's "First Lines."

TENAÏLLE INCISIVE, Bone-nippers.

TENASMUS, *Tenesmus*.

TENDON, *Tendo, Pronerva'tio*, from *teno*, 'I stretch.' *Tenos*, a *Sineu*. A fibrous cord, more or less round, long, or flattened; of a white, pearl colour, and composed of very close parallel fibres. The tendons are attached to the bones, by one extremity; by the other, they receive the insertions of the fleshy fibres: sometimes they afford attachment to fleshy fibres at both ends;—as in the digastric muscle. The tendons must be considered as so many cords, for transmitting the motion of muscles to the bones or levers.

TENDON D'ACHILLE, *Achillis tendo*.

TENDON, CORDIFORM, OF THE DIAPHRAGM, *Centre, phrenic*.

TENDONS, TWITCHING OF THE, *Subsultus tendinum*.

TENEOTOMIA, *Tenotomy*.

TÊNESME, *Tenesmus* — t. *de l'Œsophage, Œsophagismus* — t. *Vesical, Bradysuria*.

TENES'MUS, *Teines'mos, Tenas'mus*, from *teno*, 'I stretch.' *Proct'ica Tenesmus, Proctopras'mus, Obstipa'tio Tenesmus, Tinag'mus, (F.) Tenesme, Èpreintes*. Frequent, vain, and painful desires to go to stool;—one of the chief symp-

oms of inflammation of the lining membrane of the digestive tube, as of dysentery.

TÊNESMUS VESICÆ, *Bradysuria* — t. *Vesicæ mucosus, Cystirrhœa*.

TENETTES, Forceps (craniotomy).

TÊNIA, *Tænia*.

TENNESSEE, MINERAL WATERS OF. On the waters of the French Broad River, in this state, is a large, clear, thermal spring. The heat is so great that, on first going into the water, it is almost insupportable.

TENON, *Tendon*.

TENONT'AGRA, from *τενον*, 'tendon,' and *αγρα*, 'seizure.' A variety of gout, which affects the tendinous parts of muscles, or the tendinous ligaments which strengthen certain articulations.

TENONTOTOMIA, *Tenotomy*.

TENONTOTRO'TI, from *τενον*, 'tendon,' and *τροπικος*, 'I wound.' They who are wounded in the tendons. — Galen.

TENOT'OMY, *Tenotom'ia, Teneotom'ia, Tenontom'ia, Sectio seu Dissec'tio ten'dinum*, from *τενον*, 'a tendon,' and *τομή*, 'incision.' The operation of dividing a tendon, often practised for the removal of loxarthrus, or deviation of the joints — as in club-foot.

TENSEUR DE L'APONÉVROSE FÉMORALE, *Fascia lata muscle*.

TEN'SION, *Ten'sio, Tensu'ra, Tasis, Dist'asie, Entonia, (Enton'ia is, also, used for over-tension,) Conten'sio, Disten'sio*, from *tendere*, 'to stretch.' State of a part, which is stretched, when its textures are distended by the afflux of fluids, or the accumulation of gas; or when its fibres are drawn, as it were, in an opposite direction, and are, consequently, more resisting than usual.

TENSOR CHOROIDEÆ, *Ciliary muscle* — t. *Palati, Circumflexus musculus*.

TENSOR TARSII. A small muscle, belonging to the inner commissure of the eyelids, well described by Professor Horner, of Philadelphia, and hence termed *Muscle of Horner*. It is about three lines broad and six long; arises from the posterior flat surface of the os unguis, near its junction with the ethmoid bone, and passes forwards and outwards, lying on the posterior face of the lachrymal ducts. As it approaches the commissure of the lids, it splits into two nearly equal parts, each of which is appropriated to a duct, and inserted along its course, almost to the punctum lacrymale. Its chief office seems to be, to influence the position of the puncta lacrymale, and to regulate the course of the tears through the lachrymal ducts.

TENSOR TYM'PANI, Inter'nus Auris, Internus Mal'lei, (F.) Salpingo-malleus. A small muscle, which arises from the petrous portion of the temporal bone, and the cartilage of the Eustachian tube, and terminates by a tendon, which is reflected over the processus cochleariformis, and is inserted into the apophysis of the handle of the malleus.

TENSOR VAGINÆ FEMORIS, *Fascia lata muscle*.

TENSURA, *Tension*.

TENSUS, *Penis*.

TENT, *Tenta, Turan'da*, and its diminutive, *Turan'dula, Penic'ulus, Penicill'us, Penicill'm, Motas, Lemnis'cus, (F.) Tente, Mèche*, from *tentare*, 'to try or explore.' In surgery, tents are small rolls of lint, of a cylindrical or pyramidal shape, which are introduced into wounds and deep ulcers, to prevent them from closing before they are filled up from the bottom. Tents are sometimes, also, made of prepared sponge, gentian root, &c. They are not so much used as they formerly were.

TENTACULARIA, *Filaria hominis bronchialis*.

TENTACULUM CEREBELLI, Tentorium.

TENTA'MEN MED'ICUM. 'A medical trial.'

An examination in medicine, in the Prussian universities, which is conducted both in writing and *vivâ voce* before the Dean of the Medical Faculty.

TENTE, Tent — *t. du Cervelet*, Tentorium.

TENTIGO VENEREA, Nymphomania — *t. Veretri*, Satyriasis.

TENTIPEL'LUM, from *tendo*, 'I stretch,' and *pellis*, 'the skin.' Ancient name of a cosmetic, with which, it was pretended, wrinkles could be effaced.

TENTOR'IIUM, *T. cerebelli super-extendum*, *T. cerebelli*, *Tentaculum cerebelli*, *Septum transversum* (Ch.), *Transverse septum*, *Septum enceph'ali*, *Interseptum horizontalia Pacchio'ni*, *Processus transversus durae matris*, *Lateral Processes of the Dura Mater*, *Diaphragma cerebri*, (F.) *Tente du cervelet*, *Plancher du Cerveau*, from *tendere*, *tentum*, 'to stretch.' A process of the dura mater, which separates the cerebrum from the cerebellum. It extends from the internal horizontal spine of the occipital bone, directly forwards to the sella Turcica of the sphenoid.

TENTORIUM CEREBELLI, Tentorium.

TENTUM, Penis.

TENTWORT, *Aplenium ruta muraria*.

TENUIS MATER, Pia mater.

TENUITAS AQUOSA, Predominium aquae.

TEPHROSIA VIRGINIANA, Galega Virginiana.

TEPIDARIUM, see Stove.

TEPLITZ, Töplitz.

TERAS, Monster.

TERATOG'ENY, *Teratogen'ia*, from *teras*, *terasos*, 'a monster,' and *genesis*, 'generation.' The formation of monsters.

TERATOL'OGY, *Teratolog'ia*, from *teras*, *terasos*, 'a monster,' and *logos*, 'a discourse.' A description, or the doctrine of monsters.

TERATOSIS, see Monster.

TERCERON, see Mulatto — *t. Black*, see Mulatto.

TEREBELLA, Trepan.

TERÉBENTHINE, *Terobinthina* — *t. de Bordeaux*, see *Pinus sylvestris* — *t. de Ohio*, see *Pistacia terebinthus* — *t. de Copahu*, *Copaiba* — *t. Commune*, see *Pinus sylvestris* — *t. d'Égypte*, see *Amyris opobalsamum* — *t. de Gilead*, see *Amyris opobalsamum* — *t. du Grand Caire*, see *Amyris opobalsamum* — *t. de Judée*, see *Amyris opobalsamum* — *t. de Melèze*, see *Pinus larix*.

TEREBIN'THINA, from *terebinthos*, or *τερεβινθος*, 'the turpentine tree.' *Turpentine*, *Botin*, *Albotin*, *Altilibat*, *Brutino*, (F.) *Térébenthine*. A substance, of the consistence of honey, which flows from many trees of the terebinthaceae and coniferæ families. It is viscid; shining; more or less transparent; inflammable; of a warm, pungent taste; strong smell; and is entirely composed of resin and essential oil, without benzoic acid. It is soluble in alcohol. See *Turpentine*, *Pinus palustris* and *Pinus sylvestris*. All the turpentines are stimulant, diuretic, and cathartic.

TEREBIN'THINA ARGENTORATENSIS, see *Pinus picea* — *t. Balsamea*, see *Pinus balsamea* — *t. Canadensis*, see *Pinus balsamea* — *t. Chia*, see *Pistacia terebinthus* — *t. Communis*, see *Pinus sylvestris* — *t. Cypria*, see *Pistacia terebinthus* — *t. Empyreumatica*, see *Pinus sylvestris* — *t. Laricina*, see *Pinus larix* — *t. Veneta*, see *Pinus larix* — *t. Vera*, see *Pistacia terebinthus* — *t. Vulgaris*, see *Pinus sylvestris* — *t. de Vénise*, see *Pinus larix*.

TEREBIN'THUS, *Terminthus* — *t. Gummifera*, *Bursera gummifera* — *t. Lentiscus*, *Pistacia lentiscus* — *t. Vulgaris*, *Pistacia terebinthus*.

TEREBRA, Trepan.

TEREBRATIO, Trepanning.

TEREDO OSSIIUM, *Caries*, *Spina ventosa*.

TERES, *Stron'gylius*, *Cylindroi'des*, 'long and round.' An epithet given to many organs, the fibres of which are collected into round fasciculi.

TERES LIGAMEN'TUM, (F.) *Ligamentum rossi*. This name is given to the round ligament in the cotyloid cavity of the os innominatum, which is attached to the head of the bone, and to the bottom of the cavity. It is, also, given to a small fibrous fascia, which extends from the coronoid process of the ulna to below the bicipital tubercle of the radius.

TERES MAJOR, (F.) *Anguli-scapulo-humerali*, *Scapulo-humerali* (Ch.), *Grand rond*, is situate at the inferior and posterior part of the shoulder. It is attached, on the one hand, to the outer surface of the scapula; to the corresponding part of its axillary margin; and, on the other, to the posterior margin of the bicipital groove of the humerus. It carries the arm backwards and inwards, and carries it, also, inwards in rotation. When it acts with the longissimus dorsi and pectoralis major, it applies the arm against the lateral part of the chest, and keeps it forcibly there.

TERES MINOR, (F.) *Le plus petit os-scapulo-trochitérien*, (Ch.) *Petit rond*, *Margini-os-scapulo-trochitérien*, *Nonus humeri Placemini*, is situate at the posterior and inferior part of the shoulder; it is narrow and flattened, from above to below, in its inner half; and, from before to behind, in the outer. It is attached, on the one part, to the outer surface of the scapula, near its inferior angle; and, on the other, to the inferior part of the great tuberosity of the humerus. It depresses the arm, and causes it to turn on its axis from within outwards. It also carries it backwards.

TERESIS, Observation.

TERETRIUM, Trepan.

TERETRON, Trepan.

TERGAL, Dorsal.

TERGEMINI, Trigemini.

TERGUM, Dorsum, Vertebral column.

TERMINALIA, see *Myrobalanus*.

TERMINOLOGY, Nomenclature.

TERMIN'THUS, *Terebinthus*, from *τερεβινθος*, 'the turpentine tree.' *Phyma Anthrax*, *Terminthus*, *Berry* or *Fungous carbuncle*. The ancients gave this name to a tumour, surmounted by a black pustule, and resembling the fruit of the turpentine tree.

TERMIN'THUS, *Pistacia terebinthus*.

TERMINUS SUPERIOR ASPERÆ ARTERIÆ, Larynx.

TERMONOLOGY, Nomenclature.

TERMS, Menses.

TERRA ABSORBENS MINERALIS, *Magnesiæ carbonas* — *t. Aluminis*, *Argilla pura* — *t. Amara aërata*, *Magnesiæ carbonas* — *t. Amara sulphurica*, *Magnesiæ sulphas* — *t. Bolaris*, *Argilla pura* — *t. Foliata*, *Sulphur* — *t. Foliata mineralis*, *Sodæ acetata* — *t. Foliata tartari*, *Potassæ acetata* — *t. Fornacum*, see *Bricks* — *t. Fullonica*, *Cimolia purpurescens* — *t. Japonica*, *Catechu*, *Nasches gambir*.

TERRA LEM'NIA, *Argilla bolus flava*, *Lem'nian Earth*, *Lemp'nian*. A name given by the ancients to a solid, reddish, astringent, substance, prepared with the pulp of the fruit of the *Baalab*, an African tree, according to Prosper Alpinus. It seems, however, to be an argillaceous earth. It has been employed as an astringent.

TERRA LIVONICA. A *terra sigilla'ta* or *sealed earth* from Livonia, redder than that from Silesia, and very astringent.

TERRA MERITA, *Curcuma longa.*

TERRA NOCERIA'NA. A whitish, soft, and astringent earth, found in the environs of Nocera, in Italy.

TERRA ORLEA'NA, *Pigmen'tum urucu, Urucu, (F.) Rocou, Roucou, Bichet.* A pigmental matter obtained from the seeds of *Bixa Orleana* seu *Orella'na* seu *America'na, Orella'na, Orlea'na.* In Jamaica, it is recommended in dysentery, and is considered to possess astringent and stomachic qualities. It is called, according to its shape, *Flag, Roll, or Egg Annotto.*

Spanish Annotto, Bixa, is in small, oblong cakes. It is chiefly employed as a colouring matter.

TERRA OS'SEA, Mate'ria ossea. Bony matter. The earthy portion of bones.

TERRA PONDEROSA, Baryta—t. *Ponderosa murata, Baryta, muriate* of—t. *Ponderosa salita, Baryta, muriate* of—t. *Saponaria, Cimolia purpurescens.*

TERRA PORTUGAL'LICA, Barros, Bucaros. A reddish, astringent, styptic earth, obtained from Portugal.

TERRA SIGILLA'TA, Sealed Earth. A bole or earthy matter, made into little cakes or flat masses, and stamped with certain impressions, as with the head of the Grand Seigneur. To these belong the *Terra Silesiaca, Terra Lemnia, T. Turcica.* See *Bolla alba.*

TERRA SILESIACA, see *Terra sigillata*—t. *Talcosa oxyanthracodes, Magnesise carbonas*—t. *Turcica,* see *Terra sigillata.*

TERRA URINÆ. The earthy deposit in the urine.

TERRA VITRIOLI DULCIS, Colcothar.

TERRAPIN, Emys palustris.

TERRE BOLAIRE, Bolus—t. *Noir, Bunium bulbocastanum*—t. *Pesante, Baryta*—t. *Sigillée, Bolus alba.*

TERRETTE, Glecoma hederaceum.

TERTIAN FEVER, Febria tertia'na, An'etus tertianus, Tritic'us, Tertian Ague, (F.) Fièvre tierce. An intermittent, whose paroxysms recur every third day, or every 48 hours. The mildest, and the most pernicious, intermittents belong to this head. As a general rule, it is the most manageable form of ague.

TERTIANARIA, Scutellaria galericulata.

TESSARA, Cuboid.

TESSELLA, Tabella.

TEST, DANIEL'S, see Docimasia pulmonum—t. *Hydrostatic, see Docimasia pulmonum*—t. *Plouquet's, see Docimasia pulmonum*—t. *Static, see Docimasia pulmonum.*

TESTA, see Ostrea.

TESTA PREPARATA, Prepared Oyster-shell. Oyster-shell, freed from extraneous matter, washed with boiling water, reduced to powder, and prepared in the same manner as *Creta præparata.*

TESTA'CEOUS, from testa, 'a shell.' A powder, consisting of burnt shells. These contain carbonate of lime chiefly, and hence the term has been applied to cretaceous substances. See *Oreta.*

TESTÆ FORNACEÆ, Bricks—t. *Ostrea, see Ostrea.*

TESTES. The *Testicles.* Vulgarly, the *Stones.* A name, also, given to the inferior tubercles of the corpora quadrigemina, to distinguish them from the superior, called *Nates.*

TESTES CEREBRI, see Quadrigemina corpora.

TESTICLE, Testis, T. viri'lis, Testic'ulus, Orchis, Pomum am'ris, Did'yimus, Her'nia, Gem'ites (pl.), Gemelli (pl.), Ovum, (F.) Testic'ule, from

testis, 'a witness,' because the testicles are evidences of virility. The name of two glandular organs, contained in the scrotum, whose office is to secrete sperm. The substance of the testicle consists of numerous conical, flattened lobules—*lob'uli testis*—whose bases are directed towards the surface of the organ, and the apices towards the corpus Highmorianum. They are formed of a gray and softish substance, composed of tortuous canals, called *Tu'buli seminif'eri* vel *Vasa semina'lia,* folded on each other, and of extreme fineness; the number of which, according to the estimate of Monro, is 62,500, and the total length 5,208 feet. All these canals, uniting in their course, pass through the corpus Highmorianum, concur in forming the epididymis, and give origin to the vas deferens. The testicles are covered, immediately, by a fibrous membrane, of an opaque white colour, and very tough, called *Tu'nica Albugin'ea,* or, simply, *Albugin'ea, Perites'tis,* of which the corpus Highmorianum is only an enlargement. Over this, again, is the tunica vaginalis, the second envelope of the testis.

TESTICLE, SWELLED, Hernia humoralis.

TESTICONDUS, Cryptorchis.

TESTICULE, Testicle.

TESTICULUS, Testicle—t. *Accessorius, Epididymis*—t. *Caninus, Orchis mascula.*

TESTIMONIUM MATURITATIS. 'Evidence of fitness.' A certificate of complete education, required, in the Prussian universities, of a candidate, before he can be admitted to examination for the degree of Doctor of Medicine.

TESTIS FEMINEUS, Ovary—t. *Irritable, Orchidalgia*—t. *Minor, Prostate*—t. *Muliebris, Ovary*—t. *Virilis, Testic'ulo.*

TESTUDINATIO CRANII, Camarosis.

TESTUDO, Chelo'sū, (F.) Tortue. A genus of reptiles, including the turtle, the flesh of which is much esteemed as an article of diet.

Also, an encysted tumour, which has been supposed to resemble the shell of a turtle; *Emphy'ma encyst'is gang'lion.* See *Talpa.*

TESTUDO CEREBRI, Fornix—t. *Scapulæ, see Scapula.*

TETANIC, Tetan'icum, Spas'ticum, Convulsivum, Convul'sive, from *τενω, 'I stretch.'* A remedy, which acts on the nerves, and, through them, on the muscles, occasioning, in large doses, convulsions. The chief agents of this class are *Nux Vomica, Strychnia, Brucia, Arnica, and Toxicodendron.*

Also, an epithet for a tonic convulsion.

TETANOMATA, Tetanothra.

TETANO'THRA, Tetan'om'ata, Erugato'ria, from *τενω, 'free from wrinkles.'* Medicines which remove wrinkles.—*Gorreaus.*

TÉTANOS, Tetanus.

TETANUS, from τενω, 'I stretch.' *Spasm with rigidity, Convul'sio In'dica, Holoton'ia, Holoton'icus, Holotel'anus, Tet'anus univ'ersalis, Rigor nerv'osus* seu *nerco'rum, Extensio* seu *Distensio, Enta'sia tetanus, Cat'ochus cervinus, Cat'ochus holoton'icus, (F.) Tétanos.* A disease which consists in a permanent contraction of all the muscles or merely of some, without alternations of relaxation. It is characterized by closure of the jaws; difficulty or impracticability of deglutition; rigidity and immobility of the limbs and trunk, which is sometimes curved forwards (*Emprosthot'omos*), sometimes backwards (*Opiosthot'onos*), and sometimes to one side (*Pleurosthot'onos*). When tetanus is confined to the muscles of the jaws, it is called *Triemus.* It is a most formidable affection. The means of treatment are:—copious and repeated blood-letting; bathing, cold and warm; powerful doses of opium,

and other narcotics. In *Traumatic Tetanus*, or that which supervenes on a wound, every extraneous matter must, of course, be removed from the wound, and soothing applications be made to it.

TETANUS ANTICUS, Emprosthotonos — t. Dolorificus, Cramp — t. Dorsalis, Opisthotonos — t. Lateralis, Pleurothotonos — t. Maxilla inferioris, Trismus — t. Posterganeus, Opisthotonos — t. Posticus, Opisthotonos — t. Universalis, see Tetanus.

TETARTÆUS, Quartan.

TETARTOPHIA, from *τετάρτος*, 'the fourth,' and *φωσ*, 'I arise.' *Quarta'nus remittens*. A quartan, in which the intermission is inordinately short or imperfect.

TÊTE, Caput, Head — t. *de Veau*, Elephantiasis of the Greeks.

TETRADRACHMON, from *τετράς*, 'four,' and *δραχμή*, 'a drachm.' A weight of four drachms or half an ounce.

TETRAGONUS, *Platysma myoides*.

TETRAHIT LONGIFLORUM, *Galeopsis grandiflora*.

TETRAMYRON, from *τετράς*, 'four,' and *μυρον*, 'an ointment.' An ointment of four ingredients. — Galen.

TETRANGURIA, *Cucurbita citrullus*.

TETRANTHÆRA PICHURIM, *Faba Pichurim*, *F. Pechu'ri*. The seeds of this Brazilian plant have been used in diarrhoea, dysentery, flatulent colic, &c. Dose, ℞ij.

TETRA'O COTURNIX, *Coturnix*, the Quail, (F.) *Caille*. The quail is an esteemed article of diet. The Greek name is *ορνις*; and the species, called *Ortygia*, are named after it. The excrements of the quail were formerly extolled in epilepsy, and the fat in specks of the eye.

TETRAPHAR'MACUM, from *τετράς*, 'four,' and *φάρμακον*, 'a medicine.' A medicine consisting of four ingredients.

TETRAS'CELUS, from *τετράς*, 'four,' and *κελεός*, 'leg.' A monster having four legs. — Gurlt.

TETROBOLON. The weight of four oboli, or two scruples. — Gorrus.

TETROSOS, *Astragalus*.

TETTER, Herpes — t. Crusted, Impetigo — t. Honeycomb, Porrigo favosa — t. Humid, Eczema impetigo — t. Milky, Porrigo larvalis — t. Pustular, Impetigo — t. Running, Impetigo — t. Scaly, Psoriasis.

TETTERWORT, *Chelidonium majus*.

TEUCRIUM ÆGYPTIACUM, T. capitatum — t. Bellium, T. capitatum.

TEUCRIUM CAPITA'TUM, *Poley Mountain of Montpellier*, *T. Bellium* seu *Ægyptiacum*, *Po'lium Capita'tum*, is, generally, substituted for the last. The common *Poley Mountain* is the *Teucrium montanum*; and the *Golden Poley Mountain*, the *Teucrium Po'lium*, *Po'lium*.

TEUCRIUM CHAMÆDRYS, *T. officinale*, *Chamædris*, *C. minor repens*, *C. vulgaris*, *Quer'cula minor* seu *Calamandri'na*, *Trisa'go*, *Chamæ'drops*, *Triza'go*, *Common German'der*, *Creeping German'der*, *Small German'der*, *English Treacle*, (F.) *Petit chène*, *Germandrée officinale*. Family, Labiatae. Ser. Syst. Didymia Gymnosperma. This is possessed of aromatic and bitter properties. The dose of the dried powder is from ℞ss to ℞j.

TEUCRIUM CHAMÆPITYS, *Chamæpitys*, *Arthetica*, *Arthetica*, *Aju'ga*, *A. Chamæpitys*, *Bu'gula Chamæ'pitys*, *Abiga*, *Chamæno'rus*, *Ica arthritica*, *Holoc'yon*, *Io'nia*, *Siderit'is*, *Common Ground-pine*, (F.) *Petite Ivette*. Properties like the last. The tops or leaves have been recommended as

aperients and tonics; especially in female obstructions, and in paralytic disorders.

TEUCRIUM CRETICUM, *T. hyssopifolium* seu *Rosmarinifolium*, *Rosmarinus sta'chadis facie*, *Poley-mountain of Candy*, *Po'lium Creticum*. The tops and whole herb enter into the old compounds, *Mithridate* and *Theriaca*. It has a moderately aromatic smell; and a nauseous, bitter taste, and is placed among the aperients and corroborants.

TEUCRIUM FLAVUM has similar properties to T. chamædris.

TEUCRIUM HYSSOPIFOLIUM, T. Creticum.

TEUCRIUM IVA, *Chamæpitys moscha'ta*, *Ica moscha'ta* *Montpelien'sium*, *Ica*, *Chamæpitys anthy'llus*, *French Ground-pine*, (F.) *Ivette musquée*. It has similar virtues to T. Chamæpitys, but is weaker.

TEUCRIUM MARITIMUM, T. Marum.

TEUCRIUM MARUM, *T. maritimum*, *Marum Syriacum*, *Marum Creticum*, *Majora'na Syriaca*, *Marum verum*, *M. Cortu'si*, *Chamæ'drys inca'na* *maritima* seu *marum*, *Marum german'der*, *Syria herb mastick*, *Cat thyme*, *Origanum Syriacum*, (F.) *Marum* ou *Germandrée maritime*, *Herbe aux chats*. A very aromatic plant, of a camphorated smell; formerly much used in medicine as a tonic, antispasmodic, emmenagogue, &c.

TEUCRIUM OFFICINALE, T. chamædris — t. Palustre, T. scordium — t. Pyramidale, *Ajuga* — t. *Rosmarinifolium*, T. Creticum.

TEUCRIUM SCORDIUM, *T. palustre*, *Water German'der*, *Scordium*, *Trisa'go palust'ris*, *Chamæ'drys palustris* seu *scordium*, *Allium red'olens*, (F.) *Germandrée Scordone*, *Sauge des bois*, *Germandrée aquatique*. The leaves have a garlicky smell, and bitterish, slightly pungent taste. It has the tonic properties of the other Teucris.

TEXTUM INTERLOBULARE, Interlobular tissue.

TEXTURA, Texture — t. Organica, Histos.

TEXTURAL. Same etymon as Texture. Relating or appertaining to a texture.

TEXTURE, *Textu'ra*, *Textus*, from *texere*, *texum*, 'to weave.' *Tela*, *Hyp'ha*, *Hyp'hè*. The particular arrangement of the tissues that constitute an organ.

TEXTUS, Texture, Tissue — t. Cellulosus, Cellular tissue — t. Desmosus, Desmod tissue — t. Nervorum, Plexus nervorum — t. Organica, Cellular tissue — t. Papillaris, Corpus papillare — t. Parenchymalis, Cellular tissue.

THÆRIA, Radsyge.

THAL'AMUS, *Salauss*, (F.) *Couche*. 'A room or chamber; a bed.' The place at which a nerve originates, or has been considered to originate.

THALAMI NERVORUM OPTICORUM seu OR'ITIC, *Eminentia magna cerebri*, *Ganglia cerebri postica*, *Crura medull'æ oblongat'æ* (of some), *Stri'ata corpora super'na posterior'a*, *Collie'uli nervorum optico'rum*, *Optic thalami*, *Posterior cerebral ganglion*, (F.) *Couches des nerfs oculaires*, (Ch.) *Couches des nerfs optiques*, *Couches optiques*. Two rounded and irregular surfaces, which are seen exposed in the lateral ventricles of the brain, and in the third ventricle, the inferior surface of which presents two projections, called *Corpora genicula'ta*, that furnish several filaments to the optic nerves. The name was given from a belief that the optic nerves originate from them. They, however, arise more posteriorly, and adhere merely to the inner margin of those bodies. Gall considers, that the thalami act as ganglions to the nerves; and, hence, he calls them *Grand ganglion cerebral inférieure*. They are, also, called *Posterior ganglion of the cerebrum*. From the thalami and corpora striata fibres proceed upwards to constitute the convolutions of the brain, and the

various bands that connect the different parts of the brain together. The upper and inner parts of the thalami are so closely connected as to form one continued surface, called *Commissura mollis*. The posterior parts turn downwards and outwards; after which they are elongated to form the two white cords, termed *Tractus optici*.

THALAMUS REGALIS, Pericardium.

THALICTRON, *Thalictrum*, *T. magnum*, seu *flacum* seu *flaves'cens* seu *pratens'e* seu *nigricans* seu *rugosum* seu *cagina'tum*, *Meadow-rue*, *Poor Man's Rhubarb*, *Rhabar'barum pauperum*, (F.) *Pigamon jaunâtre*, *Rus des prés*, *Fausse-Rhubarbe*, *Rhubarbe des pauvres*. Family, Ranunculaceæ. *Sex. Syst.* Polyandria Polygynia. The root resembles rhubarb in its properties.

THALICTRUM ANEMONI'DES, *Meadow Rue*, *Rue-leaved Anem'ony*; an indigenous plant, flowering in April and May.

THAMARINDUS, Tamarindus.

THANASIMUS, Mortal.

THANATODES, Mortal.

THANATOID, *Thanatoides*; from *thanas*, 'death,' and *oides*, 'resemblance.' Resembling death. Apparently dead.

THANATOL'OGY, *Thanatolog'ia*, *Thnescolog'ia*, from *thanas*, 'death,' and *logos*, 'a discourse.' A description, or the doctrine, of death.

THANATOS, Death.

THAP'SIA, from the island Thapsus. The *deadly carrot*, *Thapsia ascle'pias*. Family, Umbelliferae. *Sex. Syst.* Pentandria Digynia. The root operates violently, both upwards and downwards. It is not used.

THAPSUS BARBATUS, *Verbascum nigrum*.

THARSI, see Tarsus.

THASPIUM ATROPURPUREUM, *Th. cordatum*, *Round heart*. The flowers, which appear in June, are of a dark purple.

THASPIUM BARBATO'DE, *Meadow Parenep*. An indigenous plant, of the Northern and Western States,—Order, Umbelliferae,—which flowers in June. Flowers, yellow.

Both plants have been esteemed vulnerary, antisyphilitic, and diaphoretic; and as antidotes to the bite of a rattlesnake.

THASPIUM CORDATUM, *Th. atropurpureum*.

THÉ, *Thea*—*t. des Apalaches*, *Ilex vomitoria*—*t. de France*, *Salvia*—*t. d'Europe*, *Salvia veronica*—*t. de la Mer du sud*, *Ilex vomitoria*—*t. du Mexique*, *Chenopodium ambrosioides*—*t. de Simon Pauli*, *Myrica gale*—*t. Suisse*, *Falltranck*.

THEA, *Chaa*, *Tea*, (F.) *Thé*. There are two principal species of tea-plant; the *Thea Bohe'a*, and *Thea vir'idis*; the *black tea*, and the *green*. Family, Hesperidæ. *Sex. Syst.* Polyandria Monogynia. In commerce, many kinds of tea are met with. Several of the differences between these appear to result from the age at which the leaves have been collected, and the mode of their desiccation.

Tea-drinking was introduced into Europe about the year 1666; since which time its use has become almost universal; and, in spite of the assertions of medical terrorists, it is, except in particular idiosyncrasies, entirely harmless.

By an analogical transference, very common in language, the word *Tea* has been used almost synonymously with infusion, as *Beef tea*, *Mint tea*, &c.

THEA GERMANICA, *Veronica*.

THEBES'US, VEINS OF. A name given to supposititious branches of the coronary veins, which Christopher Adam Thebesius, a German anatomist, described as opening into the heart by small depressions observable in the right auricle; and which have been called *Foram'ina*

Thebes'ia. No such veins can be demonstrated. The valve, at the orifice of the coronary vein, in the right ventricle, is called *Valvula Thebes'ia*, *V. Guiffartia'na*, *V. vena magna*.

THECA, Case, Vagina, Sheath—*t. Cerebri*, Cranium—*t. Cordis*, Pericardium—*t. Vertebralis*, see Vertebral canal.

THEION, Sulphur.

THEIOPEGÆ, Water, mineral (sulphureous.)

THEIOTHERMÆ, Waters, mineral, sulphureous.

THELASIS, Lactation.

THELASMUS, Lactation.

THELASTRIA, Nurse.

THELE, Nipple, Papilla.

THELITIS, from *θηλη*, 'the female nipple,' 'the female breast,' and *itis*, denoting inflammation. Inflammation of the nipple.

THELON'CUS, Mastoecus.

THELOS, Mamma.

THELYGON'IA, from *θηλη*, 'pertaining to the female sex,' and *γεννη*, 'generation.' The part taken by the female in the act of generation. Also, nymphomania.

THELYGONUM, Sperm (of the female.)

THELYPTERIS, Pteris aquilina.

THENAD, Thenal.

THENAL, *Thenar*; same stymon as *thenar*. Relating or appertaining to the thenar.

THENAL ASPECT. An aspect towards the side on which the thenar is situated.—Barclay. *Thenad* is used, adverbially, by the same writer, to signify 'towards the thenal aspect.'

THENAR, *Scrap*, from *τενω*, 'I strike.' The palm of the hand, or sole of the foot.

THENAR, Flexor brevis pollicis manus, Palm.

THENAR or THENAL EM'INENCE is the projection at the anterior and outer part of the hand, formed by the abductor brevis, opponens, and flexor brevis pollicis.

THENAR or THENAL MUSCLE. Riolan and Winslow give this name to the fleshy mass, formed of the abductor brevis, opponens pollicis, and the anterior part of the flexor brevis pollicis. In the foot, Winslow gives the name *Thenal muscle* to the abductor and flexor brevis pollicis pedis.

THEOBROMA CACAO, Cacao.

THEOMANIA, Demonomania.

THEOPLÉGIA, Apoplexy.

THEOPLÉXIA, Apoplexy.

THEORETICAL, *Theoret'icus*, *Theo'ricus*, from *θεωρω*, 'I contemplate.' (F.) *Théorique*, *Théorique*. That which is confined to theory, or is connected with it. An epithet also applied to a sect of physicians, who founded their doctrine chiefly on reasoning.

THEORIA, Theory.

THÉORIQUE, Theoretical.

THE'ORY, *Theo'ria*, from *θεωρω*, 'I contemplate.' The speculative part of a science. The connexion established in the mind between a general fact, or the least possible number of general facts, and all the particular facts dependent thereon: for example, the motions of the heavenly bodies, and the most important natural phenomena are connected with a single fact, previously known by observation; viz. that the force of gravity acts inversely according to the square of the distance. This constitutes the theory of universal gravitation. *Theory* must not be confounded with *system*. Theory regards nature as it is, and is a rigid deduction from facts. *System* is too often the creature of the imagination, to which nature is made to bend.

THEORY OF MEDICINE, *Institutes of Medicine*, *Theoretical Medicine*, is that part of the science

which attempts philosophically to account for the various phenomena that present themselves during health as well as in disease. It is the philosophy of Medicine. The *Institutes of Medicine* are generally considered to comprise Physiology and its applications to Pathology, Hygiene, and Therapeutics. By some, it is considered to include General Pathology and General Therapeutics.

THEIOTHERMÆ, Waters, mineral, sulphureous.

THERAPEIA, Curation, Therapeutics.

THERAPEUSIS, Therapeutics.

THERAPEUTA, Therapeutist.

THERAPEUTICE, Therapeutics.

THERAPEUTICS, *Therapeutikē, Therapeutia, Therapēsis, Iatrotechnicē, Practice of Physic, Therapeia, Therapi'a, Curatoria Methodus, Methodus Medendi*, from *θεραπεύω*, 'I wait upon, I alleviate, I attend upon the sick.' (F.) *Thérapeutique*. That part of medicine, the object of which is the treatment of disease. With others, the department which comprises an explanation of the *modus operandi* of medicines.

THÉRAPEUTIQUE, Therapeutics.

THERAPEUTIST, *Therapeutita*. Same etymon. One who practises therapeutics. A practitioner of medicine. To be a good therapeutist, a man must be well versed in every department of medicine, and be capable of observing and reasoning well. He may be a good *observer*, and yet a bad *reasoner*. He cannot practise well unless he is both. Hence, the comparatively small number of good therapeutists.

THERAPIA, Therapeutics.

THERIA, Radyge.

THERIAC, Theriaca — t. of Antipater, Antipatri theriaca.

THERIACA, *Θηριακά, The'riac*, from *θηρ*, 'a ferocious or venomous animal,' and *αἰσθαίω*, 'I cure.' Treacle. (F.) *Thériaque*. A medicine, believed to be capable of curing or preventing the effects of the bite of a venomous animal. In this sense it is chiefly used by writers. *Theriac* and *Theriacal* have been used adjectively for medicinal.

THERIACA ANDROM'ACHI, *Venice Treacle*, is an ancient alexipharmic electuary; consisting of a farrago of 61 different ingredients, which possessed the most opposite properties. It was invented by Andromachus of Crete, and prepared by order of Nero. It has received various modifications; and, to the discredit of the *Faculté de Médecine* of Paris, has held its place in their Codex, with even an additional number of ingredients. The *Electuarium Opia'tum polypharmacum* of the Codex has contained acid ingredients, 5; astringent, 5; bitter, 22; indigenous aromatics, 10; umbelliferous aromatics, 7; balsams and resinous substances, 8; fetid ingredients, 6; narcotics, 1; earthy substances, 1; gummy or amy-laceous, 4; saccharine, 3; total 72! and one of these the *flesh of the viper!* A little more than a grain of opium is contained in each drachm of the compound.

THERIACA CELESTIS, Tinctura opii — t. Communis, Melasses — t. Edinensis, Confectio opii.

THERIACA GERMANO'RUM. An extract or rob, prepared from juniper berries. Used as a stomachic.

THERIACA LONDINEN'SIS, *Cataplasma Cymi'ni*. A cataplasm of cumin seed, bay berries, german-dar, snakeroot, cloves, honey, and sometimes opium, or syrup of poppies.

THERIACA RUSTICORUM, Allium.

THÉRIAQUE, Theriaca.

THERIAKI. In Turkey, opium-eaters, or they

who indulge largely in the use of opium, are so called.

THERIATRICA, Veterinary art.

THERIODES, Ferine.

THERIO'MA, *Therion*, from *θηρ*, 'a venomous animal.' Any extremely malignant ulcer. Sometimes confined to ulcers of the lungs.

THERION, Therioma.

THERIOTOMY, Zootomy.

THERMA, Heat — t. Emphytum, Animal heat.

THERMÆ, *Θέρμαι, Ther'mata*. Warm baths or springs. See Waters (mineral.)

THERMÆ FABARIÆ, Pfeffers Mineral Water of — t. Piperinæ, Pfeffers, Mineral Waters of — Plumbariæ, Plombières, Mineral Waters of.

THERMAL, *Therma'tis*; from *θηρ*, 'heat' and *μα*, 'hot, warm.' Relating or appertaining to *θερμα* Hot, warm. As 'a thermal mineral water.'

THERMANTICA, Calefacients.

THERMASMA, Fomentation.

THERMATA, Thermæ.

THERMUM EMPHYTUM, Animal heat, Biolychnium.

THESIS, *θεσις*, from *τίθημι*, 'to place.' A position or proposition. *Disputa'tio, Inaugural Disserta'tion*. The name usually given to the essay composed by a candidate for graduation in medicine, which he is at times required to defend publicly. Often, however, it is a mere form, giving useless labour and trouble to the student, inasmuch as it is executed as a task, and never afterwards regarded by the preceptor or by others. Sandifort, Haller, Smellie, and Stoll, have published collections of these.

Also, a suffix denoting 'arrangement;' hence *Diatheesis*.

THEVE'TIA A'HOUI, *Ahouai*. The kernels of the nut of this Brazilian tree are said to be a violent poison. At the Antilles, its nuts are called *Noix de Serpent*; and they are used against the bites of serpents.

THIGH, Sax. *geoh. Femur, Femur, Crur. Nervus, Merium*, (F.) *Cuisse*. The part of the lower limb which extends from the pelvis to the knee. The thigh is larger at its superior than inferior part, and has the form of an inverted and truncated cone, slightly depressed from within outwards. Above, it is bounded, anteriorly, by the groin; externally, by the hip; behind, by the fold of the nates; and within, by the perineal region. Below, it is bounded, anteriorly, by the prominence of the knee; posteriorly, by the ham. It is formed of a considerable number of muscles, blood-vessels, lymphatics, nerves, &c.; and is covered by a strong aponeurosis.

THIGHBONE, Femur — t. Neck of the, Collum femoris.

THION, Sulphur.

THIRST, Sax. *þyrst*, (D.) Dorst, *Sitit*.

Dipsa, *Potio'nis desiderium*, (F.) *Soif*. A simple desire or an absolute want for liquids. Physiologists are not entirely agreed regarding the seat of thirst; some place it in the fauces; others in the stomach. Its immediate cause is not known. It has been attributed to a dry condition of the nervous papillæ of the pharynx, produced by suppression of the salivary and mucous secretions. This is probably true; but, again, it is owing to the wants of the system, — a supply of fluid being required to compensate the numerous losses that are constantly taking place. Thirst is an internal sensation, — an instinctive want — arising from organization, and inexplicable. It is an urgent symptom in many diseases, particularly in those of vascular excitement.

THIRST, EXCESSIVE, Polydipsia — t. *Morbida, Dipsonia*.

THIRSTY, Dipsodes.

THISTLE, BLESSED, *Contaurea benedicta* — t. Globe, Echinops — t. Holy, *Centauria benedicta* — t. Ladies', *Carduus Marianus* — t. Milk, common, *Carduus Marianus* — t. Pine, *Attractylus gummifera* — t. Sow, *Sonchus oleraceus* — t. Star, *Centauria calcitrapa* — t. Yellow, *Argemone Mexicana*.

THLADIAS, Eunuch

THLASIAS, Eunuch.

THLASIS, Contusion — t. Depressio, Depression.

THLASMA, Contusion — t. Concussio, Concussion — t. Stemma, Sprain.

THLASPI, *Pennyces*. Family, Crucifere. *Sec. Syst.* Tetradynamia Siliculosa. Two species of thlaspi are directed, in some pharmacopœias, for medical use:—the *Thlaspi arvense* or *Treacle mustard*, and the *Thlaspi campestris* seu *hiruntium* seu *vulgatum*, *Lepidium campestris*, *Lepidium campestris*, *Iberis campestris*, *Mithridate mustard*. The pharmaceutical properties of both kinds resemble those of common mustard.

THLASPI BURSA, *Th. bursa*, *Capella bursa pastoris*, *Iberis bursa pastoris*, *Nasturtium bursa pastoris*, *Rodochia bursa pastoris*, *Bursa pastoris*, (F.) *Bourse à berger*, *Bourse à pasteur*, *Talbourret*, *Shepherd's purse*. A common European plant, introduced into this country. It is slightly astringent, but is little used.

THLASPI BURSATUM, *Thlaspi bursa* — th. *Nasturtium*, *Lepidium sativum* — th. *Sativum*, *Lepidium sativum*.

THLIBIAS, Eunuch.

THLIPSENCEPH'ALUS, from $\theta\lambda\psi\iota\varsigma$, 'compression,' and $\epsilon\kappa\epsilon\phi\alpha\lambda\omicron\varsigma$, 'the encephalon.' A monster in whom the skull is open, not merely in the frontal and parietal, but also in the occipital regions — a distinct fontanelle not existing.

THLIP'SIS, $\theta\lambda\psi\iota\varsigma$, *Compressio*. Compression, and especially constriction of vessels by an external cause. Oppression.

THNESCOLOGIA, Thanatology.

THOLUS, Achiculum — t. Diocleus, Scapha.

THOMPSONIAN. One who practises or believes in Thompsonianism.

THOMPSONIANISM, *Thompsonism*. A fanciful doctrine, of which a person of the name of Thompson, of New York, is the founder. One of its leading principles is, that the human body is composed of four elements (?), earth, air, fire and water; and one of its apothegms, — that metals and minerals are in the earth, and, being extracted from the depths of the earth, have a tendency to carry all down into the earth who use them; that the tendency of all vegetables is to spring up from the earth, and therefore to uphold mankind from the grave.

The Thompsonians are Botanic Physicians.

THORACENTE'SIS, *Paracente'sis Thora'cia*, from $\theta\omega\rho\alpha\zeta$, 'the thorax,' and $\kappa\epsilon\tau\eta\nu\alpha\iota\varsigma$, 'perforation.' Tapping the thorax. Perforation of the thorax.

THORACHIQUE, Thoracic.

THORAC'IC, *Thora'cius*, from *thorax*, 'the chest;' (F.) *Thoracique* ou *Thorachique*. That what relates or belongs to the chest; as *Thora'cia cis'cera*, &c.

THORACIC INFERIOR ARTERY, *Arte'ria Thora'cia Ester'na Infer'ior* vel *Longa*, *A. mamma'ria externa*, *A. Thora'cia inferior*, (F.) *Deuxième des Thoraciques* (Ch.), arises from the axillary, a little below the preceding, and descends vertically over the lateral part of the thorax, and the serratus major anticus. It afterwards bends inwards; becomes subcutaneous, and divides into several branches, which embrace the breast. It gives numerous ramifications to the pectoralis

major, serratus anticus, intercostals, ganglions of the axilla, mamma, &c.

THORACIC SUPERIOR ARTERY, *Arte'ria Thora'cia Ester'na Superior*, (F.) *Artère thoracique supérieure*, *Première des Thoraciques* (Ch.), arises from the axillary artery or from the acromial; and descends forwards between the pectoralis major and P. minor, to which it distributes itself by a great number of branches. In some subjects, there are two or three *Arteria' thora'ciae externæ superiores*.

THORACIC DUCT, *Ductus thora'cius* seu *chyli'fer* seu *chyli* seu *lacteus* seu *ro'rifera* seu *Pecqueti* seu *Pecquetiana*, *Vena alba thora'cia*, *Alveus ampull'ecus*, *Distributo'ria lactea thora'cia*, *Ductus thora'cius poste'rior* seu *vertebra'lis*, *Galax'ia*, *Duct of Pecquet*, *Alimentary Duct*, (F.) *Canal ou Conduit Thoracique*, is the duct in which the lymphatics of the lower limbs, abdomen, left superior extremity, left side of the head, neck, and thorax terminate. It begins at the *receptaculum chyli*, which is formed by the union of five or six large lymphatic trunks, — themselves formed from the union of all the absorbent plexuses of the abdomen. The duct ascends into the chest through the pillars of the diaphragm, and by the side of the aorta and vena azygos. It contracts in dimension, as far as the 6th dorsal vertebra, when it inclines towards the left hand; ascends behind the arch of the aorta; passes behind the left internal jugular vein, and opens at the posterior part of the subclavian vein of the same side. Its embouchure is furnished with two valves, which prevent the blood from passing from the vein into the duct.

THORACIC LIMBS are the upper limbs; so called because they are articulated with the lateral and upper parts of the chest.

THORACIC, LONG or INFERIOR, MAMMARY inferior external artery.

THORACIC NERVES. The *short* or *anterior thoracic nerves* are two in number. They arise from the brachial plexus, and divide into an anterior and a posterior branch: — the former distributed to the pectoralis major muscle; the latter uniting with a branch of the other to form a loop, from which numerous branches are given off to the pectoralis major and p. minor.

The *long thorac'ic nerve*, *Poste'rior thora'ic*, *External respiratory* of Sir Charles Bell, is a long branch, which arises from the fourth and fifth cervical nerves, immediately after their escape from the intervertebral foramina, and passes downwards to be distributed upon the serratus magnus muscle.

THORACIC REGIONS are the different regions of the chest. Thus we say, *anterior*, *lateral*, and *superior thoracic*, &c.

THORACICA, Pectorals.

THORACICS, FIRST OF THE, Mammary superior external artery.

THORACIQUE, Thoracic.

THORACOCENTE'SIS, from $\theta\omega\rho\alpha\zeta$, 'the chest,' and $\kappa\epsilon\tau\eta\nu\alpha\iota\varsigma$, 'puncture.' *Paracente'sis thora'cia*. Puncture of the chest to evacuate contained fluid — as in empyema.

THORACOCYSTIS, Thoracystis.

THORACO-GASTRODIDYMUS, *Did'yimus sym'pho-thoracogus'trius*, *Xyphodid'ymus*: from $\theta\omega\rho\alpha\zeta$, 'the chest,' $\gamma\alpha\sigma\tau\rho$, 'the belly,' and $\delta\acute{\iota}\delta\upsilon\mu\omicron\varsigma$, 'a twin.' A monstrosity in which twins are united by the chest and abdomen. — Gurlt.

THORACO-FACIAL, *Platysma myoides* — t. *Maxillo-facial*, *Platysma myoides*.

THORACODIDYMUS, from $\theta\omega\rho\alpha\zeta$, 'the chest,' and $\delta\acute{\iota}\delta\upsilon\mu\omicron\varsigma$, 'a twin.' A monstrosity in which twins are united by the thorax. — Gurlt.

THORACODYNE, Pleurodynia.
THORACOPATHIA, from *θώραξ*, 'the chest,' and *πάθος*, 'disease.' Disease or suffering in the chest.

THORACOSCOPIA, see Auscultation.

THORACOSCOPIUM, Stethoscope.

THORACYST'IS, *Thoracocystis*, from *θώραξ*, 'the chest,' and *κύστις*, 'a bladder.' Encysted dropsy of the chest. Hydatids in the chest.

THORAX, *θώραξ*, 'a cuirass, a coat of mail.' *Cith'arus*, *Venter mē'dius*, *Pectus*, *Stethus*, *Scutum pect'oris*, the *Breast*, the *Chest*, *Bir*, *Chelys*, *Casca*, (F.) *Poirine*. One of the splanchnic cavities; bounded, posteriorly, by the vertebrae; laterally, by the ribs and scapula; anteriorly, by the sternum; above, by the clavicle; and below, by the diaphragm. It is destined to lodge and protect the chief organs of respiration and circulation—the lungs and the heart.

THORAX, Corset.

THORE, Sperm.

THORN APPLE, *Datura stramonium*—t. Red, *Datura Sanguinea*.

THOROUGHSTEM, *Eupatorium perfoliatum*.

THOROUGHWAX, *Eupatorium perfoliatum*.

THOROUGHWORT, *Eupatorium perfoliatum*.

THOROW-WAX, *Bupleurum rotundifolium*.

THORULUS STRAMINEUS, *Fanon*.

THREADWORM, *Dracunculus*—t. Long, *Trichocephalus*.

THREPSIS, Assimilation, Nutrition.

THREPSOL'OGY, *Threpsolog'ia*, from *θρεψις*, 'nutrition,' and *λόγος*, 'a description.' The doctrine of, or a treatise on, the nutrition of organized bodies.

THREPTICE, Assimilation.

THRIDACE, *Lactucarium*.

THRIDAX, Lettuce.

THRIFT, *LAVENDER*, *Statice limonium*—t. American, *Statice Caroliniana*—t. Sea-side, *Statice Caroliniana*.

THRIX, Capillus, Hair.

THROAT, *στόμα*, *ὄνομα*, *Jugulum*, *Interstit'ium Jugula're*, *Guttur*, *Sphage*. The anterior part of the neck. (F.) *Gorge*. Also, the *Fauces*, (F.) *Gonier*.

THROATROOT, *Geum Virginianum*, *Liatris*.

THROATWORT, *Campanula trachelium*.

THROBBING, *Pulsant'iva*, *Sphygm'icua*, *Sphygm'odes*, *Pul'satory*. *A throbbing pain*, (F.) *Douleur pulsative*, is a kind of pain which is, or seems to be, augmented by the pulsation of arteries.

THROE, Agony, Pains, labour.

THROMBI LACTEI, *Infarctus mammae lacteus*.

THROMBOCYS'TIS, from *θρομβος*, 'a clot,' and *κύστις*, 'a cyst.' The cyst occasionally surrounding a clot of blood—as in encephalic hemorrhage.

THROMBOSIS, Coagulation, Thrombus.

THROMBUS, *θρομβος*, 'a clot,' from *τρεφειν*, 'to coagulate;' *Thrombo'sis*, *Trumbus*, *Hæmato'ma*. A small, hard, round, bluish tumour; formed by an effusion of blood in the vicinity of a vein which has been opened in the operation of blood-letting. The thrombus is most commonly owing to the opening in the vein and that of the skin not corresponding; to excessive smallness of the cutaneous orifice; or to small, fatty granules, which prevent the discharge of the blood. Compresses, dipped in salt water; camphorated spirit, and slight compression, usually disperse it. See *Blood*.

THROMBUS NEONATORUM, *Cephalæmatoma*.

THROTTLE, *Trachea*.

THROW, Agony, Pains, labour.

THROWORT, *Leonurus cardiaca*.

THRUSH, *Aphthæ*—t. Milk, *Aphthæ*—t. White, *Aphthæ*.

THRYPSIS, Commination.

THUJA OCCIDENTALIS, *Thuja occidentalis*.

THUREA, *Juniperus lycia*—t. *Virga*, *Juniperus lycia*.

THUS, see *Pinus abies*—t. *Fœmininum*, see *Pinus abies*—t. *Judæorum*, *Croton cascarrilla*, *Styrax*, *Thymiana*—t. *Libanotos*, *Juniperus lycia*—t. *Masculum*, *Juniperus lycia*—t. *Verum*, *Juniperus lycia*—t. *Vulgare*, see *Pinus abies*.

THUYA APHYLLA, see *Sandarac*.

THU'YA seu **THUJA OCCIDENTA'LIS**, *T. obtusa*, *Cupressus Arbor Vitæ*, *Arbor Vitæ*, *Tree of Life*. *Nat. Family*, *Conifera*. The leaves and wood were formerly in high repute as resolvents, sudorifics, and expectorants, and were given in phthisical affections, intermittent fevers, and dropsies. The expressed juice has been applied to condylomata. The arrangement of the medullary matter of the cerebellum, termed *Arbor Vitæ*, is also called *Thuja*.

THYLACIITIS, *Gutta rosea*.

THYM, *Thymus*.

THYMA, *Thymion*.

THYMALOS, *Taxus baccata*.

THYMASTHMA, *Asthma thymicum*.

THYMBRA, *Satureia hortensis*—t. *Hispanica*, *Thymus mastichina*.

THYME, *CAT*, *Teucrium Marum*—t. Common, *Thymus*—t. *Lemon*, see *Thymus serpyllum*—t. *Mother of*, *Thymus serpyllum*—t. *Virginia*, *Pycnanthemum linifolium*—t. *Wild*, *Thymus serpyllum*.

THYMELÆA, *Daphne gnidium*—t. *Laureola*, *Daphne laureola*—t. *Mezereum*, *Daphne mezereum*—t. *Monseliaca*, *Daphne gnidium*.

THYMELCO'SIS, from *θύμος*, 'thymus,' and *ἔλκος*, 'an ulcer.' Ulceration of the thymus gland.

THYMI'AMA, *θυμαμα*, 'a perfume;' *Musk-wood*, *Thus Sadæorum*, (F.) *Narcaphæ*. A bark from Syria, Cilicia, &c., supposed to be the product of the liquid storax tree. It has an agreeable, balsamic smell; approaching that of liquid storax.

THYMIAMA, Fumigation, Suffimentum.

THYMIASIOTECHNIA, *Thymiatechny*.

THYMIASIS, Fumigation.

THYMIATECH'NY, *Thymiatech'nia*, *Thymiasiotech'nia*, *Cura fumigato'ria*, from *θυμαμα*, 'an odour,' and *τεχνη*, 'art.' The art of employing perfumes in medicine.

THYM'ION, *Thyma*, *Thymus*, *Porrum*, *Porrus*, *Verruca rhagoi'dea*, *Verruca minor*, from *θύμος*, 'thyme.' A small wart on the skin, resembling a bud of thyme.

THYMIOSIS, *Frambœsia*—t. *Indica*, *Frambœsia*.

THYMITES. Wine impregnated with thyme.

THYMITIS, from *θύμος*, 'thymus,' and *ίτις*, denoting inflammation. Inflammation of the thymus gland.

THYMOPATHIA, *Psychopathia*, from *θύμος*, 'the mind,' and *πάθος*, 'affection.' A disease of the mind.

THYMOS, Rage.

THYMOXAL'ME, from *θύμος*, 'thyme,' *ἄξος*, 'acid,' and *ἅλς*, 'salt.' A compound of thyme, vinegar, and salt.

THYMUS, *θύμος*, *Gland'ula Thymus*, *Corpus Thymicum* seu *Thymicum*, *Gland'ium*, *Thyarus gland*, *Corpus incomprehensibile* of *Jus. Frant*. An organ, the uses of which are totally unknown,

and which is seated in the upper separation of the anterior mediastinum. The thymus has the appearance of a glandular body. It is oblong; bilobate; soft, and very variable in size and colour. In the fœtus, it is very large, and contains in a central cavity — *reservoir of the thymus* — a milky fluid; but it gradually disappears, and in old age is scarcely discernible. The arteries, called *thymic*, are from the inferior thyroid, internal mammary, bronchial, and mediastinal. The veins have the same arrangement. It receives some nervous filaments from the pneumogastric nerves, the phrenic, and the inferior cervical ganglia.

THYMUS, *T. vulgaris* seu *tenuifolius* seu *hortensis*, *Common Thyme*, (F.) *Thym, T. ordinaire*. Family, Labiatus. *Sec. Syst.* Didynamia Gymnospermia. This herb has an agreeable, aromatic smell; and a warm, pungent taste. It is reputed to be resolvent, emmenagogue, tonic, and stomachic. It is not much used.

THYMUS, *Satureia capitata*, *Thymion* — t. *Calaminthus*, *Melissa calamintha* — t. *Capitatus*, *Satureia capitata* — t. *Ciliatus*, *T. mastichina* — t. *Croticus*, *Satureia capitata* — t. *Hortensis*, *Thymus* — t. *Includens*, *T. serpyllum*.

THYMUS MASTICHINA, *T. ciliatus*, *Common herb Mastich*, *Marum vulgare*, *Samp'suchus*, *Clinopodia*, *Mastichina Gallo'rum*, *Thymra Hispanica*, *Juca Indica*. A low, shrubby, Spanish plant, used as an errhine. It has a smell like mastich. Its virtues resemble those of the *Marum Syriacum*; but it is said to be less powerful.

THYMUS MULTIFLORUS, *Melissa nepeta* — t. *Nepeta*, *Melissa nepeta*.

THYMUS SERPYLLUM, *T. includens*, *Mother of Thyme*, *Wild Thyme*, *Her'pylos*, *Herpyllus*, *Serpyllum*, *Serpyllum*, *Serpyllum*, *Gila'rum*, *Serpyllum vulgare minus*, (F.) *Serpolet*. This plant has the same sensible properties as the garden thyme; but has a milder, and rather more grateful flavour. *Lemon Thyme*, the *Serpyllum citratum*, is merely a variety of the *Thymus Serpyllum*. It is very pungent; and has a particularly grateful odour, approaching that of lemons.

THYMUS SYLVATICUS, *Clinopodium vulgare* — th. *Sylvestris*, *Satureia capitata* — th. *Tenuifolius*, *Thymus*.

THYRA, *Θυρα*, 'a gate, folding-door.' In composition, *Thyreo* and *Thyro*, *Συψος*, 'a shield resembling a folding-door,' mean the thyroid cartilage.

THYREMPHRAXIS, Bronchocele.

THYREO, *Thyro*, in composition, relate to the thyroid cartilage or gland.

THYREOADENITIS, Thyreoiditis.

THYREO-ARYTENOID, *Thyro-arytenoideus*, or *Thyro-arytenoides*. That which relates to the thyroid and arytenoid cartilages.

THYREO-ARYTENOID LIGAMENTS, *Inferior Ligaments of the Larynx*, *Lips of the Glottis*, *Vocal Cordæ*, are two ligaments about two lines broad, formed of elastic and parallel fibres, which are contained in a duplicature of the mucous membrane of the larynx. They extend horizontally from the anterior projection at the base of each arytenoid cartilage to the middle of the angle of union of the thyroid cartilage. They are the essential organs of voice. See Glottis.

THYREO-ARYTENOID MUSCLES, THYREO-ARYTENOIDÆ, are thin muscles, which arise from the middle and inferior part of the posterior surface of the thyroid cartilage; whence they proceed backwards and outwards, to be inserted into the outer part of the base of the arytenoid cartilage. They give the necessary tension to the ligaments of the glottis, in the production of the voice.

Santorini has given the name *Thyreo-arytenoideus obliquus* to a portion of the *arytenoideus* muscle.

THYREO-EPIGLOTTIC, *Thyreo-epiglottideus*, *Thyreepiglotticus*. Sabatier and Santorini have given this name to the outer portion of the thyro-arytenoid muscle; because it passes from the thyroid cartilage to the anterior part of the epiglottis.

THYREO-HYOÏD, *Thyro-hyoideus*, *Thyro-hyoïdes*, *Hyodeothyreo'des*. That which belongs or relates to the thyroid cartilage and os hyoides.

THYREO-HYOÏD or HYO-THYROID MEMBRANE is a very broad, yellowish, fibrous membrane, thicker at the middle than at the extremities, which is attached above to the posterior surface of the body and great cornu of the os hyoides; and, below, to the whole superior edge of the thyroid cartilage.

THYREO-HYOÏDEUS or *Hyo-thyreoides Muscle* is situate at the anterior and superior part of the neck. It is attached to the oblique line on the anterior surface of the thyroid cartilage; to the inferior edge of the body of the os hyoides, and to the anterior portion of its great cornu. It approximates the thyroid cartilage and os hyoides to each other, by raising the cartilage, and with it the whole larynx: or, it can depress the os hyoides.

THYREO-PHARYNGEUS, *Thyro-Pharyngeus*.

THYREOID, Thyroid.

THYREOÏDEUS, Thyroïdeal.

THYREOÏTIS, *Thyreoidenitis*, *Angina thyreoides*, from *Συψος*, 'a shield,' and *itis*, denoting inflammation. Inflammation of the thyroid gland.

THYREONCUS, Bronchocele.

THYREOPHRAXIA, Bronchocele.

THYREPIGLOTTICUS, Thyreoëpiglottic.

THYRO, see Thyreo.

THYRO-ARYTENOID, Thyreo-arytenoid.

THYRO-CRICO-PHARYNGEUS, see Cricopharyngeal.

THYRO-HYOÏDEUS, Thyreo-hyoid.

THYRO-PHARYNGEUS, *Thyro-pharyngeus*. Valsalva, Morgagni, Santorini, and Winslow have given this name to the portion of the constrictor pharyngis inferior, which is attached to the thyroid cartilage.

THYRO-PHARYNGEUS, Constrictor pharyngis, see Cricopharyngeal.

THYRO-PHARYNGO-STAPHYLINUS, Palato-pharyngeus.

THYROCELE, Bronchocele.

THYROID, *Thyroïd*, *Thyroï'des*, from *Θυρα*, 'a gate or folding-door,' or from *Συψος*, 'a shield,' and *αιδος*, 'form.' That which has the shape of a folding-door.

THYROID CARTILAGE, *Cartilago Scutiformis*, *C. Scutalis*, *C. Clypealis*, *Coïpurtorium*, *C. Pelta'tis* seu *pelta'tus*, *Scutum*, *Adami Morali's Os*, is the largest of the cartilages of the larynx, at the anterior part of which it is situate. It is larger transversely than vertically; broader above than below; and seems formed by the junction of the two quadrilateral plates, which produce, by their union, an angle that projects forwards. Its two posterior margins terminate above, and on each side, by an ensiform prolongation, called the *greater cornu of the thyroid cartilage*; and, below, by a less prominent eminence, the *lesser cornu*, which is articulated with the cricoid.

THYROID GLAND, *Corpus Thyroideum*, *Glandula Thyroïdea*, (F.) *Gland ou Corps Thyroïde*, is an organ, the uses of which are not known. It covers the anterior and inferior part of the larynx,

as well as the first rings of the trachea, and seems to be composed of two lobes, flattened from before to behind, which are united by a transverse prolongation of the same nature as themselves, called the *Isthmus of the Thyroid Gland*. The tissue of the thyroid is soft, spongy, and of a brownish colour; but its intimate structure is unknown. It is formed of several distinct lobules; collected in lobes of greater or less size. These are composed of granulations, some of which contain a yellowish or milky fluid. The thyroid gland receives four large arteries, called *Thyroideal*, as well as corresponding veins. Its nerves proceed from the pneumogastric, and from the cervical ganglia. No excretory duct has ever been found in it. Its uses are not known.

THYROIDEAL, Thyroideus, Thyroïdeus, (F.) Thyroidien. That which concerns the thyroid gland or cartilage.

THYROIDEAL ARTERIES are two on each side. 1. The *superior Thyroideal, superior laryngeal, superior guttural*, arises from the anterior part of the external carotid, and proceeds to the upper part of the thyroid gland, after having given off a *laryngeal branch* and a *crico-thyroid*. 2. The *inferior Thyroideal, inferior guttural*, much larger than the last, arises from the upper part of the subclavian. It passes, in a serpentine manner, to the inferior part of the thyroid gland, to which it is distributed, after having given a number of branches to the neighbouring parts, among which is the *cervicalis ascendens*.

THYROIDEAL VEINS are, 1. A *superior thyroideal*, and several *middle thyroideal*, which open into the internal jugular vein. 2. An *inferior thyroideal*, much larger than the preceding, whose branches form — by anastomosing with those of the opposite side, in front of the trachea — a very remarkable venous plexus, which J. Cloquet calls the *infra-thyroideal plexus*. The inferior thyroideal veins open, — the left into the corresponding subclavian; — the right, into the vena cava superior.

THYROIDIEN, Thyroideal.

THYROPHRAXIA, Bronchocele.

THYRSUS, Penis.

TIBI-PÉRONÉO-TARSIEN, Peronæus longus.

TIBIA. A Latin word, which signifies a *stute* or pipe. *Cnemē, Procnēmē, Procnēmium, Focilē majus, Arundo major, Canna major, Canna major seu domestica cruris*. The largest bone of the leg. A long, irregular, and triangular bone, situate on the inner side of the fibula. It has, 1. A *Superior or femoral extremity*, which is very large, rounded, and has two eminences at the sides, called *Tuberosities of the Tibia*, or *Tibial tuberosities*. The outermost is articulated with the fibula. On its head are two articular, oval, concave surfaces, separated by a process, called *Spine of the tibia*, which are articulated with the condyles of the *Os femoris*. 2. An *inferior or tarsal extremity*, having an articular surface beneath, which joins the astragalus; within, a triangular eminence, which forms the malleolus internus; and, on the outside, a triangular surface, which articulates with the fibula. 3. The body or shaft of the tibia has three faces, separated by three angles, the anterior of which is the most prominent, and is called the *spine* or *crista of the tibia* or *tibial spine*. It is the *shin*. The tibia is articulated with the femur, fibula, and astragalus. It is developed by three points of ossification, one for the body, and one for each extremity.

TIBIA MINIMA, Fibula.

TIBIÆUS, Tibial.

TIBIAL, Tibialis, Tibiæus, (F.) Tibial, Jambier. That which relates to the tibia or to the leg.

TIBIAL APONEUROSIS, (F.) Aponeurose Jambière, surrounds the muscles of the leg. It is continuous, above, with the femoral aponeurosis, and arises, also, from the head of the fibula, and from several fibrous expansions which detach themselves from the tendons of the triceps, sartorius, gracilis, and semitendinosus. Thence it descends around the leg, attaching itself to the whole extent of the anterior and inner edges of the tibia. It sends, below, an expansion, which passes before the tendo Achillis, and is continuous with the anterior annular ligament of the tarsus. It is attached, also, to the sheath of the peronæi muscles.

TIBIAL ARTERIES are two in number. 1. The *Tibialis Antica*, which arises from the popliteal artery, before its bifurcation; passes immediately through the opening in the upper part of the interosseous ligament, and reaches the anterior part of the leg; when it turns downwards, and descends obliquely, between the extensor communis digitorum pedis and the tibialis anticus, anterior to the interosseous ligament; glides under the anterior annular ligament of the tarsus, and takes the name *Dorsalis tarsi*. Amongst the numerous branches, given off by the tibialis antica, may be distinguished — the *Tibialis recurvans, A. soleolaris interna*, and *A. malleolaris externa*. 2. The *Tibialis postica*, arises from the bifurcation of the popliteal artery; and, slightly tortuous, descends between the two planes of the posterior muscles of the leg; until it arrives under the arch of the calcaneum, where it divides into two branches — the *Plantar arteries*.

TIBIAD, see Tibial aspect.

TIBIAL ASPECT. An aspect towards the side on which the tibia is situated. — Barclay. *Tibiad* is used adverbially by the same writer, to signify, 'towards the tibial aspect.'

TIBIAL NERVES are two in number. 1. The *anterior tibial nerve, Prætibio-supplantaire, (Ch.)* One of the two branches in which the external popliteal terminates. It accompanies the arteria tibialis antica. 2. The *posterior tibial nerve, Branche tibiale du nerf fémoro-poplitee, (Ch.)* is the *internal popliteal*.

TIBIAL VEINS, ANTERIOR AND POSTERIOR, have the same arrangement as the arteries which they accompany.

TIBIALIS ANTI-CUS, Cate'næ nudæus, (F.) Tibio-sus-metatarsien, Tibio-sustarsien, (Ch.) Jambier antérieur. A muscle situate at the anterior part of the leg. Above, it has the shape of a triangular prism; below, it is slender and tendinous. It is attached, above, to the anterior part of the external tuberosity of the tibia: to the superior half of the outer surface of that bone; and to the anterior surface of the interosseous ligament. Below, its tendon terminates at the base of the first cuneiform bone, and at the posterior extremity of the first metatarsal bone. This muscle bends the foot on the leg, and directs its point inwards, at the same time that it raises its inner edge. It can, also, bend the leg on the foot, and prevent it from falling backwards in standing.

TIBIALIS GRACILIS, Plantar muscle.

TIBIALIS POSTI-CUS, (F.) Tibio-tarsien, Tibio-sus-tarsien, (Ch.) Jambier postérieur. This muscle is situate at the posterior and deep part of the leg. It is thicker above than below; and is attached, above, to the posterior surface of the fibula; to the posterior surface of the tibia, and to the interosseous ligament. Its tendon terminates, below, at the tuberosity on the inferior extremity of the os scaphoides. This muscle extends the foot on the leg; at the same time rais-

ing its inner edge. It, likewise, extends the leg on the foot.

TIBIO-CALCANIEN, Soleus—*t. Phalangetien*, Flexor longus digitorum pedis profundus perforans—*t. Sous-tarsien*, Tibialis posticus—*t. Sus-métatarsien*, Tibialis anticus—*t. Sus-tarsien*, Tibialis anticus.

TIBIO-TARSAL, *Tibio-tar'seus*, (F.) *Tibio-tarsiense*. What relates to the tibia and tarsus.

TIBIO-TARSAL ARTICULA'TION is the articulation of the foot with the leg. It is formed by the tibia and the astragalus; and is strengthened by lateral, and by anterior and posterior ligaments.

TIBIO-TARSIEN, Tibialis posticus.

TIO, *Twitching*, *Vellitation*. A local and habitual convulsive motion of certain muscles; and, especially, of some of those of the face. It is, sometimes, called in France *Tic convulsif* ou *Tic non douloureux*, to distinguish it from *Tic douloureux* or *neuralgia faciei*, and has been termed a *partial chorea* or form of *chronic chorea*, *Spasmus facialis*, *Chorea faciei*.

TIC DOULEUREUX, Neuralgia, facial—*t. non douloureux*, see Tio.

TICKLE WED, *Veratrum viride*.

TICKLING, (F.) *Chatouillement*. This word, sometimes, means the action of tickling (*titillatio*, *titillation*); at others, the sensation produced by this action (*pruritus*). A vivid sensation, which commonly causes laughter, and a state of general spasm that may be dangerous if too long protracted. There are some parts of the body, where we are easier tickled than others; for example, the sole of the feet, and the hypochondriac regions.

TICKSEED SUNFLOWER, *Coreopsis trichosperma*.

TICKWEED, *Hedeoma*—*t. Sunflower*, *Coreopsis trichosperma*.

TIDAL AIR, see *Respiration*.

TIERCE, see *Tertian*.

TIGE PITUITAIRE, Infundibulum of the brain—*t. Sus-sphénoïdale*, Infundibulum of the brain.

TIGILLUM, Crucible.

TIGLIA seu **TIGLI GRANA**, see *Croton Tiglium*.

TIGRETIER, see *Mania*, dancing.

TIGULA, Saccharum.

TIKIMMA, *Cacoucia coccinea*.

TILBURY, MINERAL WATERS OF. A saline chalybeate at West Tilbury, in Essex, England. It is not much frequented.

TILLA, *T. Europa'a* seu *grandiflora* seu *cordifolia* seu *pauciflora* seu *platyphylla*, *Phil'gria*. The Lime tree or Linden tree, Basswood, *White-wood*, *Spoonwood*, (F.) *Tilleul*. Family, *Tiliaceæ*. The flowers have been supposed to possess anodyne and antispasmodic virtues.

TILLEUL, *Tilia*.

TILLICHERRY CORTEX, *Nerium antidy-sentericum*.

TILMA, Linteum.

TILMOS, Evulsion.

TILMUS, *Carphologia*.

TILY, OF THE INDIANS, *Viburnum dentatum*.

TIMAC. The name of an East India root, but of what vegetable is not clear. It is said to possess diuretic properties; and hence has been given in dropsies.

TIMIDUS, *Rectus inferior oculi*.

TIN, (D.) *T e n*. *Stannum*, *Cassiteros*, *Cassiteros*, *Stangos*, *Jupiter*, *Stu'pia*, *Laos*, *Plumbum album* seu *candidum*, *Plumbum candidum*, (F.) *Étain*. A solid metal; of a peculiar odour when rubbed; insipid; colour whitish; s. g. 7.291;

giving a peculiar tinkling sound when struck. It is used, in medicine, only as a mechanical antheimintic. Dose, ℥j of the *Pulvis Stanni*, *Stannum granu'atum* or *Granular tin*, in molasses. This is made by melting tin in an iron vessel over the fire, and, while it is cooling, stirring until it is reduced to a powder, which is passed through a sieve.—Ph. U. S.

TIN, BUTTER OF, Tin, muriate of—*t. Chloruret of Tin*, muriate of—*t. Deutohydrochlorate of Tin*, muriate of.

TIN-FOIL, *Stannum foliatum*, *Stanni'olum*, is used for plugging carious teeth, &c.

TIN-GLASS, Bismuth—*t. Granular*, see Tin—*t. Muriate of*, superoxygenated, *T. muriate of*.

TIN, MURIATE OF, *Butter of Tin*, *Fuming liquor of Libavius*, *Murias Stanni*, *Murias Oxyd'nti Stanni*, *Chloruret of Tin*, *Deu'to-hydro-chlorate of Tin*, *Superoxygena'ted Muriate of Tin*. This is formed of Tin, one part; concentrated *muriatic acid*, three parts. To be crystallized by the aid of heat. A violent cathartic. Dose, gr. ij or iij.

TIN, SULPHURET OF, *Aurum musivum*.

TINAGMUS, *Concussio*.

TINASMUS, *Tenesmus*.

TINCTU'RA, from *tingere*, *tinctum*, 'to dye.' *Tincture*, *Essen'tia*, (F.) *Teinture*, *Alcoolat*, *Alcohol*. The term *tincture* is generally restricted to spirituous solutions of vegetable, animal, and some saline substances. It corresponds, therefore, with the word *Quintes'sence*, in one of its old significations; and with the *Alcool'atum* of the *Codex* of Paris. It is not unusual, however, to speak of *aqueous tincture*, *etheral tincture*, &c. Tinctures are made either with pure alcohol or proof spirit. The former are precipitated by water: and, therefore, are seldom used internally; the latter are common additions to infusions, decoctions, &c. They ought not, of course, to be united with any vehicle which can decompose them, or separate any thing from them in a palpable form; unless such decomposition is desired by the prescriber. In making tinctures, the ingredients should be reduced to a coarse powder; and the maceration be made in close vessels, exposed to a heat of about 80°, and frequently shaken. When completed, they must be filtered, and put away for use in close bottles. When the process of displacement is employed, great care must be taken, so that the substances treated may be, as far as possible, exhausted of their soluble principles, and a perfectly clear tincture be obtained. To those who are not familiar with the process, the plan of maceration is preferable.—Ph. U. S.

TINCTURA ABSIN'THII COMPOS'ITA, *Compound Tincture of wormwood*, *Essen'tia absin'thii composita* seu *amara*. (*Absinth*, *artem. pontica*, *caryoph.* ãã ℥ss, *sacch.* ℥ij, *alcohol.* Oss. Macerate for fifteen days. Ph. P.) Tonic, stomachic, vermifuge, and carminative. Dose, f ℥ij to f ℥ss.

TINCTURA ACACIÆ CATECHU, *T. catechu*—*t. Acetatis ferri cum alcoholo*, see *T. ferri acetatis*—*t. Acidi sulphurici*, *Sulphuricum acidum aromaticum*.

TINCTURA ACONI'TI, (Ph. U. S. 1842.) *Tinctu'ra Aconi'ti folio'rum*, (Ph. U. S. 1851.) *Tincture of Aconite*, (*Aconi't. folior.* ℥iv, *alcohol. dilut.* Oij. Macerate for 14 days, express, and filter through paper. It may also be made by displacement. Ph. U. S.) Dose, grt. v. It is rubbed on the seat of neuralgia.

TINCTURA ACONI'TI RADICIS, *Tincture of Aconite root*, (*Aconi't. radiceis*, *contus.* lbj, *Alcohol.* Oij. Macerate for 14 days; express and filter. It may also be prepared by displacement. Ph. U. S.) Uses same as the last.

TINCTURA ÆTHEREA CAMPHORATA, *Solutio camphoræ æthereæ, Liqueur nercinus Bangii, Spiritus sulphurico-æthereus camphoratus, Naphtha vitrioli camphorata.* (Camphor. p. i. Æther sulphuric. p. ii.) Stimulant in atonic diseases, arthritic cardialgia and spasms. Dose, 20 to 30 drops in white wine.

TINCTURA ÆTHEREA FERRI, Alcohol (seu Tinctura) sulphurico-æthereus ferri—t. Alcoholica Chinæ composita, T. cinchonæ composita—t. Alcoholica Corticum aurantiorum Whyttii, Tinctura cinchonæ amara—t. Alexipharmaca Huxhami, Tinctura cinchonæ composita.

TINCTURA ALOES, *T. Aloes Socotorinæ, Essentia Aloes, Alcohol cum Aloë perfoliata, Tincture of Aloes.* (Aloes, pulv. ℥j, ext. glycyrrh. ℥ij, aquæ Oiss, alcohol. Oss. Macerate for 14 days, and filter. Ph. U. S.) Properties, those of aloes. Dose, fʒss to fʒiiss.

TINCTURA ALOES ÆTHEREA, *Æthereal Tincture of Aloes, Tinctura aloes vitriolata.* (Aloes Socot., Myrrh, ʒā ℥iiss, croci ℥j, ep. atheris sulph. Oj. Digest the myrrh in the ether for 4 days; then add the aloes and saffron. Ph. E.) Stimulant and cathartic. Dose, fʒj to fʒij.

TINCTURA ALOES COMPOSITA, *Elixir Proprietatis, E. aperitivum, E. Aloes, Tinctura Aloes cum Myrrhâ, T. Aloës et Myrrhæ, (Ph. U. S.), T. Aloes et Myrrhæ crocata, Elixir of long life, Compound Tincture of Aloes, (F.) Elixir de longue vie, Baume de vie de Lelidère, (Aloes, in pulv., ℥ij, croci, ℥j, Tinct. Myrrhæ, Oij.)* Macerate for 14 days, and filter. Purgative and stomachic. Dose, fʒj to fʒij.

Boerhaave's Elixir consisted of aloes, myrrh, saffron, and tartrate of potassa, digested in alcohol and water.

Rudolphe's Elixir is formed of Aloes Socotr. ℥vj, cort. cinnam., rad. zedoar, ʒā ℥ss, rad. rhei ℥i, cocciell. ℥ss, syr. rhamni ℥ij, ep. tenuior. Oj, aquæ puræ fʒv.

TINCTURA ALOES ET MYRRHÆ, T. aloës composita—t. Aloes et myrrhæ crocata, T. A. composita—t. Aloes vitriolata, T. A. ætherea—t. Amara, T. gentianæ composita—t. Amomi repentis, T. cardamomi—t. Amomi zingiberis, T. zingiberis.

TINCTURA ANGSTURÆ, *Tincture of Angustura.* (Cort. cuscut. in pulv. crass. redact. ℥ij, sp. vin. ten. Oij. Digest. Ph. D.) Dose, fʒj to fʒij.

TINCTURA ANTIFEBRILIS WARBURGI, *seu Boeberu.*

TINCTURA ANTIODONTALGICA, *Toothache Tincture.* (Tannin. ℥j, Mastich, gr. v, æther. ℥ij. M.) To be applied on cotton wool, to the tooth previously dried.

TINCTURA ARISTOLOCHIE SERPENTARIÆ, T. serpentariæ—t. Aromatica, T. cinnamomi composita—t. Aromatica ammoniata, Spiritus ammoniæ aromaticus.

TINCTURA ASSAFŒTIDÆ, *T. Ferula Assafetida, Tincture of Assafetida, T. fetida, T. assafetida.* (Assafetid. ℥iv, alcohol. Oij. Macerate for 14 days and filter.) Dose, gr. xv to fʒj.

TINCTURA ASSAFŒTIDÆ AMMONIATA, Spiritus ammoniæ fetidus.

TINCTURA AURANTII, *T. Corticis Aurantii, Tincture of Orange Peel.* (Aurant. cort. recent. ℥ij, sp. rect. Oij. Digest for 14 days.) Stomachic. Used as an adjunct to stomachic draughts. Dose, fʒss to ℥j.

TINCTURA ACREÆ, Alcohol seu tinctura sulphurico-æthereus ferri.

TINCTURA BELLADONNÆ, *Tincture of Belladonna.* (Belladonna, ℥iv, alcohol. dilut. Oij. Macerate for 14 days; express, and filter through paper. It may, also, be prepared by displacement. Ph. U. S.)

TINCTURA BENZOÏNI COMPOSITA, *Compound Tincture of Benzoin, T. Benzoes composita, Balsamum Catholicum, B. Peruvianum, Balsamum traumaticum, Elixir traumaticum, Friar's Balsam, Vervain's Balsam, Wade's Drops, Junie's Drops, Commander's Balsam, Wound Balsam, Balsam for cuts.* (Benzoin. ℥ij, styrac. parif. ℥ij, Balsam. tolu. ℥j, aloes, in pulv. ℥ss, alcohol. Oij. Macerate for 14 days and filter. Stimulant.) Used chiefly for wounds and ulcers.

The basis of *Turlington's Balsam of Life* is the Compound Tincture of Benzoin. The following form is recommended by a committee of the Philadelphia College of Pharmacy:—Alcohol. Oviij, Benzoin. ℥xij, Styrac. liquid, ℥iv, Aloes Socotina ℥j, Balsam Peruvian. ℥j, Myrrhæ, ℥j, Res. Angelic. ℥ss, Balsam Tolu., Ext. Glycyrrh. ʒā ℥iv. Digest for 10 days, and strain.

The *Essence of Coltsfoot* consists of equal parts of the Compound Tincture of Benzoin and Balsam of Tolu, to which is added double the quantity of Rectified Spirit of Wine. It is sold as a pectoral.

TINCTURA CALUMBÆ, *T. Columba, T. Columba, Tincture of Columbo, Columbo Bitters, (Calumb. rad. cont. ℥iv, alcohol. dilut. Oij. Macerate for 14 days; express, and filter. Ph. U. S.)* Dose, fʒss to ℥iv. It may, also, be made by displacement.

TINCTURA CAMPHORÆ, Spiritus camphora.

TINCTURA CAMPHORÆ COMPOSITA, *T. Opii Camphorata, (Ph. U. S.) Compound Tincture of Camphor, Camphorated Tincture of Opium, Elixir Paregoricum, Paregoric Elixir.* (Opii, in pulv. Acid Benzoic. ʒā ℥j, ol. anisi, fʒj, mellis depurmat. ℥ij, Camphor. ℥ij, alcohol. dilut. Oij. Macerate for 14 days, and filter through paper. Ph. U. S.) One fluidounce contains nearly gr. ij of opium. Anodyne. Dose, fʒj to fʒij.

Squire's Elixir, an empirical carminative preparation, is thus made, according to one formula (Opii ℥iv, camphor. ℥j, cocciell. ℥j, faviol. dulc. ℥ij, tinct. scorpion. Oj, sp. anisi. cong. ij, aquæ Oij, auri musivi, ℥vj.)

TINCTURA CANTHARIDIS, *T. C. Venicataria, T. Lytta, T. Meloe venicatorii, Tincture of Biting Flies, T. of Spanish Flies, (F.) Teinture vésicante.* (Cantharid. cont. ℥ij, alcohol. dilut. Oij. Macerate for 14 days; express, and filter. It may, also, be prepared by displacement. Ph. U. S.) Stimulant and diuretic, but not often used internally. Externally, stimulant. Dose, gr. x.

Matthew's Injection, a once celebrated nostrum for fistula in ano, consisted wholly of a dilute Tincture of Cantharides.

TINCTURA CAPSICI, *Tincture of Capsicum.* (Capsic. ℥j, alcohol. dil. Oij. Macerate for 14 days, and filter. It may, also, be prepared by displacement.) Stimulant. Dose, fʒss to ℥j.

TINCTURA CARDAMOMI, *T. Amomi repentis, Tincture of Cardamom.* (Cardam. cont. ℥iv, alcohol. dilut. Oij. Macerate for 14 days, strain, and filter. It may, also, be made by displacement.) Use, the same as the seeds. Dose, ℥j to fʒiv.

Solomon's Balm of Gilead, an empirical preparation, seems to be an aromatic tincture—of which Cardamoms form a leading ingredient—made with brandy. Some affirm that it contains cantharides.

TINCTURA CARDAMOMI COMPOSITA, *Compound Tincture of Cardamoms, Stomach Tincture, Tinctura Stomachica.* (Cardanom. cont. ℥vj, Cort. cont. ℥ij, cinnam. cont. ℥v, Uxæ passæ depuratae acinis, ℥v, cocci. cont. ℥j, alcohol. dilut. Oiss.

Macerate for 14 days; express and filter. *Ph. U. S.*) Stomachic and carminative. Dose, fʒij to fʒiv.

TINCTURA CARMINATI'VA SYL'VII, Alcoholatum Carminati'vum Sylicii, Carminative Elixir of Sylicia. (*Rad. angelic.* 4 p., *rad. imperator., galang.* ʒ 6 p., *fol. rosmarin., majoran., rutæ, basilic.* ʒ 6 p., *baccar. laur. nobil.* 12 p. *sem. angelic., liquat. levist., anis.* ʒ 16 p., *zingib., nuc. moschat.* ʒ 6 p., *cinnam.* 12 p., *caryoph., cort. limon.* ʒ 4 p.). Add alcohol 1500 p. Macerate and distill, (800 p. *Ph. P.*) A warm stomachic, carminative, &c. Dose, ʒss to fʒss.

TINCTURA CASCARILLÆ, T. Crotonis Eleutheriæ, Alcohol cum Crotonis Cascarilla, Tincture of Cascarilla. (*Cascarill. cort. cont.* ʒiv, *sp. ten.* Oij. *Ph. L.*) Dose, fʒj to fʒiv.

TINCTURA CASTOREI, T. Castorei Ros'ici, Essentia Castorei, Alcohol castoria'tum, T. Castorei Canadensis, Tincture of Castor. (*Castor cont.* ʒij, *alcohol.* Oij. Macerate for 7 days, express, and filter.) Tonic and antispasmodic. Dose, ʒtt. xx to fʒij, or more.

TINCTURA CASTOREI COMPOSITA, Compound Tincture of Castor. (*Cast. ʒj, g. asafetid.* ʒss, *alcohol. ammoniat.* Oij. *Ph. E.*) Antispasmodic. Dose, fʒj to fʒiv. Called, also, *Elixir fetidum, Tinctura castorei fetida seu fetida ammoniata.*

TINCTURA CATECHU, Tinctura Japonica, T. Mimosa Catechu, T. Aca'cia Catechu, Tincture of Catechu. (*Catech. ʒij, cinnam. contus.* ʒij, *alcohol. dilut.* Oij. Macerate for 14 days, express and filter. *Ph. U. S.*) Astringent. Dose, fʒj to fʒij.

The Concentrated Solution of Charcoal, sold for cleaning the teeth, seems to be little more than the tincture of catechu.

TINCTURA CINCHONÆ, T. conii maculati.

TINCTURA CINCHONÆ, T. Corticis Peruvia'ni Simplex, T. Cort. Peruvia'ni, Tincture of Cinchona, Tincture of Bark. (*Cinchon. flav. in pulv.* ʒvi, *alcohol. dilut.* Oij. Macerate for 14 days, express, and filter through paper. It may, also, be made by displacement. *Ph. U. S.*) Dose, fʒj to ʒiv or more.

TINCTURA CINCHONÆ AMA'RA, Elixir antihypochondriacum, E. rob'orans Why'tii, E. Why'tii, Essentia Corticis Peruvia'ni Composita, Tinctura alcoholica corticum auranti'rum Why'tii, T. Kink'ina ama'ra, Elixir stomachicus spirituosus. (*Cinch. p. viij, Gentian. Rad., Cort. Aurant. p. iij, Alcohol* (900) 96 p. Digest. Dose, one or two teaspoonfuls.

TINCTURA CINCHONÆ AMMONIATA, T. Corticis Peruvia'ni volatilis, Ammoniated Tincture of Bark, Volatile Tincture of Bark. (*Cinchon. lunatifol. cort. cont.* ʒiv, *sp. ammon. aromat.* Oij. *Ph. L.*) In dyspepsia, combined with acidity and languor.

TINCTURA CINCHONÆ ÆTHE'REA COMPOSITA, T. Kina Kina æthe'ra composita, Elixirium Antisepticum Doctoris Chaussier, Chaussier's Antiseptic Elixir. (*Cinchon. officin.* ʒij, *cascarill.* ʒss, *cinnam.* ʒij, *croci ʒss, sacch. alb.* ʒxxxvij. Put these bruised into a matrass, and add *vin. alb. Hispanic.* vel *vin. muscat., alcohol.* ʒ ʒj. Macerate for two days, and add sulphuric ether fʒiiss. *Ph. P.*) Tonic, stimulant, and antiseptic. Dose, fʒss to fʒj.

TINCTURA CINCHONÆ COMPOSITA, Compound Tincture of Cinchona or Bark, Huxham's Tincture of Bark, T. Corticis Peruvia'ni Composita, T. febrif'uga Doctoris Huxhami, Essentia Chinae, E. Corticis Peruvia'ni Aleriphar'maca Huxhami, Essentia antiseptica Huxhami, Tinctura Aleriphar'maca Huxhami, Tinctura Alcoholica Chinae Composita. (*Cinchon. rubr. pulv.* ʒij, *aurant. cort. cont.* ʒiiss, *serpent. cont.* ʒij, *croci, santal.* ʒ ʒj, *alcohol. dilut.* fʒxxx. Macerate for 14 days,

express, and filter. *Ph. U. S.*) It may, also, be made by displacement. More grateful than the simple tincture. Dose, fʒj to fʒij.

TINCTURA CINNAMOMI, Tincture of Cinnamon, Essentia Cinnamomi, T. Lauri Cinnamomi, (Cinnam. cont. ʒij, alcohol. dilut. Oij. Macerate for 14 days, express, and filter. *Ph. U. S.*) It may, also, be prepared by displacement. Stomachic. Dose, fʒj to fʒij.

TINCTURA CINNAMOMI COMPOSITA, Compound Tincture of Cinnamon, Tinctura Aromaticæ, Essentia Aromatica, Alcohol cum Aromaticibus Compositus, Eau de Bonferme ou d'Armagnac. (*Cinnam. cont.* ʒj, *cardam. cont.* ʒss, *zingib. cont.* ʒij, *alcohol. dilut.* Oij. Macerate for 14 days, express, and filter. *Ph. U. S.*) It may, also, be prepared by displacement. Use, same as the last. Dose, fʒj to fʒij.

TINCTURA DE COCHLEARIIS, Alcoholatum de Cochleariis, A. antiscorb'iticum. (*Fol. cochlear. recent.* 2500 p., *rad. armoraciae,* 230 p., *alcohol.* (22° to 32° Beaumé) 3000 p., *distil. off.* 2000 p. *Ph. P.*) Antiscorb'itic. Dose, fʒj to ʒj.

TINCTURA COLCHICI, T. C. Sem'inis, (Ph. U. S.), Tincture of Colchicum Seed. (*Colchic. sem. cont.* ʒiv, *alcohol. dilut.* Oij. Macerate for 14 days, express, and filter. *Ph. U. S.*) It may, also, be prepared by displacement. Dose, ten to sixty drops.

TINCTURA COLCHICI SEMINIS, T. colchici—t. Colombæ, T. Calumbæ.

TINCTURA CONII, T. C. Maculati, T. Cicutæ, Tincture of Hemlock. (*Conii fol.* ʒiv, *alcohol. dil.* Oij. Macerate for 14 days, express, and filter. *Ph. U. S.*) It may also be made by displacement. Use;—the same as that of the leaves.

TINCTURA CONII MACULATI, t. conii — t. Convolvuli Jalapæ, T. jalapii — t. Corticis aurantii, T. aurantii — t. Corticis Peruviani composita, T. cinchonæ comp. — t. Corticis Peruviani simplex, T. cinchonæ — t. Corticis Peruviani volatilis, T. cinchonæ ammoniata.

TINCTURA CROCI SATI'VA, T. Croci, Tincture of Saffron. (*Croci Angl. cont.* ʒj, *alcohol. dilut.* ʒxv. *Ph. E.*) Slightly stomachic (?). Dose, fʒj to fʒij.

TINCTURA DE CROCO COMPOSITA, Elixirium de Garus, Alcoholatum de Croco Compositum, Compound Tincture of Saffron, Elixir of Garus. (*Alces Socotr.* 320 p., *myrrh.* 64 p., *croci.* 32 p., *cinnam., nuc. moschat., caryoph.* ʒiij, 16 p. *alcohol.* 1000 p. *aq. flor. aurant.* 5000 p. Digest for two days; distil 4000 p. and add syrup of capillaire, 5000 p. *Ph. P.*) Aromatic, cordial, stomachic. It is also called *Elixir cordiale et stomachicum,* and *E. anticolicum crocæ'tum.*

TINCTURA CROTONIS ELEUTHERIÆ, T. cascariillæ.

TINCTURA CUBEBÆ, Tincture of Cubebæ. (*Cubeb. cont.* ʒiv, *alcohol. dilut.* Oij. Macerate for 14 days, express, and filter. *Ph. U. S.*) It may, also, be prepared by displacement. Dose, one or two fluidrachms.

TINCTURA DIGITALIS, Tincture of Digitalis, T. Digitalis purpurea. (*Digital. ʒiv, alcohol. dilut.* Oij. Macerate for 14 days, express, and filter.) It may, also, be prepared by displacement. Use, same as that of the leaves. Dose, ʒtt. x.

TINCTURA FERRIFUGA DOCTORIS HUXHAM, T. cinchonæ composita.

TINCTURA FERRI ACETATIS, Tincture of Acetate of Iron. (*Potass. acetat.* ʒij, *sulph. ferri ʒj, sp. rectific.* Oij. Rub the acetate and sulphate into a soft mass. Dry and rub with the spirit. Digest for 7 days, and pour off. *Ph. D.*) Tonic and astringent. Dose, ʒtt. xx to fʒj. The Dublin college directs a *Tinctura Acetatis Ferri cum Alcoholâ,* which differs from the other, in having

half the quantity, only, of the *Acetate of Potass.*

TINCTURA FERRI AMMONIATA, *Tincture of Ammoniated Iron*, *T. Ferri Ammoniacalis*, *T. Florum martialis*, *T. Martis Mynsichtii*. (*Ferri ammon.* ℥iv, *sp. ten.* Oj. *Ph. L.*) Use—same as that of the ammoniated iron. Dose, ℥ss to ℥ʒij.

TINCTURA FERRI CHLORIDI, *T. ferri muriatis*.
TINCTURA FERRI MURIA'TIS, *T. Ferri chlo'ridi*, (*Ph. U. S.*), *T. Ferri sesqui-chlo'ridi*, *Liquor Ferri muria'tis*, *Tincture of Muriate of Iron*, *T. Martis in Spiritu Salis*, *T. M. cum Spiritu Salis*, *T. Ferri Muria'ti*, *Tincture of Steel*, *Alcohol fer-ra'tus*. (*Ferri subcarb.* ℞ss, *acid. muriat.* Oj, *alcohol.* Oij. Add the acid to the subcarbonate in a glass vessel, and shake during three days. Pour off and add the spirit. *Ph. U. S.*) Tonic and styptic. Dose, gtt. x to xx.

Beutcheff's Tincture of Klaproth's Tincture is an ethereal tincture of chloride of iron. It is composed of dry perchloride of iron, one part; *Hoffmann's anodyne liquor*, seven parts.

The *Antiveneereal Drops*, at one time so celebrated at Amsterdam, were examined by Scheele, and found to be a tincture of chloride of iron and corrosive sublimate.

TINCTURA FERRI SESQUICHLORIDI, *T. Ferri muriatis*—*t. Ferulæ Asafetidas*, *T. Asafetidas*—*t. Florum martianium*, *T. ferri ammoniata*—*t. Fœtida*, *T. asafetidas*—*t. Fortida ammoniata*, *T. castorei composita*—*t. Fuliginis*, see *Fuligo*.

TINCTURA GAL'BANI, *Tincture of Galbanum*. (*Galb.* ℥ij, *sp. tenuior.* Oij. *Ph. D.*) Stimulant and antispasmodic. Dose, ℥ʒj to ℥ʒij.

TINCTURA GALLA'RUM, *T. Gallæ*, (*Ph. U. S.*) *Tincture of Galls*. (*Gall. contus.* ℥iv, *alcohol. dilut.* Oij. Macerate for 14 days, express and filter. *Ph. U. S.*) It may, also, be prepared by displacement. Astringent. Dose, ℥ʒj to ℥ʒij.

TINCTURA GENTIANÆ COMPOSITA, *Compound Tincture of Gentian*, *Tinct. Ama'ra*, *Spirit Bitters*, *Elixir Stomachicum*. (*Gent. concis.* ℥ij, *aurant. cort.* ℥j, *cardam. cont.* ℥ss, *alcohol. dilut.* Oij. Macerate for 14 days, express, and filter. It may, likewise, be prepared by displacement. *Ph. U. S.*) Tonic and stomachic. Dose, ℥ʒj to ℥ʒij.

Brodum's Nervous Cordial consists of the *Tinctures of Gentian*, *Columba*, *Cardamom*, and *Bark*, with the *Compound Spirit of Lacedem*, and *Wine of Iron*.

Stoughton's Elixir is a compound tincture of gentian. The *Elixirium Docto'ris Stoughton* seu *Tinctura Ama'ra* of the Parisian Codex is prepared as follows:—*Absinth. summit. exsicc.*, *Teucri chamædryas*, *Rad. gentian.*, *cort. aurant.* āā ℥ʒj, *casearilla* ℥j, *rhei* ℥ss, *aloes socotr.* ℥j, *alcohol.* Oij.) Digest.

TINCTURA GUA'IACI, *T. G. Officina'lis*, *Tincture of Guaiacum*. (*Guaiac.* ℞ss, *alcohol.* Oij. Macerate for 14 days, and filter.) Stimulant and sudorific. Used especially in rheumatic and arthritic cases. Nearly the same as *Hill's Essence of Bardana* or *Burdock*.

TINCTURA GUA'IACI AMMONIATA, *Ammoniated Tincture of Guaiacum*, *T. Guaiacina Volatilis*, *Elixir Guaiacii Volatilis*, *Alcohol cum Guaiaco officina'le ammoniatum*, *Alcohol ammoniac et Guaiacii*, *T. Guaiacii*, (*P. L. 1788.*) *Volatile Tincture of Guaiacum*. (*Guaiac. pulv.* ℥iv, *sp. ammon. arom.* Oiss. Macerate for 14 days, and filter.) Properties same as the last. Dose, ℥ʒj to ℥ʒij.

Hatfield's Tincture—a nostrum—consists of *Guaiacum* and *Soap*, āā ℥ij, *rectified spirit*, Oiss.

TINCTURA HELLEBORI, *T. H. Nigri*, *Tincture of Black Hellebore*, *T. Melampodii*. (*Helleb. nigr.* cont. ℥iv, *alcohol. dilut.* Oij. Macerate for 14 days, express and filter. It may also be pre-

pared by displacement. *Ph. U. S.*) Dose, ℥ʒss to ℥ʒj.

TINCTURA HIERA, *Vinum aloes*.
TINCTURA HU'MULI, *Tincture of Hops*. (*Humuli*, ℥v, *alcohol. dilut.* Oij.) Tonic and sedative. Dose, ℥ʒss to ℥ʒij.

TINCTURA HYOCY'AMI, *T. Hyocyami nigri*, *Tincture of Henbane*. (*Hyocyam. fol.* ℥iv, *alcohol. dilut.* Oij. Macerate for 14 days, express and filter. It may also be prepared by displacement. *Ph. U. S.*) Narcotic, anodyne. Dose, gr. xx to ℥ʒj.

TINCTURA IO'DINI, (*Ph. U. S.*, 1842.) *Tinctura Iodin'ii*, (*Ph. U. S.*, 1851.) *Alcohol Iodii*, *Tincture of Iodine*. (*Iodii* ℥j, *alcohol.* Oj. Dissolve. *Ph. U. S.*) The tincture spoils by keeping, or at least, deposits the iodine. It has been much used in goitre, &c. Dose, ten drops three times a day.

TINCTURA IODINI COMPOSITA, (*Ph. U. S.*, 1842.) *Tinctura Iodin'ii Composita*, (*Ph. U. S.*, 1851.) *Compound Tincture of Iodine*. (*Iodii* ℥ss, *Potassii iodid.* ℥j, *alcohol.* Oj. Dissolve. *Ph. U. S.*) Dose, 10 to 30 drops.

TINCTURA JALA'PII, *T. Jalapæ*, (*Ph. U. S.*) *T. Convolvuli Jalapæ*, *Tincture of Jalap*, *Vul'ga*. (*Jalap. pulv.* ℥vi, *alcohol. dilut.* Oij. Macerate for 14 days, express, and filter. *Ph. U. S.*) It may also be made by displacement. Cathartic. Dose, ℥ʒj to ℥ʒij.

TINCTURA JALA'PII COMPOSITA, *Elixir Jalapæ Compositum*, *Elixir purgans*, *Elixir catholica purgans Roth'ii*, *Elixir antihelminticum Suco'rum*, *Eau de vie Allemanda*. (*Jalap. ℞ss*, *Scummon.* ℥j, *alcohol.* (22°) Oj. Macerate for eight days. *Ph. P.*) Dose, 60 to 100 drops.

TINCTURA JAPONICA, *Tinctura catechu*—*t. Kinæ kinæ ætherea composita*—*t. Cinchonæ ætherea composita*—*t. Kinkinæ amara*, *Tinctura cinchonæ amara*.

TINCTURA KINO, *Tincture of Kino*. (*Kinæ in pulv.* ℥vj; *alcohol. dilut.* q. s. Put the kino, mixed with an equal bulk of sand, into a percolator, and gradually pour on diluted alcohol until ℥ʒvij of filtered liquor pass. The tincture should be renewed frequently, and kept in closely stopped bottles. *Ph. U. S.*) Astringent. Dose, ℥ʒj to ℥ʒij.

TINCTURA KRAMERIÆ, *Tincture of Rhatany*. (*Kramer. in pulv.* ℥vj, *alcohol. dilut.* Oij. Macerate for 14 days, express, and filter. *Ph. U. S.*) It may also be prepared by displacement. Dose ℥ʒj to ℥ʒij.

TINCTURA LAURI CINNAMOMI, *Tinctura cinnamomi*—*t. Lavandulæ composita*, *Spiritus lavand comp.*—*t. Lyttæ*, *Tinctura cantharidis*—*t. Marti Glauberi*, see *Ferrum tartarizatum*—*t. Martis in spiritu salis*, *Tinctura ferri muriatis*—*t. Martis Mynsichtii*, *Tinctura ferri ammoniata*—*t. Marti vinosæ*, *Vinum ferri*—*t. Melampodii*, *Tinctura hellebori nigri*—*t. Meleses vesicatorii*, *Tinctura cantharidis*—*t. Metallorum*, *Lilium Paracelsi*—*t. Mimoseæ catechu*, *Tinctura catechu*.

TINCTURA LOBELIÆ, *Tincture of Lobelia*. (*Lobel.* ℥iv, *alcohol. dilut.* Oij. Macerate for 14 days, express, and filter. *Ph. U. S.*) It may also be prepared by displacement. Dose, ℥ʒj to ℥ʒij.

TINCTURA LUPULINÆ, *Tincture of Lupulin*. (*Lupulin.* ℥iv, *alcohol.* Oij. Macerate for 14 days and filter. *Ph. U. S.*) Dose, ℥ʒj to ℥ʒij.

TINCTURA MELOES VESICATORII, *Tinctura cantharidis*.

TINCTURA MOSCHI, *Tincture of Musk*, *Essentia of Musk*. (*Mosch. in pulv. reduct.* ℥ij, *q. vini rect.* Oj.) Dose, ℥ʒj to ℥ʒij.

TINCTURA MYRRHÆ, *Tincture of Myrrh*, *Simpli' Tincture of Myrrh*. (*Myrrhæ contusæ* ℥iv, *alcohol.* Oij. Macerate for 14 days, and filter. *Ph.*

U. S.) Tonic, deobstruent, antiseptic, and detergent. It is chiefly used in gargles, and applied to foul ulcers, spongy gums, &c.

Hudson's Preservative for the Teeth and Gums consists of Tinct. myrrh., tinct. cinch., aq. cinnam. $\mathfrak{z}\mathfrak{i}\mathfrak{i}\mathfrak{j}$, eau d'arquebuseade, $\mathfrak{z}\mathfrak{j}$, pulv. gum. Arab. $\mathfrak{z}\mathfrak{ss}$. M.

TINCTURA NERVINA BESTUCHEFFII, Tinctura seu alcohol sulphurico-æthereus ferri—*t. Nervina Halensis*, Tinctura seu alcohol sulphurico-æthereus ferri—*t. Nervino-tonica*, Lamotte's, Alcohol seu tinctura sulphurico-æthereus ferri.

TINCTURA NUCIS VOMICÆ, Tincture of Nux Vomica. (Alcohol. s. g. .837, $\mathfrak{f}\mathfrak{z}\mathfrak{j}$; Dry Extract of Nux Vomica, 3 gr.) Dose, gr. v to xxx, in cases where the nux vomica is indicated.

It is directed, in the last edition of the Ph. U. S. (1851), to be prepared as follows:—*Nucis vomica* rasur., $\mathfrak{z}\mathfrak{v}\mathfrak{i}\mathfrak{j}$; alcohol, Oij. Macerate for 14 days, express, and filter. It may also be prepared by the process of displacement. Dose, gr. v to xx.

TINCTURA OLEI MENTHÆ PIPERITÆ, Tincture of Oil of Peppermint, Essence of Peppermint. (*Ol. mentha piperitæ*, $\mathfrak{z}\mathfrak{i}\mathfrak{j}$, alcohol. Oj. Dissolve. Ph. U. S.) Dose, 5 drops, as a carminative.

TINCTURA OLEI MENTHÆ VIRIDIS, Tincture of Spearmint, Essence of Spearmint, is made in the same manner. Ph. U. S.

TINCTURA OPII, Tincture of Opium, Liquid Laudanum, Theriaca castel'tis, Alcohol cum Opio, Tinctura Thebæica, Tinctura Sedati'va. (Opii pulv. $\mathfrak{z}\mathfrak{i}\mathfrak{j}\mathfrak{ss}$, alcohol dilut. Oij. Macerate for 14 days, express, and filter. Ph. U. S.) Nineteen minims contain about one grain of opium. Properties, those of opium. Dose, gr. xx to lx and more. By macerating the drugs remaining after making the Tinctura Opii in a solution of Tartaric Acid, a solution is obtained, which is said to be devoid of the exciting and constipating properties of the tincture of opium. Gray calls it *Haden's Liqueur Opii Sedati'va*.

TINCTURA OPII ACETATA, Ac'etated Tincture of Opium. (Opii $\mathfrak{z}\mathfrak{i}\mathfrak{j}$; aceti, $\mathfrak{f}\mathfrak{z}\mathfrak{x}\mathfrak{i}\mathfrak{j}$; alcohol. Oss. Rub the opium with the vinegar; add the alcohol, and having macerated for 14 days, express and filter. Ph. U. S.) Twenty drops are equivalent to a grain of opium.

TINCTURA OPII AMMONIATA, Ammoniated Tincture of Opium, *Edinburg's Paregoric Elixir*. (*Flor. benz.*, croci, $\mathfrak{a}\mathfrak{a}$ $\mathfrak{z}\mathfrak{i}\mathfrak{i}\mathfrak{j}$, opii $\mathfrak{z}\mathfrak{i}\mathfrak{j}$, ol anisi $\mathfrak{z}\mathfrak{ss}$, alcohol. ammoniat. $\mathfrak{f}\mathfrak{z}\mathfrak{x}\mathfrak{v}\mathfrak{j}$. Digest. Ph. E.) $\mathfrak{f}\mathfrak{z}\mathfrak{j}$ contains one grain of opium. Used like the Tinctura Camphoræ Composita.

TINCTURA OPII CAMPHORATA, Tinctura camphoræ composita—*t. Plumbosa*, Liqueur plumbi subacetatis dilutus.

TINCTURA QUASSIÆ, *T. Quassia excel'sa*, Tincture of Quassia. (*Quassia rasur.* $\mathfrak{z}\mathfrak{i}\mathfrak{j}$, alcohol. dilut. Oij. Macerate for 14 days, express, and filter. Ph. U. S.) It may also be prepared by displacement. Tonic. Dose, $\mathfrak{f}\mathfrak{z}\mathfrak{j}$ to $\mathfrak{z}\mathfrak{i}\mathfrak{j}$.

TINCTURA QUININÆ SULPHATIS, Tincture of Sulphate of Quinia. (*Sulphate of Quinia*, gr. vj; alcohol. (.847) $\mathfrak{f}\mathfrak{z}\mathfrak{j}$. M.) Dose, $\mathfrak{f}\mathfrak{z}\mathfrak{j}$ to $\mathfrak{z}\mathfrak{i}\mathfrak{v}$, in the day.

A Tinctura Cincho'nia Sulpha'tis may be made in a similar manner.

TINCTURA RHABBARBARI, Tinctura rhei—*t. Rhabbarbari vinosæ*, Vinum rhei palmati.

TINCTURA RHEI, *T. Rhabarb'ari*, *T. Rhabbarbari spiritu'osa*, *T. Rhei*, *T. Rhei palma'ti*, Tincture of Rhubarb. (*Rhei*, contus. $\mathfrak{z}\mathfrak{i}\mathfrak{i}\mathfrak{j}$, cardam. cont. $\mathfrak{z}\mathfrak{ss}$, alcohol. dilut. Oij. Macerate for 14 days, express, and filter. It may also be prepared by displacement. Ph. U. S.) Stomachic or purgative, according to the dose employed:

$\mathfrak{f}\mathfrak{z}\mathfrak{j}$ to $\mathfrak{z}\mathfrak{i}\mathfrak{j}$, as a stomachic; $\mathfrak{f}\mathfrak{z}\mathfrak{i}\mathfrak{v}$ to $\mathfrak{z}\mathfrak{j}$, as a purgative.

TINCTURA RHEI COMPOSITA, *T. Rhabbarbari composita*, Compound Tincture of Rhubarb. (*Rhei rad. concis.* $\mathfrak{z}\mathfrak{i}\mathfrak{j}$, glycyrrhis. rad. cont. $\mathfrak{z}\mathfrak{ss}$, singib. rad. concis., croci stigmat. $\mathfrak{a}\mathfrak{a}$ $\mathfrak{z}\mathfrak{i}\mathfrak{j}$, aqua $\mathfrak{f}\mathfrak{z}\mathfrak{x}\mathfrak{i}\mathfrak{j}$, ep. ten. Oj. Ph. L.) Properties same as the last.

TINCTURA RHEI ET ALOES, Tincture of Rhubarb and Aloes, Elixir sacrum. (*Rhei concis.* $\mathfrak{z}\mathfrak{x}$, aloes, pulv. $\mathfrak{z}\mathfrak{v}\mathfrak{j}$, cardam. cont. $\mathfrak{z}\mathfrak{ss}$, alcohol. dilut. Oij. Macerate for 14 days, express, and filter. Ph. U. S.) Properties like the last.

Rymer's Cardiac Tincture consists of an infusion of Capsicum, Camphor, Cardamom seeds, Rhubarb, Aloes and Castor in Proof Spirit, with a very small quantity of Sulphuric Acid.

TINCTURA RHEI ET GENTIANÆ, Tincture of Rhubarb with Gentian, Tinctura Rhei Amara. (*Rhei* cont. $\mathfrak{z}\mathfrak{i}\mathfrak{j}$, gentian. cont. $\mathfrak{z}\mathfrak{ss}$, alcohol. dilut. Oij. Macerate for 14 days, express and filter. Ph. U. S.) It may also be prepared by displacement. Properties same as the last.

TINCTURA RHEI ET SENNÆ, Tincture of Rhubarb and Senna, *Warner's Gout Cordial*. (*Rhei* cont. $\mathfrak{z}\mathfrak{i}\mathfrak{j}$, senna, $\mathfrak{z}\mathfrak{i}\mathfrak{j}$, coriandr. cont., fœnicul. cont. $\mathfrak{a}\mathfrak{a}$ $\mathfrak{z}\mathfrak{i}$, santal. rasur. $\mathfrak{z}\mathfrak{i}\mathfrak{j}$, croci ext. glycyrrhis. rad. $\mathfrak{a}\mathfrak{a}$ $\mathfrak{z}\mathfrak{ss}$, urar. passar. acinis exemptis, $\mathfrak{f}\mathfrak{ss}$, alcohol. dilut. Oij. Macerate for 14 days; express and filter. Ph. U. S.) Dose, $\mathfrak{f}\mathfrak{z}\mathfrak{ss}$ to $\mathfrak{f}\mathfrak{z}\mathfrak{i}\mathfrak{j}$.

TINCTURA RHEI, Tinctura rhei—*t. Rhei amara*, Tinctura rhei et gentianæ—*t. Sacra*, Vinum aloes.

TINCTURA SANGUINARIÆ, Tincture of Blood-root. (*Sanguinar.* cont. $\mathfrak{z}\mathfrak{i}\mathfrak{v}$, alcohol. dilut. Oij. Macerate for 14 days, express, and filter. Ph. U. S.) It may also be prepared by displacement. Dose, 30 to 60 drops.

TINCTURA SAPONIS CAMPHORATA, Linimentum saponis—*t. Saponis et opii*, Linimentum saponis et opii.

TINCTURA SCILLÆ, Tincture of Squill. (*Scilla* $\mathfrak{z}\mathfrak{i}\mathfrak{v}$, alcohol. dilut. Oij. Macerate for 14 days, express, and filter. It may also be made by displacement. Ph. U. S.) Dose, gr. xv to lx.

TINCTURA SEDATIVA, Tinctura opii.
TINCTURA SENNÆ, *T. Sennæ Composita*, Elixir Salu'tis, *Duffy's Elixir*, Tincture of Senna. (*Senna fol.* $\mathfrak{z}\mathfrak{i}\mathfrak{i}\mathfrak{j}$, carui sem. cont. $\mathfrak{z}\mathfrak{i}\mathfrak{j}$, cardam. sem. cont. $\mathfrak{z}\mathfrak{i}$, uvarum passarum demptis acinis, $\mathfrak{z}\mathfrak{i}\mathfrak{v}$, ep. ten. Oij. Ph. L. & D.) Stomachic, carminative and cathartic. Dose, $\mathfrak{f}\mathfrak{z}\mathfrak{i}\mathfrak{j}$ to $\mathfrak{f}\mathfrak{z}\mathfrak{j}$.

TINCTURÆ SENNÆ ET JALAPÆ, Tincture of Senna and Jalap. (*Senna* $\mathfrak{z}\mathfrak{i}\mathfrak{i}\mathfrak{j}$, jalap. pulv. $\mathfrak{z}\mathfrak{i}$, coriandr. cont., carui cont., $\mathfrak{a}\mathfrak{a}$ $\mathfrak{z}\mathfrak{ss}$, cardam. cont. $\mathfrak{z}\mathfrak{i}\mathfrak{j}$, saccâ. $\mathfrak{z}\mathfrak{i}\mathfrak{v}$, alcohol. dilut. Oij. Macerate for 14 days, express, and filter. Ph. U. S.) It may also be prepared by displacement. Dose, $\mathfrak{f}\mathfrak{z}\mathfrak{i}\mathfrak{j}$ to $\mathfrak{f}\mathfrak{z}\mathfrak{j}$.

TINCTURA SERPENTARIÆ, *T. S. Virginia'na*, *T. Aristolochi'æ Serpentaria*, Tincture of Snake-root. (*Rad. serpent.* $\mathfrak{z}\mathfrak{i}\mathfrak{i}\mathfrak{j}$, alcohol. dilut. Oij. Macerate for 14 days, express, and filter. Ph. U. S.) It may also be prepared by displacement. Tonic. Dose, $\mathfrak{f}\mathfrak{z}\mathfrak{ss}$ to $\mathfrak{f}\mathfrak{z}\mathfrak{i}\mathfrak{j}$.

TINCTURA STOMACHICA, Tinctura cardamomi composita.

TINCTURA STRAMONII, Tincture of Stramonium. (*Stramon. sem.* cont. $\mathfrak{z}\mathfrak{i}\mathfrak{v}$, alcohol. dilut. Oij. Macerate for 14 days, express, and filter. Ph. U. S.) It may also be prepared by displacement. Dose, ten to twenty minims.

TINCTURA STRYCHNINÆ, Tincture of Strychnin. (Alcohol. s. g. .837, Oj, strychninæ gr. ij.) Dose, 6 drops to 24. Properties, those of strychnin.

TINCTURA SEU ALCOHOL SULPHURICO-ÆTHEREUS FERRI, *Gutta nervi'na*, Liqueur Anodynus *Martia'tis*, Alcohol æthereus ferri'vus, Nap'h'tha

Vitrioli Martialis, Solutio Muriatis ferriæ æthereæ, Spiritus sulphurico-æthereus martialis, Tinctura nerei-na Halensis, T. Tonico-nervi-na Halensis, Tinctura auriæ, T. nervina Bestucheffii, T. nervino-tonica (Lamotte's), T. æthereæ ferri, Ether Martialis, De La Motte's Golden Drops, Bestucheff's Nervous Tincture, Elixir d'Or de M. le Général De La Motte. An ethereal solution of muriate of iron. It is much used in gout, hypochondriasis, &c.

TINCTURA SULPHURIS VOLATILIS, Liquor fumans Boylei — t. Thebaica, Tinctura opii, Vinum opii.

TINCTURA TOLUIPERÆ BAL'SAMI, Tincture of Balsam of Tolu, *T. Bal'sami Toluta'ni, T. Toluta'ni*, (Ph. U. S., 1842.) *T. Toluta'na*, Ph. U. S., 1851), (*Bals. Tolutan. ℥ij, alcohol Oij.*) Reputed to be expectorant and corroborant. Dose, ℥ss to ℥j, or more.

TINCTURA TONICA NERVINA HALENSIS, Alcohol (sua Tinctura) sulphurico-æthereus ferri.

TINCTURA VALERIANÆ, Tincture of Valerian. (*Valerian. cont. ℥iv, alcohol dilut. Oij.*) Macerate for 14 days, express, and strain. It may also be prepared by displacement. *Ph. U. S.*) Stimulant and antispasmodic. Dose, ℥ss to ℥ij.

TINCTURA VALERIANÆ AMMONIATA, Ammoniated or Volatile Tincture of Valerian, *T. Valerianæ Volatilis*. (*Valerianæ cont. ℥iv, sp. ammon. arom. Oij.*) Macerate for 14 days, express, and filter. It may also be made by displacement. *Ph. U. S.*) Like the former. Dose, ℥ss to ℥ij.

TINCTURA VERA'TRI, *T. Veratri albi, Tincture of White Hellebore.* (*Rad. veratri alb. cont. ℥viiij, alcohol dilut. Oijss. Ph. E.*) Emetic and cathartic; but not very manageable. Dose, gtt. v to x.

TINCTURA ZINGIBERIS, *T. Amo'mi Zingiberis, Tincture of Ginger.* (*Zingib. cont. ℥viiij, alcohol. Oij.*) Macerate for 14 days, express, and filter. It may also be made by displacement. *Ph. U. S.*) Stimulant and carminative. Dose, ℥ss to ℥j.

TINCTURE OF ACETATE OF IRON, Tinctura ferri acetatis — t. of Aconite, Tinctura aconiti — t. of Aconite root, Tinctura aconiti radiceis — t. of Balsam of Tolu, Tinctura toluiferæ balsami — t. of Bark, Tinctura cinchonæ — t. of Bark, ammoniated, Tinctura cinchonæ ammoniata — t. of Bark, compound, Tinctura cinchonæ composita — t. of Bark, Huxham's, Tinctura cinchonæ composita — t. of Bark, volatile, Tinctura cinchonæ ammoniata — t. of Belladonna, Tinctura belladonnæ — t. Bestucheff's, see Tinctura ferri muriatis — t. of Blistering Fly, Tinctura cantharidis — t. Cardiac, Rymar's, Tinctura rhei et aloes — t. of Colchicum seeds, Tinctura colchici — t. of Colombo, Tinctura Calumbæ — t. of Cubebs, Tinctura cubebæ — t. of Galls, Tinctura gallarum — t. of Ginger, Tinctura zingiberis — t. for the Gout, Dr. Wilson's, see Colchicum autumnale — t. Hatfield's, see Tinctura guaiaci ammoniata — t. of Hellebore, white, Tinctura veratri — t. of Hemlock, Tinctura conii maculati — t. of Henbane, Tinctura hyoscyami — t. of Hops, Tinctura humuli — t. of Iodine, compound, Tinctura iodini composita — t. of Iron, ammoniated, Tinctura ferri ammoniata — t. of Iron, muriated, Tinctura ferri muriatis — t. Klafroth's, see Tinctura ferri muriatis — t. of Lobelia, Tinctura lobeliæ — t. of Ludwig, see Ferrum tartarizatum — t. of Lupuline, Tinctura lupulinæ — t. of Musk, Tinctura moschi — t. Nervous, Bestucheff's, Tinctura seu alcohol sulphurico-æthereus ferri — t. of Oil of Peppermint, Tinctura Olei menthæ piperitæ — t. of Oil of Spearmint, Tinctura olei menthæ viridis — t. of Opium, acetated, Tinctura opii acetata — t. of Orange-peel, Tinctura aurantii — t. of Rhatany, Tinctura kramerii — t. of Rhubarb, Tinctura

rhei — t. of Rhubarb and aloes, Tinctura rhei et aloes — t. of Rhubarb and gentian, Tinctura rhei et gentianæ — t. of Rhubarb and senna, Tinctura rhei et sennæ — t. of Saffron, Tinctura croci — t. of Saffron, compound, Tinctura de croco composita — t. of Senna and jalap, Tinctura sennæ et jalapæ — t. of Snakeroot, Tinctura serpentaria — t. of Soap, camphorated, Linimentum saponis — t. of Spanish Fly, Tinctura cantharidis — t. of Squill, Tinctura scillæ — t. of Steel, Tinctura ferri chlo ridi — t. Stomach, Tinctura cardamomi composita — t. of Stramonium, Tinctura stramonii — t. for the Teeth, Greenough's, see Spiritus armoracii compositus — t. Toothach, Tinctura antidontalgica — t. of Wormwood, compound, Tinctura ab sinthii composita.

TINDER, Boletus ignarius.

TINEA, Porrigo — t. Faciei, Porrigo larvalis — t. Favosa, Porrigo favosa — t. Ficosa, Porrigo acutata — t. Furfuracea, Porrigo furfurans — t. Granulata, Porrigo scutulata, Porrigo lupinosa — t. Lactea, Porrigo larvalis — t. Lupina, Porrigo lupinosa — t. Mucosa, Porrigo lupinosa — t. Porriginosa, Porrigo furfurans — t. Tonsura, Porrigo decalvans.

TINKER'S WEED, Triosteum.

TINKLING, METALLIC, Tintement métallique.

TINNIMENTUM METALLICUM, Tintement métallique.

TINNITUS AURIUM, Fluctuatio seu Sorditus aurium, Paracusis imaginaria, Sauris aurium, Ote'chus, Syringus, Syringus. Sibilus aurium, S. clangens, Strepitus seu Sibilus aurium, Echos, Enche'ma, Bombus, Murus 'ringing of the ears,' from tinnire, 'to ring (F.) Tintement, Tintouin, Bourdonnement, Bruissement. An imaginary sound, like the ringing of a bell, the noise of wind, the murmur of water, &c. heard in health and in sickness. It is, often, an accompaniment of cerebral disorder.

TINTEMENT, Tinnitus aurium — t. Bellain T. métallique.

TINTEMENT MÉTALLIQUE (F.). Tintement bullaire, Tinnimentum metallicum, Cœlesthoscop'icus, Metallic Respiration, Metallic Voice, Metallic Tinkling. A particular noise heard by the stethoscope when applied to the chest, and which, according to Laënnec, resembles that caused by striking glass, metal, or porcelain, with a pin; but is, perhaps, more like the sound of the keys of a musical snuff-box. The tintement métallique or metallic tinkling is heard on causing the patient to speak or breathe but is more distinct when he coughs. When the phenomenon is not so strongly marked, it produces only the metallic resonance. The 'metallic tinkling,' is a pathognomonic symptom of a communication between the bronchia and cavity of the chest; in other words, of Pneumothorax.

TINTINABULUM, Uvula.

TINTOUIN, Tinnitus aurium.

TIPSARIA, Decoctum hordei.

TIRE-BALLE, Forceps (bullet.)

TIRE-FOND, (F.) A surgical instrument formerly used to elevate the piece of bone raised off by the trephine.

TIRE-PUS, Pyulcon.

TIRE-TÊTE, (F.) A name given to different instruments used for extracting the head of the child when left in the uterus, and in certain cases of difficult labour. The crochets is one of these, as well as the Tire-tête à baseule of Levras, &c.

TIRES, Milk sickness.

TISANE, Pti'sana or Pti'sana, Pisonis, from πτισαν, 'pearl barley,' itself from πτισαν, 'libercortiente.' A name given to aqueous medicines containing but little, if any, medicinal agent.

The ancients gave the name particularly to the decoction of barley.

TISANE COMMUNE, Decoctum hordei.

TISIC, Phthisis.

TISICAL, Phthisicus.

TISSU, Tissue — *t. Accidental*, see Accidental, and Tissue, accidental — *t. Cavernous*, Cavernous texture — *t. Celluleux des os*, Cancelli — *t. Inodulaire*, Tissue, inodular — *t. Lardacé*, see Lardaceous — *t. Spongoïde*, Spongoid tissue.

TISSUE, *Textus*, *Tela*, (F.) *Tissu*. By this term, in anatomy, is meant the various parts, which, by their union, form the organs; and are, as it were, their anatomical elements. Histological anatomy is the anatomy of the tissues, which are the seat of the investigations of the pathological anatomist. The best division, indeed, of diseases would be according to the tissues mainly implicated. For the elementary tissues, see Fibre. The compound tissues, which, by associating or combining variously, form every organ of the body, have been variously classed: but every division is imperfect and liable to objection. The following, by Messrs. Todd and Bowman, is one of the most recent.

TABULAR VIEW OF THE TISSUES OF THE HUMAN BODY.

		<i>Examples.</i>
1. Simple membrane, homogeneous, or nearly so, employed alone, or in the formation of compound membranes.	}	Posterior layer of the cornea.—Capsule of the lens.—Sarcolemma of muscle, &c.
2. Filamentous Tissues, the elements of which are real or apparent filaments.		White and yellow fibrous tissues.—Areolar tissue.
3. Compound membranes, composed of simple membrane and a layer of cells of various forms, (epithelium or epidermis,) or of areolar tissue and epithelium.	}	Mucous membrane.—Skin.—True or secreting glands.—Serous and synovial membranes.
4. Tissues which retain the primitive areolar structure as their permanent character.		Adipose tissue.—Cartilage.—Gray nervous matter.
5. Sclerous or hard tissue.		Bone.—Teeth.
6. Compound tissues.		
a. Composed of tubes of homogeneous membrane containing a peculiar substance.	}	Muscle.—Nerve.
b. Composed of white fibrous tissues and cartilage.		Fibro-cartilage.

TISSUE, ACCIDENTAL or **ADVENTITIOUS**, consists of every substance—foreign to the primitive organization of the economy, but yet organized and living—which may be developed in the anterior or at the surface of organs. Laënnec divides the accidental tissues into two sections: 1. Those that resemble others in the animal economy, or *analogous accidental tissues*; and, 2. Those that have nothing analogous in the body, and which are always the result of a morbid process—the *heterologous* or *heteroclitic accidental tissues*. To the first class belong, ossifications: accidental fibrous, fibro-cartilaginous, cartilaginous, areolar, and corneous tissues; hairs; the serous membranes of certain encysted tumours; the mucous membranes of fistulous canals, and accidental synovial membranes. To the second belong tubercles, scirrh, melanosis, &c.

TISSUE, AREOLAR, Cellular tissue.

TISSUE, CARTILAGINOUS, *Hymenochondroïdes* seu *Hymenochondroïdes* (*Textura seu Tela*.)

TISSUE, CRIBRIFORM, Cellular tissue — *t. Fibrous*, see Fibrous — *t. Filamentous*, Cellular tissue.

TISSUE, INODULAR, *Tela inodularis*, (F.) *Inodule*, *Tissu inodulaire*. A name given by Delpech to an accidental fibrous tissue developed in suppurating wounds, which is the principal agent in cicatrization. It has, at first, the appearance of a reddish cellulo-fibrous layer; but soon loses

its vascularity; and its fibres, which pass in all directions, become of a dull white colour, and of a consistence and hardness, that may be compared to those of the strongest articular ligaments. It is well seen in the cicatrix left after burns.

TISSUE, LAMINATED, Cellular tissue — *t. Ligamentous*, Desmoid tissue — *t. Mucous*, Cellular tissue — *t. Porous*, Cellular tissue — *t. Reticulated*, Cellular tissue.

TIT, Nipple.

TITHENE, Nurse.

TITHYMALUS CYPARISSA, Euphorbia cyparissias — *t. Lathyris*, Euphorbia lathyris — *t. Latifolius*, Euphorbia lathyris — *t. Palustris*, Euphorbia palustris — *t. Paralias*, Euphorbia paralias.

TITILLAMENTUM, Gargarism.

TITILLATION, Tickling.

TITTHE, Nipple.

TITTHION, Nipple.

TITTHIS, Nipple.

TITTHOS, Mamma, Nipple.

TITUBANTIA, Bredowillement.

TITUBATIO, Fidgets, Vacillatio.

TO-AND-FRO-SOUND, *Bruit de frottement*.

TOAD-FLAX, Antirrhinum linaria — *t. f. Bastard*, Comandra umbellata.

TOAST-WATER, *Aqua tostæ panis*. Toast well half a slice of a stale quartern loaf; put it into a pitcher, and pour over it a quart of water. After two hours, decant the water from the bread. It is a common drink in febrile affections.

TOBACCO, *Nicotiana tabacum* — *t. English*, *Nicotiana rustica* — *t. Indian*, *Lobelia inflata* — *t. Poison*, *Hyoscyamus niger* — *t. Wild*, *Lobelia inflata*.

TOCETOS, Parturition.

TOCODOMYCODORITIS MALIGNA VAGINALIS, Colpocæe puerperarum.

TOCOLOGY, Obstetrics.

TOCOS, Parturition.

TODDY TREE, Mamei.

TOE, *Digitus pedis*.

TOEPLITZ, see Toplitz.

TOFUS, Tophus.

TOILE D'ARAIGNEE, *Aranæa tela* — *t. Choroidienne*, see Choroid — *t. de Gaultier*, *Sparadrappum Galteri*.

TOKAS, Puerpera.

TOKOLOGY, Obstetrics.

TOLA, Tonsil.

TOLERANCE, *Tolerantia*; from *tolerare*, 'to bear.' The power of bearing. A word used by the Italian school of Rasori, to signify the power of bearing large doses of certain potent remedies, as tartrate of antimony and potassa. See Centro-stimulus.

TOLES, Tonsil.

TOLIUM, Tonsil.

TOLLES, Tonsil.

TOLLUM, Tonsil.

TOLUIF'ERA BAL'SAMUM, *Myroxylon Toluiferum*. Family, Terebinthaceæ. Ser. Syst. Decandria Monogynia. The name of the tree which affords the *Balsam of Tolu*, *Balsamum Tolutanum*, *Tolutanum*, *Tolui'era Balsami Balsamum*, *Goac'anas*, *Red Balsam of Peru*, (F.) *Baume de Tolu*, *B. de Carthagène*. It has a very fragrant odour, and warm, sweetish taste; is thick, and of a reddish-yellow colour. It is stimulant and expectorant, (?) and is used in coughs. It is chiefly, however, employed on account of its flavour.

TOLUTANUM, see Toluifera balsamum.

TOMATA, *Solanum lycopersicum*.

TOME, *Tom'us*, *τομή*, *τομή*, 'incision.' A common suffix, as in *Lithotomy*, *Bronchotomy*, &c.

TOME, Cut, Incision.

TOMEION, Knife.

TOMENTUM CEREBRI, from tomentum, 'a flock of wool.' The infinite number of small vessels which pass between the pia mater and convolutions of the brain. They enter the substance of the brain at right angles.

TOMEUS, Knife.

TOMIS, Scissors.

TOMOTOCIA, Cæsarean section.

TONE, Tonus, from τεινω, 'I stretch.' The state of tension or firmness proper to each organic tissue. It is the effect of tonicity.

TONE, Elasticity.

TONGA, see Datura sanguinea.

TONGRES, MINERAL WATERS OF. The town of Tongres is about a league from Maestricht in the Low Countries. The springs, of which there are several, are chalybeate, containing carbonates of iron and magnesia.

TONGUE, Sax. Tuno, (D.) Tong, Lingua, Glossa, Glotta, (F.) Langue. The tongue is a muscular, symmetrical, and very mobile organ; situate in the mouth, from the os hyoides and epiglottis to the incisor teeth. Its particular use is, to procure the sensation of savours; and it aids in the acts of sucking, mastication, deglutition, pronunciation, and exspuition. It has the shape of a pyramid, flattened above and below; rounded at its angles, and terminated anteriorly, by a blunt point. Its upper surface, called the *dorsum*, is free, flat, and divided into two portions by a median furrow, *lin'ea media'na*; at the posterior extremity of which is the *foramen cæcum* or *Fora'men of Morgagni*. The inferior surface is free, and covered by the mucous membrane on its anterior third and sides: but behind and in the middle it is attached to the lower jaw by means of the *genio-glossus*; and to the hyoides by the *hyoglossus*. Its margins are rounded; thick behind, thinner anteriorly. Its tip, or point, or dental extremity is rounded and free:—the root, base, or hyoid extremity, *Radix linguæ*, is continuous with the epiglottis and velum palati. It is very thick at the foramen cæcum; but thinner as it approaches the hyoid bone. The tongue is composed of muscles, and covered by a mucous membrane—*Periglottis, Involucrum linguæ, Membra'na seu Tu'nica vaginalis seu Cutis seu Epider'mis seu Tunica seu Involucrum mucosum seu Crusta villosa linguæ*—which forms also the frænum beneath the tongue. On this membrane are seen the different papillæ. The nerves of the organ proceed from the inferior maxillary, glosso-pharyngeal and hyoglossal. The first and second are connected with taste; the last with the motions of the organ. Some recent observers, however, consider the glosso-pharyngeal to be the special nerve of gustation. The arteries are the *lingual*, from the external carotid; and the *palatine* and *tonsillar*, from the labial. The veins are the *superficialis linguæ, ranina, lingualis, and submentalis*. They open into those of the pharynx and larynx. Its lymphatic vessels pass into ganglia, situate at the edge of the hyoglossi muscles.

TONGUE, BLACK. A fever which prevailed in the western States in the winter of 1842-3; probably typhoid fever. According to some, an epidemic erysipelas.

TONGUE, HERNIA OF THE, Glossocele—t. Inflammation of the, *Glossitis*—t. Red, fever, see Typhus—t. Scraper, *Cure-langue*—t. Tie, see Ankyloglossum.

TONIC, Ton'icus. Same etymon as *Tone*. Relating to tone.

Tonic, Ton'icus, Tono'nicus, Antasthen'icus, (F.) Tonique, Fortifiant, in Therapeutics, means a

medicine, which has the power of exciting slowly, and by insensible degrees, the organic actions of the different systems of the animal economy, and of augmenting their strength in a durable manner. Bitter, vegetable substances which are not associated with an acrid or narcotic principle; preparations of iron; cold water, &c., act as tonics. They are also called *Comfortan'tia, Comfortati'va, Corroboran'tia, Confirman'tia, Roboran'tia, &c.*

The following are the chief Tonics:—*Acidum Arseniosum, Acidum Nitricum, Acidum Sulphuricum, Argenti Nitras, Bismuthi Subnitras, Carbo Ligni, Cascarilla, Cinchona, Cinchonia, Colomba, Cornus Florida, Cupri Acetas, Cupri Sulphas, Cuprum ammoniatum, Cusparia, Eupatorium perfoliatum, Ferri Preparata, Gentiana, Liriodendron, Lupulina, Piperina, Prunus Virginiana, Quassia, Quinia, Salix, Salicina, Serpentaria, Zinci preparata; Aquæ minerales acidulæ et ferruginæ, Mental Tonics, (Confidence; Hope, Amusement.)*

TONIC POWER, Irritability.

TONIC SPASM, Spasmus ton'icus, Convulsio tonica, Conductio, Spas'ticus, Tonus, Ento'mia, Entasia, Enta'ria. A rigid contraction of muscles without relaxation, as in trismus, tetanus, &c. See Tetanus and Spasm.

TONICITY, Tonic'itas. The faculty that determines the general tone of the solids. Excessive tonicity causes *erethism* or *crispness*; deficient tonicity, *atony* or *weakness*. Tonicity has been used in the same sense as irritability.

TONIQUE, Tonic.

TONOS, Tonic spasm—t. Trismus, Trismus.

TONOTICUS, Tonic.

TONSIL, Tonsil'la, Amygdala, Pariak'mia, Parist'hium, Amphibranchium, Glan'dula colli, Tola, Tolles, Tolca, To'lium, Tollum, Spongia, Antia, Pl. Anti'ades, Almond of the ear, Almond of the throat, (F.) Amygdale, Tonsille. An ovoid collection of follicles, about half an inch in length, similar in shape to an almond, and situate, on each side, between the pillars of the velum palati. The inner surface, projecting into the isthmus of the throat, is covered by the mucous membrane, in which are the orifices of a dozen cells, whence a transparent, viscid mucus oozes on pressure. This mucus is destined to facilitate deglutition, by lubricating the isthmus faucium; and is forced out during the passage of the alimentary bolus.

TONSILLÆ PESTILENTES, Cyanache maligna.

TONSILLARUM GANGRÆNA, Cyanache maligna.

TONSILLE, Tonsil.

TONSILLITIC, Tonsillit'icus. Belonging or relating to the tonsils; as the 'tonsillitic branches of the glosso-pharyngeal nerve.'

TONSILLITIS, Cyanache tonsillaris.

TONSORIUS CULTER, Razor.

TOOTH, Sax. Coþ, Dens, Odous, (F.) Dent. The teeth, *Dentes, Mord'ices*, are small, hard bones, fixed in the alveoli of each jaw, and serving to lay hold of, and to cut, tear, and triturate alimentary substances. True teeth are found only in man, the mammalia, reptiles, and fish. The teeth have, in general, the shape of an irregular cone, the base of which is towards the interior of the mouth; and the apex, single or divided, towards the bottom of the alveoli. Each tooth has a part situate out of the alveoles, and covered by a vitriform substance. This part is called the *crown* or *coro'na*. It is bounded by a narrower portion, called the *cervix*, (F.) *collet*, which separates it from the portion in the alveolus—the *fang* or *root*, (F.) *racine*. In the adult, the teeth are 32 in number; 16 to each jaw:

these consist of 4 *incisors*, 2 *canine*, 4 *bicuspidati*, and 6 *molares*. (See these various terms.) The teeth enclose a vascular and nervous pulp, in a central cavity, *Cavitas Pulpa*, *Cavum Dentis*, *Antrum dentale*. They are formed of a very hard, compact tissue; and the corona is covered by a vitreous substance called *Enamel*. The incisor and canine teeth are developed by a single point of ossification; the lesser molares, by two; and the larger, by four or five. See *Dentition*. Researches by Retzius, Müller and others, have led them to believe that the ivory of the tooth or *Dentine*, *Substantia ossea* of Malpighi, *proper tooth substance, bone of the tooth, osseous substance of tooth, tooth bone*, consists of tubular fibres, which contain organic deposits of calcareous salts; and of intertubular substance, in which are observed corpuscles or osseous cells of the tooth, called by Professor Owen *calcigerous cells*, which also contain earthy salts. At the part where the enamel terminates at the cervix of the tooth, the *crusta petrosa*, *cementum* or *cortical substance*, commences in an extremely thin stratum, passes down and gradually increases in thickness towards the extremity of the root, where it is generally the thickest. It is said by Nasmyth to have been traced on the enamel, and Purkinje and Fränkel thought that it lined the *cavitas pulpæ*. They gave it the name *Substantia osteoidea*. It is the *material tartaræ* of Malpighi. It has been found, however, that the hard substance deposited on the inner surface of the dentine, at the age of twenty years or later, and which encroaches on the cavity, has a distinct structure from the cement, and resembles in part dentine, and in part bone. It is the *horny substance* of Blumenbach, the *osteodentine* of Owen, and the *secondary dentine* of Tomes. In the compound teeth of the herbivorous animal, a deposition is found on the surface of the enamel, which has been called *cementum*. Müller, however, regards it to be a deposit from the salts and the saliva, and to be essentially the same as what is called tartar in the human subject.

TOOTH-ACH, *Odontalgia*—t. Bone, see *Tooth*—t. Bush, *Xanthoxylum fraxineum*—t. Tree, *Aralia spinosa*, *Xanthoxylum clava Herculis*.

TOOTH EDGE, *Agacement des dents*, *Hæmodia*—t. Paste, *Dentifricium*—t. Rash, *Strophulus*—t. Shell, dog-like, *Dentalium*.

TOPHACEOUS CONCRETION, *Tophus*.

TOPHUS, *Tofus*, *Osteocephalus*, *Tophæceous Concretion*. A collection of hard, calcareous matter, which forms, particularly, at the surface of joints affected with gout; (see *Calculi*, *arthritic*), and occasionally, in the interior of organs, around the teeth, &c. It likewise meant gravel and chalaza.

TOPIC, *Topical*, *Topicus*. A local application; (F.) *Topique*. See *Local*.

TOPICUS, *Local*.

TOPINARIA, *Talpa*.

TOPIQUE, *Topic*.

TÖPLITZ or TEPLITZ, MINERAL WATERS OF. Töpfitz is a town of Bohemia, celebrated for its numerous thermal springs. The water contains chloride of sodium, carbonate, and sulphate of soda; and carbonates of lime and iron, &c. Temp. 114° to 122° Fahr.

TOPLITZ, *Töpfitz*.

TOPOGRAPHICAL ANATOMY, see *Anatomy*.

TORCULAR, *Tourniquet*.

TORCULAR HEROPH'ILL, *The Press of Herophyllus*, *Lechenion*, *Lenon*, *Lenum*, *Fourth Sinus*, (F.) *Confluent des Sinus*, *Pressoir d'Hérophile*. A smooth and polished cavity, of irregular shape, in which several sinuses of the dura mater meet.

It is situated before the internal occipital protuberance, at the union of the three great duplicatures of the dura mater. It has six openings into it:—one above, that of the superior longitudinal sinus; two below, answering to the occipital sinuses; one anterior, belonging to the straight sinus; and two lateral, and very broad, which lead into the lateral sinuses; and convey from the cavity the blood that has been poured into it by the others.

TORCULUM, *Tourniquet*.

TORDYLIUM, *T. Officinale*, *Seculi Creticum* seu *Montanum*, (F.) *Séseli de Crète*. *Family*, *Umbelliferae*. *Sex. Syst.* *Pentandria Digynia*. The seeds and roots of this Southern European plant are considered carminative and diuretic. They enter into the theriaca.

TORONIA ASIATICA, *Cela-dolo*. A small Malabar plant, the juice of whose leaves, sweetened with sugar, is said to cure gonorrhœa.

TORMENTIL, *Geranium maculatum*, *Tormentilla*.

TORMENTIL'LA, *T. erecta* seu *sylvestris* seu *officina'lis* seu *tuberosa*, *Fragaria tormentilla officina'lis*, *Potentilla tormentilla*, *Common Tormentil*, *Upright Sepsfoil*, *Heptaphyllum*, *Convolvula rubra*, (F.) *Tormentille*. *Family*, *Rosaceæ*. *Sex. Syst.* *Icosandria Polygynia*. The root has a slightly aromatic odour; and austere, styptic taste. It is astringent. Dose, of the powder, gr. x to ℥j.

TORMENTUM, *Plcus*, *Intussusceptio*.

TORMINA, *Strophos*, *Catall'gia*, *Encatall'gia*, *Anile'ma*, *Anile'sis*, *Gripes*, *Multigrubs*, (F.) *Tranchées*. Acute colicky pains. *Dysentery*.

TORMINA CELSI, *Dysentery*—t. *Parturientium*, *Pains*, *labour*—t. *Post partum*, see *Pains*, *labour*.

TORNACULUM, *Tourniquet*.

TOROSITAS, *Corpulentia carno'sa*, *Habitus athlet'icus*. Muscular strength; from *torosus*, 'brawny,'—*tori*, 'brawn.'

TOROSUS, *Muscular*.

TORPEDO, *Narcosis*.

TORPEFACTIO UNIVERSALIS, *Holnarcosis*.

TORPID, *Torpidus*, (F.) *Engourdi*; from *torpeo*, 'I am benumbed.' Numb. Incapable of exertion and of feeling. Dull, stupid, inactive.

TORPIDITAS, *Torpor*.

TORPIDUS, *Narcotized*, *Torpid*.

TORPOR, *Torpiditas*, *Noth'rotes*, *Parap'isie experts*, (F.) *Engourdissement*, from *torpere*, 'to be numbed.' State of a part which becomes numb, and almost incapable of motion. *Torpor*, *Torpidity*, *Torpidness*, *Torpidude* are also applied to a debilitated, sluggish condition of a part or of the whole of the body; *Aërgia*, (F.) *Accablement*.

TORPOR, *Narcosis*—t. of the *Colon*, see *Colon*, *torpor* of the—t. *Intestinorum*, *Constipation*—t. *Soporificus*, *Nocar*.

TORQUAY. A town in Devonshire, England, which, on account of the mildness of its climate, and its sheltered situation from the bleaker winds, is a frequent retreat for the phthisical invalid.

TOR'SION, *Torsio*. The act of twisting. Torsion of the extremities of bleeding vessels, *Angio'trophé*, until the blood ceases to flow, is sometimes used to arrest hemorrhage from divided vessels.

TORTELE, *Erysimum*.

TORTICOLLIS, *Obstip'itas*, *Caput obstipum*, *Obstipa cervix*, *Obstip'itas capitis* seu *Colli*, *Collum obstipum*, *Trachel'agra*, *Enta'sia Loxia*, *Lox'ias*, *Cephalox'ia*, *Ancylode're*, *Ancylode'ria*, *Rhabdoerna*, *Auchenorrh'euma*, *Rheumatismus colli*, *Rh. Cervic'is*, *Stiffneck*, *Wryneck*; from *torquere*, *tortum*, 'to twist,' and *collum*, 'the neck.'

A variety of rheumatism, seated in the muscles of the neck, which prevents the motion of the head, and causes the patient to hold it inclined to the side affected. It is, commonly, of short duration; usually disappearing in a few days. Bube-faciants are the best topical applications. The term is also applied to permanent contraction of the muscles of the neck, which causes the head to be held to one side. The remedy is the division of the contracted muscles.

TORTOISE, FRESHWATER, GREAT, *Hydraspis expansa*.

TORTUE, Testudo.

TORTURA ORIS, Canine laugh, Neuralgia faciei—*t. Oris paralytica* Linnæi, Paralysis, Bell's.

TORULA CEREVISIÆ, *Saccharomyces seu Mycoderma cerevisia*, *Cryptococcus fermentum*, Yeast plant. One of the simplest forms of vegetation, capable, under favourable circumstances, of vegetating rapidly, and assisting in producing the fermentation of saccharine substances. The plant has been found in vomited fluids, and in *æscæ*.

TORULUS GLANDIS, Crown of the glans.

TORUS, Muscle—*t. Manûs*, Metacarpus.

TOTA BONA, *Chenopodium bonus Henricus*.

TOTUM CARNOSUM, Pancreas.

TOUCH, *Tactus*, *Tactio*, *Hapthê*, *Hapsis*, *Tactio*, *Palpatio*, (*F.*) *Toucher*. One of the five senses, and that which makes known to us the palpable qualities of bodies, such as their consistence, quality, &c. It is seated, particularly, in the hands; and differs from tact in being active.

TOUCH-ME-NOT, *Impatiens fulva*.

TOUCH, ROYAL. It was at one time almost universally believed, in England, that the royal touch would remove *Scrofula* or *King's Evil*, (as it was thence called.) This superstition is now entirely exploded. Edward, the Confessor, was the first English king who touched for the Evil.

TOUCHER, *Esaphe*, Touch.

TOUCHWOOD, *Boletus ignarius*.

TOUR DE MAÎTRE, *Coup de maître*.

TOURBILLON VASCULAIRE, *Vasa vasorum*.

TOURNESOL, *Heliotropium Europæum*.

TOURNIOLE, Paronychia.

TOURNIQUET, *Torcular*, *Torculum*, *Toraculum*, *Prælium*, *Prælium*, *Prælium* seu *Prælium arteriale*, *Verticillium*, *Fascia torquitis*, from (*F.*) *tourner*, 'to turn.' A surgical instrument for stopping the course of blood in the limbs, by exerting a strong compression upon the principal artery. It was invented by a French surgeon, Morel, in the middle of the 17th century; and was modified subsequently, by Nuck, Verduc, Monro, Petit, and Louis. It is used to suspend, for a time, the circulation in a limb, during great operations; to arrest arterial hemorrhage in cases of wounds; to compress certain aneurismal and other tumours, &c.

TOUS-LES-MOIS, *Amylum canna'centm*. A fecula obtained from the root of *Canna coccin'ea*. It resembles potato starch, and may be substituted for arrow-root. It is obtained from St. Kitts.

TOUTE BONNE, *Salvia sclarea*.

TOUTE ÉPICE, see *Myrtus pimenta*—*t. Saine*, *Sanicula*.

TOUX, Tussis—*t. Blene*, Pertussis—*t. Bronchique*, Bronchial cough, Cough, tubal—*t. Cavernuse*, see Cavernous respiration—*t. Convulsive*, Pertussis—*t. Quinteuse*, Pertussis—*t. Tubaire*, Bronchial cough, Cough, tubal.

TOXICÆMIA, Toxicohæmia.

TOXICAL, Poisonous.

TOXICATIO, Poisoning.

TOXICODENDRON, *Rhus toxicodendron*.

TOXICOHÆMIA, *Toxicohæmia*, from *toxicon*, 'a poison,' and *hæma*, 'blood.' Poisoning of the blood.—Piorry.

TOXICOL'OGY, *Toxicolog'ia*, from *toxicon*, (itself from *toxos*, 'a bow,') 'a poison,' and *logos*, 'a description.' A treatise on poisons.

TOXICO'SES, (*G.*) *Toxikosen*, from *toxicon*, 'a poison.' A family of diseases, according to the classification of Fuchs, caused by the reception of poisons into the system.

TOXICUM, Poison, Venom.

TRABECULA CEREBRI, *Corpus callosum*—*t. Cordis*, *Columnæ carnea*.

TRABECULÆ SPLENIS, see Spleen—*t. Willisii*, *Chordæ Willisii*.

TRABES CORDIS, *Columnæ carnea*.

TRABS, Penis—*t. Cerebri*, *Corpus callosum*—*t. Medullaris*, *Corpus callosum*.

TRACE, PRIMITIVE, Groove, primitive.

TRACHE'A, (generally, however, accented *Trachea*), *Trachea arteria*, *Bronchæ*, *Aspera arteria*, *Fistula spiritalia*, *F. pulmonalis*, *Canna*, *Syringa*, *Syrinx*; the *Windpipe*, *Throat*, (*F.*) *Trachée artère*, from *traxos*, 'rough,' and *artrios*, 'artery,' composed of *æpæ*, 'air,' and *traxos*, 'to keep.' The trachea is a cylindrical, fibro-cartilaginous and membranous tube, flattened behind, and situate on the median line, before the vertebral column, from the inferior part of the larynx, as far as the third dorsal vertebra. There it divides into two branches, the *bronchæ*, which separate to go to each lung. The trachea, the function of which is to convey air to the lungs during respiration, is composed, 1. Of cartilaginous rings, *Anuli cartilaginei*, *Segmenta cartilaginea*, *Orbes cartilaginei*, incomplete behind; situate one above the other, and kept in situ by a fibrous membrane. 2. Of a mucous membrane, which lines it internally, and contains numerous mucous follicles. 3. Of transverse muscular fibres, not well-marked, which occupy its posterior surface. 4. Of vessels, which proceed from the superior and inferior thyroidal; and, 5. Of nerves, that are given off by the pneumogastric and the cervical ganglia. The breathing tubes of insects are termed *Trachææ*.

TRACHEA ARTERIA, Trachea.

TRACHEÆ, see Trachea.

TRACHEAL, *Trachealis*. Appertaining to the trachea. An epithet applied to respiration as heard through the stethoscope opposite the trachea, larynx, and root of the bronchæ: the air appearing as if sucked in from the cylinder during inspiration, and expelled during expiration.

TRACHEAL GLANDS. Mucous follicles on the posterior surface of the trachea. They are small, flattened ovoid bodies.

TRACHÉE ARTÈRE, Trachea.

TRACHEITIS, Cynanche trachealis.

TRACHELAGRA, Torticollis.

TRACHELIAN, Cervical.

TRACHELISM'US, from *traxelos*, 'the neck.'

A term proposed by Dr. Marshall Hall, for a fancied spasmodic action of the muscles of the neck, which he esteems to be the cause of many morbid phenomena, by inducing compression of the veins of the neck and an impeded return of blood from the head.

TRACHELITIS, Cynanche trachealis.

TRACHELIUM AMERICANUM, *Lobelia cardinalis*.

TRACHÉLO-ATLOIDO-OCCIPITAL, *Ovulus superior capitis*—*t. Atloido-basilare*, *Rectus capitis lateralis*—*t. Basilare*, *Rectus capitis in-*

ternus major — *t. Basilaire, petit, Rectus capitis internus minor.*

TRACHE'LO-DIAPHRAGMAT'IC, *Trachelo-diaphragmaticus*. The fourth pair of cervical nerves, whence the phrenic nerve chiefly arises. — *Chaussier.*

TRACHÉLO-MASTOÏDIEN, Complexus minor — *t. Occipital, Complexus* — *t. Phyma, Bronchocele* — *t. Scapulaire, Levator scapulae.*

TRACHELOS, Collum.

TRACHEOCELE, Bronchocele.

TRACHEOPHONY, Laryngophony.

TRACHEOPHTHISIS, see Phthisis laryngea.

TRACHEORRHAG'IA, *Hæmoptoë* seu *Hæmoptysis laryngea et trachealis*, from *τραχεια*, 'the trachea,' and *ρρυωμι*, 'to break forth.' Hæmorrhage from the trachea.

TRACHEOSTENOS'IS, from *τραχεια*, 'the trachea,' and *στενωσις*, 'contraction.' Contraction or narrowness of the trachea.

TRACHEOTOMY, see Bronchotomy.

TRACHITIS, Cynanche trachealis.

TRACHO'MA, *Aspre'do*, from *τραχος*, 'rough,' *Gran'ular conjunctiva, Gran'ular eyelid*, (F.) *Asperité des Paupières*. A roughness of the inner surface of the eyelids; granular eyelids. A variety of ophthalmia, of which three kinds have been designated: — *T. sabulo'sum*, from sand, &c., getting between the eyelids; *T. carunculo'sum*, *Phadaro'sis, Phadaro'sis, Morum pal'pebræ inter'næ*, from fleshy excrescences; and *T. herpet'iosum*, from hard pustules on the inner surface of the eyelids. This last is, also, called *Fico'sis*, and *Pal'pebra fico'sa*.

TRACT, OPTIC, see Optic nerves — *t. Respiratory*, see Respiratory tract.

TRACTATIO MANUARIA, Surgery.

TRACTORATION, Perkinism, see Tractors, metallic.

TRACTORS, METAL'LIC. Metallic agents, introduced by Dr. Elisha Perkins, of Connecticut, about the end of the last century, to cure diseases. The parts were rubbed with these tractors, and hundreds of thousands of cases were reported to have been cured by the *Tractoration*. The affections, in which they were chiefly used, were local inflammations, and pains in different parts. The good effects were, doubtless, owing to the influence exerted by the mind over the body. The bubble did not exist long. See Perkinism.

TRACTUS INTESTINORUM, Intestinal Tube — *t. Opticus*, see Optic nerves — *t. Respiratorius*, Respiratory tract.

TRACTUS SPIRA'LIS FORAMINULEN'TUS. Minute openings at the base of the modiolus, arranged in a spiral manner, which transmit the filaments of the cochlear nerve. The central canal of the Tractus is longer than the rest, and is called *Tu'bulus centralis mod'iali*.

TRADESCANTIA VIRGIN'ICA, *Spider-wort*; indigenous; *Order*, Commelynaceæ; flowering from May to August. The roots are demulcent.

TRAGACAN'THA, *Gummi Tragacantha, G. Astragal'is Tragacantha, Gum Tragacanth, Gum Dragon*. The concrete juice of the *Astragalus Tragacantha* or *Astragalus Verus*, a native of Persia. *Family*, Leguminosæ. *Sex. Syst.* Diadelphica Decandria. (F.) *Gomme Adragant, Adragant*. This gum is inodorous; nearly insipid; of a whitish colour; semi-transparent, and striated. It is in thin, vermiform pieces; and does not form a smooth, uniform mucilage with water. It is demulcent, but is rarely used alone.

TRAGEA AROMATICA, Pulvis cinnamomi compositus.

TRAG'ICUS, *Tragien* (Ch.), from *Tragus*. A small, flat, triangular muscle which almost wholly covers the outer surface of the tragus, arising from its base, and terminating at the top of the eminence.

TRAGIEN, *Tragicus*.

TRAGOMASCHA'LIA, *Tragomas'chali*, from *τραγος*, 'a goat,' and *μασχλη*, 'axilla.' The strong, unpleasant odour of the armpits.

TRAGOPHONIA, Egophony.

TRAGOPO'GON, *Barba hirci*, from *τραγος*, 'a goat,' and *ρωγω*, 'beard.' A genus of plants; *Family*, Cichoraceæ. *Sex. Syst.* Syngenesia Polygamia Æqualis. (F.) *Barbe de Bouc*; of which the roots of the *Tragopogon porrifol'ium, Saleisi, Oyster-root*, and the young shoots of the *T. pratens'is, Meadow Saleisi, Common Goat's Beard*, (F.) *Salaisi des prés*, are eaten as food. The root of the latter has been used as a diuretic.

TRAGOSELINUM, *Pimpinella saxifraga* — *t. Angelica, Ligusticum podograria* — *t. Magnum, Pimpinella magna* — *t. Majus, Pimpinella magna* — *t. Saxifraga, Pimpinella magna*.

TRAGUS, *τραγος*, 'a goat,' from its being furnished, in some persons, with hair, like the beard of a goat. *Hircus, Hircus*. A small, flattened, triangular nipple, situated before the meatus auditorius externus, which it appears to conceal. It is covered with hair in old people, whence its name. Also, the peculiar goat-like smell of the axillæ.

TRAGUS MATTHIOLI, *Salsola kali*.

TRAINANSE, *Polygonum aviculare*.

TRAMIS, Perinæum.

TRANÇE, Catalepsy, Ecstasis.

TRANÇÉES, *Tormina* — *t. Uterines, Pains*, after.

TRANSFIGURATIO, Transformation.

TRANSFORMA'TION, *Transforma'tio, Transfigura'tio, Transmuta'tio, Metab'olè*, from *trans*, 'beyond,' and *forma*, 'form.' Change of form.

TRANSFORMATIONS DE TISSU, (F.) The French pathologists designate thus the change that occurs in an organ, the tissue of which becomes similar to that of another organ. The chief transformations are cartilaginous, osseous, and adipous. See Tissue.

TRANSFU'SION, *Transfusio*, from *transfundere* (*trans*, and *fundere*, 'to pour'), 'to pour from one vessel into another.' *Transfusio San'guinis, Cura Medea'na, Methamachym'ia, Hamatometach'ysis, Hamometach'ysis, Diach'ysis, Transplanta'tio med'ica nova, Ohirur'gia transfusoria, Exotichamato'sis*. The act of passing the blood of one animal into the veins of another; an operation which was formerly used to fulfil various therapeutical intentions. It has been revived in cases of uterine hemorrhage; and, apparently, with some success.

The operation can only be performed safely on animals having like kinds of blood. See Globule.

TRANSLATION, Metastasis.

TRANSMUTATIO, Transformation.

TRANSPIRA'TIO, Perspiration — *t. Unilatera, Hemidiaphoresis*.

TRANSPLANTA'TIO, *Metaphyte'ia*. A pretended method of curing diseases, devised by Paracelsus — by making them pass from one individual to another, either animal or vegetable.

TRANSPLANTATIO, *Morioplastice* — *t. Medica nova, Transfusion*.

TRANSPLANTA'TIO DENTIS, *Insi'tio dentis*. The act of transplanting a tooth from one person to another.

TRANSPORT, Delirium.

TRANSPOSITIO, *Metathesis*.

TRANSPOSIT'ION, *Transpositio*, from *trans*, 'over,' and *ponere*, 'to put.' *Metath'esis*. Change of situation.

TRANSPOSITION OF THE VISCERA, *Polype'ria promiscua translati'va*, *Intus inver'sus*, is a congenital vice of conformation, which consists in the viscera being found out of the situations they ordinarily occupy: the heart, for example, being on the right side; the liver on the left, &c.

TRANSUDATIO, *Diapedesis*.

TRANSUDATION, *Transuda'tio*, from *trans*, 'through,' and *sudare*, *sudatum*, 'to sweat.' The passage of a fluid through the tissue of any organ, which may collect in small drops on the opposite surface, or evaporate from it.

TRANSUDATION, *Exosmose*.

TRANSVERSAIRE ÉPINEUX, *Transversalis dorsi*—*t. Épineux du cou*, *Semispinalis colli*—*t. Grêle*, see *Sacro-lumbalis*—*t. Épineux du dos*, *Semi-spinatus dorsi*.

TRANSVERSAL DE LA CONQUE, *Transversalis auris*—*t. du Nez*, *Compressor nasi*—*t. des Orteils*, *Transversus pedis*.

TRANSVERSALIS, *Transverse*.

TRANSVERSA'LIIS ABDOM'INIS, (F.) *Lombo-abdominal*, (Ch.) *Transverse de l'Abdomen*. This muscle is seated, deeply, on the lateral parts of the abdomen. It is flat, thin, and broader before than behind. It is attached, above, to the cartilage of the last true rib, and to those of every false rib; and, below, to the inner lip of the crista of the ilium; to the two outer thirds of the crural arch, and to the upper part of the pubis. Its fibres, moreover, are inserted, behind, by means of broad aponeuroses, into the top of the transverse and spinous processes of the first four lumbar vertebrae; and, before, into the linea alba, and the ensiform cartilage. This muscle, all of whose fibres have a transverse direction, constricts the belly, and diminishes the base of the chest, by drawing inwards the ribs to which it is attached.

TRANSVERSALIS ANTICUS PRIMUS, *Rectus capitis lateralis*—*t. Collateralis colli*, see *Sacro-lumbalis*.

TRANSVERSA'LIIS COLLI, *Transversalis Major colli*, *Portion of the Sacro-spinal* (Ch.), (F.) *Transversaire*. A muscle, seated at the posterior and lateral part of the neck and upper part of the back. It is attached to the transverse processes of the five or six lowest vertebrae of the neck; and to those of the four or five first dorsal. It extends the vertebrae of the neck, and inclines them to its side.

TRANSVERSALIS COLLI, *Semi-spinalis colli*.

TRANSVERSALIS DORSI, *Transverso-spinalis*, *Multifidus Spinae*, *Lumbo-cervical portion of the Spinal* (Ch.), (*Transverso-spinalis Lumborum*, *Transverso-spinalis Dorsi*, *Transverso-spinalis Colli*.) *Musculus sacer*, *Spinales et transversales lumborum*, *Semi-spinalis internus sive Transverso-spinalis colli pars interna* (Winslow), *Lombodorsi-spinal*, &c., (F.) *Transversaire épineux*. This muscle, usually called, by English anatomists, *Multifidus spinae*, and including all the *transverso-spinales*, is situate in the vertebral gutters, extending from the posterior part of the sacrum to the second cervical vertebrae. It is thicker in the neck and loins than in the back and behind the sacrum. Its use is—to straighten the vertebral column, and to impress upon it a slight rotary motion.

TRANSVERSALIS NASI, *Compressor nasæ*.

TRANSVERSARIUS, *Transverse*.

TRANSVERSE, *Transver'sus*, *Transversalis*, *Transverso'rius*, from *trans*, 'over,' and *vertere*, 'to turn.' That which runs across: also, that

which relates to the transverse processes of the vertebrae.

TRANSVERSE ARTERY OF THE FACE, arises from the temporal; passes transversely across the face, in front of the condyle of the lower jaw, and gives its branches to the different muscles of the cheek.

TRANSVERSE FISSURE, see *Liver*—*t. Ligament of the Atlas*, *Annular ligament*.

TRANSVERSE PERINEAL ARTERY, *Urethro-bulbar* (Ch.), is given off from the upper branch of the internal pudic; and passes inwards and forwards above the *transversus perinæi* muscle, as far as the bulb of the urethra, into which it dips, subdividing into numerous branches.

TRANSVERSE PROC'ESSES OF THE VERTEBRÆ, *Diapophyses*, of Owen, (F.) *Apophyses transverses des vertebrae*, are the bony eminences that jut out transversely and posteriorly from the sides of the vertebrae.

TRANSVERSE SUTURE, *Sutu'ra transversalis*, runs across the face, and sinks into the orbit; joining the bones of the skull to those of the face, but with so many irregularities and interruptions, that it can scarcely be recognised as a suture.

TRANSVERSE DE L'ABDOMEN, *Transversalis abdominis*—*t. de l'Oricule*, *Transversus auris*—*t. du Périnée*, *Transversus perinæi*.

TRANSVERSO-SPINAL, *Semi-spinalis colli*, *Semi-spinalis dorsi*—*t. Spinalis*, *Transversalis dorsi*—*t. Spinalis colli*, *Semi-spinalis colli*—*t. Spinalis dorsi*, *Semi-spinalis dorsi*.

TRANSVER'SUS AURIS, *Transver'sus Auriculæ*, (F.) *Transverse de l'Oricule* (Ch.), *Transversal de la Conque*, is often wanting. It is formed of some transverse fibres, situate transversely, behind the projection of the helix which divides the concha into two portions.

TRANSVERSUS PEDIS, *Scandula'rius*, (F.) *Transversal des Orteils*, *Métatarso-sous-phalangien transversal du premier orteil* (Chaussier). A muscle, which arises by fleshy slips from the heads of the metatarsal bones of the three outer toes. Its tendon is inserted into the base of the first phalanx of the great toe, being blended with that of the adductor pollicis.

TRANSVERSUS PERINÆI, *Leva'tor Ani parvus*, *Ischio-perineal* (Ch.), (F.) *Transverse du Périnée*, is placed at the posterior part of the perinæum. It is thin, triangular, and situate transversely. Its external extremity is attached to the ramus and tuberosity of the ischium: its inner extremity is confounded with its fellow of the opposite side, and with the anterior part of the sphincter ani and posterior part of the bulbo-cavernosus. The use of this muscle is,—to compress the urethra, and to support the rectum and bladder. To a fasciculus of this muscle, Santorini has given the name *Ure'thræ Eleva'tor seu Ejacula'tor*.

TRANSVERSUS PERINÆI ALTER, *Prostat'icus inferior*. A small muscle which occasionally accompanies the last.

TRAPA NATANS, (F.) *Macre flottante*, *Noix d'Eau*, *Chataigne d'Eau*. *Sex. Syst.* *Tetrandria Monogynia*. The plant which affords the *Nuxes Aquaticæ*, *Trib'ulis aquaticæ*, *Callitrops*. The nut is considered nutrient and demulcent, and is said to be useful in diarrhœa from abrasion of the bowels, and in calculus. A poultice is sometimes made of it to discuss hard and indolent tumours.

TRAPÈZE, *Trapezium*, *Trapezium*.

TRAPEZIUM OS, *ρραιζιον*. So called from its shape. *Os multan'gulum majus*, (F.) *Os trapèze*. The first bone of the second row of the carpus. It is articulated, above, with the scaphoides; below, with the first bone of the meta-

carpus; within, with the trapesoides, and second metacarpal bone. Anteriorly, posteriorly, and externally, it gives attachment to ligaments.

TRAPEZIUS, *Cucullaris*, (F.) *Dorso-acromiæ* (Ch.), *Trapèze*, *Capuchon*. A muscle, seated at the posterior part of the neck and shoulder, and at the upper part of the back. It has the shape of a trapezium; is attached, on the one hand, to the inner third of the upper curved line of the occipital bone; to the posterior cervical ligament; to the spinous process of the 7th cervical vertebra; and to those of all the dorsal vertebra; and, on the other hand, to the spine of the scapula; the acromion and the outer third of the posterior margin of the clavicle. Its upper fibres are situate obliquely downwards and outwards; the transversæ and inferior, obliquely outwards and inwards. This muscle elevates the shoulder; carries it backwards, or depresses it, according as its upper, middle, or lower fibres contract separately. It straightens the head, also, and inclines it to one side.

TRAPEZOID LIGAMENT. The anterior part of the coraco-clavicular ligament. It is a very strong, fibrous fasciculus, which has the shape of a trapezium, and is situate obliquely, between the acromion process and clavicle.

TRAPEZOIDES, OS, *Os multan'gulum minus*, *Os pyramidalis carpi*, from *τραπέζιον*, 'a trapezium,' and *ados*, 'shape or resemblance.' The second bone of the second row of the carpus,—so called from its shape. It is smaller than the trapezium, on the inside of which it is situate. It is articulated, above, with the os naviculare; below, with the second metacarpal bone; on the outside, with the trapezium; and internally, with the magnum. Anteriorly and posteriorly, it affords attachment to ligaments.

TRAUBENOUR, Grape cure.

TRAULISMUS, see Balbuties and Blæssitas.

TRAULOTES, see Blæssitas.

TRAUMA, Wound.

TRAUMATIC, *Traumat'icus*, *Vulnerari'us*, *Vul'nery*; from *τραῦμα*, 'a wound.' Any thing relating to a wound.

TRAUMATICA, Detergents, Vulneraries.

TRAUMATICUS, Traumatic, Vulnerary.

TRAUMATOPYRA, *Febris traumat'ica*; from *τραῦμα*, 'a wound,' and *πυρ*, 'fire.' A wound fever, or fever consecutive to a wound.

TRAVAIL, Parturition.

TRAVAIL D'ENFANT, Parturition.

TRAVELLER'S JOY, *Clematis vitalba*.

TREACLE, *Melasses*, *Theriaca*—t. English, *Teucrium chamædryd*—t. Venice, *Theriaca*.

TREAD, *Cicatricula*—t. of the Cock, *Molecule*.

TREE, ELK, *Andromeda arborea*—t. of Life, *Thuya occidentalis*—t. Sour, *Andromeda arborea*.

TREFFLE D'EAU, *Menyanthes trifoliata*.

TREFOIL, *Hepatica triloba*—t. Bean, stinking, *Anagyris*—t. Marsh, *Menyanthes verna*—t. Sour, *Oxalis acetosella*—t. Shrubby, *Petela trifoliata*—t. Water, *Menyanthes trifoliata*.

TREMA, Foramen.

TREMBLEMENT, Tremor—t. *Métallique*, see Tremor.

TREMBLES, Milk-sickness.

TREMBLING, Tremor.

TREMELLA AURICULA, *Peziza auricula*.

TREMOR, *Trepida'tio*, *Syn'clonus* Tremor, *Tromo-spasmus*, *Tromus*, *Trembling*, (F.) *Tremblement*, from *tremere*, 'to tremble.' Involuntary agitation of the body, or of some part of it, without any obstacle to voluntary motion. It depends, generally, upon debility of the muscular, or of the nervous system; and, hence, is observed in convalescence, and in typhoid affec-

tions. It occurs, also, in old people; in hard drinkers; workers in mercury, lead, &c.: in the last case, it is called by the French, *Tremblement métallique*, *Tremor metal'ticus*. Tremor seems to resemble paralysis more than convulsion. See *Paralysis agitans* and *Pavitiatio*.

TREMOR CORDIS, *Hippus*, *Palpitation*—t. *Metallicus*, see Tremor—t. *Purring*, *Frémissement cataire*.

TREPAN, *Trep'anum*, *Terebell'a*, *Trip'anon*, *Pereter'ium*, *Peretor'ium*, *Serra versat'ilis*, *Chæn'icia*, *Chænic'ion*, *Ter'ebra*, *Ter'etron*, *Tere'trium*, *Vertib'ulum*, *Try'panon*, (F.) *Trépan*, from *τρῦσαι*, 'I perforate.' A surgical instrument resembling a wimble, and worked in the same manner. It is used for removing portions of bone, and particularly of the bones of the skull. The term *trepán* is given more particularly to the part of the instrument that makes the perforation. The handle is so constructed as to receive different bits, as the Crown, the *Trépan perforatif* or *Perite'rión*, the *T. exfoliatif* or *Desquamato'rium trep'anum*, and the *T. abaptie'ta*.

In Great Britain and the United States, this instrument has been superseded by the trephine, which is more manageable.

TREPANATIO, Trepanning.

TREPANATION, Trepanning.

TREPAN'NING, *Terebra'tio*, *Anatre'sis*, *Cephalotripe'sis*, *Trepána'tio*, *Trype'sis*, *Tresis*, *Pris'is*, *Prismus*, *Fora'tio*, (F.) *Trépanation*. Same etymon as Trepan. The methodical application of the trepan.

TREPANON, Trepan.

TREPANUM, Trepan.

TREPHINE. The instrument which has replaced the trepan in some countries. It consists of a simple, cylindrical saw; with a handle placed transversely like that of a gimlet, and from the centre of the circle, described by the teeth of the saw, a sharp little perforator projects, called the *Centre-pin*. The centre-pin is capable of being removed, at the surgeon's option, by means of a key for the purpose. It is used to fix the instrument until the teeth of the saw have made a circular groove, sufficiently deep for it to work steadily. The pin must then be removed. Sometimes the pin is made to slide up and down, and to be fixed in any position, by means of a screw.

TREPHOUSA, Nurse.

TREPIDATIO, Tremor—t. *Cordis*, *Cardiotromus*.

TREPON'DO. A weight of three pounds.—*Scribonius*.

TRE'SIS, *τρῦσις*, from *τρῦσαι*, 'I bore.' Properly, a perforation. A wound. A forcible solution of continuity in a soft part, commencing externally. A genus in the nosology of Good.

TRESIS, Trepanning, Wound—t. *Causis*, *Burn*—t. *Punctura*, *Puncture*—t. *Vulnus*, *Wound*—t. *Vulnus laceratum*, see *Laceration*—t. *Vulnus simplex*, *Cut*.

TRESSAILLEMENT, Shuddering.

TRESSO'RIA, *Episi'on*, *επισσιον*. A term formerly applied to the hair covering the mons veneris, the absence of which has, by the vulgar, been esteemed a matter of reproach.

TRI, *τρι*, in composition, 'three.' Hence:

TRIANGLE MÉDULLAIRE, *Fornix*.

TRIANGLE, VESICAL, see *Urinary Bladder*.

TRIANGULAR, *Trigo'nos*, *Triangula'ris*, from *tris*, for *tres*, 'three,' and *angulus*, 'an angle.' That which has three angles.

TRIANGULAR LIGAMENT or INFRA-PUBIAN is a ligamentous fascia with short fibres, situate transversely beneath the symphysis pubis, which it strengthens.

TRIANGULARIS, Depressor anguli oris—t. Coccygia, Coccygeus—t. Nasi, Compressor naris.

TRIANGULA'RIS STERNI, *Sterno-costal* (Ch.), *Pectoralis internus*. A muscle situate at the anterior and inner part of the chest, behind the cartilages of the ribs. It has the shape of a lengthened triangle, the base of which is directed downwards. It is attached to the posterior, lateral, and inferior part of the sternum, whence its fibres pass upwards and outwards, and terminate by as many distinct digitations at the cartilages of the 3d, 4th, 5th, and 6th true ribs. This muscle depresses the ribs and contributes to expiration.

TRIBAS, (F.) *Tribade*, from *tribus*, 'I rub,' *Fricatrix*, *Frica'trix*, *Futu'tor*, *Mas'cula*, *Subagita'trix*, *Subiga'tor*. A female whose clitoris is so large as to cause her to be regarded as an hermaphrodite. One who acts as a male with another female.

TRIBULI AQUATICI, see *Trapa natans*.

TRIBUTUM LUNARE, Menses—t. Menstruum, Menses.

TRICE, Plica—t. Incuborum, Plica—t. Scroforum, Plica.

TRICAGO, *Teucrium chamaedrys*.

TRICAUDALIS, *Retrahens auris*.

TRICEPS, from *tris* for *tres*, 'three,' and *caput*, 'head.' A name given to muscles that have three fleshy bundles at one of their extremities.

TRICEPS ADDUC'TOR FEM'ORIS. Under this appellation are comprehended three distinct muscles; *Adductor brevis*, *A. longus*, and *A. magnus*.

TRICEPS AURIS, *Retrahens auris*—t. *Brachialis*, *Triceps extensor cubiti*.

TRICEPS CRURIS, *Femoralis*, (F.) *Trifemorotulien* (Ch.), *Crural*, *Trifemoro-tibi-rotulien*, *Triceps crural*, *T. de la cuisse*, is situate at the anterior, inner, and outer part of the thigh. It is formed of three bundles at its superior extremity, viz. 1. A middle fasciculus (the *cruralis* of most anatomists.) 2. An external fasciculus (the *vastus externus*) and 3. An inner fasciculus (the *vastus internus*.) It is attached, above, to the anterior, inner, and outer surfaces of the femur, and to the two edges of the linea aspera, from the base of the trochanter to within four fingers' breadth of the knee. Below, it terminates by a large tendon, which is attached to the base and edges of the patella, as well as to the inner and outer tuberosities of the tibia. The triceps extends the leg on the thigh, and conversely.

TRICEPS DE LA CUISSE, *Triceps cruris*—t. *Crural*, *Triceps cruris*.

TRICEPS EXTEN'SOR CU'BITI, *Triceps brachialis*, (F.) *Scapulo-humero-olecranium* (Ch.), *Triceps brachial*. This muscle, which occupies all the posterior part of the os humeri, is described as two muscles by Douglas, and as three by Winslow. It arises by three heads. The first or long head,—*long head of the biceps externus* of Douglas, *Anconeus major* of Winslow,—arises from the anterior extremity of the inferior costa of the scapula, near its neck, and below the origin of the *teres minor*. The second head, or *short head of the biceps externus* of Douglas, *Anconeus externus* of Winslow, arises from the upper and outer part of the os humeri, at the base of the great tuberosity; and the third head,—*Brachialis externus* of Douglas, *Anconeus internus* of Winslow,—the shortest of the three, arises from the back part of the os humeri, behind the flat tendon of the *latissimus dorsi*. These three portions unite about the middle of the arm, so as to form one thick and powerful muscle, which is inserted at the upper part of the olecranon. It extends the forearm on the arm, and conversely.

TRICEPS MAGNUS, *Adductor magnus*—t. *Minor*,

Adductor longus femoris—t. *Secundus*, *Adductor brevis*.

TRICLÆ INCUBORUM, *Plica*.

TRICHANGIETA'SIA, *Angidicta'sia*, *Trichocircus*, from *τριχ*, *τριχος*, 'a hair,' *αγγιον*, 'a vessel,' and *αραισις*, 'dilatation.' Morbid dilatation of the capillary vessels.

TRICHAUX'E; from *τριχ*, *τριχος*, 'hair,' and *αυξη*, 'increase.' Increase in the quantity and size of the hair, without change of texture.

TRICHERA ARVENSIS, *Scabiosa*.

TRICHIA, *Entropion*.

TRICHIASIS, *Trichio'sis*, *Tricho'sis*, from *τριχ*, *τριχος*, 'hair.' *Morbus pila'ris*. This name has been given to several affections. 1. To a disease of the kidneys or bladder, in which filamentous substances, resembling hairs, are passed in the urine. This is also called *Pili'mic'tio*. It must be regarded as a variety of *Catar'rhœ vesic'æ*. 2. To a painful swelling of the breasts, in child-bed women, when the milk is excreted with difficulty:—a disease attributed, by Aristotle, to a hair swallowed by accident and carried to the breasts through the circulation; and 3dly, To inversion of the eye-lashes. See *Entropion*.

TRICHIASIS LACTEA, *Infarctus mammae lacteus*.

TRICHILIA, *Cathartica*.

TRICHINA SPIRA' LIS. Same etymon. A small species of entozoa discovered in the muscles of voluntary motion. Trichinae consist of very minute cysts, of an oblong figure, having considerable resemblance, in size and colour, to young pediculi, and are somewhat allied to the eels found in paste and vinegar. No symptoms have as yet been observed to be pathognomonic of their presence.

TRICHIOSIS, *Trichiasis*—t. *Distrix*, *Distrix*.

TRICHIS'MUS. Same etymon. *Capilla'tio*, *Fissu'ra pila'ris*. A capillary fracture, fissure, or crack.

TRICHIURIA, *Trichocephalus*.

TRICHOCEPH'ALUS, *Trichoceph'alus dispar*: from *τριχ*, *τριχος*, 'a hair,' and *κεφαλη*, 'head.' *Trichu'ria*, *Trichuris vulgaris*, *Trichuris intestinalis*, *As'caris trichu'ria*, *Trichiu'ria*, *Trichocephalus hom'inis*, *Mastigo'des hominis*, *Long thread-worm*. A worm, from an inch and a half to two inches long; the head acute; the body spirally involuted in the male, almost straight in the female. The *trichocephalus dispar* generally inhabits the cæcum and colon, and is rarely met with in the small intestines. It gives rise to no peculiar symptoms, and requires the usual antelmintic treatment.

TRICHOCIRSUS, *Trichangiectasia*.

TRICHOLABIS, *Madisterium*.

TRICHOLABIUM, *Madisterium*.

TRICHOLOGIA, *Carpologia*.

TRICHOMA, *Capillamentum*, *Plica*.

TRICHOMANES, *Asplenium trichomanoides*—t. *Crenata*, *Asplenium trichomanoides*.

TRICHOMATION, *Capillamentum*.

TRICHOMATOSE HAIR, *Plica*.

TRICHOM'ONAS, *Trichom'onad*; from *τριχ*, *τριχος*, 'a hair,' and *μοναδος*, 'unity.' An animalcule found by M. Donné in the mucus of the vagina, where cleanliness has not been attended to, and to which he has given the name *Trichom'onas vagina'lis*. By some it is considered to be nothing more than separated ciliated epithelium from the uterus.

TRICHON'OSUS, from *τριχ*, *τριχος*, 'hair,' and *ωσος*, 'disease.' A disease of the hair.

TRICHOPHY'IA, *Trichophy'tica*, from *τριχ*,

τρῆχες, 'hair,' and *γενῆναι*, 'to grow.' Remedies that promote the growth of the hair.

TRICHOPHYTON TONSURANS, see *Porrigo decalvans*.

TRICHOSCHISIS, *Schizotrichia*.

TRICHO'SIS, *Pila'rē malum*; from *τρῆχες*, 'hair.' Morbid organization or deficiency of hair. A genus in the system of Good.

TRICHO'SIS, Entropion, Trichiasis — t. *Area*, *Porrigo decalvans* — t. *Athrix*, *Alopecia* — t. *Distrix*, *Distrix* — t. *Furfuracea*, *Porrigo furfurans* — t. *Hirsuties*, *Hirsuties* — t. *Plica*, *Plica* — t. *Poliosis*, *Poliosis* — t. *Setosa*, *Hystriiciasis*.

TRICHOTON, *Scalp*.

TRICHURIS, *Trichocephalus*.

TRICLISPERMA GRANDIFLORA, *Polygala panicifolia*.

TRICUS'PID, *Tricus'pis*, *Tricus'pida'lis*, *Tricus'pida'tus*, from *tris* for *tres*, 'three,' and *cuspid*, 'a point.' That which has three points.

TRICUSPID VALVES, *Val'vula Tricus'pides* seu *triglo'chines* seu *trisu'ca*, are three triangular, valvular duplicatures, formed by the inner membrane of the right cavities of the heart, around the orifice by which the auricle communicates with the ventricle. The elongated and pointed top of each of these valves is continuous with the chordæ tendinæ, which set out from the columnæ carnæe of the heart. These valves are depressed to allow the blood to flow from the auricle into the ventricle; and are raised to prevent its reflux into the auricle.

TRIENS, *Un'cia quatuor*. The third part of a pound. Four ounces, Troy. — Galen.

TRIFACIAL, *Trigemini*.

TRIFÉMORO-ROTULIEN, *Triceps cruris* — t. *Tibi-rotulien*, *Triceps cruris*.

TRIFOLIUM ACETOSUM, *Oxalis acetosella* — t. *Aquaticum*, *Menyanthes trifoliata* — t. *Aureum*, *Hepatica triloba* — t. *Cervinum*, *Eupatorium cannabinum* — t. *Fibrinum*, *Menyanthes trifoliata* — t. *Hepaticum*, *Hepatica triloba*.

TRIFOLIUM MELLILO'TUS OFFICINA'LIS, *T. offic'ina'le*, *Melilotus cit'rina*, *Melilotus*, *Lotus sylves'tris*, *Ser'tula Compa'na*, *Trifolium caballi'num*, *Coro'na regia*, *Trifolium odora'tum*, *Common mel'ilot*, (F.) *Melilot*. Family, Leguminosæ. *Sex. Syst.* Diadelphia Decandria. The infusion or distilled water of this plant has been employed in cases of ophthalmia. It has also been used in fomentations, glisters, &c.

TRIFOLIUM OFFICINALE, *T. melilotus officinalis* — t. *Paludosum*, *Menyanthes trifoliata* — t. *Palustre*, *Menyanthes trifoliata*.

TRIGAS'TRIC, *Trigast'ricus*, *Triven'ter*; from *τρῆς*, 'three,' and *γαστρῆς*, 'belly.' That which has three bellies. An epithet for muscles so circumstanced.

TRIGEM'INI, *Tergem'ini*, from *tris*, 'three,' and *gem'inus*, 'double,' 'threefold,' 'triplets.' The fifth pair of nerves, *Par trigem'inum*, *Nervi div'isi*, *N. gustato'ris*, *Nervus quintus*, *Par quintum nervorum cerebr'alium*, *N. tremellus*, *N. mixtus*, *N. sympath'icus me'dius*, *N. sympath'icus medius*, *N. anon'ymsus*, *N. innomina'tus*, *Par trium funiculo'rum*, *Trifa'cial*, (F.) *Nerf gustatif innominé*, *Nerf à trois cordes*, *Nerf trijumeau*. This nerve arises below the tuber annulare by one large posterior root from the corpora restiformia, and by two small anterior roots from the corpora olivaria, whence, proceeding forwards to the side of the sella Turcica, the filaments composing the large root form a ganglion — the Gasserian. Emerging from this ganglion, the filaments, of which the large root consists, form, with those constituting the small roots, and which had not

passed through the ganglion, two flattened trunks, each of which is soon divided into three branches, in such a manner, however, that the first, or ophthalmic branch, and the second or upper maxillary, are composed exclusively of the filaments that arose from the corpora restiformia and passed through the Gasserian ganglion; whilst the third or lower maxillary branch is composed in part of those filaments, and in part of those that arose from the corpora olivaria, and passed on one side of the ganglion without going through it. The whole, therefore, of the first and second branches, and a part of the third are sensitive nerves, whilst the remaining part of the third — the manducatory or masticatory — is wholly motiferous, and passes to the pterygoid and other muscles concerned in mastication.

TRIGONE CÉRÉBRAL, *Fornix* — t. *Vesical*, see *Urinary Bladder*.

TRIGONEL'LA FENUM, *T. Fen'num Gra'cum*, *Fen'ugreek*, *Fen'ugreek*, *Fenum Gra'cum*, *Bu'cceras*, *B. Fenum Gra'cum*, *Carphos*, *Ægod'eras*, (F.) *Fénugrec*. Family, Leguminosæ. *Sex. Syst.* Diadelphia Decandria. A native of the south of France. The seeds have a strong, disagreeable smell, and an unctuous, farinaceous taste; accompanied by a slight bitterness. They are chiefly used in poultices.

TRIGONOS, *Triangular*.

TRIGONUS VESICÆ, see *Urinary bladder* — t. *Lieutaudi*, see *Urinary bladder*.

TRIJUMEAUX, *Trigemini*.

TRIL'LIIUM LATIFOLIUM, *Broadleaf Bethroot*, *Bethroot*, *Rattlesnake root*, *Wakerobin*, *Coughroot*, *Indian Balm*, *Ground Lily*, *Jew's Harp*, *Indian Shamrock*, *Pariswort*, *Truelove*. *Sex. Syst.* Hexandria Trigynia. A plant peculiar to North America, which blossoms in the spring. The root is astringent.

There are many species of *Trillium*, all of which possess the same properties.

TRIOCEPHALIA, *Aprospia*.

TRIOR'CHIS, from *τρῆς*, 'three,' and *ορχῆς*, 'a testicle.' One who has three testicles.

TRIOSTOSPERMUM, *Triostemum*.

TRIOS'TEUM, *T. Perfolia'tum* seu *majus*, *Triosteosper'mum*, *Bustard Ipecacuan'ha*, *Fever Root*, *Feverwort*, *Tinker's weed*, *Horse ginseng*, *Ipecac.*, *Wild Coffee*, *White ginseng*, *Gentian*, *White Gentian*, *Sweet Bitter*. In very large doses, the bark of the root proves emetic. It is a good cathartic, in doses of twenty or thirty grains. It sometimes operates as a diuretic.

TRIPE DE ROCHE. Different lichens of the species *Gyrophora*, inhabiting the arctic regions of America, bear this name. They are eaten as food by the hunters.

TRIPHAR'MACUM, *τρίφάρμακον*. A medicine composed of three ingredients.

TRIPLET, from *triplex*, 'triple.' One of three children born at the same accouchement or gestation. Also, relating to triplets — as a 'triplet conception.'

TRIPLET MONSTERS, *Monstra trip'lica* seu *trigem'ina*, are such as have parts of the body tripled. They are rare.

TRIPSIS, *Contusio*, *Trituration*.

TRIPUDIATIO SPASTICA, *Chorea*.

TRIQUETRUM, (OS.) *Cuneiform* (bone.)

TRISIS, *Brygmus*.

TRISMUS, from *τρίζω*, 'I gnash.' *Enta'sia Trismus*, *Capit'rum*, *Tonos Trismus*, *Locked Jaw*, *Spasmus* seu *Rigor* seu *Tet'anus maxill'æ inferio'ris*, *Gnathospas'mus*, *Stomatospas'mus*, (F.) *Mal de Macheire*. Spastic closure of the under jaw; a partial tetanus. Cullen makes two va-

rieties—*T. nascentium*, *T. neonatorum*, *Nineday fits*, (F.) *Sarrète*, attacking infants during two weeks from birth; and *T. traumaticus*, originating from a wound.

TRISMUS CAPISTRATUS, *Brûléure*—t. Catarrhalis maxillaris, Neuralgia maxillaris—t. Clonicus, Neuralgia faciei—t. Cynicus, see Canine laugh—t. Diastrophe Sauvagesii, Paralysis, Bell's—t. Dolorificus, Neuralgia faciei—t. Maxillaris, Neuralgia faciei—t. Nascentium, see Trismus—t. Neonatorum, see Trismus—t. Sardonius, Risus sardonius.

TRISPERMUM, from *trpis*, 'three,' and *σπέρμα*, 'a grain or seed.' A cataplasm, consisting of three seeds,—*cumin*, *bay*, and *emallage*. *Goræus*.

TRISPLANCHIA, Cholera.

TRISPLANCH'NIC, *Triplanch'nicus*; from *trpis*, 'three,' and *σπλάγχνον*, 'viscus.' That which relates to three orders of viscera.

TRISPLANCHNIC NERVE, *Great sympathetic*, *Interoostal*, *Ganglionic nerve*, *Nerve of organic life*, *Vertebral nerve*;—named by Bichat the *organic nervous system*, in opposition to the other nervous parts, called the *animal nervous system*. Gall terms it, the *nervous system of the automatic functions*. It has also been called the *organic nervous system*, and *ganglionic nervous system*. It is called *Triplanchnic*, because it distributes its branches to the organs in the three great splanchnic cavities—the head, chest and abdomen. It is composed of a series of ganglia, united by intermediate branches, and passing along the side of the spine to the lowest part of the trunk; communicating, by a branch, with each of the thirty pairs of spinal nerves and several of the cerebral nerves; and detaching nerves from its several ganglia, which accompany the arteries, and are distributed, particularly, to the organs of involuntary functions. At its upper part, it is concealed in the canal carotidus and cavernous sinus, and is joined there by a branch of the 6th pair of nerves, and by a twig from the Vidian nerve of the 5th pair. In passing down by the side of the spine, it forms three ganglia in the neck:—the *superior*, *middle*, (*thyroid ganglion*), and *inferior*, (*vertebral ganglion*); 12 in the back—the *thoracic*; 5 in the loins—the *lumbar*; and three or four *sacral*. When it reaches the coccyx it unites with its fellow from the opposite side, forming a small ganglion—the *coccygeal*, *Ganglion impar*, *as'ygous ganglion*. Meckel divides it into two portions—1. The *central ganglions* or *central part*, composed of the numerous ganglionic plexuses in the abdomen; the centre of which is the *semilunar* and *solar plexuses*. 2. The *external ganglions*, *Limitrophes* or *external part*, which comprise the series of ganglions situate at the sides of the spine, from the base of the cranium to the sacrum. The great sympathetic seems to form a distinct nervous system, destined for the organs of involuntary motion; for although communicating with both brain and spinal marrow, it does not seem to be immediately under the influence of either.

TRISPLANCHNITIS, Cholera, (spasmodic.)

TRISSAGO, *Teucrium chamædrys*—t. *Palustris*, *Tæncrium scordium*.

TRISTEMANIA, Melancholy.

TRISTERN'AL. Bèclard has given this name to the third bony portion of the sternum;—that which corresponds to the third intercostal space.

TRISTITIA, *Athymia*, *Mœror*.

TRITÆOPHYA AMERICANA, Fever, yellow.

TRITÆOPHYES, *Tritæoph'ya*, from *τριταος*, 'tertian,' and *φωα*, 'I originate.' A fever, whose type approaches the tertian. *Sauvages* gave the

name *Tritæophya Vratilavien'sis*, to an epidemic, which broke out in the Prussian army at Breslaw, in the middle of the last century.

TRITEÛS, Tertian fever.

TRITICUM ÆSTIVUM, *T. cereal'is* seu *Ceuallos* seu *compactum* seu *erina'ceum* seu *Gæstneria'num* seu *Linnæa'num* seu *pruino'sum*, 'Summer wheat;' and *TRITICUM HYBERN'ICUM* seu *glaucum* seu *Muticum* seu *Sic'ulum*, *Winter wheat*, (F.) *Froment*. Family, Gramineæ. *Sex. Syst.* Triandria Digynia. From these plants our wheaten flour is obtained, by grinding the seeds—*Wheat*, *Pyrus*, *Fruen'tum*—and to them we are indebted for our bread and pastry. The nutritive properties of wheaten flour are so well known as not to need comment.

Bread, (F.) *Pain*, mixed with milk, constitutes the ordinary emollient poultice;—and the *crumbs of bread*, *Micæ panis*, are a common excipient for pills and boluses.

TRITICUM ARVENSE, *T. repens*—t. *Cereale*, *T. æstivum*—t. *Ceuallos*, *T. æstivum*—t. *Compactum*, *T. æstivum*—t. *Faginum*, *Polygonum fagopyrum*—t. *Gæstnerianum*, *T. æstivum*—t. *Glaucum*, *T. hybernum*, and *T. repens*—t. *Hybernum*, see *T. æstivum*—t. *Muticum*, *T. hybernum*—t. *Linnæanum*, *T. æstivum*—t. *Pruinosum*, *T. æstivum*.

TRITICUM REPENS, *T. arven'se* seu *glaucum*, *Agropyrum levissimum*, *Bromus glaber*, *Gramen caninum*, *Gramen dioscor'idis*, *G. repens*, *Lolium radi'se repen'te*, *Dog-grass*, *Couch-grass*, *Quickens*, (F.) *Chiendent*. The roots are sweet, and possess aperient properties. They are said, also, to be diuretic.

TRITICUM SICULUM, *T. hybernum*.

TRITIO, Contritio, Trituration.

TRITON PALUSTRIS, see *Ectozoa*.

TRITURA, Contritio.

TRITUR'ATION, *Trituratio*, *Tritura*, *Tritus*, *Tritio*, *Tripis*, from *terere*, *tritum*, 'to bruise.' The act of reducing a substance to powder.

TRITURATION, Contritio.

TRITUS, Contritio, Trituration.

TRIVELIN, see *Liver*.

TRIVENTER, Trigastria.

TROCAR, *Trochar*, *Acus paracent'ica* seu *paracent'ica*, *A. triq'uetra vulg'ris*, *Paracent'icium*, *Paracentet'ion*. Corrupted from the (F.) *Troisquarts* or *Trocart*, 'three quarters;' so called from the triangular shape of the point—*Trigæstrum*. An instrument used for evacuating fluids from cavities, particularly in ascites, hydrocele, &c. A trocar consists of a perforator or stylet and a cannula, which is so adapted to the perforator, that, when the puncture is made, both enter the wound with facility; after which, the stylet being withdrawn, the cannula remains in the wound and affords the fluid a ready passage outwards.

TROCART, Trocar.

TROCH, Trochiscos.

TROCHAN'TER, *Trochanter*, *Rota'tor*, from *τροχῶν*, 'I turn.' Anatomists have given the names *great* and *little trochanter* to two processes at the upper extremity of the femur. The *great trochan'ter*, *glutius*, is the one on the outside: the *less* is lower down and more internally. Both afford attachment to rotator muscles of the thigh, and hence their name. *Chaussier*, by the word *trochanter*, means the larger process; the smaller he calls *trochantin*.

TROCHANTER'IAN, *Trochanteria'na*, *Trochanter'iana*. That which belongs or relates to the great trochanter.—*Chaussier*.

TROCHANTIN'IAN, *Trochantin'iana*, *Trochantinia'na*. That which belongs or relates to the trochantin or lesser trochanter.

TROCHAR, Trocar.

TROCHES OF CARBONATE OF LIME, Trochisci carbonatis calcis — t. of Chalk, Trochisci carbonatis calcis — t. Escharotic, Trochisci escharotici — t. Gum, Trochisci gummosi — t. of Ipecacuanha, Trochisci ipecacuanhæ — t. Liquorice, Trochisci glycyrrhizæ — t. Liquorice, with opium, Trochisci glycyrrhizæ cum opio — t. of Magnesia, Trochisci magnesiæ — t. Nitre, Trochisci nitratis potassæ — t. of Peppermint, Trochisci menthæ piperitæ.

TROCHIA, Orbit.

TROCHILIA, Trochlea.

TROCHIN, from τροχον, 'to turn.' Chaussier has given this name to the smaller of the tuberosities at the upper extremity of the os humeri; because it gives attachment to one of the rotator muscles of the arm, — the subscapularis.

TROCHIN'IAN, Trochinianus. That which belongs or relates to the trochin.

TROCHIS'CUS, Phthois, Artis'cus, Colliz, Coliz, Phthois'cos, Rot'ula, Cyclis'mos, diminutive of τροχος, 'a wheel.' A troch or round table, (F.) Trochisque. See. Pastil, and Tabella. A solid medicine, prepared of powders, incorporated by means of mucilage, crumb of bread, juices of plants, &c. In French nomenclature, the trochisque differs from the tablette, — the former containing no sugar. This form of preparation is adapted for the purpose of allowing the medicines of which the troch is composed to dissolve slowly in the mouth, and to pass gradually into the stomach.

The Parisian Codex has two formulæ for troches for external use.

TROCHISCI BECHICI NIGRI, T. glycyrrhizæ glabræ.

TROCHISCI CARBONATIS CALCIS, Troches of Carbonate of lime, T. of chalk, Tabellæ ad ardo'rem ventriculi, Lozenges for the heartburn, Tabellæ cardiagica, T. ad sodam, Trochisci cretæ, T. cretæ (Ph. U. S.) (Cret. ppt. \mathfrak{z} iv; acaciæ, in pulv. \mathfrak{z} ij; myrist. in pulv. \mathfrak{z} ij; sacch. in pulv. \mathfrak{z} vj. M. Form into troches with water.) Antacid and absorbent.

TROCHISCI CRETÆ, Tr. carbonatis calcis — t. Cretæ, T. carbonatis calcis.

TROCHISCI vel PASTILLI EMETINÆ PECTORALES, Pectoral Lozenges of Emetine. (Sugar, \mathfrak{z} iv; emetine, 32 grains. Form into lozenges of nine grains each.) One is a dose.

TROCHISCI ESCHAROTICI, Escharotic Troches. (Hydrag. oxyzur. p. 8; amyli, p. 16; mucilag. g. tragac. q. s. Make into troches, to which a few drops of laudanum may be added. — Ph. P.) Used in foul ulcers, to remove excrescences, &c.

TROCHISCI ESCHAROTICI DE MIN'IO. (Oxyd. plumbi. rubr. p. 16; hydrag. oxyzur. p. 32; mic. panis, p. 128; aq. rosæ, q. s. — Ph. P.) Used like the last.

TROCHISCI GLYCYRRHIZÆ GLABRÆ, Liq'urice troches, Black pectoral lozenges, Trochisci bech'ici nigri. (Ext. glyc. glabr., gum. acac. \mathfrak{ss} p. j; sacch. purif. p. ij. Dissolve in warm water; strain; evaporate, and form into troches. — Ph. E.) Demulcent. To allay cough.

TROCHISCI GLYCYRRHIZÆ CUM OPIO, T. G. et opii (Ph. U. S.), Trochisci Thebaici, T. sedativo-balsamici, T. pectorales regis Danorum, Liq'urice Troches with Opium, Wistar's Lozenges. (Opii, in pulv. \mathfrak{z} ss; ext. glycyrrhis. in pulv., sacchar. in pulv., acaciæ, in pulv., \mathfrak{ss} \mathfrak{z} x; ol. anisi, \mathfrak{z} ij. Make into troches. — Ph. U. S.) Demulcent and anodyne.

Spitta's Lozenges for coryza, hoarseness, and sore-throat, are composed as follows: — (Cubeb. recent. in pulv. \mathfrak{z} ij; extract. glycyrrhis. \mathfrak{z} ij; myr-

oryl. \mathfrak{z} ij; acaciæ, \mathfrak{z} iv; syrup, q. s. ut fiat trochisci gr. x singulis.

TROCHISCI GUMMO'SI, Gum Troches. (G. acac. p. v; amyli, p. i; sacch. pur. p. xij. Make up the troches with rose-water. — Ph. E.) Demulcent.

TROCHISCI IPECACUANHÆ, Troches of Ipecacuanha. (Ipecacuanh. in pulv. \mathfrak{z} ss; sacchar. in pulv. \mathfrak{z} xiv; marantæ, in pulv. \mathfrak{z} iv; mucilag. tragacanth. q. s. Make into troches. — Ph. U. S.)

TROCHISCI MAGNE'SIÆ, Troches of Magnesia. (Magnes. \mathfrak{z} iv; sacchar. \mathfrak{bb} j; myrist. pulv. \mathfrak{z} ij; mucilag. tragacanth. q. s. Make into troches. — Ph. U. S.) Useful in acidity of the stomach, with constipation.

TROCHISCI MENTHÆ PIPERITÆ, Troches of Peppermint. (Ol. menth. piperit. \mathfrak{z} ij; sacchar. in pulv. \mathfrak{bb} j; mucilag. tragacanthæ, q. s. Make into troches. — Ph. U. S.) Used as a carminative.

TROCHISCI NITRATIS POTASSÆ, Nitre Troches. (Nitr. potassæ, p. j; sacch. pur. p. ij. Make into troches with mucilage of tragacanth. — Ph. E.) In slight inflammatory sore-throat and fever.

TROCHISCI PECTORALES REGIS DANORUM, Tr. glycyrrhizæ cum opio — t. Sedativo-balsamica, Tr. glycyrrhizæ cum opio.

TROCHISCI SODÆ BICARBONATIS, Troches of Bicarbonate of Soda. (Sodæ bicarb. \mathfrak{z} iv; sacchar. in pulv. \mathfrak{bb} j; mucilag. tragacanth. q. s. To be made into a mass, and divided into troches, each weighing ten grains. — Ph. U. S.)

The Pastilles de Vichy, Pastilles digestives d'Hauterive-Vichy, Pastilli digestivi Darcel'ii, composed of bicarbonate of soda, oil of peppermint, and sugar, are much used in France, like the Vichy waters, in cardalgia, gout, and lithiasis.

TROCHISCI STIBIATI, Tabellæ antimoniales Kunckelii — t. Thebaici, T. glycyrrhizæ cum opio.

TROCHISQUE, Trochiscos.

TROCH'ITER, from τροχον, 'to turn.' The larger of the two tuberosities at the upper extremity of the os humeri; so called because it affords insertion to rotator muscles. — Chaussier.

TROCHITER'IAN, in the language of Chaussier, means any thing belonging or relating to the trochiter.

TROCH'LEA, Trochil'ia, (F.) Trochleæ ou Trochite. A pulley; from τροχον, 'I turn,' — for example, the articular surface at the lower extremity of the os humeri; so called from its forming a kind of pulley on which the ulna moves, in flexion and extension of the forearm. Also, the cartilaginous pulley over which the tendon of the trochlearis muscle passes, at the upper and inner part of the orbit.

TROCHLEA LABYRINTHI, Cochlea.

TROCHLEARIS, Obliquus superior oculi.

TROCHLÉATEUR, GRAND, Obliquus superior oculi — t. Petit, Obliquus superior oculi.

TROCHLÉE, Trochlea.

TRO'CHOID, from τροχος, 'a wheel,' and τides, 'resemblance.' Trochoïdes, Ax'ea commissura. An articulation, in which one bone turns upon another, like a wheel upon its axle; as the Atlanto-axoid articulation.

TROCHOIDES, Axæa commissura.

TROËNE, Ligustrum vulgare.

TROISQUARTS, Trocar.

TROKANTER, Trochanter.

TROKANTERIAN, Trochanterian.

TROKANTINIAN, Trochantinian.

TROKLÉE, Trochlea.

TROMOMANIA, Delirium tremens.

TROMOPARANŒA, Delirium tremens.

TROMOS, see Paralysis agitata.
TROMOSPASMUS, Tremor.
TROMPE, Tuba—*t. d'Eustache*, Eustachian tube—*t. de Fallope*, Tuba Fallopiana—*t. Uterina*, Tuba Fallopiana.
TROMUS, Tremor.
TRONC, Trunk—*t. Brachial*, Brachial artery—*t. Basilaire*, Basillary artery.
TROPÆOLUM MAJUS, *Indian Cress*, *Nasturtium Indicum*, *Acris'ola*, *Flos sanguineus monardi*, *Nasturtium Peruvicum*, *Cardaminidum majus*, *Cardamum majus*. Family, Geraniaceae. *Sex. Syst.* Octandria Monogynia. (F.) *Cresson des Indes*, *Cresson du Mexique*, *Capucine*. An antiscorbutic.
TROPÆOLUM TUBEROSUM, *Ulluco*. A tuberous plant, cultivated in the Sierra, Peru. It is smaller than the potato.
TROPHALIS, Colostrum.
TROPHE, Aliment, Cibatio, Pabulum.
TROPHI. Same etymon as Trophy. In insects, the parts of the mouth that are employed in receiving and preparing the food.
TROPHICAL, *Trophicus*. Same etymon as Trophy. Relating to nourishment or nutrition.
TROPHICAL NERVES. The organic nerves, or nerves of the sympathetic system, have been so termed, from a belief that they were concerned in nutrition.
TROPHIMOS, Nutrition.
TROPHONEURO'SIS, from τροφή, 'nourishment,' and *neurosis*. A morbid condition of the process of nutrition owing to diminished nervous influence.
TROPHON'OSI, *Trophonosi*, from τροφή, 'nourishment,' and νόσος, 'a disease.' Diseases of nutrition.
TROPHY, *Troph'ia*, τροφή, a suffix denoting 'nourishment or nutrition,' as hypertrophy, 'excess of nourishment or nutrition.'
TROPONU'SI, *Morbi tropici*, from τροπή, the solstitial or tropical point where the sun turns or alters its course, and νόσος, 'a disease.' Diseases that prevail in the tropics.
TROSTER, see Spirit.
TROU, Foramen—*t. Anonyme*, Foramen stylo-mastoidium—*t. Aveugle ou Borge*, Cæcum foramen—*t. Borge* of the Medulla oblongata, Foramen cæcum of the medulla oblongata—*t. de Botal*, Botal foramen, Ovale foramen—*t. Déchiré antérieur*, Lacerum anterius foramen—*t. Déchiré postérieur*, Lacerum posterius foramen—*t. Épineux*, Spinale foramen—*t. Mentonnier*, Mental foramen—*t. Optique*, Foramen opticum—*t. Orbitaire supérieur*, Foramen supra-orbitarium—*t. Orbitaire supérieur*, Orbital foramen superior—*t. Ovale*, Ovale foramen—*t. Rond, petit*, Spinale foramen—*t. Sous-orbitaire*, see Suborbitar canal—*t. Sous pubien*, Obturatorium foramen—*t. Sphéno-épineux*, Spinale foramen—*t. Sus-orbitaire*, Foramen supra-orbitarium.
TROUS CAROTIDIENS, Carotica foramina—*t. Condyloldiens*, Condyloldia foramina—*t. de Conjugaison*, Conjugationis foramina—*t. de Conjugaison*, see Vertebra—*t. Olfactifs*, Olfactory foramina—*t. Rachidiens*, Spinal foramina.
TROUSSEAU-GALANT, Cholera morbus.
TROUSSEAU, Fasciculus.
TROUSSEAUX ARRIÈRE-MÉSÉNTÉRIQUES, (F.) A name given by Winslow to the nervous plexus situate between the two mesenteric plexuses, of which it is a dependence, and which descends into the pelvis to concur in the formation of the hypogastric plexus.
TRUBS, Lycoperdon tuber.
TRUCULENTUS, Homicidal.
TRUELOVE, Paris, Trillium latifolium.

TRUFFE, Lycoperdon tuber.
TRUFFLE, Lycoperdon tuber.
TRUMBUS, Thrombus.
TRUMPET CREEPER, *Tecoma radicans*—*t.* Flower, *Tecoma radicans*—*t.* Wood, *Eupatorium purpureum*.
TRUNCUS, Trunk.
TRUNK, *Truncus*, (F.) *Trosc*. The principal part of the body, to which the limbs are articulated. The trunk has been divided into three parts:—a superior, the head; a middle, the thorax, and an inferior, the pelvis. These three regions contain the great splanchnic cavities. They are united by a common stalk—the vertebral column. To the middle are articulated the superior extremities; and, to the inferior, the lower extremities.
The trunk of an artery, vein, nerve, or lymphatic, is its largest part, which has not yet given off branches. It is, also, applied to the parent vessel, after branches have been sent off.
TRUSS, from (F.) *trousser*, 'to tie up.' *Brachyrium*, *Brachyrium*, *Brachille*, *Brachyrotum*, *Brachyrotum*, *Amma*, *Hamma*, *Subligaculum*, *Subligatura*, (F.) *Brayer*. A hernial bandage for keeping hernia reduced. The ancient trusses were inelastic. They consisted simply of a pad and strap. At the present day, elastic bandages are alone employed. They possess the advantage of making an equable and continuous pressure on the aperture of the sac; and of yielding to the changes of form in the abdominal parietes. The most important part of these bandages is a piece of narrow steel, flat, and adapted to the shape of the body. This is the *spring*, (F.) *Ressort*. It embraces the body on the side affected; extends from beyond the spine, and terminates opposite the ruptured part, by an iron plate to which it is riveted. The posterior surface of this plate is furnished with a convex pad, (F.) *Pelote*, adapted in shape and size to the aperture which it has to close. The spring is covered with leather, and its inner surface is padded; a strap extends from its posterior extremity; passes round the sound side, and is attached to the plate of the pad. This strap is pierced with numerous holes, which allow the patient to tighten or slacken it at pleasure. Trusses have been variously constructed; and different patents obtained for the modifications. They all act upon the above principle. Sometimes they have a double pad.
TRYGODES, Feculent.
TRYPANON, Trepan.
TRYPESIS, Trepanning.
TRYPISIS, Friction.
TSCHERBET, Sherbet.
TSIANA, Costus.
TSJAMPACA, *Michella champaca*.
TUBA, Tube—*t. Aristotelica*, Eustachian tube—*t. Cæca*, Tuba, Fallopiana—*t. Uterina*, Tuba Fallopiana—*t. Vocalis*, Tube, vocal.
TUBAL RESPIRATION, see Murmur, respiratory.
TUBE, Tuba, *Trumpet*, *Salpinx*, (F.) *Trompe*. A name given to some parts which are hollow, and have the shape of a trumpet.
TUBE, ALIMENTARY, Canal, alimentary—*t.* Eustachian, Eustachian tube.
TUBE, FALLOPIAN, *Tuba Fallopiana* seu *Fallopia*, *Hysterosalpinx*, *Oviductus muliebris*, *Vas deferens muliebris*, *Tuba uterina*, *T. cæca*, *Ductus varicosus* seu *Proccus lateralis* seu *Meatus semina'lis* seu *Meatus semina'rius uteri*, (F.) *Trompe de Fallope*, *T. uterina*, is a canal, floating in the abdomen, and extending on each side from the superior angles of the uterus as far as the sides of the brim of the pelvis. They are 4 or 5 inches long. Near the uterus, they are straight

and very narrow; but, in their course, they widen, become tortuous, and terminate by a free, expanded, and *fin'briated* extremity; called, also, *Folia'ceum ornamen'tum*, *Morus diab'oli*, *Infundib'ulum* seu *Digitatio'nes* seu *Fim'bris* seu *Vexilla tuba'rum Fallo'pii*, *Lacin'is tuba'rum Fallo'pii*, (F.) *Morceau frangé*, *Pavillon de la trompe*, *Morceau du diable*. Within, the tubes are hollow and lined by a mucous membrane: the tissue exterior to which is spongy and erectile. The use of the Fallopiian tubes is to conduct the sperm to the ovary, and the fecundated ovum back to the uterus. They establish a communication between the cavity of the peritoneum and that of the uterus, the abdominal termination being termed *Ostium abdomina'le*; the uterine, *Ostium uteri'nus*.

TUBE, INTESTINAL, Canal, alimentary.

TUBE, ESOPHAGE'AL, *Stomach Tube*. A long elastic gum tube, capable of being passed into the esophagus or stomach.

TUBE, RECTAL, *Defecation tube*. An elastic gum tube, similar to the last, which is sometimes passed into the colon, to remove air from that intestine, or to enable enemata to be thrown up into it.

TUBE, STOMACH, see Tube, esophageal.

TUBE, VOCAL, *Tuba voca'lis*. The part of the air-passages above the inferior ligaments of the larynx, including the passages through the nose and mouth.

TUBER, Hump, Lycoperdon tuber, Tubercle — t. *Atloido-occipital*, *Rectus capitis posticus minor* — t. *Cibarium*, Lycoperdon tuber.

TUBER CIN'E'REUM. A grayish tubercle, seen at the base of the brain behind the commissure of the optic nerves, which is continuous with the infundibulum.

TUBER FRONTALE, Frontal protuberance — t. *Gulosorum*, Lycoperdon tuber — t. *Gutturosum*, *Bronchocele* — t. *Ischio-trochantérien*, *Quadratus femoris* — t. *Ischii*, see *Ischiatic* — t. *Nigrum*, Lycoperdon tuber — t. *Pellagra*, *Pellagra* — t. *Tympani*, Promontory of the tympanum.

TUBERA TERRÆ, Lycoperdon tuber.

TUBERCLE, *Tuber'culum*, *Tuber*, *Strangal'ion*, *Strang'alis*, *Tuber'culous deposit*, a *Kernel*, (vulg.), a *Knot* (vulg.), (F.) *Tubercule*. A tumour in the substance of organs, from the production of new matter: — sensation null; growth sluggish. In *Pathological Anatomy*, the term is generally given to a species of degeneration which consists of an opaque matter, of a pale yellow colour: this, in its crude condition, has a consistence analogous to that of concrete albumen: it subsequently becomes soft and friable, and gradually acquires a consistence and appears analogous to those of pus. Tubercles may be developed in different parts of the body; but they are most frequently observed in the lungs and mesentery. Pulmonary tubercles, *Pneumophymata*, *Tubercula Pulmo'num*, (F.) *Tubercules pulmonaires*, are the cause of *Tuber'cular Phthisis*. *Mesenteric tubercles* are often met with in the same affection, but particularly in *Tabes Mesenterica*. Laënnec classes tubercles among the accidental tissues which have no resemblance to the natural tissues, and which never exist except in consequence of morbid action. Others consider them as a scrofulous degeneration. Broussais conceives that they are produced exclusively by inflammation of the white vessels, whose existence, however, is more than questionable. When tubercles in any organ are few in number, they may pass to the state of permanent induration without danger to the patient; but when they are very numerous, they usually cause serious mischief. Dr. Baron considers that they are

produced by hydatids. The morbid condition which gives rise to the development of tubercles, *Tuberculisati'o*, is termed *Tuberculo'sis*, *Morbus tuberculo'sus*, *Strumosis* seu *Phymato'sis pulmo'num*, and *Dyscrasia Tuberculo'sa*. Tubercles are seen of various forms, — to wit, in fine points, (F.) *Poussière tuberculeuse*,) gray and yellow granulations, miliary tubercles; and gray or yellow tubercular masses, softened, and cretaceous.

TUBERCLE, BLACK, Melanosis.

TUBERCLES OF THE AREOLA, see *Mamma*.

TUBER'CU'LA ARAN'TII, *Cor'pora Arantii*, *Corpus'cula Aran'tii*, *Tubercles of Arantius* or *Aranzi*. Small eminences at the middle part of the convex edge of the semilunar valves of the pulmonary artery and aorta.

TUBERCULA ARTHRITICA, *Calculi*, arthritic — t. *Cerebri*, *Encephalophymata* — t. *Gonorrhœia*, *Gonorrhœia impura* — t. *Hepatis*, *Hepato-strumosis* — t. *Intestinorum*, *Enterophymata* — t. *Nervorum nodosa*, *Ganglions*, *nervous* — t. *Parva duræ matris*, *Glandulæ Pacchioni* — t. *Peritonsil*, *Celiophymata* — t. *Pulmonum*, see *Tubercles*, (of the lungs) — t. *Quadrigenina*, *Quadrigenina Tubercula*.

TUBER'CU'LAR, *Tuber'culous*, *Tuberculo'sus*, *Tuber'culata*, (F.) *Tuberculeus*. That which relates to tubercles, or which is formed by tubercles.

TUBERCULAR or **TUBERCULOUS CONSTITUTION** or **DIATHESIS**, *Phthisio'sis*, is the habit of body which predisposes to tubercular phthisis; as *Tuberculous Cachexia*, *Tuberculo'sis*, *Morbus tuberculo'sus*, *Dyscrasia tuberculo'sa*, is the condition of one labouring under tuberculosis.

TUBERCULAR MATTER. A morbid production, contained in cysts, or loose in the tissue of organs. It varies, in its consistence, at the different periods of the tubercular affection: being, at first, compact, and yellowish; at times, calcareous; afterwards pulsataceous, semi-fluid, and curdy. See *Tubercle*.

TUBERCULAR PHTHISIS, is that produced by the development of tubercles in the lungs.

TUBERCULAR SORE THROAT, *Pharyngitis*, follicular.

TUBERCULATE, *Tubercular*.

TUBERCULATE SARCO'MA of *AR'ERNETHY*, *Emphy'ma Sarcoma tuberculo'sum*, *Tumor tuberculo'sus*. Tubercles, firm, round, and clustering; pea-sized or bean-sized; yellowish or brownish-red; when large, disposed to ulcerate, and produce a painful, malignant, and often fatal sore. Found chiefly in the lymphatic glands of the neck; often, simultaneously, in other glands and organs.

TUBERCULATED LIVER, *Cirrhosis*.

TUBERCULE, *Tubercle*.

TUBERCULES DES GLANDES LYMPHATIQUES, *Scrofula* — t. *du Foie*, *Hépatostromosis* — t. *des Ganglions méseutériques*, *Tabes mesenterica* — t. of the *Larynx* and *Fauces*, *Pharyngitis*, follicular — t. *Miliary*, see *Granulation* — t. *Pisiformes*, *Mamillary tubercles* — t. *Pulmonaires*, see *Tubercle* — t. *Quadrjumeaux*, *Quadrigenina corpora*.

TUBERCULEUX, *Tubercular*.

TUBERCULIZATION, see *Tubercle*.

TUBERCULOSIS, see *Tubercle*, and *Tubercular Cachexia* — t. *Laryngis* et *Tracheæ*, *Phthisis laryngæ* — t. *Pulmonum*, *Phthisis pulmonalis* — t. *Vertebrarum*, *Vertebral disease*.

TUBERCULOSUS, *Tubercular*.

TUBERCULOUS, *Tubercular* — t. *Deposit*, *Tubercle* — t. *Disease of the Lungs*, *Phthisis pulmonalis* — t. *Dust*, *Poussière tuberculeuse*.

TUBER'CU'LU' M CINE'REUM, 'Ash-coloured tubercle,' diminutive of *tuber*; *Pasci'ola*

cinerea. A mass of cineritious substance at the top of the calamus scriptorius, which is continuous below with the posterior horn of cineritious substance in the cord, and upon the sides with the corpus restiforme.

TUBERCULUM LACHRYMALE, see Lachrymal puncta—t. Loweri, Lower, tubercle of.

TUBEROSITAS, Tuberosity—t. Tympani, Promontory of the tympanum.

TUBÉROSITÉ BICIPITALE, Bicipital tubercle—t. Sciaticus, see Ischiatic.

TUBEROSITY, *Tuberositas*, from *tuber*, 'a bump.' Anatomists have given this name to an eminence or process, the surface of which is unequal and rough; and which gives attachment to muscles or ligaments.

TUBI MEMBRANACEI, see Villous membranes.

TUBULAR, *Tubularis*, (F.) *Tubulaire*. Same etymon as the next. Relating to or having the form of a small tube.

TUBULAR BLOWING SOUND, see Murmur, respiratory—t. Neurine, see Neurine—t. Substance of the Kidney, see Kidney.

TUBULE, *Tubulus*; diminutive of *Tuba*. A small tube.

TUBULI BELLINI, Uriniferous tubes—t. Durae matris, Sinuses of the dura mater—t. Nervi, Nerve fibres—t. Pelvis renum, see Calix—t. Uriniferi Bellini, Uriniferous tubes.

TUBULUS, Cannula—t. Centralis Modioli, see Tractus spiralis foraminulentus.

TUBUS ACUSTICUS, Ear-trumpet—t. Alimentaris, Canal, alimentary—t. Intestinorum, Canal, alimentary—t. Nervorum, Neurilemma—t. Vermicularis caeci, Appendix vermiformis caeci.

TUCKAHO, Lycoperdon tuber.

TUE-CHIEN, Colchicum autumnale.

TULBAG'HIA ALLIA'CEA. A South African plant, *Nat. Ord.* Asphodeles, the bulbs of which, boiled in milk, are recommended in phthisis and as an anthelmintic.

Tulbaghia cepa'cea and *T. viola'cea* serve the same purpose.

TULIP TREE, Liriodendron.

TULIPIER, Liriodendron.

TULIPIFERA LIRIODENDRON, Liriodendron tulipifera.

TUMEFACATIO, Swelling—t. Mollis, Puffiness.

TUMESCENCIA PITUITOSA, Leucophlegmatia.

TUMEUR, Tumour—t. Anomale, see Hæmatodes fungus—t. Blanche, Hydrarthrus—t. Cavereuse, see Hæmatodes fungus—t. Encéphaloïde, Encephaloid—t. Erectile, see Hæmatodes fungus—t. Hémorrhagiale circonscrite, see Aneurism—t. Lymphatique des articulations, Hydrarthrus—t. Variqueuse, see Hæmatodes fungus.

TUMOR, Swelling, Tumour—t. Albus, Hydrarthrus—t. Anomalus, Hæmatodes fungus—t. Artuum, Obdormitio—t. Capitis Sanguineus, Cephalæmatoma—t. Carneus, Sarcoma—t. Cysticus, Encystis—t. Cysticus serosus, Hygroma—t. Fibrosus, Tumour, fibrous—t. Ficosus, Ficus—t. Flatulentus, Emphysema—t. Fugax, see Fugacious—t. Fungosus articuli, Spina ventosa—t. Fungosus sanguineus, Hæmatodes fungus—t. Gangliiformis, Ganglion, nervous—t. Genarum, Meloncus—t. Genu albus, Genocace—t. Glandulae parotidæ, Parotidoncus—t. Lacteus, Galactoncus—t. Lardæus, Steatoma—t. Malarum, Meloncus—t. Ovarii, Oarioncus—t. Parotidis, Parotidoncus—t. Prostatæ, Prostatoncus—t. Renalis, Nephroncus—t. Sanguineus, Hæmatoma—t. Squamiformis carnosus, Lepidosarcoma—t. Tuberculosis, Tuberculatæ sarcoma—t. Tunicatus, Encystis—t. Uteri, Hysteroncus.

TUMOUR, from *tumeo*, 'I swell'; *Tumor*, *Oncos*, *Oncus*, *Epa'ra*, *Eparis*, *Emphy'ma*, *Excrecentia* (Sauvages,) *Ephy'ma*, (F.) *Tumour*. A rising or prominence, of greater or less size, developed by a morbid cause in some part of the body. Cullen defines a tumour to be "a partial swelling without inflammation." Sauvages restricts the term to a rising formed by the congestion of a fluid; and he calls *excrecences* those which have a fleshy or osseous consistence. Boyer defines it "any preternatural eminence developed on any part of the body." Good uses it synonymously with tubercle. Boyer's is the best general definition. Tumours differ greatly from each other; according to their seat, the organs interested, their nature, &c.

The French use the term *Tumeur blanche* synonymously with *White Swelling*;—see Hydrarthrus. The term is, however, applied by the generality of surgeons to swellings of the greater joints, without change of colour of the skin, and of a more or less firm consistence, which are dependent upon disease of the osseous or of the soft parts about the joint.

Serofula is the most common cause of these affections.

TUMOUR, ERECTILE. A tumour produced by the development of a soft, vascular tissue, which is susceptible of elevation and depression. See Erectile.

TUMOUR, FIBROUS, *Fibrous growth*, *Fibro'sa*, *Tumour fibro'sa*, *Inchylo'ma*. A tumour or growth formed of fibrous tissue.

TUMOUR, LAMINATED, NACREOUS FATTY, Cholesteatoma—t. Milk-like, Encephaloid.

TUMOUR, VARICOSE, *Tumor varico'sa*. A circumscribed, bluish tumour, formed by the dilatation and turgescence of the capillary vessels of a part.

TUMOUR, VASCULAR, see Hæmorrhoids.

TUNAS, see Cactus opuntia.

TUNBRIDGE, MINERAL WATERS OF. A celebrated acidulous chalybeate in Kent, England, a few miles distant from the village of Tunbridge, and thirty-six miles south of London, which is much frequented. It contains carbonic acid, carbonate of iron, and sulphate of magnesia.

TUNDA OCULI, Conjunctiva membrana.

TUNDUS CORDIS, Mucro cordis.

TUNIC, *Tunica*, *Chiton*, a coat. An envelope. A name given to different membranes, which envelop organs; as the tunics or coats of the eye, stomach, bladder, &c.

TUNICA ACINALIS, Uves—t. Aciniformis, Uves—t. Acinosa, Uves—t. Adnata, Conjunctiva—t. Agnata, Conjunctiva—t. Alba oculi, Sclerotic—t. Albuginea, Albuginea—t. Albuginea oculi, Sclerotic—t. Allantoides, Allantois—t. Arachnoides, Arachnoid membrane—t. Aranea, Arachnoid membrane—t. Caduca, Decidua—t. Candida oculi, Sclerotic—t. Carnosa, Panniculus carnosus—t. Conjunctiva, Conjunctiva—t. Costalis, Pleura—t. Crassa, Decidua—t. Crystallina, Arachnoid membrane—t. Dura oculi, Sclerotic—t. Durior et crassa, Sclerotic—t. Elytroides, Vaginalis tunica—t. Erythroides, Cremaster—t. Exterior ovi, Decidua—t. Extima oculi, Sclerotic—t. Farcinialis, Allantois—t. Filamentosa, Decidua

TUNICA GRANULO'SA. An investment of the ovum exterior to the zona pellucida, described by Dr. Barry, but the existence of which, as a structure, distinct and independent from the membrana granulosa, is denied.

TUNICA HORTENSIS, Dianthus caryophyllus—t. Innominata oculi, Sclerotic—t. Interna oculi, Retina.

TUNICA JACO'BL. A highly delicate serous

membrane, interposed between the retina and the choroid coat, discovered by Dr. Jacob, of Dublin. Its structure is curious, being composed of cylindrical, transparent, highly refractive staff-shaped bodies, and hence called *Stratum bacillatum*, which are arranged perpendicularly to the surface of the retina, their outer extremities being imbedded, to a greater or less depth, in a layer of the pigmentum nigrum.

TUNICA MUSCULARIS, Dartos — t. Nervorum, Neurilemma — t. Perforata, Uvea — t. Prætensa abdominis, Peritonæum — t. Reticularis, Retina — t. Retiformis, Retina — t. Rhagoides, Choroidæ tunica, Uvea — t. Rubiunda scroti, Dartos — t. Rubra, Dianthus caryophyllus — t. Ruyschiana, see Choroid — t. Subcostalis, Pleura — t. Thoracis, Corset — t. Uvalis, Uvea — t. Uvea, Uvea — t. Uviformis, Uvea — t. Vaginalis, see Vaginal — t. Vaginalis Linguae, see Tongue — t. Vaginalis Propria, Vaginal coat of the Testicle — t. Vaginalis reflexa, Vaginal coat of the Testicle — t. Vasculosa oculi, Choroid, see Eye.

TUNICA VASCULOÏSA TESTIS, *Pia mater testis*. An extremely delicate membrane, consisting of minute ramifications of the spermatic vessels united by areolar tissue, which separates the lobules of the testis from each other. It is situated immediately within the tunica albuginea, and encloses the substance of the gland. It sends processes inward that separate the lobules, in the same manner as the pia mater is reflected between the convolutions of the brain.

TUNICA VITREA, Hyaloid membrane.

TUNICULA, Clitoris.

TUNIQUE ALBUGINÉE, Albuginea.

TUNNYFISH, SALTED, Omotarihos.

TUPHLO-ENTERITIS, Typhlo-enteritis.

TUPHUS, Typhus.

TUPINARIA, Talpa.

TURBA HÆMORRHOIDALIS, see Hæmorrhoids.

TURBATIONES ANIMI, Affections of the mind.

TURBINATED BONES, *Ossa turbinata*. Bones shaped like a top; from *turbo* or *turben*, 'a top.' *Ossa spongiosa*, *Cornua*, *Concha na'rrium*, *Tur'bines nasi seu na'rrium*, *Conchyl'ia*, *Bucci'na*, *Lam'ina spongiosa nasi*, *Ossa tertia maxillæ superioris*. Very thin, bony plates, rolled up in the form of horns, and situated in the nasal fossæ. 1. *Ossa spongiosum superius* or *Cornet de Morgagni*; — the highest. 2. *Ossa spongiosum medium*, the middle cornu of French anatomists, — the ethmoidal cornu or *Ossa spongiosum superius*, *Ossa turbinatum*, of English anatomists, *Ossa convolutum superius*, *Concha*, *C. na'rrium superius*, *C. Morgagniana*, (F.) *Cornet Moyen*. This bone projects inwards and downwards into the cavity of the nose, from the ethmoid cells at the side of the nasal lamella, and serves to enlarge the organ of smell. It is convex towards the septum, and concave outwards. 3. *Ossa spongiosum vel turbinatum inferius*, *Concha inferior*, *Convolutum inferius os*, *Ossa sub-ethmoidal*, (Ch.), projects at the under part of the side of the nose, is convex towards the septum, and concave outwards. It is connected to the os maxillare, os palati, and os unguis. 4. *Sphenoid'at cornu*.

All the turbinated bones extend the olfactory surface.

TURBINES NASI seu NARIUM, Turbinated bones.

TURBITH BLANC, *Globularia alypum* — t. Mineral, *Hydrargyrus vitriolatus* — t. Montpellier, *Globularia alypum* — t. Plant, *Convolvulus turpethum*.

TURBO CEREBRI, Pineal gland.

TURGENTIA, Turgescence.

TURGES'CENTE, *Turges'cency*, *Turgid'ity*, *Tur'gidness*, *Turgescent'ia*, *Turgen'tia*, *Orgas'mus*, from *turgescere*, 'to swell.' Superabundance of humours in a part. The term *Turgescence of Bile* was formerly used to denote the passage of that fluid into the stomach, and its discharge by vomiting. A vital action of turgescence or expansibility — *Turgor vitalis* — has been presumed to exist in certain organs, as in the capillaries; but the generality of physiologists do not admit it.

TURGESCENTIA, Turgescence.

TURGESCENTIA VESICULÆ FELLÆ, *Acet'ies Hep'ato-cyst'icus*, *Physco'nia bili'osa*, *Hepatal'gia Petiti'na*, *Cytoce'llis bili'osa*, *Hydrocholecyst'is*, *Hydrops vesic'æ fell'æ*, (F.) *Hydropisic de la Vésicule du Fiel*, *Distension de la Vésicule du Fiel*, *Cholicystictasie*. Distension of the gall-bladder by bile.

TURGIDITY, Turgescence.

TURGIDNESS, Turgescence.

TURGOR VITALIS, see Turgescence.

TURMERIC, *Curcuma longa*, *Sanguinaria Canadensis*.

TURN OF LIFE, see Menses.

TURNING, *Versio*, *V. facta*, from (F.) *turner*, 'to turn.' (F.) *Versio*. The operation of bringing down the feet, or some part of the lower extremity, when the presentation of the child is such that it cannot be delivered by the natural efforts.

TURNIP, *Brassica rapa* — t. Dragon, *Arum triphyllum* — t. Indian, *Arum triphyllum* — t. Pepper, *Arum triphyllum*.

URNS, Menses.

TURPENTINE, *Terebinthina* — t. Bordeaux, see *Pinus sylvestris* — t. Briangon, see *Pinus cembra* — t. Chio, see *Pistacia terebinthus* — t. Common, see *Pinus sylvestris* — t. Common, American, see *Pinus sylvestris* — t. Cyprus, see *Pistacia terebinthus* — t. Damarra, see *Pinus damarra* — t. Dombeya, see *Dombeya excelsa* — t. Horse, see *Pinus sylvestris* — t. Strasburg, see *Pinus picea* — t. Tree, *Pistacia terebinthus* — t. Venice, see *Pinus larix* — t. Venice, true, see *Pistacia terebinthus* — t. White, see *Pinus sylvestris*.

TURPETHUM, *Convolvulus turpethum* — t. Minerale, *Hydrargyrus vitriolatus* — t. Nigrum, *Hydrargyri oxydum cinereum*.

TURQUOISE. This stone has been long imagined to change its colour, according as the wearer is at the time in good or bad health: — a superstitious notion.

TURTLE BLOOM, *Chelone glabra* — t. Green, *Chelonia mydas* — t. Head, *Chelone glabra*.

TURUNDA, Tent.

TURUNDULA, Tent.

TUSSACA RETICULATA, *Goodvera pubescens*.

TUSSEDO, Tussis.

TUSSICULA, Tussis.

TUSSICULAR, *Tussicular'is*, *Tussiculo'sus*, from *tussis*, 'a cough.' Relating to a cough, or to a slight cough.

TUSSICULOSUS, Tussicular.

TUSSILA'GO, *T. Far'fara seu vulg'aris*, *Be'chium*, *Be'chion*, *Cal'ceum equi'num*, *Chamaele'ca*, *Chamaegi'ron*, *F'ikus ante patrem*, *Farsure'lla*, *Galliomarchus*, *Farfara*, *Farfara Be'chium*, *Un'gula caballi'na*, *Coltsfoot*, (F.) *Pae d'âne*. Family, *Corymbiferae*. *Sex. Syst.* Syngenesia Polygamia Superflua. It is demulcent and expectorant, and has been used in coughs, and pulmonary affections in general, and in some cutaneous diseases.

TUSSILAGO FARFARA, *Tussilago* — t. Hybrida, *T. pelasites*.

certain muscles, and representing a kind of bent lever extending from the membrana tympani to the fenestra ovalis. They are called the *Bones* or *Ossicles of the Ear*, and are the malleus, incus, or orbicularis, and stapes.

For the nervous plexus of the tympanum, see Petrosal Ganglion, and Otic Ganglion.

TYMPANUM MINUS, see Fenestra — t. Secundarium, see Fenestra.

TYMPANY, Tympanites — t. of the Womb, Physometra.

TYPE, *Typus*, *Periodus morbi*, from *τυπος*, 'a stamp,' itself from *τυπτω*, 'I strike.' The *type* is the order in which the symptoms of a disease exhibit themselves, and succeed each other. It may be continued, intermittent, or remittent.

TYPHA ANGUSTIFOLIA has the same properties as

TYPHA AROMATICA, *Acorus calamus*.

TYPHA LATIFOLIA, *Cattail*, *Reed mace*, (F.) *Mussette*, *Musse d'Eau*, (*τυφος*, 'a marsh,' [?]). A plant common in marshes and ponds, in this country and in Europe. *Family*, Typhaceæ. *Sex. Syst.* Monœcia triandria. Its roots have been used in dysentery and blennerhagia. The young shoots, before they reach the surface of the water, taste like asparagus, when boiled.

The down, (F.) *Aigrette*, *Poils*, which accompanies the flowers, has been applied to burns like cotton.

TYPHICUS, Typhoid.

TYPHIQUE, Typhoid.

TYPHLITIS, Typhlo-enteritis.

TYPHLO-ENTERITIS, *Typhlo-enteritis*, *Typhilitis*, *Typhloteritis*, *Inflammatio Cæci*, *Phlegmonous Tumour of the Cæcum*, (F.) *Inflammation du Cæcum*, from *τυφος*, *cæcus*, and *enteritis*, 'inflammation of the intestines.' Inflammation of the cæcum, occasionally leading to perforative ulceration.

TYPHLOENTERUM, Cæcum.

TYPHLOPS, Cæcus.

TYPHLOSIS, Cæcitas.

TYPHLOTERITIS, Typhlo-enteritis.

TYPHLOTERON MONOCOLON, Cæcum.

TYPHLOTERUM, Cæcum.

TYPHLOTES, Cæcitas.

TYPHOIDES, Typhoid.

TYPHOËMIE ENTÉRIQUE, see Typhus.

TYPHOHÆMIA, see Putrefaction.

TYPHOID, *Typhoïdes*, *Typhoïdes*, *Typhicus*, *Typhoïsus*, *Lactica*, (F.) *Typhique*, *Typhoïde*, *Typhode*. Appertaining to or resembling typhus; as *Typhoid Fever*. Also, according to some, *Typhous Fever*, typhus. Fuchs has employed the word *Typhoïde* for a family of diseases, to distinguish them from *phlogoses*; of this family, *Stomacace*, *Pharyngocace*, and *Pneumocace* are examples.

TYPHOID AFFECTION, see Typhus — t. Fever of India, Cholera.

TYPHOMANIA, from *τυφος*, 'stupor,' and *μανια*, 'delirium.' *Delirium with stupor*, *Subdelirium*. The kind of delirium common in typhus.

TYPHOMANIA, *Coma vigil*, *Insomnia*.

TYPHONIA, *Coma vigil*.

TYPHOSEPSES, *Typhoseptoses*.

TYPHOSEPTOSES, *Typhoseptoses*, from *τυφος*, 'stupor,' and *σηψις*, 'putrefaction.' *Typhous affections*.

TYPHOSUS, Typhoid.

TYPHOUS, *Typhoïsus*; same etymon as Typhus. Belonging or relating to typhus.

TYPHOUS DEPOSIT. A peculiar substance of new formation found in the areolar membrane,

between the mucous and muscular coats of the patches of Peyer in typhoid fever.

TYPHOUS FEVER, see Typhoid.

TYPHUS, *Semipestis*, *Typhus*, *Febris Typhoïdes*, *Febris asthenica seu adynamica*, *Asthenopyra*, (F.) *Fievre adynamique*, *F. ataxique*, *F. adynamique ataxique*, *Typhus d'Europe*, from *τυφος*, 'stupor.' A fever characterized by small, weak, and unequal, but usually frequent pulse, with great prostration of strength, and much cerebral disturbance; its duration being usually from a fortnight to three weeks or longer. It is continued fever, accompanied with great cerebral irritation and prostration. (See Fever.) By most writers, this disease has been divided into two varieties—the *Typhus mitior* and *Typhus gravior*. TYPHUS MITIOR, *T. simplex*, *T. nervosus*, *T. comatosus*, *F.bris lenta nervosa*, *Blethropyrus*, *F. putrida nervosa*, *F. hec'tica maligna nervosa*, *Nervous Fever*, *Neuropyra*, *Neuropyretus*, (F.) *Fievre nerveuse*, is characterized by slight shiverings, heavy, vertiginous headach; great oppression, peculiar expression of anxiety, nausea, sighing, despondency, and coma or quiet delirium. TYPHUS GRAVIOR, *Typhus carcerum*, *T. castrensis*, *T. anthropophthoracus*, *True Typhus*, *Exanthematic typhus*, *Nervous fever with exanthematic eruption*, *Contagious typhus*, *Febris nervosa epidemica*, *F. nervosa exanthematica*, *F. maligna cum sopore*, *F. nervosa petechialis*, *F. pestilentialis Europæa*, *Typhus contagiosus exanthematicus*, *T. nostras*, *T. Europæus*, *T. communis*, *T. bellicus*, *T. exanthematicus*, *T. Hibernicus*, *Pestis bellica*, *Febris pestilens maligna*, *Febris navtica pestilentialis*, *Febris petechialis*, *Typhus petechialis*, *Porphyro-typhus*, *Pulicula'ris morbus*, *Febris puncticula'ris*, *F. Saprotyra*, *F. carcerum et nosocomiorum*, *F. Putrida*, *F. continens putrida*, *F. continua putrida*, *Septopyra*, *Putrid Fever*, *Jail Fever*, *Hospital Fever*, *Ship Fever*, (F.) *Fievre des Camps*, *F. nautique*, *F. d'Hôpital*, *F. nosocomiale*, *F. des Prisons*, *F. lenticulaire*, *Typhus contagieux*, is attended with rigors and heat, alternating; little or no perspiration; pulse, tense and hard, usually quick, but fluttering; pain over the forehead and vertex; a 'mulberry rash,' appearing on the fifth to the seventh day of the disease, and lasting till the end; delirium, succeeded by stupor, signs of incipient putrescency,—as true petechiæ, vibices, hemorrhages, &c. Typhus, under particular circumstances, seems to be communicable by contagion; but if proper attention be paid to cleanliness and ventilation, there is not much danger of communication. The general principles of treatment, laid down under the head of Fever, are applicable here. All the varieties of continued fever resemble each other in the cardinal points, although they may differ in many of their characters. Ventilation and cleanliness; warm or cold ablution or sponging; keeping the bowels free; and attending to symptoms as they may rise, with the avoiding of all irritation of every kind, are the main indications. When symptoms of great prostration occur, the strength must be supported by wine; and tonics be exhibited, with the mineral acids. Of the tonics, the sulphate of quinia is perhaps as good as any, whilst it is free from the objection which applies to most others,—of being too bulky. In the whole management of this affection, however, the physician has to discriminate carefully between oppression and prostration. The former may require evacuates; the latter cannot.

Of late, certain observers have endeavoured to show, that there is an essential difference between typhoid fever and typhus; that the former is an abdominal affection, and dependent upon, or con-

nected with, an inflamed or ulcerated condition of the mucous follicles of the intestines; hence it has received the names *Fèvre mésentérique*, *F. typhoïde*, *Maladie ou Affection typhoïde*, *F. entéro-mésentérique*, *Entérite typho-hémique*, *Typhoémie entérique*, *Entéro-mésentérique typhoïde*, *Exanthème intestinale*, *Dothinentérie*, *Dothinentérite*, &c., *Ileodickidite*, *Entérite folliculeuse*, *Gastro-entérite* with nervous affection of the brain, *Follicular gastro-enteritis*, *F. enteritis*, *Enteritis folliculo'sa*, *Typhus abdominalis*, *T. intestinalis*, *T. Sporadicus*, *Enterotyphus*, *T. ganglionaris abdominalis*, *Febria intestinalis ulcero'sa*, *F. nervosa gastrica*, *F. nervosa enterica*, *F. enterica*, *F. nervosa mesenterica*, *Enterhelio'sis nervosa*, *Typhus entericus*, *Ileotyphus*, *Ileotyphus*, *Typhoid affection*, *Enteric fever*. Accompanying this form of fever there is generally a typhoid eruption, consisting of rose-red papules, (see Spots, red,) which appear mostly on the abdomen. They are distinct from true petechiæ, as they can be removed by pressure; and distinct also from sudamina, which are perhaps the universal accompaniments of sweating, and are consequently a variety of miliaria. The common continued fever or synochus of Great Britain, and of this country, has been presumed by some to be this variety; but farther observations are needed to establish the distinctions which have been attempted; and there is reason to believe, that the abdominal affection is a complication, existing in certain cases and epidemics of adynamic fever, and not in others. The *Red Tongue Fever* of Kentucky is considered by Professor Bartlett to be typhoid fever.

Certain modern French writers have considered the Typhus of the European continent, *Typhus of Europe*, *Peste d'Europe*, *pestilential fever*, *contagious typhus*, *Hungary fever*, *Hospital fever*, *camp fever*, *jail fever*, *lenticular petechial fever*, &c., to be identical with the typhoid affection. They admit but one fever on the European continent—the typhoid. Typhus, they maintain—but by no means establish the position—to be peculiar to England.

TYPHUS ABDOMINALIS, see Typhus—t. d'Amé-

rique, Fever, yellow—t. Anthracicus, Plague—t. Anthropophthoracus, Typhus—t. Aphthoides, Aphthæ—t. Bellicus, Typhus—t. Bengalensis, Cholera—t. Bubonicus, Plague—t. Carcerum, Typhus gravior—t. TYPIC, *Typical*, *Typicum*, (F.) *Typique*. Same etymon as *Type*. Characterized by periodicity,—as a 'typical fever;' or one which observes a particular type.

TYPOSES, see Periodicity.

TYPUS, *Type*.

TYRANNUS, see Critical days.

TYRBASIA, Agitation.

TYRBE, Agitation.

TYREM'ESIS, *Tyrotens'esis*, from *tyros*, 'cheese,' and *esis*, 'vomiting;' *Tyro'sis*, *Tyreu'sis*. Vomiting of curdy matter, in infants especially.

TYREUSIS, Tyremesis, Tyrosia.

TYRIA, Porrigo decalvans.

TYRIASIS, Elephantiasis Arabica.

TYRODES, Cheesy.

TYROMA, Porrigo decalvans.

TYROS, Cheese.

TYROSIS, Tyremesis. Also, the curdling of milk in the stomach; *Tyreu'sis*.

TYROTEMESIS, Tyremesis.

U.

UBERIS APEX, Papilla.

ULA, Gingivæ.

ULATROPH'IA, from *ελεω*, 'the gum,' and *atrophia*, atrophy. Shrinking of the gums; falling away of the gums.

ULCER, *Ulcus*, (diminutive *Ulcusculum*), *Helcos*, *Elco'sis*, *Elco'ma*, *Helcos*, *Helco'ma*, a Sore, (F.) *Ulcère*. A solution of continuity in the soft parts, of longer or shorter standing, and kept up by some local disease or constitutional cause. Richerand makes four great distinctions between a wound and an ulcer. 1. A wound arises from the action of an extraneous body:—the cause of an ulcer is inherent in the economy. 2. A wound is always idiopathic:—an ulcer is always symptomatic. 3. A wound has essentially a tendency to heal, because the action of its cause has been momentary:—an ulcer, on the contrary, has a tendency to enlarge, because its cause persists. 4. The treatment of a wound is purely surgical; that of an ulcer is medical as well. The immediate cause of an ulcer is an augmented action of the absorbents; and a specific action of the small vessels, which secrete pus from the blood. Ulcers have been variously divided, according to their nature;—into *simple*, *venous*, *fistulous*, *fungous*,

gangrenous, *scorbutic*, *syphilitic*, *cancerous*, *isenterate*, *scrofulous*, *phagedenic*, *virulent*, *cæcotic*, *sordid*, *carious*, *varicose*, &c. The treatment consists in removing, by appropriate means, the internal and the local causes which keep up the ulceration, and in exciting the vessels of the part, where necessary, by appropriate bandaging, &c.

ULCER, MALIGNANT, Hospital gangrene—u. Putrid, Hospital gangrene.

ULCERA INTESTINALIA, *Gastroecosis*—u. Laryngis, Phthisis laryngea—u. Serpentis oris, Aphthæ—u. Uteri, see Metrophtthisis—u. Ventriculi, *Gastroecosis*—u. Vesicæ, Cystophtthisis.

ULCERATED, *Ulcera'tus*, *Exulcera'tus*, *Helco'des*, (F.) *Ulcéré*. In the state of an ulcer. Affected with ulcers.

ULCERATIO INTESTINALIS, *Enterocœcosis*—u. Ventriculi, *Gastroecosis*.

ULCERA'TION, *Ulcera'tio*, *Exulceratio*, *Pyogen'ia corrosi'va*. A superficial ulcer. The formation of an ulcer—*Exelco'sis*, *Elco'sis*, and *Helco'sis*.

ULCÈRE, Ulcer—u. *du Larynx*, Phthisis laryngea.

ULCEROUS, *Ulcero'sus*, *Helco'des*, *Helco'idem*.

Having the character of an ulcer. Affected with ulcers.

ULCERS, EGYPTIAN, *Ægyptia ulcera*.

ULCUS, Ulcer—u. Atonicum, Rupia—u. Cacoethes, see Cacoethes—u. Cancrosum, Cancer, Chancre—u. Dacryodes, see Dacryodes—u. Depascens, Phagedenic ulcer—u. Ferinum, Phagedenic ulcer—u. Fistulosum, Hypophora—u. Hypulium, see Hypulus—u. Narium foetens, Osæna—u. Obambulans, Phagedenic ulcer—u. Pulmonum, Phthisis pulmonalis—u. Sinuosum, Hypophora—u. Syriacum, Cynanoche maligna—u. Telephium, Telephium—u. Tuberculosum, Lupus—u. Uteri, Hysteroleosis, Leucorrhœa.

ULCUSCULA PRÆPUTII, Herpes præputii. ULCUSCULUM, Ulcer—u. Cancrosum, Chancre.

ULE, Cicatrix.

ULETICUS, Gingivalis.

ULICUS, Gingivalis.

ULITIS, from *υλος*, 'solid,' (*σπῆξ υλος*, 'solid flesh:'), hence, *υλος*, 'the gum.' *Inflammatio gingivæ*, *Periodontitis gingivarum*, (F.) *Gengivite*, *Inflammation des gencives*, from *υλος*, 'the gum,' and *itis*, denoting inflammation. Inflammation of the gums.

ULITIS SÆPTICA, Cancer aquaticus.

ULLUCO, *Tropæolum tuberosum*.

ULMAIRE, *Spiræa ulmaria*.

ULMARIA, *Spiræa ulmaria*—u. *Palustris*, *Spiræa ulmaria*.

ULMUS, *U. campestris seu glabra seu montana seu nuda seu sativa seu scabra, Ptelea, Common Elm*, (F.) *Orme*. Family, *Amentaceæ*. *Sex. Syst.* *Pentandria Digynia*. The inner, rough bark of this tree is inodorous; and has a bitter, austere, and mucilaginous taste. It is considered tonic, alterative, and diuretic; and has been used, chiefly, in lepra and other cutaneous affections.

ULMUS ALATA, *Lynn Waloo*. The bark of the root has been used successfully as a cataplasm in phlegmonous inflammation.

ULMUS AMERICANA, *U. fulva, Rough-leaved Elm, Red Elm, Slippery Elm*. The inner bark is highly mucilaginous, and is used in coughs, diarrhoeas, and dysenteries; also, as a poultice for tumours; lacerated and contused wounds, &c.

ULMUS CAMPESTRIS, *Ulmus*—u. *Fulva*, *U. Americana*—u. *Glabra*, *Ulmus*—u. *Montana*, *Ulmus*—u. *Nuda*, *Ulmus*—u. *Sativa*, *Ulmus*—u. *Scabra*, *Ulmus*.

ULNA, *O'lenâ*, *Foc'itâ inferius seu majus, Cassa Bra'chii, Os cubiti inferius, Os procubitalis, Cubitus, Cubit, Arun'do bra'chii major*. Anatomists have given this name to the bone of the forearm which forms the prominence of the elbow, during the flexion of that joint. It is the longer and larger of the two bones, and is inserted at the inner side. Its upper and larger extremity has, behind, a considerable process, called *olecranon*; and, before, a smaller one, called *coronoid*. These two eminences are separated from each other by the greater sigmoid or semilunar fossa or olecranonoid cavity, which receives the articular trochlea of the humerus. The tubercle of the ulna is a small, rough spot, under the root of the coronoid process, for the insertion of the *Brachialis internus*. On the outside of this extremity of the bone is the lesser sigmoid cavity. It is articulated with the head of the radius. The inferior extremity of the cubitus, which is much smaller than the superior, and articulated with the radius, has a surface that corresponds to the fibro-cartilage which separates it from the os cuneiforme; and a pointed process, called *styloid*. The body of the ulna is manifestly triangular. It is articulated with the os humeri and radius, and, medially, with the

os cuneiforme. It is developed by three points of ossification.

Also, the elbow.

ULNAD, see *Ulnar aspect*.

ULNAR, Cubital.

ULNAR ASPECT. An aspect towards the side on which the ulna is situated.—*Barclay*. *Ulnad* is used adverbially by the same writer, to signify 'towards the ulnar aspect.'

ULNARIS, Cubital—u. *Externus*, see *Cubital muscles*—u. *Gracilis*, *Palmaris longus*—u. *Internus*, see *Cubital muscles*.

ULOCACE, *Cancer aquaticus, Stomacace*.

ULON'CUS, from *υλος*, 'the gum,' and *οκος*, 'tumour.' Swelling of the gums; epulis.

ULORRHAG'IA, *Stomatorrhag'ia, Hemorrhag'ia gingivarum, Ulorrhœa*, from *υλος*, 'the gum,' and *ρρηνμι*, 'I break forth.' Bleeding from the gums.

ULORRHŒA, *Ulorrhagia*.

ULOTICA, *Cicatrix alba*.

UL'TIMI-STERNAL. Professor *Béclard* has given this appellation to the sixth or last bony portion of the sternum. He calls it also *Ensi-sternal*.

UL'TIMUM MO'RIENS, 'last dying.' A term given to the part of the economy which dies last.

ULVA CRISPA, *Fucus crispus*.

UMBIL, YELLOW, *Cypripedium luteum*.

UMBILIC, Umbilical, Umbilicus.

UMBIL'ICAL, *Um'bilio, Umbilicalis, Umbilicatus*, from *umbilicus*, 'the navel.' That which belongs or relates to the navel.

UMBILICAL ARTERIES, which exist only in the fœtus, seem, as it were, continuations of the primitive iliacs. They clear the umbilical ring, and proceed to the placenta, to which they carry the residuum of the blood sent to the fœtus by the umbilical vein. As soon as respiration is established, the blood ceases to pass by the umbilical arteries, which become obliterated, as well as the vein, and are transformed into two very strong ligamentous cords,—the vein forming the *Ligamentum rotundum* of the Wier.

UMBILICAL CORD, *Funiculus umbilicalis*.

UMBILICAL REGION, *Re'gio umbilicalis, Mesogastrium Re'gio gastrica seu Mesogastria*, (F.) *Région ombilicale*, is the middle region of the abdomen, in which the umbilicus is placed. The sides of this are called the *flanks* or *lumbar regions*. In the umbilical region are the omentum majus; the inferior extremity of the duodenum; the jejunum; and the greater part of the mesentery; the aorta; vena cava; the trunks of the renal arteries and veins; the origin of the spermatic arteries, &c.

UMBILICAL RING, *An'nulus umbilicalis*, (F.) *Anneau ombilical*, is a fibrous ring which surrounds the aperture of the umbilicus, and through which umbilical hernia occurs in children.

UMBILICAL VESICLE, *Vesicula umbilicalis*.

UMBILICAL VESSELS, (F.) *Vaisseaux ombilicaux*, include the two arteries, and umbilical vein. The umbilical vein arises from the placenta, and terminates at the fissure on the inferior surface of the liver of the fœtus, to which it conveys the blood necessary for its nutrition.

UMBILICALIS, Umbilical.

UMBILICATUS, Umbilical.

UMBIL'ICUS, *Umbo, Om'phalos, Umbilicum, Radix ventris, Mesomphalium, Mesomphalum, Protome'sis*, (navel of a new-born child,) the umbilic, the navel; from *umbo*, 'the button or prominence in the midst of a buckler,' or from *υφαλος*, or rather *οφαλος*, which signifies the same, as well as the navel; (F.) *Ombilic, Nombilic*. A

round cicatrix, about the median line of the abdomen. It is in the situation of an aperture, which, in the fetus, affords passage to the vessels of the umbilical cord.

UMBILICUS MARI'NUS, *Cotyle'don marina*, *Androsacè*, *Acetabulum marinum*, *Androsacè Matthi'oli*, *Fungus petraeus marinus*. A submarine production, found on the rocks and the shells of fishes, in the south of France. It is reputed to be anthelmintic and diuretic.

UMBO, Elbow, Umbilicus.

UMBRELLA TREE, *Magnolia tripetala*.

UMSCHLAG, see Compress.

UNBOWELING, Exenterismus.

UNCARIA GAMBIR, *Naucloa Gambir*.

UNCAS, INDIAN, *Veratrum viride*.

UNCIA, Ounce.

UNCIFORM, *Unciformis*, *Uncinatus*, from *uncus*, 'a hook,' and *forma*, 'shape.' That which has the shape of a hook.

UNCIFORM BONE, *Os unciforme*, *Os hamatum*, *Os uncinatum*, (F.) *Os crochu*. The fourth bone of the second row of the carpus. Its shape is very irregular. Inwards and forwards, it has a considerable eminence, which is curved upon itself, and gives attachment to the annular ligament of the carpus. It is articulated with the os semilunare, os magnum, os cuneiforme, and the fourth and fifth metacarpal bones. It is developed from a single point of ossification.

UNCIFORM EMINENCE, *Hippocampus minor*.

UNCINATUS, Unciform.

UNCINUS, Hook.

UNCTION, Inunction, Unguentum, Unguentum hydrargyri.

UNCUS, Hook.

UNDERCLIFF, ISLE OF WIGHT, ENGLAND, (CLIMATE OF.) The Undercliff comprehends a tract of country from Dunnose to St. Catherine's Hill, on the southeast coast, about six miles in length, and from a quarter to half a mile in breadth. It is well protected from the colder winds; and the climate is remarkably equable, as well as mild and dry, so that there are not many days during the winter in which the invalid cannot take some exercise in the open air. It is an excellent climate for the pulmonary valedudinarian.

UNDIM'IA. A name given, by Paracelsus, to a tumour, filled with a gelatinous matter, like the white of an egg.

UNDOSUS, Cymatodes.

UNDULATIO, Fluctuation.

UNEDO, *Arbutus unedo* — u. *Papyracea*, *Arbutus unedo*.

UNGEAL MATRIX, see Nail.

UNGUEN, Unguentum — u. *Articulare*, *Synovia*.

UNGUENT, ARMATORY, *Hoplochrysa*.

UNGUENTARIA, see *Myristica moschata*.

UNGUENTARIUS, *Myropæus*, *Myrepæus*, *Myropætes*, *Myropælus*, *Pigmentarius*; from *unguentum*, 'an ointment.' One who makes and sells ointments. A perfumer.

UNGUENTUM, *Unguen*, *Myron*, *Uction*, (F.) *Onguent*, from *ungere*, 'to anoint.' Ointment. Ointments are topical applications, of a consistence more or less analogous to that of lard. They are used, chiefly, as local applications to ulcers and wounds; but are sometimes rubbed upon a part in cutaneous affections; and, especially, where it is desired that the constituents of the ointment should be absorbed. Ointments are of less consistence than cerates, although the terms are often used indiscriminately.

UNGUENTUM AC'IDI NITRO'SI, *Ointment of Nitrous Acid*, *Pomatium vel Unguentum Nitricum vel Oxygenatum*, (F.) *Pommade oxygénée*, *Graisse*

oxygénée, *Pommade d'Alyon*. (*Adip. suilla*, ℞j; *acid. nitros.* ℥vj. Melt the fat, and rub in the acid gradually, till cold. *Ph. E.*) Stimulant. Used in itch and other cutaneous eruptions, and in foul ulcers.

UNGUENTUM ADIPOCERÆ CETORUM, *Ceratum cetacei* — u. *Egyptiacum*, *Linimentum seruginis* — u. *Egyptium album*, *Crinomyron* — u. *Album*, *Unguentum cetacei* — u. *Album Resolvens*, *Linimentum ammoniac fortius*.

UNGUENTUM DE ALTHÆA, *Marsh mallow Ointment*, *U. de Terebinthind et cerâ*, *Ceratum de Althæa*, *Emplastrum mucilaginosum*, *E. emolliens*, *E. citrinum*, *E. flavum*, *E. de Althæa*, *Unguentum flavum*, *U. Citrinum*, *U. resinæ pini sylvestris compositum seu resumptivum seu lenitivum*, (F.) *Onguent de guimauve*, *O. d'althæa*. (*Oil de mucilaginis*, 1000 p., *cerâ flavæ*, 250 p., *resinæ terebinthin.*, ℞ 125 p. Liquefy; strain and stir till cold. *Ph. P.*) *Common Olive Oil* might be substituted for the *Oil of Mucilage*.

UNGUENTUM AMYGDALINUM, *Ceratum Galeni*.

UNGUENTUM ANTIMONII, *U. A. Tartarizati*, *U. A. Potassio-tartratis*, *U. tartari emetici*, *Ointment of tartarised antimony*. (*Antimon. et potass. tartrat.* in pulv. subtiliss. ℥ij, *adipis* ℥ij) If a drachm of this ointment be rubbed upon any part, night and morning, it will excite, in a few days, a painful pustular eruption. Hence, it is employed as a counter-irritant. This preparation is also called *Ung. Tartari stibiati seu emetici*, *Ung. e Tartaro stibiato*, *Adeps Tartari stibi medicinalis*, *Ung. Tartratis Potassæ stibiati*, (F.) *Pommade d'Autenrieth*, *Pommade stibie*.

UNGUENTUM ANTIMONII POTASSIO-TARTRATIS, *Unguentum antimonii* — u. *Antimonii tartarizati*, *U. antimonii* — u. *Antipernium*, see *Antipernia*.

UNGUENTUM AQUÆ ROSÆ, *Ointment of Rose water*, *Cold Cream*. (*Aq. Rosæ* ℥℥j; *ol. amygdol.* ℥℥ij; *cetacei*, ℥ss; *cerâ albæ*, ℥j. Melt together, in a water-bath, the oil, spermaceti, and wax; then add the rose-water, and stir until it is cold. *Ph. U. S.*) Cooling to irritated surfaces.

UNGUENTUM ARMARIUM, *Hoplochrysa* — u. *Arthanita*, see *Arthanita* — u. *Articulare*, *Synovia* — u. *Basilicon flavum*, *Ceratum resinae* — u. *Basilicon nigrum*, *Unguentum resinae nigrae* — u. *Basilicon viride*, *Unguentum subacetatis cupri*.

UNGUENTUM BELLADONNÆ, *Ointment of Belladonna*. (*Ext. belladonnæ* ℥j; *adipis* ℥j; *M. Ph. U. S.*) An anodyne application to irritable ulcers, &c.

UNGUENTUM CANTHARIDIS, *Unguentum lytta*.

UNGUENTUM CERÆ (*albæ vel flavæ*), *Wax Ointment*, *Unguentum simplex*, (*Ph. U. S.*) *Linimentum simplex*, *Oil and Bees' Wax*, (F.) *Onguent de cire*. (*Cerâ* ℞j, *adipis* ℞iv, *Ph. U. S.* or — *cerâ* ℥ij, *ol. oliv.* ℥v.) Emollient. A mild dressing. Also, the basis of most of the compound ointments.

UNGUENTUM CERATUM, *Ceratum Galeni* — u. *Cerussæ*, *Unguentum oxidi plumbi albi*, *Unguentum plumbi subcarbonatis* — u. *Cerussæ acetata*, *Ceratum plumbi superacetatis*, *U. plumbi superacetatis* — u. *Citrinum*, *U. de althæa*, *U. hydrargyri nitratis*.

UNGUENTUM CETA'CEI, *Unguentum Spermaceti*, *U. album*, *Linimentum album*, *Spermaceti ointment*, (F.) *Onguent de blanc de baleine*. (*Spermaceti* ℥vj, *cerâ albæ* ℥iv, *ol. oliv.* ℥℥ij. *Ph. L.*) The ordinary dressing for blisters and excoriations.

UNGUENTUM CREASO'TI, *Ointment of Creasote*. (*Creasot.* ℥℥ss; *adipis*, ℥j. Add the creasote to the lard previously melted with a moderate heat, and stir constantly till cold. *Ph. U. S.*) Used in chronic cutaneous affections.

UNGUENTUM CUPRI SUBACETATIS, Unguentum subacetatis cupri.

UNGUENTUM DIGESTIVUM SIMPLEX, *U. Terebinthinae et ovo'rum citelli*, Simple digestive ointment, (F.) *Onguent digestif simple*. (Terebinthin. par. 84 p. Vitell. ocor. Nq. 2, vel 32 p. Mix, for a long time, in a glass mortar, and add, gradually, enough of the Oil of Hypericum (Millepertuis) to make a soft ointment. Ph. P.) Detergent. It may be rendered more so by adding a little of the Acetate of copper.

UNGUENTUM ELEMI, Balsam of Arcæus, Unguentum elemi compositum.

UNGUENTUM ELEMI COMPOSITUM, *Linimentum Arcæi*, Unguentum e gummi elemi, *Ung. de Terebinthina et adip'ibus*, U. elemi, Ointment of Elemi, (F.) *Baume d'Arcæus*. (Elemi ℞j, terebinthina vulgaris ℥x, seri præparati ℞ij, olivæ olei f℥ij. Melt the elemi with the suet; remove it from the fire; and mix in the turpentine and oil. Strain the mixture through a linen cloth. Ph. L.) Stimulant and digestive. To keep open issues, &c.

UNGUENTUM EPISPASTICUM DE DAPHNÆ (INDIO, *Adeps Corticæ daphnes guidii medicatus*, (F.) *Pommade de Garou*. (Adip. præpar. 320 p., ceræ, 32 p., cort. daphn. quid. 128 p. Melt the fat and wax; and add the bark softened in water. Boil until the water is evaporated; then pass through cloth. Ph. P.) To keep open blisters, issues, &c. See Unguentum Mezerei.

UNGUENTUM EPISPASTICUM FORTIUS, Cerate of cantharides—u. Epispasticum mitius, Unguentum lyttæ—u. Epispasticum viride, Unguentum lyttæ medicatum—u. Flavum, Unguentum de althæâ—u. e Gummi elemi, Unguentum compositum—u. Hellebori albi, Unguentum veratri.

UNGUENTUM GALLÆ, Ointment of Galls, (Gallæ in pulv. ℥j; adipis. ℥vij. M. Ph. U. S.) As an astringent in piles, indolent ulcers, &c.

UNGUENTUM HYDRARGYRI, U. caruleum, U. Neapolitanum, Blue ointment, Ceratum mercuriale, *Adeps Hydrargyri medicatus*, *Mercurial Ointment*, *Unction*, (F.) *Onguent mercuriel ou Napolitain*.

The Strong Mercurial Ointment, *Unguentum Hydrargyri fortius* of the London Pharmacopæia, *Unguentum Hydrargyri* (Ph. U. S.), is thus made—Hydrarg. ℞ij, adipis ℥xxij, seri ℥j. Rub till the globules entirely disappear.

The Milder Mercurial Ointment, — *Unguentum Hydrargyri Mitius*, — is made by adding, to one pound of the strong, two pounds of lard.

Mercurial ointment is antisiphilitic and discutient. It is rubbed on the inside of the thigh, in venereal affections; especially in those cases where mercury, given internally, runs off by the bowels. The stronger ointment is used for this purpose. The weaker is employed as a dressing, or as an application to cutaneous eruptions.

UNGUENTUM HYDRARGYRI AMMONIATI, Unguentum hydrargyri præcipitati albi—u. Hydrargyri calcis albæ, Unguentum hydrargyri præcipitati albi—u. Hydrargyri compositum, Unguentum hydrargyri nitratis—u. Hydrargyri deutoxydi nitrati, Unguentum hydrargyri nitrico-oxydi—u. ex Hydrargyro mitius dictum cinerorum, Unguentum oxydi hydrargyri cinereum.

UNGUENTUM HYDRARGYRI NITRATIS, U. H. nitrati, U. supernitratis hydrargyri, Ointment of Nitrate of Mercury, Citrine Ointment, Balsamum mercuriale, *Ung. hydrargyri compositum*, U. mercuriale citrinum, *Adeps nitratis hydrargyri medicatus*, Unguentum citrinum ad scabiem, (F.) *Onguent de nitrate de mercure*, O. citrin contre la gale. (Hydrarg. ℥j, acid. nitric. f℥xvij, olei bubul' f℥ix, adipis ℥ij. Dissolve the mercury in the acid; and, while hot, add the oil and melted lard. Ph. U. S.

A milder ointment, — *Ung. Nitratis Hydrargyri mitius*, — is made with triple the quantity of oil and lard. It is stimulant and detergent, and is much used as an application to herpes, porrigo, and cutaneous eruptions. The weaker ointment is sometimes used in ophthalmia tarsi, &c.

UNGUENTUM HYDRARGYRI NITRICO-OXYDI, *Ung. subnitratis hydrargyri*, *Ung. Oxydi Hydrargyri rubri*, U. H. oxydi rubri (Ph. U. S.), Ointment of Nitric Oxyd of Mercury, Balsamum ophthalmicum rubrum, Unguentum deutarydi hydrarg. nitrati, Red Precipitate Ointment, Golden Ointment, Singleton's Eye Salve, U. Hydrargyri rubri, U. ex Hydrargyro oxydato rubro, U. mercurii rubrum, U. ophthalmicum rubrum, U. subnitratis hydrargyrici. (Hydrarg. oxid. rubr. in pulv. subtiliss. ℥j; Ung. simpl. ℥j. Add the oxyd, reduced to a fine power, to the melted ointment. Ph. U. S.) Stimulant and escharotic. Applied to foul ulcers, to inflammation of the tarsi, &c. &c.

Bellerille's Cerate, which has been long used in cases of scalled head, and of chronic cutaneous diseases in general, is made as follows:—Plumbi acet. ℥j; hydrarg. oxid. rubr. ℥ss; hyd. chlorid. mit. ℥ij; ceræ albæ ℥iv; ol. oliv. ℥vj. Melt the last two, and add the others in fine powder.

UNGUENTUM HYDRARGYRI OXYDI RUBRI, Unguentum hydrargyri nitrico-oxydi—u. ex Hydrargyro oxydato rubro, Unguentum hydrargyri nitrico-oxydi—u. Hydrargyri oxydi rubri, Unguentum hydrargyri nitrico-oxydi.

UNGUENTUM HYDRARGYRI PRÆCIPITATI ALBI, U. Hydrargyri ammoniati, (Ph. U. S.), U. submuriantis hydrargyri ammoniati, Unguentum ad scabiem Zelleri, U. mercuriale album, U. mundificans Zelleri, Ointment of white precipitate, *Ung. e mercurio præcipitato*, *Ung. calcis hydrargyri albæ*. (Hyd. ammon. ℥j, ung. simpl. ℥jss. Melt the fat, and add the precipitate.) Detergent. Used in cutaneous eruptions, to destroy vermin, &c.

UNGUENTUM HYDRARGYRI RUBRI, U. Hydrargyri nitrico-oxydi—u. Hydrargyri submuriantis ammoniati, U. Hydrargyri præcipitati albi—u. Hydrargyrici subnitratis, U. hydrargyri nitrico-oxydi—u. Hydrargyri subnitratis, U. hydrargyri nitrico-oxydi—u. Hydrargyri supernitratis, U. hydrargyri nitratis—u. Infusi meloæ vesicatorii, U. lyttæ—u. Irritans, U. lyttæ.

UNGUENTUM IODINI, U. Iodini, Ointment of Iodine. (Iodin ℥j; Potass. iodid. gr. iv; Aquæ Mvi; Adipis. ℥j. Rub the iodine and iodide first with the water until liquified, and then with the lard until mixed. Ph. U. S.) Used as a local application to goitrous and other swellings.

UNGUENTUM IODINI COMPOSITUM, U. Iodini compositum, Compound Ointment of Iodine. (Iodin. ℥ss; Potassii iodid. ℥j; Alcohol, f℥j; adipis ℥ij. Rub the iodine and iodide first with the alcohol and then with the lard until they are well mixed. Ph. U. S.)

UNGUENTUM LAURINUM, O'leum laurinum, *Adeps lauro-medica'tus*, Bay Ointment, (F.) *Onguent ou Huile de laurier*. (Fol. lauri, 500 p., adip. suilla, 1000 p. Bruise in a marble mortar; evaporate all humidity by boiling; and add Bay berries, in powder, 500 p. Digest and pass through linen. Ph. P.) Reputed to be corroborant and nerve. It is simply emollient.

UNGUENTUM LENITIVUM, U. de althæâ—u. Liliaceum, Crinomyron.

UNGUENTUM LYTTÆ, *Ung. cantharidis*, U. vesicatorium, U. irritans, U. ad vesic'ata, Blistering Salve, *Ung. infusi meloæ vesicatorii*, Ointment of Spanish Fly, Ointment of Infusion of Spanish Fly, Unguentum epispasticum mitius, Milder blistering Ointment. (Cantharid. in pulv.

are seen, particularly at the bulb, the orifices of a number of follicular ducts, *Lacunæ* or *Sinuæ* of *Morgagni*. At about an inch and a half from the opening of the meatus, one of these lacunæ is generally found, much larger than the rest, and is named *Lacuna Magna*. The arteries of the urethra are numerous, and proceed from the internal pudic, — the largest branches entering the bulb. The veins follow the course of the arteries. The lymphatics pass into the inguinal and hypogastric plexuses. The nerves come from the pudic and gluteal. In the *female*, the urethra is only about an inch long. It is wider than in man, and susceptible of great dilatation. It is very wide at its commencement; and descends obliquely forwards, to terminate at the top of the external aperture of the vagina by the *meatus urinarius*. In its course, it is slightly curved, the concavity being forwards.

URETHRA, BLIND DUCTS OF THE, see Cæcus — u. Mucous lacunæ of the, see *Cæcus*.

URETHRAL, Urethral'is, Urethricus, from *ουρηθρα*, 'the urethra.' Relating to the urethra.

URETHRAL'GIA, from *ουρηθρα*, 'the urethra,' and *αλγος*, 'pain.' Pain in the urethra. Gonorrhœa.

URÊTHRE, Urethra.

URETHREMPHRAXIS, Urethrophraxia.

URETHRITIS, Gonorrhœa.

URETHROBLENNORRHŒA, from *ουρηθρα*, 'the urethra,' *βλεννα*, 'mucus,' and *ρεια*, 'I flow.' Gonorrhœa; gleet.

URETHROCYSTAUCHENOTOMIA, see Lithotomy.

URETHROCYSTEOANEURYSMATOTOMIA, see Lithotomy.

URETHROCYSTOTRACHELOTOMIA, see Lithotomy.

URETHROHÆMORRHAGIA, Urethrorrhægia.

URETHROPHRAX'IS, Urethremphrax'is, from *ουρηθρα*, 'the urethra,' and *φρασσα*, 'I obstruct.' Obstruction of the urethra.

URETHROPLAS'TIC, Urethroplast'icus; from *ουρηθρα*, 'the urethra,' and *πλασσω*, 'I form.' An epithet given to the operation *urethroplasty* which supplies defects in the canal of the urethra through which the urine escapes.

URETHRORR'HÆ'GIA, Urethrorrhæmorrhæ'gia, Caulorrhæ'gia stillati'ia, Hæmatur'ia stillati'ia, from *ουρηθρα*, 'the urethra,' and *πηρυσι*, 'I break out.' Hemorrhage from the urethra. — Frank.

URETHRORRHŒA, from *ουρηθρα*, 'the urethra,' and *ρεια*, 'I flow.' A discharge of any kind from the urethra.

URETHROSTENO'SIS, Strictu'ra urethrae, Urosteno'sia, from *ουρηθρα*, 'the urethra,' and *στενωσις*, 'narrowness.' Stricture of the urethra.

URETHROTOMUS, (F.) Uréthrotome, from *ουρηθρα*, 'the urethra,' and *τομω*, 'I cut.' An instrument so called by Le Cat, with which he divided the skin, and laid open the urethra, in the operation for lithotomy. Also, an instrument for dividing strictures of the urethra.

URETHROTOMY, Urethrotom'ia; same etymon. An operation, which consists in opening the urethra for the removal of stricture. See *Boutonnière*.

URETHRYMENO'DES, from *ουρηθρα*, 'the urethra,' and *μηνν*, 'a membrane.' That which is caused by a membrane formed in the urethra.

URETICUS, Diuretic, Urinary.

URETRA, Urethra.

URÊTRE, Urethra.

URETRIS, Urinal.

URIAS, Fistula, (urinary,) Urethra.

URIASIS, Lithia, Uresis.

URIC ACID, Ac'idum uricum, Ac'idum urolith'icum, Acidum lith'icum, Lithic Acid, Urylic Acid. An acid which exists in human urine, chiefly, if not wholly, in the form of urate of soda or urate of ammonia, and which in combination constitutes the greater part of urinary calculi. It is often deposited from the urine in health. See *Calculi, urinary*.

URIC OXIDE, Ox'idum uricum, Xanthic oxide, Xanthine, Urous acid. A substance not discovered in healthy urine, although probably bearing some relation to the yellow colouring matter. It is a very rare ingredient of calculous concretions, and little is known either of its chemical or pathological history.

URICUM, Urea.

URICUS, Urinary.

URINA CEREBELLA, see Cerebella — u. *Chyli*, see *Urine* — u. *Cibi*, see *Urine* — u. *Diabetica*, *Urine, diabetica* — u. *Febrilis*, *Urine, febrile* — u. *Furfuracea*, see *Furfuraceous* — u. *Galactodes*, see *Galactodes* — u. *Genitalis*, *Sperm* — u. *Jumentosa seu Jumentaria, Urine, jumentosa* — u. *Mucosa, Cystirrhœa* — u. *Nephelodes*, see *Nepheloid* — u. *Oroboides seu Orobodes*, see *Oroboides* — u. *Pericardii*, see *Pericardium* — u. *Potius*, see *Urine* — u. *Sanguinis*, see *Urine* — u. *Vaccæ*, *Urine, cows'*.

URINACULUM, Urachus, Urinal.

URINÆ PROFLUVIUM, Diabetes — u. *Suppressio, Ischuria* — u. *Stillicidium, Strangury* — u. *Substillum, Strangury*.

UR'INAL, Urinato'rium, Chernid'ium, U'ranæ, Ure'tris, Urinac'ulum, Urodoch'um, Urod'ochê, Urodoche'um, Uratra'cium, Matra'cium, Mat'ula, Matel'la; from *urina*, 'urine.' A name given, 1. To certain vessels, used to pass the urine into. 2. To reservoirs, of different shapes and character, which are adapted to the penis, in cases of incontinence of urine, and which are intended to receive the urine as it flows off.

URINALIS, Diuretic, Urinary.

URINARIA, Antirrhinum linaria, Leontodon taraxacum.

URINARY, Urina'rius, Urinal'is, Urino'sus, U'ricus, Urel'icus. Same etymon. That which relates to the urine.

URINARY BLADDER, Ves'ica Urina'ria, Cystis, Urocys'tis, (F.) Vessie. A musculo-membranous reservoir, intended for the reception of the urine, until the accumulation of a certain quantity solicits its excretion. The bladder is situate in the hypogastric region, between the rectum and pubis in man; and between the pubis and vagina in the female. Its upper region is not covered, except by the peritoneum, posteriorly. From its centre arises the *urachus*. Its lower region is bounded, anteriorly, by the prostate, in man; and rests on the vesiculæ seminales and rectum. In the female, it corresponds to the vagina. The lowest portion of this region bears the name *Bas-fond*. The anterior surface of the organ is not covered by peritoneum. It is attached to the symphysis pubis by a fibro-cellular expansion called the *anterior ligament*. The posterior ligaments are duplicatures of the peritoneum on its posterior surface, which extend from this surface to the rectum in the male, and to the uterus in the female. The bladder is composed of a serous membrane, formed by the peritoneum; — of a muscular membrane; of a somewhat thick layer of areolar tissue; and is lined on its inner surface, by a mucous membrane, which is, sometimes, raised up, here and there, in long prominences or *columns* by the muscular fibres beneath. To this condition, the French anatomists give the term — *vesicæ à colonnes*. In the *bas-fond* the two ureters open, and the urethra commences; and the triangular

URINE, FILAMENTOUS, see Filamentous.

URINE, FLOCCULENT, (F.) *Urine floconneuse*, is when the fluid is troubled by flocculi, suspended in it.

URINE, FURFURACEOUS, see Furfuraceous—*u. Floconneuse*, Urine, flocculent—*u. des Goutteux*, Urine, gouty.

URINE, GOUTY, (F.) *Urine des goutteux*, contains much phosphate of lime, and, after severe attacks of gout, precipitates a mixture of the uric and rosacic acids.

URINE HUILEUSE, Urine, oily.

URINE, HYSTERICAL, is clear, colourless, and similar to the *Urine de la Boisson*.

URINE, ICTERICAL, contains bile.

URINE, INCONTINENCE OF, Enuresis.

URINE OF INFLAMMATORY DISEASES. This is, generally, small in quantity, and very high-coloured.

URINE, INVOLUNTARY DISCHARGE OF, Enuresis.

URINE, JUMENTOUS, *Urina jumentosa seu jumentaria*, (F.) *Urine Jumentense*. A term used, by the French, for ammoniacal urine, rendered turbid by a substance similar to small grains of dust, which causes it to resemble the urine of herbivorous animals.

URINE LACTESCENTE, *U. milky*—*u. Laituse*, Urine, milky.

URINE, MILKY, (F.) *Urine lactescente ou laituse*. White and troubled urine.

URINE, MUCILAGINOUS, (F.) *Urine epaisse*. Urine containing much mucus.

URINE, NERVOUS. Thin and very liquid urine; such as is passed shortly after the attack of nervous diseases.

URINE OF NERVOUS FEVERS is generally very thin; and often deposits a mixture of uric and rosacic acids.

URINE, OILY, (F.) *Urine huileuse*, is that which pours like oil, or which has an oily pellicle at its surface.

URINE, OXALIC, *Oxaluria*. Urine containing a salt of the oxalic acid.

URINE, PHOSPHORESCENT, *Phosphoruria*, *Phosphuria*. Urine which is luminous or phosphorescent.

URINE, PURPURIC, see Porphyria.

URINE, RICKETY, contains much phosphate of lime.

URINE, SANDY, *Arenosa urina*—*u. Stoppage of, Ischuria*—*u. Tenuis*, Urine, thin.

URINE, THIN, (F.) *Urine tenue*. Urine that is transparent, slightly coloured, and but little dense.

URINIFEROUS, *Urinifer*, from *urine*, 'urine,' and *fero*, 'I carry.' That which carries urine.

URINIFEROUS SUBSTANCE OF THE KIDNEY, see Kidney.

URINIFEROUS TUBES OR DUCTS OF BELLINI, *Tubuli vel ductus uriniferi Bellini*, *Tubuli Bellini*, *Bellinia'ni Ductus*, *Bellinia'na Fistula*. The collection of small tubes, converging from the cortical part of the kidney to the apices of the papillae.

URINODES, Urinosis.

URINOMETER, from *urine*, 'urine,' and *metron*, 'measure.' A small hydrometer for taking the specific gravity of urine. The urinometer suggested by Dr. Prout is divided into 60 degrees, the zero being the point at which it floats in distilled water. The numbers on the scale added to 1000, the specific gravity of water, give the particular specific gravity: thus, supposing the number cut by the surface of the liquid to be 30, it would indicate a s. g. of 1.030. The letters H. S. on the back of the scale mean "healthy standard," which ranges from 10° to 20°.

URINOUS, *Urinousus*, *Urinodes*. Having the character of urine. Similar to urine.

UROCE'LE, *Oede'ma scroti urinosum*, *Urocheoce'lis*, *Ocheoce'lis urinalis*, from *urine*, 'urine,' and *εχλη*, 'a rupture.' A tumour of the scrotum, owing to the effusion of urine into the same, and into the areolar tissue.

UROCHES'IA, *Uroches'ia*, from *urine*, 'urine,' and *χεειν*, 'to go to stool.' A discharge of urine by the bowels.

UROCRASIA, Enuresis.

UROCRIS'IA, from *urine*, 'urine,' and *κρινω*, 'I judge.' *Urocrite'ron*. A judgment formed either of the urine, or of disease after inspecting the urine.

UROCRITERION, Urocrisia.

UROCYSTIS, Urinary bladder.

UROCYSTITIS, Cystitis.

UROCYSTOCATARRHUS, Cystirrhoea.

URODIALYSIS, from *urine*, 'urine,' and *διαλυσις*, 'dissolution, loss of strength.' A partial and temporary suspension of the function of the kidney, such as occurs in the course of most acute diseases. A condition of the function of the kidney and of the urine, similar to that observed in acute diseases, but without local mischief or preceding inflammatory fever, has been termed, when occurring in children, *Urodialysis Neonatorum*; in the aged, *Urodialysis Senum*.—Schënlein.

URODOCHIUM, Urinal.

URODYN'IA, from *urine*, 'urine,' and *δύνη*, 'pain.' Pain during the excretion of the urine.

URCEDEMA, Urapostema.

UROGENITAL, *Urogenitalia*, *Gen'ito-u'ri-nary*, *Gen'ito-urina'rius*. Relating or appertaining to the urinary and genital apparatuses.

UROGENITAL SINUS, *Sinus uro-genitalia*. A cavity or canal in the embryo of the mammalia opening externally, in which the excretory ducts of the Wolffian bodies, the ureters and the efferent parts of the generative apparatus, terminate internally. It is prolonged into the urachus. Subsequently it becomes separated by a process of division into a *pars urinaria* and a *pars genitalia*. The former, extending towards the urachus, is converted into the urinary bladder; whilst from the latter are formed the *vesiculae seminales* in the male, and the middle portion of the uterus in the female.—J. Müller.

UROLITHI, Calculi, urinary.

UROLITHIASIS, Lithia.

UROLITHOLOG'IA, from *urine*, 'urine,' *λιθος*, 'a stone,' and *λογος*, 'a description.' A description of urinary calculi.

UROLITHOTOMIA, Lithotomy.

UROMANTYA, from *urine*, 'urine,' and *μαντεια*, 'divination.' The art of divining diseases by simple inspection of the urine; *Uroscopia*. One professing to be able to do this is called *Uromantes*. Vulgarly, a water-doctor.

UROMP'HALUS, *Her'nia U'rachi*. A monstrosity, which consists in the protrusion of the urachus at the umbilicus.

URON, Urine.

URON'CUS, from *urine*, 'urine,' and *ογκος*, 'a swelling.' A urinary swelling.

URONOL'OGY, *Uronolog'ia*, from *urine*, 'urine,' and *λογος*, 'a description.' The part of medicine which treats of the urine.

UROPTHISIS, Diabetes mellitus.

UROPLA'NIA, from *urine*, 'urine,' and *πλανη*, 'wandering.' The presence of urine in other parts than the urinary organs.

UROPOE'SIS, *Uropoiesis*, from *urine*, 'urine,' and *ποιω*, 'I make.' *Secre'tio uri'næ seu lo'ti'ci*. The secretion of urine by the kidney.

UROPOESIS, Uropoesis.

UROPYGION, Coccyx.

UROPYGIUM, *Croupion*.

URORRHAGIA, Diabetes.

URORRHŒA, Enuresis, Diabetes.

UROSCHEOCLE, Urocele.

UROSCOPIA, see Uromantia.

UROSES, from *ουρον*, 'urine.' Diseases of the urinary organs.—Alibert.

UROTEALITE, *Urostealithos*, from *ουρον*, 'urine,' *εταπ*, 'met,' and *λιθος*, 'stone.' A peculiar fatty ingredient of urinary calculi, discovered by Heller.

UROSTENOSIS, Urethrostenosis.

UROUS ACID, Uric oxide.

UROZEMIA, Diabetes—u. Albuminosa, Kidney, Bright's disease of the—u. Mellita, Diabetes mellitus.

URTICA, *U. Dioica* seu *major* seu *hispida*, *Pyræthrum*, the Common stinging nettle, *Ad'icè*, (F.) *Ortie*. Family, Urticæ. *Sex. Syst.* Monœcia Tetrandria. This plant has been long used for medical and culinary purposes. The young shoots, in the spring, are considered to possess diuretic and antiscorbatic properties.

URTICA BALEARICA, *U. pilulifera*—u. *Dioica*, *Urtica*—u. *Hispida*, *Urtica*—u. *Iners magna foetidissima*, *Galeopsis*—u. *Major*, *U. dioica*—u. *Minor*, *U. urens*—u. *Mortua*, *Lamium album*.

URTICA PILULIFERA, *Pill-bearing Nettle*, *U. Pilulo'sa* seu *Roma'na* seu *Balea'rica*, (F.) *Ortie Romaine*. The seed was formerly given in diseases of the chest.

URTICA PILULOSA, *U. pilulifera*—u. *Roman*, *U. pilulifera*.

URTICA URENS, *U. minor*, *Dwarf nettle*, (F.) *Ortie brûlante*. A lesser variety of the nettle, possessing similar virtues.

Nettles have been used as stimulants to paralytic limbs.

URTICAIRE, Urticaria.

URTICARIA, from *urtica*, 'a nettle;' *Eranthe'sis urtica'ria*, *Ure'do*, *Scarlati'na urtica'ta*, *Cnid'o'sis*, *Urtica'ria porcell'ana*, *Exanthe'ma urtica'tum*, *Epiny'tis prurigin'o'sa*, *Febris urtica'ta*, *Pur'pura urtica'ta*, *Febris rubra prurigin'o'sa*, *Saltans rosa*, (F.) *Urticaire*, *Fière* *Ortie*, *Porcelaine*, *Nettle-rash*; vulgarly *Hives*, *Bold Hives*; from *urtica*, 'a nettle,' because the eruption resembles that produced by the stings of a nettle. A disease distinguished by those elevations of the cuticle called *wheals*. They have a white top, and are often surrounded by a diffuse redness. They excite intolerable itching, especially when the person is warm in bed. The eruption frequently goes and comes once or more in the 24 hours, and is generally dependent upon gastric derangement. In some people, nettle-rash is induced by shell-fish, eggs, nuts, &c. It is not usually a disease of any consequence, and its treatment is limited to the use of absorbent laxatives, and simple general means. Willan has described six varieties of the complaint:—*Urtica'ria febr'i'lis*, *U. evan'ida*, *U. persiana*, *U. confer'ta*, *U. subcuta'nea*, and *U. tubero'sa*.

URTICARIA PORCELLANA, *Essera*, Urticaria.

URTICATIO, *Cnid'o'sis*, *Urtica'tion*, from *urtica*, 'a nettle.' A sort of flagellation, with nettles;—used with the intention of exciting the skin.

URUCU, *Terra Orleana*.

URYLIC ACID, Uric acid.

USNEA, Lichen saxatilis—u. *Florida hirta*, Lichen plicatus—u. *Hirta*, Lichen plicatus—u. *Plicata*, Lichen plicatus.

USSACU, *Hura Brasiliensis*.

USTILAGO, *Ergot*.

USTIO, *Burn*, *Ustion*.

USTION, *U'stio*, *Causis*, from *urere*, *ustum*, 'to burn.' The act of burning or of applying the actual cautery. Also the effect of cauterisation; a burn.

USTULATIO, *Ustula'tion*. A pharmaceutical operation by which a substance is dried by heat.

USUALIA, *Officiala*.

USUS, *Habit*.

UTER, *Uterus*.

UTERI ADSCENSUS, *Hysteria*—u. *Anteversio*, *Hysteroloxia anterior*—u. *Carcinoma*, *Metrocarcinoma*—u. *Convulsivus morbus*, *Lorind matrixis*—u. *Coryza*, *Leucorrhœa*—u. *Exulceratio*, *Hysterelcosis*—u. *Flexio*, *Hysteroloxia*—u. *Inclinatio*, *Hysteroloxia*—u. *Obliquitas*, *Hysteroloxia*—u. *Pronatio*, *Hysteroloxia anterior*—u. *Pruritus*, *Nymphomania*—u. *Reflexio completa*, *Hysteroloxia posterior*—u. *Retroversio*, *Hysteroloxia posterior*—u. *Rheuma*, *Leucorrhœa*—u. *Cleus*, *Hysterelcosis*—u. *Versio incompleta*, *Hysteroloxia*.

UTERINE, *Uteri'na*, from *uterus*, 'the womb.' That which belongs or relates to the womb.

UTERINE ARTERY, *Arte'ria uteri'na hypogastrica*. Its size is always in a ratio with the greater or less state of development of the uterus. It arises from the hypogastric, either separately or with the umbilical, or from the internal pudic; passes upon the lateral parts of the vagina, to which it gives branches; and afterwards ascends on the sides of the uterus, and divides into a considerable number of very tortuous branches, which enter the tissue of the organ.

UTERINE MUSCLE OF RUYSCH consists of some fleshy fibres at the fundus of the uterus, which he regarded as forming a particular muscle.

UTERINUS FRATER. In law, a brother by the mother's side.

UTERO-ABDOMINAL SUPPORTERS, see *Belt*, *Russian*.

UTERO-GESTATION, *Pregnancy*.

UTEROMANIA, *Nymphomania*.

UTERUS, *Uter*, *Utric'ulus*, *Loci*, *Loci muliebres*, *Vulva*, *Venter*, *Arum natu'rae*, *Conceptaculum*, *Matrix*, *Ager natu'rae*, *Hyster'a*, *Metra*, *Stera*, *An'gus*, *Delphys*, *Alcus*, *Epompha'lion*, *Gaster*, *Mater*, *Nedys*, *Postrema*, the *Womb*, (F.) *Matrice*, *Sein*. The uterus, destined to lodge the fœtus from the commencement of conception till birth, is a hollow symmetrical organ, having the shape of a truncated conoid: it is situate in the pelvis, between the bladder and the rectum, above the vagina, and below the convolutions of the small intestine. The uterus is flattened from before to behind, and is nearly an inch in thickness. It is two inches broad at its highest part, and becomes narrower towards the vagina; terminating in a contracted portion, called the *cervix* or *neck*, to distinguish it from the rest of the organ, called the *body*. From its *fundus* or upper portion, the Fallopian tubes pass off. The mouth is called *Os Uteri* or *Os Tincæ*. The cavity is very small, and its parietes are thick. The portion of the cavity corresponding with the body is triangular and flattened. Its superior angles present the extremely fine orifices of the Fallopian tubes. The cavity of the neck is slightly dilated before opening into the vagina. The uterus is composed, 1. Of a *serous membrane*. This is external, and furnished by the peritoneum; which is reflected upon the uterus from the posterior surface of the bladder and the anterior surface of the rectum. It forms, also, the *broad ligaments of the uterus*, *Ligamen'ta lata*, *Alæ ceepertilio'nis*, *Re'tia Uteri*. These contain, above, the Fallopian tube; beneath and anteriorly, the round ligaments; and, behind, the ovary. They are two membranous productions or duplicatures of the peritoneum, sent from the edges of the uterus and posterior extremity of the vagina, in a transverse direction, to be fixed to, and line, the side of the pelvis. 2. Of a *mucous membrane*, which is a prolonga-

tion of that of the vagina, and extends into the tube. 3. Of a *proper tissue*, whose thickness is considerable. It is of a close texture; is grayish and elastic; and resists the instrument that divides it. Its intimate nature is but little known. During gestation it is truly muscular. The arteries of the uterus proceed from the spermatic and hypogastric. Its veins follow the same course, and bear the same name as the arteries. They are very tortuous, and form large sinuses in the parietes of the organ, called *Uterine Sinuses*. Its nerves proceed from the sciatic and hypogastric plexuses. Its lymphatic vessels are very multiplied; and during pregnancy acquire enormous dimensions. The changes experienced by the uterus during gestation, and after delivery, are very numerous and important to be known. They regard its situation, direction, size, shape, texture, connexions, vital properties, &c.

UTERUS, Abdomen—*u.* Anteversion of the, *Hysteroloxia anterior*.

UTERUS BIPIDUS, A double uterus. One separated into two cavities.

UTERUS DUPLEX, *Dihysteria*—*u.* Hour-glass contraction of the, *Chaton*—*u.* *Inclinatus*, *Hysteroloxia*.

UTERUS, IRRITABLE, *Neuralgia of the Uterus*. A disease characterized by deep-seated pain in the lower part of the abdomen, and in the back and loins; generally diminished by lying down, and increased by exercise, and more severe for a few days preceding and during menstruation. On examination *per vaginam*, the uterus is found to be tender on pressure; and the cervix and body slightly swollen, but not usually indurated. It is an obstinate affection, but frequently ends of itself after years of suffering. The treatment must be,—the horizontal posture; local blood-letting to the uterus; emollients; soothing injections; narcotics, warm bath, &c. See *Hysteralgia*.

UTERUS, INVERSION OF THE, *Inversio Uteri*, *Metranatrophè*, *Edoptosis Uteri inversa*, (*F.*) *Inversion de la Matrice*, *Renversement de la Matrice*. The uterus, displaced and turned inside out. This can only happen through want of caution on the part of the medical practitioner. It is a fatal accident, unless speedily reduced. This must be done by gradually returning the superior part, by grasping it with the hand, and making the rest follow.

UTERUS MASCULINUS, see *Ejaculatory ducts*—*u.* *Obliquus*, *Hysteroloxia*—*u.* *Retroversion of the*, *Hysteroloxia posterior*.

UTERUS, RUPTURE OF THE, *Metrorrhæxis*, *Hysterorhæxis*, *Ruptura Uteri*, *Perforatio Uteri*, *Laceration of the Womb*, (*F.*) *Rupture de la Matrice*. This dreadful accident occurs during labour, and is known to have taken place, when the child's head suddenly recedes during a pain, with vomiting, sinking of the pulse, cold sweats, &c. When it is evident that this has occurred, the hand must be passed into the uterus, and the feet of the child be brought down.

Cases are on record, in which partial lacerations of the uterus have healed, and the patient has done well. This is a rare event, and not to be anticipated.

UTRICLE, see *Semicircular canals*.

UTRICULAR, *Utricula'ris*; from *utriculus*, 'a small bag or bottle.' Relating to or resembling a small bag or bottle.

UTRICULAR GLANDS, *Glandula utricula'res*. The glands or follicles in the interior of the uterus, which are concerned in the formation of the decidua.

UTRICULUS, see *Ejaculatory ducts*, *Uterus*—*u.* *Communis*, see *Semicircular canals*—*u.* *Lactens*, *Receptaculum chyli*.

UVA, *Uvula*, see *Vitis vinifera*—*u.* *Inversa*, *Paris*—*u.* *Lupina*, *Paris*—*u.* *Ursi*, see *Arbutus uva ursi*—*u.* *Vulpina*, *Paris*.

UVAE CORINTHIACÆ, see *Vitis Corinthiaca*.

UVAE PASSÆ, *Rhages*, *Dried Grapes*, *Raisins*, see *Vitis vinifera*.

UVAE PASSÆ MAJORES, see *Vitis vinifera*—*u.* *Passæ minores*, see *Vitis Corinthiaca*—*u.* *Passæ sole siccatae*, see *Vitis vinifera*.

UVATIO, *Ceratocèle*, *Staphyloma*.

U'VEA, from *uva*, 'an unripe grape.' *Tu'nica acino'ea* seu *acini'formis* seu *uva'lis* seu *acina'lis* seu *uvifor'mis*, *Rhagoi'des*, *Tu'nica rhagoides* seu *uvea* seu *perfora'ta*, *Membrana uvea*, *Rhox*, (*F.*) *Uvéa*. Some anatomists have given this name to the choroid coat of the eye; others, to the posterior layer of the iris, on account of the black and very thick varnish that covers it.

UVEA, *COMMISSURE OF THE*, *Ciliary ligament*.

UVÉE, *Uvea*.

UVEITIS; a word of hybrid formation; from *uvea*, 'the uvea,' and *itis*, denoting inflammation; properly, *Rhagodei'tis*. Inflammation of the uvea.

UVIGENA, *Uvula*.

UVIGERA, *Uvula*.

UVULA, diminutive of *uva*, 'a grape.' *Pinnaculum for'niceis guttura'lis*, *Uva*, *Staph'yliè*, *Tintinnabulum*, *Columel'la*, *Cion*, *Cionis*, *Gargareon*, *Colum'na oris*, *Gurgul'io*, *Interseptum*, *Processus seu Cartila'go Uvifer*, *Uvig'ena*, *Uvig'era*, *Pap of the Throat*, *Himæa*, *Plectrum*, *Sublin'gua*, *Sublin'guum*, (*F.*) *Luette*. A fleshy appendix or prolongation, which hangs from the middle or free edge of the velum palati. The uvula has a conical shape, and is of a greater or less size in individuals. It is formed, especially, by the mucous membrane of the velum palati; and contains, within it, the *azygos uvulæ* muscle. Its use is not clear.

Also, a small prominence or lobule in the portion of the cerebellum that forms the posterior boundary of the fourth ventricle. It is on the median line, and behind the nodulus.

UVULA, see *Vermiform process inferior*—*u.* *Decidua*, *Staphylœdema*—*u.* *Relaxata*, *Staphylœdema*—*u.* *Vesicæ*, see *Urinary bladder*—*u.* *Vesical*, see *Urinary bladder*.

UVULAR, *Uvula'ris*, from *uvula*. That which belongs to the uvula.

UVULAR GLANDS are small follicles, belonging to the mucous membrane covering the uvula.

UVULARIA, *Ruscus hypoglossum*.

UVULARIA PERFOLIATA, *Smaller Bellwort*; indigenous: *Order*, *Melanthaceæ*; flowering in May and June. The root, when fresh, is subacid and mucilaginous. A decoction of the plant is used in sore mouth. It is said to cure the bites of rattlesnakes.

UVULITIS, a word of hybrid formation, from *uvula*, and *itis*, denoting inflammation. *Angi'na uvula'ris*, *Staphyli'tis*, *Cioni'tis*, *Inflamma'tio u'vulæ*, (*F.*) *Inflammation de la Luette*, *Falling down of the Palate*. Inflammation of the uvula.

VACCINIUM PUNCTATUM, *V. vitis idæa*—*v.* Resinosum, *Gaylussacia resinosa*.

VACCINIUM STAMINEUM, *Buckberry*, *Squaw Huckleberry*, *Deerberry*. The leaves of these plants are astringent.

VACCINIUM VITIS IDÆA, *V. punctatum*, *Vitis Idæa punctata*, *Red Bilberry*, *Am'pelos Idæa*, *Whortleberry*, *Cowberry*, (*F.*) *Airelle* ou *Canneberge ponctués*. A decoction of the leaves has been used in calculous affections. They are astringent. The ripe berries are pleasantly acid, and refrigerant. *Whortleberries* are furnished by different species of *Vaccinium*.

VACCINOIS, *Vaccinella*.

VACCINUS, *Vaccina*.

VACCIOLA, *Vaccina*—*v.* *Leprosa*, *Vaccinella*—*v.* *Scutellata*, *Vaccina*—*v.* *Spuria*, *Vaccinella*—*v.* *Vera*, *Vaccina*.

VACILLA'TIO, *Titubatio*, from *vacillare*, 'to waver.' Staggering; waddling—*claudicatio anatica*.

VACILLATIO DENTUM, *Odontoseisia*.

VAGIN, *Vagina*.

VAGINA, 'a sheath,' *Vagi'na mulie'bris* seu *uteri'na* seu *U'teri* seu *Penis*, *Sinus mulie'bris* seu *Pudo'ris* seu *Puden'di*, *Col'eus*, *Peris*, *Perin*, *Col'pos*, *Vulvo-uterine canal*, (*F.*) *Vagin*. A cylindrical canal, five or six inches long; situate within the pelvis, between the bladder and rectum. It communicates by one extremity, *Auloe*, with the vulva; by the other, with the womb, the neck of which it embraces. The vagina is lined, internally, by a mucous membrane; and is partly closed, in young females, by the hymen, and carunculae myrtiliformes.—Around the mucous membrane is a layer of spongy, erectile tissue; and a cellulose-vascular membrane. A constrictor muscle; numerous vessels furnished by the vaginal artery, particularly; veins and nerves, proceeding from the sciatic plexus, also, enter into the composition of the organ.

The term *Vagina* or sheath, *Theca*, is extended to many parts, which serve as envelopes to others.

Sheath, (*F.*) *Gaine*, is sometimes applied to the fascia enveloping the limbs; to areolar membrane, enveloping the muscles, and entering between their fibres; to that which surrounds the blood-vessels; to the synovial membranes surrounding tendons, and lining the gutters of bones, &c.

VAGINA CORDIS, *Pericardium*—*v.* *Femoris*, *Fascia lata aponeurosis*—*v.* *Funiculi Umbilicalis*, see *Funiculus umbilicalis*—*v.* *Glissonii*, *Capsule of Glisson*—*v.* *Malleolaris externa*, *Retinaculum tendinum perinæorum*—*v.* *Muliebris*, *Vagina*—*v.* *Muscularis*, *Perinysium*—*v.* *Nervorum*, *Neurilemma*—*v.* *Penis*, *Vagina*—*v.* *Portæ*, *Capsule of Glisson*—*v.* *Uterina*, *Vagina*.

VAGINA OF THE VENA PORTA, *Sheath of the Vena Porta*, (*F.*) *Gaine de la Veine-porte*, is the areolar membrane that accompanies the divisions of the vena porta into the substance of the liver.

VAGINÆ SYNOVIALES, *Bursæ mucosæ*.

VAGINA L, *Vagina'lie*, from *vagina*, 'a sheath.'—Relating or pertaining to a sheath.

VAGINAL ARTERY. This exists, as a matter of course, only in the female. It arises from the hypogastric or from the uterine, vesical, internal pudic, umbilical, &c., and sends its branches, first to the lateral parts of the vagina, and afterwards to the anterior and posterior surfaces.

VAGINAL BILIARY PLEXUS. A plexus of ramifications of the hepatic duct through the capsule of Glisson.

VAGINAL BRANCHES OF THE VENA PORTA are those which have to pass through the sheath of the capsule of Glisson, previous to entering the interlobular spaces. In this course, they form

the vaginal plexus. There are, also, vaginal branches, and a vaginal plexus formed by the hepatic artery.

VAGINAL COAT OF THE EYE, see *Eye*.

VAGINAL COAT OF THE TESTICLE, *Tu'nica Vagina'lis*, *T. Elytroi'des* vel *Elytro'des*, is the serous membrane which envelops the testicle. Before the descent of the testicle, the tunica vaginalis does not exist. It is formed by a prolongation, furnished by the peritoneum to the testicle when it issues from the abdomen. The tunica vaginalis forms a close sac, investing the testicle and epididymis, without containing them in its cavity, and reflected so as to form a bag around the circumference of the testis; hence it is divided into *Tu'nica vagina'lis propria* and *Tu'nica vagina'lis reflexa*. Between the two layers, the inner surface is smooth, and lubricated by a serous fluid.

VAGINAL GANGLIA, see *Spermatic ganglion*.

VAGINAL PLEXUS, see *Vaginal branches of the vena porta*.

VAGINAL PROCESS OF THE TEMPORAL BONE, (*F.*) *Apophyse vaginale* ou *engainante*, *Gaine de l'apophyse styloïde*, *Chaton*, is a bony crista, which embraces the base of the styloid process.

VAGINITIS, *Leucorrhœa (vaginal)*.

VAGISSEMENT, *Cry*, *Vagitus*.

VAGITUS, (*F.*) *Vagissement*. The cry of the new-born child. *Squalling*.

VAGITUS UTERINUS. The cry of the child in utero.

VAGUS NERVUS, *Pneumogastric*.

VAIRON (*F.*), *Dispar oculus*. One who has eyes of different colours. It also means a wall-eyed animal, or one whose iris is surrounded by a whitish circle.

VAISSEA U, *Vessel*—*v.* *Sanguin*, *Blood-vessel*.

VAISSEAUX CAPILLAIRES, *Capillary vessels*—*v.* *Chylifères*, *Chyliferous vessels*—*v.* *Lactés*, *Chyliferous vessels*—*v.* *Lactifères*, *Lactiferous vessels*—*v.* *Ombilicæux*, *Umbilical vessels*.

VALANIDA, *Fagus sylvatica*.

VALANTIA APARINE, *Galium aparine*.

VALERIAN, AMERICAN, *Cypripedium luteum*, *Valeriana pauciflora*—*v.* *Garden*, *Valeriana phu*—*v.* *Greek*, *Polemonium reptans*—*v.* *Official*, *Valeriana*—*v.* *Wild*, *Valeriana*.

VALERIA'NA, *V. officina'lis*, *Wild Valerian*, *Valeriana minor*, *Offic'inal Valerian*. *Family*, *Dipsacæ*. *Sex. Syst.* *Triandria Monogynia*. The root, *Valeria'na*, (*Ph. U. S.*) has been long extolled as an efficacious remedy in epilepsy, and in a variety of nervous complaints. It has been also advised as a tonic, antispasmodic, and emmenagogue. It has a strong, fetid odour; bitterish, subacid, and warm taste; and its virtues are extracted by water and alcohol.

VALERIANA CAPENSIS, a South African species, has similar virtues.

VALERIANA CELTICA, *V. Saxat'ilis*, *Celtic Nard*, *Spica Celtica*, *S. Alpi'na*, *Nardus Celtica*, *Sallu'ncn*, *Nardum Gall'icum*, *Spica Celtica Dioscor'idie*, (*F.*) *Nard Celtique*. The roots of this Alpine plant have been recommended as a stomachic, carminative and diuretic. It has a moderately strong smell, and a warm, bitterish, subacid taste.

VALERIANA DENTATA, *V. locusta*, *Corn Salad*. A wholesome, succulent plant, cultivated in Europe as a salad. It is antiscorbutic and gently aperient.

VALERIANA MAJOR, *V. phu*—*v.* *Locusta*, *V. dentata*—*v.* *Minor*, *Valeriana*—*v.* *Officialis*, *Valeriana*.

VALERIANA PAUCIFLORA, *American Valerian*, has the properties of the other *Valeriana*.

VALERIANA PHU, *V. major*, Garden Valerian, (F.) *Grand Valériane*. The root has been recommended in rheumatism; especially in sciatica, and in epilepsy.

VALERIANA SAXATILIS, *V. celtica*.

VALÉRIANE GRAND, *Valeriana phu*.

VALET À PATIN (F.), *Volsel'la Pati'ni*. The common ligature forceps is a modification of this instrument invented by one Patin. It consists of two branches, united at the middle by a hinge, which may be separated or approximated by means of a screw or running ring. It is used for seizing hold of vessels that are to be tied.

VALETUDINARIUM, Hospital.

VALETUDINARIUS, Sickly, Valetudinary.

VALETU'DINARY, *Valetudina'rian*, *Valetudina'rius*, *Inval'idus*, from *valetudo*, 'health.'—One of delicate health. One subject to frequent diseases. An *Inval'id*.

VALETUDO, Sanitas—*v. Adversa*, Disease—*v. Bona*, Sanitas—*v. Commoda*, Sanitas—*v. Secunda*, Sanitas.

VALGUS, see *Kyllosis*

VALIGA, Tinotura jalapii.

VALITUDO, Sanitas.

VALLEGULA, Valley.

VALLEY, *Valle'ula*, (F.) *Grand Scissure Médiane du Cerelet*. The deep fissure on the inferior part of the cerebellum, which divides it into two symmetrical portions.

VALLUM. The eyebrow or supercilium. Also, a species of bandage.—Galen.

VALS, MINERAL WATERS OF. A French acidulous chalybeate at Vals, six leagues from Viviers, in the department of Ardèche. There are five springs, containing carbonic acid, sulphate of iron, and alum. They are employed in passive hemorrhages, leucorrhœa, &c.

VALVE, *Val'vula*, *Diclis*, (F.) *Valvule*, from *valvæ*, 'folding-doors,' itself from *valco*, 'I fold up.' A small door. Any membrane or duplicature of a membrane, which prevents a reflux of humours or other matters in the vessels and canals of the animal body. There are some valves, whose functions appear to be,—to retard or to modify the course of substances along canals, &c. See *mitral*, *sigmoid*, *tricuspid*, *ileo-cæcal valve*, &c.

VALVE OF FALLOPIUS, *Bauhin*, valve of—*v. Pleo-cæcal*, *Bauhin*, valve of—*v. Ileo-colic*, *Bauhin*, valve of—*v. of Tulpius*, *Bauhin*, valve of—*v. of Varolius*, *Bauhin*, valve of

VALVES, SEMILUNAR, Sigmoid valves.

VALVULA, Valve—*v. Cæci*, *Bauhin*, valve of—*v. Cerebelli*, *Valvula Vieussenii*—*v. Coli*, *Bauhin*, valve of—*v. Foraminis ovalis*, *Ovalis fossa*—*v. Guiffartiana*, see *Thebesius*, veins of—*v. Plei*, *Bauhin*, valve of—*v. Magna Cerebri*, *V. Vieussenii*.

VALVULA SEMILUNA'RIS, *Plica Semiluna'ris*, *Membran'ula semiluna'ris conjuncti'va*, *Plica lunata*. A small doubling of the tunica conjunctiva, which lies between the caruncula lacrymalis and the ball of the eye. In birds, this is large, and called *Membra'na nictitans* vel *Palpebra tertia*.

VALVULA TARINI, *Velum medullare posterius*—*v. Thebesii*, see *Thebesius*, veins of—*v. Vaginae*, *Hymen*—*v. Venæ magnæ*, see *Thebesius*, valve of.

VALVULA VIEUSSENII, *Velum Vieussenii*, *Valvula cerebel'li* seu *Willisia'na* seu *magna cerebri*, *Velum interjec'tum cerebelli*, *V. apoph'ysi vermiformi obtentum*, *Lacu'nar ventriculi quarti superior*, *Velum medulla'rè* seu *medulla'rè anti'cum* seu *ante'rius*, (F.) *Valvule de Vieussens*, *Voile médullaire supérieure*. A thin, medullary lamina,

over the under end of the Aquæductus Sylvii in upper part of the fourth ventricle. At the side of the valves are two medullary tracts, call *Processus ad Testes*, *Colum'næ Val'enilæ Vieuseni*, or *Oblique intercer'ebral Com'missure*.

VALVULA WILLISIANA, *Valvula Vieussenii*.

VALVULÆ BICUSPIDALES, *Mitral valve*; VALVULÆ CONNIVEN'TES. Numerous circular folds in the intestinal canal from the pyloric orifice through the greater part of the small intestine. They are folds of the mucous membrane and their chief use appears to be, to retard the course of the alimentary mass, and to afford larger surface for the origin of chyliiferous vessels.

VALVULÆ CORDIS, *Ostiola cordis*—*v. Cordi mitralis*, *Mitral valves*—*v. Triglochines*, *Tricuspid valves*—*v. Trisulcæ*, *Tricuspid valves*.

VALVULE, Valve—*v. d'Eustache*, *Eustachian valve*—*v. de Pyloro*, see *Pylorus*—*v. de Vieussens*, *Valvula Vieussenii*.

VALVULES, *V. Episcopales*, *Mitral valve*—*v. Sigmoides* ou *Semilunaires*, *Sigmoid valve*.

VANELLOE, Vanilla.

VANILLA, *Banill'a*, *Banilas*, *Banillos*, *Banilla*, *Benzo'ënil*, *Ar'acis aromati'ca*, (F.) *Vanille*, *Baume de Vanille*. The *Vanilloe-Silique vanill'æ* seu *Banill'æ* seu *Vaniglia* seu *vanilla* seu *Ar'aci aromati'ci*—is a long, flattish pod; containing, under a wrinkled, brittle shell, a reddish-brown pulp, with small, shining, black seeds. The parasitic plant which affords this pod is the *Epidendrum Vanilla*, *Vanill'a aromati'ca* seu *Mexicana*. Family, *Orchidææ*. *Sex. Syst.* *Gynandria Monandria*. *Vanilloes* have an unctuous, aromatic taste, and a fragrant smell, like that of some of the finer balsams, heightened with musk. Although chiefly used as perfumes, they are reputed to possess aphrodisiac virtues.

VANILLA AROMATICA, see *Vanilla*.

VAPOURS, *Hypochondriasis*, *Hysteria*.

VAPORA'RIUM, *Amint'erion*, *Lacon'icum*, *Py'ria*, *Pyriate'rium*, *Vapour bath*. A useful remedy in rheumatic and cutaneous affections; and wherever it is important to relax the cutaneous capillaries. In the *Russian Vapour Bath*, the vapour is produced by throwing water over hot stones. Its temperature is from 122° to 145°.

VAPORARIUM, *Hypocustum*, see *Stora*.

VAPORATIO, *Evaporation*.

VAPORES UTERINI, *Hysteria*.

VAPOUR, *Flatulence*—*v. Bath*, *Vaporarium*.

VAPOURISH, *Hypochondriac*, *Hysterical*.

VAPOUROUS, *Windy*.

VAPOURS, *Hypochondriasis*, *Hysteria*.

VAPOURY, *Hypochondriacal*, *Hysterical*.

VARA, *Barre*.

VAREC, Kelp—*v. Vésiculeux*, *Fucus vesiculosus*.

VARENI, *Ambulo-flatulentus*, *Gout* (wander ing.)

VARICE, *Varix*.

VARICELLI'A, (diminutive of *Variola*, Small pox.) *Em'phlysis varicella*, *Ezanthema varicell*, *Syn'ochus varicella*, *Chicken pox*, *Variola lymphat'ica*, *V. spu'ria*, *V. sylvest'ris*, *Variola m'ithæ*, *V. illegit'ima*, *Pseudo-variolæ*, *V. rotat'ica*, *V. pucella*, *Eoll'ion*, *Eoll'ium*, (F.) *Varicell*, *Ptête étrole volante*, *Vérolette*. A disease characterized by vesicles scattered over the body, which are glabrous, transparent, and about the size of peas. They appear in successive crops are covered by a thin pellicle, and, about the third, fourth, or fifth day from their appearance burst at the top, and concrete into small, pored scabs, which rarely leave a pit in the skin. Three varieties have, sometimes, been designated. 1. The *V. lentiformes*, or *lenticular chicken pox*

which are irregularly circular, and flattened on the top; the fluid being at first whitish, and afterwards straw-coloured. This is the common chicken pox. 2. The *Varicella coniformis*, *Cornical Chicken Pox*, *Pemphigus varioloides*, *Variola lymphatica*, *Hydrachnia*, *Swine Pox*, *Water Pox*, *Water Jags*, in which the vesicles are generally acuminated, and the fluid pellucid throughout; and, 3dly, the *Varicella globularis* or *Hives*, in which the vesicles are globular and larger; the fluid being, at first, whey-coloured, and afterwards yellowish. These divisions are, however, very arbitrary, for they are generally confounded.

Variola has been, sometimes, mistaken for this disease, and conversely. A little attention to the history of the eruption in the two affections will prevent error. Variocella is not contagious. At times, it prevails epidemically. It cannot be propagated by inoculation. The treatment is extremely simple; rest, abstinence, and the antiphlogistic regimen, being all that is generally required.

VARICELLA VARIOLOIDEA, Varioloid.

VARICIFORMES PARASITATÆ. A name given, by some authors, to the ducts of the epididymis, because they seem knotty and varicose.

VARICOBLEPHARON, from *varix*, and *βλεφαρον*, 'eyelid.' A varicose tumour of the eyelid.

VARICOCELE, from *varix*, and *κηλη*, 'a tumour'; *Osteocele varicoea*, *Hernia varicoea*, *Ramex varicoeus*, *Spermatocele*, *Cirsocele*. A varicose dilatation of the veins of the scrotum and spermatic cord. This latter variety of the disease is more common on the left side than the right. It appears under the form of a soft, doughy, unequal, knotty, compressible, and indolent tumour, situate in the course of the cord, and increasing from below upwards. It is less when the individual is in the recumbent posture, and increases when he is erect. It is, ordinarily, an affection of no moment, and is very common, requiring merely the use of a proper suspensory bandage. It has been advised, in bad cases, to tie the enlarged vein, but the operation is not free from danger induced by phlebitis. Sir A. Cooper has proposed the removal of a portion of the scrotum, so as to render the remainder of the scrotum a natural bandage. This plan has been found effectual.

VARICOMPHALUS, from *varix*, and *μφαλος*, 'the umbilicus.' Varicose tumour of the umbilicus; cirsocephalus.

VARIICOSE, *Varicoeus*, (F.) *Variquens*. Affected with varix; or belonging to, or connected with, varix; — as a *varicose vein*, a *varicose ulcer*, that is, one kept up by *varices*.

VARICOSITAS CONJUNCTIVÆ, Cirsophthalmia.

VARICULA, *Varix parva*. A diminutive of *varix*. Also, a varicose swelling of the veins of the tunica conjunctiva.—M. A. Severinus.

VARIOLA, *Variola*, *V. vera*, *Varioli*, *Small-Pox*, *Empyema Variola*, *Euphlogia*, *Chaspe*, *Æulecithyma*, *Pox* (N. of England), *Pestis variolosa*, *Febria variolosa*; from *varius*, 'spotted,' or from *vari*, 'pimples;' (F.) *Variole*, *Petit Vérole*, *Picote*. A disease, now of somewhat less interest than before the discovery of vaccination. It is of a very contagious nature, and is supposed to have been introduced into Europe from Asia, at an early period of the middle ages. It is characterized by fever, with pustules, appearing from the third to the fifth day, and suppurating from the eighth to the tenth, and it possesses all the distinctive properties of the major exanthemata. It is capable of being produced by inoculation,

but this *inoculated small-pox*—*Variola inserta*—communicates the disease as readily through the air as the *natural small-pox*, or that received without inoculation.

Small-pox is distinguished into two classes, according to the character of the eruption, the *discrete* or *distinct*, and the *confluent*. 1. In VARIOLA DISCRETA, *Empyema variola discreta*, *Variola discreta benigna*, *Variola regularis seu discreta*, *Distinct Small-pox*, the pustules are usually of the size of peas; distinct, distended, and circular; the intervening spaces being red; the fever inflammatory throughout, and ceasing when the eruption is complete. 2. In VARIOLA CONFLUENS, *Empyema variola confluens*, *Variola regulares confluentes*, *Vesicula Dira Barbara*, *Vésicules de Sainte-Barbe* or *Confluent Small-pox*, the pustules are confluent, or run together; flaccid and irregularly circumscribed; the intervening spaces being pale, and the accompanying fever typhoid. In children, diarrhoea, and, in adults, ptialism, with swelling of the hands and feet, generally appear, towards the period of the *secondary fever*, which occurs from the tenth to the thirteenth day. The fever that precedes and accompanies the eruption is called the *Eruptive fever*. The prognosis is favourable in the distinct kind, if properly managed. The confluent is always dangerous,—the unfavourable symptoms being—flattening of the pustules, or subsidence of the eruption; the breathing becoming much obstructed or oppressed; or marks of inflammatory and congestive affections occurring in the different viscera. The treatment of the distinct kind is very simple: the antiphlogistic regimen, with cathartics, being all that is necessary. The confluent kind requires the same management as typhus fever.

When the pimples are confluent in patches, the patches, being, however, separated by intervals of unaffected skin; it constitutes the clustered, coherent, or corymbose variety—*Variola corymbosa*.

VARIOLA AMBOINENSIS, *Framboesia*—v. *Corymbosa*, see *Variola*—v. *Inserta*, *Variola* (by inoculation)—v. *Lymphatica*, *Variocella*—v. *Mitigata*, *Varioloid*.

VARIOLA sine VARIOLIS, *Variolous Fever*. These terms are applied to cases occasionally observed during the prevalence of variola, in which the constitutional phenomena are present without the cutaneous eruption.

VARIOLA SPURIA, *Variocella*—v. *Vaccina*, *Vaccina*—v. *Vaccinatorum*, *Varioloid*.

VARIOLÆ, *Variola*—v. *Equinæ*, see *Grease*—v. *Illegitimæ*, *Varicella*—v. *Modificate*, *Varioloid*—v. *Nothæ*, *Varicella*—v. *Pucellæ*, *Varicella*—v. *Sylvestris*, *Varicella*—v. *Tutoris*, *Vaccina*—v. *Vera*, *Variola*—v. *Volaticæ*, *Varicella*.

VARIOLATION, Inoculation (*Small-pox*.)

VARIOLE, *Variola*.

VARIOLI, *Variola*.

VARIOLOID, *Varioloidis*, *Varioloides*, *Variola modificata*, *V. mitigata*, *V. vaccinatorum*, *Varicella*, *Varioloiden*, from *variola*, *small-pox*, and *oides*, 'form,'—resembling *small-pox*. This is, really, *small-pox*, modified by previous inoculation or vaccination; and hence it has been properly called *modified small-pox*. That it is *small-pox* is proved by the fact, that matter, taken from a varioloid pustule, will communicate *small-pox* to one who has never had it naturally or by inoculation, or who has never been vaccinated. It is, almost always, a milder disease than *small-pox*; and this circumstance, with its shorter duration, exhibits the salutary effects of previous vaccination or inoculation. It has appeared epidemically.

which may be subdivided into two distinct secondary systems. 1. The *General venous system*, which commences in all the organs, by very minute radicles; and terminates in the heart by the vena cava and the coronary vein. 2. The *Abdominal venous system*, which is limited to the abdominal cavity; commences, also, by a great number of branches, and terminates in the liver by a single trunk, which subdivides in that organ. It is called, also, the *System of the Vena Porta*, or the *Portal System*. See *Porta*. The veins form two sets, one *deep-seated*, *Vena satel'lites*, *V. conom'ites*, which accompany the arteries; the other *superficial or subcutaneous*. Their parietes, which are thinner than those of the arteries, are composed of two coats; the one, external, loose, extensible, and with parallel, longitudinal fibres—the *proper membrane*; the other, the *common or inner membrane*, which is thin, polished, and has numerous duplicatures or folds forming parabolic valves. These valves are most numerous in the veins of the lower extremities. The coats of the veins are supplied with small arteries or *vasa vasorum*, veins, and lymphatics. They have not as many nervous filaments as the arteries. These filaments are from the great sympathetic.

TABLE OF THE VEINS.

1. VEINS WHICH FORM THE SUPERIOR VENA CAVA.
- 1. Axillary which receives the
 - 1. Posterior ulnar.
 - 2. Anterior ulnar.
 - 3. Median basilic.
 - 2. Cephalic, forming the
 - 1. Superficial radial.
 - 2. Median cephalic.
 - 3. Circumflex veins.
 - 4. Inferior scapular.
 - 5. Long thoracic.
 - 6. Superior thoracic.
 - 7. Acromial veins.
2. External Jugular.
- 1. Internal maxillary, composed of the
 - 1. Pterygoid.
 - 2. Spheno-palatine.
 - 3. Alveolar.
 - 4. Infra-orbital.
 - 5. Mental.
 - 6. Inferior dental.
 - 7. Deep temporal.
 - 1. Middle temporal.
 - 2. Anterior auriculars.
 - 3. Transverse of the face.
 - 2. Superficial Temporal, composed of the
 - 1. Middle temporal.
 - 2. Anterior auriculars.
 - 3. Transverse of the face.
 - 3. Posterior Auricular. The trunk then takes the name of *External Jugular*, and in its course along the neck, receives—
 - 4. Cervical cutaneous.
 - 5. Trachelo-scapular, &c.
1. Subclavian.
- 1. Superior Cerebral Veins.
 - 2. Veins of the Corpus Striatum.
 - 3. Veins of the Choroid plexus.
 - 4. Superior Cerebellar Veins.
 - 5. Inferior Cerebellar Veins.
 - 6. Lateral and inferior Cerebral Veins.
 - 1. Lachrymal.
 - 2. Central of the retina.
 - 3. Infra-orbital.
 - 4. Ciliary.
 - 5. Ethmoidal.
 - 6. Palpebral, and
 - 7. Nasal Veins.
3. Internal Jugular.
- 7. Ophthalmic Vein, composed of the
 - 1. Palpebral, and
 - 2. Superciliary Veins.
 - 3. Dorsals of the nose.
 - 8. Facial Vein, called *angular*, near the eye, receiving the
 - 4. Superior Coronaries of the lip.
 - 5. Inferior
 - 6. Several Buccal and
 - 7. Masseteric Veins.
 - 8. Ranine,
 - 9. Submental, and
 - 10. Inferior Palatine.
 - 9. Lingual and Pharyngeal Veins.
 - 10. Superior thyroid.
 - 11. Occipital, and
 - 12. Veins of the Diploë.
2. Right Internal Mammary Vein.
3. Inferior Thyroid Vein, opening into the Vena Cava, between the two Subclavians.

4. Vena Azygos, which receives the
 - 1. Right Bronchial.
 - 2. Intercostal Veins.
 - 3. Semi-azygos.

2. VEINS WHICH FORM THE INFERIOR VENA CAVA.

1. Common Iliac.
- 1. Femoral or Crural, which is a continuation of the Popliteal, commencing by the veins which accompany the fibular arteries, and receiving the—
 - 1. External Saphena and
 - 2. Internal Saphena, which receive—
 - 1. Several abdominal veins.
 - 2. Circumflex Iliac, and
 - 3. External pudic veins.
 - 2. Internal Iliac which receive the—
 - 1. Vesical Veins, commencing with the
 - 2. Sacro-lateral Veins.
 - 1. Dorsal veins of the penis of the male.
 - 2. Veins of the clitoris, in the female.
 - 3. Middle Sacral Vein.
 - 4. Lumbar Veins—four in number on each side, commencing by an—
 - 1. Abdominal branch.
 - 2. Dorsal branch.
 - 5. Spermatic Veins, commencing with the
 - 1. Spermatic plexus in the male.
 - 2. Ovarium, Fallopian tube, &c. in the female.
 - 6. Renal Veins.
 - 7. Capsular and Adipose Veins.
 - 8. Hepatic Veins.
 - 9. Middle,
 - 10. Left, and
 - 11. Right
 - 12. Inferior Diaphragmatic Veins, two in number.

3. VEINS OF THE HEART.

- 1. Great right Coronary.
- 2. Small right Coronary.
- 3. Left Coronary Veins.

4. VEINS WHICH FORM THE VENA PORTA.

- 1. Splenic Vein.
 - Receives the
 - 1. Veins which correspond to the vasa brevia.
 - 2. Right and left gastro-epiploic.
 - 3. Duodenal, and
 - 4. Pancreatic veins.
 - 5. Coronary Vein of the Stomach, and
 - 6. Small mesenteric vein.
- 2. Superior Mesenteric Vein.

VEIN, BRONCHIAL, LEFT. see Azygos—v. Demi-azygos, see Azygos—v. Frontal, see Facial vein—v. Semi-azygos, see Azygos, (vena)—v. Superior intercostal, left, see Azygos—v. Tibio-malleolar, Saphena, great—v. Palato-labial, Facial vein—v. Peroneo-malleolar, Saphena minor—v. Varicose, Varix.

VEINE, Vein—v. Cave, Cava vena—v. Cephalique, Jugular vein, internal—v. Cephalique du pouce, Cephalic vein of the thumb—v. Cubitale cutanée, Basilic vein—v. Fessière, Gluteal vein—v. de Médine, Dracunculus—v. Porte, Porta vena—v. Prélombo-thoracique, Azygos, (vena)—v. Préparate, Cephalic vein—v. Radiale cutanée, Cephalic vein—v. Sans paire, Azygos, vein—v. Trachélo-sous-cutanée, Jugular vein, external.

VEINES ARTÉRIELLES, Arterial veins—v. Ciliaires, Ciliary veins—v. Sous-clavières, Subclavian veins—v. Sus-hépatiques, Hepatic veins.

VEINS, CORONARY, Cardiac veins—v. Intralobular, Hepatic veins—v. Supra-hepatic, Hepatic veins.

VEINSTONE, Phlebotite.

VELAMEN NATIVUM, Integument.

VELAMENTA BOMBYCINA, Villous membranes—v. Cerebralis, Meninges—v. Infantis, Membranes of the foetus.

VELAMENTUM ABDOMINALE, Peritonæum—v. Corporis commune, Integument—v. Nativum, Integument.

center." "A died seized, leaving two infant daughters by different centers."

VENTER IMUS, Abdomen, Hypogastrium, Neimera — v. Inferius, Abdomen — v. Infimus, Abdomen — v. Magnus, Inguvies — v. Medius, Thorax — v. Parvus, Hypogastrium — v. Propendens, Hysteroloxia anterior — v. Renum, Pelvis of the kidney — v. Supremus, Cavum cranii.

VENTEUX, Windy.

VENTILA'TION, *Ventila'tio*, from *ventus*, 'wind.' The act of renewing the air of vessels, hospitals, and apartments, or of situations where many people are collected together. The utility of such renewal must be evident, when it is considered that atmospheric air loses its oxygen during respiration, and that carbonic acid supplies its place. Stagnant air, also, becomes loaded with numerous impurities; and hence one of the greatest hygienic improvements, of modern times, has been a proper attention to circulation of air. It is, moreover, one of the most valuable additions to our stock of therapeutical agencies in many diseases.

Instruments used for the purpose of renewing the air, in ships, apartments, &c., have been called *ventilators*.

VENTOSITÉ, Flatulence.

VENTOSITY, Flatulence.

VENTOUSES SCARIFIÉES, Cupping with the scarificator.

VENTOUSES SÈCHES, Cupping, dry.

VENTRAL, Abdominal.

VENTRAL HERNIA, *Hernia ventral'is*. Direct hernia occurring in any part of the abdomen. It is most frequently found between the recti muscles.

VENTRALE, Belt (Russian).

VENTRALE CUTANEUM, 'Cutaneous apron.' (F.) *Tablier*. An elongation of the nymphæ in the Bostonian female, which hangs down before the vulva like an apron.

VENTRE, Abdomen — v. *Inférieur*, Abdomen — v. *Resserré*, Constipation.

VENTRE INSPICIENDO DE, see De ventre inspiciendo.

VENTRICLE, *Ventric'ulus*, diminutive of *venter*, 'belly.' Literally, a little belly. A name given, in anatomy, to various parts.

VENTRICLE OF ARANTIUS. A small cavity, lined with gray substance, at the point of the calamus scriptorius.

VENTRICLES OF THE BRAIN, *Ventric'uli* seu *Cavita'tes* seu *Sinus Cerebri*, (F.) *Ventricules du cerveau*, are five cavities in the interior of that organ, which are distinguished into the lateral ventricles, middle ventricle, fourth ventricle or ventricle of the cerebellum, and fifth ventricle. The middle ventricle or third ventricle, (F.) *Ventricule moyen du cerveau*, is situated in front of the pineal gland. It is bounded, above, by the tela choroidea and the fornix; below, by a portion of cerebral substance, which separates it from the base of the cranium; laterally, by the thalami nervorum opticeorum; anteriorly, by a medullary cord, called the anterior commissure; and, posteriorly, by another medullary cord, called the posterior commissure. It communicates with the lateral ventricles by two openings, situate behind the anterior pillar or crus of the fornix. The lateral ventricles, *Ventric'uli laterales*, *V. magni*, *V. majores*, *V. priores*, *V. superiores*, *V. tri-cornes*, (F.) *Ventricules latéraux*, are two in number. They are large, and, owing to their considerable curvature, occupy a great part of the cerebral centre. They are bounded, above, by the inferior surface of the corpus callosum; anteriorly, by the curved portion of the same body; posteriorly, by a considerable mass of cerebral

substance; and, internally, they are separated from each other by the septum of the ventricles, — a medullary plate, which is given off from the lower part of the corpus callosum. The lateral ventricles have, in their upper and anterior portion, the *Corpora striata*, *Thalami optici*, and *Tenia semicircularis*: — their inferior portion contains the *corpus fimbriatum*, *cornu Ammonis*, &c. The Fourth ventricle, *Ventriculus cerebelli* seu *quartus*, *V. Arantii*, *Sinus rhomboideus*, (F.) *Quatrième ventricule*, is situate beneath the aqueduct of Sylvius, by which it communicates with the third ventricle. It extends from this aqueduct to the upper part of the medulla; and is seated in the substance of the tuber annulare. The Fifth ventricle, *Ventric'ulus septi pellucidi*, *Incius'ra septi*, (F.) *Cinquième ventricule*, is the small serous cavity between the laminae of the septum lucidum; called, also, *Fissure* or *Fossa of Sylvius* or *Sinus of the septum lucidum*.

VENTRICLES OF THE HEART, *Ventric'uli cordis*, *Specus cordis*, (F.) *Ventricules du cœur*, are two in number. The Right ventricle, *Pulmonary ventricle*, *Ventric'ulus anterior*, *V. primus*, *V. pulmonalis*, (F.) *Ventricule droit ou pulmonaire*, is situate at the fore-part of the heart, the base and apex corresponding to those of the heart. In it are seen the *Columnæ carneæ* and *Cordæ tendineæ*. The right ventricle communicates with the right auricle by the *Ostium venosum*, and from it the *Pulmonary artery* arises. Around the auricular orifice is a tendinous margin or ring, from which the tricuspid valve is given off. The use of the ventricle is to send the blood, by its contraction, along the pulmonary artery to the lungs. The Left ventricle, *Ventric'ulus aorticus*, *V. posterior*, *V. secundus*, (F.) *Ventricule gauche ou aortique*, is situate at the posterior and left part of the heart. Its parietes are much thicker and stronger than those of the right, owing to its having to send the blood over the whole system. The inner surface has the same general appearance as that of the right. The *Columnæ carneæ* and *Cordæ tendineæ* are, however, much stronger. It communicates with the left auricle by means of the *Mitral valve*; and from it proceeds the largest blood-vessel of the body — the aorta.

VENTRICLES OF THE LARYNX, *Sac'culi laryngoi*, *Sinuses of the larynx*, (F.) *Ventricules ou Sinus du larynx*, are two depressions in the larynx, comprised between the superior and inferior ligaments.

VENTRICLE, PULMONARY, V. right.

VENTRICULAR, *Ventricularis*. Same etymon as *Ventricle*. Relating to a ventricle.

VENTRIOULE AORTIQUE, Ventricle, left — v. *Cinquième*, Ventricle, fifth — v. *Droit*, Ventricle, right — v. *Gauche*, Ventricle, left — v. *Moyen du Cerveau*, Ventricle, middle, of the brain — v. *Pulmonaire*, Ventricle, right — v. *Quatrième*, Ventricle, fourth.

VENTRICULES DU CERVEAU, Ventricles of the brain — v. *du Cœur*, Ventricles of the heart — v. *Latéraux*, Ventricles, lateral.

VENTRICULI CORDIS, Ventricles of the heart — v. *Dilatatio*, Gastroctasis — v. *Dissolutio*, Gastro-malacia — v. *Duræ matris*, Sinuses of the dura mater — v. *Emollitio*, Gastro-malacia — v. *Exulceratio*, Gastrocolosis — v. *Fluxus*, Gastro-rhœa — v. *Inflammatio*, Gastritis — v. *Laterales*, see Ventricles, lateral of the brain — v. *Magni*, Ventricles, lateral, of the brain — v. *Majores*, Ventricles, lateral — v. *Metamorphosis gelatiniformis*, Gastro-malacia — v. *Perforatio*, Gastro-brosis — v. *Priores*, Ventricles, lateral — v. *Pseudophlogosis resolutiva et colliquativa*, Gastro-malacia — v. *Superiores*, Ventricles, lateral — v. *Tricornes*, Ventricles, lateral — v. *Ulceratio*, Gastrocolosis.

Verbena'ca, Perist'rium, Hierobot'ane, Herba sacra, Vervain, Purvain, (F.) Verveine. Family, Pyrenacæ. Sect. Syst. Diandria Monogynia. A plant formerly held sacred; used in sacrifices, and suspended round the neck as an amulet. In the form of cataplasm, it is said to have relieved obstinate headaches, and to have been of service in scrofula. It is not used.

VERBE'NA URTICIFO'LIA, an indigenous species, has been used in poisoning from Rhus Toxicodendron.

VERBENACA, Verbena officinalis.

VERBESINA ACME'LLA, Spilanthes Acemella.

VERBUS, Penis.

VERCOQUIN, Phreni'tis vermino'sa. A form of phrenitis, attributed to the presence of a worm in the brain!

VERDET, Cupri subacetat.

VERDIGRIS, Cupri subacetat.

VERENDA, Genital organs.

VERETRUM, Penis.

VERGE, Penis—*v. d'Or, Solidago virgaurea.*

VERGETTE DE PHILADELPHIE, *Erigeron Philadelphicum.*

VERGETURES, Vibices.

VERJUICE, *Omphal'cium, (F.) Verjus, Verdjus.* A sour kind of grape. Also, an acid liquor, prepared from very sour grapes or crab-apples. It is principally used in culinary preparations; although, occasionally, an ingredient in medicinal compounds. See *Vitis vinifera.*

VERJUS, Verjuice.

VERMES, Worms—*v. Cerebri, Choroid plexus.*

VERMICULAIRE BRULANTE, Sedum.

VERMICULAR, Vermiform.

VERMICULARIS, Lumbricalis, Sedum.

VERMICULI SPERMATICI, Spermatozoa.

VERMICULUM, *Vermyc'itum.* An elixir; a tincture. — Ruland and Johnson.

VERMICULUS CAPILLARIS, Dracunculus.

VERMIFORM, *Vermic'ular, Vermicula'ris, Vermiformis,* from *vermis, 'a worm,' and forma, 'form.'* That which resembles a worm.

VERMIFORM PROC'ESSES, *Processus Vermiform'es, Protuberant'ia vermiformes, Montic'uli cerebelli, Appen'dices vermiformes, Vermis, Worm, (F.) Eminences vermiformes du cervelet,* are two medullary projections, at the surface of the cerebellum. The superior vermiform process, *Vermis superior cerebelli,* is an elongated projection, at the anterior and middle part of the superior surface of the cerebellum;—and the inferior vermiform process, *Vermis inferior cerebelli, Pyramid of Malacarne,* is a somewhat large projection, situate in the depression at the inferior surface of the same organ. The inferior vermiform process is usually described as consisting of three portions—the pyramid, the uvula, and the nodulus. The anterior portion of the superior vermiform process is elevated, and termed *Montic'ulus.*

VERMIFUGE, Anthelmintic.

VERMIFUGE, MATHIEU'S. This consisted of two distinct electuaries; the one for killing, the other for expelling tape-worm. The former is made of an ounce of tin filings, and six drachms of fern root.

VERMIFUGUS, Anthelmintic.

VERMILION, Hydrargyri sulphuretum rubrum.

VERMILION DE PROVENCE, Antimonii sulphuretum rubrum.

VERMINATIO, Helminthiasis.

VERMINATION, CUTANEOUS, Malis.

VERMINEUX, Verminous.

VERMINOUS, *Vermino'sus, (F.) Vermineux.* That which is caused by worms; as a *verminous affection.*

VERMIS, Vermiform processes—*v. Bombycinus, Cornu ammonis—v. Cerebelli, Vermiform process—v. Cerebri, Fover, Hungary—v. Cucurbitinus, Tænia solium—v. Digni, Paronychia.*

VERMITIO, Helminthiasis.

VERNIX CASEO'SA, 'cheesy varnish.' The fatty varnish, or deposit, often found on the fœtus, which is secreted by the sebaceous follicles of the skin.

VERNIX SICCA, Sandarac.

VERNO'NIA ANTHELMIN'TICA, *Ascaricida anthelmin'tica, Calagirah, Calageri.* A plant which is indigenous in India. *Family, Compositæ. Sect. Syst. Syngenesia Polygamia superflua.* It has great celebrity in the East Indies, and is a bitter tonic; but the seeds are chiefly used as an anthelmintic, in cases of ascariides and lumbrici in children.

VERNO'NIA NOVEBORACEN'SIS, *Iron weed, Flat top;* an indigenous plant; whose purple flowers appear in August and September, is reported to possess cathartic properties.

VÉROLE, Syphilis—*v. Petite, Variola—v. Petite volante, Varicella.*

VÉROLETTE, Varicella.

VERONICA, *Veronica officina'lis seu Tournefortii, Veronica mas, Thea German'ica, Beton'ica Pauli, Chamæ'dryz, Male Veronica, Fluellin, Officinal Speedwell, (F.) Véronique, Thé d'Europe. Family, Rhinanthodæ. Sect. Syst. Diandria Monogynia.* This plant was once used as a pectoral.

VERONICA AQUATICA, *V. beccabunga.*

VERONICA BECCABUN'GA, *Beccabunga, Anagal'lis aquat'ica, Laver German'icum, Veronica aquat'ica, Cepæ'a, Water Pim'pernel, Brooklime, Brooklime Speedwell, Water Speedwell, Neckweed, Water Purslain, (F.) Véronique creosote.* This plant was formerly used in a variety of diseases. It is, however, almost insipid and inodorous; and has been long banished from practice.

VERONICA MAS, Veronica—*v. Officinalis, Veronica.*

VERONICA PEREGRINA, *Neckweed, Purslain, Speedwell;* indigenous; flowering from April to June, is given internally in scrofulosis, and is applied as a wash to scrofulous tumours.

VERONICA PURPUREA, *Betonica officinalis—v. Tournefortii, Veronica—v. Virginica, Leptandra Virginica.*

VÉRONIQUE, Veronica—*v. Creosote, Veronica beccabunga.*

VERPA, Penis.

VERRE, Vitrum—*v. d'Antimoine, Antimonii vitrum.*

VERRUCA, diminutive *Verruc'ula, Ephy'ma verruca, Phymato'sis verruco'sa, a Wart, (F.) Verrue.* A small, hard, mamillary tumour, which forms at the surface of the skin, and particularly on that of the hands and face. Warts are generally rugous at the surface, and broad at the base; their roots being implanted in the derma by whitish filaments, which are dense, semifibrous, and very numerous.

Warts may be destroyed by caustic, or removed by excision. Their vitality is, generally, not great.

VERRUCA CARNO'SA, *Condyloma—v. Formicaria, Formica—v. Minor, Thymion—v. Palpebrarum, see Hydatid—v. Pencilis, Acrochordon—v. Rhagoidea, Thymion.*

VERRUCARIA, *Calendula officinalis, Heliotropium Europæum.*

VERRUCOSE, Warty.

VERRUCOUS, Warty.

VERRUCULA, Verruca.

VERRUE, Verruca.

VERS, Worms.

VERSE-CHARMS, see Charm.

VERSIO, Turning—v. Fœtus, Turning—v. Spontanea, Evolution spontaneous—v. Uteri, Hysteroloxia.

VERSION, Turning.

VERT-DE-GRIS, Cupri subacetat.

VERTEBRA DENTATA, Axis—v. Dorsi Prima, Lophia—v. Lumborum Prima, Asphaltites—v. Magna, Sacrum.

VERTEBRÆ, *Spondyli*, (F.) *Vertèbres*; from *vertere*, 'to turn.' This name has been given to the bones, which by their union form the vertebral or spinal column. The vertebrae are short, thick, very angular bones; twenty-four in number, and situate one above another. The *body-centrum*, of Owen—of the vertebra is the middle and anterior portion. Above and below it is articulated, by means of a fibro-cartilage, with the contiguous vertebrae. The *Processes*, (F.) *Masses apophysaires*, of each vertebra are:—1. The *spinous process*, situate behind, and in the median line. 2. The two *transverse processes*, standing off from each side. 3. The *four articular or oblique processes—zygapophyses*, of Owen—two *superior*, and two *inferior*—which serve to unite the vertebrae with each other. These transverse and articulating processes are made continuous with the lateral and posterior parts of the body of the vertebra by narrow bony portions or pedicles, on each of which are notches. These, by their union with similar notches in the contiguous vertebra, form the lateral foramina, (F.) *Trous de conjugaison*, through which the spinal nerves leave the vertebral canal. The different processes are united with each other, so as to form a kind of ring of the lateral and posterior parts of the vertebra; and the foramen, within this,—that is, between the body and processes,—concurs in forming the vertebral canal. The vertebrae have particular characters, according to the regions they occupy. They are divided into seven *cervical*, twelve *dorsal*, and five *lumbar*. The first cervical is called *atlas*; the second, *axis* or *vertebra dentata*; and the seventh, *vertebra prominens*. The vertebrae are articulated with each other. Those of the back are joined, moreover, to the ribs. The first or atlas is articulated with the occipital bone; and the last lumbar vertebra with the sacrum. The cervical vertebrae are developed by nine points of ossification; the dorsal and lumbar by eight.

VERTEBRAL, *Vertebra'lis*. That which relates or belongs to the vertebrae.

VERTEBRAL ARTERY, *Posterior cerebral artery*, (Ch.) is the largest of the branches of the subclavian. It arises from the posterior part of that vessel; is lodged in a canal, (F.) *Petit canal vertèbral*, formed by the foramina in the transverse processes; enters the cranium, and proceeds to anastomose with its fellow of the opposite side, and to form the *Basilar artery*. Besides the branches sent to the neck, the vertebral artery gives off the *anterior* and *posterior spinal arteries*, and the *inferior cerebellous*, in the cavity of the cranium.

VERTEBRAL COLUMN, *Rachis*, *Rhachis*, *Notos*, *Acne'itis*; the *Spine*; the *back bone*, *Car'ina*, *C. hom'inis*, *Spina dorsi* seu *vertebra'lis*, *Columna spina'lis*, *C. vertebra'lis*, *C. dorsi*, *Spina Dorsum*, *Tergum*, *Comp'ages Vertebra'rum*, *Acan'tha*, *Sacra fistula*, *H'era Syrinz*, (F.) *Colonne vertèbrale*, *Épine du dos*, *Échine*. A kind of bony column, situate at the posterior and central part of the trunk; extending from the head to the sacrum; flexible in every direction, yet very solid and hollowed by a canal called *vertebral*, which gives it lightness without diminishing its strength, and runs through its whole length. The vertebral

column is formed by the superposition of the vertebrae. It represents a pyramid, whose base is below. Anteriorly, it is convex in the neck; concave in the back, and convex, again, in the loins. Behind, the curvatures are of course the reverse of these. There is also, in the dorsal region, a lateral curvature, the concavity of which is towards the left side. Considered as a whole, the vertebral column has an *anterior* or *prespinal* surface; a *posterior* or *spinal*; two *lateral*; a *base*; and an *apex* or *top*. In the nomenclature of Chaussier, the anterior surface, in the neck, is called *trachelian*; in the back, *predorsal*; and in the loins, *prelumbur*. The dorsal surface has, at its middle, the spinous processes; and, at its sides, the *vertebral gutters*, (F.) *Gonitides vertèbrales*, formed by the succession of the *vertebral plates*, (F.) *Lames vertèbrales*, which, by their junction, constitute the spinous processes. These are filled by the sacro-spinalis muscle. The sides or lateral surfaces present the foramina resulting from the union of the *vertebral notches*, (F.) *Échancrures vertèbrales*. These are called *vertebral foramina*, (F.) *Trous de conjugaison*, and give passage to the *vertebral nerves*. The base of the vertebral column is oblique, to unite with the sacrum; and forms with it an angle, called *sacro-vertebral angle* or *promontory*. The apex or top of the vertebral column is articulated with the occipital bone. Sometimes, the term *vertebral column* includes the whole of the column from the occipital bone to the extremity of the coccyx. The *Vertebral* or *Spinal Canal*, *Rachid'ian Canal*, *Solen*, *Canalis medullæ Spina'lis*, *Specus pro medull'a Spina'li* seu *vertebra'lis*, exists through the whole of the vertebral column, whose curvatures it follows. It is continuous above, with the cranium; below, with the sacral canal, if we consider the vertebrae to terminate at the sacrum. It is lined by a prolongation of the meninges, forming the *Theca vertebra'lis*, and lodges the spinal marrow.

The vertebral column, which unites lightness with solidity, serves to support the head and chest. It is the seat of all the movements of the trunk, the weight of which it transmits to the pelvis. It lodges and protects the spinal marrow, and gives passage to the vertebral nerves, and to numerous vessels.

VERTEBRAL DISEASE, *Rachial'gia* (of some.) *Carica* of the *Vertebrae*, *Spondylarthroc'aci*, *Spondyl'oc'aci*, *Kypho'sis inflammato'ria*, *A. paralytica*, *Gibbos'itas cario'sa*, *Carica vertebra'rum*, *Spondylal'gia*, *Spondyloppo'sis*, *Tubercul'is Vertebra'rum*. The spinal column is liable to distortion, (see Hump,) at times, without the vertebrae being much, if at all, diseased. At other times, a more formidable affection is induced; the vertebrae becoming carious, and the intervertebral cartilages ulcerated; followed by a more or less complete loss of power over the lower extremities. In such case, on examining the spine, one or more of the spinous processes is found to project beyond the rest. The disease was first well described by Mr. Percival Pott; and, hence, it has been called, by the French, *Maladie de Pott*, (*Malum Pottii*, *Gibbus Pottii*, or *Pott's disease*.) It usually occurs in scrofulous subjects, and the treatment consists in establishing a counter-irritation by blisters, issues, or the moxa, opposite the transverse processes of the diseased vertebrae. The sore must be suffered to remain open and the patient kept in the horizontal posture until the use of the limbs is recovered; employing tonics, the free admission of fresh air, &c., at the same time.

VERTEBRAL LIGAMENTS, (F.) *Ligaments vertèbraux*, *Surtouts ligaments de la colonne cer-*

vertebrae, are distinguished into *anterior* and *posterior*. They consist of long, ligamentous coverings; the *anterior* occupying the anterior part of the vertebral column; and the *posterior* seeming to arise from the occipito-axoid ligament, and seated behind the bodies of the vertebrae, from the axis to the sacrum.

VERTEBRAL NERVE, *Trisplanchino*.

VERTEBRAL NERVES, *Spinal Nerves*, spring successively from the spinal marrow; from its origin to its termination. These nerves—30 pairs in all—arise by two roots; one *anterior*, from the *anterior* or *antero-lateral column* of the spinal marrow, and the other *posterior*, from the *posterior column*, and afterwards issue by the vertebral and sacral foramina. Each of these roots seems to have a distinct function; the *posterior* being destined to convey sensation to parts; the *anterior*, motion. On the posterior root, before its junction with the anterior, there is a ganglion. Of the 30 pairs, 7 are *cervical nerves*, 12 *dorsal*, 5 *lumbar*, and 6 *sacral*. See *Nerves*.

VERTÈBRES, *Vertebrae*.

VERTEBRODYMIA, see *Somatodymia*.

VERTEBRO-ILLIAC LIGAMENT, *Ileo-lumbar ligament*.

VERTEX, *Cor'yphè*, *Acrori'a*, *Spon'dylus*. The top or highest part of the head. See *Sinciput*.

VERTEX CORDIS, *Mucro Cordis*—v. *Cubiti*, *Olecranon*—v. *Palpitans*, *Fontanella*.

VERTIBULUM, *Trepan*.

VERTICULA, *Articulation*.

VERTICULUM, *Articulation*.

VERTICULUS, *Articulation*.

VERTIGE, *Vertigo*.

VERTIG'INOUS, *Vertigino'sus*, (F.) *Vertigineux*. Relating or pertaining to vertigo. Giddy.

VERTIGO, from *vertere*, 'to turn'; *Dinos*, *Ilin'gos*, *Gid'diness*, *Din'siness*, *Dinus verti'go*, *Hallucina'tio vertigo*, *Aural'gia vertigo*, *Circumgyra'tio*, *Swimming of the head*, (F.) *Vertige*, *Étourdissement*. A state in which it seems that all objects are turning round; or that the individual himself is performing a movement of gyration. Two varieties have been designated;—

simple vertigo, where the objects are seen; and *scotodynia*, in which the sight is obscured, and the individual often falls. Vertigo is dependent upon the condition of the brain; and often announces an attack of apoplexy or epilepsy.

VERTIGO TENERRICOSA, *Scotodynia*.

VERUGAS (S.), from *verruca*. A peculiar disease affecting certain localities of Peru, which manifests itself by sore-throat, pains in the bones, and other febrile symptoms. In the course of a few days, an eruption of red pimples or boils appears. These sometimes increase in magnitude till they become nearly as large as an egg, and discharge blood copiously. It is ascribed to the water of certain springs in the valleys, and especially in that of *Sura*: called *Agua de Veruga*.—*Tschudi*.

VERUMONTANUM, *Gallinaginis caput*.

VERVAIN, *Verbena officinalis*.

VERVEINE, *Verbena officinalis*.

VESANIA, *Vesania*, 'madness.' Derangement of the intellectual and moral faculties, without coma or fever. Many nosologists have used this as a generic term; under which they have included the different species of mental alienation, *hypochondriasis*, *somnambulism*, and even *hydrophobia*. See *Nosology*.

VESANIA MANIA, *Mania*.

VESANIAE, *Insanity*.

VESICA BILIARIA, Gall-bladder—v. *Cordis*, see *Pericardium*—v. *Fellea*, Gall-bladder—v. *Intestinales*, *Vesicula umbilicalis*—v. *Prostatica*, see

Ejaculatory Ducts—v. *Saccata*, Stricture of the urinary bladder—v. *Urinaria*, Urinary bladder.

VESICA IRRITABILITAS, *Cysterethismus*—v. *Unguinosa tendinum*, *Burse mucosa*.

VESICAL, *Vesica'tis*, from *vesica*, 'the bladder.' That which belongs or relates to the bladder.

VESICAL ARTERIES vary in number and origin. The umbilical artery always sends off two or three; the middle hemorrhoidal, internal pudic, and obturator furnish others, which ramify and anastomose in the parietes of the bladder; the hypogastric furnishes one which is somewhat larger, the *Vesico-prostatic* (Ch.), and proceeds to the *bas-fond* of the bladder, sending numerous ramifications to it as well as to the surrounding parts.

VESICAL GANGLIA, see *Spermatic Ganglion*—v. *Triangle*, see *Urinary Bladder*.

VESICAL VEINS, much more numerous than the arteries, open into the hypogastric plexus.

VESICANT, *Blistet*, *Epispastic*.

VESICARIUM, *Ovarium*.

VESICATIO, *Vesica'tio*; same etymon, (F.) *Vesication*. The action of a vesicant. The formation of blisters.

VESICATOIRE, *Blistet*—v. *Magistral*, *Magistral*.

VESICATORIUM, *Blistet*.

VESICLE, *Vesicula*—v. *Allantoid*, *Allantois*—v. *Blastodermie*, see *Molecule*—v. *Cowpox*, see *Vaccination*.

VESICLE OF DEVELOPMENT, *V. of Evolution*. A vesicle or cyst concerned in histogeny.

VESICLE OF EVOLUTION, *V. of Development*—v. *Germinal*, see *Molecule*—v. *Purkinjean*, see *Molecule*—v. *Umbilical*, *Vesicula umbilicalis*.

VESICLES OF DE GRAAF, *Folliculi Graafiani*.

VESICO-VAG'INAL, *Vesico-vagina'lis*. Relating to the bladder and the vagina; as *vesico-vaginal fistula*.

VESICULA, *Cystinx*, *Ves'icle*; diminutive of *vesica*, 'a bladder.' A small bladder or cyst.

VESICULA, *Ves'icle*, *Echphly'sis*, *Cystinx*, in pathology, means a small orbicular elevation of the cuticle containing lymph, which is sometimes clear and colourless, but often opaque and whitish or pearl-coloured. It is succeeded, either by a scurf, or by a laminated scab.

VESICULA ÆNIGMATOSA, *Vesicula umbilicalis*—v. *Alba*, *Vesicula umbilicalis*—v. *Bilis*, Gall-bladder—v. *Blastodermatica*, see *Molecule*—v. *Chylli*, *Receptaculum chylli*—v. *Erythroidea*, *Erythroïd vesicle*—v. *Fellis*, Gall-bladder—v. *Gangrænescens*, see *Anthrax*—v. *Germinativa*, see *Molecule*—v. *Omphalo-mesenterica*, *Vesicula umbilicalis*—v. *Ovalis*, *Vesicula umbilicalis*—v. *Prolifera*, see *Molecule*—v. *Prostatica*, see *Ejaculatory Ducts*.

VESICULA UMBILICAL'IS, *Umbilical Ves'icle*, *Vesicula alba* seu *om'phalo-mesenter'ica* seu *enigmato'sa* seu *ova'lis*, *Ves'ica intestinalis*, *Intestinal Vesicle*, *Vit'elline Pouch*. A small, pyriform, round, or spheroidal sac, which, about the fifteenth or twentieth day after fecundation, is of the size of a common pea, and probably acquires its greatest dimensions in the course of the third or fourth week. After the seventh week, it becomes shrivelled and disappears insensibly. It seems to be situate between the chorion and amnion, and is commonly adherent either to the outer surface of the amnion, or to the inner surface of the chorion, but at times is loose between them. The *vitelline ped'icle*, which attaches the vesicle to the embryo, is continuous with the intestinal canal; and, up to twenty or thirty days of embryonic life, is hollow;—*Ductus om'phalo-mesenter'icus* seu *vitello-intestina'lis* seu *vitella'rius*,

The older the fœtus, the more viable is it. It is an idle prejudice that a child, born at the end of eight months, is less likely to live than one born at the end of seven. The signs of *viability* are drawn from the weight, length, external conformation, &c., of the fœtus. It may be laid down as a general rule, that no fœtus born before the end of the seventh month is viable.

VIAE CHYLIFERÆ, Chyliferous vessels.

VIAE CLAUDES'TINÆ, *Clandestine Passages*. Supposititious secret ways or passages or 'royal roads,' to account for the rapid transmission of substances taken into the stomach to the kidneys or bladder.

VIAE EXTRAORDINARIÆ LACTIS, Galactoplasia—v. *Lacrymales*, Lacrymal passages—v. *Prima*, Ways, digestive—v. *Secundæ*, Ways, second.

VIAL, Phiala.

VIBICES, *Mol'opes*, *Stria*, (F.) *Vergetures*. Large purple spots, like the marks produced by the strokes of a whip, which appear under the skin in certain malignant fevers. They are unfavourable indications, as they denote great prostration.

VIBRAMEN, Oscillation.

VIBRANS, Vibratory.

VIBRATILE, Vibratory.

VIBRATILITY, *Vibratilitas*, from *vibrare*, 'to oscillate.' Capability of being thrown into vibration.

VIBRATIO, Oscillation—v. *Cardiaca*, Palpitation—v. *Cordis*, Palpitation.

VIBRATION, PECTORAL, see *Fremitus*—v. *Tactilo*, see *Fremitus*—v. *Tussivo*, see *Tussivo*.

VIBRATIONS OF SOUND, see *Sound*.

VIBRATOR, *Deferens vas*.

VIBRATORY, *Vibrative*, *Vibrans*, (F.) *Vibratile*, from *vibrare*, 'to quiver.' An epithet applied to the pain that accompanies some neuralgias, which seems to the patient to vibrate among the nerves.

VIBRATORY MOTION, see *Cilia*.

VIBRATUS, Oscillation.

VIBRIO; from *vibrare*, 'to quiver.' A genus of infusory animalcules, of which different species are met with,—for example, *Vibrio prolifer* in almost all putrescent fluids containing protein, and in the pus of chancres; in which last the *V. lincola* has likewise been found.

VIBRIS'SÆ, from *vibrare*, 'to quiver.' The hairs which grow at the entrance of the nostrils and of other outlets. In the feline tribe, the whiskers.

VIBURNUM CASSINOIDES, *Plex Paraguensis*.

VIBURNUM DENTA'TUM, *Arrow Wood*, *Healy Tree*, *Tily* of the Indians. A high indigenous shrub, of the same family as *V. lentago*; the bark of which has been used by the Indians as a diuretic.

VIBURNUM LÆVIGATUM, *Plex Paraguensis*.

VIBURNUM LENTA'GO, *Sweet Viburnum*, *Nanny-berry*. A handsome indigenous tree, of the honeysuckle family—*Caprifoliaceæ*—which flowers in May and June. It has been used as an antiperiodic.

VIBURNUM PRUNIFOLIUM, *Black Haw*, *Stoel-eared Viburnum*. Indigenous: flowering in May. The leaves have been used as tea.

VIBURNUM, SLOW-LEAVED, *V. prunifolium*—v. *Sweet*, *V. lentago*.

VIC-LE-COMPTÉ, MINERAL WATERS OF. *Vic-le-Compte* is a small village in the department of Puy de Dôme, three leagues from Issoire; where there is an acidulous chalybeate, which is aperient.

VICARIOUS, *Vica'rius*, from *viciis*, 'change, place.' Taking the place of another:—as 'vica-

rious secretion,' *Secretio vica'ria*; a secretion which takes place in one part instead of another.

VICAR'S BRAY, MINERAL WATERS OF. This spring is situate in Perthshire, Scotland, about two miles from Dollor, and near to Blarngone. The water is one of the strongest chalybeates known.

VICE, Cachosis.

VICHY, MINERAL WATERS OF. Carbonated alkaline chalybeates, the sources of which are at Vichy, six leagues from Moulins, in the department of Allier. The springs are seven in number. Almost all are thermal; give off bubbles of carbonic acid gas, and have a slightly sulphureous odour. They deposit carbonates of lime and magnesia, and a little oxide of iron; and afford, on analysis, carbonates of lime, soda, iron, and magnesia, carbonic acid, sulphate of soda, and chloride of sodium. They are employed as tonics, particularly in chronic affections of the abdominal viscera, in old catarrhs, diseases of the joints, &c.

VICHY WATER, FACTU'IOUS, *Aqua Viciensis*, (F.) *Eau de Vichy*, is made of simple acidulous water, impregnated with twice its bulk of carbonic acid, ℥xxxss; subcarbonate of soda, gr. xxxij; sulphate of soda, gr. xvj; chloride of sodium, gr. iv; subcarbonate of magnesia, gr. ss; chloride of iron, gr. ʒ. *Mix. Ph. P.*)

VICIA ERVILIA, Ervum.

VIC'IA FABA, *Faba*, *Faba*, *Faba* major seu vulgaris, *Or'obus faba*. The Common Garden Bean, (F.) *Fève* ou *fève des marais*. Family, Leguminosæ. *Sex. Syst.* Diadelphia Decandria. A native of Egypt, of which there are many varieties. Beans are not easy of digestion. They are proverbially flatulent, especially when old. When young, they are more digestible and wholesome. Bean meal was one of the four resolvent meals of the ancients.

VICINITRACTUS, Erysipelas.

VICINITRAHA, Erysipelas.

VICTORIALIS FEMINEA, *Gladiolus vulgaris*—v. *Longa*, *Allium victorialis*—v. *Rotunda*, *Gladiolus vulgaris*.

VICTUS RATIO, Diet.

VIDANGES, *Lochia*.

VIDIAN CANAL, Pterygoid canal.

VIE, Life—v. *Durée de la*, see *Longevity*—v. *Mogenne*, see *Longevity*.

VIELLESSE, Senectus.

VIERGE, Virgin.

VIF ARGENT, Hydrargyrum.

VIGILANCE, Insomnia.

VIGILANTIA, Egregorsis.

VIGILATIO, Egregorsis.

VIGILIA, Egregorsis.

VIGILIAE, Egregorsis—v. *Nimias*, *Coma vigil*.

VIGILIUM, Egregorsis.

VIGNE, *Vitis vinifera*—v. *Blanche*, *Bryonia alba*—v. *du Nord*, *Humulus lupulus*—v. *Vierge*, *Bryonia alba*.

VIGOR, Acme.

VILLA FRANCA, (CLIMATE OF.) This little town is situate immediately to the eastward of Montalbano, which separates the bay of Villa Franca from that of Nice. It is on the southern declivity of a steep and lofty range of mountains; and is more effectually sheltered from the north and north-west winds than Nice, with the climate of which that of Villa Franca closely corresponds.

VILLI, see *Villosus membranes*.

VILLOUS, *Villo'sus*, from *villus*, 'a hair.'

VILLOUS MEMBRANES OR COATS, *Velamen'ta Bombyc'ina*, (F.) *Membranes villosæ*, *Membranes veloutés*, are such as are covered with soft papillæ or *Villi*, *Flocci*, *Floc'culi*, *Vesic'ulæ*, *Cylin'dri*, *Tubi Membrana'cei*, constituted of blood-vessels,

nerves, and absorbents; or such as are covered with fine down, so as to cause them to feel soft and velvety. The term is, however, chiefly restricted to the former. Chaussier gives the name *simple villous membranes* to the serous membranes; and that of *complicated or follicular villous membranes* to the mucous membranes. On these membranes there are bodies endowed with *ciliary motion*.

VIN, Wine—*v. de Bordeaux, Claret—v. de Poulet, see Poulet—v. de Quinquina compos.*, Vinum de kinâ kinâ compositum—*v. Sec, Sack.*

VINAIGRE, Acetum, see Aceticum acidum—*v. Scillitique, Acetum scillâ—v. de Bois, Pyroigneous acid.*

VINAIGRES MÉDICINAUX, Acetica.

VINCA MINOR, *Vinca pervin'ca, Clem'atis daphnoides major, Lesser periwinkle, (F.) Perwenche, Violette des Sorciers.* It has bitter and astringent properties, and has been used in gargles and diseases of the chest.

VINCETOXICUM, *Asclepias vincetoxicum.*

VINCTURA, Fascia.

VINCULA, Fascia.

VINCULUM, Bandage, Lien—*v. Caninum, Frænum penis—v. Lingue, Frænum lingue—v. Præputii, Frænum penis—v. Umbilicale, Funiculus umbilicalis.*

VINE, Vitis vinifera—*v. Grape, Vitis vinifera—v. Poison, Rhus radicans—v. Wild, Pareira.*

VINEGAR, AROMATIC SPIRIT OF, see Aceticum acidum—*v. of Cantharides, Acetum cantharidis—v. Common, Acetum—v. Distilled, see Aceticum acidum—v. Marselles, Acetum aromaticum—v. of Meadow saffron, Acetum colchici—v. of Opium, Guttae nigrae—v. Radical, Aceticum acidum—v. of Squills, Acetum scillâ—v. of the Four Thieves, Acetum aromaticum—v. Thieves', Acetum aromaticum—v. Whey, see Acetum—v. of Wood, see Aceticum acidum.*

VINETTIER, Oxycoantha Galeni.

VINEUX, Vinous.

VIOLENTA, see Temulentia.

VIOLENTIA, Temulentia.

VINOSUS, Vinous.

VINOUS, *Vino'sus, Ceno'des, Ceno'des.* Relating to wine. Having the character of, or resembling, wine. Made of wine.

VINUM, Wine, Sherry wine, (Ph. U. S. 1842,) see Wine.

VINUM ABSINTHITES, *Wine of Wormwood. (Fol. absinth. esic., absinth. Pontic.,* ʒʒ ʒvj, vini alb. Oij. Macerate for 24 hours, and strain. Ph. P.) Stimulant, tonic, febrifuge, vermifuge.

VINUM ADUSTUM, Brandy—*v. Album, Sherry wine, (Ph. U. S. 1851,) see Wine—v. Album Hispanicum, see Wine—v. Album Montanum, see Wine.*

VINUM AL'OEÆ, *V. aloës Socotori'nae, Vinum aloët'icum, V. aro'mo-aloët'icum, Wine of Aloes, Tinctura h'era, Tinctura sacra. (Aloës in pulv. ʒj, cardam. cont., Zingib. cont., ʒʒ ʒj; vini alb. Oj. Macerate for 14 days, and filter. Ph. L.)* Purgative and stomachic, according to the dose. Dose, fʒj to fʒij.

VINUM AMARUM, *V. Gentianæ comp.—v. Amarum scilliticum, &c., v. diureticum amarum—v. Amarum cum spiritu vini, v. gentianæ compositum—v. Antimonialè, V. antimonii tartarizati—v. Antimonistum Huxhami, V. antimonii tartarizati—v. Antimonii potassio-tartratis, V. antimonii tartarizati.*

VINUM ANTIMONII, *V. antimo'nii tartariza'ti, V. tart'arizati antimonii, V. antimo'nii potas'sio-tartratis, Liquor tart'ari emet'ici, Solution of tartarized antimony, Essent'ia antimonii seu stib'ii, Antimonial wine, Vinum benedictum, Vinum antimoniatum Huxhami, V. antimonialè, Aqua benedicta Ruland'i, Vinum emet'icum. (Ant. et*

Potass. tart. ʒj, vini alb. fʒx. Dissolve the tartarized antimony in the wine. Ph. U. S.) Each fluidounce contains two grains of the tartrate.

The ordinary Antimonial wine is made with glass of antimony ʒj, sherry Oiss.

Ward's Red Drop consists of a strong vineous solution of tartarized antimony.

VINUM ANTISCORBU'TICUM, *Antiscorbutic wine. (Rad. armoraciae recent. ʒj, fol. cochlearis recent., nasturtii aquat., trifol. aquatic., semin. cinap., ʒʒ ʒss, ammonia muriat. ʒij, vin. alb. Oij. Macerate for 36 hours; filter, and add tincture cochlear. ʒss. Ph. P.)* Stimulant and tonic. Dose, fʒss to fʒij.

VINUM AROMAT'ICUM, *Aromatic wine. (Species aromatic. ʒiv, vin. rubr. Oij. Macerate for 6 days and filter. Ph. P.)* Stimulant and tonic. Used, externally, in fomentations, embrocations, &c.

VINUM AROMO-ALOETICUM, *V. aloës—v. Benedictum, V. antimonii tartarizati.*

VINUM CAMPA'NUM, *V. Campana'ocum, Champagne wine.* A well-known sparkling wine of France.

VINUM CANARINUM, see Wine—*v. Chalybestum, V. ferri—v. Cinchonæ compositum, V. de kinâ kinâ comp.*

VINUM COL'CHICI, *Wine of Colchicum, V. Colchici Rad'icis, Wain's Eau d'Hysson. (Colchic. rad. bene contus. lbj, vini alb. Oij. Macerate for 14 days, with occasional agitation, and then express strongly, and filter. Ph. U. S.)* It may also be prepared by displacement. Diuretic, sedative, and purgative. Chiefly used in gout. Dose, gr. 40 to fʒj.

Reynold's Specific for gout and rheumatism consisted of the fresh bulb of *Colchicum ʒviij, Sherry wine, fʒxvj.* The colchicum was macerated for eight or ten days in the wine, at a gentle heat; coloured with *syrup of poppies* and flavoured with rum. Reynolds is said to have killed himself by taking an over-dose of it.

VINUM COLCHICI RADICIS, *V. colchici.*

VINUM COLCHICI SEM'INIS, *Wine of Colchicum seed. (Colchic. sem. cont. ʒiv; vini alb. Oij. Macerate for 14 days, with occasional agitation, then express and filter. Ph. U. S.)* Dose, fʒj to fʒij.

VINUM CREMATUM, Brandy.

VINUM DIURET'ICUM AMARUM, *Vinum amarum scilliticum compositum in Charit'is Noocomi's usurpatum, Bitter diuretic wine. (Cort. cinchon., Winteran., limon., ʒʒ ʒij, rhus toxicodendr., scilla. cacumin. angelicæ, ʒʒ ʒss, fol. absinth., melissa. ʒʒ ʒj, baccar. junip., macis, ʒʒ ʒss, vin. alb. Oviij. Macerate and filter. Ph. P.)* Stimulant, tonic, and diuretic. Dose, fʒss to fʒisa.

VINUM EMETICUM, *V. antimonii tartarizati.*

VINUM ER'GOTÆ, *Wine of Ergot. (Ergota. cont., ʒij; vini alb. Oj. Macerate for 14 days, with occasional agitation; then express, and filter. Ph. U. S.)* Dose, ʒxx to fʒj to produce the peculiar effects of ergot.

VINUM FERRATUM, *V. Ferri.*

VINUM FERRI, *V. chalybeatum, Steel wine, Wine of Iron, Vinum ferratum, V. Martia'tum, V. Martis, Tinctura Martis vino'sa, Tinctura Martis cum vino. (Iron, ʒj, super-tartrate of Potass, in powder, ʒvj, distilled water, Oij or q. s., proof spirit, fʒxxx. Rub the iron and super-tartrate of potass together, and expose them to the air in a flat vessel, moistened with a fluidounce of water, for a fortnight; agitating every day with a spatula, and sprinkling them with water, to keep them moist. Then dry with a gentle heat, and mix with ʒxxx of distilled water. Filter the fluid and add the spirit. Ph. L.)* Tonic. Dose, fʒj to fʒiv.

It is sometimes made by adding two pints of

wine to two ounces of iron filings; macerating and filtering.

VINUM GENTIANÆ COMPOSITUM, *V. Amaraum*, Compound wine of gentian, *Infusum amaraum vino sum*, Vinum amarum cum spiritu vini, Wine bitters. (Rad. gentian. lutea ℥ss, cort. cinchon. offic. ℥j, cort. aurant. ℥j, canella alb. ℥j, alcohol. dilut. ℥iv, vini alb. Hispania. Ojss. Ph. E.) Dose, f℥j to f℥vj.

VINUM HIPPOCRATICUM, Claret—*v. Hispanicum*, Vinum, see Wine—*v. Hordeaceum*, Cerevisia—*v. Hydatodes*, see Hydatoid.

VINUM IPECACUANÆ, *Ipecacuanha wine*. (*Ipecacuan. cont. ℥ij, vini alb. Oj.*) Macerate for 14 days, express, and filter. Emetic and diaphoretic. Dose, as an emetic, f℥iv to f℥x.

VINUM DE KINÀ KINÀ COMPOSITUM, *V. cincho-na compositum*, Compound bark wine, (F.) *Vin de quinquina composé*. (Cort. cinchon. pulv. ℞ss, quassia, cort. Winteran., cort. aurant. sic., ℞ ℥ss, alcohol. (12° to 22° Beaumé) Oj. Macerate for 24 hours; and add vini albi Ovj. Macerate for four days, and filter. Ph. P.) Tonic, febrifuge, and stomachic. Dose, f℥ss to f℥ij.

VINUM MARTIATUM, *V. ferri—v. Martis*, *V. ferri—v. Medicatum*, see Claret.

VINUM MEDICINALE, *Medicated Wine*. Wine, holding in solution one or more medicines. Medicinal wines are obtained by macerating or digesting medicinal substances in wine. They differ, of course, according to the nature of the medicine employed, the strength of the wine, &c. In a late Pharmacopœia of the London College, all the wines were changed into weak tinctures; but the old names were left unaltered. Sherry is the wine usually employed. The following are medicated wines.

VINUM MÉRUM, Acetatum—*v. Nicotianæ tabaci*, *V. tabaci—v. Opiatum fermentatione paratum*, *Laudanum abbatiss Rousseau*.

VINUM OPII, *Wine of Opium*, *Vinum de opio compositum*, *Laudanum liquidum Sydenhami*, *Laudanum liquidum Hoffmani*, *Tinctura Thebaïca*, *Ford's laudanum*. (Opii in pulv. ℥ij; cinna. cont., caryophyll. cont. ℞ ℥j; vini albi Oj. Macerate for 14 days; express and filter.—Ph. U. S.) Narcotic. Dose, gr. xv to f℥j.

VINUM DE OPIO COMPOSITUM, *V. opii—v. Picatum*, *Pissites*.

VINUM PORTUGALICUM, *V. rubrum*, (Ph. U. S. 1851.) Wine of Portugal or of Oporto. Port wine. A strong astringent wine, not much drunk in the United States; but greatly used in England.

VINUM QUININÆ, *Wine of Quinia*. (Wine ℞ij, sulphate of quinia gr. x. Mix.) Dose, f℥ss or more; according as it is used as a stomachic, or to arrest ague. A *Vinum Cincho-nia* may be made in the same way.

VINUM RHEI, *V. R. palmati*, *Rhubarb Wine*, *Tinctura Rhubarbari Vinosa*, *Vinum Rhubarbari*, *Elixir Rhei dulcè*, *R. R. Compositum*. (Rhei cont. ℥ij, canella cont. ℥j, alcohol. dilut. f℥ij, vini albi, Oj. Macerate for 14 days; express and filter.—Ph. U. S.) Laxative and stimulant. Dose, f℥iv to f℥ss.

VINUM RHEI PALMATI, *V. Rhei—v. Rhenanum*, see Wine—*v. Rhubarbari*, *V. rhei palmati—v. Rubrum*, *V. Portugallicum—v. Rubrum Portugallicum*, see Wine.

VINUM TABACI, *Vinum Nicotianæ Tabaci*, *Tobacco Wine*. (*Tabac. incis. ℥j, vini albi, Oj.*) Macerate for 14 days; express and strain. Ph. U. S.) Narcotic, diuretic, and antispasmodic. In dropsical cases, colica pictonum, and ileus. Not used. Dose, gr. xx to xxxj.

VINUM VERATRIS, *V. V. albi*, *Wine of White Hellebore*. (*Veratri cont. ℥iv; Vini albi, Oj.*)

Macerate for 14 days, express and filter.—Ph. U. S.) In cutaneous affections, and in gout. Dose, ten minims.

VINUM VERATRIS ALBI, *V. Veratri*.

VIOL, *Stuprum*.

VIOLA, *Viola odorata seu mar'tia*, *Ion*, *Matronalis*, *Viola'ria*, the Sweet Violet, (F.) *Violetta à bouquet*, *V. odorata*. The flowers of the sweet violet have a pleasant, peculiar odour, and scarcely any taste. They are slightly laxative.

VIOLA CANINA, *V. sylvestris*. The Dog Violet. The root of this plant is emetic and cathartic. Dose, ℞j.

VIOLA IPECACUANHA, see *Ipecacuanha—v. Lutea*, *Cheiranthus cheiri—v. Martis*, *Viola—v. Odorata*, *Viola—v. Palustris*, *Pinguicula vulgaris*.

VIOLA PEDA'TA, *Viola*, (Ph. U. S.) This indigenous violet, which grows from New England to Carolina, is regarded by some as a useful demulcent in pectoral affections.

VIOLA SYLVESTRIS, *V. Canina*.

VIOLA TRI-COLOR, *Heart's ease*, *Pansies*, *Jace'a tricolor*, *Herba seu Flores Trinitatis*, (F.) *Pensée*, *P. sauvage*. The decoction of this beautiful little plant has been recommended in diseases of the skin, &c. Its roots are, also, emetic and cathartic.

VIOLARIA, *Viola*.

VIOLET, DOG, *Viola canina—v. Bloom*, *Solanum dulcamara—v. Sweet*, *Viola*.

VIOLETTE À BOUQUETS, *Viola—v. Odorata*, *Viola—v. des Sorciers*, *Vinea minor*.

VIOLIER JAUNE, *Cheiranthus cheiri*.

VIORNA, *Clematis vitalba*.

VIPER, EGYPTIAN, *Aspis—v. Grass*, *Scorsonera—v. Ten inch long*, *Echidna ocellata*.

VIPERA, *Coluber berus*.

VIPERARIA, *Aristolochia serpentaria*, *Scorsonera*.

VIPERINA VIRGINIANA, *Aristolochia serpentaria*.

VIR, *Penis—v. Effeminatus*, *Gynæcaner*.

VIRAGO, see *Pogoniasis*.

VIRGA, *Penis—v. Cerea*, *Bongie—v. Cerebri*, *Pineal gland*.

VIRGILIA, *Cladrastis tinctoria*.

VIRGIN, *Virgo*, *Parthenus*, *Expers nuptiarum*, (F.) *Vierge*, *Pucelle*. A female who has never had sexual intercourse. Applied, also, occasionally to the male so circumstanced.

VIRGINAL, *Virginalis*, from *virgo*, 'a virgin.' The external genital organs of the virgin.

VIRGINAL MEMBRANE, *Hymen*.

VIRGINIA, MINERAL WATERS OF. There are several celebrated mineral springs in Virginia, on the western side of the Blue Ridge. Two Thermal springs exist in Bath county. The Warm Spring, as it is called, issues with a bold stream, sufficient to turn a mill, and to keep the water of its basin at the temperature of 97°. The Hot Spring is a few miles from the Warm. Its temperature is 107°. They are both slightly sulphureous. The Sweet Springs are at the eastern foot of the Allegheny, in Botetourt county; 42 miles from the Warm Springs. The water has a temperature of 70°, and is highly impregnated with carbonic acid. The White Sulphur, as well as the Red Sulphur, and Salt Sulphur Springs, are also much celebrated. The Red Spring is affirmed to exert a sedative influence on the pulse, diminishing the number of its beats. About 15 miles from Staunton are Stribling's Springs—a sulphuretted water; and near Warrenton, in Fauquier county, there is a sulphureous water, called Lee's Springs, which is much frequented. Berkley and Capon Springs are likewise celebrated.

VIRGINIA, *Hymen*.

VIRGINITY, *Virginitas*, *Parthenoia*, *Integ-*

ritas, Maid'enhood, Maid'enhead, (F.) Virginité, Pucelage. The state of one who has never had carnal commerce.

VIRGIN'S BOWER, COMMON, *Clematis vitalba, Clematis Virginica*—v. Bower, upright, *Clematis recta*—v. Sweet-scented, *Clematis flammula*.

VIRGIN'S MILK, *Lac Vir'ginis, Lac Virginale, (F.) Lait virginal.* A tincture of benjamin or of any other balsam, precipitated by the addition of water, which gives it a milky appearance. Also, sub-acetate of lead precipitated by water. It has been used as a cosmetic to remove freckles, &c.

VIRGINITAS DEFLORATA, Defloration.

VIRGO, Virgin—v. *Aurea, Solidago virgaurea*.

VIRGULA, Penis.

VIRIDE ÆRIS, Cupri subacetos—v. *Montanum, Cuprum*.

VIRILE, Penis.

VIRILES/CENCE; from *vir, 'a man.'* The state of the aged female in which she assumes certain of the characteristics of the male.—Mehlis.

VIRILIA, Pudibilia.

VIRILITY, Adult age.

VIROSUS, Virulent.

VIRTUE, Faculty.

VIRTUS FORMATRIX, Plastic force—v. *laistica, Plastic force.*

VIR'ULENT, *Virulen'tus, Viro'sus, from virus.* That which is of the nature of a virus or which is caused by a virus. Highly noxious.

VIRUS, from vis, 'force.' A Latin word, which signifies poison; but which, in medicine, has a somewhat different acceptation. By it is understood a principle, unknown in its nature and inappreciable by the senses, which is the agent for the transmission of infectious diseases. Thus we speak of the *variolic, vaccinae, and syphilitic viruses.* *Virus* differs from *venom* in the latter being a secretion natural to certain animals, whilst the former is always the result of a morbid process;—*a morbid poison.*

VIRUS, Ichor, Poison, Sanies—v. *Vaccinae, see Vaccina*—v. *Vitale, Sperm.*

VIS, Force—v. *Adhæsonis, Cohesion (force of)*—v. *Attractionis, Cohesion (force of)*—v. *Aucta, Sthenia*—v. *Cohæsonis, Cohesion (force of)*—v. *Conservatrix, V. medicatrix naturæ*—v. *Elastica, Elasticity*—v. *Essentialis, Plastic force.*

Vis EXPUL'RIX. The organic force by which, it was supposed, the useless was removed from the body.

Vis FORMATIVA, Plastic force—v. *Generatrix, Potentia generandi*—v. *Imminuta, Astenia*—v. *Insita, Irritability*—v. *Irritabilitatis, Irritability.*

Vis MEDICA'TRIX NATU'RÆ, Vis conserva'trix, Autocrati'a, Autonom'ia, Autocrato'ria, Authy-gian'is, Autotherape'ta, Physiat'ricæ, Physio-autocrati'a, Physiautocrati'a. A term, employed by some, to express that instinctive healing power, in an animal or vegetable, by virtue of which it can repair injuries inflicted upon it, or remove disease.

Vis MOR'TUA. Under this name Haller included the mechanical properties of membrane,—flexibility, extensibility, elasticity, &c.—which are totally independent of the vital properties. They remain some time after the complete extinction of life in all its functions; seem to be connected with the mechanical arrangement of particles and the chymical composition of the substance in which they reside, and not to be affected until the progress of decomposition has become sensible.

Vis MUSCULARIS, Myodynamia—v. *Nervorum,*

Nervous power—v. *Nervosa, Nervous power*—v. *Plastica, Plastic force*—v. *Reproductiva, Plastic force*—v. *Vitæ, Irritability.*

Vis VITA'LIS, Vis seu Fac'ultas Zo'tica, (F.) Force vitale. The vital force—*Biod* of Baron Von Reichenbach—which distinguishes living matter from the dead. Also, *Irritability.*

Vis ZOTICA, Vis vitalis.

VISAGE, Countenance.

VISAGO BEHEN, Cucubalus behen.

VISCERA, Entrails.

VISCERAL, Splanchnic.

VISCERALIS, Stomachal.

VISCERATION, Exenterismus.

VISCÈRES, Entrails.

VISCONIA, Physconia.

VISCUM ALBUM, *Mistletoe, Ixos, Iz'ia, Dabach, (F;) Gui.* A parasitic plant, which grows on a number of trees. *Family, Caprifoliaceæ. Sex. Syst. Dicoëcis Tetrandria.* That of the oak—*Viscum quercinum*—has been most celebrated, but it does not differ from the others. It was, at one time, much used in epilepsy and other neuroses; the wood or leaves being given in powder, in the dose of ℥ss or ʒj. The berries, also called *Pommes hemorrhoidales*, from their supposed virtues, are drastic; and, when applied externally, are maturative.

VISCUM CAPE'NSE. A South African parasitic shrub, which grows on the stems of several species of *Rhus* and *Euclea*.

VISCUM FLAVES'CENS, Yellowish Mistletoe, indigenous, has been given in similar cases as the *Viscum album*.

VISIO, Pupil, Vision.

VISION, Vis'io, Visus, from videre, visum, 'to see; Opsis, Omnia, (F.) Vise. The action of seeing. The sight. The sight is one of the five senses, and the eye is its organ. By it we distinguish colours, and appreciate most of the physical qualities of external objects. The eye is composed of different transparent media, whose curvatures and refractive powers are so combined as to render insensible the aberrations of sphericity and refrangibility, and to concentrate the numerous rays proceeding from more or less distant objects. These rays traverse, successively, the transparent cornea, the aqueous humour, the crystalline, the vitreous humour, and strike upon the retina, on which they impress the figure of the object whence they have proceeded; and, in order that no obscurity may arise from the reflections that might otherwise occur, the anterior of the eye is lined by a membrane—the choroid—which is itself covered internally by a dark pigment. This absorbs the light, like the dark pigment in the interior of telescopes, and thus obviates confusion. As the rays proceeding from an object must cross each other in their course to the retina, it follows that those proceeding from the upper part of an object must fall upon the lower part of the retina, and conversely; so that the object must be impressed upon the retina in an inverted position; yet experience teaches us to appreciate the position accurately.

VISION, BINOCULAR, see Binocular—v. *Coloured, Chromopsia*—v. *Double, Diplopia*—v. *Single, see Binocular.*

VISORIUM ORGANUM, Eye.

VISORIUS, Visual.

VIS'UAL, *Visua'lis, Viso'rius.* Same etymon. That which concerns the sight or belongs to vision.

VISUAL ANGLE is the angle formed by the crossing of two rays, proceeding from opposite points of any body, in their passage through the pupil. It is by the size of this angle that we judge, to a certain extent, of the dimensions of objects.

VISUS, Vision—v. *Acriis*, *Oxydercia*—v. *Acrior*, *Nyctalopia*—v. *Coloratus*, *Chromopsia*—v. *Debilitas*, *Athenopia*—v. *Decolor*, *Achromatopsia*—v. *Dimidiatus*, *Hemiopia*—v. *Diurnus*, *Hemeralopia*—v. *Duplicatus*, *Diplopia*—v. *Hebetudo*, *Amblyopia*—v. *Juvenum*, *Myopia*—v. *Lucidus*, *Photopsia*—v. *Muscarum*, see *Metamorphopsia*—v. *Nocturnus*, *Nyctalopia*—v. *Senilis*, *Presbytia*.

VITA, Life—v. *Propria*, *Irritability*.

VITAL, *Vita'lis*, *Biot'ic*, *Biot'icus*, (F.) *Vital*, from *vita*, 'life.' Relating or appertaining to life;—as

VITAL DYNAMICS, see *Dynamic*—v. *Force*, *Vitalis*.

VITAL PRINCIPLE, *Flam'mula seu Aura vita'lis*, *Microcosmetor*, (F.) *Flamme vitale*, *Vital Flame*. The principle which, in association with matter, as in organized bodies, controls its manifestations and properties, and distinguishes organized matter from the inorganic. We know nothing of this principle, except in its connexion with organization.

VITAL PROPERTIES, see *Properties*, *vital*—v. *Statistics*, *Statistics*, *medical*.

VITALBA, *Clematis vitalba*.

VITALITY, *Vita'itas*, from *vita*, 'life.' The vital principle: also used in the sense of *vital action* or *movement*.

VITALIZE, To endow with life.

VITALS, *Vita'lia*. Parts that are necessary for life—the heart, lungs, and nervous centres more especially.

VITARO'BORANT, **PALMER'S**. A farinaeous preparation, which appears to consist of a mixture of the red or Arabian lentil and wheat flour, the latter in considerable amount, sweetened with sugar. It bears considerable resemblance to *Revalenta*.

VITELLARY, *Vitelline*—v. *Membrane*, *Zona pellucida*.

VITELLINE, *Zona pellucida*.

VIT'ELLINE, *Vitel'linus*, *Vit'ellary*, from *vitellum*, 'the yolk of an egg.' Appertaining to or resembling the vitellus or yolk.

VITELLINE DISC, *Proliferous Disc*—v. *Fluid*, see *Vesicula umbilicalis*.

VITELLINE PED'ICLE or **APOPH'YSIS**, is the pedicle which attaches the umbilical vesicle to the embryo. See *Vesicula umbilicalis*.

VITELLINE POUCH, *Vesicula umbilicalis*—v. *Vessels*, *Omphalo-mesenteric*.

VITELLÓ-MESENERIC, *Omphalo-mesenteric*.

VITELLUM OVI, see *Ovum*.

VITELLUS OVI, see *Ovum*.

VITEX, *V. Agnus Castus seu verticillata*, *Agnus Castus*, (F.) *Gattilier*, *Petit Poivre*, *Poivre sauvage*. Family, *Pyrenaceæ*. Sex. Syst. *Didynamia Angiosperma*. The *Chaete Tree*. The seeds, when fresh, have a fragrant smell, and an acrid, aromatic taste. Formerly, they were celebrated as *antaphrodisiacs*.

VITI SALTUS, *Chorea*.

VITA PRIMÆ CONFORMATIONIS, see *Monster*.

VITIATIO, *Stuprum*.

VITILIGINES, *Ephelides*.

VITILIGO, *Lepra*—v. *Alphus*, *Lepra alphasides*—v. *Melas*, *Lepra nigricans*—v. *Nigra*, *Lepra nigricans*.

VITIS ALBA SYLVESTRIS, *Bryonia alba*—v. *Apyrena*, see *V. Corinthaca*.

VITIS CORINTHACA. Family of the Vines. Sex. Syst. *Pentandria Monogynia*. This plant affords the *Uva passa mino'ra*, *Passa Corinthiaca*, *Pass'ula mino'ra*, *Uva Corinthiaca*, *Corinthiaca*, *Currants*, (F.) *Raisins de Corinthe*; which

are the dried fruit of the *Vitis Corinthiaca* or *Vitis apyrena*; and are similar, in their properties, to the raisin.

VITIS IDÆA MYRTILLUS, *Vaccinium myrtillus*—v. *Idæa Palustris*, *Vaccinium oxycoccus*—v. *Idæa punctata*, *Vaccinium vitis idæa*—v. *Sativa*, *V. vinifera*.

VITIS VINIFERA, *V. sat'iva*, *Am'pelos*, *A. Enoph'oros*. The *Grape vine*, the *Vine*, (F.) *Vigne*. Vine leaves and the tendrils have an astringent taste, and were formerly used in diarrhoea, hemorrhage, &c. The juice or sap, called *Lacryma*, has been recommended in calculous disorders and in cases of chronic ophthalmia. The juice of the unripe fruit is called *Verjuice*. The *Grape*, *Uva*, *Botrys*, *Staph'ylé*, *Rhax*, (F.) *Raisin*, when ripe, is a wholesome delicious fruit; and, when dried, forms the *Uva passa majo'ra*, *Pass'ula majo'ra*, *Uva passa sola sicca'ta*, *Zibebæ*, *Raisins*. These are odorless; and to the taste, sub-acidulous, sweet, and mucilaginous. They are demulcent and nutritive.

VITUM, *Disease*—v. *Caducum*, *Epilepsy*.

VITUM CONFORMA'TIONIS. A disease or fault of conformation.

VITUM DIVINUM, *Epilepsy*—v. *Herculeum*, *Epilepsy*—v. *Scrophulosum*, *Scrofula*.

VITRARIA, *Parietaria*.

VITREOUS, *Hyaline*—v. *Humour*, *Corpus vitreum*—v. *Humour of the ear*, *Vitrius auditive*.

VITREUS, *Hyaline*.

VITRINE AUDITIVE (F.), from *vitrum*, 'glass'; *End'olymp*, *Liquor of Scarpa*, *Fluid of Scarpa*, *Vitreous Humour of the Ear*. The fluid contained in the *membranous labyrinth* of the ear, so called from its resemblance to the *vitreous humour of the eye*.

VITRIOL, *Ferri sulphas*—v. *Blue*, *Cupri sulphas*—v. *Cæruleum*, *Cupri sulphas*—v. *Green*, *Ferri sulphas*—v. *Roman*, *Cupri sulphas*—v. *White*, *Zinci sulphas*.

VITRIOLUM ALBUM, *Zinci sulphas*—v. *Ammoniacale*, *Ammonia sulphas*—v. *Cupri*, *Cupri sulphas*—v. *Cyprium*, *Cupri sulphas*—v. *Ferri*, *Ferri sulphas*—v. *Goslaricæ*, *Zinci sulphas*—v. *Martis*, *Ferri sulphas*—v. *Romanum*, *Cupri sulphas*—v. *Veneris*, *Cupri sulphas*—v. *Virido*, *Ferri sulphas*—v. *Zinci*, *Zinci sulphas*.

VITRUM, *Hy'alos*, *Glass*, *Brancia*, (F.) *Verre*, from *videre*, 'to see.' Glass, coarsely powdered, has been sometimes used to remove specks of the cornea.

Powdered glass has been regarded, but erroneously, as a poison. It acts only mechanically.

The saline acum, which swims on glass when first made, has been used in tooth-powders. It is called *Sandiver*, *Sel de verre*, *Glass Gall*, *Fel vitri*, &c.

VITRUM ANTIMONII, see *Antimonii vitrum*—v. *Hypoclepticum*, *Separatorium*—v. *Oculare*, see *Spectacles*—v. *Sublimatorium*, *Aludel*.

VITTA, *Bandelette*, *Caul*.

VIVÆSECTIO, *Vivisection*.

VIVERRA CIVETTA, see *Civetta*.

VIVIPARITĒ, see *Viviparous*.

VIVIP'AROUS, from *vivus*, 'alive,' and *pario*, 'I bring forth.' An epithet applied to animals whose young are brought forth detached, without requiring to be hatched, as in the *Oviparous*. The condition may be termed *Vivip'arousness*, (F.) *Viviparité*. See *Generation*.

VIVIPAROUSNESS, see *Viviparous*.

VIVISECTION, *Vivisectio*, *Vivæsectio*, *Biotom'ia*, from *vivus*, 'alive,' and *secare*, *sectum*, 'to cut.' The act of opening or dissecting living animals. One who performs vivisections is a *vivisector*.

VOCAL, *Oral*—v. *Tube*, see *Tube*, *vocal*.

process; but the main cause is the compression exerted upon the parietes of the viscus by the diaphragm and abdominal muscles. Vomiting is a symptom common to numerous diseases. At times, it is sympathetic, as in affections of the kidney, uterus, brain, &c. At others, it is symptomatic, as in gastritis, peritonitis, &c. When very troublesome, it may often be palliated by effervescent draughts, aromatics, sinapisms, or blisters to the epigastric region, &c.

VOMITING AT PLEASURE, Regurgitation — v. of Blood, Hæmatemesis — v. Stercoraceous, Copremesis.

VOMITIO, Vomiting — v. Sanguinis, Hæmatemesis.

VOMITIUM, Vomiting.

VOMITO NEGRO, Fever, yellow — v. Prieto, Fever, yellow.

VOMITORIUM, Emetic.

VOMITORY, Emetic.

VOMITUM, Vomiting.

VOMITURIT'ION, *Vomituri'tio, Emet'ia, Dysemes'ia, Subver'sio stom'achi*. Same etymon as Vomiting. Ineffectual efforts to vomit; *Vomen'di cona'men ina'nè, Retching, Reaching, Heav'ing*. Some authors mean, by this term, a vomiting of but little matter, or that which is effected almost without effort. The first acceptation is the most general.

VOMITUS, Vomiting — v. Cruentus, Hæmatemesis — v. Fæculentus, Copremesis — v. Marinus, Nausea marina — v. Navigantium, Nausea marina — v. Niger, Fever, yellow — v. Pituitosus, Blennemesis — v. Profusus, Hyperemesis — v. Purulentus, Pyemesis — v. Sanguinis, Hæmatemesis — v. Stercoris, Copremesis.

VOORARA, Curare.

VOUACAPUA AMERICANA, *Geoffræa inermis*.

VOÛTE, Vault — v. *Médullaire*, Corpus callosum — v. *à Trois Piliers*, Fornix.

VOWEL, *Voca'lis*, from Latin *vox*, 'the voice,' and *eoco*, 'to call.' (F.) *Voyelle*. Physiologically, a continuous breath or sound, produced in the glottis; but more or less modified by the form of the vocal tube, through which it has to pass. In the English language, *a, e, i, o, u, v*, and *y* are vowels.

VOX, Voice — v. Cholericus, Voice, choleric — v. Clangosa, Oxyphonia — v. Convulsiva, *Voiz Convulsive* — v. Nasalis, Rhinophonia — v. Rauca, Rucado, Raucous voice — v. Raucisona, Raucous voice.

VOYELLE, Vowel.

VUE, Vision — v. *Courte*, Myopia — v. *Diurne*, Hemeralopia — v. *Faible*, Amblyopia — v. *Longue*, Presbytia — v. *Louche*, Strabismus — v. *Nocturne*, Nyctalopia.

VULGA, Vulva.

VULNÉRAIRE, Vulnerary — v. *Suisse*, see Falltrack.

VULNERARIUS, Traumatic.

VULNERARY, *Vulnerarius, Traumaticus, Traumatic*, from *vulnus, vulneris*, 'a wound.' (F.) *Vulnéraire*. A name applied by the ancients to

medicines, which they considered capable of favouring the consolidation of wounds. The property has been ascribed to various plants.

VULNERATIO NERVI, Neurotrolosis.

VULNUS, Wound — v. *Laceratum*, see Laceration — v. *Sclopetarium*, Wound, gun-shot — v. *Simplex*, Cut.

VULNUSCULUM, Wound.

VULPIS MORBUS, Alopecia.

VULTUEUX (F.), *Vultuo'sus*. *Corvisart* has used the expression, *Face vultueuse, Fa'cies vultuo'sa*, for the face, when it is more florid and swollen than in the natural state. This appearance, which is observed in active aneurism of the heart, according to *Corvisart*, is owing to the afflux of blood into the arterial capillaries, and hence differs from the livid and swollen appearance caused by the accumulation of blood in the venous capillaries, constituting the *Face injectée*.

VULTUS, Countenance, Face — v. *Tetricus et Mæstus*, Scythrospasmus.

VULVA, Uterus, see Vulva.

VULVA, from *vulva*, 'a door.' *Hortus, Cunnus, Pudendum mulie'bre, Sinus pudor'is, Chorois, Arcum, Bucca, Bulga, Cadus'cus, Custos, Femem, An'nulus, Femur summam, Follic'ulus, Fundus, Gre'mium, Hia'tus, Lanu'gium, Navis, Oppid'ulum, Specus, Vulga, Cymba, Salsus, Clitor'ium, Os'tium, Sulcus, Amphicus'tis, Concha, Porcus, Porta, Interfemineum, Mulie'bria, Fossa magna mulie'bris, Episei'on, Es'chara, Hor'tulus cupid'inis, Bouba'lios, Bysnos, Cava, Caver'na, Delphys, Delta, Fovea, Gynæce'um, the Female pudendum, the Female organs of generation, the Female parts, Loci mulie'bres, (F.) Vulve. A longitudinal opening between the projecting parts of the external organs of generation in the female, extending from the mons veneris to the perineum, and which is called, also, *Fossa magna*. Some anatomists mean, by this term, the whole of the external genital organs of the female: — mons veneris; labia majora, and the cleft or vestibule separating them; the clitoris; nymphæ; meatus urinarius; entrance of the vagina; with the hymen or the caruncule myrtiformes, fossa navicularis and fourchette.*

VULVA, *Fora'men commu'nè ant'erius, Iter ad infundib'ulum, Iter seu Ad'itus ad tertium ventric'ulum, Rima ad infundib'ulum, Apertu'ra anterior ventric'uli tertii cerebri*. An opening situate at the junction of the optic thalami, in the third ventricle of the brain, and immediately beneath the anterior crus of the fornix.

VULVAIRE, *Chenopodium vulvaria*.

VULVAR, *Vulva'ris*, from *vulva*. That which relates to the vulva. *Chaussier* gives this name to the external pudic arteries, because they are distributed to the vulva.

VULVARIA, *Chenopodium vulvaria*.

VULVE, Vulva.

VULVITIS, a hybrid word, from *vulva*, and *itis*, denoting inflammation. Inflammation of the vulva.

VULVO-UTERINE CANAL, Vagina.

two pints, and throw them away; then distil eight gallons. Keep the distilled water in glass bottles.

WATER-DOCTOR, see Uromantia.

WATER-DRESSING. The treatment of wounds and ulcers by the application of water. It generally consists in dipping folds of lint in water, and placing them on the part:—the whole being covered with oiled silk or elastic gum.

WATER, EPILEPTIC, of Langui, Langii aqua epileptica.—w. Fennel, Aqua fœniculi.

WATER FLAG, YELLOW, Iris pseudacorus.

WATER, FLORIDA,—a celebrated perfume,—may be made of *Ol. Bergami* f ʒiv; *Tinct. benzoin. c.* f ʒij; *Alcohol.* cong.

WATER, GOULARD, Liquor plumbi sub-acetatis dilutus.

WATER, HARD. Common water, which decomposes and curdles soap; in contradistinction to *soft water*, which is readily miscible with soap. The hardness of water depends upon the presence in it of earthy salts, the most common of which is sulphate of lime.

WATER, HOLY, Water, distilled—w. Honey, see Mel—w. in the Head, Hydrocephalus—w. Hungary, Spiritus rosmarini.

WATER JAGS, see Variella.

WATER, LAKE, *Aqua ex lacu*, (F.) *Eau de lac*, is apt to be impure, from decayed animal and vegetable matters. A great deal will, however, depend upon the magnitude of the collection, and the degree of stagnation.

WATER, LAUREL, see Prunus lauro-cerasus—w. Lavender, Spiritus lavandulæ—w. Lemon-peel, see Lemonpeel Tea—w. Lime, Liquor calcis—w. Lime, compound, Liquor calcis compositus—w. Magnesia, aerated, Magnesia, fluid—w. Magnesia, carbonated, Magnesia, fluid.

WATER, MARSH, *Aqua paludosa*, (F.) *Eau de Marais*, is the most impure of all. It is generally more stagnant, and of course more loaded with decomposing animal and vegetable matters.

WATER, MINERAL, *Aqua mineralis*, *A. salubris*, *A. medicata*, *Fons salutaris*, *F. medicatus*, *F. soterius*, *Aqua soteria*, (F.) *Eau minérale*. Water, holding in solution different saline and gaseous substances in sufficient quantity to be possessed of medicinal properties, or of a temperature different from that of the ordinary springs of the country.

Mineral waters may be divided into four classes:—1. *Gaseous* or *Acidulous*. 2. *Chalybeate*. 3. *Saline*. 4. *Sulphureous*. These may be *thermal*, or *cold*,—*natural*, or *artificial*. Many of these divisions, however, run into each other; some of the substances, which they hold dissolved, belonging to one class as well as to another.

1. *Gaseous, Acidulous* or *Carbonated Mineral Waters*, *Aquæ mineralis acidulæ*, (F.) *Eaux minérales gazeuses* ou *acidules*. The waters referred to this class are those that contain carbonic acid gas in such quantity as to communicate to it certain sensible qualities. Waters impregnated with free carbonic acid, sparkle when drawn from the spring, or when poured into a glass. They have a sharp, acidulous taste; but become vapid from exposure to the air. Along with the carbonic acid, there are generally present portions of saline, earthy or metallic matter, chiefly carbonates of lime, magnesia, and iron. Waters, highly impregnated with carbonic acid gas, are grateful to the stomach; increase the appetite, and are diuretic; hence, their utility in dyspepsia, hypochondriasis, and gout. Their properties are, of course, modified by the saline

matter that may be also contained in them. The most celebrated amongst the acidulous waters are those of Bar, Chateldon, St. Myon, Mont d'Or, Langeac, Seltzer, Schlangenbad, Sultzmann, Pyrmont, Spa, Carlsbad, Cheltenham, Scarborough, Saratoga, Ballston, and the Sweet Springs of Virginia.

2. *Chalybeate* or *Ferruginous Mineral Waters*, *Aquæ mineralis ferruginæ*, *A. Chalybeatæ*, *A. Martialis*, (F.) *Eaux minérales ferrugineuses*, contain iron—sulphate, chloride or carbonate, generally the latter—held in solution by an excess of acid. Chalybeate waters have a peculiar styptic taste. They are transparent when taken from the spring; but, when exposed for some time to the air, a pellicle forms on the surface, and a deposit of the iron takes place. Chalybeate waters are used as tonics in debility of all kinds; in all cases, in fact, where iron is considered to be indicated. They are the most numerous of all the classes of mineral waters. In this dictionary, those only are specified which have some celebrity; yet there are upwards of ninety; whilst there are more than sixty of the saline, and upwards of thirty-five of the sulphureous. The most celebrated chalybeates are those of Tunbridge, Scarborough, Spa, Bussang, Forges, Vichy, Pyrmont, Passy, Provins, and Vals.

3. *Saline Mineral Waters*, *Aquæ mineralis salinæ*, *Amna alcalizata* (Paracelsus), *Hydrimalæ*, (F.) *Eaux minérales salines*. Waters, holding in solution different saline substances in greater quantity than the acidulous waters. They differ in properties, according to the salts contained in them. The salts usually present are sulphates, chlorides, and carbonates; and the bases, with which the acids forming these are combined, are soda, magnesia, and lime. Saline mineral waters are usually aperient; and the most noted are those of Seltzer, Sedlitz, Balaruc, Bourbonne-les-Bains, Baden, Epsom, Cheltenham, &c.

To this class may also be added *Sea water*.

4. *Sulphureous Mineral Waters*, *Aquæ mineralis sulphuræ*; when warm, termed *Thiothermæ*, *Thiopegeæ*, *Theothermæ*, *Fontes sulphurei calidi*, (F.) *Eaux minérales sulfureuses*, *Eaux sulfurées*, *E. sulfureuses*, *E. hépatiques*, &c. These waters owe their distinguishing character to an impregnation of sulphuretted hydrogen, and are at once recognized by their peculiar fetid smell, resembling that of rotten eggs. They usually contain saline substances, which modify their powers. From the action of the sulphuretted hydrogen, they are useful in cutaneous affections; and, from the combined action of this and the saline matter, they are valuable agents in diseases of the digestive organs. They are also employed in cutaneous eruptions; and the warm sulphur baths have been especially celebrated in such cases, as well as in rheumatic affections. The most renowned sulphureous waters are those of Barèges, Bagnères-de-Luchon, Cauterets, Bannes, Aix in Savoy, Aix-la-Chapelle, Engliem, Harrogate, Moffat, Virginia Springs, &c.

Some springs, as those of Bath, Buxton, Dax, Matlock, Warm and Hot Springs of Virginia, &c., are almost pure *Thermal Mineral Waters*. They are valuable agents in rheumatic affections; the warmth being equable during the whole period the individual is immersed in them; which cannot be the case in the artificial thermal bath.

The following Table by Dr. Pereira exhibits the composition of some of the principal mineral waters.

**FIXED CONSTITUENTS
ENTERING INTO THE COMPOSITION OF SOME OF THE MORE CELEBRATED
MINERAL SPRINGS.**

PROPORTIONS IN 10,000 PARTS OF WATER.

NOTE.— In reducing the analyses contained in this Table to a uniform measure, in order to render them susceptible of direct comparison with each other, the old English gallon is assumed to be as = 58,338 grains; the wine pint = 7305 grains; the imperial gallon = 70,000 grains; and the German 16-ounce measure = 7368 grains.

The different salts have been reduced to their elementary constituents by Wollaston's scale of chemical equivalents.

THERMAL.

WATER, MINERAL, Acidulous water, simple.
WATERS, MINERAL, ARTIFICIAL, (F.) *Eaux minérales artificielles ou factices*. These are imitations of the natural; and some of them—as the factitious Cheltenham water, and Sedlitz water—answer the purpose of the natural water tolerably well. The acidulous and chalybeate waters are, however, most easily imitated.
WATER, NUTMEG, Spiritus myristicæ—w. Parsnep, creeping, Sium—w. Pennyroyal, spirituous, Spiritus pulegii—w. Peppermint, Aqua menthae piperitæ.
WATER POX, see Varicella.
WATER, PROTOXIDE OF NITROGEN, Aqua nitrogenii protoxydi.
WATER QALM, Pyrosis.
WATER, RAIN, Aqua pluvialis, A. pluvia, A. Imbrium, (F.) *Eau de pluie*, when collected at a distance from houses or other elevated objects, is the purest natural water, and has the least specific gravity. The only bodies which it usually holds in solution, are carbonic acid, and minute traces of carbonate of lime and chloride of calcium.
WATER, RICE, see Oriza.
WATER, RIVER, Aqua fluvialis, is derived from the conflux of numerous springs and rain water. It is, generally, pretty pure.
WATER, ROSE, Aqua rosæ.
WATER, SEA, Aqua Marina, Humor Doridis, (F.) *Eau de Mer*. This contains chlorides of sodium, magnesium and calcium, and sulphate of magnesia. It is cathartic, and forms the usual gyster at sea. It makes an excellent tonic bath; superior in most cases—especially in scrofula—to the fresh water-bath.
WATER, SEARLE'S PATENT OXYGENOUS AERATED, Aqua Nitrogenii protoxydi—w. Seydohutz, Sedlitz water.
WATER SHIELD, Brasenia hydropeltis.
WATER, SNOW, Aqua nivata, (F.) *Eau de neige*, has usually been deemed unwholesome. It exactly resembles rain water in composition, and is equally salubrious.
WATER, SODA, Acidulous water, simple—w. Soft, see Water, hard—w. Spearmint, Aqua menthae viridis.
WATER, SPRING, Aqua fontana, Hydrocypgæ, (F.) *Eau de fontaine*, contains, in addition to the substances detected in rain water, more or less sulphate of lime. When this is to such an extent as to curdle soap, the water is said to be *hard*; if not, *soft*. Hard water is, of course, inferior to soft, for domestic and medicinal purposes.
WATER, STYPTIC, Sydenham's solutio sulphatis cupri composita—w. Tar, see Pinus sylvestris—w. Toast, see Toast-water.
WATER, WELL, Aqua putealis seu Putæna, A. ex puteo, (F.) *Eau de puit, Eau de source*, is the same as spring water, but liable to impregnation, owing to the land springs filtering into the wells, and conveying impurities into them.
WATERS, DISCHARGED OR BROKEN, Profusio aquæ—w. Distilled, Aquæ destillatæ—w. First Primitiæ.
WATTWEILER, MINERAL WATERS OF. Wattweiler is a small town in the department of Haut-Rhin, at the foot of the Vosges. The waters are acidulous chalybeates, and contain carbonates of iron, lime, and soda; chloride of sodium, and free carbonic acid.
WAX, Cera—w. Ear, Cerumen.
WAX, MYRTLE. A wax obtained from the fruit of *Myrica cerifera*. It has been prescribed in dysentery.
WAX, YELLOW AND WHITE, Cera flava et alba.
WAXING KERNELS, Crescentia, (F.) *Croissances, Croissants, Glandes de croissance.* A pop-

ular term for small tumours, formed by an enlargement of the lymphatic glands—in the groin of children particularly. They have been looked upon as connected with the growth of the body—hence their name.
WAY, Saxon wæg, Via, Passage, Odo, (F. Voie. A name given to different canals.
WAYS, DIGESTIVE, Digestive Passagæ Primæ Viæ, (F.) *Voies digestives, Premières voies* are the series of hollow organs of digestion, composed of mouth, œsophagus, stomach, and small and large intestines. The term is often restricted to the first three of these.
WAYS, SECOND, Second Passages, Secundæ viæ, (F.) *Secondes voies*, comprise the chyloferous, lymphatic and blood vessels.
WEAKSIGHTEDNESS, Asthenopia.
WEAL, Wheal.
WEANING, from Saxon wenan, 'to wean' *Ablactatio, Apogalactismus, (F.)* *Sévrage*. The act of depriving the infant, permanently, of the breast, in order to feed it on other and more solid nourishment.
WEANING BRASH, see Brash, weaning.
WEATHERCOCKS, Impatiens.
WEB, MUSCULAR, Panniculus carnosus.
WEB-EYE, Caligo.
WEDGED, (D.) *w e g g h c, Inclusus, Inherens, (F.)* *Enclavé*. The head of the fetus is said to be wedged in the pelvis, when it remains fixed, notwithstanding the uterine efforts.
 The condition is called *Incurvatio seu Incurvatio fetûs, Sphenosis, Inherens, (F.)* *Enclavement.* See Paragomphosis.
WEED, see Mastitis—w. in the Breast, see Mastitis—w. Dyer's, Reseda luteola—w. Field, Anthemis cotula—w. Horsefly, Sophora tictoria—w. Milk, Apocynum androsæmifolium—w. Soldiers', Matico—w. Silver, Potentilla anserina.
WEeping, Fletus.
WEIGHT, from Saxon wagan, 'to weigh' (F.) *Pesanteur*. A sensation of heaviness or pressure over the whole body, or over a part—the stomach or head, for example.
WEIGHTS AND MEASURES, Poids et Mesures et Mensura, (F.) *Poids et Mesures*. The importance of possessing a uniform system of weights and measures has impressed the scientific of all countries, and numerous endeavours have been made to accomplish the object. It is, however, a matter of considerable difficulty, and one not likely to be attained. The new French measures are upon decidedly the best footing, but they are not adopted out of France. The greatest diversity prevails over Europe in the measures, both of weight and capacity. Some of the following tables will show, that every subdivision of the pound, as well as the pound itself, differs in England and in France.

WEIGHTS.

Troy Weight, as used by the British Apothecaries—Pondus pharmacæuticum seu medicinal.

The pound lb	} contains	12 ounces.
The ounce		8 drachms.
The drachm		3 scruples.
The scruple		20 grains.
The grain gr.		

These, and the signs by which they are denoted are the same in all the British Pharmacopœias as well as in the American.

lb.	Oz.	Drm's.	Scrup.	Gr.
1	= 12	= 96	= 288	= 5760
	1	= 8	= 24	= 480
		1	= 3	= 60
			1	= 20

Poids de Marc.

The pound	} contains	16 ounces.
The ounce		8 drachms.
The drachm		3 scruples.
The scruple		24 grains.
The grain		

Avoirdupois.

Pound.	Ounces.	Drachms.	Troy grains.
lb. 1.	= 16	= 256	= 7000
	1	= 16	= 437 5
		1	= 27.34375

The avoirdupois drachm is sometimes divided into three scruples, and the scruple into ten grains. The pound of 7680 grains avoirdupois = 7000 grains troy, and hence 1 grain troy = .97 grain avoirdupois.

The *Poids de Marc* is that employed by the French Pharmacians, when the new weights are not. The Avoirdupois is now used by the Dublin College.

The following tables exhibit the relative value of the old French and English weights:

Poids de Marc.	Troy Wt.	Avoird.	Troy grs.
1 pd. (<i>livre</i>)	= 1.31268 lb	= 1.080143 lb	= 7561
1 oz. (<i>once</i>)	= .984504 oz	= 1.080143 oz	= 472.5625
1 dr. (<i>gros</i>)	= .954504 dr		= 59.0703125
1 gr.	=		= .820421

Troy.	Poids de Marc.	French grains.
1 pound	= 0.76180 lb.	= 7561
1 ounce	= 1.01574 once	= 585.083
1 drachm	= 1.01574 gros	= 73.135
1 grain		= 1.219

Avoirdupois.	Poids de Marc.	French grains.
1 pound	= 0.925803 lb.	= 8532.3
1 ounce	= 0.925803 once	= 533.27

- To convert French grains into Troy grains, divide by } 1.2189
- " Troy grains into French grains, multiply by }
- " French ounces into Troy ounces, divide by } 1.015734
- " Troy ounces into French ounces, multiply by }
- " French pounds (*poids de marc*) into Troy pounds, multiply by } 1.31268
- " Troy pounds into French pounds, divide by }

Troy grain.	Poids de Marc or French grain.

Dr. Milligan, in his edition of Celsus, gives the following table, exhibiting the Troy weight of measures of capacity and of weight in use amongst the Romans.

	Urna.	Libra.	Uncia.	Denarius.	Scrupulus.	Sextans.	Chalcus.	Oreus.
Amphora	2	= 80	= 960	= 6720	= 20160	= 40320	= 403200	= 49440
Urna	1	= 40	= 480	= 3360	= 10080	= 20160	= 210600	= 21060
Congius	½	= 10	= 120	= 840	= 2540	= 5040	= 50400	= 5200
Sextarius		= 1	= 2-3	= 20	= 140	= 420	= 840	= 870
Libra		= 1	= 12	= 84	= 252	= 504	= 5040	= 5256
Hemina			= 8 4-7	= 60	= 180	= 360	= 3600	= 3739
Acetabulum			= 2 1-7	= 15	= 45	= 90	= 900	= 939
Sesqui-cyathus			= 2 1-7	= 15	= 45	= 90	= 900	= 939
Cyathus			= 1 3-7	= 10	= 30	= 60	= 600	= 626
Sesquuncia			= 1½	= 10½	= 31½	= 63	= 630	= 657
Uncia			= 1	= 7	= 21	= 42	= 420	= 438
Cochleare				= 2½	= 7½	= 15	= 150	= 156
Drachma				= 1	= 3	= 6	= 60	= 62 4-7
Denarius				= 1	= 3	= 6	= 60	= 62 4-7
Scrupulus					= 1	= 2	= 20	= 20 2-3
Scrupulus dimidiatus					= ½	= 1	= 10	= 10 1-3
Obolus						= 1	= 10	= 10 1-3
Sextans						= 1	= 10	= 10 1-3
Chalcus							= 1	= 1 1-3

He gives also the following 'Carmen Mnemonicum,' which exhibits the analogies of the Roman and British imperial weights.

So the congus and gallon, each, ten pounds allow,

On the bushel and amphora eighty bestow; Rome's pound, as in Troy weight, twelve ounces obtains,

But her ounce is Avordupois, strictly, in grains:

Denarii drams, scruples scrupuli define,

Sextarius answers to our bottle of wine,

And the mina's a short pint — fourteen ounces in fine.

3. Weights said to be of the Arabians, Modern Greeks, and Latins of the barbarous periods of the Middle Ages.

The <i>smallest spoonful or fahatit.</i>			42	

A good section on weights and measures is contained in the edition of "The Seven Books of Paulus Aegineta," by Mr. Francis Adams, published by the Sydenham Society of London, vol. iii, p. 609, London, 1847.

Besides the weights and measures above mentioned, employed by the moderns, there are modes of estimating the quantities of substances by approximation. For example:—

A *glassful or cupful, ((F.) Verre,*) is reckoned to contain 4 or 5 fluidounces.

A *wine-glassful, 1½ ounces* or two ounces.

A *table-spoonful, ((F.) Cuiller à bouche,*) about half an ounce.

A *coffee or dessert-spoonful, about 3 drachms.*

A *tea-spoonful, a fluidrachm.*

A *handful, manipulus, ((F.) Poignée,*) as much as can be held in the hand.

The *Pugillus ((F.) Pincée)* is as much as can be held by the three fingers.

These last quantities are occasionally prescribed by the French practitioners. Their weights must, of course, vary, according to the article. The authors of the Parisian codex have valued them, as regards certain substances.

	French.	oz.	dr.
A <i>Manipulus</i> of barley weighs	3	2½	
" " linseed	1	4	
" " linseed meal	3	3	
" " dried mallow leaves	1	3	
" " dried cichory leaves	1	0	
" " flowers of the tilia	1	2½	

	dr.	scr.	gr.
A <i>Pugillus</i> of chamomile flowers weighs	2		
" " arnica	1	2	
" " marsh-mallow	1	1	
" " mallow			60
" " fennel seeds	1		60
" " anised	1	½	60

A *hen's egg, newly laid, weighs about 2 ounces and 2 drachms*: when deprived of its shell, 2 ounces. The *white* weighs 1 ounce, 2 drachms, and 57 grains: the *yolk*, 5 drachms and 15 grains.

WEILBACH, MINERAL WATERS OF.

The village of Weilbach is in the plain between the Maine and the southern extremity of the Taunus hills. It has in its neighbourhood a cold sulphureous alkaline spring, the water of which is bottled and exported, although not of great efficacy. Its use is at times combined with that of the saline springs in Nassau, and of Baden-Baden, in various chronic abdominal and thoracic affections.

WELD, Reseda luteola.

WELK, Welk. An inequality; a protuberance; a cutaneous eruption of this character. Acne.

WEMDING, MINERAL WATERS OF.

These waters are situate about four leagues from Donawert in Bavaria. They contain sulphuretted hydrogen; carbonates of lime, magnesia, and soda; sulphates of lime and magnesia; a little

chloride of calcium, and oxide of iron; and are much used in asthenic diseases.

WEN, Sax. Pen, Lu'pia, Tumour, (F.) Loup. A name given to circumscribed, indolent tumours, without inflammation or change of colour of the skin. They may be met with in almost every part of the body. Their magnitude, as well as nature, is very variable. The term is sometimes given to an encysted tumour, and to bronchocele.

WESTERN ISLANDS, Azores.

WEST INDIES, (CLIMATE OF.) The climate of the West Indies has long been regarded as favourable to the consumptive. In confirmed consumption, it appears, however, to be positively injurious. As a prophylactic for those predisposed to consumption, it is generally favourable. The nature of the patient's constitution, in regard to the effects of elevated temperature, has always to be taken into account. In diseases that are benefited by warm climates, the West Indies afford an appropriate residence. The islands in which the invalid can best obtain all the advantages of the climate, are Jamaica, Barbadoes, St. Vincents, Antigua, St. Kitts, and Santa Cruz.

WHAHOO, see Eponymus.

WHEAL, Weal, Wale. A ridge, or elevation of the skin, produced by a rod or whip; or as if produced in that manner. Such elevations are seen in urticaria.

WHEAT, Triticum—w. Indian, Zea mays—w. Turkey, Zea mays.

WHELK, Acne, Welk—w. Chin, Syccosis—w. Rosy, Gutta rosea.

WHEY, Serum lactis—w. Mustard, see Sinapis—w. Rennet, see Serum lactis—w. Tamarind, see Tamarindus—w. Vinegar, see Acetum—w. Wine, Wine whey.

WHIFFING MURMUR, see Murmur, respiratory.

WHISKY, see Spirit. A spirituous liquor obtained from oats, potatoes, &c., by distillation.

WHISKY LIVER, Liver, nutmeg.

WHIS'PERING; evidently an onomatopœia (hoois'pering), Susurra'tio, Susurra'tion. Articulation of the air sent through the vocal tube without any action of the glottis.

WHISTLING, Sifflement, see Râle sibilant.

WHITE, Flake, Plumbi subcarbonas.

WHITE BALL, Cephalanthus occidentalis—w. Leaf, Pyrola maculata, Spirea tomentosa—w. Leg, Phlegmatia dolens—w. Matter of the brain, see Cerebrum—w. Root, Angelica lucida, Asclepias tuberosa.

WHITE, SPANISH, Bismuth, subnitrate of.

WHITE SWELLING, Hydrarthrus—w. Swelling of lying-in women, Phlegmatia dolens—w. Substance of Schwann, see Nerve fibre—w. Sulphur, see Virginia, mineral waters of—w. Weed, Chrysanthemum leucanthemum—w. Wood, Liriodendron, Tilia.

WHITENESS OF COMPLEXION, Paleness.

WHITES, THE, Leucorrhœa.

WHITLEYA STRAMONIFOLIA, Anisodus luridus.

WHITLOW, Paronychia.

WHOOPIING-COUGH, Pertussis.

WHORLYWORT, Leptandria purpurea.

WHORTLEBERRY, Vaccinium myrtillus, Vaccinium vitis idæa—w. Bears', Arbutus uva ursi.

WHORTS, BLACK, Vaccinium myrtillus.

WIDOW-WAIL, Cneorum tricoccon, Daphne Alpina.

WIESBADEN, MINERAL WATERS OF, see Wiesbaden.

WIESSAU, MINERAL WATERS OF. These waters are situate about four leagues from the convent of Waldsassen in Bavaria. They contain

carbonic acid; carbonates of lime and magnesia; chlorides of calcium, magnesium, and aluminum; carbonate of soda, and much oxide of iron. The Bavarians consider them to resemble the waters of Pyrmont.

WILD, Sax. *wild*, (D.) Wild. An epithet given to the countenance, when not in harmony with the condition of the individual, and indicating strong mental emotion; — a *wild look*, (F.) *Physiognomie égarée*.

WILDBAD, MINERAL WATERS OF. Wildbad is a small town of Wurtemberg, three German miles from Baden-Baden. It is much frequented as a watering-place. The water is thermal, from 95° to 100° of Fahr., and is much employed in cases in which thermal waters are indicated. It is used internally, a pint not containing more than a grain of solid ingredients, which consist of salts of soda and lime. The proportion of carbonic acid gas is very small.

WILDUNGEN, MINERAL WATERS OF. Wildungen is situate a few miles from Cassel in Germany. In its neighbourhood are several mineral springs; the chief of which, according to Stucke, contain a bituminous matter; chloride of sodium and sulphate of soda; carbonate and sulphate of lime, &c. They are used, chiefly, as refrigerants.

WILL, Voluntas.

WILLOW, Salix.

WILLOW HERB, common, *Lythrum salicaria* — w. Herb, great, *Epilobium augustifolium* — w. Herb, purple, *Lythrum salicaria* — w. Herb, purple veined, *Epilobium coloratum*.

WILLOW, Low-bush, *Salix humilis* — w. Speckled, *Salix humilis* — w. Red, *Cornus sericea* — w. Rose, *Cornus sericea* — w. Sweet, *Myrica gale*.

WIND, Sax. *winô*, *Ventus*, *An'emos*, (F.) *Vent*. Winds exert considerable influence on the animal economy; acting by their temperature, which necessarily modifies that of the circumambient air, as well as by their moisture or dryness, and by the emanations of different kinds, which they transport to greater or less distances. The winds which blow over a considerable extent of country, are dry and serene: those which come from the ocean are moist and chilly.

WIND DROPSY, Emphysema, Tympanites — w. Flower, *Anemone* — w. Pipe, *Trachea* — w. Root, *Asclepias tuberosa*.

WINDINESS, Flatulence.

WINDY, *Flatulentus*, *Flatulent*, *Vapourous*, (F.) *Ventus*. That which causes wind or flatulence; also, that which is caused by wind or flatulence; as *windy food*, *windy colic*, &c. Also, one affected with flatulence, or who is 'troubled with the wind.'

WINE, Sax. *win*, (G.) *Wein*, originally, perhaps, from *avos*, *Enos*, *Vinum*, (F.) *Vin*. A name given by chymists to all liquors that have become spirituous by fermentation. The term is generally, however, restricted to the fermented juice of the grape, or of fruits, the product of whose fermentation resembles, in almost all respects, that of the juice of the grape. Wine is composed of alcohol; saccharine matter; malic acid; tartaric acid; bitartrate of potass; acetic acid: an extractive colouring matter, more or less bitter, and partly resinous; and sometimes of an aromatic substance. The extractive colouring matter is chiefly met with in red wines. All these constituents, except the alcohol, are found ready formed in the grape. The alcohol proceeds from the decomposition of the saccharine matter. A part of the acetic acid is also formed during fermentation.

The following table, drawn up by Mr. Brande, exhibits the quantity of spirit in different kinds

of wine and liquors. It is proper, however, to remark, that many of these wines are prepared for the London market, and are more brandied, or "reinforced," than the same varieties sold in the United States. This is strikingly the case with port. Dr. Henderson, too, has remarked, that some of the wines analyzed by Mr. Brande were mixed with a considerable quantity of adventitious alcohol. Dr. Henderson's additions and corrections have the letter H. affixed.

The only wine recommended in some pharmacopias is *Sherry*, *Vinum*, *Vinum album Hispanicum*, *Leucanum*. It is a dry wine; the least variable in its properties, and agrees best with the dyspeptic. Other wines used officinally are—*Canary* or *Sack* wine, *Vinum Canarium*; *Mountain* wine, *Vinum album montanum*; *Tent* wine; *Rhenish* wine, *Vinum Rhenum*; and *Port* wine, *Vinum rubrum Portugallicum*.

The wines habitually drunk are almost innumerable. Those that are sweet, or contain a large portion of free, saccharine matter, are decidedly the least wholesome to the dyspeptic.

When wine is good, and of a proper age, it is tonic and nutritive; when new, flatulent and cathartic, disagreeing with the stomach and bowels. In medicine, it is a valuable tonic in the last stage of typhus, when the skin is not too hot and dry. Its use, however, requires great caution; and when once commenced under proper circumstances, it cannot be suddenly dropped without mischief. It is, perhaps, the best permanent stimulus in the catalogue of the materia medica.

Mulled Wine is made as follows:—Take of bruised cinnamon $\frac{3}{4}$; half a nutmeg grated; and ten bruised cloves. Infuse in boiling water Oss for an hour; strain and add sugar $\frac{3}{4}$. Pour the whole into a pint of hot *Port* or *Sherry*. Useful in adynamic conditions.

WINE, AMINEAN, *Amineum vinum*—w. of Aloe, *Vinum aloes*—w. Antimonial, *Vinum antimonii tartarisati*—w. Antiscorbutic, *Vinum antiscorbuticum*—w. Aromatic, *Vinum aromaticum*—w. Bark, compound, *Vinum de kinâ kinâ compositum*—w. Barley, *Cerevisia*—w. Bitter, diuretic, *Vinum diureticum amarum*.

WINE BITTERS, *Vinum gentianæ compositum*. The formulas for these may be various. The following is as good and as agreeable as any. (*Rad. gentian. lbj, cort. aurant. ʒx, sem. cardam. cont. ʒiv, cinam. cort. ʒiv, wine, foreign or domestic, three gallons and a half.*) Tonic and stomachic.

WINE, CEDAR, *Cedrinum vinum*—w. Champagne, *Vinum campanum*—w. Chian, *Chium vinum*—w. of Colchicum, *Vinum colchici*—w. of Colchicum seed, *Vinum colchici seminis*—w. of Ergot, *Vinum ergotæ*—w. of Gentian, compound,

Vinum gentianæ compositum—w. of Hellebore, white, *Vinum veratri*—w. *Ipecacuanha*, *Vinum ipecacuanhæ*—w. of Iron, *Vinum ferri*—w. Medicated, *Vinum medicinale*—w. Mulled, see *Wine*—w. of Opium, *Vinum opii*—w. Port, *Vinum Portugallicum*—w. Pullet, *Poulet, vin de*—w. of Quinia, *Vinum quiniæ*—w. Rhubarb, *Vinum rhei palmati*—w. Sherry, *Vinum*—w. Steel, *Vinum ferri*—w. Tobacco, *Vinum tabaci*.

WINE WHISKY, White Wine Whisky. Take of good milk two-thirds of a pint, and add water to make a pint. Take of sherry, or any other good white wine, two glasses, and of sugar a dessert-spoonful. Place the milk and water in a deep pan on the fire; and the moment it boils, pour into it the wine and sugar. Stir assiduously for 12 or 15 minutes, whilst it boils. Lastly, strain through a sieve.

It is a good mode of giving wine in adynamic states.

WINE, WHITE, see *Wine*—w. of Wormwood, *Vinum absinthites*.

WING-SEED, *Petala trifoliata*.

WINKING, *Scardamylum*.

WINTER-BARK TREE, *Wintera aromatica*—w. Berry, Virginia, *Prinos*—w. Berry, smooth, *Prinos levigatus*—w. Berry, whorled, *Prinos*.

WINTER BLOOM, *Hamamelis Virginiana*—w. Cough, Bronchitis, chronic—w. Green, *Gaultheria*—w. Green, round-leaved, *Pyrola*—w. Green, spotted, *Pyrola maculata*.

WINTERA, see *Wintera aromatica*.

WINTERA AROMATICA, *Drings Winteri, Wintera'na aromatica, Winter-bark Tree*. The bark, *Wintera* (Ph. U. S.), *Cortex Winteranum, Cortex Winteranus Magellanicus, Cortex Magellanicus, Cinnamomum Magellanicum*, (F.) *Écorce de Winter, Cannelle poivrée*, is very much allied in its properties to *Canella alba*.

WINTERANA AROMATICA, *Wintera aromatica*.

WISBADEN, MINERAL WATERS OF. Wisbaden is a town of Germany, about 6 miles north of Mainz, and 22 west of Frankfort. It has been long celebrated for its hot springs; and is much frequented. There are numerous cold and thermal springs,—the former containing sulphuric acid; the latter being saline and acidulous. The temperature of the hot springs varies from 117° to 160° Fahr.

WISMUTHUM, Bismuth.

WOAD, *Isatis tinctoria*.

WOLFBANE, *Veratrum viride*.

WOLFSBANE, *Aconitum*—w. Wholesome, *Aconitum anthora*.

WOLFSCLAW, *Lycopodium*.

WOLFSJAW, see *Harelip*.

WOMANHOOD, *Mulieritas*.

WOMB, Uterus—w. Falling down of the, *Prolapsus uteri*.

WOMB GRAIN, *Ergot*.

WOMB, LACERATION OF THE, Uterus, rupture of the—w. Tympany of the, *Physometra*.

WOOD, BRAZIL, *Cesalpinia echinata*—w. Elk, *Andromeda arborea*—w. Fernambuco, *Cesalpinia echinata*.

WOOD-LICE, *Onisci aselli*—w. Nicaragua, see *Cesalpinia*—w. Peach, see *Cesalpinia*—w. Pernambuco, *Cesalpinia echinata*—w. Sampfen, *Cesalpinia sappan*—w. Sorrel, *Oxalis acetosella*—w. Sour, *Andromeda arborea*—w. Waxen, *Genista tinctoria*.

WOODBINE, COMMON, *Lonicera periclymene*.

WOODROOF, SWEET-SCENTED, *Asperula odorata*.

WOODS, SUDORIFIC, (F.) *Bois sudorifiques*. This term is applied, collectively, to the guaia-

oam, sassafras, china, and sarsaparilla; which are often used together to form the sudorific decoction.

WOORARA, Curare.

WORM, see Alembic, Vermiform process — w. Bark tree, Geofirma inermis — w. Cakes, Story's, see Cakes, worm, Story's — w. Disease, Helminthiasis — w. Goosefoot, Chenopodium anthelminticum — w. Grass, perennial, Spigelia Marilandica.

WORM, GUIBBA, Dracunculus.

WORM LOEWIGES, CHINE'S. Empirical preparations, which consist of yellow and brown lozenges. The former are directed to be taken in the evening; the latter on the following morning. The *Yellow Lozenges*. (Saffron, ʒss, water, Oj; boil, and strain; and add of white panacea of mercury, (calomel washed in spirit of wine,) ℞j, white sugar, ʒss lbs, mucilage of gum tragacanth q. s., to make a mass. Divide, so that each lozenge may contain a grain of the panacea.) The *Brown Lozenges*. (Panacea ʒvij, resin of jalap ℞ijss, white sugar ℞ix, mucilage of gum tragac. q. s. Each lozenge to contain gr. ss of the panacea.)

WORM LOEWIGES, SHERRMAN'S, are said to be composed of calomel, gamboge, and sugar.

Peter's Worm Lozenges are said to be composed in a similar manner.

WORM ROOF, Spigelia Marilandica — w. Seed, Artemisia santonica, Chenopodium anthelminticum — w. Seed, goosefoot, Chenopodium anthelminticum — w. Weed, Corsican, Corallina Corsicana, Polanisia graveolens — w. Weed, white, Corallina — w. Wood, biennial, Artemisia biennis — w. Wood, common, Artemisia absinthium — w. Wood, creeping, Artemisia rupestris — w. Wood, lesser, Artemisia Pontica — w. Wood, Roman, Artemisia Pontica — w. Wood, Sea, Artemisia maritima — w. Wood, silky, Artemisia glacialis.

WORMIA'NA OSSA seu OSSIC'ULA, O. epactaria, O. raphogeminaria, O. triquetra, O. triangularia Blaisii, Claves calcaria, O. suturarium, (F.) Os Wormiens, Clefs du crâne, Os epactaux, Os supernuméraires, (Ch.), Os intercalés, Os triangulaires. Small bones, which are sometimes observable in the sutures of the bones of the cranium, of which they form a part. They were called *Wormiana*, from Olaus Wormius, who is said to have first described them. They had been previously, however, mentioned by G. Andernach, a physician at Strasburg. The *Ossa Wormiana* exist more commonly in the sutures of the vault of the skull; especially in the lambdoidal, sagittal, and squamous. They are uncommon at the base of the skull. Their size is very variable, and shape irregular. Their structure and development are similar to those of the other bones of the cranium; and, like them, they are bounded by sutures.

WORMS, originally from (L.) *Vermes*; *Intestinal Worms, Entoso'a, Entozoa'ria, Enterozo'a, Endozo'a, Vermes intestini, Entelminth'a, Entelmin'thes, Helmin'thi, Helminth'ia Alvi, H. pod'icis, Splanchnelmin'tha, Entoparasites, (F.) Vers, Vers intestinaux, Entozoaires.* Animals whose common character is that of existing only in other animals; hence their name *entoso'a*, from *entos*, 'within,' and *zoos*, 'animal.' They are met with, not only in the natural cavities, but even in the tissue of the organs. Cuvier, Rudolphi, Brera, Bremser, Laënnec, and others, have endeavoured to classify them, — some according to their shape; others, according to their anatomical characters.

The following table exhibits the entozoa, which have been met with in the human body, and their usual habitat:—

Entozoa.	Where found.
Trichoceph'alus dispar,	Intestines.
Oxyu'ria vermicula'ria,	
Ascaris lumbricoi'des,	Urinary bladder.
Bothrioceph'alus latus,	
Tæ'nia so'lum,	
Ditrichoceph'alus radis,	
Diplosoma crenata,	
Spiro'ntera hom'inis,	
Dactyl'ius aculeatus,	
Dis'toma hepaticum,	
Stron'gylus gigas,	
Fila'ria o'culi,	
Acephalocyst'is endog'ena,	Gall bladder.
Echinoco'cus hom'inis,	Kidney.
Polys'toma pingui'ola,	Eye.
Polys'toma venarum seu sanguic'ola, Hexathyrid'ium venarum,	Liver.
Fila'ria bronchis'lis,	Liver, Spleen, and Omentum.
Trichina spiralis,	Ovary.
Cystico'cus celluloseus,	Veins.
Acephalocyst'is multifida,	
Fila'ria medinen'sis,	Bronchial gland.
	Muscles.
	Brain.
	Cellular texture.

The most common of these are:—the *Oxyurus vermicularis*, *Ascarides lumbricoides*, and *Tænia*, which are found in the intestines. The origin of these worms is extremely singular, and more favourable than any other fact to the hypothesis of spontaneous generation in the lowest tribes of animated nature. They are certainly not identical with any worms out of the body. They are most commonly met with in children improperly fed; but their presence cannot be positively detected by any symptom, except that of the discharge of the worms themselves in the evacuations. They may, of course, give rise to every kind of irritation in the intestinal tube, and to sympathetic disturbance in most of the functions; but all these signs may be produced by intestinal irritation resulting from other causes.

Anthelmintics or *vermifuges*, employed, as the name imports, for their removal, may be of two kinds—*mechanical* and *true*. To the first class—the *mechanical*—belong *Emetics, Purgatives, Nucuna, powdered Tin*, &c. To the latter—the *true anthelmintics*, — *Turpentine, Chenopodium anthelminticum, Pink-root, Semina Santonici*, &c. Of these, the best is turpentine. See *Oleum terebinthina*. The great object, however, is to prevent their generation. This must be done by generous diet, fresh air, and tonics, where necessary.

WORT, Sax. wort, Mustum, Infusum Bysse seu Brasii seu Malti, (F.) Mout de la Bière. An infusion of malt. This has been recommended in scurvy. One measure of ground malt is added to three equal measures of boiling water. The mixture must be well stirred, and left to stand covered three or four hours. Dose, one to four pints, daily. It has, also, been recommended in other cases, where a strong purulent disposition appeared to prevail in the fluids, as in cancer and phagedenic ulcers. It is not now employed.

WOUND, Sax. sunb, Vulnus, Volnus, (diminutive Vulnusculum), Plaga, Trauma, Trama, Trevis, Trevis Vulnus, Blabi, Tymma, (F.) Plaie, Blesure. A solution of continuity in the soft parts, produced by some mechanical agent. Wounds present innumerable differences, as regards their situation; the parts interested; their direction; size; shape; the nature of the instrument or agent by which they are produced; their more or less simple or complex character, duration, &c. A wound is called *incised*, (F.) *Couper*, *Incision*, when made by a cutting instrument;—*punctured*,

Nygma, (F.) *Figure*, when made by a pointed instrument;—*lacerated*, (F.) *Déchirure*, *Plaie par arrachement*, when the parts are lacerated or torn by the wounded body; *poisoned*, *Cellulitis venenata*, *Necrosis*, (F.) *Plaie envenimée*, when some virulent or venomous substance has been introduced;—and *contused*, (F.) *Plaie contuse*, when produced by a blunt body. *Gunshot wounds*, *Sclopetoplagas*, *Vul'nera sclopetaria*, (F.) *Plaies d'armes à feu ou d'arquebuse*, *Coup de feu*, belong to the last division.

WOURALI, Curare.
WOURARI, Curare.
WOURARU, Curare.
WRACK, SEA, *Fucus vesiculosus*.
WRACK, BLADDER, YELLOW, *Fucus vesiculosus*.
WRAPPING UP, (OF THE HYDROPATHISTS,) *Emballottage*.

WRENCH, Sprain.

WRIGHTIA ANTIDYSENTERICA, *Nerium antidysentericum*.

WRINKLE, Sax. *Princke*, *Ruga*, *Rytis*, *Rhacus*, *Rhachus*, *Rhagus*, *Rhysséma*, *Corrugatio cutis*, (F.) *Ride*. A furrow or fold in the skin of the face, forehead, vagina, &c. See *Corrugation*.

WRINKLED, *Rugosus*, *Rugosus*, *Rugosus*, (F.) *Ridé*. Full of wrinkles.

WRIST, Carpus.

WRIST-DROP. Paralysis of the muscles of the forearm, induced by the poison of lead.

WRITERS' SPASM, see *Spasm*, *writers'*.

WURALI, Curare.

WURSTGIFT, Allantotoxium.

WRONG HEIR, *Cancellus*.

X.

XALAPPA, *Convolvulus jalapa*.

XANTHIC OXIDE, *Uric oxide*.

XANTHINE, *Uric oxide*.

XANTHIUM, *X. strumarium* seu *Orientalis* seu *Vulgaris*, *Barda'na minor*, *Lappa minor*, *Lesser Burdock*, *Burweed*, *Burthistle*, *Clothur*, (F.) *Lampourde*, *Petit Glouteron*, *Petite Bardane*. This herb, as one of its names imports, was once esteemed for the cure of *scrofula*. The seeds have been administered in cutaneous affections.

XANTHIURIA, *Xanthuria*.

XANTHOP'SIA, from *ξανθός*, 'yellow,' and *οψίς*, 'vision.' *Yellow vision*,—as sometimes occurs in jaundice.

XANTHORRHIZA, *Xanthorrhiza apiifolia*.

XANTHORRHIZA APIIFOLIA, *Xanthorrhiza*, *X. simplicifolia*, *X. Marboi'ca*, *Zanthorrhiza tinctoria*, *Yellow Root*, *Parsley-leaved Yellow Root* or *Yellow wort*, *Shrub yellow root*. The root of this American plant—*Xanthorrhiza*, (Ph. U. S.)—is a strong and pleasant bitter; and, in the dose of two scruples, sits easy upon the stomach.

XANTHOS, *Yellow*.

XANTHOSIS. A term applied to the yellow discoloration often observed in cancerous tumours—especially in encephaloid of the testicle.—*Lebert*.

XANTHOXYLUM CLAVA HERCULIS, *Prickly Ash*, *Toothach Tree*, (F.) *Clavater à feuilles de frêne*, *Frêne épineux*. The bark—*Xanthoxylum*, (Ph. U. S.)—is a very strong stimulant and powerful sialagogue. It has been given, internally, in rheumatism. Another species—*Xanthoxylum fraxinifolium*, *Xanthoxylum fraxinifolium*, *Shrubby prickly ash*, *Toothach bush*, *Pellitory*, *Yellow wood*, *Suterberry*,—possesses active powers. A spirituous infusion of the bark has been highly recommended in cases of violent colic. The fresh juice, expressed from the roots of the *xanthoxylum*, is said to afford relief in the dry bellyache of the West Indies. A decoction of the bark is sometimes used as a wash to foul ulcers.

XANTHURIA, *Xanthuria*, from *ξανθός*, 'yellow,' and *ουρον*, 'urine.' A condition of the system and of the urine, in which xanthic oxide is deposited from the urine.

XANTICA, *Carminatives*.

XANTOLINA, *Artemisia santonica*.

XENODOCEUM, *Hospital*.

XENODOCHEUM, *Hospital*.

XERANSIS, *Arefaction*, *Drying*.

XERANTIA, *Siccantia*.

XERA'SIA. Same etymon; from *ξηρός*, 'dry.' A disease of the hairs, which become dry, cease to grow, and resemble down covered with dust.—*Galen*.

XERION, *Catapasma*.

XEROCOLLYRIUM, from *ξηρός*, 'dry,' and *κόλλυριον*, 'a collyrium;' *Collyrium siccum*. A dry collyrium.

XERODER'MA, from *ξηρός*, 'dry,' and *δέρμα*, 'skin.' Diminution of secretion of the sebaceous glands.

XEROMA, *Xerophthalmia*—*x. Conjunctival*, *Xerophthalmia*.

XEROMA, *Lachrymal*. Suppression of the lachrymal secretion.

XEROMYCTER, *Xeromycteria*.

XEROMYCTERIA, *Xeromycter*, from *ξηρός*, 'dry,' and *μύκτηρ*, 'the nose.' Dryness of the nose.

XEROMYRON, *Unguentum siccum*; from *ξηρός*, 'dry,' and *μυρον*, 'an ointment.' A dry ointment.—*Gorræus*.

XEROPHA'GIA, from *ξηρός*, 'dry,' and *φαγω*, 'I eat.' Excessive use of dry aliment. A kind of regimen to which the ancient athletes subjected themselves, with the view of increasing their strength.

XEROPHTHAL'MIA, *Ophthalmia sicca*, *Ophthalmoxerosis*, *Xeroma*, from *ξηρός*, 'dry,' and *οφθαλμία*, 'inflammation of the eye.' An inflammation of the eye, without discharge. The term—as well as *Conjunctival Xeroma*, and *Cuticular Conjunctiva*—has been given to cases in which the conjunctiva is so changed, that it presents more of the characters of skin than of mucous membrane. It is incapable of radical cure. Also, *lippitudo*.

XEROTRIBIA, see *Friction*.

XEROTRIPSIS, *Friction*, *dry*.

XIPHISTERNUM, *Xiphoid*.

XIPHODES, *Xiphoid*.

XIPHODYMUS, *Thoraco-gastrodidymus*.

XIPHOID, *Xiphoides*, *Xiphoides*, *Ensisformis*, from *ξίφος*, 'a sword,' and *ειδός*, 'shape;' *Cartilago Xiphoides*, *C. Xiphoides*, *C. Scutalis*, *C. Ensisformis*, *C. Pelta'lis* seu *pelta'tus*, *Ensisform cartilage*, *Furcula inferior*, *Mucronatum os*,

Mucronata Cartilago, Chondros, Processus xiphosternalis seu xiphoides seu sterni xiphoides, Xiphisternum, (F.) Appendicis cartilage xiphoides, C. Mucroné, Appendicis sous-sternale, Palletis. The name of the appendix which terminates the sternum beneath; and which is so called from some resemblance to a sword.

XIPHOID LIGAMENT, Costo-xiphoid L. (F.) *Ligament xiphoidien ou costo-xiphoidien*, is a small, very thin, ligamentous fasciculus, which passes from the cartilage of prolongation of the 7th rib to the anterior surface of the xiphoid cartilage, into which it is inserted by its fibres decussating with those of the opposite ligament.

XIPHOPAGES, Didymus, Symphyo-epigastrius; from *ξίφος*, 'a sword,' and *σύνεπις*, 'I fix.' A monstrosity, in which twins are united by the epigastrium, as in the case of the Siamese twins.

XYLO-ALOES, Agallochum—x. Balsamum,

see *Amyris opobalsamum—x. Cassia, Laurus cassia—x. Cinnamomum, Laurus cinnamomum*

XYLUM, Gossipium.

XYMPATHIA, Sympathy.

XYRIS, Iris foetidissima.

XYRIS BULBO'SA, X. Indica, X. Carolinensis *Yellow-eyed Grass*; indigenous; Order, *Xyridaceae*; flowering from July to September. The roots and leaves are said to be used by the Hindoos in lepra, and chronic cutaneous diseases in general.

XYRUM, Novacula.

XYRUS, Novacula.

XYSMA, Linteam, Rasura, Socha.

XYSMOS, Rasura.

XYSTER, Raspatorium.

XYSTOS, Linteam.

XYSTRUM, Raspatorium—x. Ophthalmium, Ophthalmoxyster.

Y.

YAM. This esculent root is principally obtained from three species of *Dioscorea*,—*ala'ta bulbifera*, and *sativa*. They grow spontaneously in both the Indies, and their roots are eaten promiscuously, as the potato is with us. Their taste is somewhat like the potato.

YAM ROOT, WILD, Dioscorea villosa.

YARD, Penis.

YARROW, COMMON, Achillea millefolium.

YAUPON, Ilex vomitoria.

YAWNING, from Sax. zœnan, Chasmé, Chasmus, Hiat'us, Oeco'de, Oecitatio, Oeonus pandiculatio maxilla'rum, Gaping, (F.) Baillement. Yawning consists of a deep inspiration, with considerable separation of the jaws, executed slowly and in an involuntary manner, and followed by a prolonged and more or less sonorous expiration. This respiratory movement is preceded by a feeling of oppression in the epigastric region, and in the muscles of respiration and mastication. Yawning has been conceived to be owing to torpor in the pulmonary circulation; the causes producing it being commonly ennui, fatigue, sleepiness, monotonous sounds, hunger, sympathy, &c. Yawning often precedes the invasion of certain intermittents, attacks of hysteria, &c., and it may, by its frequency, and obstinacy, become a true disease.

YAWROOT, Stillingia.

YAWS, Framboesia.

YEAST, Yest—y. Plant, Torula cerevisiae.

YELK, see Ovum.

YELLOW, Flavus, Lu'teus, Xanthus, from part. of *Sax. zœnan*, 'to burn.' One of the seven primitive colours.

YELLOW ASH, Cladrastis tinctoria—y. Berry, Podophyllum montanum—y. Fever, see Fever, Yellow—y. Fever, mild, see Relapse.

YELLOW LIGAMENTS, (F.) Ligaments jaunes, occupy the spaces between the vertebral plates,

from the interval, which separates the second vertebra from the third, to that which separates the last vertebra from the sacrum. They are so called in consequence of their colour.

YELLOW PAIN, Hydrastis Canadensis—y. Root, Jeffersonia Bartonii—y. Root, Parsley-leaved, Xanthorrhiza apiifolia—y. Root, Star, Xanthorrhiza apiifolia—y. Star, Helianthem autumnale—y. Weed, Ranunculus acris—y. Weed, Xanthoxylum fraxineum—y. Wort, Parsley-leaved, Xanthorrhiza apiifolia.

YELLOW S, Cypripedium intoum, Letrus, Ranunculus acris.

YERBA DEL SOLDADA, Matice—y. de Huaca, Datura sanguinea.

YEST, Yeast, Sax. zœft, from yft, 'a storm,' yftis, 'stormy;' Cerevisia Fermentum, Spuma Cerevisiae, Barm, (F.) Levure, Levure de la Bière. The scum, which collects on the surface of beer whilst fermenting. Yest is antiseptic and tonic. It has been much extolled in putrid fevers.—a table-spoonful being given as a dose, in port, wine, &c. It is, also, applied, in the form of cataplasm, to foul ulcers. In all these cases, it acts by virtue of the generation of carbonic acid gas.

YEUX ARDENS, Ardent eyes—y. d'Érevise, Cancrorum ocellis.

YEW TREE, Taxus baccata.

YLECH, Ilech.

YLIATER, Ilech.

YOLK, see Ovum.

YOUTH, Adolescence.

YOPON, Ilex vomitoria.

YPSELOGLOSSUS, Basiloglossus.

YRIDES, Orpiment.

YSAM'BRA, Pedigam'bra. An ancient Spanish poison, of which hellebore formed the greatest part.

YUCCA, Jatropha manihot.

Y-WER-A, see Spirit.

Z.

ZACCHARUM, Saccharum.

ZABL, Borosail.

ZAFFRAN, Crocus.

ZAMBO, see Mulatto.

ZAMIA INTEGRIFOLIA, see Arrowroot—z. Pamila, see Arrowroot.

ZANNA. A kind of Armenian hole, used by

the ancients as a desiccative. It was also called *Zarnacha*.

ZANTHORRHIZA APIIFOLIA, Xanthorrhiza apiifolia.

ZANTHOXYLUM CLAVA HERCULIS, Xanthoxylum clava Herculis.

ZAPANIA RODIFLORA, Anacostappa.

ZARNACHA, Zanna.

ZARSA, *Smilax sarsaparilla*.

ZARZAPARILLA, *Smilax sarsaparilla*.

ZEA MAYS, *Z. vulgare*, *Mays seu Americana*, *Mays*, *Indian Corn*, *Corn*, *Turkey Wheat*, *Mains*, *Ador*, *Indian Wheat*, (F.) *Mais*, *Graine de Turquis*, *Blé d'Inde*, *Blé d'Espagne*, *Blé d'Italie*, *Blé de Turquis*. A native of America, and much used over the whole of the continent as an article of diet. It is ground for the same purposes as wheat, and forms an excellent bread.

ZÉDOAIRE ROND, *Kæmpferia rotunda*.

ZEDOARIA, *Kæmpferia rotunda* — s. Longa, see *Kæmpferia* — s. Rotunda, see *Kæmpferia*.

ZEDOARY, *Kæmpferia rotunda*.

ZELOSIS, *Zelotypia*.

ZELOTYPIA, from *ζηλος*, 'love,' and *τυπος*, 'form,' 'model,' *Zelo'sis*. It has been proposed to apply this name to the violent mental affection produced by the acknowledged or presumed infidelity of a beloved object; and to the consequences of such affection; — melancholy, mania, &c.

ZEMA, Decoction.

ZEN'ICON, *ζηνικον*. Ancient name of a Keltic poison, used for poisoning arrows.

ZEPHACH, *Peritonæum*.

ZERMA, *Zerna*.

ZERNA, *Zerna*. Amongst the barbarous Latin writers it signified ulcerated impetigo, *Impetigo ulcera'ta*.

ZERUMBET, *Cassumuniar*.

ZESIS, Effervescence, Decoction.

ZEST, see *Citrus medica*.

ZESTOLUSIA, Bath, hot.

ZIBBÈ, see *Vitis vinifera*.

ZIBETHUM, *Civetta*.

ZIGNITES, *Zingrites*.

ZINC, *Zincum*, *Zinkum*, *Speltzum*, *Speauter*, *Tutenag*, *Zinckum*, *Zint*, *Stannum Indicum*. Perhaps formed etymologically from (G.) *Zin*, 'Tin.' A metal obtained from calamine and blende. Its colour is bluish-white; lustre of the fresh surface considerable, but soon dulled, from the facility with which it oxidates; hard; texture striated. S. g. 7.190. Melts at 700° Fah., burns with a bright flame in a higher temperature, and is volatilized in the form of a white, flocculent oxyd. Its use, in medicine, is in the formation of the following preparations.

ZINC, ACÉTATE DE, *Zinci acetat* — s. *Butter of Zinc chloridum* — s. *Chloride of Zinc chloridum* — s. *Chlorure de Zinc chloridum* — s. *Ferrohydrocyanate of Zinc cyanuretum* — s. *Flowers of Zinc oxydum* — s. *Hydrocyanate of Zinc cyanuretum* — s. *Iodide of Zinc iodidum* — s. *Ioduret of Zinc iodidum*.

ZINC AND MORPH'IA, DOUBLE I'ODIDE OF. (F.) *Iodure double de Zinc et de Morphine*. This salt is prepared by boiling *iodide of iodhydrate of morphia with water and zinc*, after they have acted on each other for some days; filtering and crystallizing. It is considered to combine the properties of morphia and the salts of zinc, and has been prescribed as an anodyne and antispasmodic. Dose, a quarter of a grain.

ZINC, OXIDE DE, *Zinci oxydum* — s. *Oxyd of Zinc oxydum*.

ZINC AND STRYD'NIA, DOUBLE I'ODIDE OF. This salt is prepared by digesting for several days in hot water, *iodide of iodhydrate of strychnia and zinc*; filtering and crystallizing. It has been proposed in the same cases as strychnia.

ZINC, SULFATE DE, *Zinci sulphas* — s. *Sulphate of Zinc Sulphas* — s. *Valerianate of Zinc Valerianas*.

ZINCHUM, *Zincum*.

ZINCI ACÉTAS, *Ac'etate of Zinc*, (F.) *Acetate de Zinc*. (*Plumbi acet. Bj*, *zinc. granul. ℥ij*, *aqna destillat. Oijj*). Dissolve the acetate of lead in the water, and filter. Add the zinc to the solution, and agitate them occasionally together, in a stopped bottle, for five or six hours, or until the liquid yields no precipitate, with a solution of iodide of potassium. Filter the liquor, evaporate it with a moderate heat to one-fifth, and set it aside to crystallize. Pour off the liquid, and dry the crystals on bibulous paper.

Should the crystals be coloured, dissolve them in distilled water, and having heated the solution, drop into it, while hot, a filtered solution of chlorinated lime, until it ceases to let fall sesquioxide of iron; filter the liquor, acidulate it with a few drops of acetic acid, evaporate, and crystallize.—*Ph. U. S.*)

Frequently used to form a gently astringent wash in ophthalmia and other local inflammations; and as an injection in gonorrhœa.

ZINCI CARBONAS IMPURUS, *Calamina*.

ZINCI CARBONAS PRÆCIPITATUS, *Precipitated carbonate of Zinc*. (*Zinci sulphat. soda carbonat. ℥℥ Bj*; *aq. bullient. cong.*). Dissolve the sulphate of zinc and carbonate of soda respectively in Oiv of water. Mix the solutions; stir, and set the mixture by, that the powder may subside. Having poured off the liquid, wash the precipitated carbonate of zinc with hot water, until the fluid of the washings is nearly tasteless, and dry with a gentle heat.—*Ph. U. S.*) Used to prepare the *Zinci oxidum*.

ZINCI CARBONAS PRÆPARATUS, *Calamina præparata*.

ZINCI CHLORIDUM, *Z. chloruretum*, *Zincum chlorat'um*, *Z. muriat'icum (oxydatum)*, *Chloride or Chloruret of Zinc*, *Butter of Zinc*, (F.) *Chlorure de Zinc*. (*Zinc. in frustulis, ℥ijss*; *acid. nitric., creta præparat. ℥℥ ℥j*; *acid. muriat. q. s.*). To the zinc, in the porcelain vessel, add gradually sufficient muriatic acid to dissolve it; strain, add the nitric acid, and evaporate to dryness. Dissolve the dry mass in water, add the chalk, allow the mixture to stand for 24 hours, filter, and again evaporate to dryness.—*Ph. U. S.*) It is very deliquescent in the air, forming the *Butter of Zinc*, *Butyrum Zinci*.

Chloride of Zinc is a powerful escharotic, and has been lately employed as an effective antiseptic.

ZINCI CHLORURETUM, *Z. chloridum*.

ZINCI CYANURETUM, *Hydrocyanas Zinci*, *Zincum Cyanogenat'um*, *Z. Borus'icum*, *Z. Zobiticum*, *Hydrocyanate of Zinc*. This salt is formed by adding sulphate of zinc to hydrocyanate of potassa so long as any precipitate is thrown down. When dried and calcined at a low heat, the product is a mixture of cyanuret of zinc and of potassium. It has been recommended in nervous cardialgia. Dose, from one-sixteenth to one-twelfth of a grain.

It is chiefly used as a caustic; one part of the chloride being mixed with four, three, or two parts of flour, according to the desired strength, and a few drops of water being added to form a paste.

ZINCI FERROHYDROCYANAS, *Cyanuret'um Ferrugin'icum*, *Zincum Ferrohydrocyan'icum*, *Ferrohydrocyanate of Zinc*. Made by the mutual decomposition of boiling-hot solutions of sulphate of zinc and ferrocyanate of potassa. It has been recommended in the same cases as the last preparation.

ZINCI HYDROCYANAS, *Zinci cyanuretum*.

ZINCI IODIDUM, *Z. Iodure'tum*, *Zincum Ioda'tum*, *Iode'tum Zinci seu Zin'cium*, *Protiodure'tum Zinci*, *Iodide or Iod'uret of Zinc*. This salt

is made by boiling together iodine and zinc to dryness, and subliming. An ointment, composed of a drachm to an ounce of lard, has been used in cases where the external use of iodide of potassium is indicated.

ZINCI IODURUM, *Z. iodidum* — *z. Nix*, *Zinci oxydum*.

ZINCI OXYDUM, *Zincum calcinatum*, *Oxyd of Zinc*, *Flowers of Zinc*, *Nihil Album*, *Lana Philosophorum*, *L. Philosophica*, *Nix Zinci*, *Nihil Grisum*, *Pompholyx*, (*F.*) *Oxide de Zinc*. (Prepared by burning zinc in a long, deep, crucible, placed so as to collect the sublimate. Also, by exposing the precipitate thrown down from a solution of sulphate of zinc by carbonate of ammonia to a strong heat, so as to drive off the carbonic acid.—*Ph. U. S.*) It is tonic and antispasmodic; externally, detergent and desiccative. Employed in epilepsy, chorea, &c. For its external use, see *Ung. Zinci*.

ZINCI OXYDUM IMPURUM, *Tutia*.

ZINCI SULPHAS, *Sulphate of Zinc*, *Zincum Vitriolatum*, *Vitriolum Album*, *White Vitriol*, *V. Goslarientis*, *V. Zinci*, *Sulphas Zin'cium*, *Gilla Vitrioli*, *Gilla Theophrasti*, *Sal Vomitorium Vitrioli*, *Chalcanthum Album*, *White Copperas*, *Sal Vitrioli*, (*F.*) *Sulfate de Zinc*. (*Zinc* in frustul. ℥iv; *acid. sulphuric.* ℥vj; *aqua destillat.* Oiv. To the zinc and water, previously introduced into a glass vessel, add by degrees the sulphuric acid, and, when the effervescence shall have ceased, filter the solution through paper; then boil it down till a pellicle begins to form, and set aside to crystallize.—*Ph. U. S.*) The sulphate of zinc is inodorous; taste, styptic. It is in white, semi-transparent, efflorescent crystals; soluble in three parts of water at 60°. It is emetic, tonic, antispasmodic, and, externally, astringent. A nostrum, sold under the name *Antispertus'is*, and, as its title imports, given in whooping-cough, contains this salt as its chief ingredient. It is emetic. Dose, as an emetic, gr. x to ℥ss; as a tonic, gr. j to ij. Used externally as a collyrium, gr. j to water f ℥j.

ZINCI VALERIA'NAS, *Valerianate of Zinc*. A salt formed by saturating valerianic acid with freshly prepared carbonate of zinc. It is in pure white, pearly scales, and has been recommended as a tonic in neuralgic diseases, epilepsy, &c. The dose is one or two grains several times a day.

ZINCUM, *Zinc* — *z. Borussicum*, *Zinci cyanuretum* — *z. Calcinatum*, *Zinci oxydum* — *z. Chloratum*, *Zinci chloridum* — *z. Cyanogenatum*, *Zinci cyanuretum* — *z. Ferrohydrocyanicum*, *Zinci ferohydrocyanas* — *z. Iodatium*, *Zinci iodidum* — *z. Muraticum*, *Zinci chloridum* — *z. Vitriolatum*, *Zinci sulphas* — *z. Zooticum*, *Zinci cyanuretum*.

ZINGIBER, *Amomum singiber* — *z. Cassumuniar*, see *Cassumuniar* — *z. Cliffordia*, see *Cassumuniar* — *z. Germanicum*, *Arum maculatum* — *z. Officinale*, *Amomum singiber* — *z. Purpureum*, see *Cassumuniar* — *z. Spurium*, see *Cassumuniar* — *z. Zerumbet*, see *Cassumuniar*.

ZINGIBERIN, *Piperoid*.

ZINGRI'TES, *Zigni'tes*. A stone, resembling glass; to which the ancients attributed marvelous properties.

ZINKUM, *Zincum*.

ZINT, *Zincum*.

ZINZIBER, *Amomum singiber*.

ZIPHAC, *Peritonæum*.

ZIRBUS, *Epiploon* — *z. Adipinus*, *Epiploon*, *gastro-colic*.

ZIZA'NIA AQUAT'ICA, *Wild Rice*; called by the Indians, *Menomene*, grows abundantly on the marshy margins of the northern lakes and waters of the upper branches of the Mississippi. The grain resembles oats. It furnishes the north-

ern savages and the Canadian traders and hunters with their annual supplies of grain.

ZIZYPHUM, *Jujube*.

ZIZYPHUS JUJUBA, see *Jujube* — *z. Nitcha*, see *Jujube* — *z. Sativa*, see *Jujube* — *z. Sylvestris*, see *Jujube*.

ZOA'GRIA, from ζωα, 'life,' and αγω, 'I catch up.' The saving and preservation of life. *Zoësis*. A reward for preserving life; *Sectum*. A votive offering hung up in the temples for life saved.

ZOANTHRO'PIA, *Melancholia zoanthropia*, from ζωα, 'an animal,' and ανθρωπος, 'a man.' A species of monomania, in which the patient believes himself transformed into an animal. Lycanthropia and cynanthropia belong to this species of monomania.

ZOARA, *Insomnia*.

ZOE, *Life*.

ZOGRAPHIA, *Zoographia*.

ZOIATRIA, *Veterinary art*.

ZOIATRUS, *Hippiater*.

ZOMIDIUM, *Jus*.

ZOMOS, *Concomit.* *Jus*.

ZONA, *Herpes zoster* — *z. Castitatis*, *Hymen* — *z. Ciliaris*, *Ciliary zone* — *z. Ignea*, *Herpes zoster*.

ZONA PELLUCIDA, *Oleum pellucidum*, *Vitellary membrane*, (*F.*) *Vitelline*, *Membrana vitellina*. The membrane that surrounds the yolk in the mammalia is so called on account of its thickness and peculiar transparency.

ZONA SERRIGHOSA, *Herpes zoster* — *z. Virginitatis*, *Hymen*.

ZONA TENDINO'SA. The whitish circle around the auriculo-ventricular orifice of the right side of the heart.

ZONE, *Cingulum*.

ZONULA CILIARIS, see *Ciliary*, and *Ciliary zone* — *z. Cochleæ*, see *Lamina spiralis* — *z. Hildani*, *Cingulum Hildani* — *z. Zinnii*, see *Ciliary*.

ZOÛCHEMIA, *Chymistry*, *animal*.

ZOÛCHEMICAL, *Zoëchymical*, *Zoëchem'icæ* seu *Zoëchym'icæ*. Appertaining or having relation to animal chymistry.

ZOÛCHEMY, *Chymistry*, *animal*.

ZOÛCHYMY, *Chymistry*, *animal*.

ZOÛGENIUM, *Azota*.

ZOÛG'ENY, *Zoëgen'ia*, *Zoëgen'esis*, from ζωα, 'animal,' and γενεσις, 'generation.' The doctrine of animal formation.

ZOÛG'RAPHY, *Zoëgra'phia*, *Zogra'phia*, from ζωα, 'an animal,' and γραφω, 'a description.' A description of animals. The natural history of animals.

ZOÛHEMATINE, *Hæmatine*.

ZOÛHY'LAS, from ζωα, 'an animal,' and ἄλλω, 'matter.' *Animal matter*.

ZOÛHY'LICA CONCREMEN'TA. Concretions formed of animal matter.

ZOÛIASIS, *Veterinary art*.

ZOÛLOGIST, *Zoëlogi'ca*, *Zoëlogus*, from ζωα, 'an animal,' and λογος, 'description.' One skilled in the natural history of animals.

ZOÛLOGY, *Zoëlog'ia*. Same etymon. The natural history of animals.

ZOÛMAGNETISMUS, *Magnetism*, *animal*.

ZOÛMYCUS, *Mucus*.

ZOÛMYXA, *Mucus*.

ZOÛN, *Animal*.

ZOÛNOM'IA, *Organozônom'ia*, *Zoënom'ia*, from ζωα, 'an animal,' and νόμος, 'law.' The laws which govern the organic actions of animals in general. — *Animal Physiology*, *Zoëphysiolog'ia*.

ZONOSOLOG'IA, from ζῷον, 'an animal,' νοσος, 'a disease,' and λεγος, 'description.' The nosology of animals.

ZOOPATHOLOG'IA, from ζῷον, 'an animal,' παθος, 'a disease,' and λεγος, 'a description.' The pathology of animals.

ZOÖPH'AGOUS, *Zoöph'agus*, (F.) *Zoöphage*. from ζῷον, 'an animal,' and φάγω, 'I eat.' Feeding on animals. Carnivorous.

ZOÖPHTHALMUS, *Hydrophthalmia*.

ZOÖPHYSIOLOGIA, *Physiology*, animal, Zoonomia.

ZO'ÖPHYTE, *Zoöph'ytum*, *Phytozo'ön*, *Animal plant*, from ζῷον, 'an animal,' and φυτόν, 'a plant.' A name given to the lowest class of animals, which seem to form the transition between the animal and the vegetable kingdoms.

ZOÖSIS, *Animation*, *Zoagria*.

ZOÖSPERMATA, *Spermatozoa*.

ZOÖSPERMES, *Spermatozoa*.

ZOOTHAP'SIS, from ζῷον, 'life,' and θάρω, 'I inter.' Burial alive. Premature interment.

ZOOTOMIST, *Zootom'icus*. Same etymon as the next. One who dissects animals.

ZOOTOMY, *Zoötom'ia*, from ζῷον, 'an animal,' and τέμνω, 'I cut.' *Theriot'omy*, *Anatom'ia animalis* seu *comparati'va* seu *compara'ta*, *Comparative Anatomy*. The anatomy of animals. Animal anatomy.

ZOPISSA, see *Pinus sylvestris*.

ZOPYRON, *Fomites*.

ZOSTER, *Herpes zoster*.

ZOSTERA MARINA, *Pila marina* — z. *Maritima*, *Pila marina*.

ZOZAR, *Saccharum*.

ZUCARO, *Saccharum*.

ZUCCARUM, *Saccharum*.

ZUCHAR, *Saccharum*.

ZUCHARUM, *Saccharum*.

ZUCHRA, *Saccharum*.

ZULAPIUM, *Julep*.

ZYGAPOPHYSES, see *Vertebrae*.

ZYGOMA, *Mala os*.

ZYGMAT'IC, *Zygomat'icus*, *Juga'lis*, *Jugal*. That which relates to the *zygoma* or cheek-bone.

ZYGMATIC ARCH, see *Zygomat'ic process* — z. *Bone*, *Mala os*.

ZYGMATIC FOSSA is the space included between the posterior margin of the outer ala of the pterygoid process, and the crista which descends from the malar tuberosity to the superior alveolar margin.

ZYGMATIC MUSCLES are two in number. 1. *Zygomat'icus major*, *Distort'or Oris*, (F.) *Zygomato-labial* (Ch.), *Muscle grand zygomatique*, which is situate obliquely at the fore-part and sides of the face. It is a small, rounded muscle; arises from the outer surface of the os mala, and is inserted at the commissure of the lips, which it raises and draws outwards. It acts principally in laughing. 2. *Zygomat'icus minor*, (F.) *Petit Zygomato-labial* (Ch.), *Petit Zygomatique*, does not always exist. It is situate on the inner side of the last; arises from the outer surface of the os mala, and is inserted at the corner of the mouth, or rather into the upper lip, which it raises and draws outwards.

ZYGMATIC PROCESS, *Processus zygomat'icus*, *Apoph'ysie Zygomat'ica*, *Malar process*, *Jugal process*, arises from the outer surface of the temporal bone by two roots, one of which is transverse, (*Condyle du temporal*, Ch.) and the other longitudinal: between them is the glenoid cavity. The process passes forwards, and is articulated with the posterior angle of the os mala, with which it forms a bony bridge, called the *Zygomat'ic arch*, *Pars zygomat'icus*, *Arcus zygomat'icus*, (F.) *Arcade Zygomatique*. The cavity, beneath this bridge, is sometimes called *Zygo'ma*.

ZYGMATIC SUTURE is placed between the zygomatic parts of the temporal and cheek bones; and slants obliquely downwards and backwards.

ZYGMATIQUE GRAND, *Zygomat'icus major* — z. *Petit*, *Zygomat'icus minor*.

ZYGMATO-LABIAL, *Zygomat'icus major* — z. *Labial*, *petit*, *Zygomat'icus major* — z. *Maxillaire*, *Masseter* — z. *Oriculaire*, *Anterior auris*.

ZYGOPHYLLUM FAGABO, (F.) *Fabagelle*. A Syrian and Mauritanian plant, possessed of an acrid and bitter taste. It has vermifuge properties. The Arabs believe that the recently expressed juice of *Zygo'phyllum simplex*, is capable of removing specks from the cornea.

ZYMA, *Ferment*.

ZYMOMA, *Ferment*.

ZYMOSIS, *Fermentation*, see *Zymotic*.

ZYMOT'IC, *Zymot'icus*, from ζυμω, 'to ferment.' An epithet proposed for any epidemic, endemic, or contagious affection. *Zymo'is* is used to signify such an affection.

ZYTHOGALA, *Posset*.

ZYTHUM, *Cerevisia*.

ZYTHUS, *Cerevisia*.

CATALOGUE
OF
MEDICAL AND SURGICAL WORKS,

PUBLISHED BY

BLANCHARD & LEA,

PHILADELPHIA.

OCTOBER, 1851.

FOR SALE BY ALL BOOKSELLERS.

TO THE MEDICAL PROFESSION.

The Subscribers subjoin a list of their publications in medical and other sciences, to which they would invite the attention of the Profession, with the full confidence that they will be found to correspond in every respect with the description. They are to be had of all the principal booksellers throughout the Union, from whom, or from the publishers particulars respecting price, &c., may be had on application.

Philadelphia, May, 1851.

BLANCHARD & LEA,
(Late LEA & BLANCHARD.)

DICTIONARIES, JOURNALS, &c.

American Journal of the Medical Sciences, quarterly, at \$5 a year.
Cyclopaedia of Practical Medicine, by Forbes, Tweedie, &c., edited by Dunglison, in 4 super royal volumes, 3154 double columned pages.
Dunglison's Medical Dictionary, 7th ed., 1 vol. imp. 8vo., 912 large pages, double columns.
Hoblyn's Dictionary of Medical Terms, by Hays, 1 vol. large 12mo., 402 pages, double columns.
Neill and Smith's Compend of the Medical Sciences, 1 vol., large 12mo., 900 pp., 350 cuts.
Transactions of the American Medical Association, Vols. I, II, and III, cloth or paper.
Medical News and Library, monthly, at \$1 a year.

ANATOMY.

Anatomical Atlas, by Smith and Horner, large imp. 8vo., 660 figures. New and cheaper ed.
Horner's Special Anatomy and Histology, new edition, 2 vols. 8vo., many cuts, (nearly ready.)
Horner's United States Dissector, 1 vol. large royal 12mo., many cuts, 444 pages.
Madise's Surgical Anatomy, Parts I., II., III. and IV., 82 col'd pl's, imp. 4to. Price \$2 00 each. Part V., and last, price \$1 00, (now ready.)
Same work in 1 large imp. 4to. vol., ex. cl. or sheep.
Sharpey and Quain's Anatomy, by Leidy, 2 vols. 8vo., 1300 pages, 511 wood-cuts.
Wilson's Human Anatomy, by Goddard, 4th edition, 1 vol. 8vo., 252 wood-cuts, 680 pp.
Wilson's Dissector, by Goddard, New edition, with cuts, 1 vol. 12mo., 466 pages, (now ready.)

PHYSIOLOGY.

Carpenter's Principles of Human Physiology, 1 vol. 8vo., 752 pp., 300 cuts and 2 plates, 4th edition, much improved and enlarged. 1850.
Carpenter's Elements, or Manual of Physiology, new and improved edition, 1 vol. 8vo., (nearly ready.)
Carpenter's General and Comparative Physiology, 1 vol. 8vo., many cuts, (now ready.)
Dunglison's Human Physiology, 7th edition, 2 vols. 8vo., 1428 pages, and 472 wood-cuts.
Harrison on the Nerves, 1 vol. 8vo., 292 pages.
Kirkes and Paget's Physiology, 1 vol. 12mo., many cuts, 660 pages.
Longet's Physiology. Translated by F. G. Smith. 2 vols. 8vo., many cuts, (preparing.)
Matteucci on the Physical Phenomena of Living Beings, 1 vol. 12mo., 388 pp., cuts.
Solly on the Brain, 1 vol. 8vo., 496 pp., 118 cuts.
Todd and Bowman's Physiological Anatomy and Physiology of Man, with numerous wood-cuts. Parts I., II. and III., 1 vol. 8vo., 156 wood-cuts.

PATHOLOGY.

Abercrombie on the Brain, 1 vol. 8vo., 324 pp.
Blakiston on Diseases of the Chest, 1 vol., 384 pp.
Blood and Urine Manuals, by Reese, Griffith, Markwick, Bird, and Frick, 2 vols. 12mo., many cuts and plates.
Budd on the Liver, 1 vol. 8vo., 392 pages, plates and wood-cuts.
Burrows on Cerebral Circulation, 1 vol. 8vo., 216 pages, with 6 colored plates.
Billing's Principles, new and improved edition, 1 vol. 8vo., 250 pages, (just issued.)
Bird on Urinary Deposits, 12mo., new and improved edition, (just ready.)
Copland on Palsy and Apoplexy, 1 vol. 12mo., 236 pp.
Frick on Renal Affections, 1 vol. 12mo., cuts.
Hesse's Pathological Anatomy, 8vo., 370 pages.

Hope on the Heart, new ed., pl's, 1 vol. 8vo., 572 p.
Hughes on the Lungs, &c., 1 vol. 12mo., 270 pp.
Lallemand on Spermatorrhoea, 1 vol. 8vo., 200 pp.
Mitchell on Fevers, 1 vol. 12mo., 138 pages.
Philip on Protracted Indigestion, 8vo., 348 pp.
Philips on Scrofula, 1 vol. 8vo., 250 pages.
Ricord on Venereal, new ed., 1 vol. 8vo., 340 pp.
Stanley on Diseases of the Bones, 1 vol. 8vo., 286 pages.
Vögel's Pathological Anatomy of the Human Body, 1 vol. 8vo., 538 pages, col. plates.
Wilson on the Skin, 1 vol. 8vo., new ed., 448 pp.
Same work, with colored plates.
Whitehead on Sterility and Abortion, 1 vol. 8vo., 363 pages.
Williams' Principles of Medicine, by Clymer, 2d edition, 440 pages, 1 vol. 8vo.
Williams on the Respiratory Organs, by Clymer, 1 vol. 8vo., 500 pages.

PRACTICE OF MEDICINE.

Ashwell on Females, 2d ed., 1 vol. 8vo., 520 pp.
Barlow's Practice of Medicine, (preparing.)
Bennet on the Uterus, 2d and enlarged edition, 1 vol. 8vo., 556 pages.
Bartlett on Fevers, 2d edition, 550 pages.
Benedict's Compendium of Chapman's Lectures, 1 vol. 8vo., 256 pages.
Chapman on Fevers, Gout, Dropsy, &c. &c., 1 vol. 8vo., 450 pages.
Colombat de L'Isle on Females, by Meigs, 1 vol. 8vo., 720 pages, cuts. New edition.
Condie on the Diseases of Children, 2d edition, 1 vol. 8vo.
Churchill on the Diseases of Infancy and Childhood, 1 vol. 8vo.
Churchill on the Diseases of Females, by Huxton, 5th edition, revised by the author, 1 vol. 8vo., 632 pages.
Churchill's Monographs of the Diseases of Females, 1 vol. 8vo., now ready, 450 pages.
Clymer and others on Fevers, a complete work in 1 vol. 8vo., 600 pages.
Day on Old Age, 1 vol. 8vo., 236 pages.
Dewees on Children, 9th ed., 1 vol. 8vo., 548 pp.
Dewees on Females, 9th ed., 1 vol. 8vo., 532 p. pl.
Dunglison's Practice of Medicine, 2d edition, 2 vols. 8vo., 1500 pages.
Esquirol on Insanity, by Hunt, 8vo., 496 pages.
Meigs' Letters on Diseases of Females, 1 vol. 8vo., 690 pp., 2d ed., improved, (lately issued.)
Meigs on Certain Diseases of Infancy, 1 vol. 8vo., 216 pp., (a new work.)
Thomson on the Sick Room, &c., 1 vol. large 12mo., 360 pages, cuts.
Watson's Principles and Practice of Physic, 2d edition by Condie, 1 vol. 8vo., 1060 large pages.
West's Lectures on the Diseases of Infancy and Childhood. 1 vol. 8vo., 452 pp.
Walsh on the Heart and Lungs. A new work, just ready, 1 vol. royal 12mo. ex. cloth.

SURGERY.

Brodie on Urinary Organs, 1 vol. 8vo., 214 pages.
Brodie on the Joints, 1 vol. 8vo., 216 pages.
Brodie's Lectures on Surgery, 1 vol. 8vo., 358 pp.
Brodie's Select Surgical Works, 780 pp. 1 vol. 8vo.
Chelius' System of Surgery, by South and Norris, in 3 large 8vo. vols., near 2300 pages.
Cooper on Dislocations and Fractures, 1 vol. 8vo., 500 pages, many cuts.
Cooper on Hernia, 1 vol. imp. 8vo., many plates.
Cooper on the Testis and Thyroid Gland, 1 vol. imperial 8vo., many plates.

Cooper on the Anatomy and Diseases of the Breast. Surgical Papers, &c. &c., 1 vol. imp. 8vo., pl'ts.
 Druitt's Principles and Practice of Modern Surgery; 1 vol. 8vo., 876 pages, 193 cuts, 4th ed.
 Dufton on Deafness and Diseases of the Ear, 1 vol. 12mo., 120 pages.

Durlacher on Corns, Bunions, &c., 12mo., 124 pp.
 Ear, Diseases of, a new work, (preparing.)
 Fergusson's Practical Surgery, 1 vol. 8vo., 3d edition, 630 pages, 274 cuts.

Guthrie on the Bladder, 8vo., 150 pages.
 Gross on Injuries and Diseases of Urinary Organs, 1 lrg. vol. 8vo., 726 pp. many cuts, (now ready.)
 Jones' Ophthalmic Medicine and Surgery, by Hays, 1 vol. 12mo., 529 pp., cuts and plates.
 Liston's Lectures on Surgery, by Mütter, 1 vol. 8vo., 566 pages, many cuts.

Lawrence on the Eye, by Hays, new ed. much improved, 863 pp., many cuts and plates.
 Lawrence on Ruptures, 1 vol. 8vo., 480 pages.
 Miller's Principles of Surgery, 2d edition, 1 vol. 8vo., 538 pp., 1848.

Miller's Practice of Surgery, 1 vol. 8vo., 496 pp.
 Malgaigne's Operative Surgery, by Brittan, with cuts. (Publishing in the Med. News and Lib.)
 Maury's Dental Surgery, 1 vol. 8vo., 286 pages, many plates and cuts.

Skey's Operative Surgery, 1 vol. large 8vo., many cuts, 662 pages, a new work, (just issued.)
 Sargent's Minor Surgery, 1 vol. royal 12mo., 380 pages, 128 cuts.

Smith on Fractures, 1 vol. 8vo., 200 cuts, 314 pp.

MATERIA MEDICA AND THERAPEUTICS.

Bird's (Golding) Therapeutics, (preparing.)
 Christison's and Griffith's Dispensatory, 1 large vol. 8vo., 216 cuts, over 1000 pages.
 Carpenter on Alcoholic Liquors in Health and Disease, 1 vol. 12mo.

Dunglison's Materia Medica and Therapeutics, now ready, 4th ed., much improved, 182 cuts, 2 vols. 8vo., 1850.

Dunglison on New Remedies, 6th ed., much improved, 1 vol. 8vo., 760 pages.

De Jongh on Cod-Liver Oil, 12mo.

Ellis' Medical Formulary, 9th ed., much improved, 1 vol. 8vo., 288 pages.

Griffith's Universal Formulary, 1 large vol. 8vo., 560 pages.

Griffith's Medical Botany, a new work, 1 large vol. 8vo., 704 pp., with over 350 illustrations.

Mayne's Dispensatory, 1 vol. 12mo., 330 pages.

Mohr, Red wood, and Procter's Pharmacy, 1 vol. 8vo., 550 pages, 506 cuts.

Pereira's Materia Medica, by Canon, 2d ed., 2 vols. 8vo., much improved and enlarged, with 400 wood cuts, (nearly ready.)

Royle's Materia Medica and Therapeutics, by Carson, 1 vol. 8vo., 689 pages, many cuts.

OBSTETRICS.

Churchill's Theory and Practice of Midwifery, a new and improved ed., by Condie, 1 vol. 8vo., 510 pp., many cuts, (now ready.)

Dewees' Midwifery, 11th ed., 1 vol. 8vo., 660 pp., plates.

Lee's Clinical Midwifery, 12mo., 238 pages.

Meigs' Obstetrics; the Science and the Art; 1 vol. 8vo., 686 pages, 121 cuts.

Ramsbotham on Parturition, with many plates, 1 large vol. imperial 8vo., 520 pp. 5th edition.

Rigby's Midwifery, new edition, 1 vol. 8vo., (just issued,) 422 pages.

Smith (Tyler) on Parturition, 1 vol. 12mo., 400 pp.

CHEMISTRY AND HYGIENE.

Bowman's Practical Chemistry, 1 vol. 12mo., 87 cuts, 350 pages.

Beale on Health of Mind and Body, 1 vol. 12mo., extra cloth, (now ready.)

Brigham on Excitement, &c., 1 vol. 12mo., 204 pp.

Bowman's Medical Chemistry, 1 vol. 12mo., many cuts, just ready, 288 pages.

Dunglison on Human Health, 2d ed., 8vo., 464 pp.

Fowne's Elementary Chemistry, 3d ed., 1 vol. 12mo., much improved, many cuts, now ready.

Graham's Chemistry, by Bridges, new and improved edition. Part 1, (in press.)

Gardner's Medical Chemistry, 1 vol. 12mo., 400 pp.

Griffith's Chemistry of the Four Seasons, 1 vol. royal 12mo., 451 pages, many cuts.

Knapp's Chemical Technology, by Johnson, 2 vols. 8vo., 936 pp., 460 large cuts.

Simon's Chemistry of Man, 8vo., 730 pp., plates.

MEDICAL JURISPRUDENCE, EDUCATION, &c.
 Bartlett's Philosophy of Medicine, 1 vol. 8vo., 312 pages.

Bartlett on Certainty in Medicine, 1 vol. small 8vo., 84 pages.

Dunglison's Medical Student, 2d ed. 12mo., 312 pp.

Taylor's Medical Jurisprudence, by Griffith, 1 vol. 8vo., new edition, 1850, 670 pp.

Taylor on Poisons, by Griffith, 1 vol. 8vo., 688 pp.

Trall's Medical Jurisprudence, 1 vol. 8vo., 234 pp.

NATURAL SCIENCE, &c.

Arnott's Physics, 1 vol. 8vo., 484 pp., many cuts.

Ansted's Ancient World, Popular Geography, in 1 12mo. volume, with numerous cuts, 382 pages.

Bird's Natural Philosophy, 1 vol. royal 12mo., 402 pages and 372 wood-cuts.

Brewster's Optics, 1 vol. 12mo. 423 pp. many cuts.

Broderip's Zoological Recreations, 1 vol. 12mo., 376 pp.

Coleridge's Idea of Life, 12mo., 94 pages.

Carpenter's General and Comparative Physiology, 1 large 8vo. vol., many wood-cuts, (now ready.)

Dana on Zoophytes, being vol. 8 of Ex. Expedition, royal 4to., extra cloth.

Atlas to "Dana on Zoophytes," im. fol., col. pl'ts.

Gregory on Animal Magnetism, 1 vol., royal 12mo., (now ready.)

De la Beche's Geological Observer, 1 large 8vo. vol., many wood-cuts, (just ready.)

Hale's Ethnography and Philology of the U. S. Exploring Expedition, in 1 large imp. 4to. vol.

Merschel's Treatise on Astronomy, 1 vol. 12mo., 417 pages, numerous plates and cuts.

Herschel's Outlines of Astronomy, 1 vol. small 8vo., plates and cuts. (A new work.) 620 pp.

Humboldt's Aspects of Nature, 1 vol. 12mo., new edition.

Johnston's Physical Atlas, 1 vol. imp. 4to., half bound, 25 colored maps.

Kirby and Spence's Entomology, 1 vol. 8vo., 600 large pages; plates plain or colored.

Knox on Races of Men, 1 vol. 12mo.

Lardner's Handbooks of Natural Philosophy, 2 vols. royal 12mo., with 800 cuts, (in press.)

Müller's Physics and Meteorology, 1 vol. 8vo., 636 pp., with 540 wood-cuts and 2 col'd plates.

Small Books on Great Subjects, 12 parts, done up in 3 handsome 12mo. volumes, extra cloth.

Somerville's Physical Geography, 1 vol. 12mo., cloth, 540 pages, enlarged edition, now ready.

Weisbach's Mechanics applied to Machinery and Engineering; Vol. I. 8vo., 486 p. 550 wood-cuts. Vol. II., 8vo., 400 pp., 340 cuts.

VETERINARY MEDICINE.

Clater and Skinner's Farrier, 1 vol. 12mo., 220 pp.

Youatt's Great Work on the Horse, by Skinner, 1 vol. 8vo., 448 pages, many cuts.

Youatt and Clater's Cattle Doctor, 1 vol. 12mo., 223 pages, cuts.

Youatt on the Dog, by Lewis, 1 vol. demy 8vo., 403 pages, beautiful plates.

Youatt on the Pig, a new work, with beautiful illustrations of all the different varieties, 12mo.

Other new and important works are in preparation.

LIBRARY OF SURGICAL KNOWLEDGE.

A SYSTEM OF SURGERY.

BY J. M. CHELIUS.

TRANSLATED FROM THE GERMAN,
AND ACCOMPANIED WITH ADDITIONAL NOTES AND REFERENCES,
BY JOHN F. SOUTH.

Complete in three very large octavo volumes of nearly 2200 pages, strongly bound, with raised bands and double titles: or in seventeen numbers, at fifty cents each.

We do not hesitate to pronounce it the best and most comprehensive system of modern surgery with which we are acquainted.—*Medico-Chirurgical Review*.The fullest and ablest digest extant of all that relates to the present advanced state of Surgical Pathology.—*American Medical Journal*.If we were confined to a single work on Surgery, that work should be Chelius's.—*St. Louis Med. Journal*.As complete as any system of Surgery can well be.—*Southern Medical and Surgical Journal*.The most finished system of Surgery in the English language.—*Western Lancet*.The most learned and complete systematic treatise now extant.—*Edinburgh Medical Journal*.No work in the English language comprises so large an amount of information relative to operative medicine and surgical pathology.—*Medical Gazette*.A complete encyclopedia of surgical science—a very complete surgical library—by far the most complete and scientific system of surgery in the English language.—*N. Y. Journal of Medicine*.One of the most complete treatises on Surgery in the English language.—*Monthly Journal of Med. Science*.The most extensive and comprehensive account of the art and science of Surgery in our language.—*Lancet*.**A TREATISE ON THE DISEASES OF THE EYE.**

BY W. LAWRENCE, F. R. S.

A new Edition. With many Modifications and Additions, and the introduction of nearly 200 Illustrations,

BY ISAAC HAYS, M. D.

In one very large 8vo. vol. of 660 pages, with plates and wood-cuts through the text.

JONES ON THE EYE.**THE PRINCIPLES AND PRACTICE
OF OPHTHALMIC MEDICINE AND SURGERY.**

BY T. WHARTON JONES, F. R. S., &c. &c.

EDITED BY ISAAC HAYS, M. D., &c.

In one very neat volume, large royal 12mo. of 529 pages, with four plates, plain or colored, and ninety-eight well executed wood-cuts.

MILLER'S PRINCIPLES AND PRACTICE OF SURGERY.

THE PRINCIPLES OF SURGERY.

Second edition, one vol. 8vo.

THE PRACTICE OF SURGERY.

Second edition, one vol. 8vo.

BY JAMES MILLER, F. R. S. E.,

Professor of Surgery in the University of Edinburgh, &c.

STANLEY ON THE BONES.—A Treatise on Diseases of the Bones. In one vol. 8vo., extra cloth. 266 pp.**BRODIE'S SURGICAL LECTURES.**—Clinical Lectures on Surgery. 1 vol. 8vo., cloth. 350 pp.**BRODIE ON THE JOINTS.**—Pathological and Surgical Observations on the Diseases of the Joints. 1 vol.

8vo., cloth. 216 pp.

BRODIE ON URINARY ORGANS.—Lectures on the Diseases of the Urinary Organs. 1 vol. 8vo., cloth.

314 pp.

* * * These three works may be had neatly bound together, forming a large volume of "Brodie's Surgical Works," 750 pp.

RICORD ON VENEREAL.—A Practical Treatise on Venereal Diseases. With a Therapeutical Summary and Special Formulary. Translated by Sidney Doane, M. D. Fourth edition. 1 vol. 8vo. 340 pp.**DURLACHER ON CORNS, BUNIONS, &c.**—A Treatise on Corns, Bunions, the Diseases of Nails, and the General Management of the Feet. In one 12mo. volume, cloth. 134 pp.**GUTHRIE ON THE BLADDER, &c.**—The Anatomy of the Bladder and Urethra, and the Treatment of the Obstructions to which those Passages are liable. In one vol. 8vo. 150 pp.**LAWRENCE ON RUPTURES.**—A Treatise on Ruptures, from the fifth London Edition. In one 8vo. vol. 480 pp.**MAURYS DENTAL SURGERY.**—A Treatise on the Dental Art, founded on Actual Experience. Illustrated by 241 lithographic figures and 54 wood-cuts. Translated by J. B. Savier. In 1 8vo. vol., sheep. 266 pp.**DUFTON ON THE EAR.**—The Nature and Treatment of Deafness and Diseases of the Ear; and the Treatment of the Deaf and Dumb. One small 12mo. volume. 120 pp.**MALGAIGNE'S SURGERY.**—Operative Surgery, translated, with Notes, by Briutan. With wood-cuts. (Now publishing in the "Medical News and Library.")**SMITH ON FRACTURES.**—A Treatise on Fractures in the vicinity of Joints, and on Dislocations. One vol. 8vo., with 300 beautiful wood-cuts.

NEW AND IMPORTANT WORK ON PRACTICAL SURGERY.—(NOW READY.)

OPERATIVE SURGERY.

BY FREDERICK C. SKEY, F. R. S., &c.

In one very handsome octavo volume of over 650 pages, with about one hundred wood-cuts.

The object of the author, in the preparation of this work, has been not merely to furnish the student with a guide to the actual processes of operation, embracing the practical rules required to justify an appeal to the knife, but also to present a manual embodying such *principles* as might render it a permanent work of reference to the practitioner of operative surgery, who seeks to uphold the character of his profession as a science as well as an art. In its composition he has relied mainly on his own experience, acquired during many years' service at one of the largest of the London hospitals, and has rarely appealed to other authorities, except so far as personal intercourse and a general acquaintance with the most eminent members of the surgical profession have induced him to quote their opinions.

From Professor C. E. Gibson, Richmond, Virginia.

I have examined the work with some care, and am delighted with it. The style is admirable, the matter excellent, and much of it original and deeply interesting, whilst the illustrations are numerous and beautifully executed than those of any similar work I possess.

In conclusion we must express our unqualified praise of the work as a whole. The high moral tone, the liberal views, and the sound information which pervades it throughout, reflect the highest credit upon the talented author. We know of no one who has succeeded, whilst supporting operative surgery in its proper rank, in promulgating at the same time sounder and more enlightened views upon that most important of all subjects, the principle that should guide us in having recourse to the knife.—*Medical Times.*

The treatise is, indeed, one on operative surgery, but it is one in which the author throughout shows that he is most anxious to place operative surgery in its just position. He has acted as a judicious, but no partial friend; and while he shows throughout that he is able and ready to perform any operation which the exigencies and casualties of the human frame may require, he is most cautious in specifying the circumstances which in each case indicate and contraindicate operation. It is indeed gratifying to perceive its sound and correct views which Mr. Skey entertains on the subject of operations in general, and the gentle but manly tone in which he impresses on readers the lessons which he is desirous to inculcate. His work is a perfect model for the operating surgeon, who will learn from it not only when and how to operate, but some more noble and exalted lessons which cannot fail to improve him as a moral and social agent.—*Edinburgh Medical and Surgical Journal.*

THE STUDENT'S TEXT-BOOK.

THE PRINCIPLES AND PRACTICE OF MODERN SURGERY.

BY ROBERT DRUITT, Fellow of the Royal College of Surgeons.

A New American, from the last and improved London Edition.

EDITED BY F. W. SARGENT, M. D., Author of "Minor Surgery," &c.

ILLUSTRATED WITH ONE HUNDRED AND NINETY-THREE WOOD ENGRAVINGS.

In one very handsomely printed octavo volume of 576 large pages.

From Professor Brainard, of Chicago, Illinois.

I think it the best work of its size, on that subject, in the language.

From Professor Rivers, of Providence, Rhode Island.

I have been acquainted with it since its first republication in this country, and the universal praise it has received I think well merited.

From Professor May, of Washington, D. C.

Permit me to express my satisfaction at the republication in so improved a form of this most valuable work. I believe it to be one of the very best text-books ever issued.

From Professor McCook, of Baltimore.

I cannot withhold my approval of its merits, or the expression that no work is better suited to the wants of the student. I shall commend it to my class, and make it my chief text-book.

FERGUSON'S OPERATIVE SURGERY. NEW EDITION.

A SYSTEM OF PRACTICAL SURGERY.

BY WILLIAM FERGUSSON, F. R. S. E.,

Professor of Surgery in King's College, London. &c. &c.

THIRD AMERICAN, FROM THE LAST ENGLISH EDITION.

With 274 Illustrations.

In one large and beautifully printed octavo volume of six hundred and thirty pages.

It is with unfeigned satisfaction that we call the attention of the profession in this country to this excellent work. It richly deserves the reputation conceded to it, of being the best practical Surgery extant, at least in the English language.—*Medical Examiner.*

A NEW MINOR SURGERY.

ON BANDAGING AND OTHER POINTS OF MINOR SURGERY.

BY F. W. SARGENT, M. D.

In one handsome royal 12mo. volume of nearly 400 pages, with 128 wood-cuts.

From Professor Gilbert, Philadelphia.

Embracing the smaller details of surgery, which are illustrated by very accurate engravings, the work becomes one of very great importance to the practitioner in the performance of his daily duties, since such information is rarely found in the general works on surgery now in use.

BLANCHARD & LEA'S PUBLICATIONS.—(Surgery.)

THE GREAT ATLAS OF SURGICAL ANATOMY.
(NOW COMPLETE.)

SURGICAL ANATOMY.

BY JOSEPH MACLISE, SURGEON.

IN ONE VOLUME, IN VERY LARGE IMPERIAL QUARTO.

With Sixty-eight large and splendid Plates, many of them the size of life,
DRAWN IN THE BEST STYLE AND BEAUTIFULLY COLORED.

TOGETHER WITH OVER ONE HUNDRED AND FIFTY LARGE DOUBLE-COLUMNED PAGES.

Strongly and handsomely bound, being one of the best executed and cheapest surgical works ever presented in this country.

ALSO, TO BE HAD IN PARTS,
Parts I. to IV., price Two Dollars each—Part V., One Dollar.

This great work being now complete, the publishers confidently present it to the attention of the profession as worthy in every respect of their approbation and patronage. No complete work of the kind has yet been published in the English language, and it therefore will supply a want long felt in this country of an accurate and comprehensive Atlas of Surgical Anatomy to which the student and practitioner can at all times refer, to ascertain the exact relative position of the various portions of the human frame towards each other and to the surface, as well as their abnormal deviations. The importance of such a work to the student in the absence of anatomical material, and to the practitioner when about attempting an operation, is evident, while the price of the book, notwithstanding the large size, beauty, and finish of the very numerous illustrations is so low as to place it within the reach of every member of the profession. The publishers therefore confidently anticipate a very extended circulation for this magnificent work.

To present some idea of the scope of the volume, and of the manner in which its plan has been carried out, the publishers subjoin a very brief summary of the plates.

Plates 1 and 2.—Form of the Thoracic Cavity and Position of the Lungs, Heart, and larger Blood-vessels.

Plates 3 and 4.—Surgical Form of the Superficial Cervical and Facial Regions, and the Relative Positions of the principal Blood-vessels, Nerves, &c.

Plates 5 and 6.—Surgical Form of the Deep Cervical and Facial Regions, and Relative Positions of the principal Blood-vessels, Nerves, &c.

Plates 7 and 8.—Surgical Dissection of the Subclavian and Carotid Regions, and Relative Anatomy of their Contents.

Plates 9 and 10.—Surgical Dissection of the Sterno-Clavicular or Tracheal Region, and Relative Position of its main Blood-vessels, Nerves, &c.

Plates 11 and 12.—Surgical Dissection of the Axillary and Brachial Regions, displaying the Relative Order of their contained parts.

Plates 13 and 14.—Surgical Form of the Male and Female Axillæ compared.

Plates 15 and 16.—Surgical Dissection of the Bend of the Elbow and the Forearm, showing the Relative Position of the Arteries, Veins, Nerves, &c.

Plates 17, 18 and 19.—Surgical Dissections of the Wrist and Hand.

Plates 20 and 21.—Relative Position of the Cranial, Nasal, Oral, and Pharyngeal Cavities, &c.

Plate 22.—Relative Position of the Superficial Organs of the Thorax and Abdomen.

Plate 23.—Relative Position of the Deeper Organs of the Thorax and those of the Abdomen.

Plate 24.—Relations of the Principal Blood-vessels to the Viscera of the Thoracic-Abdominal Cavity.

Plate 25.—Relations of the Principal Blood-vessels of the Thorax and Abdomen to the Osseous Skeleton, &c.

Plate 26.—Relation of the Internal Parts to the External Surface of the Body.

Plate 27.—Surgical Dissection of the Principal Blood-vessels, &c., of the Inguino-Femoral Region.

Plates 28 and 29.—Surgical Dissection of the First, Second, Third, and Fourth Layers of the Inguinal Region, in connection with those of the Thigh.

Plates 30 and 31.—The Surgical Dissection of the Fifth, Sixth, Seventh and Eighth Layers of the Inguinal Region, and their connection with those of the Thigh.

Plates 32, 33 and 34.—The Dissection of the Oblique or External and the Direct or Internal Inguinal Hernia.

Plates 35, 36, 37 and 38.—The Distinctive Diagnosis between External and Internal Inguinal Hernia, the Taxis, the Seat of Stricture, and the Operation.

Plates 39 and 40.—Demonstrations of the Nature of Congenital and Infantile Inguinal Hernia, and of Hydrocele.

Plates 41 and 42.—Demonstrations of the Origin and Progress of Inguinal Hernia in general.

Plates 43 and 44.—The Dissection of Femoral Hernia, and the Seat of Stricture.

Plates 45 and 46.—Demonstrations of the Origin and Progress of Femoral Hernia, its Diagnosis, the Taxis, and the Operation.

Plate 47.—The Surgical Dissection of the principal Blood-vessels and Nerves of the Iliac and Femoral Regions.

Plates 48 and 49.—The Relative Anatomy of the Male Pelvic Organs.

Plates 50 and 51.—The Surgical Dissection of the Superficial Structures of the Male Perineum.

Plates 52 and 53.—The Surgical Dissection of the Deep Structures of the Male Perineum.—The Lateral Operation of Lithotomy.

MACLISE'S SURGICAL ANATOMY—(Continued.)

Plates 54, 55 and 56.—The Surgical Dissection of the Male Bladder and Urethra.—Lateral & Bilateral Lithotomy compared.

Plates 57 and 58.—Congenital and Pathological Deformities of the Prepuce and Urethra.—Structure and Mechanical Obstructions of the Urethra.

Plates 59 and 60.—The various forms and positions of Strictures and other Obstructions of Urethra.—False Passages.—Enlargements and Deformities of the Prostate.

Plates 61 and 62.—Deformities of the Prostate.—Deformities and Obstructions of the Prostate Urethra.

Plates 63 and 64.—Deformities of the Urinary Bladder.—The Operations of Sounding for Stricture Catheterism, and of Puncturing the Bladder above the Pubes.

Plates 65 and 66.—The Surgical Dissection of the Popliteal Space, and the Posterior Crural Region.

Plates 67 and 68.—The Surgical Dissection of the Anterior Crural Region, the Ankles, and the Feet.

Notwithstanding the short time in which this work has been before the profession, it has received the unanimous approbation of all who have examined it. Filled among a very large number of commendatory notices with which they have been favored, the publishers select the following:—

From Prof. Kimball, Pittsfield, Mass.

I have examined these numbers with the greatest satisfaction, and feel bound to say that they are together, the most perfect and satisfactory plates of the kind that I have ever seen.

From Prof. Brainard, Chicago, Ill.

The work is extremely well adapted to the use both of students and practitioners, being sufficiently extensive for practical purposes, without being so expensive as to place it beyond their reach. Such a work is a desideratum in this country, and I shall not fail to recommend it to those within the sphere of my acquaintance.

From Prof. P. F. Ece, Augusta, Ga.

I consider this work a great acquisition to my library, and shall take pleasure in recommending it on suitable occasions.

From Prof. Peaslee, Brunswick, Me.

The second part more than fulfils the promise held out by the first, so far as the beauty of the illustrations is concerned: and, perfecting my opinion of the value of the work, so far as it has advanced, I have nothing to what I have previously expressed to you.

From Prof. Gunn, Ann Arbor, Mich.

The plates in your edition of Maclise answer, in an eminent degree, the purpose for which they are intended. I shall take pleasure in exhibiting it and recommending it to my class.

From Prof. Rivers, Providence, R. I.

The plates illustrative of Hernia are the most satisfactory I have ever met with.

From Professor S. D. Gross, Louisville, Ky.

The work, as far as it has progressed, is most admirable, and cannot fail, when completed, to form a valuable contribution to the literature of our profession. It will afford me great pleasure to recommend the pupils of the University of Louisville.

From Professor R. L. Howard, Columbus, Ohio.

In all respects, the first number is the beginning of a most excellent work, filling completely what has been considered hitherto a vacuum in surgical literature. For myself, in behalf of the medical profession, I wish to express to you my thanks for this truly elegant and meritorious work. I am confident that it will meet with a ready and extensive sale. I have spoken of it in the highest terms to my class and my professional brethren.

From Prof. C. B. Gibson, Richmond, Va.

I consider Maclise very far superior, as to the drawings, to any work on Surgical Anatomy with which I am familiar, and I am particularly struck with the exceedingly low price at which it is sold. I cannot but think that it will be extensively purchased by the profession.

From Prof. Granville S. Pattison, New York.

The profession, in my opinion, owe you many thanks for the publication of this beautiful work—a work which, in the correctness of its exhibitions of Surgical Anatomy, is not surpassed by any work with which I am acquainted; and the admirable manner in which the lithographic plates have been executed and colored is alike honorable to your house and to the arts in the United States.

From Prof. J. F. May, Washington, D. C.

Having examined the work, I am pleased to add my testimony to its correctness, and to its value as a work of reference by the surgeon.

From Prof. Alden Marsh, Albany, N. Y.

From what I have seen of it, I think the design and execution of the work admirable, and, at the present time in my course of lectures, I shall exhibit it to the class, and give it a recommendation worthy of its merit.

From H. H. Smith, M. D., Philadelphia.

Permit me to express my gratification at the execution of Maclise's Surgical Anatomy. The plates, in my opinion, the best lithographs that I have seen of a medical character, and the coloring of the same cannot, I think, be improved. Estimating highly the contents of this work, I shall continue to recommend it to my class as I have heretofore done.

From Prof. D. Gilbert, Philadelphia.

Allow me to say, gentlemen, that the thanks of the profession at large, in this country, are due to you for the republication of this admirable work of Maclise. The precise relationship of the organs in the body displayed is so perfect, that even those who have daily access to the dissecting-room may, by consulting this work, enliven and confirm their anatomical knowledge prior to an operation. But this is not the case of practitioners of our country who cannot enjoy these advantages that the perusal of those plates, their concise and accurate descriptions, will prove of infinite value. These have supplied a desideratum which will enable them to refresh their knowledge of the important structures involved in their cases, thus establishing their self-confidence, and enabling them to undertake operative procedures with every assurance of success. And as all the practical departments in medicine rest upon the same basis, enriched from the same sources, I need hardly add that this work should be found in the library of every practitioner in the land.

MACLISE'S SURGICAL ANATOMY—(Continued.)

From Professor J. M. Bush, Lexington, Ky.

I am delighted with both the plan and execution of the work, and shall take all occasions to recommend it to my private pupils and public classes.

The most accurately engraved and beautifully colored plates we have ever seen in an American book— one of the best and cheapest surgical works ever published.— *Buffalo Medical Journal*.

It is very rare that so elegantly printed, so well illustrated, and so useful a work, is offered at so moderate a price.— *Charleston Medical Journal*.

A work which cannot but please the most fastidious lover of surgical science, and we hesitate not to say that if the remaining three numbers of this work are in keeping with the present, it cannot fail to give universal satisfaction. In it, by a succession of plates, are brought to view the relative anatomy of the parts included in the important surgical divisions of the human body, with that fidelity and neatness of touch which is scarcely excelled by nature herself. The part before us differs in many respects from anything of the kind which we have ever seen before. While we believe that nothing but an extensive circulation can compensate the publishers for the outlay in the production of this edition of the work—furnished as it is at a very moderate price, within the reach of all—we desire to see it have that circulation which the zeal and peculiar skill of the author (he being his own draughtsman), the utility of the work, and the neat style with which it is executed, should demand for it in a liberal profession.— *N. Y. Journal of Medicine*.

This is an admirable reprint of a deservedly popular London publication. Its English prototype, although not yet completed, has already won its way, amongst our British brethren, to a remarkable success. Its plates can boast a superiority that places them almost beyond the reach of competition. And we feel too thankful to the Philadelphia publishers for their very handsome reproduction of the whole work, and at a rate within everybody's reach, not to urge all our medical friends to give it, for their own sakes, the cordial welcome it deserves, in a speedy and extensive circulation.— *The Medical Examiner*.

The plates are accompanied by references and explanations, and when the whole has been published it will be a complete and beautiful system of Surgical Anatomy, having an advantage which is important, and not possessed by colored plates generally, viz. its cheapness, which places it within the reach of every one who may feel disposed to possess the work. Every practitioner, we think, should have a work of this kind within reach, as there are many operations requiring immediate performance in which a book of reference will prove most valuable.— *Southern Medical and Surg. Journal*.

The work of MacLise's Surgical Anatomy is of the highest value. In some respects it is the best publication of its kind we have seen, and is worthy of a place in the library of any medical man, while the student could scarcely make a better investment than this.— *The Western Journal of Medicine and Surgery*.

No such lithographic illustrations of surgical regions have hitherto, we think, been given. While the operator is shown every vessel and nerve where an operation is contemplated, the exact anatomist is refreshed by those clear and distinct dissections which every one must appreciate who has a particle of enthusiasm. The English medical press has quite exhausted the words of praise in recommending this admirable treatise. Those who have any curiosity gratify in reference to the perfectibility of the lithographic art in delineating the complex mechanism of the human body, are invited to examine our specimen copy. If anything will induce surgeons and students to patronize a book of such rare value and every-day importance to them, it will be a survey of the artistical skill exhibited in these fac-similes of nature.— *Boston Medical and Surg. Journal*.

The fidelity and accuracy of the plates reflect the highest credit upon the anatomical knowledge of Mr. MacLise. We strongly recommend the descriptive commentaries to the perusal of the student both of surgery and medicine. These plates will form a valuable acquisition to practitioners settled in the country, whether engaged in surgical, medical, or general practice.— *Edinburgh Medical and Surgical Journal*.

We are well assured that there are none of the cheaper, and but few of the more expensive works on anatomy, which will form so complete a guide to the student or practitioner as these plates. To practitioners, in particular, we recommend this work as far better, and not at all more expensive, than the heterogeneous compilations most commonly in use, and which, whatever their value to the student preparing for examination, are as likely to mislead as to guide the physician in physical examination, or the surgeon in the performance of an operation.— *Monthly Journal of Medical Sciences*.

The dissections from which these various illustrations are taken appear to have been made with remarkable success; and they are most beautifully represented. The surgical commentary is pointed and practical. We know of no work on surgical anatomy which can compete with it.— *Lancet*.

This is by far the ablest work on Surgical Anatomy that has come under our observation. We know of no other work that would justify a student, in any degree, for neglect of actual dissection. A careful study of these plates, and of the commentaries on them, would almost make an anatomist of a diligent student. And to one who has studied anatomy by dissection, this work is invaluable as a perpetual remembrancer. In matters of knowledge that may slip from the memory, the practitioner can scarcely consider himself equipped for the duties of his profession without such a work as this, and this has no rival in his library. In those sudden emergencies that so often arise, and which require the instantaneous command of minute anatomical knowledge, a work of this kind keeps the details of the dissecting-room perpetually fresh in the memory. We appeal to our readers, whether any one can justifiably undertake the practice of medicine who is not prepared to give all useful assistance, in all matters demanding immediate relief.

We repeat that no medical library, however large, can be complete without MacLise's Surgical Anatomy. The American edition is well entitled to the confidence of the profession, and should command, among them, an extensive sale. The investment of the amount of the cost of this work will prove to be a very profitable one, and if practitioners would qualify themselves thoroughly with such important knowledge as is contained in works of this kind, there would be fewer of them signing for employment. The medical profession should spring towards such an opportunity as is presented in this republication, to encourage frequent repetitions of American enterprise of this kind.— *The Western Journal of Medicine and Surgery*.

It is a wonderful triumph, showing what ingenuity, skill, and enterprise can effect if supported by a sufficient number of purchasers. No catchpenny sketches on flimsy material and with bad print, but substantial lithographs on fine paper and with a bold and legible type. The drawings are of the first class, and the light and shade so liberally provided for, that the most ample expression, with great clearness and sharpness of outline, is secured.— *Dublin Medical Press*.

Our hearty good wishes attend this work, which promises to supply, when complete, a far better series of delineations of surgical regions than has been yet given and at a price as low as that of the most ordinary series of illustrations.— *The British and Foreign Medical-Chirurgical Review*.

The plates continue to be of the same excellent character that we have before ascribed to them, and their description all that might naturally be expected from so good an anatomist as Mr. MacLise. The work ought to be in the possession of every one, for it really forms a valuable addition to a surgical library.— *The Medical Times*.

It is, and it must be unique, for the practical knowledge of the surgeon, the patience and skill of the dissector, in combination with the genius of the artist, as here displayed, have never before been, and perhaps, never will be again associated to a similar extent in the same individual.— *Lancet*.

The plates are accurate and truthful; and there is but one word in the English language descriptive of the letter-press—faultless.

For the quality, it is the cheapest work that we have seen, and will constitute a valuable contribution to the surgeon's library.— *The N. W. Medical and Surgical Journal*.

HORNER'S ANATOMY.*MUCH IMPROVED AND ENLARGED EDITION.—(Just Ready.)***SPECIAL ANATOMY AND HISTOLOGY.**

BY WILLIAM E. HORNER, M. D.,

Professor of Anatomy in the University of Pennsylvania, &c.

EIGHTH EDITION.

EXTENSIVELY REVISED AND MODIFIED TO 1851.

In two large octavo volumes, handsomely printed, with several hundred illustrations.

This work has enjoyed a thorough and laborious revision on the part of the author, with the view of bringing it fully up to the existing state of knowledge on the subject of general and special anatomy. To adapt it more perfectly to the wants of the student, he has introduced a large number of additional wood engravings, illustrative of the objects described, while the publishers have endeavored to render the mechanical execution of the work worthy of the extended reputation which it has acquired. The demand which has carried it to an EIGHTH EDITION is a sufficient evidence of the value of the work, and of its adaptation to the wants of the student and professional reader.

NEW AND CHEAPER EDITION OF

SMITH & HORNER'S ANATOMICAL ATLAS.**AN ANATOMICAL ATLAS,**

ILLUSTRATIVE OF THE STRUCTURE OF THE HUMAN BODY.

BY HENRY H. SMITH, M. D., &c.

UNDER THE SUPERVISION OF

WILLIAM E. HORNER, M. D.,

Professor of Anatomy in the University of Pennsylvania.

In one volume, large imperial octavo, with about six hundred and fifty beautiful figures.

With the view of extending the sale of this beautifully executed and complete "Anatomical Atlas," the publishers have prepared a new edition, printed on both sides of the page, thus materially reducing its cost, and enabling them to present it at a price about forty per cent. lower than former editions. While, at the same time, the execution of each plate is in no respect deteriorated, and not a single figure is omitted.

These figures are well selected, and present a complete and accurate representation of that wonderful fabric, the human body. The plan of this Atlas, which renders it so peculiarly convenient for the student, and its superb artistic execution, have been already pointed out. We must congratulate the student upon the completion of this Atlas, as it is the most convenient work of the kind that has yet appeared; and we must add, the very beautiful manner in which it is "got up" is so creditable to the country as to be flattering to our national pride.—*American Medical Journal.*

HORNER'S DISSECTOR.**THE UNITED STATES DISSECTOR;**

Being a new edition, with extensive modifications, and almost re-written, of

"HORNER'S PRACTICAL ANATOMY."

In one very neat volume, royal 12mo., of 440 pages, with many illustrations on wood.

WILSON'S DISSECTOR, New Edition—(Now Ready, 1851.)

**THE DISSECTOR;
OR, PRACTICAL AND SURGICAL ANATOMY.**

BY ERASMUS WILSON.

MODIFIED AND RE-ARRANGED BY

PAUL BECK GODDARD, M. D.

A NEW EDITION, WITH REVISIONS AND ADDITIONS.

In one large and handsome volume, royal 12mo., with one hundred and fifteen illustrations.

In passing this work again through the press, the editor has made such additions and improvements as the advance of anatomical knowledge has rendered necessary to maintain the work in the high reputation which it has acquired in the schools of the United States as a complete and faithful guide to the student of practical anatomy. A number of new illustrations have been added, especially in the portion relating to the complicated anatomy of Hernia. In mechanical execution the work will be found superior to former editions.

WORKS BY W. B. CARPENTER, M. D.

COMPARATIVE PHYSIOLOGY—(Now Ready.)

PRINCIPLES OF

GENERAL AND COMPARATIVE PHYSIOLOGY

INTENDED AS AN INTRODUCTION TO THE STUDY OF

HUMAN PHYSIOLOGY;

AND AS A GUIDE TO THE PHILOSOPHICAL PURSUIT OF

NATURAL HISTORY.

FROM THE THIRD IMPROVED AND ENLARGED LONDON EDITION.

In one very large and handsome octavo volume, with several hundred beautiful illustrations.

In presenting to the American public this valuable and important work, the publishers feel that they are supplying a want which has long existed, as the now antiquated treatise of Roget, a present nearly out of print, is the only one, having pretensions to completeness, which has been accessible to the student in this country. The present work will be found fully on a level with the most advanced state of the extended science on which it treats, the author having devoted several years to the revision and improvement of his new edition, sparing no labor to ensure its completeness and accuracy. The illustrations are exceedingly numerous, and the whole is printed in the very best manner, forming one of the handsomest volumes ever issued in this country.

I recommend to your perusal a work recently published by Dr. Carpenter. It has this advantage, it is very much up to the present state of knowledge on the subject. It is written in a clear style, and is well illustrated.—*Professor Sharpey's Introductory Lecture.*

In Dr. Carpenter's work will be found the best exposition we possess of all that is furnished by comparative anatomy to our knowledge of the nervous system, as well as to the more general principles of life as organization.—*Dr. Holland's Medical Notes and Reflections.*

See Dr. Carpenter's "Principles of General and Comparative Physiology"—a work which makes me proud to think he was once my pupil.—*Dr. Eliotson's Physiology.*

CARPENTER'S ELEMENTS OF PHYSIOLOGY, New and Improved Edition—(Just Ready.)

ELEMENTS OF PHYSIOLOGY

INCLUDING PHYSIOLOGICAL ANATOMY.

FOR THE USE OF THE MEDICAL STUDENT.

WITH NEARLY TWO HUNDRED ILLUSTRATIONS.

Second American, from the Second London Edition.

In one handsome octavo volume, of about six hundred pages.

Of his different treatises on Physiology, the present work seems to us to be best adapted to the requirements of the student, and to constitute, on this account, a good text-book for the lecturer. The author in his preface directs attention to the copiousness and beauty of the illustrations; and they who make any remarks on the American edition, may, with great propriety, repeat the encomium.—*Bulletin of Medical Science.*

To say that it is the best manual of Physiology now before the public, would not do sufficient justice to the author.—*Buffalo Med. Journal.*

In his former works it would seem that he had exhausted the subject of Physiology. In the present, he gives the essence, as it were, of the whole.—*N. Y. Journal of Medicine.*

The best and most complete exposé of modern physiology, in one volume, extant in the English language.—*St. Louis Med. Journal.*

Those who have occasion for an elementary treatise on physiology, cannot do better than to possess themselves of the manual of Dr. Carpenter.—*Medical Examiner.*

CARPENTER'S HUMAN PHYSIOLOGY.

PRINCIPLES OF HUMAN PHYSIOLOGY,

WITH THEIR CHIEF APPLICATIONS TO

PATHOLOGY, HYGIENE, AND FORENSIC MEDICINE.

FOURTH AMERICAN EDITION, WITH EXTENSIVE ADDITIONS AND IMPROVEMENTS BY THE AUTHOR.

With Two Lithographic Plates, and 304 wood-cuts.

In one large and handsomely printed octavo volume of over seven hundred and fifty pages.

In preparing a new edition of this very popular text-book, the publishers have had it completely revised by the author, who, without materially increasing its bulk, has embodied in it all the recent investigations and discoveries in physiological science, and has rendered it in every respect on a level with the improvements of the day. Although the number of the wood- engravings has been but little increased, a considerable change will be found, many new and interesting illustrations having been introduced in place of others which were considered of minor importance, or which the advance of science had shown to be imperfect, while the plates have been altered and redrawn under the supervision of the author by a competent London artist. In passing the volume through the press in this country, the services of a professional gentleman have been secured, in order to insure the accuracy so necessary to a scientific work. Notwithstanding these improvements, the price of the volume is maintained at its former moderate rate.

In recommending this work to their classes, Professors of Physiology can rely on their being always able to procure editions brought thoroughly up with the advance of science.

DUNGLISON'S PHYSIOLOGY.
New and much Improved Edition.—(Just Issued.)

HUMAN PHYSIOLOGY.

BY ROBLEY DUNGLISON, M. D.,
Professor of the Institutes of Medicine in the Jefferson Medical College, Philadelphia, etc. etc.

SEVENTH EDITION.

Thoroughly revised and extensively modified and enlarged,
WITH NEARLY FIVE HUNDRED ILLUSTRATIONS.

In two large and handsomely printed octavo volumes, containing nearly 1450 pages.

On no previous revision of this work has the author bestowed more care than on the present, it having been subjected to an entire scrutiny, not only as regards the important matters of which it treats, but also the language in which they are conveyed; and on no former occasion has he felt as satisfied with his endeavors to have the work on a level with the existing state of the science. Perhaps at no time in the history of physiology have observers been more numerous, energetic, and discriminating than within the last few years. Many modifications of fact and inference have consequently taken place, which it has been necessary for the author to record, and to express his views in relation thereto. On the whole subject of physiology proper, as it applies to the functions executed by the different organs, the present edition, the author flatters himself, will therefore be found to contain the views of the most distinguished physiologists of all periods.

The amount of additional matter contained in this edition may be estimated from the fact that the mere list of authors referred to in its preparation alone extends over nine large and closely printed pages. The number of illustrations has been largely increased, the present edition containing four hundred and seventy-four, while the last had but three hundred and sixty-eight; while, in addition to this, many new and superior wood-cuts have been substituted for those which were not deemed sufficiently accurate or satisfactory. The mechanical execution of the work has also been improved in every respect, and the whole is confidently presented as worthy the great and continued favor which it has so long received from the profession.

It has long since taken rank as one of the medical classics of our language. To say that it is by far the best text-book of physiology ever published in this country, is but echoing the general testimony of the profession.—*N. Y. Journal of Medicine.*

The most full and complete system of Physiology in our language.—*Western Lancet.*

The most complete and satisfactory system of Physiology in the English language.—*Amer. Med. Journal.*

The best work of the kind in the English language.—*Silliman's Journal.*

We have, on two former occasions, brought this excellent work under the notice of our readers, and we have now only to say that, instead of falling behind in the rapid march of physiological science, each edition brings it nearer to the van.—*British and Foreign Medical Review.*

A review of such a well-known work would be out of place at the present time. We have looked over it, and find, what we knew would be the case, that Dr. Dunglison has kept pace with the science to which he has devoted so much study, and of which he is one of the living ornaments. We recommend the work to the medical student as a valuable text-book, and to all inquirers into Natural Science, as one which will well and delightfully repay perusal.—*The New Orleans Medical and Surgical Journal.*

KIRKES AND PAGET'S PHYSIOLOGY.—(Lately Issued.)

A MANUAL OF PHYSIOLOGY, FOR THE USE OF STUDENTS.

BY WILLIAM SENHOUSE KIRKES, M. D.,

ASSISTED BY JAMES PAGET,

Lecturer on General Anatomy and Physiology in St. Bartholomew's Hospital.

In one handsome volume, royal 12mo., of 550 pages, with 118 wood-cuts.

An excellent work, and for students one of the best within reach.—*Boston Medical and Surgical Journal.*

One of the best little books on Physiology which we possess.—*Braithwaite's Retrospect*

Particularly adapted to those who desire to possess a concise digest of the facts of Human Physiology.—*British and Foreign Med.-Chirurg. Review.*

One of the best treatises which can be put into the hands of the student.—*London Medical Gazette.*

We conscientiously recommend it as an admirable "Handbook of Physiology."—*London Jour. of Medicine.*

SOLLY ON THE BRAIN.

THE HUMAN BRAIN; ITS STRUCTURE, PHYSIOLOGY, AND DISEASES.

WITH A DESCRIPTION OF THE TYPICAL FORM OF THE BRAIN IN THE ANIMAL KINGDOM.

BY SAMUEL SOLLY, F. R. S., &c.

Senior Assistant Surgeon to the St. Thomas' Hospital, &c.

From the Second and much Enlarged London Edition. In one octavo volume, with 120 Wood-cuts.

HARRISON ON THE NERVES.—An Essay towards a correct theory of the Nervous System. In one octavo volume, 292 pages.

MATTEUCCI ON LIVING BEINGS.—Lectures on the Physical Phenomena of Living Beings. Edited by Pereira. In one neat royal 12mo. volume, extra cloth, with cuts—388 pages.

ROGET'S PHYSIOLOGY.—A Treatise on Animal and Vegetable Physiology, with over 400 illustrations on wood. In two octavo volumes, cloth.

ROGET'S OUTLINES.—Outlines of Physiology and Phrenology. In one octavo volume, cloth—516 pages.

ON THE CONNECTION BETWEEN PHYSIOLOGY AND INTELLECTUAL SCIENCE. In one

12mo. volume, paper, price 25 cents.

TODD & BOWMAN'S PHYSIOLOGY.—Physiological Anatomy and Physiology of Man. With numerous handsome wood-cuts. Parts I, II, and III, in one 8vo. volume, 552 pp. Part IV will complete the work.

DUNGLISON'S PRACTICE OF MEDICINE.
ENLARGED AND IMPROVED EDITION.

THE PRACTICE OF MEDICINE.
A TREATISE ON
SPECIAL PATHOLOGY AND THERAPEUTICS.
THIRD EDITION.

BY **ROBLEY DUNGLISON, M. D.,**

Professor of the Institutes of Medicine in the Jefferson Medical College; Lecturer on Clinical Medicine, &c.
In two large octavo volumes, of fifteen hundred pages.

The student of medicine will find, in these two elegant volumes, a mine of facts, a gathering of precepts and advice from the world of experience, that will nerve him with courage, and faithfully direct him in his efforts to relieve the physical sufferings of the race.—*Boston Medical and Surgical Journal.*

Upon every topic embraced in the work the latest information will be found carefully posted up.
Medical Examiner.

It is certainly the most complete treatise of which we have any knowledge. There is scarcely a disease which the student will not find noticed.—*Western Journal of Medicine and Surgery.*

One of the most elaborate treatises of the kind we have.—*Southern Medical and Surg. Journal.*

A New Work. Now Ready.

**DISEASES OF THE HEART, LUNGS, AND APPENDAGES;
THEIR SYMPTOMS AND TREATMENT.**

BY **W. H. WALSHE, M.D.,**

Professor of the Principles and Practice of Medicine in University College, London, &c.

In one handsome volume, large royal 12mo.

The author's design in this work has been to include within the compass of a moderate volume, all really essential facts bearing upon the symptoms, physical signs, and treatment of pulmonary and cardiac diseases. To accomplish this the first part of the work is devoted to the description of the various modes of physical diagnosis, auscultation, percussion, mensuration, &c. which are fully and clearly, but succinctly entered into, both as respects their theory and clinical phenomena. In the second part, the various diseases of the heart, lungs, and great vessels are considered in regard to symptoms, physical signs and treatment, with numerous references to cases. The eminence of the author is a guarantee to the practitioner and student that the work is one of practical utility in facilitating the diagnosis and treatment of a large, obscure and important class of diseases.

THE GREAT MEDICAL LIBRARY.

THE CYCLOPEDIA OF PRACTICAL MEDICINE;

COMPRISING

Treatises on the Nature and Treatment of Diseases, Materia Medica, and Therapeutics, Diseases of Women and Children, Medical Jurisprudence, &c. &c.

EDITED BY

**JOHN FORBES, M. D., F. R. S., ALEXANDER TWEEDIE, M. D., F. R. S.
AND JOHN CONNOLLY, M. D.**

Revised, with Additions,

BY **ROBLEY DUNGLISON, M. D.**

THE WORK IS NOW COMPLETE, AND FORMS FOUR LARGE SUPER-ROYAL OCTAVO VOLUMES,

Containing Thirty-two Hundred and Fifty-four unusually large Pages in Double Columns, Printed on Good Paper, with a new and clear type.

THE WHOLE WELL AND STRONGLY BOUND WITH RAISED BANDS AND DOUBLE TITLES.

This work contains no less than **FOUR HUNDRED AND EIGHTEEN DISTINCT TREATISES,**

By Sixty-eight distinguished Physicians.

The most complete work on Practical Medicine extant; or, at least, in our language.—*Buffalo Medical and Surgical Journal.*

For reference, it is above all price to every practitioner.—*Western Lancet.*

One of the most valuable medical publications of the day—as a work of reference it is invaluable.—*Western Journal of Medicine and Surgery.*

It has been to us, both as learner and teacher, a work for ready and frequent reference, one in which modern English medicine is exhibited in the most advantageous light.—*Medical Examiner.*

We rejoice that this work is to be placed within the reach of the profession in this country, it being unquestionably one of very great value to the practitioner. This estimate of it has not been formed from a hasty examination, but after an intimate acquaintance derived from frequent consultation of it during the past nine or ten years. The editors are practitioners of established reputation, and the list of contributors embraces many of the most eminent professors and teachers of London, Edinburgh, Dublin, and Glasgow. It is, indeed, the great merit of this work that the principal articles have been furnished by practitioners who have not only devoted especial attention to the diseases about which they have written, but have also enjoyed opportunities for an extensive practical acquaintance with them,—and whose reputation carries the assurance of their competency justly to appreciate the opinions of others, while it stamps their own doctrines with high and just authority.—*American Medical Journal.*

MEIGS ON FEMALES, New and Improved Edition—(Just Issued.)

WOMAN; HER DISEASES AND THEIR REMEDIES; A SERIES OF LETTERS TO HIS CLASS.

BY C. D. MEIGS, M. D.,

Professor of Midwifery and Diseases of Women and Children in the Jefferson Medical College of Philadelphia, &c. &c.

In one large and beautifully printed octavo volume, of nearly seven hundred large pages.

"I am happy to offer to my Class an enlarged and amended edition of my Letters on the Diseases of Women; and I avail myself of this occasion to return my heartfelt thanks to them, and to our brethren generally, for the flattering manner in which they have accepted this fruit of my labor."—PREFACE.

The value attached to this work by the profession is sufficiently proved by the rapid exhaustion of the first edition, and consequent demand for a second. In preparing this the author has availed himself of the opportunity thoroughly to revise and greatly to improve it. The work will therefore be found completely brought up to the day, and in every way worthy of the reputation which it has so immediately obtained.

Professor Meigs has enlarged and amended this great work, for such it unquestionably is, having passed the ordeal of criticism at home and abroad, but been improved thereby; for in this new edition the author has introduced real improvements, and increased the value and utility of the book immeasurably. It presents so many novel, bright and sparkling thoughts; such an exuberance of new ideas on almost every page, that we confess ourselves to have become enamored with the book and its author; and cannot withhold our congratulations from our Philadelphia confederates, that such a teacher is in their service. We regret that our limits will not allow of a more extended notice of this work, but must content ourselves with thus commending it as worthy of diligent perusal by physicians as well as students, who are seeking to be thoroughly instructed in the important practical subjects of which it treats.—*N. Y. Med. Gazette.*

It contains a vast amount of practical knowledge, by one who has accurately observed and retained the experience of many years, and who tells the result in a free, familiar, and pleasant manner.—*Dublin Quarterly Journal.*

There is an off-hand fervor, a glow and a warm-heartedness infecting the effort of Dr. Meigs, which is entirely captivating, and which absolutely hurries the reader through from beginning to end. Besides, the book teems with solid instruction, and it shows the very highest evidence of ability, viz., the clearness with which the information is presented. We know of no better test of one's understanding a subject than the evidence of the power of lucidly explaining it. The most elementary, as well as the obscurest subjects, under the pencil of Prof. Meigs, are isolated and made to stand out in such bold relief, as to produce distinct impressions upon the mind and memory of the reader.—*The Charleston Medical Journal.*

The merits of the first edition of this work were so generally appreciated, and with such a high degree of favor by the medical profession throughout the Union, that we are not surprised in seeing a second edition of it. It is a standard work on the diseases of females, and in many respects is one of the very best of its kind in the English language. Upon the appearance of the first edition, we gave the work a cordial reception, and spoke of it in the warmest terms of commendation. Time has not changed the favorable estimate we placed upon it, but has rather increased our convictions of its superlative merits. But we do not now deem it necessary to say more than to commend this work, on the diseases of women, and the remedies for them, to the attention of those practitioners who have not supplied themselves with it. The most select library would be imperfect without it.—*The Western Journal of Medicine and Surgery.*

He is a bold thinker, and possesses more originality of thought and style than almost any American writer on medical subjects. If he is not an elegant writer, there is at least a freshness—a raciness in his mode of expressing himself—that cannot fail to draw the reader after him, even to the close of his work; you cannot nod over his pages; he stimulates rather than narcotises your senses, and the reader cannot lay aside these letters when once he enters into their merits. This, the second edition, is much amended and enlarged, and affords abundant evidence of the author's talents and industry.—*N. O. Medical and Surgical Journal.*

The practical writings of Dr. Meigs are second to none.—*The N. Y. Journal of Medicine.*
The excellent practical directions contained in this volume give it great utility, which we trust will not be lost upon our older colleagues; with some condensation, indeed, we should think it well adapted for translation into German.—*Zeitschrift für die Gesamte Medicin.*

NEW AND IMPROVED EDITION—(Just Issued.)

A TREATISE ON THE DISEASES OF FEMALES, AND ON THE SPECIAL HYGIENE OF THEIR SEX, BY COLOMBAT DE L'ISERE, M. D.

TRANSLATED, WITH MANY NOTES AND ADDITIONS, BY C. D. MEIGS, M. D.

SECOND EDITION, REVISED AND IMPROVED.

In one large volume, octavo, of seven hundred and twenty pages, with numerous wood-cuts.
We are satisfied it is destined to take the front rank in this department of medical science. It is in fact a complete exposition of the opinions and practical methods of all the celebrated practitioners of ancient and modern times.—*New York Journ. of Medicine.*

ASHWELL ON THE DISEASES OF FEMALES.

A PRACTICAL TREATISE ON THE DISEASES PECULIAR TO WOMEN.

ILLUSTRATED BY CASES DERIVED FROM HOSPITAL AND PRIVATE PRACTICE.
BY SAMUEL ASHWELL, M. D. WITH ADDITIONS BY PAUL BECK GODDARD, M. D.

Second American edition. In one octavo volume, of 520 pages.

One of the very best works ever issued from the press on the Diseases of Females.—*Western Lancet.*

ON THE CAUSES AND TREATMENT OF ABORTION AND STERILITY. By James Whitehead, M. D., &c. In one volume octavo, of about three hundred and seventy-five pages.

NEW AND IMPROVED EDITION—(Lately Issued.)

THE DISEASES OF FEMALES. INCLUDING THOSE OF PREGNANCY AND CHILDREN.

BY FLEETWOOD CHURCHILL, M. D., M. R. I. A.,
Author of "Theory and Practice of Midwifery," "Diseases of Females," &c.

A New American Edition (The Fifth), Revised by the Author.

WITH THE NOTES OF ROBERT M. HUSTON, M. D.

In one large and handsome octavo volume of 632 pages, with wood-cuts.

To indulge in panegyric, when announcing the fifth edition of any acknowledged medical authority, were to attempt to "gild refined gold." The work announced above, has too long been honored with the term "classical" to leave any doubt as to its true worth, and we content ourselves with remarking, that the author has carefully retained the notes of Dr. Huston, who edited the former American edition, thus really enhancing the value of the work, and paying a well merited compliment. All who wish to be "posted up" on a that relates to the diseases peculiar to the wife, the mother, or the maid, will hasten to secure a copy of this most admirable treatise.—*The Ohio Medical and Surgical Journal.*

We know of no author who deserves that approbation, on "the diseases of females," to the same extent that Dr. Churchill does. His, indeed, is the only thorough treatise we know of on the subject, and it may be commended to practitioners and students as a masterpiece in its particular department. The former editions of this work have been commended strongly in this journal, and they have won their way to an extended, and a well deserved popularity. This fifth edition, before us, is well calculated to maintain Dr. Churchill's high reputation. It was revised and enlarged by the author, for his American publishers, and it seems to us, that there is scarcely any species of desirable information on its subjects, that may not be found in this work.—*The Western Journal of Medicine and Surgery.*

We are gratified to announce a new and revised edition of Dr. Churchill's valuable work on the diseases of females. We have ever regarded it as one of the very best works on the subjects embraced within its scope, in the English language; and the present edition, enlarged and revised by the author, renders it still more entitled to the confidence of the profession. The valuable notes of Prof. Huston have been retained, and contribute, in no small degree, to enhance the value of the work. It is a source of congratulation that the publishers have permitted the author to be, in this instance, his own editor, thus securing all the revisions which an author alone is capable of making.—*The Western Lancet.*

As a comprehensive manual for students, or a work of reference for practitioners, we only speak with common justice when we say that it surpasses any other that has ever issued on the same subject from the British press.—*The Dublin Quarterly Journal.*

Churchill's Monographs on Females.—(Just Issued.)

ESSAYS ON THE PUERPERAL FEVER, AND OTHER DISEASES PECULIAR TO WOMEN.

SELECTED FROM THE WRITINGS OF BRITISH AUTHORS PREVIOUS TO THE CLOSE OF
THE EIGHTEENTH CENTURY.

Edited by FLEETWOOD CHURCHILL, M. D., M. R. I. A.,
Author of "Treatise on the Diseases of Females," &c.

In one neat octavo volume, of about four hundred and fifty pages.

To these papers Dr. Churchill has appended notes, embodying whatever information has been laid before the profession since their authors' time. He has also prefixed to the essays on puerperal fever, which occupy the larger portion of the volume, an interesting historical sketch of the principal epidemics of that disease. The whole forms a very valuable collection of papers by professional writers of eminence, on some of the most important accidents to which the puerperal female is liable.—*American Journal of Medical Science.*

MUCH ENLARGED AND IMPROVED EDITION—(Just Issued.)

A PRACTICAL TREATISE ON INFLAMMATION OF THE UTERUS AND ITS APPENDAGES, And on Ulceration and Induration of the Neck of the Uterus.

BY HENRY BENNETT, M. D.,
Obstetric Physician to the Western Dispensary.

Second Edition, much enlarged.

In one neat octavo volume of 350 pages, with wood-cuts.

This edition is so enlarged as to constitute a new work. It embraces the study of inflammation in all the uterine organs, and its influence in the production of displacements and of the reputed functional diseases of the uterus.

Few works issue from the medical press which are at once original and sound in doctrine; but such we feel assured, is the admirable treatise now before us. The important practical precepts which the author inculcates are all rigidly deduced from facts. . . . Every page of the book is good, and eminently practical. So far as we know and believe, it is the best work on the subject on which it treats.—*Monthly Journal of Medical Science.*

A TREATISE ON THE DISEASES OF FEMALES.

BY W. P. DEWEES, M. D.

NINTH EDITION.

In one volume, octavo. 533 pages, with plates.

MEIGS ON CHILDREN—Just Issued.

—

**OBSERVATIONS ON
CERTAIN OF THE DISEASES OF YOUNG CHILDREN.**

BY CHARLES D. MEIGS, M. D.,

Professor of Midwifery and of the Diseases of Women and Children in the Jefferson
Medical College of Philadelphia, &c. &c.

In one handsome octavo volume of 314 pages.

While this work is not presented to the profession as a systematic and complete treatise on Infantile disorders, the importance of the subjects treated of, and the interest attaching to the views and opinions of the distinguished author must command for it the attention of all who are called upon to treat this interesting class of diseases.

It puts forth no claims as a systematic work, but contains an amount of valuable and useful matter, scarcely to be found in the same space in our home literature. It can not but prove an acceptable offering to the profession at large.—*N. Y. Journal of Medicine.*

The work before us is undoubtedly a valuable addition to the fund of information which has already been treasured up on the subjects in question. It is practical, and therefore eminently adapted to the general practitioner. Dr. Meigs' works have the same fascination which belongs to himself.—*Medical Examiner.*

This is a most excellent work on the obscure diseases of childhood, and will afford the practitioner and student of medicine much aid in their diagnosis and treatment.—*The Boston Medical and Surgical Journal.*

We take much pleasure in recommending this excellent little work to the attention of medical practitioners. It deserves their attention, and after they commence its perusal, they will not willingly abandon it, until they have mastered its contents. We read the work while suffering from a carbuncle, and its fascinating pages often beguiled us into forgetfulness of agonizing pain. May it teach others to relieve the afflictions of the young.—*The Western Journal of Medicine and Surgery.*

All of which topics are treated with Dr. Meigs' acknowledged ability and original diction. The work is neither a systematic nor a complete treatise upon the diseases of children, but a fragment which may be consulted with much advantage.—*Southern Medical and Surgical Journal.*

NEW WORK BY DR. CHURCHILL.

—

**ON THE
DISEASES OF INFANTS AND CHILDREN.**

BY FLEETWOOD CHURCHILL, M. D., M. R. I. A.,

Author of "Theory and Practice of Midwifery," "Diseases of Females," &c.

In one large and handsome octavo volume of over 600 pages.

From Dr. Churchill's known ability and industry, we were led to form high expectations of this work; nor were we deceived. Its learned author seems to have set no bounds to his researches in collecting information which, with his usual systematic address, he has disposed of in the most clear and concise manner, so as to lay before the reader every opinion of importance bearing upon the subject under consideration.

We regard this volume as possessing more claims to completeness than any other of the kind with which we are acquainted. Most cordially and earnestly, therefore, do we commend it to our professional brethren, and we feel assured that the stamp of their approbation will in due time be impressed upon it.

After an attentive perusal of its contents, we hesitate not to say, that it is one of the most comprehensive ever written upon the diseases of children, and that, for copiousness of reference, extent of research, and perspicuity of detail, it is scarcely to be equalled, and not to be excelled in any language.—*Dublin Quarterly Journal.*

The present volume will sustain the reputation acquired by the author from his previous works. The reader will find in it full and judicious directions for the management of infants at birth, and a compendious, but clear, account of the diseases to which children are liable, and the most successful mode of treating them. We must not close this notice without calling attention to the author's style, which is perspicuous and polished to a degree, we regret to say, not generally characteristic of medical works. We recommend the work of Dr. Churchill most cordially, both to students and practitioners, as a valuable and reliable guide in the treatment of the diseases of children.—*Am. Journ. of the Med. Sciences.*

After this meagre, and we know, very imperfect notice, of Dr. Churchill's work, we shall conclude by saying, that it is one that cannot fail from its copiousness, extensive research, and general accuracy, to exert still higher the reputation of the author in this country. The American reader will be particularly pleased to find that Dr. Churchill has done full justice throughout his work, to the various American authors on this subject. The names of Dewees, Eberle, Condie, and Stewart, occur on nearly every page, and these authors are constantly referred to by the author in terms of the highest praise, and with the most liberal courtesy.—*The Medical Examiner.*

We know of no work on this department of Practical Medicine which presents so candid and unprejudiced a statement or posting up of our actual knowledge as this.—*N. Y. Journal of Medicine.*

Its claims to merit, both as a scientific and practical work, are of the highest order. Whilst we would not elevate it above every other treatise on the same subject, we certainly believe that very few are equal to it, and none superior.—*Southern Med. and Surg. Journal.*

New and Improved Edition—(Lately Issued.)

A PRACTICAL TREATISE ON THE DISEASES OF CHILDREN.

BY D. FRANCIS CONDIE, M. D.,
Fellow of the College of Physicians, &c. &c.

Third edition, revised and augmented. In one large volume, 8vo., of over 700 pages.

In the preparation of a third edition of the present treatise, every portion of it has been subjected to a careful revision. A new chapter has been added on Epidemic Meningitis, a disease which, although not confined to children, occurs far more frequently in them, than in adults. In the other chapters of the work, all the more important facts that have been developed since the appearance of the last edition, in reference to the nature, diagnosis, and treatment of the several diseases of which they treat, have been incorporated. The great object of the author has been to present, in each succeeding edition, as full and connected a view as possible of the actual state of the pathology and therapeutics of those affections which most usually occur between birth and puberty.

To the present edition there is appended a list of the several works and essays quoted or referred to in the body of the work, or which have been consulted in its preparation or revision.

Every important fact that has been verified or developed since the publication of the previous edition, either in relation to the nature, diagnosis, or treatment of the diseases of children, have been arranged and incorporated into the body of the work; thus posing up to date, to use a counting-house phrase, all the valuable facts and useful information on the subject. To the American practitioner, Dr. Condie's remarks on the diseases of children will be invaluable, and we accordingly advise those who have failed to read this work to procure a copy, and make themselves familiar with its sound principles.—*The New Orleans Medical and Surgical Journal*.

We feel persuaded that the American Medical profession will soon regard it, not only as a very good, but as the VERY BEST "Practical Treatise on the Diseases of Children."—*American Medical Journal*.

We pronounced the first edition to be the best work on the Diseases of Children in the English language, and, notwithstanding all that has been published, we still regard it in that light.—*Medical Examiner*.

From Professor Wm. P. Johnston, Washington, D. C.

I make use of it as a text-book, and place it invariably in the hands of my private pupils.

From Professor D. Humphreys Storer, of Boston.

I consider it to be the best work on the Diseases of Children we have access to, and as such recommend it to all who ever refer to the subject.

From Professor M. M. Pallen, of St. Louis.

I consider it the best treatise on the Diseases of Children that we possess, and as such have been in the habit of recommending it to my classes.

Dr. Condie's scholarship, acumen, industry, and practical sense are manifested in this, as in all his numerous contributions to science.—*Dr. Holmes's Report to the American Medical Association*.

Taken as a whole, in our judgment, Dr. Condie's Treatise is the one from the perusal of which the practitioner in this country will rise with the greatest satisfaction.—*Western Journal of Medicine and Surgery*.

One of the best works upon the Diseases of Children in the English language.—*Western Lancet*.

We feel assured from actual experience that no physician's library can be complete without a copy of this work.—*N. Y. Journal of Medicine*.

Perhaps the most full and complete work now before the profession of the United States; indeed, we may say in the English language. It is vastly superior to most of its predecessors.—*Pennsylvania Med Journal*.

A veritable pediatric encyclopedia, and an honor to American medical literature.—*Ohio Medical and Surgical Journal*.

WEST ON DISEASES OF CHILDREN—(Now Complete.)

LECTURES ON THE DISEASES OF INFANCY AND CHILDHOOD.

BY CHARLES WEST, M. D.,
Senior Physician to the Royal Infirmary for Children, &c. &c.

In one volume, octavo.

Every portion of these lectures is marked by a general accuracy of description, and by the soundness of the views set forth in relation to the pathology and therapeutics of the several maladies treated of. The lectures on the diseases of the respiratory apparatus, about one-third of the whole number, are particularly excellent, forming one of the fullest and most able accounts of these affections, as they present themselves during infancy and childhood, in the English language. The history of the several forms of phthisis during these periods of existence, with their management, will be read by all with deep interest.—*The American Journal of the Medical Sciences*.

The Lectures of Dr. West, originally published in the London Medical Gazette, form a most valuable addition to this branch of practical medicine. For many years physician to the Children's Infirmary, his opportunities for observing their diseases have been most extensive, no less than 14,000 children having been brought under his notice during the past nine years. These have evidently been studied with great care, and the result has been the production of the very best work in our language, so far as it goes, on the diseases of this class of our patients. The symptomatology and pathology of their diseases are especially exhibited most clearly; and we are convinced that no one can read with care these lectures without deriving from them instruction of the most important kind.—*Charleston Med. Journal*.

A TREATISE
ON THE PHYSICAL AND MEDICAL TREATMENT OF CHILDREN.

BY W. P. DEWEES, M. D.

Ninth edition. In one volume, octavo. 548 pages.

A NEW WORK—(Lately Issued.)

OBSTETRICS: THE SCIENCE AND THE ART.

BY CHARLES D. MEIGS, M. D.,

Professor of Midwifery and the Diseases of Women and Children in the Jefferson Medical College,
Philadelphia, &c. &c.

With One Hundred and Twenty Illustrations.

In one beautifully printed octavo volume, of six hundred and eighty large pages.

As an elementary treatise—concise, but, withal, clear and comprehensive—we know of no one better adapted for the use of the student; while the young practitioner will find in it a body of sound doctrine, and a series of excellent practical directions, adapted to all the conditions of the various forms of labor and their results, which he will be induced, we are persuaded, again and again to consult, and always with profit.

It has seldom been our lot to peruse a work upon the subject, from which we have received greater satisfaction, and which we believe to be better calculated to communicate to the student correct and definite views upon the several topics embraced within the scope of its teachings.—*American Journal of the Medical Sciences.*

We are acquainted with no work on midwifery of greater practical value.—*Boston Medical and Surgical Journal.*

Worthy the reputation of its distinguished author.—*Medical Examiner.*

We most sincerely recommend it, both to the student and practitioner, as a more complete and valuable work on the Science and Art of Midwifery, than any of the numerous reprints and American editions of European works on the same subject.—*N. Y. Annalist.*

We have, therefore, great satisfaction in bringing under our reader's notice the matured views of the highest American authority in the department to which he has devoted his life and talents.—*London Medical Gazette.*

An author of established merit, a professor of Midwifery, and a practitioner of high reputation and immense experience—we may assuredly regard his work now before us as representing the most advanced state of obstetric science in America up to the time at which he writes. We consider Dr. Meigs' book as a valuable acquisition to obstetric literature, and one that will very much assist the practitioner under many circumstances of doubt and perplexity.—*The Dublin Quarterly Journal.*

These various heads are subdivided so well, so lucidly explained, that a good memory is all that is necessary in order to put the reader in possession of a thorough knowledge of this important subject. Dr. Meigs has conferred a great benefit on the profession in publishing this excellent work.—*St. Louis Medical and Surgical Journal.*

No reader will lay the volume down without admiration for the learning and talents of the author. An abler volume, on the whole, we do not hope soon to see.—*Western Journal of Medicine and Surgery.*

A safe and efficient guide to the delicate and oftentimes difficult duties which devolve upon the obstetrician.—*Ohio Medical and Surgical Journal.*

One of the very best treatises on this subject, and worthy of being placed in the library of every American physician.—*Northwestern Medical and Surgical Journal.*

He has an earnest way with him when speaking of the most elementary subjects which fixes the attention and adds much value to the work as a text-book for students.—*British and Foreign Medico-Chirurgical Review.*

TYLER SMITH ON PARTURITION—(Lately Issued.)

ON PARTURITION, AND THE PRINCIPLES AND PRACTICE OF OBSTETRICS.

BY W. TYLER SMITH, M. D.,

Lecturer on Obstetrics in the Hunterian School of Medicine, &c. &c.

In one large duodecimo volume, of 400 pages.

The work will recommend itself by its intrinsic merit to every member of the profession.—*Lancet.*

We can imagine the pleasure with which William Hunter or Deaman would have welcomed the present work; certainly the most valuable contribution to obstetrics that has been made since their own day. For ourselves, we consider its appearance as the dawn of a new era in this department of medicine. We do most cordially recommend the work as one absolutely necessary to be studied by every accoucheur. It will, we may add, prove equally interesting and instructive to the student, the general practitioner, and pure obstetrician. It was a bold undertaking to reclaim parturition for Reflex Physiology, and it has been well performed.—*London Journal of Medicine.*

LEE'S CLINICAL MIDWIFERY—(Lately Issued.)

CLINICAL MIDWIFERY,

COMPRISING THE HISTORIES OF FIVE HUNDRED AND FORTY-FIVE CASES OF DIFFICULT, PRETERNATURAL, AND COMPLICATED LABOR, WITH COMMENTARIES.

BY ROBERT LEE, M. D., F. R. S., &c.

From the 2d London Edition.

In one royal 12mo. volume, extra cloth, of 238 pages.

More instructive to the juvenile practitioner than a score of systematic works.—*Lancet.*

An invaluable record for the practitioner.—*N. Y. Annalist.*

▲ storehouse of valuable facts and precedents.—*American Journal of the Medical Sciences.*

CHURCHILL'S MIDWIFERY, BY CONDIE, NEW AND IMPROVED EDITION—(Now Ready.)

ON THE
THEORY AND PRACTICE OF MIDWIFERY.

BY FLEETWOOD CHURCHILL, M. D., &c.

A NEW AMERICAN FROM THE LAST AND IMPROVED ENGLISH EDITION.

EDITED, WITH NOTES AND ADDITIONS,

BY D. FRANCIS CONDIE, M. D.,

Author of a "Practical Treatise on the Diseases of Children," &c.

WITH ONE HUNDRED AND THIRTY-NINE ILLUSTRATIONS.

In one very handsome octavo volume.

In the preparation of the last English edition, from which this is printed, the author has spared no pains, with the desire of bringing it thoroughly up to the present state of obstetric science. The labors of the editor have thus been light, but he has endeavored to supply whatever he has thought necessary to the work, either as respects obstetrical practice in this country, or its progress in Europe since the appearance of Dr. Churchill's last edition. Most of the notes of the former editor, Dr. Huston, have been retained by him, where they have not been embodied by the author in his text. The present edition of the favorite text-book is therefore presented to the profession in the full confidence of its meriting a continuance of the great reputation which it has acquired as a work equally well fitted for the student and practitioner.

To bestow praise on a book that has received such marked approbation would be superfluous. We need only say, therefore, that if the first edition was thought worthy of a favorable reception by the medical public, we can confidently affirm that this will be found much more so. The lecturer, the practitioner, and the student, may all have recourse to its pages, and derive from their perusal much interest and instruction in everything relating to theoretical and practical midwifery.—*Dublin Quarterly Journal of Medical Science.*

A work of very great merit, and such as we can confidently recommend to the study of every obstetric practitioner.—*London Medical Gazette.*

This is certainly the most perfect system extant. It is the best adapted for the purposes of a text-book, and that which he whose necessities confine him to one book, should select in preference to all others.—*Southern Medical and Surgical Journal.*

The most popular work on Midwifery ever issued from the American press—*Charleston Medical Journal.* Certainly, in our opinion, the very best work on the subject which exists.—*N. Y. Annalist.*

We were reduced to the necessity of having but one work on Midwifery, and permitted to choose, we would unhesitatingly take Churchill.—*Western Medical and Surgical Journal.*

It is impossible to conceive a more useful and elegant Manual than Dr. Churchill's Practice of Midwifery.—*Provincial Medical Journal.*

No work holds a higher position, or is more deserving of being placed in the hands of the tyro, the advanced student, or the practitioner.—*Medical Examiner.*

NEW EDITION OF RAMSBOTHAM ON PARTURITION—(Now Ready, 1851.)

**THE PRINCIPLES AND PRACTICE OF
OBSTETRIC MEDICINE AND SURGERY,**

In reference to the Process of Parturition.

BY FRANCIS H. RAMSBOTHAM, M. D.,

Physician to the Royal Maternity Charity, &c. &c.

SIXTH AMERICAN FROM THE LAST LONDON EDITION.

Illustrated with One Hundred and Forty-eight Figures on Fifty-five Lithographic Plates.

In one large and handsomely printed volume, imperial octavo, with 520 pages.

In this edition the plates have all been redrawn, and the text carefully read and corrected. It is therefore presented as in every way worthy the favor with which it has so long been received.

From Professor Hodge, of the University of Pennsylvania.

To the American public, it is most valuable, from its intrinsic undoubted excellence, and as being the best authorized exponent of British Midwifery. Its circulation will, I trust, be extensive throughout our country.

We recommend the student, who desires to master this difficult subject with the least possible trouble, to possess himself at once of a copy of this work.—*American Journal of the Medical Sciences.*

It stands at the head of the long list of excellent obstetric works published in the last few years in Great Britain, Ireland, and the Continent of Europe. We consider this book indispensable to the library of every physician engaged in the practice of Midwifery.—*Southern Medical and Surgical Journal.*

When the whole profession is thus unanimous in placing such a work in the very first rank as regards the extent and correctness of all the details of the theory and practice of so important a branch of learning, our commendation or condemnation would be of little consequence; but, regarding it as the most useful of all works of the kind, we think it but an act of justice to urge its claims upon the profession.—*N. O. Med. Journal.*

DEWEES'S MIDWIFERY.

A COMPREHENSIVE SYSTEM OF MIDWIFERY.

ILLUSTRATED BY OCCASIONAL CASES AND MANY ENGRAVINGS.

BY WILLIAM P. DEWEES, M. D.

Tenth Edition, with the Author's last Improvements and Corrections. In one octavo volume, of 600 pages.

PEREIRA'S MATERIA MEDICA.

NEW EDITION, GREATLY IMPROVED AND ENLARGED—(Nearly Ready.)

**THE ELEMENTS
OF MATERIA MEDICA AND THERAPEUTICS.**
COMPREHENDING THE NATURAL HISTORY, PREPARATION, PROPERTIES, COMPOSITION,
EFFECTS, AND USES OF MEDICINES.

BY JONATHAN PEREIRA, M. D., F. R. S. AND L. S.

Third American from the Third and Enlarged London Edition.

WITH ADDITIONAL NOTES AND OBSERVATIONS BY THE AUTHOR.

EDITED BY JOSEPH CARSON, M. D.,

Professor of Materia Medica and Pharmacy in the University of Pennsylvania.

In two very large volumes, on small type, with about four hundred illustrations.

The third London edition of this great work has been thoroughly revised and greatly enlarged by the author, who has spared no pains to render it complete in every part, by the addition of a very large amount of matter and the introduction of many new illustrations. The present American edition, however, in addition to this, will not only enjoy the advantages of a careful and accurate superintendence by the editor, but will also embody the additions suggested by a further revision by the author, expressly for this country, embracing the most recent discoveries, and the results of several pharmacopœias which have appeared since the publication of part of the London edition. The notes of the American editor will be prepared with reference to the new edition of the United States Pharmacopœia, and will contain such matter generally as may be required to adapt it fully to the wants of the American student and practitioner, as well as such recent investigations and discoveries as may have escaped the attention of the author. The profession may therefore rely on being able to procure a work which will not only maintain but increase its right to the appellation of

AN ENCYCLOPÆDIA OF MATERIA MEDICA AND THERAPEUTICS.

We shall only remark that every article bears witness to the industry and indefatigable research of the author. Instead of being merely the elements of materia medica, it constitutes a complete encyclopædia of this important subject. The student of physiology, pathology, chemistry, botany, and natural history, will find herein the most recent facts and discoveries in his favorite branch of study, and the medical practitioner will have in this work a safe guide for the administration and employment of medicines.—*London Medical Gazette.*

The present edition (the third) is very much enlarged and improved, and includes the latest discoveries and views respecting medicines and their properties. We believe that this work has no equal in value as a book of reference, or of general information on materia medica.—*The Lancet.*

ROYLE'S MATERIA MEDICA.

MATERIA MEDICA AND THERAPEUTICS;

INCLUDING THE

Preparations of the Pharmacopœias of London, Edinburgh, Dublin, and of the United States.

WITH MANY NEW MEDICINES.

BY J. FORBES ROYLE, M. D., F. R. S.,

Professor of Materia Medica and Therapeutics, King's College, London, &c. &c.

EDITED BY JOSEPH CARSON, M. D.,

Professor of Materia Medica and Pharmacy in the University of Pennsylvania.

WITH NINETY-EIGHT ILLUSTRATIONS.

In one large octavo volume, of about seven hundred pages.

Being one of the most beautiful Medical works published in this country.

This work is, indeed, a most valuable one, and will fill up an important vacancy that existed between Dr. Pereira's most learned and complete system of Materia Medica, and the class of productions on the other extreme, which are necessarily imperfect from their small extent.—*British and Foreign Medical Review.*

POCKET DISPENSATORY AND FORMULARY.

A DISPENSATORY AND THERAPEUTICAL REMEMBRANCER. Comprising the entire lists of Materia Medica, with every Practical Formula contained in the three British Pharmacopœias. With relative Tables subjoined, illustrating by upwards of six hundred and sixty examples, the Extemporaneous Forms and Combinations suitable for the different Medicines. By JOHN MAYNE, M. D., L. R. C. S., EDIN., &c. &c. Edited, with the addition of the formulae of the United States Pharmacopœia, by R. EGLESELD GRIFFITH, M. D. In one 12mo. volume, of over three hundred large pages.

The neat typography, convenient size, and low price of this volume, recommend it especially to physicians, apothecaries, and students in want of a pocket manual.

THE THREE KINDS OF COD-LIVER OIL,

Comparatively considered, with their Chemical and Therapeutic Properties, by L. J. DE JONGH, M. D. Translated, with an Appendix and Cases, by EDWARD CAREY, M. D. To which is added an article on the subject from "Dunglison on New Remedies." In one small 12mo. volume, extra cloth.

NEW UNIVERSAL FORMULARY.—(Just Issued.)

A UNIVERSAL FORMULARYCONTAINING THE
METHODS OF PREPARING AND ADMINISTERING
OFFICINAL AND OTHER MEDICINES.

THE WHOLE ADAPTED TO PHYSICIANS AND PHARMACEUTISTS

BY R. EGLESFELD GRIFFITH, M. D.,

Author of "American Medical Botany," &c.

In one large octavo volume of 568 pages, double columns.

In this work will be found not only a very complete collection of formulas and pharmaceutical processes, collected with great care from the best modern authorities of all countries, but also vast amount of important information on all collateral subjects. To insure the accuracy so necessary to a work of this nature, the sheets have been carefully revised by Dr. Robert Bridges, while Mr. William Procter, Jr., has contributed numerous valuable formulæ, and useful suggestions.

The want of a work like the present has long been felt in this country, where the physician or apothecary have hitherto had access to no complete collection of formulas, gathered from the pharmacopœias and therapeutists of all nations. Not only has this desideratum been thoroughly accomplished in this volume, but it will also be found to contain a very large number of recipes of empirical preparations, valuable to the apothecary and manufacturing chemist, the greater part of which have hitherto not been accessible in this country. It is farther enriched with accurate tables of the weights and measures of Europe; a vocabulary of the abbreviations and Latin terms used in Pharmacy; rules for the administration of medicines; directions for officinal preparations; remarks on poisons and their antidotes; with various tables of much practical utility. To facilitate reference to the whole, extended indices have been added, giving to the work the advantage of both alphabetical and systematic arrangement.

To show the variety and importance of the subjects treated of, the publishers subjoin a very condensed

SUMMARY OF THE CONTENTS, IN ADDITION TO THE FORMULARY PROPER WHICH EXTENDS TO BETWEEN THREE AND FOUR HUNDRED LARGE DOUBLE COLUMNED PAGES.

PREFACE.

INTRODUCTION.

WEIGHTS AND MEASURES.

Weights of the United States and Great Britain.—Foreign Weights.—Measures.

SPECIFIC GRAVITY.

TEMPERATURES FOR CERTAIN PHARMACEUTICAL OPERATIONS.

HYDROMETRICAL EQUIVALENTS.

SPECIFIC GRAVITIES OF SOME OF THE PREPARATIONS OF THE PHARMACOPŒIAS.

RELATION BETWEEN DIFFERENT THERMOMETRICAL SCALES.

EXPLANATION OF PRINCIPAL ABBREVIATIONS USED IN FORMULÆ.

VOCABULARY OF WORDS EMPLOYED IN PRESCRIPTIONS.

OBSERVATIONS ON THE MANAGEMENT OF THE SICK ROOM.

Ventilation of the Sick room.—Temperature of the Sick room.—Cleanliness in the Sick room.—Quiet in the Sick room.—Examination and Preservation of the Excretions.—Administration of Medicine.—Furniture of a Sick room.—Proper use of Utensils for Evacuations.

DOSES OF MEDICINES.

Age.—Sex.—Temperament.—Idiosyncrasy.—Habit.—State of the System.—Time of day.—Intervals between Doses.

RULES FOR ADMINISTRATION OF MEDICINES.

Acids.—Antacids.—Antilithics and Lithontriptics.—Antispasmodics.—Anthelmintics.—Cathartics.—Emetics.—Suppositories.—Demulcents or Emollients.—Diaphoretics.—Diluents.—Diuretics.—Emetics.—Emmenagogues.—Epispastics.—Erythrics.—Escharotics.—Expectorants.—Narcotics.—Refrigerants.—Sedatives.—Sialagogues.—Stimulants.—Tonics.

MANAGEMENT OF CONVALESCENCE AND RELAPSES.

DIETETIC PREPARATIONS NOT INCLUDED

AMONG THE PREVIOUS PRESCRIPTIONS.

LIST OF INCOMPATIBLES.

POSOLOGICAL TABLES OF THE MOST IMPORTANT MEDICINES.

TABLE OF PHARMACEUTICAL NAMES WHICH DIFFER IN THE U. STATE AND BRITISH PHARMACOPŒIAS.

OFFICINAL PREPARATIONS AND DIRECTIONS.

INTERNAL REMEDIES.

Powders.—Pills and Boluses.—Extracts.—Corfections. Conserves, Electuaries.—Paps.—Syrups.—Mellites or Honeya.—Infusions.—Decoctions.—Tinctures.—Wines.—Vinegars.—Mixtures.—Medicated Waters.—Distilled, Essential, or Volatile Oils.—Fixed Oils and Fats.—Alkaloids.—Spirits.—Troches or Lozenges.—Inhalations.

EXTERNAL REMEDIES.

Baths.—Cold Bath.—Cool Bath.—Temperate Bath.—Tepid Bath.—Warm Bath.—Hot Bath.—Shower Bath.—Local Baths.—Vapor Bath.—Warm A. Bath.—Douche.—Medicated Baths.—Affusion.—Sponging.—Fomentations.—Cataplasms or Poultices.—Lotions, Liniments, Embrocations.—Vesicatories, or Blisters.—Issues.—Setons.—Ointments.—Cerates.—Plasters.—Fumigations.

BLOOD-LETTING.

General Blood-Letting.—Venesection.—Arteriotomy.—Topical Blood-Letting.—Cupping.—Leeching.—Scarifications.

POISONS.

INDEX OF DISEASES AND THEIR REMEDIES
INDEX OF PHARMACEUTICAL AND BOTANICAL NAMES

GENERAL INDEX.

From the condensed summary of the contents thus given it will be seen that the completeness of this work renders it of much practical value to all concerned in the prescribing or dispensing of medicines.

GRIFFITH'S MEDICAL FORMULARY—(Continued.)

From a vast number of commendatory notices, the publishers select a few.

A valuable acquisition to the medical practitioner, and a useful book of reference to the apothecary on numerous occasions.—*American Journal of Pharmacy.*

Dr. Griffith's Formulary is worthy of recommendation, not only on account of the care which has been bestowed on it by its estimable author, but for its general accuracy, and the richness of its details.—*Medical Examiner.*

Most cordially we recommend this Universal Formulary, not forgetting its adaptation to druggists and apothecaries, who would find themselves vastly improved by a familiar acquaintance with this every-day book of medicine.—*The Boston Medical and Surgical Journal.*

Pre-eminent among the best and most useful compilations of the present day will be found the work before us, which can have been produced only at a very great cost of thought and labor. A short description will suffice to show that we do not put too high an estimate on this work. We are not cognizant of the existence of a parallel work. Its value will be apparent to our readers from the sketch of its contents above given.

We strongly recommend it to all who are engaged either in practical medicine, or more exclusively with its literature.—*London Medical Gazette.*

A very useful work, and a most complete compendium on the subject of materia medica. We know of no work in our language, or any other, so comprehensive in all its details.—*London Lancet.*

The vast collection of formulæ which is offered by the compiler of this volume, contains a large number which will be new to English practitioners, some of them from the novelty of their ingredients, and others from the unaccustomed mode in which they are combined; and we doubt not that several of these might be advantageously brought into use. The authority for every formula is given, and the list includes a very numerous assemblage of Continental, as well as of British and American writers of repute. It is, therefore, a work to which every practitioner may advantageously resort for hints to increase his stock of remedies and of forms of prescription.

The other indices facilitate reference to every article in the "Formulary;" and they appear to have been drawn up with the same care as that which the author has evidently bestowed on every part of the work.—*The British and Foreign Medical Chirurgical Review.*

The work before us is all that it professes to be, viz.: "a compendious collection of formulæ and pharmaceutical processes." It is such a work as was much needed, and should be in the hands of every practitioner who is in the habit of compounding medicines.—*Transylvania Medical Journal.*

This seems to be a very comprehensive work, so far as the range of its articles and combinations is concerned, with a commendable degree of brevity and condensation in their explanation.

It cannot fail to be a useful and convenient book of reference to the two classes of persons to whom it particularly commends itself in the title-page.—*The N. W. Medical and Surgical Journal.*

It contains so much information that we very cheerfully recommend it to the profession.—*Charleston Med. Journal.*

To the more advanced practitioner, it affords occasional assistance in reminding him of combinations which have stood the test of time, and in which experience has shown some superiority of the associated means over their simple and unconnected application. The pharmacist will also find advantages in its possession, in the positions in which he is frequently placed, either in the demands of his occupation for judicious formulæ, or prescription of particular combinations under unusual or unfamiliar conventional names, in the extraction of various active principles, of vegetable origin, and in the production of those chemical compounds which, by choice or necessity, he may deem advisable to prepare for himself.

The sources from which the formulæ have been derived are appended to each formula, and are very numerous, embracing names of high reputation in medical and pharmaceutical science, the former giving authority for the rational constitution of the formulæ and their applicability to particular states or stages of disease, and the latter the eligibility of the processes and pharmaceutical preparations which they have recommended.—*The American Journal of the Medical Sciences.*

Well adapted to supply the actual wants of a numerous and varied class of persons.—*N. Y. Journal of Medicine.*

CHRISTISON & GRIFFITH'S DISPENSATORY.—(A New Work.)

A DISPENSATORY,

OR, COMMENTARY ON THE PHARMACOPŒIAS OF GREAT BRITAIN AND THE UNITED STATES: COMPRISING THE NATURAL HISTORY, DESCRIPTION, CHEMISTRY, PHARMACY, ACTIONS, USES, AND DOSES OF THE ARTICLES OF THE MATERIA MEDICA.

BY ROBERT CHRISTISON, M. D., V. P. R. S. E.,

President of the Royal College of Physicians of Edinburgh; Professor of Materia Medica in the University of Edinburgh, etc.

Second Edition, Revised and Improved,

WITH A SUPPLEMENT CONTAINING THE MOST IMPORTANT NEW REMEDIES.

WITH COPIOUS ADDITIONS,

AND TWO HUNDRED AND THIRTEEN LARGE WOOD ENGRAVINGS.

BY R. EGLESFELD GRIFFITH, M. D.,

Author of "A Medical Botany," etc.

In one very large and handsome octavo volume, of over one thousand closely printed pages,

With numerous Wood-cuts.

BEAUTIFULLY PRINTED ON FINE WHITE PAPER.

Presenting an immense quantity of matter at an unusually low price.

It is enough to say that it appears to us as perfect as a Dispensatory, in the present state of pharmaceutical science, could be made.—*The Western Journal of Medicine and Surgery.*

DUNGLISON'S THERAPEUTICS.
NEW AND IMPROVED EDITION.—(Just Issued.)

GENERAL THERAPEUTICS AND MATERIA MEDICA;

ADAPTED FOR A MEDICAL TEXT-BOOK,

BY ROBLEY DUNGLISON, M. D.,

Professor of Institutes of Medicine, &c., in Jefferson Medical College; Late Professor of *Materia Medica*, &c. in the Universities of Maryland and Virginia, and in Jefferson Medical College.

FOURTH EDITION, MUCH IMPROVED.

With One Hundred and Eighty-two Illustrations.

In two large and handsomely printed octavo volumes.

The present edition of this standard work has been subjected to a thorough revision both as regards style and matter, and has thus been rendered a more complete exponent than heretofore of the existing state of knowledge on the important subjects of which it treats. The favor with which the former editions have everywhere been received seemed to demand that the present should be rendered still more worthy of the patronage of the profession, and of the medical student in particular, for whose use more especially it is proposed; while the number of impressions through which it has passed has enabled the author so to improve it as to enable him to present it with some degree of confidence as well adapted to the purposes for which it is intended. In the present edition, the remedial agents of recent introduction have been inserted in their appropriate places; the number of illustrations has been greatly increased, and a copious index of diseases and remedies has been appended, improvements which can scarcely fail to add to the value of the work to the therapeutical inquirer.

The publishers, therefore, confidently present the work as it now stands to the notice of the practitioner as a trustworthy book of reference, and to the student, for whom it was more especially prepared, as a full and reliable text-book on General Therapeutics and *Materia Medica*.

Notwithstanding the increase in size and number of illustrations, and the improvements in the mechanical execution of the work, its price has not been increased.

In this work of Dr. Dunglison, we recognize the same untiring industry in the collection and embodying of facts on the several subjects of which he treats, that has heretofore distinguished him, and we cheerfully point to these volumes, as two of the most interesting that we know of. In noticing the additions to this, the fourth edition, there is very little in the periodical or annual literature of the profession, published in the interval which has elapsed since the issue of the first, that has escaped the careful search of the author. As a book for reference, it is invaluable.—*Charleston Med. Journal and Review.*

It may be said to be the work now upon the subjects upon which it treats.—*Western Lancet.*

As a text book for students, for whom it is particularly designed, we know of none superior to it.—*St. Louis Medical and Surgical Journal.*

It purports to be a new edition, but it is rather a new book, so greatly has it been improved both in the amount and quality of the matter which it contains.—*N. O. Medical and Surgical Journal.*

We bespeak for this edition from the profession an increase of patronage over any of its former ones, on account of its increased merit.—*N. Y. Journal of Medicine.*

We consider this work unequalled.—*Boston Med. and Surg. Journal.*

NEW AND MUCH IMPROVED EDITION—Brought up to 1851.—(Now Ready.)

NEW REMEDIES,
WITH FORMULÆ FOR THEIR ADMINISTRATION.

BY ROBLEY DUNGLISON, M. D.,

PROFESSOR OF THE INSTITUTES OF MEDICINE, ETC. IN THE JEFFERSON MEDICAL COLLEGE OF PHILADELPHIA.

Sixth Edition, with extensive Additions.

In one very large octavo volume, of over seven hundred and fifty pages.

The fact that this work has rapidly passed to a SIXTH EDITION is sufficient proof that it has supplied a desideratum to the profession in presenting them with a clear and succinct account of all new and important additions to the *materia medica*, and novel applications of old remedial agents. In the preparation of the present edition, the author has striven to render the volume worthy of a continuance of the favor with which it has been received, as is sufficiently shown by the increase of about one hundred parts in the size of the work. The necessity of such large additions arises from the fact that the last few years have been rich in valuable gifts to Therapeutics; and amongst these, ether, chloroform, and other so-called anesthetics, are worthy of special attention. They have been introduced since the appearance of the last edition of the "New Remedies." Other articles have been proposed for the first time, and the experience of observers has added numerous interesting facts to our knowledge of the virtues of remedial agents previously employed.

The therapeutical agents now first admitted into this work, some of which have been newly introduced into pharmacology, and the old agents brought prominently forward with novel applications, and which may consequently be regarded as *New Remedies*, are the following:—*Adansonia digitata*, Benzoin of Ammoniac, Valerianate of Bismuth, Sulphate of Cadmium, Chloroform, Collodion, *Cantharidal Collodion*, *Cotyledon Umbellatus*, Sulphuric Ether, Strong Chloric Ether, Compound Ether, *Utra Brasiliensis*, *Iberis Amara*, Iodine Acid, Iodide of Chloride of Mercury, Powdered Iron, Citrate of Magnesia Oxide of Iron, Citrate of Iron and Magnesia, Sulphate of Iron and Alumina, Tannate of Iron, Valerianate of Iron, Nitrate of Lead, Lemon Juice, Citrate of Magnesia, Salts of Manganese, Oleum Cadmium, Arsenite of Quinia, Hydriodate of Iron and Quinia, *Sanicula Maritandica*, and *Sumbul*.

MOHR, REDWOOD, AND PROCTER'S PHARMACY.—Just Issued.

PRACTICAL PHARMACY.

COMPRISING THE ARRANGEMENTS, APPARATUS, AND MANIPULATIONS OF THE PHARMACEUTICAL SHOP AND LABORATORY.

BY FRANCIS MOHR, Ph. D.,
Assessor Pharmacie of the Royal Prussian College of Medicine, Coblenz;
AND THEOPHILUS REDWOOD,
Professor of Pharmacy in the Pharmaceutical Society of Great Britain.

EDITED, WITH EXTENSIVE ADDITIONS, BY PROFESSOR WILLIAM PROCTER,
Of the Philadelphia College of Pharmacy.

In one handsomely printed octavo volume, of 570 pages, with over 500 engravings on wood.

To physicians in the country, and those at a distance from competent pharmacists, as well as to apothecaries, this work will be found of great value, as embodying much important information which is to be met with in no other American publication.

After a pretty thorough examination, we can recommend it as a highly useful book, which should be in the hands of every apothecary. Although no instruction of this kind will enable the beginner to acquire that practical skill and readiness which experience only can confer, we believe that this work will much facilitate their acquisition, by indicating means for the removal of difficulties as they occur, and suggesting methods of operation in conducting pharmaceutic processes which the experimenter would only hit upon after many unsuccessful trials; while there are few pharmacists, of however extensive experience, who will not find in it valuable hints that they can turn to use in conducting the affairs of the shop and laboratory. The mechanical execution of the work is in a style of unusual excellence. It contains about five hundred and seventy large octavo pages, handsomely printed on good paper, and illustrated by over five hundred remarkably well executed wood-cuts of chemical and pharmaceutical apparatus. It comprises the whole of Mohr and Redwood's book, as published in London, rearranged and classified by the American editor, who has added much valuable new matter, which has increased the size of the book more than one-fourth, including about one hundred additional wood-cuts.—*The American Journ. of Pharmacy.*

It is a book, however, which will be in the hands of almost every one who is much interested in pharmaceutical operations, as we know of no other publication so well calculated to fill a void long felt.—*The Medical Examiner.*

The country practitioner who is obliged to dispense his own medicines, will find it a most valuable assistant.—*Monthly Journal and Repository.*

The book is strictly practical, and describes only manipulations or methods of performing the numerous processes the pharmacist has to go through, in the preparation and manufacture of medicines, together with all the apparatus and fixtures necessary thereto. On these matters, this work is very full and complete, and details, in a style uncommonly clear and lucid, not only the more complicated and difficult processes, but those not less important ones, the most simple and common. The volume is an octavo of five hundred and seventy-six pages. It is elegantly illustrated with a multitude of neat wood engravings, and is unexceptionable in its whole typographical appearance and execution. We take great satisfaction in commending this so much needed treatise, not only to those for whom it is more specially designed, but to the medical profession generally—is every one, who, in his practice, has occasion to prepare, as well as administer medical agents.—*Buffalo Medical Journal.*

NEW AND COMPLETE MEDICAL BOTANY.

MEDICAL BOTANY;

OR, A DESCRIPTION OF ALL THE MORE IMPORTANT PLANTS USED IN MEDICINE, AND OF THEIR PROPERTIES, USES, AND MODES OF ADMINISTRATION.

BY R. EGLESFELD GRIFFITH, M. D., &c. &c.

In one large 8vo. vol. of 704 pages, handsomely printed, with nearly 350 illustrations on wood.

One of the greatest acquisitions to American medical literature. It should by all means be introduced at the very earliest period, into our medical schools, and occupy a place in the library of every physician in the land.—*Southwestern Medical Advocate.*

Admirably calculated for the physician and student—we have seen no work which promises greater advantages to the profession.—*N. O. Medical and Surgical Journal.*

One of the few books which supply a positive deficiency in our medical literature.—*Western Lancet.*
We hope the day is not distant when this work will not only be a text-book in every medical school and college in the Union, but find a place in the library of every private practitioner.—*N. Y. Journ. of Medicine.*

ELLIS'S MEDICAL FORMULARY.—Improved Edition.

THE MEDICAL FORMULARY:

BEING A COLLECTION OF PRESCRIPTIONS, DERIVED FROM THE WRITINGS AND PRACTICE OF MANY OF THE MOST EMINENT PHYSICIANS OF AMERICA AND EUROPE.

To which is added an Appendix, containing the usual Dietetic Preparations and Antidotes for Poisons.

THE WHOLE ACCOMPANIED WITH A FEW BRIEF PHARMACEUTIC AND MEDICAL OBSERVATIONS.

BY BENJAMIN ELLIS, M. D.

NINTH EDITION, CORRECTED AND EXTENDED, BY SAMUEL GEORGE MORTON, M. D.

In one neat octavo volume of 268 pages.

CARPENTER ON ALCOHOLIC LIQUORS.—(A New Work.)

A Prize Essay on the Use of Alcoholic Liquors in Health and Disease. By William B. Carpenter, M. D., author of "Principles of Human Physiology," &c. In one 12mo. volume.

NEW AND IMPROVED EDITION—(Just Issued.)

ELEMENTARY CHEMISTRY,

THEORETICAL AND PRACTICAL.

BY GEORGE FOWNES, PH. D.,

Chemical Lecturer in the Middlesex Hospital Medical School, &c. &c.

WITH NUMEROUS ILLUSTRATIONS.

THIRD AMERICAN, FROM A LATE LONDON EDITION. EDITED, WITH ADDITIONS,

BY ROBERT BRIDGES, M. D.,

Professor of General and Pharmaceutical Chemistry in the Philadelphia College of Pharmacy, &c. &c.

In one large royal 12mo. vol., of over 500 pages, with about 180 wood-cuts, sheep or extra cloth.

At the time of his death, Professor Fownes had just completed the revision of this work for his third edition, and, at his request, Dr. H. Bence Jones undertook the office of seeing it through the press, and making such additions in the department of Animal Chemistry as were rendered necessary by the numerous discoveries daily making in that branch of the science. The task of the American editor, therefore, has merely been to add such new matter as may since have appeared, and to adapt the whole to the wants of the American student, by appending in the form of notes such points of interest as would be calculated to retain the position which the original has so justly obtained, and to maintain it on an equality with the rapid advance of chemical science. It will, therefore, be found considerably enlarged and greatly improved. Notwithstanding its increase in size, it has been kept at its former extremely low price, and may now be considered as one of the

CHEAPEST TEXT-BOOKS ON CHEMISTRY NOW EXTANT.

The work of Dr. Fownes has long been before the public, and its merits have been fully appreciated as the best text-book on Chemistry now in existence. We do not, of course, place it in a rank superior to the works of Brande, Graham, Turner, Gregory, or Gmelin, but we say that, as a work for students, it is preferable to any of them.—*London Journal of Medicine.*

The rapid sale of this Manual evinces its adaptation to the wants of the student of chemistry, whilst the well known merits of its lamented author have constituted a guarantee for its value, as a faithful exposition of the general principles and most important facts of the science to which it professes to be an introduction.

We have only to add, that Dr. Bence Jones appears to have performed his editorial task most thoroughly, the want of the author's final supervision being nowhere discoverable.—*The British and Foreign Medical-Chirurgical Review.*

A work well adapted to the wants of the student. It is an excellent exposition of the chief doctrines and facts of modern chemistry, originally intended as a guide to the lectures of the author, corrected by his own hand shortly before his death in 1849, and recently revised by Dr. Bence Jones, who has made some additions to the chapter on animal chemistry. Although not intended to supersede the more extended treatises on chemistry, Professor Fownes' Manual may, we think, be often used as a work of reference, even by those advanced in the study, who may be desirous of refreshing their memory on some forgotten point. The aim of the work, and still more the condensed yet perspicuous style in which it is written, absolve it from the charges very properly urged against most manuals termed popular, viz., of omitting details of indispensable importance, of avoiding technical difficulties, instead of explaining them, and of treating subjects of high scientific interest in an unscientific way.—*Edinburgh Monthly Journal of Medical Science.*

BOWMAN'S MEDICAL CHEMISTRY—(Just Issued.)

PRACTICAL HANDBOOK OF MEDICAL CHEMISTRY.

BY JOHN E. BOWMAN, M. D.

In one neat volume, royal 12mo., with numerous illustrations.

We cannot too highly commend the very elaborate, yet clear and distinct manner, in which the appearances of these fluids, and their variations in disease, are described. To the practitioner, the book is especially recommended, as giving a very clear account of many chemical matters, which must be ever coming before him in his daily practice. Every practitioner, and every student of clinical medicine, should endeavor to enrich his collection of books with Mr. Bowman's little volume.—*London Journal of Medicine.*

Mr. Bowman has succeeded in supplying a desideratum in medical literature. In the little volume before us, he has given a concise but comprehensive account of all matters in chemistry which the man in practice may desire to know.—*Lancet.*

BY THE SAME AUTHOR—(Lately Issued.)

INTRODUCTION TO PRACTICAL CHEMISTRY, Including Analysis.

With Numerous Illustrations. In one neat volume, royal 12mo.

GARDNER'S MEDICAL CHEMISTRY.

MEDICAL CHEMISTRY,

FOR THE USE OF STUDENTS AND THE PROFESSION:

BEING A MANUAL OF THE SCIENCE, WITH ITS APPLICATIONS TO TOXICOLOGY, PHYSIOLOGY, THERAPEUTICS, HYGIENE, &c.

BY D. PEREIRA GARDNER, M. D.

In one handsome royal 12mo. volume, with illustrations.

New Edition, Preparing.—THE ELEMENTS OF CHEMISTRY.

INCLUDING THE APPLICATION OF THE SCIENCE TO THE ARTS. WITH NUMEROUS ILLUSTRATIONS.

BY THOMAS GRAHAM, F. R. S., L. E. & D.

WITH NOTES AND ADDITIONS BY ROBERT BRIDGES, M. D., &c. &c.

SIMONS' ANIMAL CHEMISTRY, with Reference to the Physiology and Pathology of Man. By G. E. Darr. One vol. 8vo., 700 pages.

TAYLOR'S MEDICAL JURISPRUDENCE.
MEDICAL JURISPRUDENCE.

BY ALFRED S. TAYLOR,

SECOND AMERICAN, FROM THE THIRD AND ENLARGED LONDON EDITION.
 With numerous Notes and Additions, and References to American Practice and Law.

BY R. E. GRIFFITH, M. D.

In one large octavo volume.

This work has been much enlarged by the author, and may now be considered as the standard authority on the subject, both in England and this country. It has been thoroughly revised, in this edition, and completely brought up to the day with reference to the most recent investigations and decisions. No further evidence of its popularity is needed than the fact of its having, in the short time that has elapsed since it originally appeared, passed to three editions in England, and two in the United States.

We recommend Mr. Taylor's work as the ablest, most comprehensive, and, above all, the most practically useful book which exists on the subject of legal medicine. Any man of sound judgment, who has mastered the contents of Taylor's "Medical Jurisprudence," may go into a court of law with the most perfect confidence of being able to acquit himself creditably.—*Medico-Chirurgical Review*.

The most elaborate and complete work that has yet appeared. It contains an immense quantity of cases lately tried, which entitle it to be considered what Beck was in its day.—*Dublin Medical Journal*.

TAYLOR ON POISONS.

ON POISONS,
IN RELATION TO MEDICAL JURISPRUDENCE AND MEDICINE.

BY ALFRED S. TAYLOR, F. R. S., &c.

EDITED, WITH NOTES AND ADDITIONS, BY R. E. GRIFFITH, M. D.

In one large octavo volume, of 688 pages.

The most elaborate work on the subject that our literature possesses.—*Brit. and For. Medico-Chirur. Review*.

One of the most practical and trustworthy works on Poisons in our language.—*Western Journal of Med.*
 It contains a vast body of facts, which embrace all that is important in toxicology, all that is necessary to the guidance of the medical jurist, and all that can be desired by the lawyer.—*Medico-Chirurgical Review*.

It is, so far as our knowledge extends, incomparably the best upon the subject; in the highest degree creditable to the author, entirely trustworthy, and indispensable to the student and practitioner.—*N. Y. Annalist*.

BEALE ON HEALTH—JUST READY.

THE LAWS OF HEALTH IN RELATION TO MIND AND BODY.

A SERIES OF LETTERS FROM AN OLD PRACTITIONER TO A PATIENT.

BY LIONEL JOHN BEALE, M. R. C. S., &c.

In one handsome volume, royal 12mo., extra cloth.

The "Laws of Health," in relation to mind and body, is a book which will convey much instruction to non-professional readers; they may, from these letters, glean the principles upon which young persons should be educated, and derive much useful information, which will apply to the preservation of health at all ages.—*Med. Times*.

GREGORY ON ANIMAL MAGNETISM—(Now Ready.)

LETTERS TO A CANDID ENQUIRER
ON ANIMAL MAGNETISM.

DESCRIPTION AND ANALYSIS OF THE PHENOMENA. DETAILS OF FACTS AND CASES.

BY WILLIAM GREGORY, M. D., F. R. S. E.,

Professor of Chemistry in the University of Edinburgh, &c.

In one neat volume, royal 12mo., extra cloth.

TRANSACTIONS OF THE
AMERICAN MEDICAL ASSOCIATION.

VOLUME I. FOR 1848, VOL. II. FOR 1849, VOL. III. FOR 1850.

Large octavo, extra cloth, or paper covers for mailing.

Any volume sold separate, or the whole in sets at a reduced price.

Orders for the supply of Medical Societies should be sent direct to the Treasurer of the Association, Isaac Hays, M. D., care of Blanchard & Lea, with the amount enclosed.

DUNGLISON ON HUMAN HEALTH—HUMAN HEALTH, or the Influence of Atmosphere and Locality, Change of Air and Climate, Seasons, Food, Clothing, Bathing, Exercise, Sleep, &c. &c. on healthy man; constituting Elements of Hygiene. Second edition, with many modifications and additions. By Robley Dunglison, M. D., &c. &c. In one octavo volume of 464 pages.

DUNGLISON'S MEDICAL STUDENT.—The Medical Student, or Aids to the Study of Medicine. Revised and Modified Edition. 1 vol. royal 12mo., extra cloth. 312 pp.

BARTLETT'S PHILOSOPHY OF MEDICINE.—An Essay on the Philosophy of Medical Science. In one handsome 8vo. volume. 312 pp.

BARTLETT ON CERTAINTY IN MEDICINE.—An Inquiry into the Degree of Certainty in Medicine, and into the Nature and Extent of its Power over Disease. In one vol. royal 12mo. 84 pp.

LANE MEDICAL LIBRARY

To avoid fine, this book should be returned on
or before the date last stamped below.
